Banco Bilbao Vizcaya Argentaria, S.A.

(incorporated with limited liability in Spain)

3(a)(2) Notes (as defined below) unconditionally and irrevocably guaranteed by

Banco Bilbao Vizcaya Argentaria, S.A., New York Branch

(incorporated with limited liability in Spain)

Under this €6,000,000,000 Structured Medium Term Securities Programme (the "**Programme**"), each of BBVA Global Markets B.V. and BBVA Global Securities B.V. may from time to time issue securities ("**Securities**") denominated in any currency agreed with the relevant Dealer (as defined below). Securities may be in the form of Notes ("**Notes**") or certificates ("**Certificates**") as specified in the relevant Issue Terms (as defined below). As used herein, "**Issuer**" means BBVA Global Markets B.V. or BBVA Global Securities B.V., as the context requires.

This document (this "**Base Prospectus**") constitutes a base prospectus in respect of all Securities other than Exempt Securities (as defined below) issued under the Programme for the purposes of Article 8 of the Prospectus Regulation (as defined below). The terms and conditions of the Securities (the "**Conditions**") will comprise the General Conditions, each Annex specified as applicable in the completed Issue Terms (each as defined below). This Base Prospectus, any supplement to this Base Prospectus (a "**Supplement to this Base Prospectus**"), any applicable Annex and the Issue Terms for a Series will comprise the "**Offering Documents**".

Certain Notes issued by BBVA Global Securities B.V. and the guarantee thereof will be offered pursuant to an exemption from registration under the U.S. Securities Act of 1933, as amended (the "**Securities Act**"), provided by Section 3(a)(2) of the Securities Act ("**3(a)(2) Notes**").

The satisfaction of the Issuer's economic obligations (in cash and in deliverable assets (if applicable)) in respect of the Securities will be unconditionally and irrevocably guaranteed pursuant to a guarantee governed by Spanish law entered into by Banco Bilbao Vizcaya Argentaria, S.A. ("**BBVA**" or the "**Guarantor**") (the "**Spanish Law Guarantee**"), except that the satisfaction of BBVA Global Securities B.V.'s economic obligations in respect of the 3(a)(2) Notes will be unconditionally and irrevocably guaranteed pursuant to a guarantee governed by New York law entered into by Banco Bilbao Vizcaya Argentaria, S.A., acting through its New York Branch (the "**New York Branch**") (the "**New York Law Guarantee**"). As used herein, "**Guarantee**" refers to the Spanish Law Guarantee or the New York Law Guarantee, or the Spanish Law Guarantee and the New York Law Guarantee collectively, as the context requires. The Guarantor and its consolidated subsidiaries are referred to herein as the "**Group**".

Securities may be issued in bearer or registered form (respectively "**Bearer Securities**" and "**Registered Securities**"); however, the 3(a)(2) Notes will be issued only as Registered Securities.

Securities may be issued whose return (whether in respect of any interest payable on such Securities and/or their redemption amount) is linked to one or more indices ("**Index Linked Securities**"), one or more shares or depository receipts ("**Equity Linked Securities**"), one or more inflation indices ("**Inflation Linked Securities**"), one or more exchange traded fund shares ("**ETF Linked Securities**"), one or more fund shares or units ("**Fund Linked Securities**"), the credit of a specified entity or entities ("**Credit Linked Securities**"), one or more foreign exchange rates ("**Foreign Exchange (FX) Rate Linked Securities**"), one or more EUA contracts ("**EUA Contract Linked Securities**") or any combination thereof ("**Combination Securities**") as more fully described herein. Securities may provide that settlement will be by way of cash settlement ("**Cash Settled Securities**") or physical delivery ("**Physically Settled Securities**") as provided in the Issue Terms.

The maximum aggregate nominal amount of all Securities from time to time outstanding under the Programme will not exceed €6,000,000,000 (or its equivalent in other currencies). Securities may be issued on a continuing basis to one or more dealers appointed from time to time by the Issuer (the "**Dealers**" and each a "**Dealer**"). References in this Base Prospectus to the "**relevant Dealer**" shall, in the case of an issue of Securities being (or intended to be) subscribed by more than one Dealer, be to all Dealers agreeing to subscribe for such Securities as designated in each specific issue of Securities.

Potential investors should ensure that they understand the nature of the relevant Securities and the extent of their exposure to risks and that they consider the suitability of the relevant Securities as an investment in the light of their own circumstances and financial condition. An investment in Securities may involve a high degree of risk and potential investors should be prepared to sustain a total loss of the purchase price of their Securities. For a discussion of these risks see the "Risk Factors" section on pages 11 to 58 below.

This Base Prospectus (as supplemented as at the relevant time, if applicable) is valid for 12 months from its date in relation to Securities which are to be admitted to trading on a regulated market in the European Economic Area (the "**EEA**") and/or offered to the public in the EEA other than in the circumstances where an exemption is available under Article 1(4) and/or 3(2) of the Prospectus Regulation (as defined below). The obligation to supplement this Base Prospectus in the event of a significant new factor, material mistake or material inaccuracy does not apply when this Base Prospectus is no longer valid. This Base Prospectus has been approved as a base prospectus by the Central Bank of Ireland, as competent authority under Regulation (EU) 2017/1129 (the "**Prospectus Regulation**"). The Central Bank of Ireland only approves this Base Prospectus as meeting the standards of completeness, comprehensibility and

consistency imposed by the Prospectus Regulation. Such approval should not be considered as an endorsement of the Issuer or Guarantor or the quality of the Securities that are the subject of this Base Prospectus. Investors should make their own assessment as to the suitability of investing in the Securities. Such approval relates only to Securities that are to be admitted to trading on the regulated market of Euronext Dublin (the "**Regulated Market**") or on another regulated market for the purposes of the Prospectus Regulation and/or that are to be offered to the public in any member state of the EEA in circumstances that require the publication of a prospectus.

Application has been made to the Irish Stock Exchange plc trading as Euronext Dublin ("**Euronext Dublin**") for Securities issued under the Programme during the period of 12 months from the date of this Base Prospectus to be admitted to its official list (the "**Official List**") and trading on the Regulated Market. References in this Base Prospectus to Securities being listed (and all related references) shall mean that such Securities have been listed and admitted to the Official List and trading on the Regulated Market or any other stock exchange specified in the Issue Terms of the Securities. Euronext Dublin is a regulated market for the purposes of Directive 2014/65/EU (as amended, "**MiFID II**"). Application may also be made for Securities issued under the Programme to be admitted to trading on Nasdaq Helsinki Oy or Nasdaq Stockholm AB and/or to be listed on any other stock exchange specified in the applicable Issue Terms. The regulated markets of Nasdaq Helsinki Oy and Nasdaq Stockholm AB are regulated markets for the purposes of MiFID II. 3(a)(2) Notes will be Exempt Securities (as defined below) and will not be listed on any securities exchange or quotation system in the United States.

The requirement to publish a prospectus under the Prospectus Regulation only applies to Securities which are to be admitted to trading on a regulated market in the EEA and/or offered to the public in the EEA other than in circumstances where an exemption is available under Article 1(4) and/or 3(2) of the Prospectus Regulation. References in this Base Prospectus to "**Exempt Securities**" are to Securities for which no prospectus is required to be published under the Prospectus Regulation. The Central Bank of Ireland has neither approved nor reviewed information contained in this Base Prospectus in connection with Exempt Securities.

Application has been made to the Vienna Stock Exchange for the approval of the Base Prospectus as Base Listing Particulars (the "**Base Listing Particulars**") with respect to the Exempt Securities issued under the Programme during the period of 12 months from the date of this Base Prospectus to be admitted to listing and trading on the Vienna Stock Exchange's multilateral trading facility (the "**Vienna MTF**"). The Vienna MTF is not a regulated market for the purposes of MiFID II. Application may also be made to the multilateral trading facility of securitised derivative financial instruments organised and managed by Borsa Italiana S.p.A ("**SeDeX**") for Securities to be admitted to trading on SeDeX, the Euro TLX, the multilateral trading facility organised and managed by Borsa Italiana S.p.A. ("**Euro TLX**"), for Securities to be admitted to trading Euro TLX, and/or any other stock exchange specified in the applicable Issue Terms. SeDeX and Euro TLX are not regulated markets for the purposes of MiFID II.

Save where expressly provided or the context otherwise requires, where Exempt Securities are to be admitted to trading on the Vienna MTF, or any other multilateral trading facility, references in this document to Base Prospectus shall be construed to be to Base Listing Particulars.

Neither the Offering Documents nor any other marketing materials in relation to the Securities shall be distributed in Spain without complying with all legal and regulatory requirements under Spanish securities laws and regulations and no publicity of any kind shall be made in Spain.

If and to the extent the Securities will be publicly offered, directly or indirectly, in Switzerland in the meaning of the Swiss Federal Act on Financial Services of June 15, 2018 ("**FinSA**") or if the Securities shall be admitted to trading on a Swiss trading venue in the sense of the Swiss Federal Financial Market Infrastructure Act of June 19, 2015 ("**FMIA**"), e.g. the SIX Swiss Exchange, a prospectus pursuant to the requirements of Article 40 et seq. FinSA would be required. Such requirement may be met on the basis of (i) an automatic recognition of this Base Prospectus in Switzerland under the rules of the FinSA by way of a notification of, and a registration of the Base Prospectus with a reviewing body (*Pflichtstelle*) within the meaning of Article 52 FinSA (a "**Swiss Reviewing Body**") pursuant to the rules of the FinSA, as implemented by the relevant Swiss Reviewing Body and (ii) depositing the relevant Final Terms with the Swiss Reviewing Body. Such a registration pursuant to (i) would be possible for a Base Prospectus that is approved by the Central Bank of Ireland for offerings to retail investors, as competent authority under the Prospectus Regulation, i.e. for any Securities other than Exempt Securities.

Except to the extent the Base Prospectus is registered with the Swiss Reviewing Body under the rules of the FinSA, neither this Programme nor any other offering or marketing material relating to the Securities constitutes a prospectus pursuant to the FinSA, and neither this Programme nor any other offering or marketing material relating to the Securities may be publicly distributed or otherwise made publicly available in Switzerland, unless the requirements of FinSA and FinSO for such public distribution are complied with.

None of the Securities constitute a participation in a collective investment scheme within the meaning of the Swiss Federal Act on Collective Investment Schemes of June 23, 2006 ("**CISA**") and are neither subject to the authorisation nor the supervision by the Swiss Financial Market Supervisory Authority FINMA and investors do not benefit from the specific investor protection provided under the CISA.

This Base Prospectus is being provided in the United States to (i) a limited number of "qualified institutional buyers" (each a "**QIB**") as defined in Rule 144A under the Securities Act ("**Rule 144A**") who are also "qualified purchasers" (each a "**QP**") within the meaning of Section 2(a)(51)(A) of the United States Investment Company Act of 1940, as amended (the "**1940 Act**"), and the rules and regulations thereunder, and Institutional Accredited Investors (as defined below) (each an "**IAI**") who are also QPs that are investors in Securities issued by BBVA Global Markets B.V., (ii) a limited number of QIBs and IAIs (none of which must be QPs) that are investors in Securities issued by BBVA Global Securities B.V. (other than 3(a)(2) Notes) and (iii) investors in 3(a)(2) Notes, in each case, for informational use solely in connection with the consideration of the purchase of the Notes being offered hereby. Its use for any other purpose in the United States is not authorised. The Securities (other than the 3(a)(2) Notes), the Spanish Law Guarantee and any Entitlement(s) (as defined below) have not been and will not be registered under the Securities Act or any U.S. state securities laws and may not be offered or sold in the United States or to, or for the account or benefit of, U.S. persons (as defined in Regulation S under the Securities Act ("**Regulation S**") unless an exemption from the registration requirements of the Securities Act is available and in accordance with all applicable securities laws of any state of the United States and any other jurisdiction. The 3(a)(2) Notes and the New York Law Guarantee will be offered pursuant to an exemption from registration provided by Section 3(a)(2) of the Securities Act. The 3(a)(2) Notes and the New York Law Guarantee are not required to be, and have not been, registered under the Securities Act or with any governmental authority. See "*Form of the Securities*" for a description of the manner and form in which Securities will be issued. The Securities are subject to certain restrictions on transfer, see "*Subscription and Sale and Transfer and Selling Restrictions*". Securities (other than 3(a)(2) Notes) offered in the United States subject to the foregoing restrictions may be offered by BBVA Securities Inc. (in such capacity, the "**Initial Purchaser**"). The Securities, the Guarantee and any Entitlement(s) do not constitute, and have not been marketed as, contracts of sale of a commodity for future delivery (or options thereon) subject to the United States Commodity Exchange Act, as amended (the "**CEA**"), and trading in the Securities has not been approved by the U.S. Commodity Futures Trading Commission pursuant to the CEA. The Securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency of the United States or any other jurisdiction. BBVA Securities Inc. is an affiliate of BBVA Global Securities B.V. and the Guarantor and, as such, will have a "conflict of interest" in any offering of 3(a)(2) Notes in which it participates, as either principal or agent, within the meaning of Rule 5121 of the Financial Industry Regulatory Authority ("**FINRA**") (or any successor rule thereto) ("**Rule 5121**"). Consequently, any such offering will be conducted in compliance with the provisions of Rule 5121. See "*Subscription and Sale and Transfer and Selling Restrictions—Conflicts of Interest*".

IMPORTANT - PROHIBITION OF SALES TO EEA RETAIL INVESTORS AND UK RETAIL INVESTORS. Unless otherwise specified in the Issue Terms relating to the Securities, the Securities issued under the Programme are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to (a) any EEA retail investor or (b) any UK retail investor. For these purposes, an "EEA retail investor" means a person who is one (or more) of: (i) a "retail client" as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended or superseded, the "**Insurance Distribution Directive**"); or (iii) not a qualified investor as defined in the Prospectus Regulation. In addition, a "UK retail investor" means a person who is one (or more) of: (i) a "retail client", as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the "**EUWA**"); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (as amended, the "**FSMA**") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to EEA retail investors has been prepared and therefore offering or selling the Securities or

otherwise making them available to any EEA retail investor may be unlawful under the PRIIPs Regulation. In addition, no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the Securities or otherwise making them available to UK retail investors has been prepared and therefore offering or selling the Securities or otherwise making them available to any UK retail investor may be unlawful under the UK PRIIPs Regulation.

MIFID II PRODUCT GOVERNANCE AND UK MIFIR PRODUCT GOVERNANCE / TARGET MARKET – The applicable Issue Terms in respect of any Securities may include a legend entitled (a) in the case of the EEA, "**MiFID II Product Governance**" and (b) in the case of the UK, "**UK MiFIR Product Governance**", which will outline the target market assessment in respect of the Securities and which channels for distribution of the Securities are appropriate. Any person subsequently offering, selling or recommending the Securities (for the purposes of this paragraph, a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to (a) in the case of the EEA, MiFID II and (b) in the case of the UK, the FCA Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**"), is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for (a) the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the "**MiFID Product Governance Rules**"), any Dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules and (b) for the purpose of the UK MiFIR Product Governance Rules, any Dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

EU BENCHMARK REGULATION – Amounts payable under the Securities or assets deliverable under the Securities may be calculated or otherwise determined by reference to certain reference rates, indices or other variables, which may constitute a benchmark under the Benchmark Regulation (Regulation (EU) 2016/1011) (the "**BMR**"). If any such reference rate, index or variable does constitute such a benchmark, the relevant Issue Terms in respect of any Securities which are not Exempt Securities will indicate whether or not the administrator thereof is included in the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority ("**ESMA Register**") pursuant to Article 36 of the BMR. Not every reference rate, index or variable will fall within the scope of the BMR. Furthermore, transitional provisions in the BMR may have the result that the administrator of a particular benchmark is not required to appear in the register of administrators and benchmarks at the date of the relevant Issue Terms. The registration status of any administrator under the BMR is a matter of public record and, save where required by applicable law, the Issuer does not intend to update any Issue Terms to reflect any change in the registration status of any administrator.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the "**Financial Promotion Order**"), (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as "**relevant persons**"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

IMPORTANT – SWISS RETAIL INVESTORS - If and to the extent the Securities will be offered, sold or advertised, directly or indirectly to retail clients (*Privatkundinnen und -kunden*) ("**Retail Clients**") pursuant to Article 4 para. 2 FinSA a key investor document (*Basisinformationsblatt*) in the sense of Article 58 et seq. of FinSA relating to the Securities (a "**FinSA-KID**") would need to be prepared, unless the Retail Clients shall receive a key information document pursuant to the PRIIPs Regulation instead of a FinSA-KID.

Each of **BBVA Global Markets B.V. and BBVA Global Securities B.V.** is incorporated under Dutch law and has its seat in Amsterdam, the Netherlands but has its tax residency in Spain. The Guarantor is incorporated and has its tax residency in Spain. The guarantor in respect of the **3(a)(2) Notes** is Banco Bilbao Vizcaya Argentaria, S.A., acting through its New York Branch. Potential investors should note the statements on pages 537 to 543 (inclusive) regarding the tax treatment in Spain of income obtained in respect of the Securities.

The Issuer and the Guarantor may agree with the relevant Dealer that Securities may be issued in a form not contemplated by the "*Terms and Conditions of the Securities*" set out herein, in which event a Supplement to this Base Prospectus, if appropriate, will be made available which will describe the effect of the agreement reached in relation to such Securities.

In connection with any offering of Securities under this Base Prospectus, the Dealers are not acting for anyone other than the Issuer and will not be responsible to anyone other than the Issuer for providing the protections afforded to their clients nor for providing advice in relation to the offering.

IMPORTANT INFORMATION RELATING TO THE USE OF THIS BASE PROSPECTUS AND OFFERS OF SECURITIES GENERALLY

This Base Prospectus does not constitute an offer to sell or the solicitation of an offer to buy any Securities in any jurisdiction to any person to whom it is unlawful to make the offer or solicitation in such jurisdiction. The

distribution of this Base Prospectus and the offer or sale of Securities may be restricted by law in certain jurisdictions. The Issuer, the Guarantor and the Dealer(s) do not represent that this Base Prospectus may be lawfully distributed, or that any Securities may be lawfully offered, in compliance with any applicable registration or other requirements in any such jurisdiction, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer, the Guarantor or the Dealer(s) which is intended to permit a public offering of any Securities or distribution of this Base Prospectus in any jurisdiction where action for that purpose is required. Accordingly, no Securities may be offered or sold, directly or indirectly, and neither the Offering Documents nor any advertisement or other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession the Offering Documents or any Securities may come must inform themselves about, and observe, any such restrictions on the distribution of the Offering Documents and the offering and sale of Securities. In particular, there are restrictions on the distribution of the Offering Documents and the offer or sale of Securities in, without limitation, the United States, the United Kingdom and the EEA (including, without limitation, Spain, the Republic of Italy, Germany and France) (see "*Subscription and Sale and Transfer and Selling Restrictions*").

This Base Prospectus has been prepared on the basis that, except to the extent sub-paragraph (ii) below may apply, any offer of Securities in any Member State of the EEA will be made pursuant to an exemption under the Prospectus Regulation from the requirement to publish a prospectus for offers of Securities. Accordingly any person making or intending to make an offer in the EEA of Securities which are the subject of the offering contemplated in this Base Prospectus as completed by Final Terms (or Pricing Supplement, as the case may be) in relation to the offer of those Securities may only do so (i) in circumstances in which no obligation arises for the Issuer, the Guarantor or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation, in each case in relation to such offer, or (ii) if a prospectus for such offer has been approved by the competent authority in the Member State in which the offer is made or, where appropriate, approved in another Member State and notified to the competent authority in that Member State and (in either case) published, all in accordance with the Prospectus Regulation, provided that any such prospectus has subsequently been completed by Final Terms which specify that offers may be made other than pursuant to Article 1(4) of the Prospectus Regulation in that Member State, such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or Final Terms and the Issuer has consented in writing to its use for the purpose of such offer. Except to the extent sub paragraph (ii) above may apply, none of the Issuer, the Guarantor nor any Dealer has authorised, nor do they authorise, the making of any offer of Securities in circumstances in which an obligation arises for the Issuer, the Guarantor or any Dealer to publish or supplement a prospectus for such offer. For the purposes of this provision, the expression "an offer of Securities to the public" in relation to any Securities in any Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities, and the expression "**Prospectus Regulation**" means Regulation (EU) 2017/1129, as amended.

This Base Prospectus has been prepared on the basis that, except to the extent sub-paragraph (ii) may apply, any offer of Securities in the United Kingdom ("**UK**") will be made pursuant to an exemption under the UK Prospectus Regulation and the Financial Services and Markets Act 2000 (as amended, the "**FSMA**") from the requirement to publish a prospectus for offers of Securities. Accordingly any person making or intending to make an offer in the UK of Securities which are the subject of the offering contemplated in this Base Prospectus as completed by Final Terms (or Pricing Supplement, as the case may be) in relation to the offer of those Securities may only do so (i) in circumstances in which no obligation arises for the Issuer, the Guarantor or any Dealer to publish a prospectus pursuant to Article 3 of the UK Prospectus Regulation or section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation, in each case in relation to such offer, or (ii) if a prospectus for such offer has been approved by the Financial Conduct Authority in accordance with the UK Prospectus Regulation and the FSMA, provided that any such prospectus has subsequently been completed by Final Terms which specify that offers may be made other than pursuant to Article 1(4) of the UK Prospectus Regulation and section 86 of the FSMA in the UK, such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or Final Terms and the Issuer has consented in writing to its use for the purpose of such offer. Except to the extent sub paragraph (ii) above may apply, none of the Issuer, the Guarantor nor any Dealer has authorised, nor do they authorise, the making of any offer of Securities in circumstances in which an obligation arises for the Issuer, the Guarantor or any Dealer to publish or supplement a prospectus for such offer. For the purposes of this provision, the expression "an offer of Securities to the public" in relation to any Securities in the UK means the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities, and the

expression "**UK Prospectus Regulation**" means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the "**EUWA**").

This document does not constitute a simplified prospectus in the sense of the CISA in its version dated March 1, 2013 nor a key investor document (*Basisinformationsblatt*) relating to the Securities in the sense of Article 58 et seq. FinSA. **The Securities do not constitute a collective investment scheme within the meaning of the CISA. Therefore, they are not subject to authorisation by the Swiss Financial Market Supervisory Authority FINMA and potential investors do not benefit from the specific investor protection provided under the CISA. Investors bear the credit risk of the Issuer and the Guarantor.**

None of the Issuer, the Guarantor or the Dealer(s) makes any representation to any investor in the Securities regarding the legality of its investments under any applicable laws. Any investor in the Securities should be able to bear the economic risk of an investment in the Securities for an indefinite period of time.

The Securities may not be a suitable investment for all investors. Each potential purchaser of Securities should realise that investing in the Securities entails significant risks and may not be appropriate for purchasers lacking financial expertise. Prospective purchasers should consult their own financial, tax and legal advisors as to the risks entailed by an investment in such Securities and the suitability of such Securities in light of their particular circumstances and ensure that its acquisition is fully consistent with their financial needs and investment policies, is lawful under the laws of the jurisdiction of its incorporation and/or in which it operates, and is a suitable investment for it to make. Each potential investor in the Securities must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor may wish to consider, either on its own or with the help of its financial and other professional advisors, whether it:

- (a) has sufficient knowledge and experience to make a meaningful evaluation of the Securities, the merits and risks of investing in the Securities and the information contained or incorporated by reference in this Base Prospectus or any applicable Supplement to this Base Prospectus and all the information contained in the Issue Terms;
- (b) has access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Securities and the impact the Securities will have on its overall investment portfolio;
- (c) has sufficient financial resources and liquidity to bear all of the risks of an investment in the Securities, including Securities with principal or interest payable in one or more currencies, or where the specified currency for principal or interest payments of the Securities is different from the potential investor's currency;
- (d) understands thoroughly the terms of the Securities and be familiar with the behaviour of any relevant indices and financial markets;
- (e) in respect of Securities linked to the performance of, without limitation, one or more, or a combination of, underlying shares or depositary receipts, indices, rates of interest, other rates, foreign exchange rates, exchange traded fund shares, funds, inflation indices, EUA Contracts and/or entities (together, "**Reference Items**" and each, a "**Reference Item**") (in respect of such Securities, together, "**Reference Item Linked Securities**" and each a "**Reference Item Linked Security**"), understands thoroughly (if necessary, in consultation with the investor's own legal, tax, accountancy, regulatory, investment or other professional advisers) the nature of each such Reference Item Linked Security; and
- (f) is able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

None of the Issuer, the Guarantor, the Dealer or any affiliate of BBVA has given, and will not give, to any potential investor in the Securities (either directly or indirectly) any assurance, advice, recommendation or guarantee as to the merits, performance or suitability of such Securities, and the investor should be aware that the Issuer is acting as an arm's-length contractual counterparty and not as an advisor or fiduciary.

In making an investment decision, investors must rely on their own examination of the Issuer and the Guarantor and the terms of the Securities being offered, including the merits and risks involved.

RISK FACTORS

RISK FACTORS

In purchasing Securities, investors expose themselves to the risk that the Issuer and the Guarantor may become insolvent, subject to early intervention or resolution measures, or otherwise be unable to make all payments due in respect of the Securities. Each of the Issuer and the Guarantor believe that the following factors may affect their ability to fulfil their obligations under Securities issued under the Programme. Most of these factors are contingencies which may or may not occur.

In addition, factors which are material for the purpose of assessing the market risks associated with Securities issued under the Programme are also described below.

The Issuer and the Guarantor believe that the factors described below represent the principal risks inherent in investing in Securities issued under the Programme, but the inability of the Issuer or the Guarantor to pay interest, principal or other amounts on or otherwise perform its obligations in connection with any Securities may occur for other reasons which may not be considered significant risks by either the Issuer or the Guarantor based on information currently available to them or which they may not currently be able to anticipate. Prospective investors should also read the detailed information set out elsewhere in this Base Prospectus and reach their own views prior to making any investment decision.

Prospective investors in the Securities should consider carefully, among other things in the light of their financial circumstances and investment objectives, all of the information in this Base Prospectus and, in particular, the risk factors set forth below (which each of the Issuer and the Guarantor, in its reasonable opinion, believes represent or may represent the risk factors known to it which may affect the Issuer's and/or the Guarantor's ability to fulfil its obligations under the Securities) in making an investment decision. Securityholders may lose the value of their entire investment in certain circumstances.

References herein to "**BBVA**" or to the "**Bank**" shall be read and construed as references to the Guarantor.

The Risk Factors set out below appear under the following headings:

1. **Risk Factors relating to the Issuer.**

- 1.1 The Issuer is dependent on the Guarantor to make payments on the Securities
- 1.2 Certain considerations in relation to the forum upon insolvency of the Issuer
- 1.3 The Issuer may become taxable in a jurisdiction other than Spain

2. **Risk Factors relating to the Guarantor.**

- 2.1. Macroeconomic Risks and Geopolitical Risks
- 2.2. Business Risks
- 2.3. Financial Risks
- 2.4. Legal, Regulatory, Tax and Compliance Risks
- 2.5. Operational Risks

3. **Risk Factors relating to the Securities.**

- 3.1 The Securities may not be a suitable investment for all investors.
- 3.2 Risk Factors associated with Securities that are linked to one or more specific types of Reference Items.
- 3.3 Risk Factors associated generally with Securities that are linked to Reference Item(s).
- 3.4 Risk Factors relating to the structure of a particular issue of Securities.

RISK FACTORS

3.5 Risk Factors regarding the Securities generally.

3.6 Risk Factor relating to Sustainable Securities.

1. Risk Factors relating to the Issuer

1.1 The Issuer is dependent on the Guarantor to make payments on the Securities

The Issuer is a wholly-owned subsidiary of the Guarantor which was established for the purpose of, among others, issuing Securities and on-lending the proceeds within the Group. The Issuer is therefore dependent upon other members of the Group paying interest on and repaying their loans in a timely fashion. Should the Guarantor fail to pay interest on or repay any loan in a timely fashion this will have a material adverse effect on the ability of the Issuer to fulfil its obligations under Securities issued under the Programme.

By virtue of its dependence on the Guarantor, each of the risks described below that affect the Guarantor will also indirectly affect the Issuer.

1.2 Certain considerations in relation to the forum upon insolvency of the Issuer

In the event of insolvency of the Issuer, the court having jurisdiction to open insolvency proceedings and the law applicable to those proceedings and their effects will be determined in accordance with the provisions of Council Regulation (EC) No 848/2015, of May 20, 2015, on insolvency proceedings ("**Regulation 848/2015**"), the Royal Legislative Decree 1/2020, of May 5, 2020, that approved the reinstated provisions of the Spanish Insolvency Law 22/2003, of July 9, 2003, as amended (the "**Spanish Insolvency Law**") and the Dutch Insolvency Law (faillissementswet) of September 30, 1893, as amended (the "**Dutch Insolvency Law**"). Pursuant to these provisions, the courts of the place where the Issuer has its centre of main interests shall have jurisdiction to open insolvency proceedings against it and the law applicable to the insolvency proceedings and their effects will be the law of the place where such proceedings are opened.

Under Regulation 848/2015 the centre of main interests should correspond to the place where the debtor conducts the administration of its interests on a regular basis and is therefore ascertainable by third parties. In the case of a company or legal person, Regulation 848/2015 presumes, in the absence of proof to the contrary, that the place of its registered office is the centre of its main interests. Based on this presumption a Dutch court may consider that it has jurisdiction to open insolvency proceedings against the Issuer. Notwithstanding this presumption, it is arguable that the centre of main interests of the Issuer should be considered to be located in Spain and that the Spanish courts should be the courts with jurisdiction to open insolvency proceedings against it. In addition, even if the centre of main interests of the Issuer were not in Spain, the Spanish court could still open insolvency proceedings (named territorial insolvency proceedings) if they consider that the Issuer has an establishment within the territory of Spain, the effects of which would be limited to the assets of the Issuer situated in Spain.

Securityholders should be aware that, in accordance with the above, in the case of an eventual insolvency of the Issuer, there is uncertainty as to whether the insolvency proceedings would be opened in the Netherlands or in Spain.

1.3 The Issuer may become taxable in a jurisdiction other than Spain and this may increase the aggregate tax burden on the Issuer.

Since its incorporation, the Issuer has had, on a continuous basis, its place of "effective management" in Spain. For Spanish tax purposes, the Issuer will therefore qualify as a tax resident of Spain on the basis of Spanish domestic law and subject to Spanish taxes. For Dutch tax purposes, a company is considered a tax resident of the Netherlands, irrespective the company's place of "effective management", if it is incorporated under Dutch law (the so-called "**Incorporation Rule**") and will as such in principle be subject to Dutch taxes.

This would result in the Issuer being a tax resident in both Spain and the Netherlands. In such event, the so-called tie-breaker provision (the "**Tie-Breaker Provision**") included in Article 4(4) of the Convention between the Netherlands and Spain for the Avoidance of Double Taxation with respect to Taxes on Income and on Net Wealth (the "**Convention**"), determines that the Issuer should qualify solely as a tax resident in Spain for purposes of the Convention, provided that the Issuer's place of "effective management" is in Spain.

The test of "effective management" is largely a question of fact and degree based on all the circumstances, rather than a question of law. Nevertheless, the relevant case law and OECD guidance suggest that the Issuer is likely to be regarded as having become Spanish tax resident from incorporation and remaining so if, as the Issuer intends, (i) most meetings of its executive directors are prepared and held in Spain (and none will be held

RISK FACTORS

in presence in the Netherlands) with a majority of executive directors present in Spain for those meetings; (ii) at those meetings there are full discussions of, and decisions are made regarding, the key strategic issues affecting the Issuer and its subsidiaries; (iii) those meetings are properly minuted; (iv) a majority of our executive directors, together with supporting staff, are based in Spain; and (v) the Issuer has permanent staffed office premises in Spain. These facts and circumstances may change (for example, the directors or the place where board of directors meetings take place may change), and this may result in the Issuer becoming (also) a tax resident of the Netherlands or another jurisdiction.

Furthermore, the applicable tax laws or interpretations thereof, applicable tax treaties, including the Convention and the Tie-Breaker Provision, may change. In the event that the Convention would change, or if Spain and the Netherlands would designate the Convention as a so-called 'covered tax agreement' subject to the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (the "MLI"), the Issuer may become (also) a tax resident of the Netherlands (at least until the moment Spain and the Netherlands will reach an agreement on our tax residency for purposes of the Convention).

Moreover, the Issuer may become subject to income taxes in other countries with regard to the income generated in the respective other country, for example, due to the existence of a permanent establishment or a permanent representative in such other country.

As a consequence, the Issuer's overall effective income tax rate and income tax expense could materially increase, which could have a material adverse effect the Issuer's financial condition.

2. Risk Factors relating to the Guarantor

The description of the risks inherent to the activity of the BBVA Group, its businesses and its operations, as well as the quantitative information on the different risks, based on data referring to the 2021, 2020 and 2019 financial years, and, where appropriate, data referring to the three-month period ended March 31, 2022, are described in this section and it complements what is included in the Consolidated Annual Accounts and Consolidated Management Report for the year ended December 31, 2021, 2020 and 2019 and the quarterly report for the three months ended March 31, 2022.

In the Chapter of Risk Management of the Management Report attached to the Consolidated Annual Accounts for 2021, both the risk factors and the risk principles and policies of the BBVA Group are indicated, as well as the corporate governance scheme on risk management, the internal control model and the tools, circuits and relevant procedures.

The main risk factors that the BBVA Group takes into consideration at the date of this Base Prospectus are detailed below.

2.1 Macroeconomic and Geopolitical Risks

A deterioration in economic conditions or the institutional environment in the countries where the Group operates could have a material adverse effect on the Group's business, financial condition and results of operations

The Group is sensitive to the deterioration of economic conditions or the alteration of the institutional environment of the countries in which it operates, and especially Spain, Mexico and Türkiye, which represented 60.7 per cent., 19.0 per cent. and 8.7 per cent. of the Group's assets as of March 31, 2022, respectively (62.4 per cent., 17.8 per cent. and 8.5 per cent. as of December 31, 2021, respectively, 55.6 per cent., 15.0 per cent. and 8.1 per cent., as of December 31, 2020, respectively, and 52.9 per cent., 15.6 per cent. and 9.2 per cent. as of December 31, 2019, respectively). As of March 31, 2022 and December 31, 2021, the Group's attributable profit amounted to €1,651 and €4,653 million, respectively (€1,651 and €5,069 million adjusted attributable profit), being the percentage on the adjusted attributable profit of Spain, Mexico, Türkiye and South America, 36.4 per cent., 47.1 per cent., 15.1 per cent. and 9.6 per cent., as of March 31, 2022, and 31.2 per cent., 50.7 per cent., 14.6 per cent. and 9.7 per cent. as of December 31, 2021. Being the percentage on the gross margin of Spain, Mexico, Türkiye and South America, 28.0 per cent., 37.8 per cent., 17.3 per cent. and 14.8 per cent., as of March 31, 2022 and 28.1 per cent., 36.1 per cent., 16.2 per cent. and 15.0 per cent. as of December 31, 2021, respectively. Additionally, the Group is exposed to sovereign debt, particularly sovereign debt related to these geographies. Furthermore, the Group has recently increased its shareholding stake in Türkiye Garanti Bankası A.Ş. (Garanti) in an additional 36.12 per cent. (reaching 85.97 per cent.) as a result of the voluntary takeover bid for the shares of Garanti not already owned by BBVA announced in November 2021. See "*The Group depends on its credit ratings and sovereign credit ratings, especially its Spanish ratings*".

RISK FACTORS

In addition to the significant macroeconomic problems triggered by the COVID-19 pandemic, the global economy is currently facing a number of extraordinary challenges. Russia's invasion of Ukraine, the largest military attack on a European state since World War II, has led to significant disruption, instability and volatility in global markets, as well as higher inflation (including by contributing to further increases in the prices of energy, oil and other commodities and further disrupting supply chains) and lower or negative growth. The EU, UK, United States and other governments have imposed significant sanctions and export controls against Russia and Russian interests and threatened additional sanctions and controls.

The conflict represents a significant supply shock for the global economy, which is likely to reinforce the moderating trend in economic growth and add to ongoing inflationary pressures, mainly in European countries, due to their relatively significant economic ties with Ukraine and Russia. The economic effects of the war will likely come mainly through the higher commodity prices, but also through the financial and confidence channels, as well as a through a further deterioration of the problems in global supply chains. In this context, there is a risk that a new escalation of economic sanctions generate a scenario of stagflation, at least in Europe.

The impact of these challenges and measures, as well as potential responses to these measures by Russia, is currently unknown and, while the Group's direct exposure to Ukraine and Russia is limited (€44 million as of March 31, 2022, in loans and advances to customers for non-residents), they could adversely affect the Group's business, financial condition and results of operations. Geopolitical and economic risks have also increased over the past few years as a result of trade tensions between the United States and China, Brexit, the rise of populism and tensions in the Middle East. Growing tensions may lead, among others things, to a deglobalisation of the world economy, an increase in protectionism or barriers to immigration, a general reduction of international trade in goods and services and a reduction in the integration of financial markets, any of which could materially and adversely affect the Group's business, financial condition and results of operations.

Moreover, the world economy could be vulnerable to other factors such as the withdrawal of monetary stimulus due to growing and widespread inflationary pressures, which could cause a significant slowdown in economic growth as well as volatility in financial markets. The central banks of many developed and emerging economies have begun to withdraw the monetary stimulus introduced in previous years and the process of tightening monetary conditions is likely to continue going forward in most economies. In the United States, the Federal Reserve has begun in March 2022 to adjust up the policy rate, which, according to BBVA Research, could converge towards around 2.75 per cent. by the end of 2022. In the Eurozone, the ECB has completed the extraordinary purchase program designed to deal with the pandemic (PEPP) and, despite the fact that the standard program (APP) has been still maintained, asset purchases will moderate in the coming months, paving the way for increases in monetary policy interest rates from the second half of 2022.

Another risk is a sharp slowdown in the global GDP growth caused by a deceleration in the Chinese economy due to the recent restrictions on mobility adopted to try to control the spread of the coronavirus pandemic or other idiosyncratic factors.

The Group bears, among others, the following general risks with respect to the economic and institutional environment in which it operates: a deterioration in economic activity in the countries in which it operates; more persistent inflationary pressures (in March 2022 annual inflation has reached 9.8 per cent. in Spain, 7.5 per cent. in Mexico, 61.1 per cent. in Türkiye, 55.1 per cent. in Argentina, 6.8 per cent. in Peru and 8.5 per cent. in Colombia), which could trigger a more severe tightening of monetary conditions; stagflation due to more intense or prolonged supply crises; changes in exchange rates (From December 31, 2021 to March 31, 2022 the balance recognised under the heading of "accumulated other comprehensive income (loss) - foreign currency translation" in the Balance sheet decreased from €14,988 million to €14,039 million, explained by the appreciation against the euro of some of the currencies of the main geographies where the Group operates against the euro such as the Peruvian sol (9.4 per cent.), Colombian peso (8.4 per cent.) and the Mexican peso (4.8 per cent.); partially offset by the depreciation against the euro of the Turkish lira (6.4 per cent.), and Argentine peso (5.5 per cent.); an unfavourable evolution of the real estate market, to which the Group continues to be significantly exposed; very high oil prices could have a negative impact on disposable income levels in areas that are pure oil consumers, such as Spain or Türkiye, to which the Group is particularly exposed; changes in the institutional environment of the countries in which the Group operates could give rise to sudden and sharp drops in GDP and/or changes in regulatory or government policy, including in terms of exchange controls and restrictions on the distribution of dividends; a growth in the public debt or in the external deficit could lead to a downward revision of the credit ratings of the sovereign debt and even a possible default or restructuring of said debt; and episodes of volatility in the markets, which could cause the Group significant losses.

RISK FACTORS

Risk associated with pandemics like the COVID-19 pandemic could have a material adverse effect on the Group's business, financial condition and results of operations

The COVID-19 (coronavirus) pandemic has adversely affected the world economy, and economic activity and conditions in the countries in which the Group operates. New waves of contagion continue to be a source of concern and the emergence of new strains remains a risk, although increasing vaccination rates will likely continue to reduce its impact on economic activity. Among other challenges, these countries are still dealing with high unemployment levels, relatively weak activity, supply disruptions and increasing inflationary pressures, while public debt has increased significantly due to the support and spending measures implemented by the government authorities. Furthermore, there was an increase in loan losses from both companies and individuals, which has so far been slowed down by the impact of government support measures, including bank payment deferrals, credit with public guarantee and direct aid measures. Likewise, volatility in the financial markets may continue affecting exchange rates and the value of assets and investments, which has adversely affected the Group's capital base and result in the past, and could do so again. There are still uncertainties about the final future impact of the COVID-19 pandemic, mainly if there is an increase in infections caused by the new variants of the coronavirus.

With the outbreak of COVID-19, the Group experienced a decline in its activity. For example, the granting of new loans to individuals decreased during lockdowns. In addition, in several countries, including Spain, the Group closed a significant number of its branches and reduced the opening hours of working with the public, with central services teams having to work remotely. While these measures were progressively reversed, additional restrictions on mobility could be adopted that affect the Group's operations. Furthermore, the Group has been and may be affected by the measures or recommendations adopted by regulatory authorities in the banking sector, such as variations in reference interest rates, the modification of prudential requirements, the temporary suspension of dividend payments (see "*The Group faces risks derived from its international geographic diversification and its significant presence in emerging countries. The Group's ability to distribute dividends depends, in part, on the receipt of dividends from its subsidiaries*"), the modification of the deferral of monthly instalments for certain loans and the granting of guarantees or public guarantees to credit operations for companies and self-employed persons, the adoption of further similar measures or the termination of those already approved, as well as any changes in financial assets purchase programs by the ECB. As of March 31, 2022, and December 31, 2021, the amounts of payment deferrals and financing granted with a public guarantee reached 2.29 and 2.45 million customers at the Group level and amounted to €37,651 and €38,025 million, respectively, equivalent to 10.4 per cent. and 10.9 per cent. of the lending portfolio of which 56.8 per cent. and 57.7 per cent. are payment deferrals and 43.2 per cent. and 42.3 per cent. financing with public guarantee, with an average ICO guarantee coverage of 75 per cent.

Furthermore, pandemics like the COVID-19 pandemic could adversely affect the business and transactions of third parties that provide critical services to the Group and, in particular, the higher demand and/or the lower availability of certain resources, compounded by ongoing supply bottlenecks could, in some cases, make it more difficult for the Group to maintain the required service levels. In addition, the widespread use of remote work has increased the risks related to cybersecurity, as the use of non-corporate networks has increased.

Further, despite the progressive lessening of restrictions since 2020 and the increasing resumption of activities, the Group continues to face various risks, such as a greater risk of impairment of the value of its assets (including financial instruments valued at fair value, which may suffer significant fluctuations) and of the securities held for liquidity reasons, an even further increase in non-performing loans (NPLs) and risk-weighted assets (RWAs), as well as an increase in the Group's cost of financing and a reduction in its access to financing (especially in an environment where credit ratings are affected), see "*The group depends on its credit ratings and sovereign debt ratings, especially its Spanish ratings*".

The COVID-19 pandemic has also exacerbated and may continue to exacerbate other risks disclosed in this section, including but not limited to risks associated with the credit quality of the Group's borrowers and counterparties or collateral, any withdrawal of ECB funding (of which the Group has made and continues to make significant use), the Group's exposure to sovereign debt and rating downgrades, the Group's ability to comply with its regulatory requirements, including MREL (as defined herein) and other capital requirements, and the deterioration of economic conditions or changes in the institutional environment. See "*A deterioration in economic conditions or the institutional environment in the countries where the Group operates could have a material adverse effect on the Group's business, financial condition and results of operations*".

The COVID-19 pandemic has had a substantial impact on the Spanish economy and its sovereign fiscal position. Despite the 5.1 per cent. expansion in 2021, Spanish GDP remains below the level observed immediately before the pandemic given its 10.8 per cent. contraction in 2020. The relative weakness of economic activity and the

RISK FACTORS

measures the fiscal stimulus adopted have generated fears about the sustainability of public debt in the medium and long term, especially if the European Central Bank continues to withdraw the monetary stimulus introduced following the beginning of the COVID-19 pandemic. The risk of (renewed) fragmentation in the Eurozone is on the rise, once the ECB has signalled the end of its asset purchase programs. In addition, the annual inflation rate for 2021 (6.5 per cent. in December) was the highest since 1989. Against this backdrop, the consequences of the military conflict in Europe (not only higher commodity prices but also additional problems in supply chains and greater financial volatility, among other effects) could slow down the expected economic recovery and keep inflation at high levels at least in 2022. On the other hand, although the economic recovery is expected to be supported by the adoption of initiatives by the European Union, in particular the financial support linked to the Next Generation EU (NGEU) plan, there are risks associated with the capacity of the Spanish economy to absorb EU funds and translate this support into productive investments.

The final magnitude of the impact of the COVID-19 pandemic on the Group's business, financial condition and results of operations, which has been and is expected to be significant, will depend on future and uncertain events, including the intensity and persistence over time of the consequences arising from the COVID-19 pandemic in the different geographies in which the Group operates.

2.2 Business Risks

The Group's businesses are subject to inherent risks concerning borrowers and counterparties' credit quality and the value of collateral that strengthens its lending portfolio, particularly in Spain

The total maximum credit risk exposure of the Group as of March 31, 2022 and December 31, 2021, were €730,973 and €753,730 million respectively (€747,145 million and €807,520 million as of December 31, 2020 and 2019, respectively). The maximum exposure of loans and advances to customers at amortised cost at March 31, 2022 and December 31, 2021 is €346,434 and €330,055 million, respectively, of which Spain, Mexico and Türkiye represent 59.7 per cent., 18.2 per cent. and 10.3 per cent., and 61.0 per cent., 17.5 per cent. and 10.1 per cent. respectively. The accumulated loss allowances of loans and advances to customers at amortised cost at March 31, 2022 and December 31, 2021 amounts to €11,417 and €11,116 million respectively, of which Spain, Mexico and Türkiye represent 45.9 per cent., 19.6 per cent. and 18.4 per cent., and 47.5 per cent., 18.3 per cent. and 18.5 per cent., respectively. Impairment on financial assets not measured at fair value through profit or loss (impairment on financial assets) as of March 31, 2022 and December 31, 2021 was a negative balance of €738 and €3,034 million, significantly lower than the previous year (-20.1 per cent. and -38.7 per cent. respectively) and with a decrease in all geographical areas mainly due to the negative impact of provisions for COVID-19 in 2020. The Group has exposures to many different products and counterparties, and the credit quality of its exposures can have a significant effect on the Group's earnings. Adverse changes in the credit quality of the Group's counterparties (including borrowers) or in their behaviour or businesses, or any adverse changes in the collateral they may have provided, may reduce the value of the Group's assets, and materially increase the Group's write-downs and loss allowances. Credit risk can be affected by a range of factors, including an adverse economic environment, reduced consumer, corporate or government spending, changes in the rating of individual contractual counterparties, their debt levels and the environment in which they operate, increased unemployment, reduced asset values, increased retail or corporate insolvency levels, reduced corporate profits, changes (and the timing, quantum and pace of these changes) in interest rates, litigation and legal and regulatory developments.

In recent years, the Group's NPL ratio (as defined in Alternative Performance Measures section of the Interim Consolidated Management Report, which was 3.9 per cent., 4.1 per cent., 4.2 per cent. and 4.2 per cent. as of March 31, 2022, December 31, 2021, 2020 and 2019, respectively) has benefited from the low interest rate environment, which has led to increased recoveries and repayments. If as currently expected, interest rates increase, this will likely lead to a deterioration of our NPL ratio. It will also likely lead to an increase in the Group's RWAs. The Group's coverage ratio (as defined in the Alternative Performance Measures section of the Consolidated Interim Management Report) stood at 76 per cent, 75 per cent., 82 per cent. and 75 per cent. at March 31, 2022 and December 31, 2021, 2020 and 2019, respectively.

Furthermore, economic deterioration typically results in a decrease in the price of real estate assets. The Group is exposed to the real estate market, mainly in Spain and, to a lesser extent, Mexico and Türkiye, due to the fact that many of its loans are secured by real estate assets and due to the significant volume of real estate assets that it maintains on its balance sheet. As of March 31, 2022 and December 31, 2021, the Group's exposure to the construction and real estate sectors (excluding the mortgage portfolio) in Spain was equivalent to €9,539 and €9,504 million, respectively, of which €2,041 and €2,123 million, respectively, corresponded to loans for construction and development activities in Spain (representing 1.3 per cent. of the Group's loans and advances to customers in Spain (excluding the public sector) and 0.3 per cent. of the Group's consolidated assets as of

RISK FACTORS

March 31, 2022 and December 31, 2021). The total real estate exposure (excluding the mortgage portfolio), including developer credit, foreclosed assets without other assets, reflected a coverage ratio of 33 per cent. in Spain as of March 31, 2022 and December 31, 2021. A fall in the price of real estate assets in Spain (or, to a lesser extent, Mexico or Türkiye) would reduce the value of any real estate securing loans granted by the Group and, therefore, in the event of default, the amount of the expected losses related to such loans would increase. In addition, it could also have a significant adverse effect on the default rates of the Group's residential mortgage portfolio, the balance of which, as of March 31, 2022 and December 31, 2021, was €92,598 and €91,324 million at a global level (as of December 31, 2020 and 2019, €91,428 million and €110,534 million, respectively).

The impact of an increase in default rates on the Group will depend on its magnitude, timing and pace, but is likely to be significant. Furthermore, it is possible that the Group has incorrectly assessed the creditworthiness or willingness to pay of its counterparties, that it has underestimated the credit risks and potential losses inherent in its credit exposure and that it has made insufficient provisions for such risks in a timely manner. The processes involved in making such assessments, which have a crucial impact on the Group's results and financial condition, require difficult, subjective and complex calculations, including forecasts of the impact that macroeconomic conditions could have on these counterparties. In particular, the Group's estimate of losses derived from its exposure to credit risk may prove to be inadequate or insufficient in the current environment of economic uncertainty, which could affect the adequacy of the provisions for insolvencies provided by the Group. An increase in non-performing or low-quality loans could significantly and adversely affect the Group's business, financial condition and results of operations.

As of March 31, 2022 and December 31, 2021, the gross amount of refinancing and restructuring of the Group was €17,825 and €17,949 million, respectively (7.5 per cent. increase compared to December 2020), mainly concentrated in Spain and Türkiye, which represents 5.1 per cent. and 5.4 per cent. of total loans and advances to customers. These refinancing and restructuring have an associated collateral value of €6,492 and €6,668 million, respectively, in the periods previously mentioned. Likewise, the 51 per cent. and 51 per cent. of them were classified as impaired on those same dates.

As of December 31, 2021 assets from foreclosures and recoveries, net of impairment losses amounted to €837 million. During the first quarter of 2022 there were no significant sales of foreclosed assets.

The Group's business is particularly vulnerable to interest rates and is exposed to risks associated with the continuity of certain reference rates and the transition to alternative reference rates

The Group's results of operations are substantially dependent upon the level of its net interest income, which is the difference between interest income from interest-earning assets and interest expense on interest-bearing liabilities. It is possible that changes in market interest rates affect the Group's interest-earning assets differently from the Group's interest-bearing liabilities. This, in turn, may lead to a reduction in the Group's net interest margin, which could have a significant adverse effect on its results. Moreover, changes in interest rates may affect the Group's credit risk exposure. The evolution is different between the different geographies in which the Group operates given that in Spain the net interest margin as of March 31, 2022, has decreased by 0.8 per cent., while in the rest of geographical areas it has increased; thus, Mexico has increased by 27.8 per cent. (19.8 per cent. at constant exchange rates), Türkiye has increased by 33.2 per cent. (an increase of 134.2 per cent. at constant exchange rates) and South America has increased 22.7 per cent. (27.0 per cent. at constant exchange rates).

Interest rates are highly sensitive to many factors beyond the Group's control, including fiscal and monetary policies of governments and central banks, regulation of the financial sector, domestic and international economic and political conditions and other factors. In this sense, the COVID-19 pandemic triggered a process of cuts in reference interest rates, which is currently starting to be reversed in order to combat inflation. However, interest rate increases are being implemented at a different pace across regions and it is possible that such increases could be delayed or reversed (as the case may be) in the event of the appearance of new COVID-19 strains that restrict growth or otherwise. Increases in interest rates could adversely affect the Group by reducing the demand for credit, limiting its ability to generate credit for its clients and leading to an increase in the default rate of its counterparties. See Note 7.3.1 of the Consolidated Financial Statements where the interest rate sensitivity analysis is detailed. As a result of the foregoing, the evolution of interest rates could have a material adverse impact on the Group's business, financial position and results of operations.

With regard to the risk of variation in the market value of assets and liabilities, as of December 31, 2021, the average VaR was €29 million. By type of market risk assumed by the Group's trading portfolio, the main risk factor in the Group continues to be linked to interest rates, representing 58 per cent. of the total at the end of 2021 (including spread risk) and increasing the relative weight compared to the end of 2020 (56 per cent.). On the other hand, the exchange risk represents a 15 per cent., a decrease compared to the end of the year 2020 (21

RISK FACTORS

per cent.), while variable income risk and volatility and correlation risk, increase, representing a 27 per cent. at the end of the year 2021 (versus 23 per cent. at the end of the year 2020). As of December 31, 2021, the VaR balance was €31 million (€34 million corresponding to interest and spread risk, €9 million to exchange rate risk, €5 million to equity risk and €11 million to volatility risk and -€29 million of diversification effect).

As a result of the above, the evolution of interest rates could have a material adverse effect on the Group's business, financial condition or results of operations.

In recent years, international regulators have been driving a transition from the use of interbank offer rates (IBORs), including the London interbank offered rate (LIBOR), the euro interbank offered rate (EURIBOR) and the euro overnight index average (EONIA), to alternative risk free rates (RFRs). This has resulted in regulatory reform and changes to existing IBORs, with further changes anticipated. These reforms and changes may cause an IBOR to perform differently than it has done in the past or to be discontinued. The Group is particularly exposed to EURIBOR-based financial instruments, nevertheless, as of March 31, 2022, the Group considers that there is no uncertainty regarding EURIBOR as it has been replaced by the hybrid EURIBOR which uses a methodology that meets the requirements of the European Regulation of Reference Indices.

The uncertainty about the nature and extent of LIBOR USD reforms and changes, and how they might affect financial instruments, could negatively impact the valuation and/or trading of a wide range of financial instruments used by the LIBOR USD, including securities, loans, deposits and derivative instruments based on LIBOR USD issued by the Group or otherwise included in the financial assets and liabilities of the Group. Such uncertainty may also affect the availability and cost of hedging instruments and debt.

Although the transition from LIBOR EUR, CHF, JPY, GBP has been carried out without relevant impacts, the Group will have to adapt or modify the documentation in LIBOR USD related to the new financial instruments and to most of the existing ones. This remaining volume, much higher than that already transitioned and still pending modification as of March 31, 2022, could give rise to litigation (including with Group customers), all of which could have an adverse effect on the Group's operating results. The implementation of any alternative RFRs may be impossible or impracticable under the existing terms of certain financial instruments. Such transition could also result in pricing risks arising from how changes to reference rates could impact pricing mechanisms in some instruments, and could have an adverse effect on the value of, return on and trading market for such financial instruments and on the Group's profitability. In addition, the transition to RFRs will require important operational changes to the Group's systems and infrastructure as all systems will need to account for the changes in the reference rates.

As of December 31, 2021, 2020 and 2019, 50.2 per cent., 53.2 per cent. and 58.7 per cent. of the total transactions with a maturity greater than one year of "Loans and advances to customers" have variable interest rates. This significant amount of loans tied to variable interest rates makes the profitability of the loans more sensitive to falls in interest rates and, in addition, the repayment capacity of these loans is also more sensitive to changes in interest rates. Furthermore, if interest rates were to increase in some or all of the Group's markets, this could reduce the demand for credit and the Group's ability to generate credit for its clients, as well as contribute to an increase in the NPL ratio.

Any of these factors may have a material adverse effect on the Group's business, financial condition and results of operations.

The Group faces increasing competition and is exposed to a changing business model

In recent years, the financial services sector has undergone a significant transformation driven by the development of mobile technologies and the entry of new players into activities previously controlled by financial institutions. The markets in which the Group operates are highly competitive and it is expected that this trend will continue in the coming years with the increasing entry of non-bank competitors (some of which have large client portfolios and strong brand recognition) and the emergence of new business models, as indicated by the Financial Stability Board's report on FinTech and market structure in financial services at a global level, banks have a share of approximately 39 per cent. of total financial services market at the end of 2020 and non-bank financial intermediaries a 48 per cent.. Traditionally, commercial banks have been the only providers of financial products and services, from credit to deposits, including payment and investment services. Although the Group is making efforts to anticipate these changes, betting on its digital transformation, its competitive position is affected by the regulatory asymmetry that benefits non-bank operators. For example, banking groups are subject to prudential regulations that have implications for most of their businesses, including those in which they compete with non-bank operators that are only subject to regulations specific to the activity they develop or that benefit from loopholes in the regulatory environment. Furthermore, when

RISK FACTORS

banking groups carry out financial activities through the use of new technologies, they are generally subject to additional internal governance rules that place such groups at a competitive disadvantage.

Moreover, the widespread adoption of new technologies, including crypto currencies and alternative payment systems that do not use the banking system, could require substantial investment to modify or adapt existing products and services as the Group continues to increase its mobile and internet banking capabilities and online. Likewise, the increasing use of these new technologies and mobile banking platforms could have an adverse impact on the Group's investments in facilities, equipment and employees of the branch network. A faster pace of transformation towards mobile and online banking models could require changes in the Group's commercial banking strategy, including the closure or sale of some branches and the restructuring of others, and reductions in employees. These changes could result in significant expenses as the Group reconfigures and transforms its commercial network. On the other hand, the trend towards the consolidation in the banking industry has created larger banks with which the Group must compete. Failure to implement such changes efficiently and on a timely basis could have a material adverse impact on the Group's competitive position or otherwise have a material adverse effect on the Group's business, financial condition or results of operations, or could lead to collective layoff procedures, (see explanatory Note 22 from the Condensed Interim Consolidated Financial Statements and Interim Consolidated Management Report as of and for the three months ended March 31, 2022 of the BBVA Group).

Existing loopholes in the regulatory environment create an uneven playing field between banks and non-bank players. Some new services or business models (FinTechs or BigTechs) are not yet covered by current regulations. In these cases, asymmetries may arise between market participants since regulated providers often face obstacles in engaging in unregulated activities. The future success of the Group depends, in part, on its ability to use technology to provide suitable products and services for customers. Despite the technological capabilities that the Group has been developing and its commitment to digitisation, as a result of the aforementioned inequalities, it is likely that the Group may not be able to effectively implement new technology-based products and services or that it may not be successful in their commercialisation, which would negatively affect the business, financial condition and results of the Group.

In particular, there are challenges for the Group in competing in an environment in which the relationship with the customer is based on access to digital data and interactions. This access is increasingly dominated by digital platforms that are already eroding the Group's results in highly relevant markets such as payments. These platforms can leverage their advantage in access to data to compete with the Group in other markets and could reduce the Group's operations and margins in its core businesses such as lending or wealth management. The alliances that the Group's competitors are beginning to create with BigTechs may prevent it from competing successfully and could adversely affect the Group. In the event that the Group is not successful in addressing increasing competition, its business, financial condition and results could be significantly and adversely affected.

The Group faces risks related to its acquisitions and divestitures

The Group has acquired and sold several companies and businesses over the past few years (see Note 3 of the Consolidated Financial Statements). On November 15, 2021, BBVA announced its decision to launch a voluntary takeover offer ("VTO") for the entire share capital of Garanti not already owned by BBVA. On May 18, 2022, BBVA announced the end of the offer acceptance period and the acquisition of an additional 36.12 per cent. (up to 85.97 per cent.).

The Group may not complete any ongoing or future transactions in a timely manner, on a cost-effective basis or at all and, if completed, they may not obtain the expected results. In addition, if completed, the Group's results of operations could be adversely affected by divestiture or acquisition-related charges and contingencies. The Group may be subject to litigation in connection with, or as a result of, divestitures or acquisitions, including claims from terminated employees, customers or third parties. In the case of an acquisition, the Group may be liable for potential or existing litigation and claims related to an acquired business, including because either the Group is not indemnified for such claims or the indemnification is insufficient. Further, in the case of a divestiture, the Group may be required to indemnify the buyer in respect of similar or other matters, including claims against the divested entity or business.

In the case of an acquisition, even though the Group reviews the companies it plans to acquire, it is often not possible for these reviews to be complete in all respects and there may be risks associated with unforeseen events or liabilities relating to the acquired assets or businesses that may not have been revealed or properly assessed during the due diligence processes, resulting in the Group assuming unforeseen liabilities or an acquisition not performing as expected. In addition, acquisitions are inherently risky because of the difficulties

RISK FACTORS

that may arise in integrating people, operations and technologies. There can be no assurance that any of the businesses the Group acquires can be successfully integrated or that they will perform well once integrated.

Acquisitions may also lead to potential write-downs that adversely affect the Group's results of operations. Any of the foregoing may cause the Group to incur significant unexpected expenses, may divert significant resources and management attention from the Group's other business concerns, or may otherwise have a material adverse impact on the Group's business, financial condition and results of operations.

The Group faces risks derived from its international geographic diversification and its significant presence in emerging countries. The Group's ability to distribute dividends depends, in part, on the receipt of dividends from its subsidiaries

The Group is made up of commercial banks, insurance companies and other financial services companies in various countries and its performance as a global business depends on its ability to manage its different businesses under various economic, social and political conditions, facing different normative and regulatory requirements in many of the jurisdictions in which it operates (including, among others, different supervisory regimes and different tax and legal regimes related to the repatriation of funds or the nationalisation or expropriation of assets).

In addition, the Group's international operations may face risks and challenges to which its local competitors may not be exposed, such as currency risk (as of March 31, 2022 and December 31, 2021 and 2020, approximately 43.9 per cent., 41.5 per cent. and 46.4 per cent. of the assets respectively and 40.7 per cent. 37.8 per cent. and 44.1 per cent. of the Group's liabilities, respectively, were denominated in currencies other than euro), the difficulty of managing or supervising a local entity from abroad, political risks (which could affect only foreign investors) or limitations on the distribution or repatriation of dividends (for example, BBVA's Venezuelan and Argentinean subsidiaries (whose book value is €77 and €1240 million as of March 31, 2022 and €78 million and €1,130 million, respectively, as of December 31, 2021) is subject to certain restrictions and there is no assurance that further restrictions will not be imposed, thus worsening its position compared to that of local competitors).

In 2021, dividend income from its subsidiaries represented €1,699 million, approximately 22.7 per cent. of the gross margin of Banco Bilbao Vizcaya Argentaria, S.A. There has been an increase of 36.5 per cent. compared to 2020. Due, in part, to the Group's decision to follow a 'Multiple Point of Entry' strategy, in accordance with the framework for the resolution of financial entities designed by the Financial Stability Board (FSB), the Group's subsidiaries are self-sufficient and each subsidiary is responsible for managing its own capital and liquidity. This means that the payment of dividends, distributions and advances by the Group's subsidiaries to BBVA depends not only on the results of those subsidiaries, but also on the context of their operations and liquidity needs, and may be further limited by legal, regulatory and contractual restrictions. For example, in response to the crisis caused by the COVID-19 pandemic, certain restrictions were adopted that affect the distribution and/or repatriation of dividends of some of the Group's subsidiaries. There is no assurance that these restrictions will not remain in effect or, where lifted, reinstated, or that similar or new restrictions will not be imposed in the future. Furthermore, the Bank's right, as a shareholder, to participate in the distribution of assets resulting from the eventual liquidation or any reorganisation of its subsidiaries will be effectively subordinated to the rights of the creditors of those subsidiaries, including their commercial creditors.

In addition, the Bank, its subsidiaries and the Group must comply with certain capital requirements, where non-compliance could lead to the imposition of restrictions or prohibitions on making any: (i) distributions relating to common equity tier (CET1) capital; (ii) payments related to variable remuneration or discretionary pension benefits; and (iii) distributions linked to additional tier 1 (AT1) instruments (collectively, discretionary payments). Likewise, the ability of the Bank and its subsidiaries to pay dividends is conditioned by the recommendations and requirements of their respective supervisors, such as those made in response to the COVID-19 pandemic. In this regard, on April 30, 2020, the Bank announced that it had agreed to modify, for the financial year 2020, the Group's shareholder remuneration policy and was not paying any amount as a dividend corresponding to the financial year 2020 until the uncertainties generated by the COVID-19 pandemic dissipate and, in any case, not before the close of the 2020 fiscal year. However, in accordance with the distribution restrictions established by the ECB in relation to the consolidated results of 2020, the General Shareholders' Meeting, held on April 20, 2021, approved, in the third point of its agenda, a cash distribution charged to the share premium account for an amount of €0.059 gross per share as remuneration to the shareholder in relation to the Group's result in 2020 for each of the shares in circulation, which was paid on April 29, 2021. On July 23, 2021, the European Central Bank published the approval of recommendation ECB/2021/31 repealing recommendation ECB/2020/62 from September 30, 2021, eliminating the remaining restrictions on dividend and share buyback related matters established in recommendation ECB/2020/62.

RISK FACTORS

However, it is not possible to guarantee that new restrictions or recommendations from supervisors will not limit the ability of our subsidiaries or the Bank itself to distribute dividends in the future. The Board of Directors, at its meeting held on September 30, 2021, approved the payment in cash of €0.08 gross per BBVA share on October 12, 2021, as interim dividend against 2021 results. Additionally, the Annual General Meeting of BBVA held on March 18, 2022, approved a cash distribution for a gross amount equal to €0.23 per BBVA share entitled to participate in this distribution, which was paid on April 8, 2022.

There can be no guarantee that the Group will be successful in developing and implementing policies and strategies in all of the countries in which it operates, some of which have experienced significant economic, political and social volatility in recent decades. In particular, the Group has significant operations in several emerging countries, such as Mexico and Türkiye, and is therefore vulnerable to the deterioration of these economies. Emerging markets are generally affected by the conditions of other commercially or financially related markets and by the evolution of global financial markets in general (they may be affected, for example, by the evolution of interest rates in the United States and the exchange rate of the U.S. dollar), as well as, in some cases, by fluctuations in the prices of commodities. The perception that the risks associated with investing in emerging economies have increased, in general, or in emerging markets where the Group operates, in particular, could reduce capital flows to those economies and adversely affect such economies and therefore the Group. Moreover, emerging countries are more prone to experience significant changes in inflation and foreign exchange rates, which may have a material impact on the Group's results of operations, assets (including RWAs) and liabilities. As of December 31, 2021, the estimated sensitivities of the result attributable to the owners of the parent company, taking into account the coverage against depreciations and appreciations of 1 per cent. of the average foreign exchange rate in the Mexican peso and Turkish lira was €14 million and €5 million, respectively. To the extent that hedging positions are periodically modulated, the sensitivity estimate attempts to reflect an average (or effective) sensitivity in the year against depreciations and appreciations.

The Group's operations in emerging countries are also exposed to heightened political risks, such as changes in governmental policies, expropriation, nationalisation, interest rate limits, exchange controls, government restrictions on dividends and adverse tax policies. For example, the repatriation of dividends from BBVA's Venezuelan, Argentinian and Turkish subsidiaries is subject to certain restrictions and there is no assurance that further restrictions will not be imposed.

If the Group failed to adopt effective and timely policies and strategies in response to the risks and challenges it faces in each of the regions where it operates, particularly in emerging countries, the Group's business, financial condition and results of operations could be materially and adversely affected.

The Group is exposed to various risks in connection with climate change

Climate change presents both immediate and long-term risks to the Group and its customers, with the risks expected to increase over time. Climate change poses the following risks to the Group, among others:

- **Physical risks.** The activities of the Groups or those of its customers or counterparties could be negatively impacted by the physical risks posed by climate change. For example, extreme weather events may damage or destroy their properties and other assets or otherwise disrupt their operations (for example, if supply chains are disrupted as a result), diminishing –in the case of customers– their repayment capacity and, if applicable, the value of properties pledged as collateral to the Group.
- **Regulatory risks.** Following the Paris agreement, financial institutions are progressively coming under increased pressure regarding the management and disclosure of their climate risks and related lending and investment activities. Banking regulators across the world are increasingly viewing financial institutions as having an important role in helping to address the risks related to climate change both directly and with respect to their customers. Legislative or regulatory changes regarding how banks manage climate risk or otherwise affecting banking practices may result in higher regulatory, compliance and credit costs. For example, several of the European Union's sustainability initiatives are expected to significantly impact asset management activities in 2022, as asset managers will need to include sustainability as part of their financial advice. In addition, the ECB will be conducting a stress test on climate-related risks (CST) during 2022, whose output will be integrated into the annual Supervisory Review and Examination Process ("SREP") using a qualitative approach. The test aims to identify vulnerabilities, industry best practices and the challenges faced by banks and may result in increased regulation.
- **Reputational risks.** The perception of climate change as a risk by society, shareholders, customers, governments and other stakeholders continues to increase, including in relation to the financial sector's operations and strategy. This may result in increased scrutiny of the Group's activities, including

RISK FACTORS

companies to which it lends. The Group's reputation may be harmed if its efforts to reduce environmental and social risks are deemed to be insufficient. For example, the Group's reputation may be adversely affected due to its financing of businesses that are perceived to adversely affect the environment, such as oil companies or coal-fired power generation businesses.

- Transition risks: As the countries where the Group operates progressively transition to a low-carbon economy, some of the Group's customers may be adversely affected. For example, the Group's corporate credit portfolios include carbon-intensive industries like oil and gas and power that are exposed to risks related to the transition to a low-carbon economy, as well as low-carbon industries that may be subject to risks associated with new technologies.
- Business risks. BBVA is exposed to near term risks related to climate change, including increases in credit-related costs due to deterioration in the business performance of the Group's customers exposed to climate change risks and decreases in the value of collateral assets caused by changes in climate and the effects thereof. BBVA is also exposed to potential long-term risks, including increases in credit-related costs due to deteriorating macroeconomic conditions, which may be caused in part by an increase in infectious diseases, heatstroke or other related ailments resulting from climate change. The Group could also be adversely affected by widespread declines in asset values as a result of climate change or climate change-related risks, reduced availability of insurance and significant interruptions to business operations, and may be required to change its business models in response to those consequences.

Any of these factors may have a material adverse effect on the Group's business, financial condition and the operating results of operations.

2.3 Financial Risks

The Group has a continuous demand for liquidity to finance its activities and the withdrawal of deposits or other sources of liquidity could significantly affect it

Traditionally, one of the Group's main sources of financing has been savings accounts and demand deposits. As of March 31, 2022 and December 31, 2021 the balance of customer deposits represented 72 per cent. and 72 per cent. of the Group's total financial liabilities at amortised cost. However, the volume of wholesale and retail deposits can fluctuate significantly, including as a result of factors beyond the Group's control, such as general economic conditions, changes in economic policy or administrative decisions that diminish their attractiveness as savings instruments (for example, as a consequence of changes in taxation, coverage by guarantee funds for deposits or expropriations) or competition from other savings or investment instruments (including deposits from other banks).

Likewise, changes in interest rates and credit spreads may significantly affect the cost of the Group's short and long-term wholesale financing. Changes in credit spreads are driven by market factors and are also influenced by the market's perception of the Group's solvency. As of March 31, 2022 and December 31, 2021, debt securities issued by the Group represented 10.6 per cent. and 11.4 per cent. of the total financial liabilities at amortised cost of the Group.

In addition, the Group has made and continues to make significant use of public sources of liquidity, such as the ECB's extraordinary measures taken in response to the financial crisis since 2008 or those taken in connection with the crisis caused by the COVID-19 pandemic. The ECB announced in December 2020 the new conditions of its Targeted Long Term Refinancing Operations (TLTRO) III program, increasing the maximum amount that BBVA may receive from 50 per cent. of eligible loans (€35,310 million) to 55 per cent. (€38,840 million) and extending the enhanced conditions in terms of cost by one additional year until June 2022. As of March 31, 2022 and December 31, 2021, BBVA had drawn down €38,692 million (€35,032 million was drawn down as of December 31, 2020 and €7,000 million as of December 31, 2019). However, the conditions of this or other programs could be revised or these programs could be cancelled.

As of December 31, 2021, the Loan-to-Stable Customer Deposits ratio (LtSCD) in the BBVA Group is 95 per cent.. This ratio measures the relationship between net lending and stable customer funds.

In the event of a withdrawal of deposits or other sources of liquidity, especially if it is sudden or unexpected, the Group may not be able to finance its financial obligations or meet the minimum liquidity requirements that apply to it, and may be forced to incur higher financial costs, liquidate assets and take additional measures to reduce leverage. Furthermore, the Group could be subject to the adoption of early intervention measures or, ultimately, to the adoption of a resolution measure by the Relevant Spanish Resolution Authority (as defined

RISK FACTORS

below). Any of the above could have a material adverse effect on the Group's business, financial condition and results of operations.

The Group depends on its credit ratings and sovereign credit ratings, especially its Spanish ratings

Rating agencies periodically review the Group's debt credit ratings. Any reduction, effective or anticipated, in any such ratings of the Group, whether below investment grade or otherwise, could limit or impair the Group's access to capital markets and other possible sources of liquidity and increase the Group's financing cost, and entail the breach or early termination of certain contracts or give rise to additional obligations under those contracts, such as the need to grant additional guarantees. The Group estimates that if at 31 March, 2022 and at December 31, 2021, rating agencies had downgraded the Bank's long-term senior debt rating by one notch, it would have had to provide additional guarantees/collateral amounting to €34.8 and €38.2 million, respectively, under its derivative and other financial contracts. A hypothetical two-notch downgrade would have involved an outlay of €58.6 and €44.1 million, respectively, in additional guarantees/collateral. Furthermore, if the Group were required to cancel its derivative contracts with some of its counterparties and were unable to replace them, its market risk would worsen. Likewise, a reduction in the credit rating could affect the Group's ability to sell or market some of its products or to participate in certain transactions, and could lead to the loss of customer deposits and make third parties less willing to carry out commercial transactions with the Group (especially those that require a minimum credit rating), having a significant adverse impact on the Group's business, financial condition and results of operations.

Furthermore, the Group's credit ratings could be affected by variations in sovereign credit ratings, particularly the rating of Spanish sovereign debt. The Group holds a significant portfolio of debt issued by the Kingdom of Spain, by the Spanish autonomous communities and by other Spanish issuers. As of December 31, 2021 and December 31, 2020, the Group's exposure (EBA criteria) to the Kingdom of Spain's public debt portfolio was €38,626 and €45,814 million, respectively, representing 5.8 per cent. and 6.2 per cent. of the consolidated total assets of the Group, respectively. Any decrease in the credit rating of the Kingdom of Spain could adversely affect the valuation of the respective debt portfolios held by the Group and lead to a reduction in the Group's credit ratings. Additionally, counterparties to many of the credit agreements signed with the Group could also be affected by a decrease in the credit rating of the Kingdom of Spain, which could limit their ability to attract additional resources or otherwise affect their ability to pay their outstanding obligations to the Group. The Group's exposure to the public debt portfolio of the Rest of Europe, Mexico and Türkiye as of December 31, 2021 was €8,336, €32,445 and €5,827 million (as of December 31, 2020 it was €7,128, €26,535 and €7,547 million), representing 1.3 per cent., 4.9 per cent. and 0.9 per cent. of the consolidated total assets of the Group, respectively (as of December 31, 2020 it was 1 per cent., 3.6 per cent. and 1 per cent.). Downgrades and rating revisions for these countries would therefore also have an impact on the Group's financial position.

As a consequence of the COVID-19 pandemic, some rating agencies reviewed the Group's credit ratings or trends. Specifically, on June 22, 2020 Fitch announced the modification of BBVA's senior preferred debt long term rating to A- with stable outlook from A with Rating Watch Negative. In June 2021, Fitch affirmed BBVA's rating at A- and maintained its stable outlook. On April 1, 2020, DBRS Ratings GmbH (DBRS) confirmed BBVA's long-term rating of A (High) and maintained the outlook as stable. In March 2021, DBRS affirmed BBVA's rating at A (High) and maintained its stable outlook. In December 2021 S&P upgraded BBVA's rating by one notch to A from A-, and changed its rating outlook to negative, considering that a sizeable cushion of bail-unable instruments has been issued, and following a methodological update that recognises the strength of the Multiple Point of Entry (MPE) resolution strategy. Moody's A3 rating has been maintained with stable outlook since May 2018. There may be more ratings actions and changes in BBVA's credit ratings in the future as a result of the crisis caused by the COVID-19 pandemic, any of which could have a material adverse effect on the Group's business, financial condition and results of operations.

2.4 Legal, Regulatory, Tax and Compliance Risks

The financial services sector is one of the most regulated in the world.

Legal Risks

The Group is party to a number of legal and regulatory actions and proceedings

The financial sector faces an environment of increasing regulatory and litigation pressure. The Group is party to government procedures and investigations, such as those carried out by the antitrust authorities which, among other things, have in the past and could in the future result in sanctions, as well as lead to claims by customers and others.

RISK FACTORS

The various Group entities are also frequently party to individual or collective judicial proceedings (including class actions) resulting from their activity and operations, as well as arbitration proceedings. More generally, in recent years, regulators have increased their supervisory focus on consumer protection and corporate behaviour, which has resulted in a larger number of regulatory actions.

In Spain and in other jurisdictions where the Group operates, legal and regulatory actions and proceedings against financial institutions, prompted in part by certain recent national and supranational rulings in favour of consumers (with regards to matters such as credit cards and mortgage loans), have increased significantly in recent years and this trend could continue in the future. The legal and regulatory actions and proceedings faced by other financial institutions in relation to these and other matters, especially if such actions or proceedings result in favourable resolutions for the consumer, could also adversely affect the Group.

All of the above may result in a significant increase in operating and compliance costs and/ or a reduction in revenues, and it is possible that an adverse outcome in any proceedings (depending on the amount thereof, the penalties imposed or the resulting procedural or management costs for the Group) could materially and adversely affect the Group, including by damaging its reputation.

It is difficult to predict the outcome of legal and regulatory actions and proceedings, both those to which the Group is currently exposed and those that may arise in the future, including actions and proceedings relating to former Group subsidiaries or in respect of which the Group may have indemnification obligations. Any of such outcomes could be significantly adverse to the Group. In addition, a decision in any matter, whether against the Group or against another credit entity facing similar claims as those faced by the Group, could give rise to other claims against the Group. In addition, these actions and proceedings draw resources away from the Group and may require significant attention on the part of the Group's management and employees.

As of March 31, 2022 and December 31, 2021, the Group had €628 and €623 million in provisions for the proceedings it is facing (which are included in the line item "Provisions for taxes and other legal contingencies" in the consolidated balance sheet) of which €537 million (€533 million as of December 31, 2021) corresponded to legal contingencies and €90 million (€90 million as of December 31, 2021) corresponded to tax related contingencies. Most of these provisions for legal contingencies correspond to the Bank and its subsidiaries registered in Spain, which account for approximately 80 per cent. of these provisions. However, the uncertainty arising from these proceedings (including those for which no provisions have been made, either because it is not possible to estimate any such provisions or for other reasons) makes it impossible to guarantee that the possible losses arising from such proceedings will not exceed, where applicable, the amounts that the Group currently has provisioned and, therefore, could affect the Group's consolidated results.

As a result of the above, legal and regulatory actions and proceedings currently faced by the Group or to which it may become subject in the future or which may otherwise affect the Group, whether individually or in the aggregate, if resolved in whole or in part adversely to the Group's interests, could have a material adverse effect on the Group's business, financial condition and results of operations.

The Spanish judicial authorities are carrying out a criminal investigation relating to possible bribery, revelation of secrets and corruption by the Bank.

Spanish judicial authorities are investigating the activities of Centro Exclusivo de Negocios y Transacciones, S.L. (Cenyt). Such investigation includes the provision of services by Cenyt to the Bank. On July 29, 2019, the Bank was named as an investigated party (investigado) in a criminal judicial investigation (Preliminary Proceeding No. 96/2017 – Piece No. 9, Central Investigating Court No. 6 of the National High Court) for alleged facts which could constitute bribery, revelation of secrets and corruption. On February 3, 2020, the Bank was notified by the Central Investigating Court No. 6 of the National High Court of the order lifting the secrecy of the proceedings.

Certain current and former officers and employees of the Group, as well as former directors, have also been named as investigated parties in connection with this investigation. The Bank has been and continues to be proactively collaborating with the Spanish judicial authorities, including sharing with the courts information obtained in the internal investigation hired by the Bank in 2019 to contribute to the clarification of the facts. As at the date of this Prospectus, no formal accusation against the Bank has been made. This criminal judicial proceeding is in the pre-trial phase. Therefore, it is not possible at this time to predict the scope or duration of such proceeding or any related proceeding or its or their possible outcomes or implications for the Group, including any fines, damages or harm to the Group's reputation caused thereby.

Regulatory, Tax and Compliance Risks

The financial services sector is one of the most regulated sectors in the world.

RISK FACTORS

The Group is subject to a comprehensive regulatory and supervisory framework, including resolution regulations, which could have a significant adverse effect on its business, financial condition and results of operations

The Group is subject to a comprehensive regulatory and supervisory framework, the complexity and scope of which has increased significantly since the previous financial crisis and which could further increase as a result of the crisis caused by the COVID-19 pandemic. In particular, the banking sector is subject to continuous scrutiny at the political level and by the supervisory bodies, and it is foreseeable that in the future there will continue to be political intervention in regulatory and supervisory processes, as well as in the governance of the main financial entities. For this reason, the laws, regulations and policies to which the Group is subject, as well as their interpretation and application, may change at any time. In addition, supervisors and regulators have significant discretion in carrying out their duties, which gives rise to uncertainty regarding the interpretation and implementation of the regulatory framework. Moreover, regulatory fragmentation and the implementation by some countries of more flexible or stricter rules or regulations could also negatively affect the Group's ability to compete with financial institutions that may or may not have to comply with any such rules or regulations, as applicable.

Regulatory changes over the last decade, as well as those currently in the pipeline (including changes in the interpretation or application of existing regulations), have increased and may continue to substantially increase the Group's operating expenses and adversely affect its business model. For example, the imposition of prudential capital standards has limited and is expected to continue to limit the ability of subsidiaries to distribute capital to the Bank, while liquidity standards may lead the Group to hold a higher proportion of financial instruments with higher liquidity and lower performance, which can adversely affect its net interest margin. In addition, the Group's regulatory and supervisory authorities may require the Group to review or make impairments to the value of its assets, which could have an adverse effect on its financial condition. It is also possible that governments and regulators impose additional ad hoc measures in response to the crisis caused by the COVID-19 pandemic. Such measures have included the imposition on credit institutions of the obligation to provide financing to various entities both private (particularly SMEs) and public entities (including for example, the Fund for the Deposit Guarantee ("FGD") (Fondo de Garantía de Depósitos) or the Single Resolution Board ("SRB").

Any legislative or regulatory measure, any necessary change in the Group's business operations, as a consequence of such measures, as well as any failure to comply with them, could result in a significant loss of income, represent a limitation on the ability of the Group to take advantage of business opportunities and offer certain products and services, affect the value of the Group's assets, force the Group to increase prices (which could reduce the demand for its products), impose additional regulatory compliance costs or result in other possible adverse effects for the Group.

One of the most significant regulatory changes resulting from the prior financial crisis, was the introduction of resolution regulations, which provides a Relevant Spanish Resolution Authority with mechanisms and instruments to intervene sufficiently early and rapidly where they determine a credit institution or investment firm as failing or likely to fail. In the event that the Relevant Spanish Resolution Authority considers that the Group is in a situation where conditions for early intervention or resolution are met, it may adopt the measures provided for in the applicable resolution regulations, including without prior notice. Likewise, the Relevant Spanish Resolution Authority also has the power to permanently write-down or convert into equity capital instruments at the point of non-viability (the "Non-Viability Loss-Absorption Powers") in the event that it determines that the entity meets the conditions for its resolution or that it will become unfeasible unless such mechanism is applied.

Any such determination or the mere possibility that such determination could be made, could materially and adversely affect the Group's business, financial condition and results of operations, as well as the market price and behaviour of certain securities issued by the Group (or their terms, in the event of an exercise of any Non-Viability Loss-Absorption Powers. For more information.

Increasingly onerous capital and liquidity requirements may have a material adverse effect on the Group's business, financial condition and results of operations

In its capacity as a Spanish credit institution, the Group is subject to compliance with a "Pillar 1" solvency requirement, a "Pillar 2" solvency requirement and a "combined buffer requirement", at both the individual and consolidated levels. On February 3, 2022, BBVA announced that as a result of the latest Supervisory Review and Evaluation Process (SREP) carried out by the ECB, the ECB had communicated its determination of a "Pillar 2" requirement for BBVA of 1.5 per cent., applicable at an individual and consolidated level, of which at least 0.84 per cent. must be satisfied with CET1. Such "Pillar 2" requirement remains at the same level as

RISK FACTORS

determined by the ECB in the previous SREP. Therefore, BBVA must have maintained from March 1, 2022, at a consolidated level, a CET1 ratio of 8.60 per cent. and a total capital ratio of 12.76 per cent. and, at an individual level, a CET1 ratio of 7.85 per cent. and a total capital ratio of 12.01 per cent. As of March 31, 2022¹ and December 31, 2021², the Group's phased-in total capital ratio was 16.82 per cent. and 17.24 per cent. on a consolidated basis and 19 per cent. and 19.64 per cent. on an individual basis, and its CET1 phased-in capital ratio was 12.81 per cent. and 12.98 per cent. on a consolidated basis and 13.76 per cent. and 14.14 per cent. on an individual basis, and the Group's fully loaded total capital ratio was 16.71 per cent. and 16.99 per cent. on a consolidated basis and 19.10 per cent. and 19.68 per cent. on an individual basis, while the Group's fully loaded CET1 ratio was 12.70 per cent. and 12.75 per cent. on a consolidated basis and 13.71 per cent. and 14.11 per cent. on an individual basis.

Such ratios exceed the applicable regulatory requirements described above, but there can be no assurance that the total capital requirements imposed on the Bank and/or the Group from time to time may not be higher than the levels of capital available at such point in time. There can also be no assurance as to the result of any future SREP carried out by the ECB and whether this will impose any further additional "Pillar 2" own funds requirements on the Bank and/or the Group.

Banco Bilbao Vizcaya Argentaria, the Bank, as a Spanish credit institution, must also maintain a minimum level of own funds and eligible liabilities (the MREL requirement). On March 8, 2022, the Bank announced that it had received a communication from the Bank of Spain of its new MREL requirement, as determined by the SRB, repealing and superseding the previous MREL requirement communicated in May 2021. In accordance with this new communication, BBVA has to maintain, as of January 1, 2022, a volume of own funds and eligible liabilities equal to 21.46 per cent. of the total RWAs of its resolution group (the MREL in RWAs), of which 13.5 per cent. of the total RWAs of BBVA's resolution group has to be fulfilled with subordinated instruments (the MREL RWAs subordination requirement). The MREL in RWAs and the MREL RWAs subordination requirement do not include the combined capital buffer requirement which, according to applicable regulations and supervisory criteria, is currently 3.26 per cent. (setting the MREL in RWAs including the combined capital buffer requirement at 24.72 per cent. and the MREL RWAs subordination requirement including the combined capital buffer requirement at 16.76 per cent.). As of March 31, 2022¹ and December 31, 2021², the own funds and eligible liabilities of the resolution group corresponds to 27.59 per cent.¹ and 28.24 per cent. of its RWAs, and the own funds and subordinated eligible liabilities corresponds to 24.05 per cent.¹ and 24.65 per cent..

In addition, BBVA had to reach, by January 1, 2022, an amount of own funds and eligible liabilities in terms of the total exposure considered for calculating the leverage ratio equal to 7.50 per cent. (the MREL in LR) of which 5.84 per cent. in terms of the total exposure considered for calculating the leverage ratio shall be satisfied with subordinated instruments (the MREL in LR subordination requirement).

As of March 31, 2022¹ and December 31, 2021², the resolution group has own funds and eligible liabilities of 10.80 per cent.¹ and 11.31 per cent. and subordinated own funds and eligible liabilities of 9.41 per cent.¹ and 9.88 per cent., in terms of total exposure taken into account for the calculation of the leverage ratio. As of January 1, 2024, the minimum ratios to be met are the same as for 2022, except in the case of the subordination requirement of the MREL in RA, which will be 5.91 per cent..

The BBVA resolution group consists of the Bank and its subsidiaries belonging to the same European resolution group and, as of June 30, 2021, the RWAs of the resolution group amounted to €190,377 million and the total exposure considered for calculating the leverage ratio amounted to €452,275 million. As of the date of this Base Prospectus, no MREL Pillar 2 requirement has been imposed on BBVA and the Bank complies with the MREL in RWAs, the MREL RWAs subordination requirement, the MREL in LR and the MREL in LR subordination requirement.

However, both the capital and the MREL requirements, the own funds and the eligible liabilities available for MREL purposes are subject to interpretation and change and, therefore, no assurance can be given that the Group's interpretation is the appropriate one or that the Bank and/or the Group will not be subject to more stringent requirements at any future time. Likewise, no assurance can be given that the Bank and/or the Group will be able to fulfil whatever future requirements may be imposed, even if such requirements were to be equal or lower than those currently in force. There can also be no assurances as to the ability of the Bank and/or the

RISK FACTORS

Group to comply with any capital target announced to the market at any given time, which could be adversely perceived by investors and/or supervisors, who could interpret that a lack of capital-generating capacity for the Bank and/or the Group exists or that the capital structure has deteriorated, either of which could adversely affect the market value or behaviour of securities issued by the Bank and/or the Group (any of its capital instruments and eligible liabilities) and, therefore, lead to the implementation of new recommendations or requirements regarding “Pillar 2” or (should the Relevant Spanish Resolution Authority interpret that obstacles may exist for the viability of the resolution of the Bank and/or the Group) MREL. Further, the Bank and/or the Group may report amounts different from consensus estimates, as occurred with respect to the CET 1 ratios of the Bank and the Group as of December 31, 2021, which may also affect market perceptions of the Bank and the Group.

If the Bank or the Group failed to comply with its “combined buffer requirement” it would have to calculate the Maximum Distributable Amount (MDA) and, until such calculation has been undertaken and reported to the Bank of Spain, the affected entity would not be able to make any discretionary payments. Once the MDA has been calculated and reported, such discretionary payments would be limited to the calculated MDA. Likewise, should the Bank or the Group not meet the applicable capital requirements, it could result in the imposition of additional requirements of “Pillar 2”. Regarding MREL, failure by the Bank or the Group to meet its respective “combined buffer requirement” for these purposes, taken together with its MREL requirement, could result in the imposition of restrictions or prohibitions on discretionary payments. Additionally, failure to comply with the capital requirements may result in the implementation of early intervention measures or, ultimately, resolution measures by the resolution authorities

Regulation (EU) 2019/876 of the European Parliament and of the Council, of May 20, 2019 (as amended, replaced or supplemented at any time, CRR II) establishes a binding requirement for the leverage ratio effective from June 28, 2021 of 3 per cent. of Tier 1 capital (as of March 31, 2022³ and December 31, 2021⁴, the phased-in leverage ratio of the Group was 6.74 per cent. and 6.80 per cent. and fully loaded it was 6.69 per cent. in both periods). Any failure to comply with this leverage ratio buffer may also result in the need to calculate and report the MDA, and restrictions on discretionary payments. Moreover, CRR II proposes new requirements that capital instruments must meet in order to be considered AT1 or Tier 2 instruments, including certain grandfathering measures until 28th June, 2025. Once the grandfathering period in CRR II has elapsed, AT1 and/or Tier 2 instruments which do not comply with the new requirements at such date will no longer be considered as capital instruments. As March 31, 2022, there is no amount included under the grandfathering regime established by the CRR in MREL. As of December 31, 2021, the amounts included in the phased in capital ratios are €268 million of Tier 2 instruments, and €142 million of MREL. This could give rise to shortfalls in regulatory capital and, ultimately, could result in failure to comply with the applicable minimum regulatory capital requirements, with the aforementioned consequences.

Additionally, the implementation of the ECB expectations regarding prudential provisions for NPLs (published on May 15, 2018) and the ECB’s review of internal models being used by banks subject to its supervision for the calculation of their RWAs (TRIMs) could result, respectively, in the need to increase provisions for future NPLs and increases in the Group’s capital needs.

Furthermore, the implementation of the Basel III reforms could result in an increase of the Bank’s and the Group’s total RWAs and, therefore, could also result in a decrease of the Bank’s and the Group’s capital ratios. Likewise, the lack of uniformity in the implementation of the Basel III reforms across jurisdictions in terms of timing and applicable regulations could give rise to inequalities and competition distortions. Moreover, the lack of regulatory coordination, with some countries bringing forward the application of Basel III requirements or increasing such requirements, could adversely affect an entity with global operations such as the Group and could affect its profitability.

Additionally, the Total Loss Absorbing Capacity (TLAC) requirements published by the FSB, are currently only imposed upon financial institutions of global systemic importance (G-SIBs) and propose that global systemic importance (“G-SIBs”) maintain significant minimum amounts of liabilities that are subordinated (by law, contract or structurally) to certain prior-ranking liabilities, such as guaranteed insured deposits. Should these requirements become applicable on non-G-SIBs entities or should the Group once again be classified as a G-SIB, additional minimum requirements similar to MREL could in the future be imposed upon the Group.

RISK FACTORS

There can be no assurance that the above capital requirements or MREL will not adversely affect the Bank's or its subsidiaries' ability to make discretionary payments, or result in the cancellation of such payments (in whole or in part), or require the Bank or such subsidiaries to issue additional securities that qualify as eligible liabilities or regulatory capital, to liquidate assets, to curtail business or to take any other actions, any of which may have adverse effects on the Group's business, financial condition and results of operations. Furthermore, an increase in capital requirements could adversely affect the return on equity and other of the Group's financial results indicators. Moreover, the Bank's or the Group's failure to comply with their capital requirements and MREL could have a significant adverse effect on the Group's business, financial condition and results of operations.

Lastly, the Group must also comply with liquidity and funding ratios. Several elements of the liquidity coverage ratio (LCR) and net stable financing ratio (NSFR) (defined in the result of the quantity of stable funding available and the amount of stable funding required), as introduced by national banking regulators and fulfilled by the Group, may require implementing changes in some of its commercial practices, which could expose the Group to additional expenses (including an increase in compliance expenses), affect the profitability of its activities or otherwise lead to a significant adverse effect over the Group's business, financial condition or results of operations. As of March 31, 2022 and December 31, 2021, the Group's LCR was 152 per cent. and 165 per cent. and its NSFR was 135 per cent. and 135 per cent. respectively.

The Group is exposed to tax risks that may adversely affect it

The size, geographic diversity and complexity of the Group and its commercial and financial relationships with both third parties and related parties result in the need to consider, evaluate and interpret a considerable number of tax laws and regulations, as well as any relevant interpretative materials, which in turn involve the use of estimates, the interpretation of indeterminate legal concepts and the determination of appropriate valuations in order to comply with the tax obligations of the Group. In particular, the preparation of the Group's tax returns and the process for establishing tax provisions involve the use of estimates and interpretations of tax laws and regulations, which are complex and subject to review by the tax authorities. Any error or discrepancy with tax authorities in any of the jurisdictions in which the Group operates may give rise to prolonged administrative or judicial proceedings that may have a material adverse effect on the Group's results of operations.

In addition, governments in different jurisdictions are seeking to identify new funding sources, and, they have recently focused on the financial sector. The Group's presence in various jurisdictions increases its exposure to regulatory and interpretative changes, which could, among other things, lead to (i) an increase in the types of tax to which the Group is subject, including in response to the demands of various political forces such as the regulation of a minimum effective tax rate introduced in the Spanish Corporate Income Tax Law and the Non-Residents Income Tax Law by Law 22/2021, of December 28, on the General State Budget for 2022, with effects as of January 1, 2022 (i.e. the minimum net tax liability is 18 per cent. of the tax base for credit institutions), (ii) changes in the calculation of tax bases, and exemptions therefrom, such as provided in the Spanish Corporate Income Tax Law (as defined herein) to limit the exemption for dividends and capital gains from domestic and foreign subsidiaries to 95 per cent., which would mean that 5 per cent. of the dividends and capital gains of Group companies in Spain will be subject to, and not exempt from corporate tax or, (iii) the creation of new taxes, like the common financial transaction tax (FTT) in the proposed Tax Directive of the European Commission for the Financial Transactions Tax (which would tax the acquisitions of certain securities negotiated in markets where the Group operates) and the Spanish FTT which came into effect in Spain in January 2021, may have adverse effects on the business, financial condition and results of operations of the Group.

The Group is exposed to compliance risks

The Group, due to its role in the economy and the nature of its activities, is singularly exposed to certain compliance risks. In particular, the Group must comply with regulations regarding customer conduct, market conduct, the prevention of money laundering and the financing of terrorist activities, the protection of personal data, the restrictions established by national or international sanctions programs and anti-corruption laws (including the US Foreign Corrupt Practices Act of 1977 and the UK Bribery Act of 2010), the violations of which could lead to very significant penalties. These anti-corruption laws generally prohibit providing anything of value to government officials for the purposes of obtaining or retaining business or securing any improper business advantage. As part of the Group's business, the Group directly or indirectly, through third parties, deals with entities whose employees are considered to be government officials. The Group's activities are also subject to complex customer protection and market integrity regulations.

Generally, these regulations require banking entities to among other measures, use diligence measures to manage compliance risk. Sometimes banking entities must apply reinforced due diligence measures due to the

RISK FACTORS

very nature of their activities (among others, private banking, money transfer and foreign currency exchange operations), they may present a higher risk of money laundering or terrorist financing.

Although the Group has adopted policies, procedures, systems and other measures to manage compliance risk, it is dependent on its employees and external suppliers for the implementation of these policies, procedures, systems and other measures and it cannot guarantee that these are sufficient or that the employees (111,402 and 110,432 as of March 31, 2022 and December 31, 2021, respectively) or other persons of the Group or its business partners, agents and/or other third parties with a business or professional relationship with BBVA do not circumvent or violate current regulations or the Group's ethics and compliance regulations, acts for which such persons or the Group could be held ultimately responsible and/or that could damage the Group's reputation. In particular, acts of misconduct by any employee, and particularly by senior management, could erode trust and confidence and damage the Group's reputation among existing and potential clients and other stakeholders. Actual or alleged misconduct by Group entities in any number of activities or circumstances, including operations, employment related offenses such as sexual harassment and discrimination, regulatory compliance, the use and protection of data and systems, and the satisfaction of client expectations, and actions taken by regulators or others in response to such misconduct, could lead to among other things, sanctions, fines and reputational damage, any of which could lead to a material adverse effect on the Group's business, financial condition and results of operations. Furthermore, the Group may not be able to prevent third parties outside the Group from using the banking network in order to launder money or carry out illegal or inappropriate activities. Further, financial crimes continually evolve and emerging technologies, such as cryptocurrencies and blockchain, could limit the Group's ability to track the movement of funds. Additionally, in adverse economic conditions, it is possible that financial crime attempts will increase significantly.

If there is a breach of the applicable regulations or BBVA's ethics and compliance regulations or if the competent authorities consider that the Group does not perform the necessary due diligence inherent to its activities, such authorities could impose limitations on the Group's activities, the revocation of its authorisations and licenses, and economic penalties, in addition to having significant consequences for the Group's reputation, which could have a significant adverse impact on the Group's business, financial condition and results of operations. Furthermore, the Group from time to time conducts investigations related to alleged violations of such regulations and BBVA's ethics and compliance regulations, and any such investigation or any related proceeding could be time consuming and costly, and its results difficult to predict.

Finally, in 2020 the COVID-19 outbreak has led in many countries to new specific regulations, mainly focused on consumer protection measures. The difficulties associated with the need to adapt the Group's processes and systems to these new regulations quickly has posed a compliance risk. Likewise, the increase in remote account opening driven in part by the pandemic could increase money laundering risks. Additionally, criminals are continuing to exploit the opportunities created by the pandemic across the globe and increased money laundering risks associated with counterfeiting of medical goods, investment fraud, cyber-crime scams and exploitation of economic stimulus measures put in place by governments. Increased strain on the Group's communications surveillance frameworks could in turn raise the Group's market conduct risk.

Any attack, failure or deficiency in the Group's systems could, among other things, lead to the misappropriation of funds of the Group's clients or the Group itself and the unauthorised disclosure, destruction or use of confidential information, as well as preventing the normal operation of the Group, and impair its ability to provide services and carry out its internal management. Furthermore, this could result in the loss of customers and business opportunities, damage to computers and systems, violation of regulations regarding data protection and/or other regulations, exposure to litigation, fines, sanctions or interventions, loss of confidence in the Group's security measures, damage to its reputation, reimbursements and compensation, and additional regulatory compliance expenses and could have a significant adverse impact on the Group's business, financial condition and results of operations.

2.5 Operational Risks

Attacks, failures or deficiencies in the Group's procedures, systems and security or those of third parties to which the Group is exposed could have a significant adverse impact on the Group's business, financial condition and results of operations, and could be detrimental for its reputation

The Group's activities depend to a large extent on its ability to process and report effectively and accurately on a high volume of highly complex transactions with numerous and diverse products and services (by their nature, generally ephemeral), in different currencies and subject to different regulatory regimes. Therefore, it relies on highly sophisticated information technology (IT) systems for data transmission, processing and storage. However, IT systems are vulnerable to various problems, such as hardware and software malfunctions,

RISK FACTORS

computer viruses, hacking, and physical damage to IT centres. BBVA's exposure to these risks has increased significantly in recent years due to the Group's implementation of its ambitious digital strategy. The Group attracted 8.7 million new customers in 2021. As a result of the improvement in digital capacities, customer attraction through digital channels has increased steadily over recent years, and in 2021 reached an all-time high at over 3.5 million, accounting for 40 per cent. of all new customers. Digital customers at the close of 2021 accounted for 69.4 per cent. of the total, at 41.8 million (up 37 per cent. from December 2019). Mobile customers have grown by 42 per cent. since December 2019 over the year to 39.7 million and account for 66 per cent. of the total. Digital sales now amount to 73 per cent. of the total units sold. Digital services, as well as other alternatives that BBVA offers users to become BBVA customers, have become even more important after the COVID-19 outbreak and the ensuing restrictions on mobility in the countries in which the Group operates. Currently, one in three new clients chooses digital channels to start their relationship with BBVA. Any attack, failure or deficiency in the Group's systems could, among other things, lead to the misappropriation of funds of the Group's clients or the Group itself and the unauthorised disclosure, destruction or use of confidential information, as well as preventing the normal operation of the Group, and impairing its ability to provide services and carry out its internal management. In addition, any attack, failure or deficiency could result in the loss of customers and business opportunities, damage to computers and systems, violation of regulations regarding data protection and/or other regulations, exposure to litigation, fines, sanctions or interventions, loss of confidence in the Group's security measures, damage to its reputation, reimbursements and compensation, and additional regulatory compliance expenses and could have a significant adverse impact on the Group's business, financial condition and results of operations. Furthermore, it is possible that such attacks, failures or deficiencies will not be detected on time or ever. The Group is likely to be forced to spend significant additional resources to improve its security measures in the future. As cyber-attacks are becoming increasingly sophisticated and difficult to prevent, the Group may not be able to anticipate or prevent all possible vulnerabilities, nor to implement preventive measures that are effective or sufficient.

Customers and other third parties to which the Group is significantly exposed, including the Group's service providers (such as data processing companies to which the Group has outsourced certain services), face similar risks. Any attack, failure or deficiency that may affect such third parties could, among other things, adversely affect the Group's ability to carry out operations or provide services to its clients or result in the unauthorised disclosure, destruction or use of confidential information. Furthermore, the Group may not be aware of such attack, failure or deficiency in time, which could limit its ability to react. Moreover, as a result of the increasing consolidation, interdependence and complexity of financial institutions and technological systems, an attack, failure or deficiency that significantly degrades, eliminates or compromises the systems or data of one or more financial institutions could have a significant impact on its counterparts or other market participants including the Group.

3. Risk Factors relating to the Securities

3.1 The Securities may not be a suitable investment for all investors

Each potential investor in the Securities must determine the suitability of that investment in light of its own circumstances.

In addition, an investment in Equity Linked Securities, Index Linked Securities, Credit Linked Securities, ETF Linked Securities, Fund Linked Securities, Foreign Exchange (FX) Rate Linked Securities, EUA Contract Linked Securities, Inflation Linked Securities, and Combination Securities may entail significant risks not associated with investments in conventional securities such as debt or equity securities, including, but not limited to, the risks set out in "*Risk Factors associated with Securities that are linked to one or more specific types of Reference Items*" below. The Securities are complex financial instruments. A potential investor should not invest in Securities which are complex financial instruments unless it has the expertise (either alone or with a financial adviser) to evaluate how the Securities will perform under changing conditions, the resulting effects on the value of the Securities and the impact this investment will have on the potential investor's overall investment portfolio.

3.2 Risk Factors associated with Securities that are linked to one or more specific types of Reference Items

There are certain factors which are material for the purpose of assessing the risks associated with an investment in Securities issued under the Programme. Such factors will vary depending on the type of Securities issued, in particular in relation to Securities in respect of which the interest and/or redemption amount is linked to the

RISK FACTORS

value of one or more index, share, inflation index, unit, interest or share in a fund, the credit of one or more reference entity, foreign exchange rate or the combination of any of the foregoing.

There are specific risks relating to Equity Linked Securities

The Issuer may issue Securities where the amount of principal or the value of the Entitlement (as defined in General Condition 6(a)) and/or interest payable is dependent upon the price of or changes in the price of shares or a basket of shares (or depositary receipts) or, depending on the price of or change in the price of shares or the basket of shares (or depositary receipts), where the Issuer's obligation on redemption is to deliver a specified number of shares ("**Equity Linked Securities**"). Accordingly an investment in Equity Linked Securities may bear similar market risks to a direct equity investment and potential investors should take advice accordingly.

Prospective investors in any such Securities should be aware that, depending on the terms of the Equity Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of principal or interest or delivery of any specified shares and/or depositary receipts may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment if the value of the share(s) and/or depositary receipt(s) does not move in the anticipated direction. In addition, the movements in the price of the share or depositary receipt or basket of shares and/or depositary receipts may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant price of the share or shares may affect the actual yield to investors, even if the average level is consistent with their expectations. All these factors may affect the investments in the Securities.

If the amount of principal or entitlement amount deliverable and/or interest payable are determined in conjunction with a multiplier greater than one or by reference to some other leverage factor, the effect of changes in the price of the share or shares on principal or interest payable, and therefore on the amount of potential losses incurred, will be magnified. See also risk factor "*There are risks associated with leveraged exposures*" below.

The market price of such Securities may be volatile and may be affected by the time remaining to the redemption date, the volatility of the share(s) and/or depositary receipt(s), the dividend rate (if any) and the financial results and prospects of the issuer or issuers of the relevant share(s) or depositary receipt(s) as well as economic, financial and political events in one or more jurisdictions, including factors affecting the stock exchange(s) or quotation system(s) on which any such shares or depositary receipts may be traded.

Equity Linked Securities do not provide the holders with any voting rights or rights to receive dividends, interest or other distributions, as applicable, or any other rights with respect to any share, except as may be otherwise provided in the Conditions and/or the relevant Issue Terms. See also risk factor "*A Securityholder does not have rights of ownership in the Reference Item(s)*".

Upon determining that a Potential Adjustment Event, Extraordinary Event or Additional Disruption Event has occurred in relation to an underlying share or the issuer of such underlying share, the Calculation Agent has broad discretion to make certain determinations to account for such event including to (i) make adjustments to the terms of the Securities and/or (ii) (in the case of an Extraordinary Event or an Additional Disruption Event) cause early redemption of the Securities, any of which determinations may have an adverse effect on the value of the Securities.

Potential Adjustment Events (as defined in Equity Linked Condition 3) include (a) a sub-division, consolidation or re-classification of the relevant shares or a free distribution, or dividend of any such shares to existing holders of the relevant shares by way of bonus, capitalisation or similar issue, (b) a distribution, issue or dividend to existing holders of the relevant shares of certain share capital or securities, (c) an extraordinary dividend, (d) a call by a Basket Company or Share Company (as specified in the applicable Issue Terms), as the case may be, in respect of relevant shares that are not fully paid (e) a repurchase by the Basket Company or its subsidiaries or Share Company or its subsidiaries, as the case may be, of relevant shares, (f) in the case of a Basket Company or a Share Company an event that results in any shareholder rights being distributed or becoming separated from shares of common stock or other shares of the capital stock of such Basket Company or Share Company, (g) any adjustment effected as a result of any shareholder rights plan or arrangement described in (f) and (h) any other event having a dilutive or concentrative effect on the value of the shares.

Extraordinary Events (as defined in Equity Linked Condition 3) include (a) a delisting of the shares on an exchange, (b) illiquidity (c) an insolvency (where all the shares of the issuer of the underlying shares are transferred to a trustee, liquidator or similar official or may not be legally transferred) or bankruptcy of the issuer of the shares, (d) a listing change; (e) a listing suspension, (f) a merger event entailing the consolidation of the shares with those of another entity, (g) a nationalisation of the issuer of the shares or transfer of the shares

RISK FACTORS

to a governmental entity and (h) a tender offer or takeover offer that results in transfer of the shares to another entity.

Additional Disruption Event (as defined in Equity Linked Condition 8) means any of Change of Law (unless specified as Not applicable in the Issue Terms) and Failure to Deliver, Hedging Disruption, Increased Cost of Hedging, Increased Cost of Stock Borrow, Insolvency Filing, Stop-Loss Event and/or Loss of Stock Borrow, in each case if specified in the Issue Terms.

See also risk factor *"The Calculation Agent, which will generally be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders"* below.

Holders may receive physical delivery of shares in lieu of payment of cash amounts

Where the Securities include the right of the Issuer, subject to the fulfilment of a particular condition, to redeem the Securities at their maturity by delivering shares to the purchaser of such Securities, the purchasers will receive such shares rather than a monetary amount upon maturity. Holders will, therefore, be exposed to the issuer of such shares and the risks associated with such shares. Securityholders should not assume that they will be able to sell such shares for a specific price after the redemption of the Securities, and in particular not for the purchase price of the Securities. Under certain circumstances the shares may only have a very low value or may, in fact, be worthless. Holders may also be subject to certain documentary or stamp taxes in relation to the delivery and/or disposal of such shares.

There are specific risks relating to Index Linked Securities

The Issuer may issue Securities where the amount of principal and/or interest payable is dependent upon the level of, or changes in the level of, an index or a basket of indices ("**Index Linked Securities**"). Accordingly an investment in Index Linked Securities may bear similar market risks to a direct investment in the components of the index and potential investors should take advice accordingly.

Prospective investors in any such Securities should be aware that depending on the terms of the Index Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of principal or interest may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment if the value of the index/indices does not move in the anticipated direction. In addition, movements in the level of the index or indices may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant level of the index or indices may affect the actual yield to investors, even if the average level is consistent with their expectations. All these factors may affect the investments in the Securities

If the amount of principal and/or interest payable are determined in conjunction with a multiplier greater than one or by reference to some other leverage factor, the effect of changes in the level of the index or the indices on principal or interest payable and therefore on the amount of potential losses incurred, will be magnified. See also risk factor *"There are risks associated with leveraged exposures"* below.

The market price of such Securities may be volatile and may be affected by the time remaining to the redemption date and the volatility of the level of the index or indices as well as the economic, financial and political events in one or more jurisdictions, including the stock exchange(s) or quotation system(s) or pricing source(s) on which any securities or other components comprising the index or indices may be traded. The index may reference equities, bonds or other securities, or it may be an index referencing certain price data which will be subject to market price fluctuations or may reference other underlying component types. An index may include valuations only and not actual transactions and the data sources used to compile the index may be subject to change, which may adversely affect the return on the Securities.

Adjustment to indices for Index Linked Securities

If an Index Adjustment Event (as defined in "*Annex 2 - Additional Terms and Conditions for Index Linked Securities*") occurs the Issuer may require the Calculation Agent to make such adjustments as it determines appropriate to the terms of the Securities or redeem the Securities. Such action may have an adverse effect on the value and liquidity of the affected Index Linked Securities.

A change in the composition or discontinuance of an index could adversely affect the market value of the Securities

The sponsor of any index can add, delete or substitute the components of such index or make other methodological changes that could change the level of one or more components. The changing of components of

RISK FACTORS

any index may affect the level of such index as a newly added component may perform significantly worse or better than the component it replaces, which in turn may affect the payments made by the Issuer to the purchasers of the Securities. The sponsor of any such index may also alter, discontinue or suspend calculation or dissemination of such index. The sponsor of an index will have no involvement in the offer and sale of the Securities and will have no obligation to any purchaser of such Securities. The sponsor of an index may take any actions in respect of such index without regard to the interests of the purchasers of the Securities, and any of these actions could adversely affect the market value of the Securities.

The regulation and reform of "benchmarks" may adversely affect the value of Notes linked to or referencing such "benchmarks"

A number of major interest rates (including the London Inter-Bank Offered Rate ("**LIBOR**") and the Euro Interbank Offered Rate ("**EURIBOR**")), other rates, indices and other published values or benchmarks are the subject of national, international and other regulatory guidance and proposals for reform. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on the value of and return on Securities linked to any such value or benchmark.

Regulation (EU) 2016/1011 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the "**EU Benchmarks Regulation**") is a key element of ongoing regulatory reform in the EU and has applied, subject to certain transitional provisions, since January 1, 2022. In addition to so-called "critical benchmark" indices, such as LIBOR and EURIBOR, other interest rates, foreign exchange rates, and indices, including equity, commodity and "proprietary" indices or strategies, will in most cases be within scope of the EU Benchmarks Regulation as "benchmarks" where they are used to determine the amount payable under, or the value of, certain financial instruments (including securities listed on an EU regulated market, EU multilateral trading facility ("**MTF**"), EU organised trading facility ("**OTF**") or via a systematic internaliser). Regulation (EU) 2016/1011 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the "**UK Benchmarks Regulation**") is the relevant regulatory regime applicable to, among other things, the provision of benchmarks and the use of a benchmark in the UK.

The EU Benchmarks Regulation applies to the contribution of input data to a benchmark, the administration of a benchmark, and the use of a benchmark in the EU. Amongst other things, the EU Benchmarks Regulation requires EU benchmark administrators to be authorised or registered as such and to comply with extensive requirements relating to benchmark administration. It also prohibits certain uses by EU supervised entities of (a) benchmarks provided by EU administrators which are not authorised or registered in accordance with the EU Benchmarks Regulation and (b) benchmarks provided by non-EU administrators where (i) the administrator's regulatory regime has not been determined to be "equivalent" to that of the EU, (ii) the administrator has not been recognised in accordance with the EU Benchmarks Regulation, or (iii) the benchmark has not been endorsed in accordance with the EU Benchmarks Regulation. Similarly, the UK Benchmarks Regulation prohibits the use of in the UK by UK supervised entities of benchmarks of administrators that are not authorised by the Financial Conduct Authority (the "**FCA**") or registered on the FCA register (or, if not based in the UK, not deemed equivalent or recognised or endorsed).

The EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable, could have a material adverse impact on any Securities for which a request for admission to trading on a trading venue has been made, or which are traded on a trading venue or via a "systematic internaliser" linked to, referencing or otherwise dependent (in whole or in part) upon a "benchmark" for the purposes of the EU Benchmarks Regulation and/or UK Benchmarks Regulation, as applicable.

Any of the above changes or any other consequential changes to any benchmark may result in:

- the level of the published rate or the level of the "benchmark" or the volatility of the published rate or level being adversely affected;
- an increase in the costs and risks of administering or otherwise participating in the setting of a "benchmark" and complying with such regulations or requirements;
- the "benchmark" (including certain currencies or tenors of benchmarks) being discontinued or otherwise unavailable, which may result in the rate of interest in respect of the Securities (if any) being determined based on any applicable fallback provisions or the redemption of the Securities;
- the methodology or other terms of the benchmark being changed in order to comply with regulatory requirements;

RISK FACTORS

- the occurrence of an Administrator/Benchmark Event (as further described under "*Risks associated with the occurrence of an Administrator/Benchmark Event*" below); or
- have other adverse effects or unforeseen consequences.

Any such consequences could have a material adverse effect on the value of and return on any Securities and/or could lead to the Securities being de-listed, adjusted, redeemed early following the occurrence of an Administrator/Benchmark Event, subject to discretionary valuation or adjustment by the Calculation Agent or otherwise impacted depending on the particular "benchmark" and the applicable terms of the Securities. This could also negatively affect the liquidity of the Securities and a Securityholder's ability to sell their Securities in the secondary market.

The Benchmarks Regulation was further amended by Regulation (EU) 2021/168 of the European Parliament and of the Council of February 10, 2021 which introduces a harmonised approach to deal with the cessation or wind-down of certain benchmarks (such as EURIBOR or LIBOR) by conferring the power to designate a statutory replacement for said benchmarks on the Commission or the relevant national authority in certain circumstances, such replacement being limited to contracts and financial instruments (such as certain Notes) which contain no fallback provision or no suitable fallback provisions and where certain trigger events relating to non-representativeness or cessation or wind down of the benchmark are met. In general, parties can opt out of the statutory replacement where all parties, or the required majority of parties, to a contract or financial instrument have agreed to apply a different replacement for a benchmark before or after entry into force of the implementing act. A statutory replacement benchmark could have a negative impact on the value or liquidity of, and return on, certain Securities linked to or referencing such benchmark and may not operate as intended at the relevant time or may perform differently from the discontinued or otherwise unavailable benchmark.

In addition Regulation (EU) 2021/168 is subject to further development through delegated regulations and the transitional provisions applicable to third-country benchmarks are extended until the end of 2023 (and the Commission is empowered to further extend this period until the end of 2025, if necessary). There are therefore still details to be clarified in relation to the potential impact of these legislative developments. Accordingly, there may be a risk that a statutory replacement benchmark may be designated if, for instance, a replacement benchmark determined in accordance with the fallback provisions is deemed unsuitable as its application no longer reflects or significantly diverges from the underlying market or the economic reality that the benchmark in cessation is intended to measure (and where certain other conditions are satisfied, including one of the parties objecting to the contractually agreed fallback).

See also risk factor "*The Calculation Agent, which will generally be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders*" below.

Risks associated with the occurrence of an Administrator/Benchmark Event

The occurrence of an Administrator/Benchmark Event (as defined in General Condition 6(l)) may lead to redemption or adjustment of the Securities. Any such adjustment or redemption of the Securities following the occurrence of an Administrator/Benchmark Event may have an adverse effect on the value and liquidity of such Securities and accordingly the amount Securityholders can expect to receive on their investment.

The implementation of SOFR Replacement Conforming Changes could adversely affect Securityholders

Under the fallback provisions applicable to Notes that pay a floating rate of interest by reference to the Secured Overnight Financing Rate ("**SOFR**") (whether a compounded rate or the SOFR Index), if a particular SOFR Replacement or SOFR Replacement Adjustment (each as defined in General Condition 4(b)(iv)(3)(C)) cannot be determined, then the next-available SOFR Replacement or SOFR Replacement Adjustment will apply. These replacement rates and adjustments may be selected or formulated by (i) the Relevant Governmental Body (as defined in General Condition 4(b)(iv)(3)(D)), (ii) ISDA or (iii) in certain circumstances, the Calculation Agent and/or the Replacement Rate Determination Agent.

In addition, the fallback provisions permit the Replacement Rate Determination Agent to make certain changes (which are defined in General Condition 4(b)(iv)(3)(D) as "**SOFR Replacement Conforming Changes**") with respect to, among other things, the timing and frequency of determining rates and making payments of interest. The application of a SOFR Replacement and SOFR Replacement Adjustment and any implementation of SOFR Replacement Conforming Changes could reduce the amount of interest payable in respect of an interest period, which could adversely affect the return on, value of and market for, the Securities. Further, there is no assurance that the characteristics of any SOFR Replacement will be similar to the then-current SOFR benchmark that it is

RISK FACTORS

replacing or that any SOFR Replacement will produce the economic equivalent of the then-current SOFR benchmark that it is replacing.

There are specific risks relating to Credit Linked Securities

The Issuer may issue Securities where the amount of principal and/or interest payable is dependent upon whether certain events ("**Credit Events**") have occurred in respect of one or more entities (together "**Reference Entities**") and each, a "**Reference Entity**") and, if so, on the value of certain specified debt obligations of such Reference Entity(ies) or, where, if such events have occurred, the Issuer's obligation is to deliver certain specified assets upon redemption of the Securities.

Prospective investors in any such Securities should be aware that depending on the terms of the Credit Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of principal or interest or delivery of any specified assets may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment.

The market price of such Securities may be volatile and will be affected by, amongst other things, the time remaining to the redemption date and the creditworthiness of the reference entity which in turn may be affected by the economic, financial and political events in one or more jurisdictions, over which neither the Issuer nor Guarantor has control.

This Base Prospectus contains Additional Terms and Conditions for Credit Linked Securities with terms based on (but not identical to) the 2014 Credit Derivatives Definitions published by the International Swaps and Derivatives Association, Inc. (the "**2014 ISDA Definitions**") which are set out in Annex 8. In this respect investors should have regard to the risk factor on page 38 entitled "*ISDA Credit Derivatives Definitions*".

The Issuer's obligations in respect of Credit Linked Securities are irrespective of the existence or amount of the Issuer's and/or any affiliates' credit exposure to a reference entity and the Issuer and/or any affiliate need not suffer any loss nor provide evidence of any loss as a result of the occurrence of a Credit Event.

If Credit Linked Redemption is applicable the occurrence of Credit Events may affect the redemption date of the Securities

Credit Linked Securities in respect of which Credit Linked Redemption is applicable may be redeemed prior to their scheduled maturity, save where: (i) Maturity Credit Redemption applies; or (ii) the Securities are Tranche Linear Basket Credit Linked Securities or Tranche Index Credit Linked Securities or Basket Tranche Credit Linked Securities or Long/Short Credit Linked Securities; or (iii) the Securities are Non-Tranche Linear Basket Credit Linked Securities or Non-Tranche Index Credit Linked Securities where Credit Payment on Maturity applies. However, where the Credit Event Redemption Amount payable in respect of Securities described in (ii) or (iii) of the foregoing section is zero and Credit Linked Redemption is applicable, the Securities will be redeemed early. Where such Securities are redeemed early following a Credit Event, investors may lose some or all of the principal invested and will not receive the full amount of interest (if any) to the extent that interest on the Security is also Credit Linked.

Where Maturity Credit Redemption applies or where the Securities are Non-Tranche Linear Basket Credit Linked Securities or Non-Tranche Index Credit Linked Securities where Credit Payment on Maturity Applies (as specified in the applicable Issue Terms) or where the Securities are Tranche Linear Basket Credit Linked Securities, Tranche Index Credit Linked Securities, Basket Tranche Index Credit Linked Securities or Long/Short Credit Linked Securities, in each case in respect of which Credit Linked Redemption is applicable, maturity of the Credit Linked Securities may be delayed until scheduled maturity of the Credit Linked Securities. Investors may therefore be forced to wait a significant time following the occurrence of the relevant Credit Event before they receive the redemption amount owed (if any).

If Credit Linked Redemption is applicable, the occurrence of a Credit Event may affect the amount payable or deliverable on redemption of the Securities

Where Credit Linked Redemption is applicable and cash settlement or auction settlement applies, the occurrence of a Credit Event in relation to any Reference Entity from time to time may result in a redemption of the Securities in a reduced nominal amount or at zero meaning that investors may lose some or all of the principal amount invested.

Where Credit Linked Redemption is applicable and physical settlement applies, the occurrence of a Credit Event may result in the redemption of the Securities by delivery of certain direct or indirect obligations of the affected Reference Entity, which obligations are likely to have a market value which is substantially less than their par amount. Where the Securities provide for physical delivery, the Issuer may determine that the specified assets to

RISK FACTORS

be delivered are either (a) assets which, for any reason (including, without limitation, failure of the relevant clearance system or due to any law, regulation, court order or market conditions or the non-receipt of any requisite consents with respect to the delivery of assets which are loans), are impossible or illegal to deliver on the specified settlement date, or (b) assets which the Issuer, the Guarantor and/or any affiliate has not received under the terms of any transaction entered into by the Issuer, the Guarantor and/or such affiliate to hedge the Issuer's obligations in respect of the Securities. Any such determination may delay settlement in respect of the Securities and/or cause the obligation to deliver such specified assets to be replaced by an obligation to pay a cash amount which, in either case, may affect the value of the Securities and, in the case of payment of a cash amount, will affect the timing of the valuation of such Securities and as a result, the amount of principal payable on redemption.

Increased credit risk is associated with "First-to-Default" or "Nth-to-Default" Credit Linked Securities, Linear Basket Credit Linked Securities or Index Credit Linked Securities or Long/Short Credit Linked Securities

Where the Securities are Single Reference Entity Credit Linked Securities, First-to-Default or Nth-to-Default Credit Linked Securities, and Credit-Linked Redemption is applicable, the Securities may be subject to redemption in full as described above as a consequence of the occurrence of a Credit Event in relation to a single Credit Event the first or the nth Reference Entity in respect of which a Credit Event occurs either shortly after such credit event or, where Maturity Credit Redemption is applicable, at the scheduled maturity date.

Where the Securities are Non-Tranched Linear Basket Credit Linked Securities or Non-Tranched Index Credit Linked Securities, and Credit-Linked Redemption is applicable, where Credit Payment As You Go applies, the Securities may be subject to redemption in part upon the occurrence of a Credit Event in relation to each Reference Entity in respect of which a Credit Event occurs unless Maturity Credit Redemption is applicable in which case such Securities shall only be redeemed at the scheduled maturity date.

Where the Securities are Tranched Linear Basket Credit Linked Securities, the redemption amount of the Securities will only be reduced as described above upon the occurrence of a Credit Event in relation to a number greater than the L (being the lower tranche level) number of Reference Entities specified in the Issue Terms but will be subject to redemption in full as described above upon the occurrence of a Credit Event in relation to a number equal to or greater than the H (being the higher tranche level) number of Reference Entities specified in the Issue Terms. The credit risk to Securityholders may further be increased as a result of the concentration of Reference Entities in a particular industry sector or geographic area or the exposure of the Reference Entities to similar financial or other risks.

Where the Securities are Tranched Index Credit Linked Securities or Basket Tranched Index Credit Linked Securities, the redemption amount of the Securities will only be reduced as described above upon the occurrence of a Credit Event resulting in the Aggregate Loss Percentage exceeding the Attachment Point specified in the Issue Terms or the Aggregate Loss Percentage in respect of a Basket Tranched Index Component exceeding the Attachment Point for that Basket Tranched Index Component specified in the Issue Terms, as the case may be, but will be subject to redemption in full as described above upon the occurrence of a Credit Event resulting in the Aggregate Loss Percentage, being equal to or greater than the Exhaustion Point specified in the Issue Terms or the Aggregate Loss Percentage in respect of each Basket Tranched Index Component exceeding the Attachment Point for that Basket Tranched Index Component specified in the Issue Terms, as the case may be. The credit risk to Securityholders may further be increased as a result of the concentration of Reference Entities in a particular industry sector or geographic area or the exposure of the Reference Entities to similar financial or other risks.

Where the Securities are Long/Short Credit Linked Securities, the Securities will be redeemed at an amount that is equal to the sum of the Long Redemption Amount and the Short Redemption Amount. The occurrence of Credit Events may result in a reduction of the Long Redemption Amount but an increase in the Short Redemption Amount, depending on the Long Exposure or Short Exposure selected and the relevant Reference Entities. The credit risk to Securityholders may further be increased as a result of the concentration of Reference Entities in a particular industry sector or geographic area or the exposure of the Reference Entities to similar financial or other risks.

If Credit Linked Interest is applicable, the occurrence of Credit Events may reduce the interest payable on the Securities

In the case of Single Reference Entity Credit Linked Securities or First-to-Default Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Credit Event Determination Date no further interest will accrue on the Securities. In the case of Nth-to-Default Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Trigger no further interest

RISK FACTORS

will accrue on the Securities. In any such circumstances, interest may cease to accrue from the Credit Event Determination Date or from the Interest Payment Date immediately preceding the Credit Event Determination Date or Trigger, depending on the elections made in the Issue Terms.

In the case of Tranching Linear Basket Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Credit Event Determination Date with respect to a number of Reference Entities that is greater than the L (being the lower tranche) number of Reference Entities specified in the Issue Terms and each subsequent Credit Event Determination Date thereafter, interest that is subject to the Credit Linked provisions will accrue on a decreased nominal amount of the Securities until a Credit Event Determination Date has occurred with respect to a number of Reference Entities that is equal to or greater than the H (being the higher tranche) number of Reference Entities specified in the Issue Terms and at which point no further interest shall be due in respect of the Securities.

In the case of Tranching Index Credit Linked Securities or Basket Tranching Index Credit Linked Securities, following the occurrence of a Credit Event Determination Date with respect to which the Aggregate Loss Percentage in respect of which a Credit Event Determination Date has occurred, exceeds the Attachment Point, (being the lower tranche specified in the Issue Terms) or, in the case of Basket Tranching Index Credit Linked Securities, the Aggregate Loss Percentage in respect of a Basket Tranching Index Component exceeds the Exhaustion Point in respect of that Basket Tranching Index Component and each subsequent Credit Event Determination Date thereafter, if Credit Linked Interest is applicable interest will accrue on a decreased nominal amount of the Securities until the Scheduled Maturity Date or until a Credit Event Determination Date has occurred with respect to a number of Reference Entities such that Aggregate Loss Percentage is equal to or greater than the Exhaustion Point (being the upper tranche specified in the Issue Terms) or, in the case of Basket Tranching Index Credit Linked Securities, the Aggregate Loss Percentage in respect of each Basket Tranching Index Component is equal to or greater than the Exhaustion Point in respect of that Basket Tranching Index Component and at which point no further interest amounts shall be due in respect of the Securities.

In the case of Long/Short Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Credit Event Determination Date in respect of a Reference Entity referenced in the Long Exposure, interest may accrue on a decreased nominal amount of the Securities and may cease to accrue entirely, depending on the nature of the Long Exposure specified in the Issue Terms.

Reference Entity Credit Risk

The holders of Credit Linked Securities will be exposed to the credit of one or more Reference Entities, which exposure shall be, unless otherwise stated in the Issue Terms, to the full extent of their investment in such Securities. Upon the occurrence of any of the default events comprising a Credit Event with respect to any Reference Entity, the Securityholders may suffer significant losses at a time when losses may be suffered by a direct investor in obligations of such Reference Entity. However, the holding of a Security is unlikely to lead to outcomes which exactly reflect the impact of investing in an obligation of a Reference Entity, and losses could be considerably greater than would be suffered by a direct investor in the obligations of a Reference Entity and/or could arise for reasons unrelated to such Reference Entity. Securityholders should also note that a Credit Event may occur even if the obligations of a Reference Entity are unenforceable or their performance is prohibited by any applicable law or exchange controls. See also the risk factor "*There are risks associated with leveraged exposures*" below.

Investors in the Securities are accordingly exposed, as to (if Credit Linked Redemption is applicable) principal and (if Credit Linked Interest is applicable) interest, to the credit risk of one or more Reference Entities. The maximum loss to an investor in the Securities is (if Credit Linked Redemption is applicable) 100 per cent. of their initial principal investment, together with (if Credit Linked Interest is applicable) any accrued interest amounts.

For Index Credit Linked Securities and Long/Short Credit Linked Securities that reference an Index, the Reference Entities and the Reference Obligations as of the Issue Date of the Credit Linked Securities will be those set out in the Index Annex, being the list for the relevant Markit iTraxx® Europe Index (in the case of iTraxx Non-Tranching Index Credit Linked Securities or iTraxx Tranching Index Credit Linked Securities) or Markit CDXTM Index (in the case of CDX Non-Tranching Index Credit Linked Securities or CDX Tranching Index Credit Linked Securities) with the Annex Date specified in the Issue Terms, as published by the Index Publisher (being Markit Group Limited as of the date of this Base Prospectus). Any determinations by the Index Sponsor (being Markit Indices Limited in the case of iTraxx Non-Tranching Index Credit Linked Securities and iTraxx Tranching Index Credit Linked Securities and Markit North America, Inc. in the case of CDX Non-Tranching Index Credit Linked Securities and CDX Tranching Index Credit Linked Securities, in each case as of the date of this Base Prospectus) with respect to replacement Reference Obligations and/or Successors (subject,

RISK FACTORS

in relation to Successors, to the further determination provisions set out in the Credit Linked Conditions), will apply for the purposes of the Credit Linked Securities and any such determinations and resulting changes in Reference Obligations and/or Reference Entities may have an adverse effect on the value of such Securities.

Additionally, if ISDA publicly announces one or more replacement Reference Obligations and/or Successors prior to the Trade Date but following the "Roll Date" (in the case of iTraxx Non-Tranched Index Credit Linked Securities or iTraxx Tranched Index Credit Linked Securities) or the "Effective Date" (in the case of CDX Non-Tranched Index Credit Linked Securities or CDX Tranched Index Credit Linked Securities) specified in the Index Annex, such replacement Reference Obligations and/or Successors will apply for the purposes of the Credit Linked Securities, notwithstanding that such announcement occurred prior to the Trade Date, and any such announcements and resulting changes in Reference Obligations and/or Reference Entities may have an adverse effect on the value of such Securities.

Investors' exposure to the credit performance of the Reference Entities may not correspond to actual market recovery on such Reference Entities, including for Zero/Set Recovery Securities, Tranched Linear Basket Credit Linked Securities, Tranched Index Credit Linked Securities, Basket Tranched Index Credit Linked Securities and Long/Short Credit Linked Securities

Interest and principal repayments on the Securities may be calculated by reference to the outstanding nominal amount of the Securities. As at the Issue Date the outstanding nominal amount is an amount equal to the Aggregate Nominal Amount. If a Credit Event occurs in respect of a Reference Entity, then the outstanding nominal amount may be reduced for the purposes of the determination of interest (if Credit Linked Interest is applicable) and/or the amount payable on redemption (if Credit Linked Redemption is applicable) by an amount equal to a predefined portion of the Aggregate Nominal Amount (which may be one hundred percent of such predefined portion resulting in such portion of the outstanding nominal amount being reduced in full) irrespective of the actual market recovery in respect of such Reference Entity. Therefore investors' exposure to each Reference Entity may exceed the exposure that they might incur in respect of having entered into a standard single name credit default swap as protection seller in respect of each Reference Entity and investors may lose the entire principal amount invested.

There is a risk that the Securities could be affected by a Credit Event or succession that took place prior to the Trade Date

In respect of a Credit Event relating to a Series of Credit Linked Securities, a Credit Event will not be determined by the Credit Derivatives Determinations Committee unless a request is submitted to ISDA for the relevant Credit Derivatives Determinations Committee to consider whether the relevant event constitutes a Credit Event within 60 calendar days of the occurrence of such potential Credit Event unless a Credit Event Determination Date has already occurred with respect to such event. For the purposes of the succession provisions the look-back period is 90 calendar days and functions similarly. These provisions mean that there is a time limit on the ability to act on a Credit Event or succession and that it is possible that the Securities could be affected by a Credit Event or succession that took place prior to the Trade Date if Auction Settlement is specified as the applicable Settlement Method for a Series of Securities in the relevant applicable Issue Terms.

Amendment of Credit Linked Conditions in accordance with market convention

The Calculation Agent may from time to time amend any provision of the Credit Linked Conditions to incorporate and/or reflect further or alternative documents or protocols from time to time published by ISDA with respect to the settlement of credit derivative transactions and/or the operation or application of determinations by the ISDA Credit Derivatives Determinations Committees which the Calculation Agent and the Issuer determine in a commercially reasonable manner are necessary to reflect or govern market practice for credit derivative transactions or hedging arrangements of the Issuer. Any such adjustment may amend the Securities in a way that is adverse to the Securityholders and may have a negative impact on the value of the Securities.

ISDA Credit Derivatives Definitions

Whilst there are many similarities between the terms used in this Base Prospectus and the 2014 ISDA Definitions, there are also many substantial differences and a prospective investor should understand that the complete terms and conditions of the Securities are as set out in this Base Prospectus and the applicable Issue Terms only and that the 2014 ISDA Definitions are not incorporated by reference to either. Consequently, investing in Credit Linked Securities is not necessarily equivalent to investing a credit default swap that incorporates either the 2003 ISDA Definitions or the 2014 ISDA Definitions.

RISK FACTORS

While ISDA has published and, where appropriate, supplemented the 2014 ISDA Definitions in order to facilitate transactions and promote uniformity in the credit derivatives market, the credit derivatives market has evolved over time and is expected to continue to change. Consequently, the 2014 ISDA Definitions and the terms applied to credit derivatives generally, including Credit Linked Securities are subject to further evolution. Past events have shown that the view of market participants may differ as to how either set of the ISDA Definitions operate or should operate. As a result of the continued evolution of the market, the Credit Linked Securities may not conform to future market standards. Such a result may have a negative impact on the Credit Linked Securities and there can be no assurances that changes to the terms applicable to credit derivatives generally will be predictable or favourable to the Issuer or the Securityholders.

Risks relating to Auction Settlement of Credit Linked Securities

Where an Auction Final Price Determination Date occurs in respect of Credit Linked Securities, the Auction Final Price will be determined according to an auction procedure set out in the applicable Transaction Auction Settlement Terms, a form of which will be published by ISDA on its website at <https://www.isda.org/> (or any successor website thereto) from time to time and may be amended from time to time. The Auction Final Price determined pursuant to an auction may be less than the market value that would otherwise have been determined in respect of the relevant Reference Obligation.

The Issuer and the Securityholders may have little or no influence in the outcome of any such auction. However, there is a possibility that the Issuer or the Calculation Agent (or one of their Affiliates) would act as a participating bidder in any such auction. In such capacity, it may take certain actions which may influence the Auction Final Price including (without limitation): (a) providing rates of conversion to determine the applicable currency conversion rates to be used to convert any obligations which are not denominated in the auction currency into such currency for the purposes of the auction; and (b) submitting bids, offers and physical settlement requests with respect to the relevant Deliverable Obligations. In deciding whether to take any such action (or whether to act as a participating bidder in any auction), neither the Issuer nor the Calculation Agent (or any of their Affiliates) shall be under any obligation to consider the interests of any Securityholder and, as a result, may take action that is adverse to the interests of Securityholders.

Cheapest to deliver risk

Where Physical Settlement is applicable, upon the occurrence of a Credit Event Determination Date, the Calculation Agent has the discretion to select Deliverable Obligations of the Reference Entity for delivery to the Securityholders. It is likely that the Deliverable Obligations selected by the Calculation Agent are obligations of the Reference Entity with the lowest market value that are permitted to be delivered in accordance with the terms of the Securities. In addition, the Deliverable Obligations may be illiquid and such illiquidity may be more pronounced following the occurrence of a Credit Event, thereby adversely affecting the value of the relevant Deliverable Obligation. The Calculation Agent has no liability to account to the Securityholders or any other person for any profit or other benefit to it or any of its affiliates which may result directly or indirectly from such selection.

Cheapest to value risk

Where Cash Settlement is applicable, upon the occurrence of an Event Determination Date, the Calculation Agent has the discretion to select Valuation Obligations of the Reference Entity for valuation in order to determine the Final Price. It is likely that the Valuation Obligations selected by the Calculation Agent are obligations of the Reference Entity with the lowest market value that are permitted to be valued in accordance with the terms of the Securities. This could result in a lower recovery value and hence greater losses for Securityholders. In addition, the Valuation Obligations may be illiquid and such illiquidity may be more pronounced following the occurrence of a Credit Event, thereby adversely affecting the value of the relevant Valuation Obligation which in turn would result in a lower recovery value for Securityholders.

There are specific risks relating to Fund Linked Securities and ETF Linked Securities

The Issuer may issue Securities where the amount of principal and/or interest payable are dependent upon the price or changes in the price of units or shares in a fund or funds (including exchange traded fund shares) or, depending on the price or changes in the price of units or shares in such fund or funds, where the Issuer's obligation on redemption is to deliver a specified amount of fund shares ("**Fund / ETF Linked Securities**"). Accordingly an investment in Fund / ETF Linked Securities may bear similar market risks to a direct fund investment and potential investors should take advice accordingly.

Prospective investors in any such Securities should be aware that, depending on the terms of the Fund / ETF Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of principal or interest or

RISK FACTORS

delivery of any specified Fund shares or ETF shares may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment. In addition, the movements in the price of units, shares or interests in the fund or funds may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant price of the units or shares in the fund or funds may affect the actual yield to investors, even if the average level is consistent with their expectations.

If the amount of principal or entitlement amount deliverable and/or interest payable are determined in conjunction with a multiplier greater than one or by reference to some other leverage factor, the effect of changes in the price of the units or shares of the fund(s) or exchange traded funds on principal or interest payable, and therefore on the amount of potential losses incurred, will be magnified. See also risk factor "*There are risks associated with leveraged exposures*" below.

The market price of such Securities may be volatile and may depend on the time remaining to the redemption date and the volatility of the price of units or shares in the fund(s) or exchange traded fund(s). The price of units or shares in a fund or exchange traded fund may be affected by the economic, financial and political events in one or more jurisdictions, including factors affecting the exchange(s) or quotation system(s) on which any units or shares in the fund(s) or exchange traded fund(s) may be traded. In addition, the price of units or shares in a fund or exchange traded fund may be affected by the performance of the fund service providers, and, in particular, the investment advisor. Prospective investors should carefully review the prospectus, information memorandum and/or base prospectus (if any) issued by any relevant fund or exchange traded fund before purchasing any Securities linked to such funds or exchange traded funds. None of the Issuer, the Guarantor, any affiliate of the Issuer or Guarantor or the Calculation Agent make any representation as to the creditworthiness of any relevant fund or exchange traded fund or any such fund's administrative, custodian, investment manager or adviser. If such persons are not creditworthy or otherwise fail to perform, as the case may be, it may adversely affect value of the Securities.

In addition, when the Issuer issues Fund / ETF Linked Securities linked to one or more funds, including hedge funds and exchange traded funds the relevant fund(s) or exchange traded fund(s) may trade and invest in a broad range of investments such as debt and equity securities, commodities or commodity indices and foreign exchange and may enter into derivative transactions, including, without limitation, futures and options. The relevant fund(s) or exchange traded fund(s) may often be illiquid and may only be traded on a monthly, quarterly or even less frequent basis. The trading strategies of funds are often opaque. The relevant fund(s) or exchange traded fund(s), as well as the markets and instruments in which they invest, are often not subject to review by governmental authorities, self-regulatory organisations or other supervisory authorities. If the underlying relevant fund(s) or exchange traded fund(s) do not perform sufficiently well, the value of the Securities will fall, and may in certain circumstances be zero.

Fund/ETF Linked Securities do not provide holders with any participation rights in the underlying Fund/ETF and do not entitle holders of Fund/ETF Linked Securities to any ownership interest or rights in such Fund/ETF. Except as may be otherwise provided in the Terms and Conditions and/or the relevant Issue Terms, holders will not have voting rights or rights to receive dividends or distributions or any other rights with respect to the relevant fund shares or units to which such Securities relate. See also risk factor "*A Securityholder does not have rights of ownership in the Reference Item(s)*".

In the event of the occurrence of one or more Potential ETF Events (as defined in ETF Linked Condition 2), the Calculation Agent may seek to make adjustments in accordance with the ETF Linked Conditions. Such adjustments may have an adverse effect on the value of the Securities.

In the event of the occurrence of one or more Extraordinary Fund Events (as defined in Fund Linked Condition 1) or Extraordinary ETF Events (as defined in ETF Linked Condition 2), as the case may be, the Issuer may seek to make adjustments, substitute the relevant Fund Shares or ETF Shares, as the case may be, with fund shares of a fund, or exchange traded fund shares, as the case may be, with similar characteristics or, if no such fund or ETF is selected, with a replacement index, or redeem the Securities at its discretion. Any adjustment or substitution may have an adverse effect on the value of the Securities.

In the event that redemption proceeds in respect of the underlying Fund Shares or ETF Shares, as the case may be, are not received by the hedge provider on or prior to the Scheduled Maturity Date or Termination Date, such date may be postponed for a period of up to two calendar years (or such other period as may be specified in the Issue Terms) and no additional amount shall be payable as a result of such delay and so in such circumstance investors may therefore miss the opportunity to invest the redemption proceeds that would have been otherwise received earlier in other assets or investments.

RISK FACTORS

See also risk factors "*A Securityholder does not have rights of ownership in the Reference Item(s)*" and "*The Calculation Agent, which will generally be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders*" below.

Holders may receive physical delivery of Fund Shares or ETF Shares in lieu of payment of cash amounts.

Where the Securities include the right of the Issuer, subject to the fulfilment of a particular condition, to redeem the Securities at their maturity by delivering Fund Shares or ETF Shares to the purchaser of such Securities, the purchasers will receive such Fund Shares or ETF Shares rather than a monetary amount upon maturity. Holders will, therefore, be exposed to the issuer of such Fund Shares or ETF Shares and the risks associated with such Fund Shares or ETF Shares. The purchaser should not assume that the Securityholder will be able to sell such Fund Shares or ETF Shares for a specific price after the redemption of the Securities, and in particular not for the purchase price of the Securities. Under certain circumstances the Fund Shares or ETF Shares may only have a very low value or may, in fact, be worthless, in which case see risk factor "*Investors may lose the original invested amount*" below. Holders may also be subject to certain documentary or stamp taxes in relation to the delivery and/or disposal of such Fund Shares or ETF Shares.

For all the above reasons, investing directly or indirectly in funds is generally considered to be risky. If the underlying fund does not perform sufficiently well, the value of the Securities will fall, and may in certain circumstances be zero.

There are specific risks relating to Foreign Exchange (FX) Rate Linked Securities

The Issuer may issue Securities where the amount of principal and/or interest payable are dependent upon movements in currency exchange rates or are payable in one or more currencies which may be different from the currency in which the Securities are denominated ("**Foreign Exchange (FX) Rate Securities**"). Accordingly an investment in Foreign Exchange (FX) Rate Securities may bear similar market risks to a direct foreign exchange investment and potential investors should take advice accordingly.

Prospective investors in any such Securities should be aware that, depending on the terms of the Foreign Exchange (FX) Rate Securities (i) they may receive no or a limited amount of interest, (ii) payment of principal or interest may occur at a different time or in a different currency than expected and (iii) they may lose a substantial portion or all of their investment. In addition, movements in currency exchange rates may be subject to significant fluctuations that may not correlate with changes in interest rates or other indices and the timing of changes in the exchange rates may affect the actual yield to investors, even if the average level is consistent with their expectations.

The foreign exchange rate(s) to which the Securities are linked will affect the nature and value of the investment return on the Securities. The performance of foreign exchange rates are dependent upon the supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks. Such measures include, without limitation, imposition of regulatory controls or taxes, issuance of a new currency to replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates and the availability of a specified currency. Where the Securities are linked to the currency of an emerging market jurisdiction, such risks may be magnified – see also risk factor "*Where the Securities are denominated in an emerging market currency or linked to one or more emerging market currencies, such emerging market currencies can be significantly more volatile than currencies of more developed markets*" below.

If the amount of principal and/or interest payable are dependent upon movements in currency exchange rates and are determined in conjunction with a multiplier greater than one or by reference to some other leverage factor, the effect of changes in the currency exchange rates on principal or interest payable will be magnified. See also risk factor "*There are risks associated with leveraged exposures*" below.

Payments of principal and interest or other obligations of the Issuer in respect of any Foreign Exchange (FX) Rate Securities may be restricted or varied upon the occurrence of certain disruption events applicable to the Securities. A relevant disruption event for an exchange rate may relate to inability to obtain a price for the exchange rate from the applicable price source(s), illiquidity, the split of any relevant currency into a dual exchange rate, inconvertibility, non-transferability, a material change in circumstances in the jurisdiction of the Subject Currency that makes it impossible to fulfil certain hedging arrangements, a nationalisation or variations in the prices quoted for the exchange on different sources being greater than a specified percentage threshold (or

RISK FACTORS

not quoted for by members of a survey used to determine such source) if specified for that rate in the terms and conditions of the Securities and/or the Issue Terms.

Following a relevant disruption event, the applicable valuation date may be postponed so long as the relevant disruption event continues, the Calculation Agent may determine the applicable exchange rate, the Securities may be redeemed early (or on the originally designated date) by payment of the applicable early redemption amount rather than any amount that would have otherwise been calculated in respect of and due on the relevant date, the related date for payment or delivery may be deferred so long as the relevant disruption event continues or a fallback reference price source or sources may be used to calculate the rate instead of the originally designated price source. Potential investors in any Foreign Exchange (FX) Rate Securities may be affected by an adverse effect on (i) the value of, and/or amounts or assets due in respect of, the Securities due to the occurrence of any disruption event and application of the related disruption fallback(s); or (ii) an investor's investment schedule, timetable or plans if any due date for payment and/or delivery under the Securities is postponed as a consequence of a disruption event.

See also risk factor "*The Calculation Agent, which will generally be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders*" below.

There are specific risks relating to Inflation Linked Securities

The Issuer may issue Securities where the amount of principal and/or interest payable is dependent upon the level of an inflation index or indices ("**Inflation Linked Securities**").

Prospective investors in any such Securities should be aware that, depending on the terms of the Inflation Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of principal or interest may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment. In addition, the movements in the level of the inflation index or indices may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant level of the inflation index or indices may affect the actual yield to investors, even if the average level is consistent with their expectations.

In certain circumstances following cessation of publication of the inflation index, the Calculation Agent may determine a successor inflation index and make adjustments to the terms of the Securities and such adjustments may have an adverse effect on the value of the Securities. In certain circumstances following cessation of publication of the inflation index, the Calculation Agent may determine that there is no appropriate alternative inflation index, in which case the Issuer may redeem the Securities early and investors may receive less than their initial investment in the Securities. See also risk factor "*The Calculation Agent, which will generally be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders*" below.

If the amount of principal and/or interest payable are determined in conjunction with a multiplier greater than one or by reference to some other leverage factor, the effect of changes in the level of the inflation index or the indices on principal or interest payable will be magnified. See also risk factor "*There are risks associated with leveraged exposures*" below.

The market price of such Securities may be volatile and may depend on the time remaining to the redemption date and the volatility of the level of the inflation index or indices. The level of the inflation index or indices may be affected by the economic, financial and political events in one or more jurisdictions. See also risk factor "*The Group is exposed to risks related to reforms of Index and Commodity Index "Benchmarks"*" below.

There are specific risks relating to EUA Contract Linked Securities

The occurrence of a Market Disruption Event relating to EUA Contract Linked Securities may have an adverse impact on Securityholders

If a Market Disruption Event (as defined in EUA Contract Linked Condition 2 (*Market Disruption*)) occurs or is continuing on a date for valuation in respect of EUA Contract Linked Securities, then the Issuer may take no action, require the Calculation Agent, in its sole and absolute discretion, to determine the adjustments (if any) to be made to the terms of the EUA Contract Linked Securities to reflect such event, or redeem the EUA Contract Linked Securities. Any such adjustment or early redemption of the Securities may have an adverse effect on the value and liquidity of such Securities and accordingly the amount Securityholders can expect to receive on their investment.

Additional risks associated with EUA Contract Linked Securities

RISK FACTORS

Trading in carbon emissions is a developing market and is highly speculative and volatile. The carbon emissions trading market has been and may again be subject to temporary distortions or other disruptions due to various factors, including the lack of liquidity in the market, the participation of speculators and government regulation and intervention. In addition, in respect of the emissions trading market in Europe, EU allowances have allegedly been stolen or "phished" from the national registries of several European countries and from the carbon trading accounts of market participants. This has caused severe market disruption in the European carbon trading market with delivery of EU allowances suspended for significant periods. Any such disruption in the future would have a detrimental impact on the value or settlement of EUA Contract Linked Securities referencing EUA Contracts

The Hedging Provider may hedge the Issuer's obligations under EUA Contract Linked Securities without regard to the interests of holders

In hedging the Issuer's obligations under the EUA Contract Linked Securities, the Hedge Provider is not restricted to any particular hedging practice. Accordingly, the Hedge Provider may hedge its exposure using any method it, in its sole discretion, deems appropriate, including, but not limited to, investing in the EU emissions allowance contract(s) or trading in, and holding, any EU Allowance(s). The Hedge Provider may perform any number of different hedging practices with respect to EUA Contract Linked Securities and is not required to have regard to the interests of holders of EUA Contract Linked Securities, notwithstanding that its actions may ultimately result in holders receiving a lower return on their investment.

Additional investment considerations in respect of EUA Contract Linked Securities

In respect of EUA Contract Linked Securities, Securityholders will receive an amount (if any) on redemption determined by reference to the value of the underlying EUA Contract and/or EUA Contract Linked Securities will pay interest calculated by reference to the value of the underlying EUA Contract.

A Market Disruption Event will occur if there is a disruption in respect of an EUA Contract as a result of (a) price source disruption, (b) ability to trade, (c) the disappearance of an EUA Contract Reference Price, (d) a limit price event, (e) a change in composition, methodology or taxation, (f) the ability to deliver or accept EU Allowances, the discontinuation of the scheme for transferring EU Allowances, a suspension by the relevant registries of operations relating to recording the issue, holding, transfer, acquisition, surrender, cancellation and/or replacement of EU Allowances, or (g) issues in relation to the establishment and functioning of the relevant registries or transaction logs maintained in respect of EU allowance transactions.

If a Market Disruption Event occurs:

- (a) the Issuer or, as the case may be, the Guarantor may take no action;
- (b) the Calculation Agent, acting on the instructions of the Issuer (or the Guarantor, as the case may be), may make any adjustment(s) to the terms of the EUA Contract Linked Securities as it considers appropriate; or
- (c) the Issuer or, as the case may be, the Guarantor may redeem the EUA Contract Linked Securities by payment of the Early Redemption Amount.

In addition, if the reference price of an EUA Contract is subsequently corrected, the corrected reference price will be used if corrected within 30 calendar days of the original publication, provided that, if the corrected level is published less than three EUA Contract Business Days prior to a due date for payment it will be disregarded.

If the applicable Issue Terms specifies that the EUA Contract Linked Securities are linked to the performance of a futures contract, the considerations described above will apply to such futures contract by reference to the underlying EUA Contract.

If the applicable Issue Terms specify that the EUA Contract Linked Securities are "Rolling Futures Contract Securities", the reference price of the EUA Contract will be valued by reference to futures contracts with delivery months that do not match the Redemption Date of the EUA Contract Linked Securities. The Calculation Agent will select a new futures contract on each Futures Rollover Date specified in the applicable Issue Terms. If it is impossible or materially impracticable to select a new futures contract and/or hedge the Issuer's obligations in respect of the EUA Contract Linked Securities, the consequences of a Market Disruption Event described above will apply.

Additional investment considerations in respect of EU Allowances

The market for carbon emission allowances or credits has emerged as a consequence of the Kyoto Protocol and covers both industrial and developing countries. Industrial countries are allocated emissions allowances under

RISK FACTORS

the Kyoto Protocol. The EU introduced its own emission trading scheme in 2005 pursuant to Directive 2003/87/EC, as amended from time to time, which extends beyond the 2012 termination of the Kyoto Protocol.

One EU Allowance corresponds to the emission by the Securityholder of one tonne of carbon dioxide (CO₂) equivalent during a specified period which is valid for meeting certain emissions related obligations. The EU's member states issue new EU Allowances annually to each company subject to the EU's emission trading scheme. These awards are made in accordance with an allocation plan approved by the European Commission which is based on the EU's application of the Kyoto Protocol's obligations to the industries covered by the EU's emission trading scheme. By April 30 in each year, companies are obliged to "surrender" a number of EU Allowances corresponding to their actual emissions in the preceding year. EU Allowances can also be rolled over from one year to the next if a company emits less carbon dioxide or carbon-equivalent greenhouse gas than the EU allowances it holds. EU Allowances have a limited or no value outside the EU's emissions trading scheme.

There are specific risks relating to Floating Rate Securities

A key difference between Floating Rate Securities and Fixed Rate Securities is that interest income on Floating Rate Securities cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of Floating Rate Securities at the time they purchase them, so that their return on investment cannot be compared with that of investments having longer fixed interest periods. If the "Terms and Conditions of the Securities" provide for frequent interest payment dates, investors are exposed to the reinvestment risk if market interest rates decline. That is, investors may reinvest the interest income paid to them only at the relevant lower interest rates then prevailing. In addition, the Issuer's ability to issue Fixed Rate Securities may affect the market value and secondary market (if any) of the Floating Rate Securities (and *vice versa*). See also risk factors "*There are risks associated with leveraged exposures*" and "*The Group is exposed to risks related to reforms of Index and Commodity Index "Benchmarks"*".

There are specific risks relating to Fixed Rate Securities

Investment in Fixed Rate Securities involves the risk that if market interest rates subsequently increase above the rate paid on the Fixed Rate Securities, this will adversely affect the value of the Fixed Rate Securities. See also risk factor "*There are risks associated with leveraged exposures*" below.

3.3 Risk Factors associated generally with Securities that are linked to Reference Item(s)

There are specific risks relating to Reference Item Linked Securities

Reference Item Linked Securities are securities which do not provide for predetermined redemption amounts and/or interest payments, but amounts payable (whether in respect of principal and/or interest) or deliverable will be dependent upon the performance of the Reference Item, or a combination of Reference Items, which themselves may contain substantial credit, interest rate, foreign exchange, correlation, time value, political and/or other risks.

An investment in Reference Item Linked Securities therefore entails significant risks that are not associated with similar investments in a conventional fixed or floating rate debt security. These risks include the possibility that the holder of a Reference Item Linked Security could lose all or a substantial portion of the principal of such Security (whether payable at maturity or upon redemption or repayment), and that the resulting interest rate (if any) will be less than that payable on a conventional debt security issued by the Issuer at the same time or no interest will be payable at all. The risk of the loss of some or all of the purchase price of a Reference Item Linked Security upon redemption means that, in order to recover and realise a return upon his or her investment, a purchaser of such Security must generally be correct about the direction, timing and magnitude of an anticipated change in the value of the relevant Reference Item.

It may not be possible to use the Securities as a perfect hedge against the market risk associated with investing in a Reference Item

Potential purchasers intending to purchase Securities to hedge against the market risk associated with investing in a Reference Item should recognise the complexities of utilising Securities in this manner. For example, the value of the Securities may not exactly match the value of the Reference Item. Due to fluctuating supply and demand for the Securities, there is no assurance that their value will match movements in the value of the Reference Item. For these reasons, among others, it may not be possible to purchase or liquidate Securities in a portfolio at the prices used to calculate the value of any Reference Item.

RISK FACTORS

There are specific risks with regard to Securities linked to a combination of Reference Items

An investment in Securities that are linked to a combination of Reference Items will entail significant risks not associated with an investment in a conventional debt security. A combination of the risks associated to the Reference Items may be significantly higher than the risks of each Reference Item considered on its own. On redemption of these type of Securities, the Securityholders will receive an amount (if any) or Entitlement (if any) determined by reference to the value of a combination of a number of different Reference Items. These Securities may pay interest calculated by reference to the value of the combination of a number of Reference Items.

A Securityholder does not have rights of ownership in the Reference Item(s)

Purchasers of Securities should be aware that neither the Issuer nor the Guarantor is under no obligation to hold a position in any Reference Item(s) and should note that the relevant Reference Item(s) that may be held by the Issuer or the Guarantor will not be held by them for the benefit of the purchasers of such Securities and, as such, Securityholders will not obtain any rights of ownership, including, without limitation, any voting rights, any rights to receive dividends or other distributions or any other rights with respect to any Reference Item referenced by such Securities. As a result, Securityholders will not be able to exercise rights they would have as owner or have any recourse to any issuer of a Reference Item.

With respect to Equity Linked Securities, unless otherwise specified in the Issue Terms, the Interest Amount and/or Final Redemption Amount will not reflect the payment of any dividends on the underlying equity securities. Accordingly, the return on the Equity Linked Securities will not reflect the return an investor would realise if it actually owned the underlying equity securities and received dividends, if any, paid on those securities. Therefore, the yield to maturity based on the methodology for calculating the Final Redemption Amount will not be the same yield as would be produced if the underlying equity securities were purchased directly and held for a similar period.

With respect to the Index Linked Securities, if the components of the indices are shares, Securityholders will not receive any dividends paid on those shares and will not participate in the return on those dividends unless the relevant index takes such dividends into account for purposes of calculating the relevant level. Accordingly, purchasers in Index Linked Securities may receive a lower payment upon redemption of such Securities than such purchaser would have received if the Securityholder had invested in the components of the index directly.

With respect to Fund / ETF Linked Securities, unless otherwise specified in the Issue Terms, the Interest Amount and/or Final Redemption Amount will not reflect the payment of any dividends on the underlying fund shares or exchange traded fund shares, as the case may be. Accordingly, the return on the Fund / ETF Linked Securities will not reflect the return an investor would realise if it actually owned the underlying fund shares or exchange traded fund shares, as the case may be, and received dividends, if any, paid on those underlying fund shares or exchange traded fund shares, as the case may be. Therefore, the yield to maturity based on the methodology for calculating the Final Redemption Amount will not be the same yield as would be produced if the underlying fund shares or exchange traded fund shares, as the case may be, were purchased directly and held for a similar period.

As a result, potential investors in Index Linked Securities, Equity Linked Securities or Fund / ETF Linked Securities may receive less return than expected. See also risk factors "*There are specific risks relating to Equity Linked Securities*", "*There are specific risks relating to Index Linked Securities*" and "*There are specific risks relating to Fund Linked Securities and ETF Linked Securities*" above.

The Issuer, the Guarantor and their respective affiliates may take positions in or deal with Reference Item(s)

The Issuer and/or the Guarantor are subject to various potential conflicts of interest in respect of the Securities, which could have an adverse effect on the Securities.

The Issuer, the Guarantor and their respective affiliates may:

- (i) in the ordinary course of business, effect transactions for their own account or for the account of their customers and hold long or short positions in the Reference Item(s) or related derivatives;
- (ii) in connection with an offering of Securities, enter into one or more hedging transactions with respect to the Reference Item(s) or related derivatives; and/or
- (iii) in connection with such hedging or market-making activities or with respect to proprietary or other trading activities, enter into transactions in the Reference Item(s) or related derivatives which may

RISK FACTORS

adversely (or positively) affect the price, liquidity or value of the relevant Securities and which could therefore be adverse to the interests of the relevant Securityholders.

The Issuer and/or the Guarantor may have confidential information relating to the Reference Item and the Securities

The Issuer and/or the Guarantor or its affiliates may from time to time, by virtue of their status as underwriter, advisor or otherwise, possess or have access to information relating to the Securities, the Reference Item and any derivatives referencing them. Such affiliates will not be obliged to disclose any such information to a purchaser of the Securities provided that when such information constitutes inside information for the purposes of the Market Abuse Regulation 596/2014 ("MAR"), then the provisions of MAR and of any other conduct rules will be of application in relation to the same.

The Guarantor's securities may be or form part of a Reference Item

The Guarantor's shares or other instruments issued by the Guarantor may be/form part of a Reference Item in Index Linked Securities, Equity Linked Securities or other type of Securities. The Guarantor will have material information in relation to such Securities which the Guarantor will not be obliged to disclose to a purchaser of Securities.

3.4 Risk Factors relating to the structure of a particular issue of Securities

There are particular risks associated with an investment in certain types of Securities and an investor may lose some or all of the principal amount invested by it.

Investors may lose the original invested amount

Investors may lose all or some of their investment in the Securities, as the case may be, as a result of the occurrence of any one or more of the following events:

- (i) pursuant to Condition 3 of the Terms and Conditions, the Issuer and the Guarantor of the Securities are subject to insolvency proceedings or some other event impairing the ability of each to perform some or all of its payment obligations under the Securities;
- (ii) pursuant to Condition 6 of the Terms and Conditions, the terms of the relevant Securities do not provide for full repayment of the initial purchase price upon final maturity and/or mandatory early redemption of such Securities and the relevant Reference Item(s) perform in such a manner that the final redemption amount and/or mandatory early redemption amount is less than the initial purchase price;
- (iii) the purchaser seeks to sell the relevant Securities prior to their scheduled maturity, and the sale price of the Securities in the secondary market is less than the purchaser's initial investment; and
- (iv) the Securities are subject to certain adjustments in accordance with the terms and conditions of such Securities that may result in the scheduled amount to be paid or asset(s) to be delivered upon redemption being reduced to or being valued at an amount less than a purchaser's initial investment.

Notwithstanding that the relevant Securities may be linked to the performance of one or more Reference Items, investors in such Securities do not have and shall not receive any rights in respect of any Reference Item and shall have no right to call for any Reference Item to be delivered to them (unless otherwise provided in the Issue Terms). In addition, neither the relevant Issuer nor the Guarantor of the Securities shall be required to hold any Reference Item. As a result, Securityholders will not be able to exercise rights they would have as owner or have any recourse to any issuer of a Reference Item.

There are risks associated with leveraged exposures

Leverage involves the use of a number of financial techniques to increase the exposure to a Reference Item, and can therefore magnify both returns and losses. While the use of leverage allows for potential multiples of a return (assuming a return is achieved) when the Reference Item moves in the anticipated direction, it will conversely magnify losses when the Reference Item moves against expectations. If the relevant Securities (including Floating Rate Securities or Fixed Rate Securities) include leverage, potential holders of such Securities should note that these Securities will involve a higher level of risk, and that whenever there are losses such losses will be higher (other things being equal) than those of a similar Security which is not leveraged.

RISK FACTORS

The relevant market value of the Securities at any time is dependent on other matters in addition to the credit risk of the Issuer and Guarantor and the performance of the relevant Reference Item(s)

The market value of the Securities at any time will be affected by a number of factors independent of the creditworthiness of the Issuer and the Guarantor (if any) and the performance of the relevant Reference Item(s), including:

- (i) changes in market parameters such price level of the underlying(s), interest rates, volatility and credit spreads;
- (ii) the time remaining to any redemption date or the Maturity Date;
- (iii) where the Reference Item(s) is/are equity securities, the dividend rate on reference item(s) and the financial results and prospects of the issuer of each Reference Item.

The amount payable and/or deliverable in respect of Securities at any time prior to redemption is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price and such amount will reflect, among other things, a "time value" for the Securities. The "time value" of the Securities will depend partly upon the length of the period remaining to final redemption and expectations concerning the value of the relevant Reference Item(s). Certain market circumstances may adversely affect the liquidity of the Securities and holders may not be able to sell their Securities easily or may have to sell them at a price that significantly affect the amount they earn.

If an investor holds Securities which are not denominated in the investor's home currency, that investor will be exposed to movements in exchange rates adversely affecting the value of its holding. In addition, the imposition of exchange controls in relation to any Securities could result in an investor not receiving payments on those Securities

The Issuer will pay principal and interest on the Securities and the Guarantor will make any payments under the Guarantee in the Specified Currency. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Specified Currency would decrease (1) the Investor's Currency equivalent yield on the Securities, (2) the Investor's Currency equivalent value of the principal payable on the Securities and (3) the Investor's Currency equivalent market value of the Securities.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate or the ability of the Issuer or Guarantor to make payments in respect of the Securities. As a result, investors may receive less interest or principal than expected, or no interest or principal.

There are certain considerations associated with Securities linked to Emerging Markets

The Issuer may issue Securities where the amount payable on redemption or the interest payable is linked to Reference Items which consist of (i) securities, funds, ETFs or indices comprising securities of issuers that are located in, or subject to regulation in, emerging or developing countries, or (ii) securities which are denominated in the currency of, or are traded in, emerging or developing countries or (iii) currencies of emerging or developing countries. Prospective investors should note that additional risks may be associated with investment in such Securities, including risks associated with political and economic uncertainty, adverse governmental policies, restrictions on foreign investment and currency convertibility, currency exchange rate fluctuations, possible lower levels of disclosure and regulation, and uncertainties as to the status, interpretation and application of laws including, but not limited to, those relating to expropriation, nationalisation and confiscation. Securities traded in emerging or developing countries tend to be less liquid and the prices of such securities more volatile. In addition, settlement of trades in some such markets may be slower and more subject to failure than in markets in developed countries.

The probability of the occurrence of a disruption event and consequently loss of investment or profit by an investor may be higher for certain developing or emerging markets.

RISK FACTORS

Where the Securities are denominated in an emerging market currency or linked to one or more emerging market currencies, such emerging market currencies can be significantly more volatile than currencies of more developed markets.

Where the Securities are denominated in an emerging market currency or linked to one or more emerging market currencies, amounts determined to be due or deliverable in respect of such Securities may be significantly more volatile and subject to less certainty as to future rates than if the Securities were linked to currencies of more developed markets, for example emerging markets' currencies are highly exposed to the risk of a currency crisis happening in the future.

In particular, policies or actions of any relevant governments of the jurisdictions of such emerging markets currencies to which the Securities may be linked (the "**Currency Jurisdictions**") could adversely affect the relevant exchange rate(s) (such as through market interventions of their central banks or equivalent bodies; governmental action which changes or interferes with currency valuations or currency fluctuations that would otherwise occur in response to economic forces; and restrictions on foreign investment and currency convertibility or movement across borders). Non-governmental action may also directly or indirectly adversely affect the relevant exchange rates (such as through weak overall growth and performance of each applicable Currency Jurisdiction's economy and stock exchanges; political, economic and social uncertainty, including risks of nationalisation and expropriation of assets and natural disasters; or wars which affect any Currency Jurisdiction directly or indirectly).

Investors should note that the risk of occurrence and the severity of consequence of the matters described above may be greater with respect to any emerging market jurisdiction than they otherwise would be in relation to more developed countries. Economies in emerging markets are generally more heavily dependent upon international trade, and accordingly, may be affected adversely by trade barriers, foreign exchange controls (including taxes), managed adjustments in relative currency values and other protectionist measures imposed or negotiated with countries with which they trade.

The occurrence of any of the above circumstances may have an adverse effect on the value of the Securities and amounts due (if any) or assets deliverable (if any), or the date for payment thereunder.

Additionally, investors should note that if a disruption event occurs which prohibits or prevents the Issuer from making a payment in respect of the Securities, such payment will be postponed to a date falling 14 calendar days after the date on which such disruption event is no longer occurring and no interest shall accrue or Event of Default occur as a result of such postponement. In the event that the disruption event is continuing on the date which is one year after the last scheduled payment date in respect of the Securities, the Issuer shall make payment of the relevant amount in U.S. dollars or euros.

Securities may be denominated in one currency and settled in another currency

If the Issue Terms specify that the Settlement Exchange Rate Provisions are applicable, then such Securities are denominated in one currency (the "**SER Subject Currency**") but all or certain amounts due thereunder, as the case may be, are (or may be, if certain conditions such as a relevant exchange rate is at above or below a certain level(s)) are settled in another currency (the "**Settlement Currency**"). As such, the applicable amounts are converted by converting such amounts by reference to the applicable Settlement Exchange Rate specified in the applicable Issue Terms or, if not so specified, determined by the Calculation Agent in accordance with the terms and conditions of the Securities.

If the Issue Terms specify that the SER Intermediate Currency Requirements are applicable, then such Securities are denominated in one currency but all or certain amounts due thereunder, as the case may be, if any, are converted into an intermediate currency (the "**SER Intermediate Currency**") and then settled in the Settlement Currency. As such, the applicable amounts are converted by converting such amounts by reference to the applicable Second Settlement Exchange Rate and then the second Settlement Exchange Rate, each as specified in the applicable Issue Terms or, if not so specified, determined by the Calculation Agent in accordance with the terms and conditions of the Securities.

Securities are not principal protected in the SER Intermediate Currency or Settlement Currency even if the Securities are principal protected in the SER Subject Currency. If the denomination currency depreciates against the Settlement Currency or the SER Intermediate Currency, this will reduce the Settlement Currency amounts received (if any) under the Securities and an investor may receive less than their initial investment in the Securities.

Where a fixed Settlement Exchange Rate or Second Settlement Exchange Rate is not specified in the Issue Terms, neither the Issuer nor the Guarantor have control over the Settlement Exchange Rate or the Second

RISK FACTORS

Settlement Exchange Rate and will not make any adjustment or change in the terms of the Securities in the event that exchange rates should become fixed, or in the event of any devaluation or revaluation or imposition of exchange or other regulatory controls or taxes, or in the event of other developments affecting the settlement currency, the denomination currency or any foreign currency. Investors will bear those risks. In addition, if an Unscheduled Holiday or a Price Source Disruption occurs in respect of the applicable Settlement Exchange Rate, the applicable disruption fallbacks may provide that the scheduled settlement exchange rate valuation date for such rate will be postponed, then this may result in deferral of the corresponding payment date under the Securities. If a date for payment is so postponed, this could adversely affect an investor's investment schedule, timetable or plans as they will receive amounts in respect of the Securities later than the originally scheduled date for payment. No interest will accrue or other amount will be payable by the Issuer in the event of any such delay.

In addition, investments in UVR Inflation-Adjusted Securities may be adversely impacted due to the fact that the payments in respect of the UVR Inflation-Adjusted Securities are adjusted by reference to the UVR rate in effect on the applicable payment date and so investors are exposed to fluctuations in that rate. Where there is a UVR Event (as defined in Annex 1 – Additional Terms and Conditions for Payouts), the Calculation Agent may determine that the UVR Inflation-Adjusted Securities are redeemed early at the Early Redemption Amount and interest will cease to accrue and no further interest will be payable from the Interest Payment Date (or, if none, the Issue Date) immediately preceding such UVR Event.

If a Reference Item Linked Security includes Market Disruption Events or Failure to Open of an Exchange and the Calculation Agent determines such an event has occurred, any consequential postponement of the Scheduled Valuation Date may have an adverse effect on the Securities

If an issue of Reference Item Linked Securities includes provisions dealing with the occurrence of a Market Disruption Event or failure to open of an exchange on a Scheduled Valuation Date, and the Calculation Agent determines that a Market Disruption Event or failure to open of an exchange has occurred or exists on such date, any consequential postponement of the Valuation Date or any alternative provisions for valuation provided in any such Securities may have an adverse effect on the value and liquidity of such Securities. The timing of such dates (as scheduled or as so postponed or adjusted) may affect the value of the relevant Securities such that the Securityholder may receive a lower redemption amount and/or interest amount or other payment under the relevant Securities than otherwise would have been the case. The occurrence of such a Market Disruption Event or failure to open of an exchange in relation to any Reference Item comprising a basket may also have such an adverse effect on Securities related to such basket. In addition, any such consequential postponement may result in the postponement of the date of redemption of the Securities.

Where Securities are issued on a partly paid basis, an investor who fails to pay any subsequent instalment of the issue price could lose all of its investment

The relevant Issuer may issue Securities where the issue price is payable in more than one instalment. Any failure by an investor to pay any subsequent instalment of the issue price in respect of its Securities will result in the Securities redeeming early and could result in such investor losing all of its investment.

Securities which are issued at a substantial discount or premium may experience price volatility in response to changes in market interest rates

The market values of Securities issued at a substantial discount (such as Zero Coupon Securities) or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

There are risks associated with Physically Settled Securities

In the case of Securities which are redeemable by delivery of assets (other than Credit Linked Securities), if a Settlement Disruption Event occurs or exists on the due date for redemption of the Securities, settlement will be postponed until the next Settlement Business Day in respect of which there is no Settlement Disruption Event. The Issuer in these circumstances also has the right to pay the Disruption Cash Redemption Amount in lieu of delivering the Entitlement (as defined in the Terms and Conditions).

If a Failure to Deliver due to Illiquidity occurs, the Issuer has the right, in lieu of delivery of the assets affected by such event, to pay the Failure to Deliver Redemption Amount to the Securityholders. The Disruption Cash Redemption Amount and/or the Failure to Deliver Redemption Amount may be less than the fair market value of the Entitlement.

RISK FACTORS

Securityholders may be required to pay certain expenses in relation to Physically Settled Securities

Holders of Securities subject to Physical Delivery must pay all Expenses relating to delivery of such Securities. As defined in the Terms and Conditions of the Securities, "Expenses" includes all costs, taxes, duties and/or expenses including stamp duty, stamp duty reserve tax, transfer tax and/or other costs, duties or taxes arising from the delivery of the Entitlement.

There are certain requirements to be fulfilled and payments to be made by the Holder in order to receive Entitlement(s) in connection with Physically Settled Securities and the Issuer may decide to settle by way of cash payment instead in certain circumstances

In order to receive the Entitlement in respect of a Security settled by way of Physical Delivery, the holder of such Security must deliver or send to the relevant Clearing System or Principal Paying Agent (as applicable) a duly completed Asset Transfer Notice on or prior to the relevant time on the Cut-off Date and pay the relevant Expenses. If a Securityholder fails to deliver as required the certification of non-U.S. beneficial ownership or certification that it is an eligible investor for U.S. securities law purposes, the Issuer may deliver what the Calculation Agent determines to be the fair market value of the Entitlement instead of the relevant assets.

There are risks associated with Securities to which Variation of Settlement applies

If Variation of Settlement applies, the Issuer has the right to elect to deliver Relevant Assets in lieu of the Final Redemption Amount. Securityholders should be aware that in this regard they are exposed to the credit risk and performance of the Relevant Assets as to the extent that the value of such Relevant Assets falls below the value of the Final Redemption Amount, the Issuer is financially incentivised to exercise its option to deliver the Relevant Assets to the Securityholders. If the Relevant Assets are bonds, Securityholders should also take note of the fact that if such bond redeems prior to the Maturity Date for any reason, and the Issuer elects to vary settlement, the Issuer may deliver the redemption proceeds of such bond, which might be substantially less than the nominal amount of the bond.

There are risks associated with Securities where denominations involve integral multiples

In relation to any issue of Securities which have denominations consisting of a minimum Specified Denomination (as set out in the relevant Issue Terms) plus one or more higher integral multiples of another smaller amount, it is possible that such Securities may be traded in amounts that are not integral multiples of such minimum Specified Denomination. In such a case a Securityholder who, as a result of trading such amounts, holds an amount which is less than the minimum Specified Denomination in his account with the relevant clearing system at the relevant time (i) may not be able to transfer such Securities and (ii) may not receive a definitive Security in respect of such holding (should definitive Securities be printed) and in each case would need to purchase a nominal amount of Securities such that its holding amounts to an integral multiple of the minimum Specified Denomination.

If definitive Securities are issued, Securityholders should be aware that definitive Securities which have a denomination that is not an integral multiple of the minimum Specified Denomination may be illiquid and difficult to trade.

CREST Depository Interests

Investors who hold interests in the Securities through Euroclear UK & Ireland Limited ("**CREST**") through dematerialised depository interests ("**CREST Depository Interests**") will not be the legal owners of the Securities (the "**Underlying Securities**") to which such CREST Depository Interests relate. CREST Depository Interests are separate legal instruments from the Underlying Securities and represent indirect interests in the interests of the CREST Nominee in such Underlying Securities. The "**CREST Manual**" consists of a number of documents which set out the legal relationship of CREST with its users and participants.

The Underlying Securities (as distinct from the CREST Depository Interests representing indirect interests in such Underlying Securities) will be held in an account with a custodian. The custodian will hold the Underlying Securities through the relevant Clearance System. The legal title to the Underlying Securities or to interests in the Underlying Securities will depend on the rules of the relevant Clearance System in or through which the Underlying Securities are held.

CREST International Nominees Limited or another entity appointed to act as nominee (the "**CREST Nominee**") in accordance with the CREST Global Deed Poll (in the form from time to time contained in Chapter 8 of the CREST International Manual (which forms part of the CREST Manual) (the "**CREST Deed Poll**")) will hold the legal title to the Underlying Securities and the direct enforcement right in respect of the Underlying

RISK FACTORS

Securities. Rights in respect of the Underlying Securities cannot be enforced by holders of CREST Depository Interests except indirectly through CREST Depository Limited or any successor thereto (the "**CREST Depository**") and the CREST Nominee who in turn can enforce rights indirectly through the intermediary depositaries and custodians described above. The enforcement of rights in respect of the Underlying Securities will therefore be subject to the local law of the relevant intermediary.

These arrangements could result in an elimination or reduction in the payments that otherwise would have been made in respect of the Underlying Securities in the event of any insolvency or liquidation of the relevant intermediary, in particular where the Underlying Securities held in clearing systems are not held in special purpose accounts and are fungible with other securities held in the same accounts on behalf of other customers of the relevant intermediaries.

Holders of CREST Depository Interests will be bound by all provisions of the CREST Deed Poll and by all provisions of or prescribed pursuant to the CREST International Manual and the CREST Rules applicable to the CREST International Settlement Links Service (in each case as contained in the CREST Manual). Investors in CREST Depository Interests should note that the provisions of the CREST Deed Poll and the CREST Manual (including, for the avoidance of doubt, the provisions of the CREST International Manual and the CREST Rules) contain indemnities, warranties, representations and undertakings to be given by holders of CREST Depository Interests and limitations on the liability of the CREST Depository as issuer of the CREST Depository Interests. Holders of CREST Depository Interests may incur liabilities pursuant to or resulting from a breach of any such indemnities, warranties, representations and undertakings in excess of the money invested by them and the rights of and returns received by holders of CREST Depository Interests may differ from those of holders of Securities which are not represented by CREST Depository Interests.

Investors in CREST Depository Interests should note that holders of CREST Depository Interests may be required to pay fees, charges, costs and expenses to the CREST Depository in connection with the use of the CREST International Settlement Links Service.

3.5 Risk Factors regarding the Securities generally

Credit ratings assigned to the Issuer, the Guarantor or any Securities may not reflect all the risks associated with an investment in those Securities

One or more independent credit rating agencies may assign credit ratings to the Securities. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Securities. A credit rating is not a recommendation to buy, sell or hold securities and may be revised, suspended or withdrawn by the rating agency at any time. Should the credit ratings of the Issuer, the Guarantor or any Securities be revised, suspended or withdrawn this could result in increased interest and other expenses on the Issuer's and the Guarantor's future borrowings and, therefore, have a material adverse effect on the Guarantor's business, results of operations, and financial condition.

In general, European (including United Kingdom) regulated investors are restricted under Regulation (EC) No. 1060/2009 (as amended) (the "**CRA Regulation**") from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the EU or the United Kingdom and registered under the CRA Regulation, (and such registration has not been withdrawn or suspended), subject to transitional provisions that apply in certain circumstances whilst the registration application is pending. Such general restriction will also apply in the case of credit ratings issued by non-EU and non-UK credit rating agencies, unless the relevant credit ratings are endorsed by an EU-registered or UK registered credit rating agency or the relevant non-EU or non-UK rating agency is certified in accordance with the CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended). If the status of the rating agency rating the Securities changes, European (including United Kingdom) investors may no longer be able to use the rating for regulatory purposes and the Securities may have a different regulatory treatment. This may result in European (including United Kingdom) regulated investors selling the Securities which may impact the value of the Securities and any secondary market. The list of registered and certified rating agencies published by ESMA on its website in accordance with the CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list. Certain information with respect to the credit rating agencies and ratings is set out on the cover of this Base Prospectus.

Claims of Holders under the Securities are effectively junior to those of certain other creditors

Pursuant to BRRD and Law 11/2015 (as defined below, and as amended), the Issuer and/or the Securities should not be subject to the general Spanish Bail-in Power or analogous bail-in tool.

RISK FACTORS

Notwithstanding the foregoing, the guarantee in respect of the Securities (the "**Guarantee**") and agreements entered into between the Guarantor and the Issuer upon which the Issuer depends to pay interest and repay the principal of the Securities to the Securityholders (the "**Hedging Agreements**") are liabilities of BBVA, that are potentially subject to the Spanish Bail-in Power.

Furthermore, the Securities and the Guarantee are unsecured and non-subordinated liabilities that, subject to statutory preferences, will rank equally with any of the Issuer's and the Guarantor's other unsecured and unsubordinated indebtedness. However, the Security and the Guarantee will be effectively subordinated to all of, respectively, the Issuer's and the Guarantor's secured indebtedness, to the extent of the value of the assets securing such indebtedness, and other preferential obligations under Spanish law.

"**BRRD**" means Directive 2014/59/EU of the European Parliament and of the Council of May 15 establishing a framework for the recovery and resolution of credit institutions and investment firms or such other directive as may come into effect in place thereof, as implemented into Spanish law by Law 11/2015 and Spanish Royal Decree 1012/2015 of November 6, by virtue of which Law 11/2015 is developed and Royal Decree 2606/1996 of December 20 on credit entities' deposit guarantee fund is amended (*Real Decreto 1012/2015, de 6 de noviembre, por el que se desarrolla la Ley 11/2015, de 18 de junio, de recuperación y resolución de entidades de crédito y empresas de servicios de inversión, y por el que se modifica el Real Decreto 2606/1996, de 20 de diciembre, sobre fondos de garantía de depósitos de entidades de crédito*), as amended, replaced or supplemented from time to time ("**RD 1012/2015**"), as amended, replaced or supplemented from time to time (including as amended by Directive 2019/879 of the European Parliament and of the Council of May 20, as transposed into Spanish Law by Royal Decree-Law 7/2021 of April 27) and including any other relevant implementing or developing regulatory provisions.

"**Spanish Bail-in Power**" means any write-down, conversion, transfer, modification, cancellation or suspension power existing from time to time under: (i) any law, regulation, rule or requirement applicable from time to time in Spain, relating to the transposition or development of BRRD, including, but not limited to (a) Law 11/2015, (b) RD 1012/2015 and (c) the SRM Regulation; or (ii) any other law, regulation, rule or requirement applicable from time to time in Spain pursuant to which (a) obligations or liabilities of banks, investment firms or other financial institutions can be reduced, cancelled, modified, transferred or converted into shares, other securities, or other obligations of such persons or any other person (or suspended for a temporary period or permanently) or (b) any right in a contract governing such obligations may be deemed to have been exercised.

A Security's purchase price may not reflect its inherent value

Prospective investors in the Securities should be aware that the purchase price of a Security does not necessarily reflect its inherent value. Any difference between a Security's purchase price and its inherent value may be due to a number of different factors including, without limitation, prevailing market conditions and fees, discounts or commissions paid or accorded to the various parties involved in structuring and/or distributing the Security. Any such difference in value could negatively affect the return an investor may receive. For further information prospective investors should refer to the party from whom they are purchasing the Securities. Prospective investors may also wish to seek an independent valuation of Securities prior to their purchase

An active secondary market in respect of the Securities may never be established or may be illiquid and this would adversely affect the value at which an investor could sell his Securities

Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold their Securities until maturity. If a market does develop, it may not be very liquid. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This is particularly the case for Securities that are especially sensitive to interest rate, currency or market risks, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. These types of Securities generally would have a more limited secondary market and more price volatility than conventional debt securities. Illiquidity may have a severely adverse effect on the market value of Securities.

Securities may be redeemed prior to their scheduled maturity

In the event that the Issuer would be required to pay additional amounts in respect of any Securities due to any withholding as provided in General Condition 7 of the "*Terms and Conditions of the Securities*" or the performance of the Issuer's obligations under the Securities or any arrangements made to hedge its obligations under the Securities has or will become unlawful, illegal or otherwise prohibited in whole or in part or if an Administrator/Benchmark Event (as defined in General Condition 6(1) occurs), the Issuer may or be required to redeem all of the Securities then outstanding in accordance with the Terms and Conditions of the Securities.

RISK FACTORS

In the event that one or more Events of Default (as defined in General Condition 9 of the "*Terms and Conditions of the Securities*") occurs, the Securities may become immediately due and repayable at their Early Redemption Amount. In addition, if "*Automatic Early Redemption Event*" is specified as being applicable in the Issue Terms, on the occurrence of an Automatic Early Redemption Event the Securities will be automatically redeemed at their Automatic Early Redemption Amount. If an Additional Disruption Event or an Extraordinary Event occurs, the Issuer may redeem the Securities early.

The Issue Terms for a particular issue of Securities may provide for early redemption at the option of the Issuer. Such right of termination is often provided for Securities in periods of high interest rates. If the market interest rates decrease, the risk to Securityholders that the Issuer will exercise its right of termination increases. As a consequence, the yields received upon redemption may be lower than expected, and the redeemed face amount of the Securities may be lower than the purchase price for the Securities paid by the Securityholder. As a consequence, the Securityholder may not receive the total amount of the capital invested. In addition, investors that choose to reinvest monies they receive through an early redemption may be able to do so only in securities with a lower yield than the redeemed Securities.

The Calculation Agent, which will generally be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders

As the Calculation Agent will generally be the Guarantor or an affiliate of the Guarantor, potential conflicts of interest may exist between the Calculation Agent and the Securityholders, including with respect to the exercise of the very broad discretionary powers of the Calculation Agent. For example, the Calculation Agent has the authority (i) to determine whether certain specified events and/or matters so specified in the conditions relating to a Tranche of Securities have occurred and (ii) to determine any resulting adjustments and calculations or substitutions as described in such conditions. Potential purchasers should be aware that any determination made by the Calculation Agent may have an impact on the value and financial return of the Securities or result in the occurrence of an early repayment at an amount less than an investor's initial investment. Any such discretion exercised by, or any calculation made by, the Calculation Agent (in the absence of manifest or proven error) shall be binding on the relevant Issuer and all Securityholders.

The Securities may be subject to withholding taxes in circumstances where the Issuer is not obliged to make gross up payments and this would result in holders receiving less interest than expected and could significantly adversely affect their return on the Securities.

Spanish Tax Rules may impose withholding tax in certain circumstances (subject to certain exceptions) and neither the Issuer nor the Guarantor is obliged to pay additional amounts in such event.

Securities originally registered with the entities that manage clearing systems located outside of Spain

According to the literal wording of Article 44.5 of RD 1065/2007, income derived from securities originally registered with the entities that manage clearing systems located outside Spain, and are recognised by Spanish law or by the law of another OECD country (such as the Depository Trust Company ("**DTC**"), Euroclear or Clearstream), will be paid free of Spanish withholding tax provided that the Paying Agent appointed by the Issuer submits a statement to the Issuer, the form of which is included in the Agency Agreement, with the following information:

- (i) identification of the securities; and
- (ii) total amount of the income corresponding to each clearing system located outside Spain.

These obligations refer to the total amount paid to investors through each foreign clearing house. For these purposes, "income means interest and the difference, if any, between the aggregate amount payable on the redemption of the Securities and the issue price of the Securities".

In accordance with Article 44 of RD 1065/2007 as amended by RD 1145/2011, the relevant Paying Agent should provide the relevant Issuer with the statement on the business day immediately prior to each interest payment date. The statement must reflect the situation at the close of business of that same day. In the event that on such date, the entity(ies) obliged to provide the declaration fail to do so, the Issuer or the Paying Agent on its behalf will make a withholding at the general rate (currently 19 per cent.) on the total amount of the return on the relevant Securities otherwise payable to such entity.

As describe in "*Tax reporting related to Article 100.3 of the Spanish Personal Income Tax Law*" in "*Spanish Taxation*", the redemption of Implicit Yield Securities held by a Spanish Individual (should such Securities be subject to Spanish withholding tax), are subject to the duly accreditation of the acquisition and acquisition price

RISK FACTORS

in order for the securities to be redeemed, otherwise a deposit for said amount will be made at the disposal of the judicial authority in lieu of payment to the holder

Notwithstanding the foregoing, the Issuer has agreed that in the event withholding tax should be required by law, the Issuer shall pay such additional amounts as would have been received had no such withholding or deduction been required, except as provided in Condition 7 and as otherwise described in this Base Prospectus.

Potential U.S. Withholding Tax under FATCA and on U.S. Dividend Equivalent Amounts

As discussed in "*Taxation—United States Federal Taxation*" below, sections 1471 through 1474 of the U.S. Internal Revenue Code (the "**Code**") and any regulations thereunder or official guidance in connection therewith, an agreement entered into with the U.S. Internal Revenue Service (the "**IRS**") pursuant to such sections of the Code, or an intergovernmental agreement (an "**IGA**") between the United States and another jurisdiction in furtherance of such sections of the Code, or any non-U.S. laws or rules implementing an IGA (collectively referred to as "**FATCA**") may impose a withholding tax of 30 per cent. on payments made on the Securities (including payments made by financial intermediaries), unless various U.S. information reporting and due diligence requirements have been satisfied.

Furthermore, Section 871(m) of the Code and the regulations thereunder require withholding (up to 30 per cent. depending on whether an income tax treaty applies) on payments or deemed payments made to non-U.S. persons on certain financial instruments to the extent that such payments are treated, for U.S. federal income tax purposes, as being U.S.-source dividend equivalent amounts.

If withholding is so required, under either FATCA or Section 871(m), the relevant Issuer will not be required to pay any additional amounts with respect to the amounts so withheld. Either of the foregoing rules may affect the amounts paid to an investor on the Securities.

The U.S. federal income tax consequences of an investment in the Securities are complex and may be uncertain

The U.S. federal income tax consequences of an investment in the Securities are complex. Additionally, for certain Securities, there are no direct legal authorities as to the proper treatment of the Securities for U.S. federal income tax purposes, and, therefore, significant aspects of the U.S. federal income tax treatment of such Securities are uncertain. Please read the discussion under "*Taxation—United States Federal Taxation*."

Potential investors should consult their tax advisers on the U.S. federal income tax consequences of an investment in the Securities.

Potential conflicts of interest relating to distributors or other entities involved in the offer or listing of the Securities

Investors should be aware that potential conflicts of interest may arise in connection with the Securities, as any distributors or other entities involved in the offer and/or the listing of the Securities as indicated in the Issue Terms, may act pursuant to a mandate granted by the Issuer and/or the Guarantor and for the Dealer and can receive commissions and/or fees on the basis of the services performed in relation to such offer and/or listing.

If the Issuer has the right to redeem any Securities at its option, this may limit the market value of the Securities concerned and an investor may not be able to reinvest the redemption proceeds in a manner which achieves a similar effective return

An optional redemption feature is likely to limit the market value of the Securities. During any period when the Issuer may elect to redeem Securities, the market value of those Securities generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

The Issuer may be expected to redeem Securities when its cost of borrowing is lower than the interest rate on the Securities. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Securities being redeemed and may only be able to do so at a significantly lower rate. Potential investors may be exposed to reinvestment risk in light of other investments available at that time.

The Issuer of the Securities may be substituted without the consent of the Securityholders

The conditions of the Securities provide that the Issuer of the Securities may be replaced as obligor under such Securities with the Guarantor or any company from BBVA's group. Whilst the new issuer will provide an indemnity in favour of the Securityholders in relation to any additional tax or duties that become payable solely as a result of such substitution, Securityholders will not have the right to object to such substitution. See General

RISK FACTORS

Condition 16 of the *"Terms and Conditions of the Securities"*. Any such substitution may have an adverse effect on the value of the Securities.

The Guarantor of the Securities may be substituted without the consent of the Securityholders

The conditions of the Securities provide that the Guarantor of the Securities may be replaced as guarantor under such Securities with another company incorporated anywhere in the world. Whilst the new guarantor will provide an indemnity in favour of the Securityholders in relation to any additional tax or duties that become payable solely as a result of such substitution. Securityholders will not have the right to object to such substitution. See General Condition 16 of the *"Terms and Conditions of the Securities"*. Any such substitution may have an adverse effect on the value of the Securities.

The value of the Securities could be adversely affected by a change in English law or administrative practice

The General Conditions (except for General Condition 18 of the *"Terms and Conditions of the Securities"*) of the Securities are based on English law in effect as at the date of this Base Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to Spanish and English law or administrative practice after the date of this Base Prospectus and any such change could materially adversely impact the value of any Securities affected by it.

The Group is exposed to risks related to reforms of Index and Commodity Index "Benchmarks"

The global reform of the reference interest rates is a key aspect of monitoring for the Guarantor. Interbank offered rates ("**IBORs**") are key reference interest rates underpinning many contracts within the financial sector worldwide. Following the FSB's 2014 recommendations, authorities in several countries are promoting initiatives for the financial system to reduce its dependence on IBORs and transition to risk-free alternative interest rates ("**RFR**") by late 2021. These RFRs are designed to overcome the difficulties of IBOR rates; especially, to minimise dependence on expert judgment and guarantee greater transparency and understanding in its elaboration process. In certain cases, such transition will result in the substitution of the rate historically used as a reference by the new RFR (for example in Europe, the substitution of Euro overnight index average ("**EONIA**") by the euro short term rate, or in the United States, the substitution of USD LIBOR by SOFR) or the modification of the existing index methodology (for example, in the case of overnight interest rates, the Sterling Overnight Index Average ("**SONIA**") for the GBP market, or in the case of forward interest rates, the Euro-zone inter-bank offered rate ("**EURIBOR**").

BBVA Group has a significant number of financial assets and liabilities whose contracts are referenced to IBORs, especially the EURIBOR, which is used, among others, for loans, deposits and debt issues, as well as an underlying reference rate in derivatives. Furthermore, although the exposure to EONIA is lower in the banking book, this IBOR is used as the underlying reference in derivatives of the trading book, as well as for the treatment of collaterals, mainly in Spain. In the case of LIBOR, the USD is the most relevant currency for, both, debt instruments of the banking book and the trading book. Other LIBOR currencies (CHF, GBP and JPY) have a lower specific weight.

Any of the international or national reforms, or the general increased regulatory scrutiny of "benchmarks", could increase the costs and risks of administering or otherwise participating in the setting of a "benchmark" and complying with any such regulations or requirements. Such factors may have the following effects on certain "benchmarks": (i) discourage market participants from continuing to administer or contribute to the "benchmark"; (ii) trigger changes in the rules or methodologies used in the "benchmark" and/or (iii) lead to the disappearance of the "benchmark". Any of the above changes or any other consequential changes as a result of international or national reforms or other initiatives or investigations, could have a material adverse effect on the value of and return on any Securities linked to or referencing a "benchmark" and the Calculation Agent may be entitled to make corresponding adjustments to the conditions of the Securities.

Discontinuance and replacement of IBORs

Certain base rates, including LIBOR and EURIBOR, are the subject of ongoing national and international regulatory scrutiny and reform. Some of these reforms are already effective, while others are still to be implemented or formulated as follows:

(1) LIBOR

LIBOR (published in 7 maturities and 5 currencies) ceased or became non-representative of the underlying market and economic reality that such rate is intended to measure immediately after December 31, 2021, with the exception of certain USD LIBOR settings, for which this will occur immediately after June 30, 2023.

RISK FACTORS

The EU has also amended the EU Benchmarks Regulation to include a power for regulators to designate one or more replacement benchmarks in certain limited circumstances for critical benchmarks or systemically important benchmarks where certain triggers are satisfied, relating to non-representativeness, cessation or orderly wind-down of the benchmark or where its use by supervised entities in the European Union is no longer permitted. This legislation is also primarily intended to assist contracts that do not have fallbacks or do not have suitable fallbacks for permanent cessation. Implementing regulations designating a statutory replacement rate for certain settings of Swiss Franc LIBOR and for the benchmark Euro overnight index average (EONIA) were published in the Official Journal of the European Union on October 22, 2021 and have applied from January 1, 2022 and January 3, 2022, respectively.

On March 15, 2022, the Consolidated Appropriations Act of 2022, which includes the Adjustable Interest Rate (LIBOR) Act of 2021, was signed into law in the United States. This legislation establishes a uniform benchmark replacement mechanic for financial contracts that mature after June 30, 2023 which do not contain either clearly defined or practicable fallback provisions or are contractually silent on a benchmark replacement rate. The legislation also creates a safe harbor that shields involved parties from liability if they choose to utilise a replacement rate recommended by the Board of Governors of the Federal Reserve.

Whilst the above legislative solutions may assist some tough legacy trades, regulators have made clear that they are not an alternative to active transition. Parties who rely on potential legislative solutions will not have control over the economic terms of that action. Also there is a risk that such legislative solutions may not be able to address all issues or be practicable in all circumstances and the existence of different solutions in different jurisdictions could also give rise to potential conflicts of law in the absence of harmonisation.

(2) EURIBOR

Unlike LIBOR, EURIBOR is expected to continue to be published by the European Money Markets Institute (EMMI) using a reformed or hybrid methodology, in compliance with the EU Benchmarks Regulation. However, no assurance can be given this will be the case and any changes may result in payments under the Securities being different from those originally anticipated, and could have a material adverse effect on the value of and return on the Securities. The euro risk-free rate working group for the euro area has published a set of guiding principles and, on May 11, 2021, its recommendations on EURIBOR fallback trigger events and fallback rates. The guiding principles indicate, among other things, that continuing to reference EURIBOR in relevant contracts (without robust fallback provisions) may increase the risk to the euro area financial system. Investors should understand the risks on the fallbacks outlined in the risk factor "Key risks relating to the reform and eventual replacements of IBORs with risk free rates" below.

(3) The market continues to develop in relation to SONIA, SOFR, and €STR as reference rates for Securities that pay a floating rate of interest

Where the applicable Final Terms specifies that the Rate of Interest or Rate, as applicable, in respect of the Securities will be determined by reference to SONIA, SOFR, or €STR, the Rate of Interest or Rate, as applicable, will be determined by reference to the Compounded Daily SONIA, Weighted Average SONIA, Compounded Daily SOFR (including on the basis of the SOFR Index published on the NY Federal Reserve Website), SOFR Arithmetic Mean, or Compounded Daily €STR, as specified in the applicable Final Terms. In each case, such rate will differ from the relevant LIBOR or EURIBOR rate in a number of material respects, including (without limitation) that compounded daily rates or weighted average rates are backwards-looking, risk-free overnight rates and, in the case of SOFR, secured, and single daily rates are risk-free overnight non-term rates, whereas LIBOR and EURIBOR are expressed on the basis of a forward-looking term, are unsecured and include a risk-element based on inter-bank lending. As such, investors should be aware that LIBOR, EURIBOR, SONIA, SOFR, and €STR may behave materially differently as floating rates of interest in respect of the Securities.

Risk-free rates offered as alternatives to interbank offered rates also have a limited history. For that reason, future performance of such rates may be difficult to predict based on their limited historical performance. Certain administrators of risk-free rates have published hypothetical and actual historical performance data. Hypothetical data inherently includes assumptions, estimates and approximations and actual historical performance data may be limited in the case of certain risk-free rates.

The level of such rates during the term of the Securities may bear little or no relation to historical levels. Prior observed patterns, if any, in the behaviour of market variables and their relation to such rates such as correlations, may change in the future. Investors should not rely on historical performance data as an indicator of the future performance of such risk-free rates nor should they rely on any hypothetical data.

RISK FACTORS

The ongoing development of compounded daily SONIA, SOFR, and €STR as reference rates in the capital markets, as well as continued development of SONIA-, SOFR-, and €STR-based rates for such markets and the market infrastructure for adopting such rates, could result in reduced liquidity or increased volatility or could otherwise affect the market price of any Securities that reference a SONIA, SOFR, or €STR rate, as applicable.

The market or a significant part thereof may adopt an application of SONIA, SOFR, or €STR that differs significantly from that set out in the Conditions and used in relation to Securities referencing SONIA, SOFR, or €STR that are issued under the Programme. In contrast to Securities that pay a floating rate of interest referencing LIBOR or EURIBOR, if Securities referencing compounded daily or single daily SONIA, SOFR, or €STR are redeemed early and accrued interest is payable on such redemption in respect of a period which is not an Interest Period, the final Rate of Interest or Rate in respect of such Securities will only be determined at the due date for redemption.

In addition, the manner of adoption or application of SONIA, SOFR, or €STR reference rates in the Eurobond markets may differ materially compared with the application and adoption of SONIA, SOFR, or €STR in other markets, such as the derivatives and loan markets. Any such mismatch between the adoption of SONIA, SOFR, or €STR reference rates across these markets may adversely impact any hedging or other financial arrangements which a Securityholder has in connection with any acquisition, holding or disposal of any Securities referencing a SONIA, SOFR, or €STR rate and could have a material adverse impact on such Securityholders' investments.

To the extent the SONIA, SOFR, or €STR rate is not published, the applicable rate to be used to calculate the Rate of Interest or Rate will be determined using the fall-back provisions set out in the Conditions. Any of these fall-back provisions may result in interest payments that are lower than, or do not otherwise correlate over time with, the payments that would have been made on the Securities if the SONIA, SOFR, or €STR rate had been so published as expected as of the Issue Date of the Securities. In addition, application of the fall-back provisions may result in the effective application of a fixed rate of interest to the Securities.

(4) Investors will not know in advance the interest amount payable on Securities which is calculated by reference to SOFR, SONIA or €STR

The Rate of Interest or Rate in respect of the Securities may be calculated by reference to SOFR, SONIA or €STR. Because each of SOFR, SONIA and €STR is an overnight funding rate, interest on Securities that reference SOFR, SONIA and €STR with Interest Periods longer than overnight will be calculated on the basis of (a) the arithmetic mean of the relevant Rate, over the relevant Interest Period, where the relevant Rate is fixed for a certain number of days prior to the end of such Interest Period or (b) a compounded relevant Rate (i) in respect of the Interest Period, provided that the relevant Rate used as the basis for calculation is that which was observed a specified number of days prior or (ii) in respect of a period that starts a specified number of days prior to the relevant Interest Period and ends the same specified number of days prior to the end of such Interest Period or (c) calculated by reference to the relevant index, as applicable. As a consequence of these calculation methods, the amount of interest payable on each interest payment date will only be known a short period of time prior to the relevant interest payment date. Investors therefore will not know in advance the interest amount which will be payable on such Securities and there is a possibility that such amount could be lower than expected and some investors may be unable or unwilling to trade such Securities without changes to their IT systems, both of which could adversely impact the liquidity of such Securities.

The Securities are not insured by the Federal Deposit Insurance Corporation.

The Securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency of the United States or any other jurisdiction. In the event that the Issuer or the Guarantor is unable to pay or settle the Issuer's obligations under the Securities, investors risk losing their entire investment.

3.6 Risk Factor relating to Sustainable Securities

The application of the net proceeds of Sustainable Securities may not meet investor expectations or be suitable for an investor's investment criteria

Prospective investors in any Securities, where it is specified in "Reasons for the Offer" in paragraph 4 in Part B of the applicable Issue Terms that the net proceeds are to be separately identified and applied by the Guarantor for "green", "social" or "sustainability" purposes as defined in "Use of Proceeds" section of this Base Prospectus ("Green Securities", "Social Securities" or "Sustainability Securities", respectively and together, "Sustainable Securities"), should have regard to the information provided concerning the use of the net proceeds of those Sustainable Securities and must determine for themselves the relevance of such information for the purpose of any investment in such Sustainable Securities together with any other investigation such

RISK FACTORS

investor deems necessary. In particular no assurance is given by the Issuer, the Guarantor or the Dealer that the use of such proceeds will satisfy, whether in whole or in part, any present or future expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply.

Furthermore, it should be noted that there is currently no clear definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes, a "green", "social" or "sustainable" or an equivalently-labelled project or as to what precise attributes are required for a particular project to be defined as "green", "social" or "sustainable" or such other equivalent label nor can any assurance be given that such a clear definition or consensus will develop over time or that any prevailing market consensus will not significantly change. Accordingly, no assurance is or can be given to investors that any projects or uses the subject of, or related to, any such project or will meet any or all investor expectations regarding such "green", "social" or "sustainable" or other equivalently-labelled performance objectives or that any adverse environmental, social and/or other impacts will not occur during the implementation of any projects or uses the subject of, or related to, any such project.

A basis for the determination of such "green" project definition has been established in the EU with the publication in the Official Journal of the EU on June 22, 2020 of Regulation (EU) 2020/852 of the European Parliament and of the Council of June 18, 2020 (the "**Sustainable Finance Taxonomy Regulation**") on the establishment of a framework to facilitate sustainable investment (the "**EU Sustainable Finance Taxonomy**"). The EU Sustainable Finance Taxonomy is subject to further development by way of the implementation by the European Commission through delegated regulations of technical screening criteria for the environmental objectives set out in the Sustainable Finance Taxonomy Regulation. While the Guarantor's Sustainable Development Goals (SDGs) Bond Framework (April 2018) published on its website (https://shareholdersandinvestors.bbva.com/wp-content/uploads/2018/04/BBVA-SDGs-Bond-Framework_24042018_Eng.pdf) (including as amended, supplemented, restated or otherwise updated on such website from time to time, the SDGs Bond Framework)), is in alignment with the relevant objectives for the EU Sustainable Finance Taxonomy, until the technical screening criteria for such objectives have been developed it is not known whether the SDGs Bond Framework will satisfy those criteria.

Accordingly, alignment with the EU Sustainable Finance Taxonomy, once the technical screening criteria are established, is not certain and no assurance or representation is given by the Issuer, the Guarantor or the Dealer as to the suitability or reliability for any purpose whatsoever of any report, assessment, opinion or certification of any third party (whether or not solicited by the Guarantor) which may or may not be made available in connection with the issue of such Sustainable Securities and in particular with any projects or any other use to fulfil any environmental, social, sustainability and/or other criteria. Any such report, assessment, opinion or certification is not, nor shall be deemed to be, incorporated in and/or form part of this Base Prospectus.

Any such report, assessment, opinion or certification is not, nor should be deemed to be, a recommendation by the Issuer, the Guarantor or the Dealer or any other person to buy, sell or hold any such Sustainable Securities. Any such report, assessment, opinion or certification is only current as of the date it was issued. Prospective investors must determine for themselves the relevance of any such report, assessment, opinion or certification and/or the information contained therein and/or the provider of such report, assessment, opinion or certification for the purpose of any investment in such Sustainable Securities. Currently, the providers of such reports, assessments, opinions and certifications are not subject to any specific oversight or regulatory or other regime.

While it is the intention of the Guarantor, to apply the net proceeds of any Sustainable Securities and, obtain and publish the relevant reports, assessments, opinions and certifications in, or substantially in, the manner described in "*Reasons for the Offer*" in paragraph 4 in Part B of the applicable Issue Terms there can be no assurance that the Guarantor will be able to do this. Nor can there be any assurance that any projects or uses will be completed within any specified period or at all or with the results or outcome (whether or not related to the environment, social or sustainability) as originally expected or anticipated by the Guarantor.

Any such event or failure by the Guarantor to apply the net proceeds of any of Sustainable Securities issued for its identified purposes or to obtain and publish any such reports, assessments, opinions and certifications, will not give rise to any claim of a holder of such Sustainable Securities against the Issuer or the Guarantor. In the case of (A) or (B) above, such transferee may take delivery through a Legended Security (as defined below) in global or definitive form and, in the case of (C) above, such transferee may take delivery only through a Legended Security in definitive form. TERMS AND CONDITIONS OF THE SECURITIES

- (C) in the case of Securities issued by BBVA Global Securities B.V., to a transferee who takes delivery of such interest through a Legended Security:
 - A. where the transferee is a person whom the transferor reasonably believes is a QIB in a transaction meeting the requirements of Rule 144A, or where the transferee is an Institutional Accredited Investor (as defined below), subject to delivery to the Registrar of a Transfer Certificate from the transferor to the effect that such transfer is being made to a QIB or to an Institutional Accredited Investor (as applicable), together with a duly executed Investment Letter; or
 - B. where the transferee is an Institutional Accredited Investor (as defined below), subject to delivery to the Registrar of a Transfer Certificate from the transferor to the effect that such transfer is being made to an Institutional Accredited Investor, together with a duly executed Investment Letter; or
- (D) otherwise pursuant to the Securities Act or an exemption therefrom, subject to receipt by the Issuer of such satisfactory evidence as the Issuer may reasonably require, which may include an opinion of U.S. counsel, that such transfer is in compliance with any applicable securities laws of any State of the United States, and, in each case, in accordance with any applicable securities laws of any State of the United States or any other jurisdiction.

Securities transferred by Institutional Accredited Investors who are also QPs to QIBs who are also QPs, in the case of Securities issued by BBVA Global Markets B.V., and Securities transferred by Institutional Accredited Investors to QIBs, in the case of Securities issued by BBVA Global Securities B.V., in each case, pursuant to Rule 144A or outside the United States pursuant to Regulation S will be eligible to be held by such QIBs who are also QPs or such QIBs, as applicable, or non-U.S. investors through DTC, Euroclear or Clearstream, Luxembourg, as appropriate, and the Registrar will arrange for any Securities which are the subject of such a transfer to be represented by the appropriate Registered Global Security, where applicable.

Upon the transfer, exchange or replacement of Legended Securities, or upon specific request for removal of the Legend, the Registrar shall deliver only Legended Securities or refuse to remove the Legend, as the case may be, unless there is delivered to the Issuer such satisfactory evidence as may reasonably be required by the Issuer, which may include an opinion of U.S. counsel, that neither the Legend nor the restrictions on transfer set forth therein are required to ensure compliance with the provisions of the Securities Act.

In the case of an Institutional Accredited Investor who is also a QP, or a QIB who is also a QP (for Securities issued by BBVA Global Markets B.V.), or in the case of an Institutional Accredited Investor or a QIB (for Securities issued by BBVA Global Securities B.V.), if at any time the Issuer determines or is notified by the dealer in respect of the Securities specified in the Issue Terms (the "**Dealer**") acting on behalf of the Issuer that such holder or transferee was in breach, at the time given or deemed to be given, of any of the representations or agreements set out in the Investment Letter or otherwise determines that any transfer or other disposition of any Securities would, in the sole determination of the Issuer or the Dealer acting on behalf of the Issuer, require the Issuer to register as an "investment company" under the provisions of the 1940 Act, such purchase or other transfer will be void *ab initio* and will not be honoured by the Registrar. Accordingly, any such purported transferee or other holder will not be entitled to any rights as a Securityholder and the Issuer shall have the right, in accordance with the conditions of the Securities, to force the transfer of, transfer on behalf of the Securityholder or redeem, any such Securities.

- (g) Exchanges and transfers of Registered Securities generally

Holders of Registered Securities in definitive form, other than Institutional Accredited Investors, may exchange such Securities for interests in a Registered Global Security of the same type at any time.

- (h) Minimum Tradeable Amount

Where a "**Minimum Tradable Amount**" is specified in the Issue Terms, Securities will be transferable only in a minimum aggregate amount of Specified Denominations equal to the Minimum Tradable Amount specified in the Issue Terms.

3. Status of the Securities and the Guarantee

(a) Status of the Securities

The Securities and any related Coupons and Receipts constitute direct, unconditional and unsecured and unsubordinated obligations of the Issuer and rank *pari passu*, without any preference or priority

TERMS AND CONDITIONS OF THE SECURITIES

among themselves and with all other outstanding unsecured and unsubordinated obligations of the Issuer present and future, but, in the event of insolvency, only to the extent permitted by applicable laws relating to creditor's right.

In the event of insolvency of the Issuer, the court having jurisdiction to open an insolvency proceeding and the law applicable to those proceedings and their effects will be determined in accordance with the provisions of Regulation (EU) No 2015/848, of May 20, 2015, on insolvency proceedings ("**Regulation 2015/848**"), Royal Legislative Decree 1/2020, of May 5, approving the reinstated text of the Spanish Insolvency Law 22/2003 of July 9, 2003, as amended (the "**Spanish Insolvency Law**") and the Dutch Insolvency Law (*faillissementswet*) of September 30, 1893, as amended (the "**Dutch Insolvency Law**"). Pursuant to these provisions, the courts of the place where the Issuer has its centre of main interests shall have jurisdiction to open insolvency proceedings against it and the law applicable to the insolvency proceedings and their effects will be the law of the place where such proceedings are opened.

Under Regulation 2015/848 the centre of main interests should correspond to the place where the debtor conducts the administration of its interests on a regular basis and is therefore ascertainable by third parties. In the case of a company or legal person, Regulation 2015/848 presumes, in the absence of proof to the contrary, that the place of its registered office is the centre of main interests. Based on this presumption a Dutch court may consider that it has jurisdiction to open insolvency proceedings against the Issuer. Notwithstanding this presumption, it is arguable that the centre of main interests of the Issuer should be considered to be located in Spain and that the Spanish courts should be the courts with jurisdiction to open insolvency proceedings against it. In addition, even if the centre of main interests of the Issuer were not in Spain, the Spanish court could still open insolvency proceedings (named territorial insolvency proceedings) if they consider that the Issuer has an establishment within the territory of Spain, the effects of which would be limited to the assets of the Issuer situated in Spain.

In the event of insolvency (*faillissement*) of the Issuer declared by a Dutch court (either principal or territorial proceedings), claims relating to Securities will be *pari passu* claims (*concurrente vorderingen*) as defined in the Dutch Insolvency Law. Ordinary credits rank below credits against the insolvency estate (*boedelschuld*) and credits with a privilege (*voorrecht*). Ordinary credits rank above subordinated credits and the rights of shareholders.

In the event of insolvency (*concurso*) of the Issuer declared by a Spanish court (either principal or territorial insolvency proceedings) claims relating to Securities (which are not subordinated pursuant to article 309 of the Spanish Insolvency Law) will be ordinary credits (*créditos ordinarios*) as defined in the Spanish Insolvency Law. Ordinary credits rank below credits against the insolvency estate (*créditos contra la masa*) and privileged credits (*créditos privilegiados*) which shall be paid in full before ordinary credits. The claims of all creditors against the Issuer considered as "ordinary credits": will be satisfied pro rata in insolvency. Ordinary credits rank above subordinated credits and the rights of shareholders.

Pursuant to article 59 of the Spanish Insolvency Law, the further accrual of interest shall be suspended from the date of declaration of the insolvency of any Issuer. Claims in respect of interest on the Securities accrued but unpaid as of the commencement of any insolvency procedure in respect of the Issuer shall constitute subordinated claims against the Issuer ranking in accordance with the provisions of article 309 of the Spanish Insolvency Law (including, without limitation, after claims on account of principal in respect of contractually subordinated obligations of the Issuer).

(b) Status of the Guarantee

The payment of principal and interest in respect of the Securities and any related Coupons and Receipts and all amounts due under the Deed of Covenant in respect of the Securities and any related Coupons and Receipts has been unconditionally and irrevocably guaranteed by the Guarantor pursuant to the Guarantee.

The obligations of the Guarantor under the Guarantee constitute direct, unconditional, unsubordinated and unsecured obligations of the Guarantor and rank *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Guarantor, present and future, but, in the event of insolvency, only to the extent permitted by applicable laws relating to creditors' rights.

In the event of insolvency (*concurso*) of the Guarantor, under the Spanish Insolvency Law, claims of Securityholders (which are not subordinated pursuant to article 309 of the Insolvency law) will be ordinary credits (*créditos ordinarios*) as defined in the Spanish Insolvency Law. Ordinary credits rank

TERMS AND CONDITIONS OF THE SECURITIES

below credits against the insolvency estate (*créditos contra la masa*) and privileged credits (*créditos privilegiados*) (including, without limitation, any deposits for the purposes of Additional Provision 14.1 of Law 11/2015) which shall be paid in full before ordinary credits. The claims of all creditors against the Guarantor considered as "ordinary credits" will be satisfied pro rata in insolvency. Ordinary credits rank above subordinated credits and the rights of shareholders.

Pursuant to article 59 of the Spanish Insolvency Law, the further accrual of interest shall be suspended from the date of declaration of the insolvency of the Guarantor. Claims of Securityholders in respect of interest accrued but unpaid as of the commencement of any insolvency procedure in respect of the Guarantor shall constitute subordinated claims against the Guarantor ranking in accordance with the provisions of article 309 of the Spanish Insolvency Law (including, without limitation, after claims on account of principal in respect of contractually subordinated obligations of the Guarantor).

The Guarantee provided by Banco Bilbao Vizcaya Argentaria, S.A., acting through its New York Branch, in respect of the 3(a)(2) Notes is governed by New York law. Under New York law, (a) the Guarantor, as a New York state-licensed branch of BBVA, a Spanish bank, is required to maintain certain liquid assets, (b) the Superintendent may take possession of such assets and the rest of the property and business of the Guarantor located in New York for the benefit of the Guarantor's creditors, including the beneficiaries of the Guarantee, if, among other things, BBVA is in liquidation in Spain or elsewhere, or if there is reason to doubt BBVA's ability to pay its creditors in full and (c) the Superintendent is authorised to turn over any such assets or other property of the Guarantor to the principal office of BBVA or any Spanish liquidator or receiver only after all of the claims of the creditors of the Guarantor, including the beneficiaries of the Guarantee, have been satisfied and discharged and, to the extent requested by a liquidator of any other BBVA office in the United States, the claims of the creditors of that office accepted by the liquidator and the expenses incurred by that liquidator in liquidating the other office, have been satisfied and discharged.

The obligations of the Guarantor under the Guarantee and the obligations of BBVA under the Hedging Agreements entered into between BBVA and the Issuer in respect of any Securities are also subject to the application of the general bail-in tool by the Fondo de Reestructuración Ordenada Bancaria (the "FROB") or any other Relevant Spanish Resolution Authority pursuant to Law 11/2015.

By its acquisition of any Securities, each holder acknowledges and accepts that he may be adversely affected by the exercise of the Spanish Bail-in Power by the Relevant Spanish Resolution Authority and the effects thereof, as further described in the Risk Factors, which may be imposed with or without any prior notice with respect to the Guarantee and/or the Hedging Agreements, in relation to Securities of any series.

"**Relevant Spanish Resolution Authority**" means any of the Spanish Fund for the Orderly Restructuring of Banks (Fondo de Reestructuración Ordenada Bancaria), the European Single Resolution Mechanism, the Bank of Spain and the Spanish Securities Market Commission ("CNMV") or any other entity with the authority to exercise the Spanish Bail-in Power from time to time, according to Law 11/2015, of June 18, as amended from time to time, including amongst others, as amended by Royal Decree-Law 7/2021 ("**Law 11/2015**"), RD 1012/2015 and the SRM Regulation.

4. Interest

(a) Interest on Fixed Rate Securities

Each Fixed Rate Security bears interest from (and including) the Interest Commencement Date at the rate(s) per annum equal to the Rate(s) of Interest. Interest will accrue in respect of each period from (and including) an Interest Period End Date (or if none the Interest Commencement Date) to (but excluding) the next (or first) Interest Period End Date (each an "**Interest Period**" and each such latter date the "**Interest Period End Final Date**"). Interest will be payable in arrears on the Interest Payment Date(s) up to (and including) the Maturity Date. If an Interest Payment Date falls after the Interest Period End Final Date in respect of the relevant Interest Period, no additional interest or other amount shall be payable as a result of such interest being payable on such later date. If a Business Day Convention (as defined in General Condition 4(j) below) is specified in the Issue Terms as applying to an Interest Period End Date or an Interest Payment Date and (i) if there is no numerically corresponding day on the calendar month in which an Interest Period End Date or Interest Payment Date, as the case may be, should occur or (ii) if any Interest Period End Date or Interest Payment Date, as the case may be, would otherwise fall on a day which is not a Business Day (as defined in General

TERMS AND CONDITIONS OF THE SECURITIES

Condition 4(j)), then, the relevant Business Day Convention shall apply. For the purposes of this General Condition 4(a), "**Interest Period End Date**" shall mean each date so specified in the Issue Terms. If no such date(s) is so specified, then the Interest Period End Date for an Interest Period shall be the corresponding Interest Payment Date (unadjusted for any Business Day Convention unless a Business Day Convention is specified in the Issue Terms as applying to an Interest Period End Date).

If no Business Day Convention is specified as applicable to an Interest Period End Final Date in the Issue Terms, except as provided in the Issue Terms:

- (i) the amount of interest payable on each Interest Payment Date in respect of the Interest Period ending on (but excluding) the Interest Period End Final Date in respect of such Interest Period, will amount to the Fixed Coupon Amount; and
- (ii) the amount of interest payable on any other Interest Payment Date will, if so specified in the Issue Terms, amount to the Broken Amount so specified.

Subject to the Payout Conditions, Interest shall be calculated by applying the Rate of Interest to:

- (x) in the case of Fixed Rate Securities which are represented by a Global Security, the aggregate outstanding nominal amount of the Fixed Rate Securities represented by such Global Security (or, if they are Partly Paid Securities, the aggregate amount paid up (subject to General Condition 4(f))); or
- (y) in the case of each Fixed Rate Security in definitive form, the Calculation Amount (subject to General Condition 4(f)),

and, in each case, multiplying such sum by (i) the applicable Day Count Fraction (as defined in General Condition 4(j) below) specified in the Issue Terms and (ii) where an Interest Leverage Multiplier is specified as "Applicable" in the Issue Terms, the Interest Leverage Multiplier specified in the Issue Terms, and rounding the resultant figure to the nearest sub-unit of the relevant Specified Currency, half of any such sub-unit (as defined below) being rounded upwards or otherwise in accordance with applicable market convention.

Where the Specified Denomination of a Fixed Rate Security in definitive form comprises more than one Calculation Amount, the amount of Interest payable in respect of such Fixed Rate Security shall be the aggregate of the amounts (determined in the manner provided above) for each Calculation Amount (subject to General Condition 4(f)) comprising the Specified Denomination without any further rounding.

"**sub-unit**" means, with respect to any currency other than euro, the lowest amount of such currency that is available as legal tender in the country of such currency and, with respect to euro, means one cent.

(b) Interest on Floating Rate Securities and Reference Item Linked Interest Securities

(i) Interest Period End Dates and Interest Payment Dates

Each Floating Rate Security and, subject to the provisions of General Condition 4(e) below and unless otherwise specified in the Issue Terms, each Reference Item Linked Interest Security bears interest on its outstanding nominal amount (or, if it is a Partly Paid Security, in accordance with General Condition 4(f)) in respect of each Interest Period (as defined in General Condition 4(a)). For the purposes of this General Condition 4(b), "**Interest Period End Date**" shall mean either:

- (A) the specified Interest Period End Date(s) specified in the Issue Terms; or
- (B) if no Interest Period End Date(s) is/are specified in the Issue Terms, (x) in the case of Floating Rate Securities, each date which falls on the number of months or other period specified as the Specified Period in the Issue Terms after the preceding Interest Period End Date or, in the case of the first Interest Period End Date, after the Interest Commencement Date and (y) in the case of Reference Item Linked Interest Securities, the corresponding Interest Payment Date (unadjusted for any Business Day Convention).

Interest will be payable in arrears on the Interest Payment Date(s) up to (and including) the Maturity Date. If an Interest Payment Date falls after an Interest Period End Final Date in

TERMS AND CONDITIONS OF THE SECURITIES

respect of the relevant Interest Period, no additional interest or other amount shall be payable as a result of such interest being payable on such later date.

If a Business Day Convention is specified in the Issue Terms as applying to an Interest Period End Date or an Interest Payment Date and (i) if there is no numerically corresponding day on the calendar month in which an Interest Period End Date or Interest Payment Date, as the case may be, should occur or (ii) if any Interest Period End Date or Interest Payment Date, as the case may be, would otherwise fall on a day which is not a Business Day (as defined in General Condition 4(j) below), then the relevant Business Day Convention (as defined in General Condition 4(j) below) shall apply. Provided that, in any case, where Specified Periods are specified in accordance with General Condition 4(b)(i)(A) and (B) above, the Floating Rate Convention shall apply.

(ii) Rate of Interest

The Rate of Interest payable from time to time in respect of Floating Rate Securities and Reference Item Linked Interest Securities will be determined in the manner specified in the Issue Terms.

(iii) ISDA Determination

Where ISDA Determination is specified in the Issue Terms as the manner in which the Rate of Interest is to be determined, the Rate of Interest for each Interest Period will be the relevant ISDA Rate plus or minus (as indicated in the Issue Terms) the Margin (if any). For the purposes of this subparagraph (iii), "**ISDA Rate**" for an Interest Period means a rate equal to the Floating Rate that would be determined by the Principal Paying Agent under an interest rate swap transaction if the Principal Paying Agent were acting as Calculation Agent for that swap transaction under the terms of an agreement incorporating the ISDA Definitions and under which:

if the Issue Terms specify either "2006 ISDA Definitions" or "2021 ISDA definitions" as the applicable ISDA Definitions:

- (A) the Floating Rate Option (as defined in the ISDA Definitions) is as specified in the Issue Terms;
- (B) the Designated Maturity (as defined in the ISDA Definitions) is a period specified in the Issue Terms;
- (C) the relevant Reset Date (as defined in the ISDA Definitions) is as specified in the Issue Terms; and
- (D) if Linear Interpolation is specified as applicable in respect of an Interest Period in the applicable Issue Terms, the Rate of Interest for such Interest Period shall be calculated by the Calculation Agent by straight-line linear interpolation by reference to two rates based on the relevant Floating Rate Option, where:
 - (1) one rate shall be determined as if the Designated Maturity were the period of time for which rates are available next shorter than the length of the relevant Interest Period; and
 - (2) the other rate shall be determined as if the Designated Maturity were the period of time for which rates are available next longer than the length of the relevant Interest Period;

provided, however, that if there is no rate available for a period of time next shorter than the length of the relevant Interest Period or, as the case may be, next longer than the length of the relevant Interest Period, then the Calculation Agent shall determine such rate at such time and by reference to such sources as it determines appropriate;

- (E) if the specified Floating Rate Option is an Overnight Floating Rate Option (as defined in the ISDA Definitions), Compounding is specified to be applicable in the relevant Issue Terms and:

 - (2) Averaging with Lookback is specified as the Averaging Method in the relevant Issue Terms, (a) Averaging with Lookback is the Overnight Rate Averaging Method (as defined in the ISDA Definitions) and (b) Lookback is the number of Applicable Business Days (as defined in the ISDA Definitions) as specified in relevant Issue Terms;
 - (3) Averaging with Observation Period Shift is specified as the Averaging Method in the relevant Issue Terms, (a) Averaging with Observation Period Shift is the Overnight Rate Averaging Method, (b) Observation Period Shift is the number of Observation Period Shift Business Days (as defined in the ISDA Definitions) specified in the relevant Issue Terms and (c) Observation Period Shift Additional Business Days (as defined in the ISDA Definitions), if applicable, are the days specified in the relevant Issue Terms; or

In the event of any ambiguity or other uncertainty in the application of the ISDA Definitions to the determination of the Floating Rate, such ambiguity or other uncertainty shall be resolved by the Issuer acting in good faith and in a commercially reasonable manner.

If the applicable Issue Terms specify "2021 ISDA Definitions" as the applicable ISDA Definitions:

- (A) "Administrator/Benchmark Event" (as defined in the 2021 ISDA Definitions) shall be disappplied; and
- (B) if the Temporary Non-Publication Fallback in respect of any specified Floating Rate Option is specified to be "Temporary Non-Publication – Alternative Rate" in the Floating Rate Matrix of the 2021 ISDA Definitions, the reference to "Calculation Agent Alternative Rate Determination" in the definition of "Temporary Non-Publication– Alternative Rate" shall be replaced by "Temporary Non-Publication Fallback – Previous Day's Rate".

If OIS Compounding or Overnight Averaging is specified as the Compounding Method or Averaging Method, as applicable and "Payment Delay" is specified as applicable in the relevant Issue Terms, all references in these Conditions to interest on the Securities being payable on an Interest Payment Date shall be read as reference to interest on the Securities being payable on each date specified as such in the relevant Issue Terms (each an "Effective Interest Payment Date") instead; provided that, for the purposes of determining the ISDA Rate in respect of the final Interest Period ending on the Maturity Date, the Underlying Benchmark Level (as defined in the 2021 ISDA Definitions) in respect of the period from and including the date falling two Business Days prior to the Maturity Date to (but excluding) the Maturity Date shall be equal to the Underlying Benchmark Level as of the date falling two Business Days prior to the Maturity Date.

(iv) Screen Rate Determination

- (1) Screen Rate Determination for Floating Rate Securities not referencing SONIA, SOFR or €STR

Where Screen Rate Determination (not referencing SONIA, SOFR or €STR) is specified in the Issue Terms as the manner in which the Rate of Interest is to be determined, the Rate of Interest for each Interest Period will, subject as provided below, be either:

- (A) the offered quotation; or

TERMS AND CONDITIONS OF THE SECURITIES

- (B) the arithmetic mean (rounded, if necessary, to the fifth decimal place, with 0.000005 being rounded upwards) of the offered quotations, (expressed as a percentage rate per annum) for the Reference Rate(s) which appears or appear, as the case may be, on the Relevant Screen Page (or any successor to such page or service) as at the Specified Time indicated in the Issue Terms (which will be 11.00 a.m., London time, in the case of LIBOR, or Brussels time, in the case of EURIBOR) on the Interest Determination Date (as defined below) in question plus or minus (as indicated in the Issue Terms) the Margin (if any), all as determined by the Principal Paying Agent. If five or more of such offered quotations are available on the Relevant Screen Page, the highest (or, if there is more than one such highest quotation, one only of such quotations) and the lowest (or, if there is more than one such lowest quotation, one only of such quotations) shall be disregarded by the Principal Paying Agent for the purpose of determining the arithmetic mean (rounded, as provided above) of such offered quotations; or
- (C) in the case of a CMS Rate, the rate for swap transactions in the currency to which the CMS Rate relates with a maturity of the Designated Maturity, expressed as a percentage, which appears on the Relevant Screen Page (or any successor to such page or service) as of the Specified Time on the relevant Interest Determination Date plus or minus (as indicated in the Issue Terms) the Margin (if any) all as determined by the Calculation Agent or, in the event that the Principal Paying Agent determines it is not reasonably practicable to determine the Rate of Interest in such manner, the Rate of Interest will be determined by the Calculation Agent as such rate that it determines would have prevailed but for such impracticality by reference to such source(s) as it may select; or
- (D) in the case of a rate that is based on the yield of a government bond (a "**Government Bond Yield Rate**"), the rate for a generic government bond, expressed as a percentage per annum, with a maturity of the Designated Maturity, which appears on the Relevant Screen Page (or any successor to such page or service) as of the Specified Time on the relevant Interest Determination Date plus or minus (as indicated in the Issue Terms) the Margin (if any) (all as specified in the Issue Terms), as determined by the Calculation Agent; or
- (E) if the Calculation Agent determines that it is not reasonably practicable to obtain the rate in such manner, the rate will be determined as such rate that the Calculation Agent determines would have prevailed but for such impracticability by reference to such source(s) as it may select.

In case the rate specified in the Issue Terms is a TEC Rate (*Taux de l'Echéance Constante*), the offered quotation, expressed as a percentage rate per annum, with a maturity of the Designated Maturity calculated by the *Comité de Normalisation Obligataire* (or successor thereto), which appears on the Relevant Screen Page (or any successor to such page or service) as of the Specified Time on the relevant Interest Determination Date plus or minus (as indicated in the Issue Terms) the Margin (if any) (all as specified in the Issue Terms), as determined by the Calculation Agent.

If the Calculation Agent determines it is not reasonably practicable to determine the rate in such manner, the rate shall be determined by the Calculation Agent on the basis of the linear interpolation of the mid-market prices for each of the two reference French treasury bonds (*Obligation Assimilable du Trésor*), which would have been used by the *Comité de Normalisation Obligataire* (or successor thereto) for the calculation of the relevant rate.

In order to determine such mid-market prices, the Calculation Agent shall request five active dealers each to provide a quotation of its price at approximately the Specified Time on the Interest Determination Date in question and shall determine the mid-market prices as the arithmetic mean of such quotations after discarding the highest and lowest of such quotations.

In the case of (A) and (B), the Agency Agreement contains provisions for determining the Rate of Interest in the event that the Relevant Screen Page is not available or if, in the case of (A) above, no such offered quotation appears or, in the case of (B) above, fewer than three such offered quotations appear, in each case as at the Specified Time indicated above or in the

TERMS AND CONDITIONS OF THE SECURITIES

Issue Terms. The Issue Terms may, if agreed by the relevant Dealer, set out such provisions in full.

- (B) If the Securities become due and payable in accordance with General Condition 9, the final Interest Determination Date shall, notwithstanding any Interest Determination Date specified in the applicable Issue Terms, be deemed to be the date on which the Securities became due and payable and the Rate of Interest applicable to the Securities shall, for so long as any such Security remains outstanding, be that determined on such date and as if (solely for the purpose of such interest determination) the relevant Interest Period had been shortened accordingly.

- I. (i) the Bank of England's Bank Rate (the "**Bank Rate**") prevailing at the close of business on the relevant London Business Day; plus (ii) the arithmetic mean of the spread of SONIA to the Bank Rate over the previous five days on which SONIA has been published, excluding the highest spread (or, if there is more than one highest spread, only of those highest spreads) and lowest spread (or, if there is more than one lowest spread, one only of those lowest spreads); or
- II. if such Bank Rate is not available, the Reference Rate published on the Relevant Screen Page (or otherwise published by the relevant authorised distributors) for the immediately preceding London Business Day on which the Reference Rate was published on the Relevant Screen Page (or otherwise published by the relevant authorised distributors), and

such rate shall be deemed to be the Reference Rate for such London Business Day.

Notwithstanding the foregoing, in the event of the Bank of England publishing guidance as to (i) how the Reference Rate is to be determined or (ii) any rate that is to replace the Reference Rate, the Principal Paying Agent or the Calculation Agent, as applicable, shall follow such guidance to determine the Reference Rate for so long as the Reference Rate is not available or has not been published by the authorised distributors.

In the event that the Rate of Interest cannot be determined in accordance with the foregoing provisions in respect of an Interest Period, the Rate of Interest shall be (i) determined as at the immediately preceding Interest Determination Date (though substituting, where a different Margin, Maximum Interest Rate and/or Minimum Interest Rate is to be applied to the relevant Interest Period from that which applied to the immediately preceding Interest

(y) If "RFR Index Determination" is specified as applicable and "Observation Shift" is specified as the Observation Method in the applicable Issue Terms

If the relevant Index Value is not published or displayed by the administrator of the SONIA reference rate or other information service by 5.00 p.m. (London time) (or, if later, by the time falling one hour after the customary or scheduled time for publication thereof in accordance with the then-prevailing operational procedures of the administrator of the SONIA reference rate or of such other information service, as the case may be) on the relevant Interest Determination Date, the SONIA Compounded Index for the applicable Interest Period for which the SONIA Compounded Index is not available shall be the "Compounded Daily Rate" determined in accordance with General Condition 4(b)(iv)(2) where the "Observation Method" will be deemed to be "Observation Shift (Standard Shift)".

- (4) Additional Provisions applicable where "SOFR" is specified as the Reference Rate in the relevant Issue Terms:

If the Principal Paying Agent or the Calculation Agent, as applicable, failing which the Issuer, determines at any time prior to the SOFR Determination Time on any U.S. Government Securities Business Day that a SOFR Transition Event and the related SOFR Replacement Date have occurred, the Calculation Agent will appoint an agent (the "**Replacement Rate Determination Agent**") which will determine the SOFR Replacement. The Replacement Rate Determination Agent may be (x) a leading bank, broker-dealer or benchmark agent in the principal financial centre of the Specified Currency as appointed by the Calculation Agent, (y) the Issuer, (z) an affiliate of the Issuer, or the Calculation Agent or (zz) such other entity that the Calculation Agent determines to be competent to carry out such role.

In connection with the determination of the SOFR Replacement, the Replacement Rate Determination Agent will determine appropriate SOFR Replacement Conforming Changes.

Any determination, decision or election that may be made by the Calculation Agent or Replacement Rate Determination Agent (as the case may be) pursuant to these provisions, will (in the absence of manifest error) be conclusive and binding on the Issuer, the Calculation Agent, the Principal Paying Agent and the Securityholders.

Following the designation of a SOFR Replacement, the Principal Paying Agent or the Calculation Agent, as applicable, may subsequently determine that a SOFR Transition Event and a related SOFR Replacement Date have occurred in respect of such SOFR Replacement, provided that the SOFR Benchmark has already been substituted by the SOFR Replacement and any SOFR Replacement Conforming Changes in connection with such substitution have been applied. In such circumstances, the SOFR Replacement shall be deemed to be the SOFR Benchmark and all relevant definitions shall be construed accordingly.

In connection with the SOFR Replacement provisions above, the following definitions shall apply:

"**ISDA Definitions**" means, unless otherwise specified in the applicable Issue Terms, the 2006 ISDA Definitions published by the international Swaps and Derivatives Association, Inc. "SOFR Replacement" means any one (or more) of the SOFR Replacement Alternatives to be determined by the Replacement Rate Determination Agent as of the SOFR Replacement Date if the Principal Paying Agent or the Calculation Agent, as applicable, failing which the Issuer, determines that a SOFR Transition Event and its related SOFR Replacement Date have occurred on or prior to the SOFR Determination Time in respect of any determination of the SOFR Benchmark on any U.S. Government Securities Business Day in accordance with:

- (a) the order of priority specified SOFR Replacement Alternatives Priority in the applicable Issue Terms; or
- (b) if no such order of priority is specified, in accordance with the priority set forth below:
 - (i) Relevant Governmental Body Replacement;
 - (ii) ISDA Fallback Replacement; and
 - (iii) Industry Replacement,

Provided, in each case, that, if the Replacement Rate Determination Agent is unable to determine the SOFR Replacement in accordance with the first SOFR Replacement Alternative listed, it shall attempt to determine the SOFR Replacement in accordance with the each subsequent SOFR Replacement Alternative until a SOFR Replacement is determined. The SOFR Replacement will replace the then-current SOFR Benchmark for the purpose of determining the relevant Rate of Interest in respect of the relevant Interest Period and each subsequent Interest Period, subject to the occurrence of a subsequent SOFR Transition Event and related SOFR Replacement Date;

"SOFR Replacement Alternatives" means:

- (b) if the applicable Unadjusted SOFR Replacement is equivalent to the ISDA Fallback Rate, the ISDA Spread Adjustment; or
- (c) the spread adjustment (which may be a positive or negative value or zero) determined by the Replacement Rate Determination Agent giving due consideration to any industry-accepted spread adjustment, or method for calculating or determining such spread adjustment, for the replacement of the then-current SOFR Benchmark with the applicable Unadjusted SOFR Replacement for U.S. dollar-denominated floating rate securities at such time;

"**SOFR Replacement Conforming Changes**" means, with respect to any SOFR Replacement, any technical, administrative or operational changes (including, but not limited to, changes to timing and frequency of determining rates with respect to each interest period and making payments of interest, rounding of amounts or tenors, day count fractions, business day convention and other administrative matters) that the Replacement Rate Determination Agent decides may be appropriate to reflect the adoption of such SOFR Replacement in a manner substantially consistent with market practice (or, if the Replacement Rate Determination Agent determines that adoption of any portion of such market practice is not administratively feasible or if the Replacement Rate Determination Agent determines that no market practice for use of the SOFR Replacement exists, in such other manner as the Replacement Rate Determination Agent or the Calculation Agent, as the case may be, determines is reasonably necessary, acting in good faith and in a commercially reasonable manner);

"**SOFR Replacement Date**" means the earliest to occur of the following events with respect to the then-current SOFR Benchmark (including the daily published component used in the calculation thereof):

- (a) in the case of sub-paragraphs (a) or (b) of the definition of "SOFR Transition Event" the later of (i) the date of the public statement or publication of information referenced therein and (ii) the date on which the administrator of the SOFR Benchmark permanently or indefinitely ceases to provide the SOFR Benchmark (or such component); or
- (b) in the case of sub-paragraph (c) of the definition of "SOFR Transition Event" the date of the public statement or publication of information referenced therein; or
- (c) in the case of sub-paragraph (d), the last such consecutive U.S. Government Securities Business Day on which the SOFR Benchmark has not been published,

provided that, in the event of any public statements or publications of information as referenced in sub-paragraphs (a) or (b) above, should such event or circumstance referred to in such a public statement or publication occur on a date falling later than three months after the relevant public statement or publication, the SOFR Transition Event shall be deemed to occur on the date falling three months prior to such specified date (and not the date of the relevant public statement or publication).

For the avoidance of doubt, if the event giving rise to the SOFR Replacement Date occurs on the same day as, but earlier than, the SOFR Determination Time in respect of any

TERMS AND CONDITIONS OF THE SECURITIES

determination, the SOFR Replacement Date will be deemed to have occurred prior to the SOFR Determination Time for such determination.

- (c) a public statement or publication of information by the regulatory supervisor for the administrator of the SOFR Benchmark (or such component, if relevant) announcing that the SOFR Benchmark (or such component, if relevant) is no longer, or as of a specified future date will no longer be, representative of the underlying market and economic reality that such benchmark is intended to measure and that representativeness will not be restored, the SOFR Benchmark (or such component, if relevant) has been or will be prohibited from being used or that its use has been or will be subject to restrictions or adverse consequences, either generally or in respect of the Securities; or
- (d) the SOFR Benchmark is not published by its administrator (or a successor administrator) for six consecutive U.S. Government Securities Business Days; and

"**Unadjusted Benchmark Replacement**" means the SOFR Replacement prior to the application of any SOFR Replacement Adjustment.

- (5) Additional Provisions applicable where "€STR" is specified as the Reference Rate in the relevant Issue Terms:

Effect of €STR Transition Event on Securities

If the Principal Paying Agent or the Calculation Agent, as applicable, failing which the Issuer, determines at any time prior to the €STR Reference Time on any TARGET2 Business Day that a €STR Transition Event and the related €STR Replacement Date have occurred, then the Principal Paying Agent or the Calculation Agent, as applicable, will appoint an agent (the "**Replacement Rate Determination Agent**") which will determine the €STR Replacement. The Replacement Rate Determination Agent may be (x) a leading bank, broker-dealer or benchmark agent in the principal financial centre of the Specified Currency as appointed by the Calculation Agent, (y) the Issuer, (z) an affiliate of the Issuer or the Calculation Agent or (aa) such other entity that the Calculation Agent determines to be competent to carry out such role. In connection with the determination of the €STR Replacement:

TERMS AND CONDITIONS OF THE SECURITIES

- (a) the €STR Replacement will replace the then-current €STR Benchmark for all purposes relating to the relevant Securities in respect of such determination on such date and all determinations on all subsequent dates;
- (b) the Replacement Rate Determination Agent may make €STR Replacement Conforming Changes with respect to the relevant Securities from time to time;
- (c) any determination, decision or election that may be made by the Replacement Rate Determination Agent pursuant to this General Condition 4(b)(iv)(4), including any determination with respect to a tenor, rate or adjustment or of the occurrence or non- occurrence of an event, circumstance or date and any decision to take or refrain from taking any action or any selection, in each case, solely with respect to the relevant Securities, will be conclusive and binding absent manifest error, will be made by the Replacement Rate Determination Agent acting in good faith and a commercially reasonable manner;
- (d) to the extent that there is any inconsistency between this Condition and any other General Condition, this General Condition 4(b)(iv)(5) shall prevail with respect to any Securities for which the Rate of Interest is calculated in accordance with this General Condition 4(b)(iv)(5);
- (e) the Calculation Agent may determine that it is appropriate for a €STR Replacement to replace the then-current €STR Benchmark and apply any €STR Replacement Conforming Changes in respect of any subsequent €STR Transition Event; and
- (f) where a €STR Transition Event or details of it are announced prior to the relevant €STR Replacement Date then the Replacement Rate Determination Agent may on or after such earlier announcement date give notice to Securityholders in accordance with General Condition 13 of the relevant changes which will be made to the Securities provided that such changes will only take effect as of the €STR Replacement Date.

No €STR Transition Event has occurred and the €STR Benchmark is unavailable

If, by the relevant €STR Reference Time on a relevant determination date, the €STR Benchmark is unavailable in respect of such determination date and a €STR Transition Event has not occurred, then the rate for such determination date will be the €STR Benchmark, where applicable, of the Corresponding Tenor, as provided by the administrator of the €STR Benchmark and published by an alternative authorised distributor or by or on behalf of the administrator of the €STR Benchmark itself. If no such rate has been published by 5.00 p.m. (Frankfurt time), then the rate for such determination date will be the rate determined by the Calculation Agent to be a commercially reasonable alternative for the €STR Benchmark by applying one of the following rates:

- (1) a rate formally recommended for use by the administrator of the €STR Benchmark;
or
- (2) a rate formally recommended for use by the Relevant Governmental Body or any other supervisor which is responsible for supervising the €STR Benchmark or the administrator of the €STR Benchmark,

in each case, during the period of non-publication of the €STR Benchmark and for so long as a €STR Transition Event has not occurred. If a rate described in sub-paragraph (1) is available, the Calculation Agent shall apply that rate. If no such rate is available but a rate described in sub-paragraph (2) is available, the Calculation Agent shall apply that rate. If neither a rate described in sub-paragraph (1) nor a rate described in sub-paragraph (2) is available, then the Calculation Agent shall determine a commercially reasonable alternative for the €STR Benchmark taking into account where available any rate implemented by central counterparties and/or futures exchanges, in each case with trading volumes in derivatives or futures referencing the €STR Benchmark that the Calculation Agent considers sufficient for that rate to be a representative alternative rate.

TERMS AND CONDITIONS OF THE SECURITIES

Notwithstanding any other definitions to the contrary in these General Conditions, the following definitions shall apply with respect to this General Condition 4(b)(iv)(5):

"Corresponding Tenor" with respect to a €STR Replacement means a tenor (including overnight) having approximately the same length (disregarding business day adjustment) as the applicable tenor for the then-current €STR Benchmark.

"€STR Benchmark" means, initially, Compounded Daily €STR (as defined in General Condition 4(b)(iv)(4)(A) above) of the appropriate tenor (if applicable); provided that if a €STR Transition Event and its related €STR Replacement Date have occurred with respect to Compounded Daily €STR, or the then-current €STR Benchmark, then "€STR Benchmark" means the applicable €STR Replacement.

"€STR Reference Time" with respect to any determination of the €STR Benchmark means 11:00 am (Brussels time) on the TARGET2 Business Day immediately following the date of such determination.

"€STR Replacement" means the first alternative set forth in the order below that can be determined by the Replacement Rate Determination Agent as of the €STR Replacement Date:

- (1) the ISDA Fallback Rate;
- (2) the alternative rate of interest that has been selected or recommended by the Relevant Governmental Body as the replacement for the then-current €STR Benchmark, where applicable for the applicable Corresponding Tenor; or
- (3) the alternative rate of interest that has been selected by the Replacement Rate Determination Agent as the replacement for the then-current €STR Benchmark, where applicable for the applicable Corresponding Tenor, giving due consideration to any industry-accepted rate of interest as a replacement for the then-current €STR Benchmark for floating rate Securities denominated in the currency of the €STR Benchmark (the **"Relevant Benchmark Currency"**) calculated at such time.

"€STR Replacement Conforming Changes" means, with respect to any €STR Replacement, any technical, administrative or operational changes (including, but not limited to, timing and frequency of determining rates with respect to each interest period and making payments of interest, rounding of amounts or tenors, day count fractions, business day convention, amendments to any other Condition and other administrative matters) that the Replacement Rate Determination Agent decides may be appropriate to reflect the adoption of such €STR Replacement in a manner substantially consistent with market practice (or, if the Replacement Rate Determination Agent determines that adoption of any portion of such market practice is not administratively feasible or if the Replacement Rate Determination Agent determines that no market practice for use of the €STR Replacement exists, in such other manner as the Replacement Rate Determination Agent or the Calculation Agent, as the case may be, determines is reasonably necessary, acting in good faith and in a commercially reasonable manner).

"€STR Replacement Date" means the earliest to occur of the following events with respect to the then-current €STR Benchmark:

- (1) in the case of paragraph (1) or (2) of the definition of "€STR Transition Event", the later of (a) the date of the public statement or publication of information referenced therein and (b) the date on which the administrator of the €STR Benchmark permanently or indefinitely ceases to provide such €STR Benchmark; or
- (2) in the case of paragraph (3) of the definition of "€STR Transition Event", the date of the public statement or publication of information referenced therein,

for the avoidance of doubt, if the event giving rise to the €STR Replacement Date occurs on the same day as, but earlier than, the €STR Reference Time in respect of any determination, the €STR Replacement Date will be deemed to have occurred prior to the €STR Reference Time for such determination.

TERMS AND CONDITIONS OF THE SECURITIES

"**€STR Transition Event**" means the occurrence of one or more of the following events with respect to the then-current €STR Benchmark:

- (1) a public statement or publication of information by or on behalf of the administrator of the €STR Benchmark announcing that the administrator has ceased or will cease to provide the €STR Benchmark permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the €STR Benchmark;
- (2) a public statement or publication of information by the regulatory supervisor for the administrator of the €STR Benchmark, the central bank for the currency of the €STR Benchmark, an insolvency official with jurisdiction over the administrator for the €STR Benchmark, a resolution authority with jurisdiction over the administrator for the €STR Benchmark or a court or an entity with similar insolvency or resolution authority over the administrator for the €STR Benchmark, which states that the administrator of the €STR Benchmark has ceased or will cease to provide the €STR Benchmark permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the €STR Benchmark; or
- (3) a public statement or publication of information by the regulatory supervisor for the administrator of the €STR Benchmark announcing that the €STR Benchmark is no longer, or as of a specified future date will no longer be, representative of the underlying market and economic reality that such benchmark is intended to measure and that representativeness will not be restored, the €STR Benchmark has been or will be prohibited from being used or that its use has been or will be subject to restrictions or adverse consequences, either generally or in respect of the Securities.

"**ISDA Definitions**" means, unless otherwise specified in the applicable Issue Terms, the 2006 ISDA Definitions published by the international Swaps and Derivatives Association, Inc. ("**ISDA**") or any successor thereto as amended or supplemented from time to time up to the Issue Date of the first Tranche of such Securities (the "**2006 ISDA Definitions**"); provided that if "2021 ISDA Definitions" is specified in the applicable Issue Terms, ISDA Definitions means the 2021 ISDA Definitions published by ISDA or any successor thereto as amended or supplemented from time to time up to the Issue Date of the first Tranche of such Securities (the "**2021 ISDA Definitions**");

"**ISDA Fallback Adjustment**" means the spread adjustment (which may be a positive or negative value or zero) that would apply for derivatives transactions referencing the ISDA Definitions to be determined upon the occurrence of a €STR Transition Event with respect to the €STR Benchmark for the applicable tenor.

"**ISDA Fallback Rate**" means the rate that would apply for derivatives transactions referencing the ISDA Definitions to be effective upon the occurrence of a €STR Transition Event with respect to the €STR Benchmark for the applicable tenor excluding the applicable ISDA Fallback Adjustment.

"**Relevant Governmental Body**" means the European Central Bank (including any board thereof) or any committee officially endorsed and/or convened thereby.

- (v) Determination of Rate of Interest and Calculation of Interest Amount

The Principal Paying Agent will, on or as soon as practicable after each date on which the Rate of Interest is to be determined (the "**Interest Determination Date**"), determine the Rate of Interest (subject to any Minimum Interest Rate or Maximum Interest Rate specified in the Issue Terms) for the relevant Interest Period.

Subject to the Payout Conditions, the Principal Paying Agent will calculate the amount of interest (the "**Interest Amount**") payable on the Securities for the relevant Interest Period by applying the Rate of Interest to:

TERMS AND CONDITIONS OF THE SECURITIES

- (A) in the case of Floating Rate Securities and Reference Item Linked Interest Securities which are represented by a Global Security, the aggregate outstanding nominal amount of the Securities represented by such Global Security (or, if they are Partly Paid Securities, the aggregate amount paid up); or
- (B) in the case of each Floating Rate Security, Reference Item Linked Interest Security and Combination Interest Security in definitive form, the Calculation Amount (subject to General Condition 4(f)),

and, in each case, multiplying such sum by (i) the Day Count Fraction (as defined in General Condition 4(j) below) specified in the Issue Terms and (ii) where an Interest Leverage Multiplier is specified as "Applicable" in the Issue Terms, the Interest Leverage Multiplier specified in the Issue Terms, and rounding the resultant figure to the nearest sub-unit (defined above) of the relevant Specified Currency, one half of such a sub-unit being rounded upwards or otherwise in accordance with applicable market convention.

Where the Specified Denomination of a Floating Rate Security and Reference Item Linked Interest Security in definitive form comprises more than one Calculation Amount, the Interest Amount payable in respect of such Security shall be the aggregate of the amounts (determined in the manner provided above) for each Calculation Amount (subject to General Condition 4(f)) comprising the Specified Denomination without any further rounding.

- (vi) Minimum and/or Maximum Interest Rate

If the Issue Terms specifies a Minimum Interest Rate for any Interest Period, then in the event that the Rate of Interest in respect of such Interest Period determined in accordance with the provisions of subparagraphs (ii), (iii), (iv) or (v) above or (d) below (as appropriate) is less than such Minimum Interest Rate, the Rate of Interest for such Interest Period shall be such Minimum Interest Rate. If the Issue Terms do not specify a Minimum Interest Rate for any Interest Period, then the Rate of Interest for such Interest Period shall not be less than zero.

If the Issue Terms specifies a Maximum Interest Rate for any Interest Period, then in the event that the Rate of Interest in respect of such Interest Period determined in accordance with the provisions of subparagraphs (ii), (iii), (iv) or (v) above or (d) below (as appropriate) is greater than such Maximum Interest Rate, the Rate of Interest for such Interest Period shall be such Maximum Interest Rate.

- (vii) Linear Interpolation

Where Linear Interpolation and Screen Rate Determination is specified as applicable in respect of an Interest Period in the applicable Issue Terms, the Rate of Interest for such Interest Period shall be calculated by the Principal Paying Agent by straight line linear interpolation by reference to two rates based on the relevant Reference Rate in the applicable Issue Terms, one of which shall be determined as if the Designated Maturity were the period of time for which rates are available next shorter than the length of the relevant Interest Period and the other of which shall be determined as if the Designated Maturity were the period of time for which rates are available next longer than the length of the relevant Interest Period provided however that if there is no rate available for a period of time next shorter or, as the case may be, next longer, then the Principal Paying Agent shall determine such rate at such time and by reference to such sources as it determines appropriate.

"Designated Maturity" means, in relation to Screen Rate Determination, the period of time designated in the Reference Rate.

- (viii) Notification of Rate of Interest and Interest Amount

The Principal Paying Agent will cause the Rate of Interest and each Interest Amount for each Interest Period and the relevant Interest Payment Date to be notified to the Issuer, the Guarantor (if applicable), and, if applicable, to the stock exchange on which the relevant Securities are for the time being listed. In addition, the Principal Paying Agent shall publish or cause to be published such Rate of Interest, Interest Amount and Interest Payment Date in accordance with General Condition 13 as soon as possible after their determination but in no event later than the fourth Business Day thereafter. Each Rate of Interest, Interest Amount and Interest Payment Date so notified may subsequently be amended (or appropriate alternative

TERMS AND CONDITIONS OF THE SECURITIES

arrangements made by way of adjustment) in the event of an extension or shortening of the Interest Period. Any such amendment will be promptly notified to each stock exchange on which the relevant Securities are for the time being listed and to the Securityholders in accordance with General Condition 13.

(ix) Certificates to be Final

All certificates, communications, determinations, calculations and decisions made for the purposes of the provisions of this paragraph (b), by the Principal Paying Agent, shall (in the absence of wilful default, bad faith or manifest error) be binding on the Issuer, the Guarantor (if applicable), the Principal Paying Agent, the other Paying Agents and all Securityholders, and (in the absence as aforesaid) no liability to the Securityholders shall attach to the Principal Paying Agent, in connection with the exercise or non-exercise by it of its powers, duties and discretions pursuant to such provisions.

(c) Interest on Specified Interest Amount Securities

Each Specified Interest Amount Security shall bear interest at an amount per Calculation Amount equal to the Specified Interest Amount as so specified in the Specified Interest Amount provisions of the Issue Terms which shall be payable on the relevant Specified Interest Payment Date(s) also specified thereon, adjusted, where applicable for any Business Day Convention. For the avoidance of doubt, different Specified Interest Amounts may be payable in respect of Specified Interest Payment Dates. In respect of Credit Linked Securities only, the Specified Interest shall be multiplied by the Specified Interest Amount Multiplier as so specified in the Specified Interest Amount provisions of the Issue Terms. If the Specified Interest Amount Multiplier is specified in the Issue Terms as "Not applicable" the Specified Interest Amount Multiplier shall be deemed to be equal to 1.

(d) Zero Coupon Securities

Where a Zero Coupon Security becomes due and repayable prior to the Maturity Date and is not paid when due, the amount due and repayable shall be the amount determined in accordance with General Condition 6(f)(i) as its Early Redemption Amount. As from the Maturity Date, any overdue principal of such Security shall bear interest at a rate per annum equal to the Accrual Yield specified in the Issue Terms. Such interest shall continue to accrue (as well after as before any judgment) until the day on which all sums due in respect of such Security up to that day are received by or on behalf of the holder of such Security. Such interest will be calculated on the basis of a 360 day year consisting of 12 months of 30 days each and in the case of an incomplete month the actual number of days elapsed in such incomplete month or on such other basis as may be specified in the Issue Terms.

(e) Interest on Reference Item Linked Interest Securities

In the case of Reference Item Linked Interest Securities, where the Rate of Interest and/or the Interest Amount (whether on any Interest Payment Date, early redemption, maturity or otherwise) is to be determined by reference to one or more Reference Items, the Rate of Interest and/or the Interest Amount shall be determined where applicable as provided in the Payout Annex.

(f) Interest on Partly Paid Securities

In the case of Partly Paid Securities (other than Partly Paid Securities which are Zero Coupon Securities) interest will accrue as aforesaid on the paid-up nominal amount of such Securities.

(g) Interest Payments and Accrual of Interest

Interest will be paid subject to and in accordance with the provisions of General Condition 4. Interest will cease to accrue on each Security (or, in the case of the redemption of part only of a Security, that part only of such Security) on the due date for redemption thereof unless otherwise provided in these General Conditions or any Annex and otherwise unless, upon due presentation thereof, payment of principal or the payment, and/or delivery of the Entitlement as set out in the Issue Terms (if applicable), is improperly withheld or refused, in which event interest will continue to accrue (as well after as before any judgment) at the Fixed Rate or, as the case may be, the Rate of Interest at such day count fraction as the Principal Paying Agent determines appropriate or as otherwise provided in the Issue Terms until whichever is the earlier of (i) the day on which all sums due and/or assets comprised in the Entitlement in respect of such Security up to that day are received by or on behalf of the holder of such Security and (ii) the day on which the Principal Paying Agent or any agent appointed by the Issuer to deliver such assets to Securityholders has notified the holder thereof (either in accordance

TERMS AND CONDITIONS OF THE SECURITIES

with General Condition 13 or individually) of receipt of all sums due and/or assets comprised in the Entitlement in respect thereof up to that date (subject, in the case of Credit Linked Securities to which Credit Linked Interest is applicable, to the provisions of Credit Linked Condition 5).

(h) Calculation Agent

(ii) If a Calculation Agent is specified in the Issue Terms, any determination specified in General Conditions 4(b) to (g) (inclusive) as being determinations to be made by the Principal Paying Agent will instead be made by the Calculation Agent as if references to the Principal Paying Agent in such General Conditions (and related provisions of the Agency Agreement) were to the Calculation Agent. The Calculation Agent will notify any amount of interest to the Principal Paying Agent as soon as reasonably practicable following its determination.

(iii) A Calculation Agent must be appointed for the determination of the Rate of Interest where such determination is other than a single determination of the Rate of Interest for each Interest Period that is made in accordance with this General Condition 4 and the related provisions of the Agency Agreement and without the imposition of any additional duties on the Principal Paying Agent.

(i) Benchmark

Where an Administrator/Benchmark Event (as defined in General Condition 6(l)) occurs in respect of a Benchmark which is used in whole or in part to calculate interest under General Condition 4, the Calculation Agent shall elect to take one of the actions described in General Condition 6(l).

5. Payments, Physical Delivery and Exchange of Talons

For the purposes of this General Condition 5, references to payment or repayment (as the case may be) of principal and/or interest and other similar expressions shall, where the context so admits, be deemed also to refer to delivery of any Entitlement(s).

(a) Method of Payment

(i) Registered Securities

Payments of principal (other than instalments of principal prior to the final instalment) in respect of each Registered Security (whether or not in global form) will be made against presentation and surrender (or, in the case of part payment of any sum due, endorsement) of the Registered Security at the specified office of the Registrar or any of the Paying Agents. Such payments will be made by transfer to the Designated Account (as defined below) of the holder (or the first named of joint holders) of the Registered Security appearing in the Register (i) where in a global form, at the close of the business day (being for this purpose a day on which Euroclear, Clearstream, Luxembourg and/or any other relevant Clearing System are open for business) before the relevant due date, and (ii) where in definitive form, at the close of business on the third business day (being for this purpose a day on which banks are open for business in the city where the specified office of the Registrar is located) before the relevant due date (the "**Record Date**"). Notwithstanding the previous sentence, if (i) a holder does not have a Designated Account or (ii) the nominal amount of the Securities held by a holder is less than US\$250,000 (or integral multiples of US\$1,000 in excess thereof) (or its approximate equivalent in any other currency), payment will instead be made by a cheque in the relevant currency of payment drawn on a Designated Bank (as defined below). For these purposes, "**Designated Account**" means the account (which, in the case of a payment in Japanese yen to a non-resident of Japan, shall be a non-resident account) maintained by a holder with a Designated Bank and identified as such in the Register and "**Designated Bank**" means (in the case of payment in a currency other than euro) a bank in the principal financial centre of the country of such currency (which, if such currency is Australian dollars or New Zealand dollars, shall be Sydney and Auckland, respectively) and (in the case of a payment in euro) any bank which processes payments in euro.

Payments of interest and payments of instalments of principal (other than the final instalment) in respect of each Registered Security (whether or not in global form) will be made by a cheque in the currency of payment drawn on a Designated Bank and mailed by uninsured mail on the business day in the city where the specified office of the Registrar is located immediately preceding the relevant due date to the holder (or the first named of joint holders) of the Registered Security appearing in the Register (i) where in a global form, at the close of the business day (being for this purpose a day on which Euroclear, Clearstream, Luxembourg and/or any other relevant Clearing System are open for business) before the relevant due date, and (ii) where in definitive form, at the close of business on the fifteenth day (whether or not such fifteenth day is a business day) before the Record Date at his address shown in the Register on the Record Date and at his risk. Upon application of the holder to the specified office of the Registrar not less than three business days in the city where the specified office of the Registrar is located before the due date for any payment of interest in respect of a Registered Security, the payment may be made by transfer on the due date in the manner provided in the preceding paragraph. Any such application for transfer shall be deemed to relate to all future payments of interest (other than interest due on redemption) and instalments of principal (other than the final instalment) in respect of the Registered Securities which become payable to the holder who has made the initial application until such time as the Registrar is notified in writing to the contrary by such holder. Any amount so deducted will be paid in the manner mentioned above against surrender of the relevant missing Coupon within a period of 10 years from the Relevant Date (as defined in General Condition 7) for the payment of such sum due for payment, whether or not such Coupon has become void pursuant to General Condition 10 or, if later, five years from the due date for payment of such Coupon. TERMS AND CONDITIONS OF THE SECURITIES

The relevant Clearing System, Delivery Agent, Registrar or Paying Agent, as applicable, shall use its reasonable efforts as soon as reasonably practicable to notify the Securityholder submitting an Asset Transfer Notice or, if, in consultation with the Principal Paying Agent, it has determined that such Asset Transfer Notice is incomplete or not in proper form. In the absence of negligence or wilful misconduct on its part, none of the Issuer, the Guarantor, the Paying Agents or the relevant Clearing System shall be liable to any person with respect to any action taken or omitted to be taken by it in connection with such determination or the notification of such determination to a Securityholder.

No Asset Transfer Notice may be withdrawn after receipt thereof by the relevant Clearing System, the Registrar, the Delivery Agent or a Paying Agent, as the case may be, as provided above. After delivery of an Asset Transfer Notice, the relevant Securityholder may not transfer the Securities which are the subject of such notice.

The Entitlement will be delivered on the date fixed for redemption (such date, subject to adjustment in accordance with this General Condition 5(b)(i)(B), the "**Delivery Date**") or (in the case of Credit Linked Securities to which Credit Linked Redemption is applicable) Delivered on the Credit Settlement Date, in each case at the risk of the relevant Securityholder in the manner provided below and provided that, in each case, the Asset Transfer Notice, is duly delivered as provided above not later than the close of business in each place of reception on the Cut-Off Date.

Fractions of the Relevant Asset or of each of the Relevant Assets, as the case may be, will not be delivered and in lieu thereof a cash adjustment calculated by the Calculation Agent in its sole and absolute discretion shall be paid to the Securityholder.

Following the Delivery Date or Credit Settlement Date in respect of a share forming part of the Entitlement, all dividends on the relevant shares to be delivered will be payable to the relevant party according to market practice assuming a sale of the shares has been executed on the Delivery Date or Credit Settlement Date. Any such dividends to be paid to a Securityholder will be paid to the account specified by the Securityholder in the relevant Asset Transfer Notice as referred to in General Condition 5(b)(i)(A).

For such period of time after delivery or Delivery of the Entitlement until the Delivery Date or the Credit Settlement Date (the "**Intervening Period**"), none of the Issuer, the Guarantor (if applicable), the Paying Agents, the Registrar, any Delivery Agent or any other person shall at any time (i) be under any obligation to deliver or procure delivery to any Securityholder any letter, certificate, notice, circular or any other document or, except as provided herein, payment whatsoever received by that person in respect of such securities, obligations or Deliverable Obligations, (ii) be under any obligation to exercise or procure exercise of any or all rights attaching to such securities, obligations or Deliverable Obligations or (iii) be under any liability to a Securityholder in respect of any loss or damage which such Securityholder may sustain or suffer as a result, whether directly or indirectly, of that person being registered during such Intervening Period as legal owner of such securities, obligations or Deliverable Obligations.

(D) Settlement Disruption

The provisions of this General Condition 5(b)(i)(D) apply to Securities other than Credit Linked Securities to which Credit Linked Redemption is applicable.

If, in the opinion of the Calculation Agent, delivery of the Entitlement in such commercially reasonable manner as the Calculation Agent has determined is not practicable by reason of a Settlement Disruption Event other than a Relevant Asset Redemption Event (each as defined below) having occurred and continuing on the Delivery Date, then the Delivery Date shall be postponed to the first following Settlement Business Day in respect of which there is no such Settlement Disruption Event, provided that, the Issuer may elect in its sole discretion to satisfy its obligations in respect of the relevant Security by delivering the Entitlement using such other commercially reasonable manner as it may select and in such event the Delivery Date shall be such day as the Issuer deems appropriate in connection with delivery of the Entitlement in such other commercially reasonable manner. Following the occurrence of a Relevant Asset Redemption Event, the Entitlement Amount shall be deemed to be a cash amount equal to the proceeds of redemption of the Entitlement specified in the Issue Terms less (where 'Unwind Costs' are specified as being applicable in the Issue Terms), an amount equal to all Unwind Costs (as defined below), as determined by the Calculation Agent and notified to the Securityholders in accordance with General Condition 13. For the avoidance of doubt, where a Settlement Disruption Event affects some but not all of the Relevant Assets comprising the Entitlement, the Delivery Date for the Relevant Assets not affected by the Settlement Disruption Event will be the originally designated Delivery Date.

TERMS AND CONDITIONS OF THE SECURITIES

For so long as delivery of the Entitlement is not practicable by reason of a Settlement Disruption Event other than a Relevant Asset Redemption Event, then in lieu of physical settlement and notwithstanding any other provision hereof the Issuer may elect in its sole discretion to satisfy its obligations in respect of the relevant Security by payment to the relevant Securityholder of the Disruption Cash Redemption Amount (as defined below) on the fifth Business Day following the date that notice of such election is given to the Securityholders in accordance with General Condition 13. Payment of the Disruption Cash Redemption Amount will be made in such manner as shall be notified to the Securityholders in accordance with General Condition 13. The Calculation Agent shall give notice as soon as practicable to the Securityholders in accordance with General Condition 13 that a Settlement Disruption Event has occurred.

No Securityholder shall be entitled to any payment in respect of the relevant Security in the event of any delay in the delivery of the Entitlement due to the occurrence of a Settlement Disruption Event and no liability in respect thereof shall attach to the Issuer.

For the purposes hereof:

"Affiliate" means in relation to any entity (the **"First Entity"**), any entity controlled, directly or indirectly, by the First Entity, any entity that controls, directly or indirectly, the First Entity or any entity directly or indirectly under common control with the First Entity. For these purposes, control means ownership of a majority of the voting power of an entity;

"Disruption Cash Redemption Amount" means, in respect of any relevant Security, the fair market value of such Security (taking into account, where the Settlement Disruption Event affected some but not all of the Relevant Assets comprising the Entitlement and such non affected Relevant Assets have been duly delivered as provided above, the value of such Relevant Assets) less the cost to the Issuer and/or its affiliates of unwinding any underlying related hedging arrangements, all as determined by the Issuer in its sole and absolute discretion;

"Hedging Arrangements" means any transaction(s), asset(s) or trading position(s) the Issuer and/or any of its Affiliates or agents may enter into or hold from time to time (including, if applicable, on a portfolio basis) to hedge directly or indirectly and whether in whole or in part the credit or other price risk of the Issuer issuing and performing its obligations with respect to the Securities.

"Relevant Asset Redemption Event" means, in respect of a Relevant Asset which is specified in the Issue Terms to be a debt obligation in the form of a bond, that the Relevant Asset has been redeemed for any reason, on or prior to the Maturity Date of the Securities;

"Settlement Business Day" has the meaning specified in the Issue Terms;

"Settlement Disruption Event" means, in the opinion of the Calculation Agent, an event beyond the control of the Issuer or the Guarantor, as the case may be, as a result of which the Issuer or the Guarantor, as the case may be, cannot make delivery of the Relevant Asset(s) using the method specified in the Conditions and/or the Issue Terms; and

"Unwind Costs" means the amount specified in the Issue Terms (if any) or if "Standard Unwind Costs" are specified in the Issue Terms, an amount determined by the Calculation Agent equal to the aggregate sum of (without duplication) all costs (including loss of funding), fees, charges, expenses, tax and duties incurred by the Issuer and/or any of its Affiliates in connection with the redemption of the Relevant Assets and the Securities and the related termination, settlement or re-establishment of any Hedging Arrangements.

- (E) Failure to Deliver due to Illiquidity

TERMS AND CONDITIONS OF THE SECURITIES

The provisions of this General Condition 5(b)(i)(E) apply to the Securities other than Credit Linked Securities to which Credit Linked Redemption is applicable.

If "Failure to Deliver due to Illiquidity" is specified as applying in the Issue Terms and, in the opinion of the Calculation Agent, it is impossible or impracticable to deliver, when due, some or all of the Relevant Assets (the "**Affected Relevant Assets**") comprising the Entitlement, where such failure to deliver is due to illiquidity in the market for the Relevant Assets (a "**Failure to Deliver due to Illiquidity**"), then:

- (1) subject as provided elsewhere in the Conditions, any Relevant Assets which are not Affected Relevant Assets, will be delivered on the originally designated date of redemption in accordance with this General Condition (b); and
- (2) in respect of any Affected Relevant Assets, in lieu of physical settlement and notwithstanding any other provision hereof the Issuer may elect in its sole discretion to satisfy its obligations in respect of the relevant Security by payment to the relevant Securityholder of the Failure to Deliver Redemption Amount (as defined below) on the fifth Business Day following the date that notice of such election is given to the Securityholders in accordance with General Condition 13. Payment of the Failure to Deliver Redemption Amount will be made in such manner as shall be notified to the Securityholders in accordance with General Condition 13. The Calculation Agent shall give notice as soon as practicable to the Securityholders in accordance with General Condition 13 that the provisions of this General Condition 5(b)(i)(E) apply.

For the purposes hereof, "**Failure to Deliver Redemption Amount**" means, in respect of any relevant Security, the fair market value of such Security (taking into account, the Relevant Assets comprising the Entitlement which have been duly delivered as provided above, the value of such Relevant Assets), less the cost to the Issuer and/or any of its Affiliates of unwinding any underlying related hedging arrangements, all as determined by the Issuer in its sole and absolute discretion.

(ii) Variation of Settlement

If the Issue Terms indicate that the Issuer has an option to vary settlement in respect of the Securities, the Issuer may at its sole and unfettered discretion in respect of each such Security, elect not to pay the relevant Securityholders the Final Redemption Amount or to deliver or procure delivery of the Entitlement to the relevant Securityholders, as the case may be, but, in lieu thereof to deliver or procure delivery of the Entitlement or make payment of the Final Redemption Amount on the Maturity Date to the relevant Securityholders, as the case may be. Notification of such election will be given to Securityholders in accordance with General Condition 13 and the provisions of General Condition 5(b) (*Physical Delivery*) shall apply accordingly. Where so specified in the Issue Terms, the Issuer shall give not less than the minimum period of notice and/or not more than the maximum period of notice.

(iii) Issuer's Option to Substitute Assets or to pay the Alternate Cash Redemption Amount

Notwithstanding any provision of these General Conditions to the contrary, the Issuer may, in its sole and absolute discretion in respect of Securities to which this General Condition 5(b) applies, if the Calculation Agent determines (in its sole and absolute discretion) that the Relevant Asset or Relevant Assets, as the case may be, comprises assets which are not freely tradable, elect either (i) to substitute for the Relevant Asset or the Relevant Assets, as the case may be, an equivalent value (as determined by the Calculation Agent in its sole and absolute discretion) of such other assets which the Calculation Agent determines, in its sole and absolute discretion, are freely tradable (the "**Substitute Asset**" or the "**Substitute Assets**", as the case may be) or (ii) not to deliver or procure the delivery of the Entitlement or the Substitute Asset or Substitute Assets, to the relevant Securityholders, but in lieu thereof to make payment to the relevant Securityholder on the Delivery Date of an amount equal to the fair market value of the Entitlement on or about the time of so electing as determined by the Calculation Agent in its sole and absolute discretion by reference to such sources as it

TERMS AND CONDITIONS OF THE SECURITIES

considers appropriate (the "**Alternate Cash Redemption Amount**"). Notification of any such election will be given to Securityholders in accordance with General Condition 13 and in the event that the Issuer elects to pay the Alternate Cash Redemption Amount such notice shall give details of the manner in which such amount shall be paid.

For purposes hereof, a "**freely tradable**" security shall mean (i) with respect to the United States, a security which is registered under the Securities Act or not restricted under the Securities Act and which is not purchased from the issuer of such security and not purchased from an affiliate of the issuer of such security or which otherwise meets the requirements of a freely tradable security for purposes of the Securities Act, in each case, as determined by the Calculation Agent in its sole and absolute discretion or (ii) with respect to any other jurisdiction, a security not subject to any legal restrictions on transfer in such jurisdiction.

(iv) Rights of Securityholders and Calculations

None of the Issuer, the Guarantor (if applicable), the Calculation Agent, any Delivery Agent and the Agents shall have any responsibility for any errors or omissions in any calculation or determination in respect of the Securities.

The purchase of Securities does not confer on any holder of such Securities any rights (whether in respect of voting, distributions or otherwise) attaching to any Relevant Asset.

(v) For the purposes of the General Conditions:

"**Affiliate**" means in relation to any entity (the "**First Entity**"), any entity controlled, directly or indirectly, by the First Entity, any entity that controls, directly or indirectly, the First Entity or any entity directly or indirectly under common control with the First Entity. For these purposes, control means ownership of a majority of the voting power of an entity; and

"**Assessed Value Payment Amount**" means, in respect of a Security, an amount determined by the Calculation Agent to be the fair market value of the assets comprised in the Entitlement in respect of such Security less the cost to the Issuer and/or its Affiliates of unwinding any underlying relating hedging arrangements, all as determined by the Issuer.

6. Redemption and Purchase

(a) Final Redemption

Unless previously redeemed or purchased and cancelled as provided below, each Security (other than a Credit Linked Security to which Credit Linked Redemption is applicable) will be redeemed by the Issuer at its relevant Final Redemption Amount in the Specified Currency on the Maturity Date specified in the Issue Terms or, if (i) Physical Settlement is specified as applicable in the Issue Terms (each such Security a "**Physical Delivery Security**") or (ii) Variation Settlement is specified as applicable in the Issue Terms and the Issuer exercises such option, by delivery of the Entitlement (as provided in General Condition 5(b) above) on the Delivery Date. Securities may not be redeemed other than in accordance with these General Conditions and any applicable Annex.

The "**Final Redemption Amount**" shall be, unless specified otherwise in the applicable Issue Terms, an amount in respect of each Calculation Amount, equal to the Calculation Amount multiplied by: (i) the percentage, or (ii) the Final Payout specified in the Issue Terms. For the avoidance of doubt, if the Final Payout is zero or negative, no amount shall be payable on the final redemption of the Security.

The "**Entitlement**", in respect of each Calculation Amount, shall be a quantity of the Relevant Asset(s) (and any cash amount to be delivered as a result of rounding down) specified in the Issue Terms equal to the Entitlement Amount specified in the Issue Terms or, in the case of Credit Linked Securities to which Credit Linked Redemption is applicable, the Deliverable Obligations to be delivered pursuant to the Credit Linked Conditions. If the Relevant Asset is specified in the Issue Terms to be a debt obligation in the form of a bond (a "**Bond Asset**"), the Entitlement in respect of each Calculation Amount, shall be a nominal amount of such Bond Asset (and any cash amount to be delivered as a result of rounding down) specified in the Issue Terms having a face value equal to the Entitlement Amount specified in the Issue Terms. In respect of any Bond Asset (i) the Calculation Agent shall make such adjustments as it, in its sole and absolute discretion determines to be necessary, to the Entitlement to be so delivered, in order to take account of any redenomination, subdivision, consolidation, reclassification or any event having a dilutive or concentrative effect on the value of the Bond Asset; or (ii) if such Bond Asset is converted into or exchanged for other securities in accordance

TERMS AND CONDITIONS OF THE SECURITIES

with the terms of any voluntary or involuntary exchange or restructuring programme, the Entitlement shall be a nominal amount of the such converted securities or securities for which the Bond Asset has been exchanged, having a face value equal to the Entitlement Amount. If the Calculation Agent determines in its sole and absolute discretion that such securities are not freely tradable, the provisions of General Condition 5(b)(iii) (*Issuer's Option to Substitute Assets or to pay the Alternate Cash Redemption Amount*) shall apply.

"**Relevant Asset(s)**" means the relevant asset(s) so specified in the Issue Terms.

(b) Redemption for tax reasons

The Securities may be redeemed at the option of the Issuer in whole, but not in part, at any time (if the Security is not a Floating Rate Security) or on any Interest Payment Date (if the Security is a Floating Rate Security), on giving not less than 30 or more than 60 days' notice to the Principal Paying Agent and, in accordance with General Condition 13, the Securityholders (which notice shall be irrevocable), if:

- (i) (A) on the occasion of the next payment due under the Securities, the Issuer has or will become obliged to pay additional amounts as provided or referred to in General Condition 7 or the Guarantor would be unable for reasons outside its control to procure payment by the Issuer and in making payment itself would be required to pay such additional amounts (as defined in General Condition 7); or (B) there is any change after the Issue Date of the Securities in the application or binding official interpretation of the applicable laws or regulations as a result of which withholding tax is applicable to the Securities, which change or amendment becomes effective on or after the issue date of the Securities; and
- (ii) in the case of (i)(A) above, such obligation to pay additional amounts cannot be avoided by the Issuer or, as the case may be, the Guarantor taking reasonable measures available to it,

provided that no such notice of redemption shall be given earlier than 90 days prior to the earliest date on which the Issuer or, as the case may be, the Guarantor would be obliged to pay such additional amounts were a payment in respect of the Securities then due.

Prior to the publication of any notice of redemption pursuant to this General Condition 6, the Issuer or, as the case may be, the Guarantor shall deliver to the Principal Paying Agent a certificate signed by two Directors of the Issuer (or if at the time that such certification is to be given the Issuer has only one Director, such certificate may be signed by such Director) or, as the case may be, by a duly authorised signatory of the Guarantor stating that the Issuer is entitled to effect such redemption and setting forth a statement of facts showing that the conditions precedent to the right of the Issuer so to redeem have occurred, an opinion of independent legal advisers of recognised standing to the effect that the Issuer or, as the case may be, the Guarantor has or will become obliged to pay such additional amounts.

Each Security redeemed pursuant to this General Condition 6(b) will be redeemed at its Early Redemption Amount referred to in General Condition 6(f) below and no further interest will be payable since the immediately preceding Interest Payment Date or, if none, the Issue Date.

(c) Redemption for Illegality

In the event that the Issuer determines in good faith that the performance of its obligations under the Securities or that any arrangements made to hedge its obligations under the Securities has or will become unlawful, illegal or otherwise prohibited in whole or in part as a result of compliance with any applicable present or future law, rule, regulation, judgment, order or directive of any governmental, administrative, legislative or judicial authority or power, or in the interpretation thereof, the Issuer having given not less than 10 nor more than 30 days' notice to the Securityholders in accordance with General Condition 13 (which notice shall be irrevocable), may, on expiry of such notice redeem all, but not some only, of the Securities, each Security being redeemed at its Early Redemption Amount referred to in paragraph (f) below and no further interest will be payable since the immediately preceding Interest Payment Date or, if none, the Issue Date.

(d) Redemption at the Option of the Issuer (Issuer Call)

If "**Issuer Call Option**" is specified as being applicable in the Issue Terms, the Issuer may, having given:

TERMS AND CONDITIONS OF THE SECURITIES

- (i) not less than 5 Business Days' (or such other notice period specified in the Issue Terms) notice to the Securityholders in accordance with General Condition 13; and
- (ii) not less than 4 days before the giving of the notice referred to in (i), notice to the Principal Paying Agent,

(which notices shall be irrevocable and shall specify the date fixed for redemption), redeem all or some only of the Securities then outstanding on any Optional Redemption Date and each at the Optional Redemption Amount(s) specified in, or determined on the Optional Redemption Valuation Date in the manner specified in, the Issue Terms together, if appropriate, with interest accrued to (but excluding) the relevant Optional Redemption Date. Any partial redemption must be of a nominal amount equal to the Minimum Redemption Amount or, if applicable, a Higher Redemption Amount as specified in the Issue Terms. In the case of a partial redemption of Securities, the Securities to be redeemed ("**Redeemed Securities**") will be selected individually by lot, in the case of Redeemed Securities represented by definitive Securities, and in accordance with the rules of Euroclear and/or Clearstream, Luxembourg (to be reflected in the records of Euroclear and Clearstream, Luxembourg as either a pool factor or a reduction in nominal amount, at their discretion) and/or DTC, in the case of Redeemed Securities represented by a Global Security, not more than 30 days prior to the date fixed for redemption (such date of selection being hereinafter called the "**Selection Date**"). In the case of Redeemed Securities represented by definitive Securities, a list of the serial numbers of such Redeemed Securities will be published in accordance with General Condition 13 not less than 15 days prior to the date fixed for redemption. The aggregate nominal amount of Redeemed Securities represented by definitive Securities shall bear the same proportion to the aggregate nominal amount of all Redeemed Securities as the aggregate nominal amount of definitive Securities outstanding bears to the Aggregate Nominal Amount of the Securities outstanding, in each case on the Selection Date, provided that the aggregate nominal amount of Redeemed Securities represented by definitive Securities shall, if necessary, be rounded downwards to the nearest integral multiple of the Specified Denomination, and the aggregate nominal amount of Redeemed Securities represented by a Global Security shall be equal to the balance of the Redeemed Securities. No exchange of the relevant Global Security will be permitted during the period from (and including) the Selection Date to (and including) the date fixed for redemption pursuant to this paragraph (d) and notice to that effect shall be given by the Issuer to the Securityholders in accordance with General Condition 13 at least five days prior to the Selection Date.

- (e) Redemption at the Option of the Securityholders (Securityholder Put)

If "**Securityholder Put Option**" is specified as being applicable in the Issue Terms, upon the holder of any Security giving to the Issuer in accordance with General Condition 13 not less than 15 or more than 30 days' notice (or such other minimum and/or maximum notice period specified in the Issue Terms) (which notice shall be irrevocable) the Issuer will, upon the expiry of such notice, redeem in whole but not in part, subject to and in accordance with the terms specified in the Issue Terms, such Security on the Optional Redemption Date and at the Optional Redemption Amount specified in, or determined on the Optional Redemption Valuation Date specified in the Issue Terms, together, if appropriate, with interest accrued to (but excluding) the Optional Redemption Date.

To exercise the right to require redemption of the Securities its holder must, if the Securities are in definitive form and held outside Euroclear and Clearstream, Luxembourg and/or DTC, deliver at the specified office of any Paying Agent (in the case of Bearer Securities) or the Registrar (in the case of Registered Securities) at any time during normal business hours of such Paying Agent or, as the case may be, the Registrar falling within the notice period, a duly completed and signed notice of exercise in the form (for the time being current) obtainable from any specified office of any Paying Agent or, as the case may be, the Registrar (a "**Put Notice**") and in which the holder must specify a bank account (or, if payment is required to be made by cheque, an address) to which payment is to be made under this General Condition 6(e) and, in the case of Registered Securities, the nominal amount thereof to be redeemed. If a Security is in definitive bearer form, the Put Notice must be accompanied by the Security or evidence satisfactory to the Paying Agent concerned that the Security will, following delivery of the Put Notice, be held to its order or under its control. If a Security is represented by a global Security or is in definitive form and held through Euroclear or Clearstream, Luxembourg and/or DTC, to exercise the right to require redemption of the Security the holder of the Security must, within the notice period, give notice to the Principal Paying Agent of such exercise in accordance with the standard procedures of Euroclear and Clearstream, Luxembourg and/or DTC (which may include notice being given on his instruction by Euroclear or Clearstream, Luxembourg and/or DTC or any common depository for them to the Principal Paying Agent by electronic means) in a form acceptable

TERMS AND CONDITIONS OF THE SECURITIES

to Euroclear and Clearstream, Luxembourg and/or DTC from time to time, and, if a Security is a Bearer Security represented by a global Security, at the same time present or procure the presentation of the relevant global Security to the Principal Paying Agent for notation accordingly. Any Put Notice or other notice given in accordance with the standard procedures of Euroclear, and/or Clearstream Luxembourg and/or DTC given by a holder of any Security pursuant to this General Condition 6(e) shall be irrevocable except where prior to the due date of redemption an Event of Default has occurred and is continuing in which event such holder, at its option, may elect by notice to the Issuer to withdraw the notice given pursuant to this General Condition 6(e) and instead to declare such Security forthwith due and payable pursuant to General Condition 9.

(f) Early Redemption

For the purposes of General Condition 6 (b), (c), and (k), General Condition 9 and any circumstances where the Securities are to be redeemed prior to their Maturity Date at their Early Redemption Amount (as defined below), each Security will be redeemed at an amount (the "**Early Redemption Amount**") calculated as follows, unless specified otherwise in the Issue Terms, and no further interest will be payable since the immediately preceding Interest Payment Date or, if none, the Issue Date:

- (i) in the case of any Security at an amount determined by the Calculation Agent on the second Business Day immediately preceding the due date for the early redemption of the Securities, representing such Security's *pro rata* share of (a) the fair market value of such Securities taking into account all factors which the Calculation Agent determines relevant (including, if applicable, any interest provision of the Security, the event which resulted in such redemption and, if they are Partly Paid Securities, the aggregate amount paid up) less (b) all costs incurred by the Issuer, the Guarantor or any of its Affiliates in connection with such early redemption, including, without limitation, any costs associated with unwinding any related hedging arrangements, and all other expenses related thereto, as determined by the Calculation Agent in good faith and in a commercially reasonable manner.
- (ii) For the purposes of (i)(a) above where the relevant Securities provide for any minimum amount(s) of cash or assets to be payable or deliverable this shall be taken into account in determining the fair market value. However, the Calculation Agent shall reduce (i.e. discount) the value of such amounts in determining the fair market value to take into account the length of time remaining to the first possible date on which such amount(s) would otherwise have been payable or deliverable. Such discounting may be determined by reference to such information as the Calculation Agent may select which may include risk free rate(s).

The Calculation Agent shall also take into account appropriate values for any other amount which would or could otherwise have been payable or deliverable under the relevant Securities. This may include the element of the return on the Securities determined by reference to the relevant assets or reference basis(es) to which the Securities relate (i.e. a derivative element). The relevant value for this element of the Securities may be determined by reference to the cost at the relevant time of entering into a transaction to provide similar amounts.

(g) Purchases

The Issuer, the Guarantor or any of their respective subsidiaries may at any time purchase Securities (provided that, in the case of Definitive Bearer Securities, all unmatured Receipts, Coupons and Talons appertaining thereto are purchased therewith) at any price in the open market or otherwise. Securities purchased as aforesaid may, at the option of the Issuer, the Guarantor or their respective subsidiaries, as the case may be, be held, reissued, resold or surrendered to any Paying Agent and/or the Registrar for cancellation except that all Securities in definitive form purchased by the Issuer must be surrendered for cancellation.

(h) Cancellation

All Securities which are redeemed will forthwith be cancelled (together with all unmatured Receipts, Coupons and Talons attached thereto or surrendered therewith at the time of redemption). All Securities so cancelled and any Securities purchased and cancelled pursuant to General Condition 6(g) above (together with all unmatured Receipts, Coupons and Talons cancelled therewith) shall be forwarded to the Principal Paying Agent and cannot be reissued or resold.

TERMS AND CONDITIONS OF THE SECURITIES

(i) Instalments

Unless previously redeemed or purchased and cancelled on or prior to an Instalment Date, Instalment Securities will be redeemed in the Instalment Amounts and on the Instalment Dates specified in the Issue Terms. The Instalment Amount payable on an Instalment Date shall be, unless specified otherwise in the applicable Issue Terms, an amount in respect of each Calculation Amount, which may be an amount per Calculation Amount equal to (i) Calculation Amount multiplied by an Instalment Factor (if so specified in the applicable Issue Terms) and multiplied by a Final Payout (for such purposes an "**Instalment Payout**") or (ii) in case of the last Instalment Date, the Final Redemption Amount if so specified in the applicable Issue Terms. In the case of Securities in definitive form, all instalments (other than the final instalment) will be paid by surrender of, in the case of a Definitive Bearer Security, the relevant Receipt (which must be presented with the Security to which it appertains) and, in the case of a definitive Registered Security, the relevant Security and issue of a new Security in the nominal amount remaining outstanding, all as more fully described in General Condition 5. In the case of early redemption, the Early Redemption Amount will be determined pursuant to General Condition 6(f) above.

Where the Securities are Credit Linked Securities in respect of which Instalment Amounts are payable and the Issue Terms specify that the Credit Linked Conditions shall not apply to the Instalment Amounts, such Instalment Amounts shall be paid in full on each Instalment Date specified in the Issue Terms notwithstanding the occurrence of any Credit Event Determination Date.

(j) Late payment on Zero Coupon Securities

If the amount payable in respect of any Zero Coupon Security upon redemption of such Zero Coupon Security pursuant to General Condition 6(b), (d) or (e) above is improperly withheld or refused, the amount due and repayable in respect of such Zero Coupon Security shall be the amount calculated as provided in General Condition 6(f)(ii) above as though the references therein to the date fixed for redemption or the date upon which the Zero Coupon Security becomes due and repayable were replaced by references to the date which is the earlier of:

- (i) the date on which all amounts due in respect of the Zero Coupon Security have been paid; and
- (ii) the date on which the full amount of the moneys payable has been received by the Principal Paying Agent and notice to that effect has been given to the Securityholders in accordance with General Condition 13.

(k) Partly Paid Securities

In the event that any Securityholder fails to pay a Part Payment Amount with respect to Partly Paid Securities on the due date (a "**Part Payment Default Date**"), such Partly Paid Securities held by such Securityholder shall automatically be redeemed, unless specified otherwise in the Issue Terms, on the seventh Business Day following a Part Payment Default Date, each at its Early Redemption Amount referred to in General Condition 6(f) above and no further interest will be payable from the Interest Payment Date immediately preceding such Part Payment Default Date or, if none, the Issue Date. Following the occurrence of a Part Payment Default Date with respect to Partly Paid Securities, the Issuer will, as soon as reasonably practicable, give notice of the occurrence of such Part Payment Default Date and resulting automatic redemption, to the relevant Securityholder in accordance with General Condition 13, provided that (i) failure to give such notice or (ii) payment of the Part Payment Amount following the occurrence of a Part Payment Default Date, will not void the automatic redemption of such Securities.

Partly Paid Securities will be redeemed, whether at maturity, early redemption or otherwise in accordance with the provisions of this General Condition 6.

(l) Redemption for the occurrence of an Administrator/Benchmark Event

- (i) Following the occurrence of an Administrator/Benchmark Event, the Issuer, having given not less than 10 nor more than 30 days' notice to the Securityholders in accordance with General Condition 13 (which notice shall be irrevocable), may, on expiry of such notice redeem all, but not some only, of the Securities, each Security being redeemed at its Early Redemption Amount referred to in General Condition 6(f) above. Interest will cease to accrue and no further interest will be payable from the Interest Payment Date or (if none, the Issue Date) immediately preceding such Administrator/Benchmark Event.

TERMS AND CONDITIONS OF THE SECURITIES

- (ii) Notwithstanding General Condition 6(l)(i) above, in the event that the Calculation Agent determines that an Administrator/Benchmark Event has occurred, the Calculation Agent, shall give notice to the Issuer and the Securityholders as soon as reasonably practicable of the occurrence of such Administrator/Benchmark Event. The Calculation Agent shall then use reasonable endeavours to determine what amendments (if any) may be made to the terms and conditions of the Securities as the Calculation Agent determines necessary or appropriate to account for the effect of the relevant event or circumstance. Without limitation, such adjustments may: (a) consist of one or more amendments and/or be made on one or more dates; (b) be determined by reference to any adjustment(s) in respect of the relevant event or circumstance made in relation to any hedging arrangements in respect of the Securities; and (c) include selecting a successor benchmark(s) and making related adjustments to the terms of the Securities, including where applicable to reflect any increased costs of the Issuer providing exposure to the successor benchmark(s), and, in the case of more than one successor benchmark, making provision for allocation of exposure as between the successor benchmarks. In the event that the Calculation Agent proposes amendments to the terms and conditions of the Securities in accordance with this General Condition 6(l)(ii), the Issuer shall make such amendments to the terms and conditions of the Securities and there shall be no redemption of the Securities. However, if the Calculation Agent determines, within 20 calendar days of the Issuer receiving notice of an Administrator/Benchmark Event, that no amendments may be made to the terms and conditions of the Securities to account for the effect of the relevant event or circumstance, (A) the Calculation Agent shall notify the Issuer of the same and (B) upon, the Issuer having given not less than 10 nor more than 30 days' notice to the Securityholders in accordance with General Condition 13 (which notice shall be irrevocable), the Securities shall be redeemed in accordance with General Condition 6(l)(i).

For the purposes of this General Condition 6(l):

"Administrator/Benchmark Event" means, in relation to any Benchmark, the occurrence of a Benchmark Modification or Cessation Event, a Non-Approval Event, a Pre-Cessation Event a Rejection Event or a Suspension/Withdrawal Event.

"Benchmark" means any figure or rate and where any amount payable under the Securities, or the value of the Securities, is determined by reference to such figure or rate, all as determined by the Calculation Agent.

"Benchmark Modification or Cessation Event" means, in respect of the Benchmark, any of the following has occurred or will occur:

- (A) any material change in such Benchmark;
- (B) any public statement by the relevant competent authority as a consequence of which the Benchmark will be prohibited from being used either generally, or in respect of the Securities;
- (C) the permanent cancellation or cessation in the provision of such Benchmark;
- (D) the making of a public statement by the administrator of the Benchmark that it has ceased publishing the Benchmark permanently or indefinitely (in circumstances where no successor administrator has been appointed that will continue publication of the Benchmark); or (C) the making of a public statement by the supervisor of the administrator of the Benchmark that the Benchmark has been permanently or indefinitely discontinued; or
- (E) it is not commercially reasonable to continue the use of the relevant Benchmark in connection with the Securities as a result of any applicable licensing restrictions or changes in the cost of obtaining or maintaining any relevant licence (including, without limitation, where the Issuer, the Calculation Agent or any other entity is required to hold a valid licence in order to issue or perform its obligations in respect of the Securities and for any reason such licence is either not obtained, not renewed or is revoked or there is a material change in the cost of obtaining or renewing such licence).

"BMR" means the EU Benchmarks Regulation (Regulation (EU) 2016/1011).

"Non-Approval Event" means, in respect of the Benchmark:

TERMS AND CONDITIONS OF THE SECURITIES

- (A) any authorisation, registration, recognition, endorsement, equivalence decision or approval in respect of the Benchmark or the administrator of the Benchmark is not obtained or will not be obtained;
- (B) the Benchmark or the administrator of the Benchmark is not or will not be included in an official register; or
- (C) the Benchmark or the administrator of the Benchmark does not or will not fulfil any legal or regulatory requirement applicable to the Issuer, the Calculation Agent or the Benchmark,

in each case, as required under any applicable law or regulation in order for any of the Issuer, the Calculation Agent or any other entity to perform its obligations in respect of the Securities. For the avoidance of doubt, a Non-Approval Event shall not occur if the Benchmark or the administrator of the Benchmark is not included in an official register because its authorisation, registration, recognition, endorsement, equivalence or approval is suspended if, at the time of such suspension, the continued provision and use of the Benchmark is permitted in respect of the Securities under the applicable law or regulation during the period of such suspension.

"Pre-Cessation Event": a public statement by the supervisor of the administrator of the Benchmark (as applicable) that, in the view of such supervisor, (A) the Benchmark is (or will be deemed by such supervisor to be) no longer representative of an underlying market and such representativeness shall not be restored or (B) the methodology to calculate the Benchmark has materially changed.

"Rejection Event" means, in respect of the Benchmark, the relevant competent authority or other relevant official body rejects or refuses, or will reject or refuse any application for authorisation, registration, recognition, endorsement, equivalence, approval or inclusion in any official register which, in each case, is required in relation to the Benchmark or the administrator of the Benchmark under any applicable law or regulation for any of the Issuer, the Calculation Agent or any other entity to perform its obligations in respect of the Securities.

"Suspension/Withdrawal Event" means, in respect of the Benchmark:

- (A) the relevant competent authority or other relevant official body suspends or withdraws, or will suspend or withdraw any authorisation, registration, recognition, endorsement, equivalence decision or approval in relation to the Benchmark or the administrator of the Benchmark which is required under any applicable law or regulation in order for any of the Issuer, the Calculation Agent or any other entity to perform its obligations in respect of the Securities; or
- (B) the Benchmark or the administrator of the Benchmark is or will be removed from any official register where inclusion in such register is required under any applicable law in order for any of the Issuer, the Calculation Agent or any other entity to perform its obligations in respect of the Securities.

For the avoidance of doubt, a Suspension/Withdrawal Event shall not occur if such authorisation, registration, recognition, endorsement, equivalence decision or approval is suspended or where inclusion in any official register is withdrawn if, at the time of such suspension or withdrawal, the continued provision and use of the Benchmark is permitted in respect of the Securities under the applicable law or regulation.

For the further avoidance of doubt, the above is additional, and without prejudice, to any other terms of the Securities. In the event that under any such terms (i) any other consequences could apply in relation to an event or occurrence the subject of an Administrator/Benchmark Event or (ii) any such terms contradict the terms in this Condition 6(l), the Calculation Agent shall determine which terms shall apply in its sole and absolute discretion.

7. Taxation

All payments of principal and interest in respect of the Securities, Receipts and Coupons by or on behalf of the Issuer or the Guarantor will be made without withholding or deduction for or on account of any present or future taxes or duties of whatever nature imposed or levied by or on behalf of any jurisdiction having the power to tax unless such withholding or deduction is required by law. In such event, the Issuer or the Guarantor, as applicable (or, as the case may be, the relevant Paying Agent) will account to the relevant authorities for the amount required to be withheld or deducted and, in the case of any taxes or duties imposed or levied by or on behalf of the Kingdom of Spain ("**Spain**") or any political subdivision or authority thereof or therein having the power to tax, will pay such additional

TERMS AND CONDITIONS OF THE SECURITIES

amounts as shall be necessary in order that the net amounts received by the holders of the Securities, Receipts or Coupons after such withholding or deduction shall equal the respective amounts of principal and interest which would otherwise have been receivable in respect of the Securities, Receipts or Coupons, as the case may be, in the absence of such withholding or deduction; except that no such additional amounts shall be payable with respect to any Security, Receipt or Coupon:

- (i) presented for payment by or on behalf of a beneficial owner or a holder who is liable for such taxes or duties in respect of such Security, Receipt or Coupon by reason of his having some connection with Spain other than the mere holding of such Security, Receipt or Coupon; or
- (ii) presented for payment more than 30 days after the Relevant Date (as defined below) except to the extent that the holder thereof would have been entitled to an additional amount on presenting the same for payment on such thirtieth day assuming that day to have been a Payment Day (as defined in General Condition 5(a)); or
- (iii) to, or to a third party on behalf of, a holder if such taxes or duties may be avoided by complying with any relevant requirement of Spanish law or by making a declaration of non-residence or other similar claim for exemption to any authority of or in Spain, unless such holder proved that he is not entitled so to comply or to make such declaration or claim.

In addition, no additional amounts shall be payable by the Issuer, the Guarantor or any Paying Agent or any other person on account of any withholding or deduction in respect of the Securities, Receipts and Coupons where such withholding or deduction is required pursuant to:

- (iv) an agreement described in Section 1471(b) of the U.S. Internal Revenue Code of 1986, as amended (the “Code”) or otherwise imposed pursuant to Sections 1471 through 1474 of the Code, any regulations thereunder, any official interpretations thereof, any governmental agreement with respect thereto or any law implementing, or relating to, an intergovernmental agreement (“FATCA”); or
- (v) the Dutch Withholding Tax Act 2021 (*Wet bronbelasting 2021*).

In these General Conditions, the “**Relevant Date**” means the date on which such payment first becomes due, except that, if the full amount of the moneys payable has not been duly received by the Principal Paying Agent or the Registrar, as the case may be, on or prior to such due date, it means the date on which, the full amount of such moneys having been so received, notice to that effect is duly given to the Securityholders in accordance with General Condition 13.

8. Redenomination

(a) Redenomination

Where redenomination is specified in the Issue Terms as being applicable, the Issuer may, without the consent of the Securityholders, the Receiptholders and the Couponholders, on giving prior notice to the Principal Paying Agent, Euroclear and Clearstream, Luxembourg and at least 30 days' prior notice to the Securityholders in accordance with General Condition 13, elect that, with effect from the Redenomination Date specified in the notice, the Securities shall be redenominated in euro.

The election will have effect as follows:

- (i) the Securities and the Receipts shall be deemed to be redenominated into euro in the denomination of euro 0.01 with a nominal amount for each Security and Receipt equal to the nominal amount of that Security or Receipt in the Specified Currency, converted into euro at the Established Rate, provided that, if the Issuer determines, with the agreement of the Principal Paying Agent, that the then market practice in respect of the redenomination into euro of internationally offered securities is different from the provisions specified above, such provisions shall be deemed to be amended so as to comply with such market practice and the Issuer shall promptly notify the Securityholders, the stock exchange (if any) on which the Securities may be listed and the Paying Agents of such deemed amendments;
- (ii) save to the extent that an Exchange Notice has been given in accordance with paragraph (iv) below, the amount of interest due in respect of the Securities will be calculated by reference to the aggregate nominal amount of Securities presented (or, as the case may be, in respect of which Coupons are presented) for payment by the relevant Securityholder and the amount of such payment shall be rounded down to the nearest euro 0.01;

TERMS AND CONDITIONS OF THE SECURITIES

- (iii) if definitive Securities are required to be issued after the Redenomination Date, they shall be issued at the expense of the Issuer in the denominations agreed at the time by the Issuer and the Principal Paying Agent;
 - (iv) if issued prior to the Redenomination Date, all unmatured Coupons denominated in the Specified Currency (whether or not attached to the Securities) will become void with effect from the date on which the Issuer gives notice (the "**Exchange Notice**") that replacement euro-denominated Securities, Receipts and Coupons are available for exchange (provided that such securities are so available) and no payments will be made in respect of them. The payment obligations contained in any Securities and Receipts so issued will also become void on that date although those Securities and Receipts will continue to constitute valid exchange obligations of the Issuer. New euro-denominated Securities, Receipts and Coupons will be issued in exchange for Securities, Receipts and Coupons denominated in the Specified Securities Currency in such manner as the Principal Paying Agent may specify and as shall be notified to the Securityholders in the Exchange Notice. No Exchange Notice may be given less than 15 days prior to any date for payment of principal or interest on the Securities;
 - (v) after the Redenomination Date, all payments in respect of the Securities, the Receipts and the Coupons, other than payments of interest in respect of periods commencing before the Redenomination Date, will be made solely in euro as though references in the Securities to the Specified Currency were to euro. Payments will be made in euro by credit or transfer to a euro account (or any other account to which euro may be credited or transferred) specified by the payee or, at the option of the payee, by a euro cheque;
 - (vi) if the Securities are Fixed Rate Securities and interest for any period ending on or after the Redenomination Date is required to be calculated for a period ending other than on a Fixed Interest Date, it will be calculated by applying the Rate of Interest to each Calculation Amount (subject to General Condition 4(f)), multiplying such sum by the applicable Day Count Fraction, and rounding the resultant figure to the nearest sub-unit (defined above) of the relevant Specified Currency, half of any such sub-unit being rounded upwards or otherwise in accordance with applicable market convention;
 - (vii) if the Securities are Floating Rate Securities, the Issue Terms will specify any relevant changes to the provisions relating to interest; and
 - (viii) such other changes shall be made to these General Conditions as the Issuer may decide, after consultation with the Principal Paying Agent, and as may be specified in the notice, to conform them to conventions then applicable to instruments denominated in euro.
- (b) Definitions

In these General Conditions, the following expressions have the following meanings:

"Established Rate" means the rate for the conversion of the Specified Currency (including compliance with rules relating to rounding in accordance with applicable European Community regulations) into euro established by the Council of the European Union pursuant to Article 1091(4) of the Treaty;

"euro" means the currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty;

13. Notices

All notices regarding the Bearer Securities will be deemed to be validly given if published in one leading English language daily newspaper of general circulation in Europe (which is expected to be the *Financial Times*). The Issuer shall also ensure that notices are duly published in a manner which complies with the rules of any stock exchange or any other relevant authority on which the Bearer Securities are for the time being listed or by which they have been admitted to trading. 14. Meetings of Securityholders, Modification and Waiver

The Agency Agreement contains provisions for convening meetings of Securityholders to consider matters affecting their interests, including the sanctioning by Extraordinary Resolution of a modification of any of the Securities, the Receipts, the Coupons or any provisions of the Agency Agreement. Such a meeting may and, if required in writing by Securityholders holding not less than 10 per cent. in nominal amount of the Securities for the time being outstanding, shall be convened by the Issuer. At a meeting of the holders of the Securities for the purpose of, amongst others, approving a modification or amendment to, or obtaining a waiver of any covenant or condition set forth in the Securities, the Receipts, the Coupons or the Agency Agreement, persons entitled to vote a majority in aggregate nominal amount of the Securities at the time outstanding shall constitute a quorum. In the absence of a quorum at any such meeting that is not a meeting convened upon the requisition of Securityholders, within 30 minutes of the time appointed for such meeting, the meeting may be adjourned for a period of not less than 14 days, in the absence of a quorum any meeting that is convened on the requisition of Securityholders shall be dissolved; the persons entitled to vote a majority in aggregate nominal amount of the Securities at the time outstanding shall constitute a quorum for the taking of any action set forth in the notice of the original meeting. At a meeting or an adjourned meeting duly convened and at which a quorum is present as aforesaid, any Extraordinary Resolution to, amongst others, modify or amend any of the Securities, the Receipts, the Coupons or any provisions of the Agency Agreement (other than those items specified in General Conditions 14(i) and (ii)), or to waive compliance with, any of the terms and conditions of the Securities shall be effectively passed if passed by a majority consisting of at least 75 per cent. of the votes cast.

The Principal Paying Agent, the Issuer and the Guarantor may agree, without the consent of the Securityholders, Receiptholders or Couponholders, to:

- (i) any modification of the Securities, the Receipts, the Coupons or the Agency Agreement which is not materially prejudicial to the interests of the Securityholders; or
- (ii) any modification of the Securities, the Receipts, the Coupons or the Agency Agreement which is of a formal, minor or technical nature or to cure, correct or supplement any defective provision or is made to correct a manifest or proven error or to comply with mandatory provisions of the law of the jurisdiction in which the Issuer or the Guarantor are incorporated.

Any such modification shall be binding on the Securityholders, the Receiptholders and the Couponholders and any such modification shall be notified to the Securityholders, in accordance with General Condition 13 as soon as practicable thereafter.

15. Agents and Registrar

The names of the initial Agents and their initial specified offices are set out below.

TERMS AND CONDITIONS OF THE SECURITIES

The Issuer and the Guarantor are entitled to vary or terminate the appointment of any Agent and/or appoint additional or other Agents and/or approve any change in the specified office through which any Agent acts, provided that:

- (i) there will at all times be a Principal Paying Agent and a Registrar;
- (ii) so long as the Securities are listed on any stock exchange or admitted to listing by any relevant authority, there will at all times be a Paying Agent (in the case of Bearer Securities) and a Transfer Agent (in the case of Registered Securities) with a specified office in such place as may be required by the rules and regulations of such other stock exchange or other relevant authority; and
- (iii) so long as any of the Registered Global Securities payable in a Specified Currency other than US dollars are held through DTC or its nominee, there will at all times be an Exchange Agent.

In addition, the Issuer and the Guarantor shall forthwith appoint a Paying Agent having a specified office in New York City in the circumstances described in General Condition 5(a). Any variation, termination, appointment or change shall only take effect (other than in the case of insolvency, when it shall be of immediate effect) after not less than 30 or more than 45 days' prior notice thereof shall have been given to the Securityholders in accordance with General Condition 13, provided that no such variation, termination, appointment or changes shall take effect (except in the case of insolvency) within 7 days before any due date for the payment of any Security or any related Receipt or Coupon. Notice of all changes in the identities or specified offices of any Agent will be given promptly by the Issuer to Securityholders in accordance with General Condition 13.

In acting under the Agency Agreement, the Agents will act solely as agents of each of the Issuer and Guarantor (if applicable) and do not assume any obligations or relationship of agency or trust to or with the Securityholders, Receiptholders or Couponholders, except that (without affecting the obligations of the Issuer and the Guarantor (if applicable) to the Securityholders, Receiptholders and Couponholders, to repay Securities and pay interest thereon) funds received by the Principal Paying Agent for the payment of the principal of or interest on the Securities shall be held by it in trust for the Securityholders and/or Receiptholders or Couponholders until the expiration of the relevant period of prescription under General Condition 10. The Issuer will agree to perform and observe the obligations imposed upon it under the Agency Agreement. The Agency Agreement contains provisions for the indemnification of the Paying Agents and for relief from responsibility in certain circumstances, and entitles any of them to enter into business transactions with the Issuer and any of its subsidiaries without being liable to account to the Securityholders, Receiptholders or the Couponholders for any resulting profit.

All calculations, determinations, decisions, selections, elections and opinions made by the Calculation Agent shall be made in its discretion in accordance with the Conditions of the Securities, having regard in each case to any criteria stipulated therein, and shall (save in the case of manifest error) be final, conclusive and binding on the Issuer, the other Agents and the Securityholders.

In exercising its discretion as described above, the Calculation Agent may take into account such factors as it determines appropriate in each case, which may include, in particular, any circumstances or events which have or may have a material impact on the hedging arrangements (as described below) entered into by the Issuer and/or any of its Affiliates and/or any other relevant party (each a "**Relevant Party**") in respect of the Securities. The exercise of the Calculation Agent's discretion in respect of the Securities as provided herein is necessary because certain circumstances or events (for example a material modification or disruption to a relevant asset(s) to which the Securities are linked) may occur subsequent to the issuance of the Securities which may materially affect the costs to the Relevant Party of maintaining the Securities or any relevant hedging arrangements. Such circumstances or events may not have been reflected in the pricing of the Securities. In addition, as a result of certain circumstances or events (e.g. unavailability or disruption to any reference source) it may no longer be reasonably practicable or otherwise appropriate for certain valuations in respect of any relevant asset(s) to which the Securities are linked or otherwise in connection with the Securities to be made, thus making it necessary for the Calculation Agent to exercise its discretion in such a case.

(c) **Appointment of Process Agent**

The Issuer irrevocably appoints the Guarantor at its registered office for the time being in England as its agent for service of process in any proceedings before the English courts in relation to any Proceedings and undertakes that, in the event of the Guarantor being unable or unwilling for any reason so to act, it will immediately appoint another person as its agent for service of process in England in respect of any Proceedings. The Issuer agrees that failure by a process agent to notify it of any process will not invalidate service. Nothing herein shall affect the right to serve process in any other manner permitted by law.

ADDITIONAL TERMS AND CONDITIONS FOR PAYOUTS

ANNEX 1

ADDITIONAL TERMS AND CONDITIONS FOR PAYOUTS

*If specified as applicable in the Issue Terms, the terms and conditions applicable to payouts shall comprise the General Conditions and the additional terms and conditions for payouts set out below (the "**Payout Conditions**"), together with the terms and conditions as set out in each other Annex which is specified as applicable in the Issue Terms and subject to completion in the Issue Terms. In the event of any inconsistency between (i) the General Conditions and/or any other Annex and (ii) the Payout Conditions, the Payout Conditions shall prevail.*

1 Reference Item Linked Securities

(a) Use of Payout Conditions

These Payout Conditions set out the methodology for determining various payouts and product features in respect of the Securities. The applicable text shown in Payout Conditions 2, 3, 4 and 5 below will be extracted, included and completed at the paragraph indicated in the Issue Terms on the basis that (i) applicable text (including, where appropriate, section headings and terms defined in Payout Condition 5 which are required to be completed) from the relevant Payout Condition will be set out at the paragraph indicated in the Issue Terms and (ii) inapplicable text (and any terms defined in Payout Condition 5 which are not required to be completed) need not be included. Where the Issue Terms specify that a table may be inserted, such table will set out amounts, entities, dates, items, rates, value levels, triggers, figures and other information which completes the definitions that appear in the relevant subparagraphs of the Issue Terms, the Terms and Conditions of the Securities and the applicable Annex(es) to the Terms and Conditions of the Securities. Notwithstanding the above, a table may be inserted in any section of the Issue Terms whether or not is so specified that a table may be inserted in such section of the Issue Terms.

(b) Use of Terms

Terms in these Payout Conditions or in the Issue Terms may be attributed a numerical or letter suffix value when included in the Issue Terms. Without limitation, the suffix can be denoted as "j", "k", "m", "q", "n", "t", "i", "A", "B", "C" or "1", "2", "3" etc. and the term may be completed on the basis of the number or numbers represented by j, k, m, q, n, t, i, "A", "B", "C" or 1, 2, 3 etc. as chosen at the time of an issue of Securities. Moreover suffixes may be placed in series as necessary, such as "A(1)", "B(1)", "C(1)" etc. When applicable and in order to improve the reading and intelligibility of the formula(e) in the Issue Terms, the applicable suffixes may be included, completed and the relation between the term and the suffix will be explained and may be presented as a table, if necessary, in the Issue Terms. A term in Payout Condition 5 may be included in the applicable Issue Terms section more than once if there is more than one number represented by the term n, t or i. Conjunctions (e.g. or, and, but) and punctuation may also be included where appropriate. Suffixes may denote that a relevant term relates to an asset, item or date associated with that suffix. Suffixes may also be applied to payouts to denote that more than one payout or Rate of Interest etc, may be concurrently applicable (on the same dates or otherwise) in respect of any Security.

The constituent parts of any formula(e) or term(s) used in these Payout Conditions and that are to be specified in the Issue Terms may be replaced in the Issue Terms by the prescribed amount, level, or percentage or other value or term (the "**Variable Data**"). If a Variable Data has a value of either 0 (zero) or 1 (one), or is not applicable in respect of the relevant formula(e), then the related formula(e) may be simplified, for the purpose of improving the reading and intelligibility in the formula(e) in Issue Terms, by deleting such Variable Data.

(c) Security Types

The applicable Issue Terms will specify the Interest Basis applicable in respect of a Security. Such Securities are, where the Interest Basis is: Index Linked Interest, an "**Index Linked Interest Security**"; Equity Linked Interest, an "**Equity Linked Interest Security**"; Inflation Linked Interest, an "**Inflation Linked Interest Security**"; Reference Item Rate Linked Interest, a "**Reference Item Rate Linked Interest Security**"; ETF Linked Interest a "**ETF Linked Interest Security**"; Fund Linked Interest, a "**Fund Linked Interest Security**"; Credit Linked Interest, a "**Credit Linked Interest Security**" or "**Credit Linked Security**"; Foreign Exchange (FX) Rate Linked Interest, a "**Foreign Exchange (FX) Rate Linked Interest Security**", EUA Contract Linked Interest, an "**EUA Contract Linked Interest Security**" or where a combination of any two or more Interest Bases, a "**Combination Interest**"

(d) Alternative Interest Basis

Other than in respect of Zero Coupon Securities, Partly Paid Securities or Credit Linked Securities if it is specified in Paragraph 9 (Interest Basis) of the Issue Terms that 'Calculation Amount Basis will apply' to the Securities then for the purposes of any calculations of interest with respect to Securities which are represented by a Global Security pursuant to General Condition 4, the Principal Paying Agent will calculate Interest Amount payable on the Securities for the relevant Interest Period by applying the Rate of Interest to the Calculation Amount, and, in each case, multiplying such sum by the Day Count Fraction (as defined in General Condition 4(j)) specified in the Issue Terms and rounding the resultant figure to the nearest sub-unit (defined above) of the relevant Specified Securities Currency, one half of such a sub-unit being rounded upwards or otherwise in accordance with applicable market convention. For the avoidance of doubt, the Calculation Amount may be an amount that is different from the Specified Denomination, however, when this Calculation Amount Basis is applied, only one Calculation Amount per Specified Denomination may be specified.

If SER Intermediate Currency Requirements are specified as applicable in the Issue Terms, the Calculation Agent will determine the amount to be paid in the SER Base Currency by (i) applying the Settlement Exchange Rate to the amount that would have been payable in the SER Subject Currency were it not for the provisions of this Payout Condition 6 to produce an amount denominated in the SER Intermediate Currency, and then (ii) applying the Second Settlement Exchange Rate to such amount denominated in the SER Intermediate Currency.

Any such payment shall be made on the date such payment would have otherwise been due provided that, if limb (b) of the definition of "Settlement Exchange Rate" below applies, such payment may be deferred in accordance with Payout Condition 6.1(e) below if the SER Valuation Date is postponed as set out herein. The Calculation Agent shall give notice as soon as practicable to the Issuer and the Issuer shall give notice as soon as practicable to the Guarantor, the Principal Paying Agent and the Securityholders in accordance with General Condition 13 of the occurrence of a Disrupted Day on any day that, but for the occurrence of a Disrupted Day, would have been an Automatic Early Redemption Valuation Date, an Averaging Date, a Knock-in Determination Day or a Knock-out Determination Day, an Observation Date or a Valuation Date, as the case may be.

2. **Adjustments to an Index**

(a) Successor Index Sponsor Calculates and Reports an Index

If a relevant Index is (i) not calculated and announced by the Index Sponsor but is calculated and announced by a successor sponsor (the "**Successor Index Sponsor**") acceptable to the Calculation Agent, or (ii) replaced by a successor index using, in the determination of the Calculation Agent, the same or a substantially similar formula for and method of calculation as used in the calculation of that Index, then in each case that index (the "**Successor Index**") will be deemed to be the Index.

 - (B) if Scheduled Trading Day (Per Index Basis) applies the Valuation Date for each Index not affected by the occurrence of a Disrupted Day shall be the Scheduled Valuation Date, and the Valuation Date for each Index affected by the occurrence of a Disrupted Day (each an "**Affected Item**") shall be the first succeeding Scheduled Trading Day that is not a Disrupted Day relating to the Affected Item unless each of the number of consecutive Scheduled Trading Days equal to the Specified Maximum Days of Disruption immediately following the Scheduled Valuation Date is a Disrupted Day relating to the Affected Item. In that case, (i) the last such consecutive Scheduled Trading Day shall be deemed to be the Valuation Date for the Affected Item, notwithstanding the fact that such day is a Disrupted Day with respect to the Affected Item, and (ii) the Calculation Agent shall determine the Settlement Level of the Affected Item as of the Valuation Time on the last such consecutive Scheduled Trading Day in accordance with the formula for and method of calculating the level of the Affected Item last in effect prior to the occurrence of the first Disrupted Day using the Exchange or Pricing Source, as applicable, traded or quoted level as of the Valuation Time on the last such consecutive Scheduled Trading Day of each component comprised in the Affected Item (or, if an event giving rise to a Disrupted Day has occurred in respect of the relevant component on the last such consecutive Scheduled Trading Day, its good faith estimate of the value for the relevant component as of the Valuation Time on the last such consecutive Scheduled Trading Day) and otherwise in accordance with the above provisions.

appropriate to account for that diluting or concentrative effect (provided that no adjustments will be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to the relevant Share) and (ii) determine the effective date of that adjustment. The Calculation Agent may, but need not, determine the appropriate adjustment by reference to the adjustment in respect of such Potential Adjustment Event made by an options exchange ("**Exchange Based Adjustment**") to options on the Shares traded on that options exchange.

- (iv) Upon the making of any such adjustment by the Calculation Agent, the Calculation Agent shall, other than where Exchange Based Adjustment applies notify the Issuer as soon as practicable and the Issuer shall give notice as soon as practicable to the Securityholders in accordance with General Condition 13, stating the occurrence of the Potential Adjustment Event, giving details thereof and the adjustment to be taken in relation thereto, provided that any failure to give or non-receipt of such notice will not affect the validity of such Potential Adjustment Event or Potential Adjustment Event Effective Date or the adjustment in relation thereto.

- (b) Extraordinary Events

The occurrence of any of De-Listing, Insolvency, Merger Event, Nationalisation, Tender Offer (unless Tender Offer is specified as Not applicable in the Issue Terms), or, if specified as applicable in the Issue Terms, Illiquidity, Listing Change or Listing Suspension, as the case may be, shall be deemed to be an "**Extraordinary Event**", the consequences of which are set forth below:

"**De-Listing**" means, in respect of any relevant Shares, that the Exchange announces pursuant to the rules of such Exchange, that such Shares cease (or will cease) to be listed, traded or publicly quoted on the Exchange for any reason (other than a Merger Event or Tender Offer) and are not immediately re-listed, re-traded or re-quoted on (i) where the Exchange is located in the United States, any of the New York Stock Exchange, the American Stock Exchange or the NASDAQ National Market System (or their respective successors) or (ii) a comparable exchange or quotation system located in the same country as the Exchange (or, where the Exchange is within the European Union, in a member state of the European Union).

"**Illiquidity**" means, in respect of Equity Linked Securities that, in the determination of the Calculation Agent, during any period of five consecutive Scheduled Trading Days falling after the Issue Date (the "**Relevant Period**"), (a) the difference between the bid prices and the ask prices in respect of any relevant Share during the Relevant Period is greater than 1 per cent. (on average), and/or (b) the average purchase price or the average selling price, (each of (a) and (b) determined by the Calculation Agent from the order book of the relevant Share on the relevant Exchange during the Relevant Period), in relation to the purchase or sale of Shares with a value equal to or greater than EUR 10,000.00 (or its equivalent in any other currency as determined by the Calculation Agent at such time and by reference to such sources as it determines appropriate), is greater than MID plus 1 per cent. of MID (in relation to a purchase of Shares) or lower than the MID minus 1 per cent. of MID (in relation to a sale of Shares). For these purposes, "**MID**" means an amount equal to (a) the sum of the bid price and the ask price, in each case for the relevant Share at the relevant time, (b) divided by two.

"**Insolvency**" means that by reason of the voluntary or involuntary liquidation, bankruptcy, insolvency, dissolution or winding-up of or any analogous proceeding affecting a Basket Company or Share Company, as the case may be, (i) all the Shares of that Basket Company or Share Company, as the case may be, are required to be transferred to a trustee, liquidator or other similar official or (ii) holders of the Shares of that Basket Company or Share Company, as the case may be, become legally prohibited from transferring them.

"**Listing Change**" means, in respect of any relevant Shares, that such Shares cease (or will cease) to be listed, traded or publicly quoted on the listing compartment or the relevant market of the Exchange on which such Shares were listed, traded or publicly quoted on the Issue Date, for any reason (other than a Merger Event or Tender Offer or where this is a De-Listing).

"**Listing Suspension**" means, in respect of any relevant Shares, that the listing of such Shares on the Exchange has been suspended (other than where this is a De-Listing).

(the **"Percentage Range"**) of the outstanding voting shares of the Basket Company or Share Company, as the case may be, as determined by the Calculation Agent, based upon the making of filings with governmental or self-regulatory agencies or such other information as the Calculation Agent deems relevant.

(c) Consequences of the occurrence of an Extraordinary Event:

If an Extraordinary Event occurs in relation to a Share or a Basket of Shares, the Issuer in its sole and absolute discretion may take the action described in (i) to (iii) below in respect of a Security relating to a Share or a Basket of Shares, and the actions described in (iv) or (v) below in respect of a Security relating to a Basket of Shares only:

- (i) require the Calculation Agent to determine in its sole and absolute discretion the appropriate adjustment, if any, to be made to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms to account for the relevant Extraordinary Event, and determine the effective date of that adjustment. The relevant adjustments may include, without limitation, adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares or to the Securities. The Calculation Agent may (but need not) determine the appropriate adjustment by reference to the adjustment in respect of the relevant Extraordinary Event made by any options exchange to options on the Shares traded on that options exchange. In addition, in relation to a Basket of Shares, the Calculation Agent may adjust the Basket of Shares in accordance with the provisions of sub-paragraph (v) below;
- (ii) following such adjustment to the settlement terms of options on the Shares traded on such exchange(s) or quotation system(s) as the Issuer in its sole discretion shall select (the **"Options Exchange"**), require the Calculation Agent to make a corresponding adjustment to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms, which adjustment will be effective as of the date determined by the Calculation Agent to be the effective date of the corresponding adjustment made by the Options Exchange. If options on

the Shares are not traded on the Options Exchange, the Calculation Agent will make such adjustment, if any, to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms as the Calculation Agent in its sole and absolute discretion determines appropriate, with reference to the rules and precedents (if any) set by the Options Exchange to account for the relevant Extraordinary Event, that in the determination of the Calculation Agent would have given rise to an adjustment by the Options Exchange if such options were so traded; or

- (iii) where the Calculation Agent determines that no adjustment has been proposed by the Options Exchange and that no other action will produce a commercially reasonable result, the Issuer, in its sole and absolute discretion may, on giving notice to Securityholders in accordance with General Condition 13,
 - (A) redeem all but not some only of the Securities, each Security being redeemed by payment of an amount equal to the fair market value of a Security taking into account the relevant Extraordinary Event (the "**Calculated Extraordinary Event Amount**"), less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements (the "**Modified Calculated Extraordinary Event Amount**"), all as determined by the Calculation Agent in its sole and absolute discretion as soon as practicable following the occurrence of the relevant Extraordinary Event (the "**Calculated Extraordinary Event Amount Determination Date**"), or
 - (B) require the Calculation Agent to determine the Calculated Extraordinary Event Amount on the Calculated Extraordinary Event Amount Determination Date, and redeem each Security on the scheduled Maturity Date by payment of the Calculated Extraordinary Event Amount. For avoidance of any doubt, the Calculated Extraordinary Event Amount shall not accrue any interest from the date of its calculation to the Maturity Date.

In relation to paragraphs (A) and (B) above, notwithstanding General Condition 4(g), each Security shall cease to bear interest from and including the Calculated Index Adjustment Amount Determination Date and no interest amounts scheduled for payment thereafter (including, for the avoidance of doubt, including any Specified Interest Amounts) shall be payable.

- (iv) in the case of Equity Linked Securities relating to a Basket of Shares, redeem the Securities in part by giving notice to Securityholders in accordance with General Condition 13. If the Securities are so redeemed in part, the portion (the "**Redeemed Amount**") of each Security representing the affected Share(s) shall be redeemed and the Issuer will:
 - (A) pay to each Securityholder in respect of each Security held by him an amount equal to the fair market value of the Redeemed Amount, taking into account the relevant Extraordinary Event, less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements, all as determined by the Calculation Agent in its sole and absolute discretion; and
 - (B) require the Calculation Agent to determine in its sole and absolute discretion the appropriate adjustment, if any, to be made to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms to account for such redemption in part. For the avoidance of doubt the remaining part of each Security after such cancellation and adjustment shall remain outstanding with full force and effect. Payments will be made in such manner as shall be notified to the Securityholders in accordance with General Condition 13;
- (v) in the case of Equity Linked Securities relating to a Basket of Shares, on or after the relevant Extraordinary Event Effective Date, require the Calculation Agent to adjust the Basket of Shares to include a Share selected by it in accordance with the criteria for Share selection set out below (each, a "**Substitute Share**") for each Share (each, an "**Affected Share**") of each Basket Company (each, an "**Affected Basket Company**") which is affected by such Extraordinary Event and the Substitute Share will be deemed to be a "**Share**", and the issuer of such shares a "**Basket Company**", for the purposes of the Securities, and the Calculation

Agent will make such adjustment, if any, to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms as the Calculation Agent in its sole and absolute discretion determines appropriate, provided that in the event that any amount payable under the Securities was to be determined by reference to an initial price (the "**Initial Price**") of the Affected Share, the relevant Initial Price of each Substitute Share will be determined by the Calculation Agent in accordance with the following formula:

$$\text{Initial Price} = A \times (B/C)$$

where:

"**A**" is the official closing price of the relevant Substitute Share on the relevant Exchange on the Substitution Date;

"**B**" is the Initial Price of the relevant Affected Share; and

"**C**" is the fair market value of the relevant Affected Share on the Substitution Date (which may, where available, be determined by reference to the official closing price of the Affected Share on the relevant Exchange and/or such other source(s) as the Calculation Agent determines appropriate).

Such substitution and the relevant adjustment to the Basket of Shares will be deemed to be effective as of the date selected by the Calculation Agent (the "**Substitution Date**") in its sole and absolute discretion and specified in the notice referred to below which may, but need not, be the relevant Extraordinary Event Effective Date.

The Weighting of each Substitute Share in the Basket of Shares will be equal to the Weighting of the relevant Affected Share.

In order to be selected as a Substitute Share, the relevant share must satisfy the following criteria, in the sole and absolute discretion of the Calculation Agent:

- (A) where the relevant Extraordinary Event is a Merger Event or a Tender Offer and the relevant share is not already included in the Basket of Shares, the relevant share shall be an ordinary share of the entity or person (other than the Affected Basket Company) involved in the Merger Event or the making of the Tender Offer, that is, or that as of the relevant Extraordinary Event Effective Date (i) is promptly scheduled to be, publicly quoted, traded or listed on an exchange or quotation system located in the same country as the relevant Exchange (or, where the relevant Exchange is within the European Union, in any member state of the European Union) and (ii) is not subject to any currency exchange controls, trading restrictions or other trading limitations; or
- (B) where (A) above does not apply, including in the case of an Extraordinary Event other than a Merger Event or a Tender Offer:
 - (1) the issuer of the share shall, to the extent possible, belong to the same economic sector as the Affected Basket Company and shall not already be included in the Basket of Shares; and
 - (2) the issuer of the share shall, to the extent possible, have a comparable market capitalisation, international standing and exposure as the Affected Basket Company in respect of the Affected Share.

Upon the occurrence of an Extraordinary Event, if the Issuer determines that an adjustment in accordance with the above provisions is necessary it shall give notice as soon as practicable to the Securityholders in accordance with General Condition 13 stating the occurrence of the Extraordinary Event, giving details thereof and the action proposed to be taken in relation thereto, including, in the case of a Share substitution, the identity of the Substitute Shares and the Substitution Date, provided that any failure to give, or non-receipt of, such notice will not affect the validity of any such Extraordinary Event or the proposed action.

ADDITIONAL TERMS AND CONDITIONS FOR EQUITY LINKED SECURITIES

4. Correction of Share Price

If the relevant price of the relevant Share published on a given day and used or to be used by the Calculation Agent to make any determination under the Securities is subsequently corrected and the correction is published by the relevant Exchange within the number of days equal to the Share Correction Period of the original publication, the price to be used shall be the price of the relevant Share as so corrected, except that any corrections published after the day which is three Exchange Business Days prior to a due date for payment under the Securities calculated by reference to the price of a Share will be disregarded by the Calculation Agent for the purposes of determining the relevant amount to be paid.

5. Additional Disruption Events

- (a) If an Additional Disruption Event occurs, the Issuer in its sole and absolute discretion may take the action described in (i), (ii), (iii) or, in the case of Securities linked to a Basket of Shares only, (iv) below:
- (i) require the Calculation Agent to determine in its sole and absolute discretion the appropriate adjustment, if any, to be made to any one or more of any Relevant Asset and/or the Entitlement (in each case with respect to Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms to account for the Additional Disruption Event and determine the effective date of that adjustment; or
 - (ii) redeem the Securities by giving notice to Securityholders in accordance with General Condition 13. If the Securities are so redeemed the Issuer will pay an amount to each Securityholder in respect of each Security held by him which amount shall be the fair market value of a Security taking into account the Additional Disruption Event less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements (the "**Calculated Additional Disruption Amount**"), all as determined by the Calculation Agent in its sole and absolute discretion. Payments will be made in such manner as shall be notified to the Securityholders in accordance with General Condition 13; or
 - (iii) require the Calculation Agent to calculate the Calculated Additional Disruption Amount as soon as practicable following the occurrence of the Additional Disruption Event (the "**Calculated Additional Disruption Amount Determination Date**") and on the Maturity Date shall redeem each Security at an amount calculated by the Calculation Agent equal to (x) the Calculated Additional Disruption Amount plus interest accrued on the Calculated Additional Disruption Amount on a daily basis from and including the Calculated Additional Disruption Amount Determination Date to but excluding the Maturity Date, each such daily accrual being at a rate equal to Issuer's funding cost on or about the relevant day or (y) if greater its nominal amount; or
 - (iv) in the case of Securities linked to a Basket of Shares, require Calculation Agent to adjust the Basket of Shares to include a Share selected by it in accordance with the criteria for Share selection set out below (each a "**Substitute Share**") for each Share (each an "**Affected Share**") which is affected by the Additional Disruption Event and the Substitute Share will be deemed to be a "**Share**" and the issuer of such shares a "**Basket Company**" for the purposes of the Securities, and the Calculation Agent will make such adjustment, if any, to any one or more of any Relevant Asset and/or the Entitlement (where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms as the Calculation Agent in its sole and absolute discretion determines appropriate, provided that in the event that any amount payable under the Securities was to be determined by reference to an initial price (the "**Initial Price**") of the Affected Share, the Initial Price of each Substitute Share will be determined by the Calculation Agent in accordance with the following formula:

$$\text{Initial Price} = A \times (B/C)$$

where:

"A" is the official closing price of the relevant Substitute Share on the relevant Exchange on the Substitution Date;

"B" is the Initial Price of the relevant Affected Share; and

ADDITIONAL TERMS AND CONDITIONS FOR EQUITY LINKED SECURITIES

"C" is the fair market value of the relevant Affected Share on the Substitution Date (which may, where available, be determined by reference to the official closing price of the Affected Share on the relevant Exchange and/or such other source(s) as the Calculation Agent determines appropriate).

Such substitution and the relevant adjustment to the Basket of Shares will be deemed to be effective as of the date selected by the Calculation Agent (the "**Substitution Date**") in its sole and absolute discretion and specified in the notice referred to below which may, but need not, be the relevant date of the Additional Disruption Event.

The Weighting of each Substitute Share in the Basket of Shares will be equal to the Weighting of the relevant Affected Share.

In order to be selected as a Substitute Share, the relevant share must be a share which, in the sole and absolute discretion of the Calculation Agent:

- (i) is not already included in the Basket of Shares;
 - (ii) the Issuer of such share belongs to the same economic sector as the Basket Company in respect of the Affected Share; and
 - (iii) the Issuer of such share has a comparable market capitalisation, international standing and exposure as the Basket Company in respect of the Affected Share.
- (b) Upon the occurrence of an Additional Disruption Event, if the Calculation Agent determines that an adjustment in accordance with the above provisions is necessary it shall notify the Issuer as soon as practicable and the Issuer shall give notice as soon as practicable to the Securityholders in accordance with General Condition 13 stating the occurrence of the Additional Disruption Event, giving details thereof and the action proposed to be taken in relation thereto, provided that any failure to give, or non-receipt of, such notice will not affect the validity of the Additional Disruption Event or the proposed action.

6. Knock-in Event and Knock-out Event

This Equity Linked Condition 6 is applicable only if:

- (a) Knock-in Event is specified as applicable in the Issue Terms, in which case any payment under the Securities which is expressed to be subject to a Knock-in Event shall be conditional upon the occurrence of such Knock-in Event; or
- (b) Knock-out Event is specified as applicable in the Issue Terms, in which case any payment under the relevant Securities which is expressed to be subject to a Knock-out Event shall be conditional upon the occurrence of such Knock-out Event.

7. Automatic Early Redemption Event

If an Extraordinary ETF Event occurs, including any Additional Extraordinary ETF Event specified in the Issue Terms the Issuer in its sole and absolute discretion may take any of the actions (each an "**Extraordinary ETF Event Action**") described in subparagraphs (i) to (iii) inclusive below.

(i) Adjustment

If the Issuer determines that the action taken in respect of the Extraordinary ETF Event is to be "**Adjustment**" then it may:

- (A) require the Calculation Agent to determine, in its sole and absolute discretion, the appropriate adjustment(s), if any, to be made to any one or more of any Relevant Asset and/or the Entitlement (in the case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these ETF Linked Conditions and/or the applicable Issue Terms to account for the relevant the Extraordinary ETF Event and determine the effective date of that adjustment. The relevant adjustments may include, without limitation, adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the ETF Shares or to the Securities. - (ii) Substitution

ADDITIONAL TERMS AND CONDITIONS FOR ETF LINKED SECURITIES

If the Issuer determines that the action to be taken in respect of the Extraordinary ETF Event is to be "**Substitution**", the Calculation shall on or after the occurrence of any Extraordinary ETF Event, substitute each ETF Share (each an "**Affected ETF Share**") of each ETF (each, an "**Affected ETF**") which is affected by such Extraordinary ETF Event with an ETF Share selected by it in accordance with the criteria for ETF Share selection set out below (each a "**Substitute ETF Share**") and the Substitute ETF Share will be deemed to be an "**ETF Share**" and the relevant issuer of such Substitute ETF Share, an "**ETF**" for the purposes of the Securities, and the Calculation Agent will make such adjustment, if any, to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these ETF Linked Conditions and/or the Issue Terms as the Calculation Agent in its sole and absolute discretion determines appropriate, provided that in the event that any amount payable under the Securities was to be determined by reference to an initial price (the "**Initial Price**") of the Affected ETF Share, the relevant Initial Price of each Substitute ETF Share will be determined by the Calculation Agent in accordance with the following formula:

$$\text{Initial Price} = A \times (B/C)$$

where:

"A" is the official closing price of the relevant Substitute ETF Share on the relevant Exchange on the Substitution Date;

"B" is the Initial Price of the relevant Affected ETF Share; and

"C" is the fair market value of the relevant Affected ETF Share on the Substitution Date (which may, where available, be determined by reference to the official closing price of the Affected Share on the relevant Exchange and/or such other source(s) as the Calculation Agent determines appropriate).

Such substitution and the relevant adjustment to the ETF Basket will be deemed to be effective as of the date selected by the Calculation Agent (the "**Substitution Date**") in its sole and absolute discretion and specified in the notice referred to below which may, but need not, be the relevant Extraordinary ETF Event Effective Date.

The Weighting of each Substitute ETF Share will be equal to the Weighting of the relevant Affected ETF Share.

In order to be selected as a Substitute ETF Share, the relevant share/unit/interest must satisfy the following criteria, as determined by the Calculation Agent in its sole and absolute discretion:

- (A) where the relevant Extraordinary ETF Event is a Merger Event or a Tender Offer (a) in the case of ETF Shares related to a single ETF, and (b) in the case of ETF Shares related to an ETF Basket, the relevant share/unit/interest shall be an ordinary share/unit/interest of the entity or person that in the case of a Merger Event is the continuing entity in respect of the Merger Event or in the case of a Tender Offer is the entity making the Tender Offer provided that (i) the relevant share/unit/interest is not already included in the ETF Basket and (ii) it is or as of the relevant Extraordinary ETF Event Effective Date is promptly scheduled to be (x) publicly quoted, traded or listed on an exchange or quotation system located in the same country as the relevant Exchange (or, where the relevant Exchange is within the European Union, in any member state of the European Union) and (y) not subject to any currency exchange controls, trading restrictions or other trading limitations; or
- (B) (a) where the relevant Extraordinary ETF Event is a Merger Event or a Tender Offer and a share/unit/interest would otherwise satisfy the criteria set out in paragraph (A) above, but such share/unit/interest is (in the case of an ETF Share related to an ETF Basket), already included in the ETF Basket, or (b) where the Extraordinary ETF Event is not a Merger Event or a Tender Offer, an alternative exchange traded instrument which, in the determination of the Calculation Agent, has similar characteristics to the relevant ETF, including but not limited to, a comparable listing, investment objectives, investment restrictions and investment processes underlying asset pools and whose related parties are acceptable to the Calculation Agent;

ADDITIONAL TERMS AND CONDITIONS FOR ETF LINKED SECURITIES

- (C) if no alternative traded instrument can be determined pursuant to the preceding subparagraph (B) above, use reasonable endeavours to substitute the relevant ETF with an index (or a fund tracking an index) selected by the Calculation Agent in its sole and absolute discretion; and
 - (D) following any such substitution (a "**Substitution**"), in its sole and absolute discretion amend such of the General Conditions, these ETF Linked Conditions and/or the Issue Terms as it determines to be appropriate to take account of such Substitution, including to ensure the weighted average price referred to in (i) above (and any consequent rise or fall in value of the affected ETF Share since the Issue Date) is reflected in the terms of the Substitution.
- (iii) **Termination**
- If the Issuer determines that the action to be taken in respect of the Extraordinary ETF Event is to be "**Termination**", upon the occurrence of a Termination Event the Issuer (i) shall redeem all but not some only of the Securities on the Termination Date by payment to each Securityholder of the Termination Amount. For avoidance of any doubt, the Termination Amount shall not accrue any interest from the date of its calculation to the Termination Date.
- Notwithstanding General Condition 4(g), each Security shall cease to bear interest from and including the Calculated Extraordinary ETF Event Amount Determination Date and no interest amounts scheduled for payment thereafter (including, for the avoidance of doubt, including any Specified Interest Amounts) shall be payable.
- (iv) Upon the occurrence of an Extraordinary ETF Event, if the Issuer determines that an adjustment in accordance with the above provisions is necessary it shall give notice as soon as practicable (an "**Extraordinary Event Notice**") to the Securityholders in accordance with General Condition 13 (*Notices*) stating the occurrence of such Extraordinary ETF Event (the date on which an Extraordinary Event Notice is given, an "**Extraordinary ETF Event Notification Date**"), giving details thereof and the action to be taken in relation thereto, including, in the case of a Substitution, the identity of the Substitute ETF Shares and the Substitution Date and, in the case of a Termination, details of any Termination Date and Termination Amount (where applicable), provided that any failure to give, or non-receipt of, such notice will not affect the validity of any such Extraordinary ETF Event or the proposed action.

3. **Correction of ETF Price**

If the relevant price of the relevant ETF Share published on a given day and used or to be used by the Calculation Agent to make any determination under the Securities is subsequently corrected and the correction is published by the relevant Exchange within the number of days equal to the ETF Share Correction Period of the original publication, the price to be used shall be the price of the relevant ETF Share as so corrected, except that any corrections published after the day which is three Exchange Business Days prior to a due date for payment under the Securities calculated by reference to the price of an ETF Share will be disregarded by the Calculation Agent for the purposes of determining the relevant amount to be paid.

4. **Knock-in Event and Knock-out Event**

This ETF Linked Condition 4 is applicable only if:

- (i) Knock-in Event is specified as applicable in the Issue Terms, in which case any payment under the Securities which is expressed to be subject to a Knock-in Event shall be conditional upon the occurrence of such Knock-in Event; or
- (ii) Knock-out Event is specified as applicable in the Issue Terms, in which case any payment under the Securities which is expressed to be subject to a Knock-out Event shall be conditional upon the occurrence of such Knock-out Event.

5. **Automatic Early Redemption**

any other event that, in the opinion of the Calculation Agent, is analogous to any of (i) to (vii) above (inclusive).

(b) Consequences of a Disruption Event

Upon a Disruption Event occurring or continuing on any Averaging Date, Settlement Price Date, Knock-In Determination Day or Knock-Out Determination Day (or, if different, the day on which prices for that date would, in the ordinary course, be published by the relevant Price Source) as determined by the Calculation Agent, the Calculation Agent shall apply the applicable Disruption Fallback in determining the consequences of the Disruption Event.

"Disruption Fallback" means a source or method that may give rise to an alternative basis for determining the Settlement Price when a Disruption Event occurs or exists on a day that is an Averaging Date, Settlement Price Date, Knock-In Determination Day or Knock-Out Determination Day (or, if different, the day on which prices for that date would, in the ordinary course, be published or announced by the Price Source). The Calculation Agent shall take the relevant actions specified in either (i), (ii) or (iii) below.

- (i) if an Averaging Date, Settlement Price Date, Knock-In Determination Day or Knock-Out Determination Day is a Disrupted Day, the Calculation Agent will determine that the relevant Averaging Date or Settlement Price Date, as the case may be, shall be the first succeeding Scheduled Trading Day that is not a Disrupted Day (in the case of the Strike Date or Valuation Date) or Valid Date (in the case of an Averaging Date, Observation Date, Knock-In Determination Day or Knock-Out Determination Day) unless each of the number of consecutive Scheduled Trading Days equal to the Specified Maximum Days of Disruption immediately following the originally scheduled Averaging Date, Settlement Price Date, Knock-In Determination Day or Knock-Out Determination Day, as the case may be, is a Disrupted Day in which case the Calculation Agent may determine that the last such

consecutive Scheduled Trading Day shall be deemed to be the Averaging Date, Settlement Price Date, Knock-In Determination Day or Knock-Out Determination Day, as the case may be (irrespective, in the case of an Averaging Date, Observation Date, Knock-In Determination Day or Knock-Out Determination Day, of whether that last consecutive Scheduled Trading Day is already an Averaging Date, Observation Date, Knock-In Determination Day or Knock-Out Determination Day, as the case may be) and may determine the Settlement Price by using commercially reasonable efforts to determine a Settlement Price as of the Valuation Time on the last such consecutive Scheduled Trading Day taking into consideration all available information that in good faith it deems relevant; or

- (ii) if an Averaging Date, Settlement Price Date, Knock-In Determination Day or Knock-Out Determination Day is a Disrupted Day but is not the Redemption Valuation Date, if Delayed Redemption on the Occurrence of a Disruption Event is specified as being not applicable in the Issue Terms, on giving notice to Securityholders in accordance with General Condition 13, the Issuer shall redeem all but not some only of the Securities, each Security being redeemed by payment of an amount equal to the fair market value of such Security, less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements, all as determined by the Calculation Agent in its sole and absolute discretion. Payment shall be made in such manner as shall be notified to the Securityholders in accordance with General Condition 13; or
- (iii) if an Averaging Date, any Settlement Price Date, Knock-In Determination Day or Knock-Out Determination Day is a Disrupted Day but is not the Redemption Valuation Date, if Delayed Redemption on the Occurrence of a Disruption Event is specified as being applicable in the Issue Terms, the Calculation Agent shall calculate the fair market value of each Security less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements (the "**Calculated Foreign Exchange (FX) Disruption Amount**") as soon as practicable following the occurrence of the Disruption Event (the "**Calculated Foreign Exchange (FX) Disruption Amount Determination Date**") and on the Maturity Date shall redeem each Security at an amount calculated by the Calculation Agent equal to (x) the Calculated Foreign Exchange (FX) Disruption Amount plus interest accrued on the Calculated Foreign Exchange (FX) Disruption Amount on a daily basis from and including the Calculated Foreign Exchange (FX) Disruption Amount Determination Date to but excluding the Maturity Date, each such daily accrual rate being at a rate equal to Issuer's funding cost on or about the relevant day or (y) if greater, its nominal amount.

(b) Consequences of an EM Disruption Event

Upon an EM Disruption Event occurring or continuing on any Averaging Date, Settlement Price Date, Knock-In Determination Day or Knock-Out Determination Day, as the case may be (or, if different, the day on which prices for that date would, in the ordinary course, be published by the relevant EM FX Price Source) as determined by the Calculation Agent, the Calculation Agent shall apply in determining the consequences of the EM Disruption Event: (a) EM Calculation Agent Determination where the applicable EM Disruption Event is other than Price Source Disruption or Price Materiality; and (b) the applicable EM Disruption Fallback where the applicable EM Disruption Event is a Price Source Disruption or Price Materiality.

(c) Unscheduled Holiday

If the Calculation Agent determines that a date that would otherwise have been a Settlement Price Date, Averaging Date, Knock-in Determination Day or Knock-out Determination Day is an Unscheduled Holiday in respect of a Subject Currency, then such date shall be the immediately succeeding Scheduled Trading Day after the occurrence of the Unscheduled Holiday, subject as provided above, and provided that if such Settlement Price Date, Averaging Date, Knock-in Determination Day or Knock-out Determination Day, as the case may be, has not occurred on or before the EM Maximum Days of Postponement then the next Scheduled Trading Day after such period that would have been a Scheduled Trading Day but for the Unscheduled Holiday shall be deemed to be the relevant date for valuation and the Settlement Price shall be determined by the Calculation Agent on such day in its sole discretion acting in good faith having taken into account relevant market practice and by reference to such additional source(s) as it deems appropriate.

(d) Cumulative Events

If a Settlement Price Date, Averaging Date, Knock-in Determination Day or Knock-out Determination Day, as the case may be, is postponed by the number of calendar days equal to the EM Maximum Cumulative Days of Postponement and at the end of such period (i) an Unscheduled Holiday shall have occurred or be continuing on the day immediately following such period (the "**Final Day**"), then such Final Day shall be deemed to be the Settlement Price Date, Averaging Date, Knock-in Determination Day or Knock-out Determination Day, as the case may be, and (ii) if a Price Source Disruption shall have occurred or be continuing on the Final Day, then Valuation Postponement shall not apply and the Settlement Price shall be determined in accordance with the next applicable EM Disruption Fallback.

(e) Postponement of payment or settlement days

Where any Settlement Price Date, Averaging Date, Knock-In Determination Day or Knock-Out Determination Day is postponed as a consequence of the provisions of this Foreign Exchange (FX) Rate Linked Condition 2, then the corresponding date for payment or delivery of any assets shall fall on the later of (a) the date for such payment or delivery otherwise determined in accordance with the Issue Terms and (b) the day falling the EM Number of Postponement Settlement Days specified in the Issue Terms (or, if none are so specified, two Business Days) after the last occurring Settlement Price Date, Averaging Date, Knock-in Determination Day or Knock-out Determination Day, as the case may be.

5. Consequences of an Additional Disruption Event

ANNEX 8

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

*If specified as applicable in the Issue Terms, the terms and conditions applicable to Credit Linked Securities shall comprise the General Conditions and the additional terms and conditions for Credit Linked Securities set out below (the "**Credit Linked Conditions**"), together with the terms and conditions as set out in each other Annex which is specified as applicable in the Issue Terms and subject to completion in the Issue Terms. In the event of any inconsistency between the General Conditions and the Credit Linked Conditions, the Credit Linked Conditions shall prevail.*

Unless otherwise stated in these Credit Linked Conditions or in the Issue Terms, in the event that any day specified in the section "Credit Linked Interest/Redemption" in the Issue Terms or the last day of any period calculated by reference to calendar days falls on a day that is not a Business Day, such day or last day shall be subject to adjustment in accordance with the applicable Business Day Convention.

In the case of Credit Linked Securities for which more than one Reference Entity or Index is specified in the Issue Terms, all references to "**the Reference Entity**" or to "**the Index**" herein shall be construed to refer to the Reference Entity or the Index in respect of which the relevant determination falls to be made at any relevant time and all related provisions and determinations will be construed accordingly.

For the avoidance of doubt no Credit Linked Securities will be considered frustrated, or otherwise void or voidable (whether for mistake or otherwise) solely because:

- (a) any relevant Reference Entity or Index does not exist on, or ceases to exist on or following, the Trade Date; and/or
- (b) Obligations, Deliverable Obligations, Valuation Obligations or the Reference Obligation do not exist on, or cease to exist on or following, the Trade Date.

Credit Linked Securities may take the form of Single Reference Entity Credit Linked Securities, First-to-Default Credit Linked Securities, Nth-to-Default Credit Linked Securities, Linear Basket Credit Linked Securities, Index Credit Linked Securities or Long/Short Credit Linked Securities. In the case of Linear Basket Credit Linked Securities and Index Credit Linked Securities, the Securities may be either Non-Tranched ("**Non-Tranched Linear Basket Credit Linked Securities**" or "**Non-Tranched Index Credit Linked Securities**", as the case may be) to which either Credit Payment on Maturity or Credit Payment As You Go will apply or Tranched ("**Tranched Linear Basket Credit Linked Securities**" or "**Tranched Index Credit Linked Securities**") (as the case may be). In addition, Index Credit Linked Securities may be Basket Tranched Index Credit Linked Securities ("**Basket Tranched Index Credit Linked Securities**"). Notwithstanding the use of the term "Index", Index Credit Linked Securities are not Index Linked Securities. A Credit Linked Security may also be a Zero Coupon Security.

Credit Linked Securities may be issued in respect of which:

- (a) "Credit Linked Interest" is applicable but "Credit Linked Redemption" is not applicable;
- (b) "Credit Linked Interest" is not applicable but "Credit Linked Redemption" is applicable; and
- (c) "Credit Linked Interest" and "Credit Linked Redemption" are both applicable.

If "Credit Linked Interest" is applicable, Credit Linked Condition 5 shall apply in respect of the Securities. If "Credit Linked Interest" is not applicable, Credit Linked Condition 5 shall not apply in respect of the Securities.

If "Credit Linked Redemption" is applicable, Credit Linked Condition 1 and other Credit Linked Conditions relevant in respect of redemption following the occurrence of a Credit Event Determination Date shall apply in respect of the Securities. If "Credit Linked Redemption" is not applicable, Credit Linked Condition 1 and other Credit Linked Conditions relevant in respect of redemption following the occurrence of a Credit Event Determination Date shall not apply in respect of the Securities.

The Issue Terms shall specify, *inter alia*:

- (a) the type of Credit Linked [Notes]/[Certificates];
- (b) whether the "Credit Linked Interest" and/or "Credit Linked Redemption" is applicable;
- (c) the Settlement Method (if applicable) and, where Auction Settlement applies, the applicable Fallback Settlement Method;

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

- (d) the Reference Entity or Reference Entities in respect of which a Credit Event may occur or, in the case of Index Credit Linked Securities, the relevant Index Annex;
- (e) the Reference Obligation(s) (if any) in respect of each Reference Entity or, in the case of Index Credit Linked Securities, the relevant Index Annex;
- (f) the Trade Date, the Scheduled Maturity Date and if different from the Scheduled Maturity Date, the Credit Observation End Date;
- (g) the Reference Entity Notional Amount (if applicable) in respect of each Reference Entity;
- (h) the Long Nominal Exposure Percentage and the Short Nominal Exposure Percentage (if applicable) in respect of the Long/Short Credit Linked Securities;
- (i) "H" and "L" in the case of Tranched Linear Basket Credit Linked Securities;
- (j) the Attachment Point(s) and the Exhaustion Point(s) in the case of Tranched Index Credit Linked Securities or Basket Tranched Index Credit Linked Securities;
- (k) the applicable Credit Multiplier, Credit Event Reduction Factor, Specified Interest Amount Multiplier, LLM and/or SLM (in each case to the extent applicable); and
- (l) the Transaction Type applicable to each Reference Entity if Physical Settlement Matrix is specified as being applicable in the Issue Terms.

Certain elections in respect of Credit Linked Securities and one or more Reference Entities may be made by specifying that the Physical Settlement Matrix is applicable in the Issue Terms. In this case the provisions of Credit Linked Condition 20 apply.

In the case of Index Linked Securities, certain information relating to the Credit Index will be as specified in the Index Annex named in the Issue Terms.

The application of any of Credit Linked Conditions 6, 7, 8, 9 or 11 below shall, for the avoidance of doubt, not preclude the application of any other such Credit Linked Condition either contemporaneously or subsequently and in the event that any such provisions are inconsistent or the Calculation Agent becomes entitled to exercise a discretion under one or more of such provisions, the Calculation Agent may elect in its discretion which provision shall apply and under which provision or provisions it shall exercise its discretion.

1. Redemption of Credit Linked Securities

- (a) Unless previously redeemed or purchased and cancelled and provided that a Credit Event Determination Date has not occurred in respect of any Reference Entity, the Issuer shall redeem each Credit Linked Security on the Maturity Date by payment of the Final Redemption Amount. If a Credit Event Determination Date has occurred in respect of any Reference Entity and "Credit Linked Redemption" is applicable in the Issue Terms, the Issuer shall redeem each Credit Linked Security as described below. References in these Credit Linked Conditions to a Credit Linked Security or a Security are, unless the context otherwise requires, to a nominal amount of Credit Linked Securities equal to the Calculation Amount. Any payment of a "pro rata" amount in respect of a Security will be determined by reference to its nominal amount relative to the then Aggregate Nominal Amount of the Securities.
- (b) Where the Securities are Single Reference Entity Credit Linked Securities and "Credit Linked Redemption" is applicable in the Issue Terms, if a Credit Event Determination Date has occurred in relation to the Reference Entity, then the Securities will be settled in accordance with Credit Linked Condition 2, Credit Linked Condition 3 or Credit Linked Condition 4, as applicable or, if the Securities are Zero/Set Recovery Securities, the provisions of paragraph (h) below will apply.
- (c) Where the Securities are First-to-Default Credit Linked Securities, if a Credit Event Determination Date has occurred in relation to any of the specified Reference Entities and "Credit Linked Redemption" is applicable in the Issue Terms, then the Securities will be settled in accordance with Credit Linked Condition 2, Credit Linked Condition 3 or Credit Linked Condition 4, as applicable, in relation only to the First Reference Entity (as defined in the definition of Credit Event Determination Date) or, if the Securities are Zero/Set Recovery Securities, the provisions of paragraph (h) below will apply.
- (d) Where the Securities are Nth-to-Default Credit Linked Securities, if a Credit Event Determination Date has occurred in relation to one or more of the specified Reference Entities and "Credit Linked Redemption" is applicable in the Issue Terms, notwithstanding any provision to the contrary in these

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

Credit Linked Conditions, no settlement in accordance with Credit Linked Condition 2, Credit Linked Condition 3 or Credit Linked Condition 4, as applicable, will occur until such time as a Credit Event Determination Date has occurred in respect of the Relevant Number of Reference Entities (a "**Trigger**"). The Reference Entity in respect of which a Credit Event Determination Date has occurred which causes the Trigger to occur is referred to as the "**Triggering Reference Entity**" and the Relevant Number is the number specified as such in the Issue Terms. As of the day on which the Calculation Agent determines that a Credit Event Determination Date has occurred in respect of the Relevant Number of Reference Entities then (i) Credit Linked Condition 2, Credit Linked Condition 3 or Credit Linked Condition 4, as applicable, shall apply in relation only to the Triggering Reference Entity or (ii) if the Securities are Zero/Set Recovery Securities, the provisions of paragraph (h) below will apply.

- (e) Where the Securities are Non-Tranched Linear Basket Credit Linked Securities or Non-Tranched Index Credit Linked Securities to which Credit Payment on Maturity applies, Tranched Linear Basket Credit Linked Securities, Tranched Index Credit Linked Securities, Basket Tranched Index Credit Linked Securities or Long/Short Credit Linked Securities, if a Credit Event Determination Date has occurred in respect of any specified Reference Entity and "Credit Linked Redemption" is applicable in the Issue Terms, then, in respect of each Credit Linked Security, each Security shall be redeemed at the Credit Event Redemption Amount on the Credit Event Redemption Date, subject as provided in paragraph (i) below.

For the avoidance of doubt, this paragraph (e) will apply in relation to each Reference Entity in respect of which a Credit Event Determination Date has occurred.

In respect of Tranched Linear Basket Credit Linked Securities and for the avoidance of doubt, where a Credit Event Determination Date has occurred with respect to a number of Reference Entities that is equal to or less than L (as defined below), then the Credit Event Redemption Amount will be par.

In respect of Tranched Index Credit Linked Securities and for the avoidance of doubt, where the Attachment Point is not exceeded by the Aggregate Loss Percentage following the occurrence of any Credit Event Determination Date, then the Credit Event Redemption Amount will be par.

In respect of Basket Tranched Index Credit Linked Securities and for the avoidance of doubt, where the relevant Attachment Point is not exceeded by the relevant Aggregate Loss Percentage following the occurrence of any Credit Event Determination Date in respect of each of the Basket Tranched Index Components, then the Credit Event Redemption Amount will be par.

Prior to each date on which a payment is due on the Credit Linked Securities, the Issuer shall procure that Securityholders are notified in accordance with General Condition 13 of each Credit Event that has occurred since the previous payment date, provided that any delay or failure in the delivery of a such notice shall not affect the validity of any Credit Event Determination Date.

- (f) Where the Securities are Non-Tranched Linear Basket Credit Linked Securities or Non-Tranched Index Credit Linked Securities to which Credit Payment As You Go applies and "Credit Linked Redemption" is applicable in the Issue Terms, if a Credit Event Determination Date has occurred in respect of any specified Reference Entity: (i) the Issuer shall give notice in each case that a Credit Event Determination Date has occurred (such notice a "**Settlement Notice**") to the Securityholders in accordance with General Condition 13 and (ii) in respect of each Credit Linked Security:
- (i) the Issuer shall pay as an Instalment Amount for the purposes of General Condition 6(i) an amount equal to the relevant Credit Event Amount, if any, on the relevant Credit Event Payment Date which will be the relevant Instalment Date; and
 - (ii) each Security shall be redeemed at the Credit Event Redemption Amount on the Credit Event Redemption Date, provided that if on or prior to the Credit Event Redemption Date and save where any Protected Amount is payable, a Credit Event Determination Date has occurred in respect of all the specified Reference Entities each Credit Linked Security will be redeemed (together with accrued interest, if any) at the final Credit Event Amount on the final Credit Event Payment Date, subject as provided in paragraph (i) below.

For the avoidance of doubt part (i) of this provision will apply and part (ii) of this provision will apply in relation to each Reference Entity in respect of which a Credit Event Determination Date has occurred.

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

Any delay in the delivery of a Settlement Notice or failure by the Issuer to deliver a Settlement Notice shall not affect the validity of the Credit Event Determination Date in respect of the affected Reference Entity.

- (g) Where only a part of an issuance of Securities is credit linked (which will be the case where the Credit Multiplier is less than 1), references in these Credit Linked Conditions to the "Scheduled Maturity Date" shall be references to the Scheduled Maturity Date of the credit linked part of the Securities only and notwithstanding any other provision of the Conditions, the Maturity Date of the Securities shall be the later of the Maturity Date determined in accordance with these Credit Linked Conditions, and the final Instalment Date specified in the Issue Terms.
- (h) Where the Securities are Zero/Set Recovery Securities then if a Credit Event Determination Date has occurred in respect of any Reference Entity (in the case of Single Reference Entity Credit Linked Securities, Linear Basket Credit Linked Securities, Index Credit Linked Securities, First-to-Default Credit Linked Securities or Long/Short Credit Linked Securities) or in respect of the Triggering Reference Entity (in the case of Nth-to-Default Credit Linked Securities) then following a Credit Event Determination Date in respect of any such Reference Entity the provisions of Credit Linked Conditions 2, 3 or 4 will not apply but (i) each Single Reference Entity Credit Linked Security, First-to-Default Credit Linked Security and Nth-to-Default Credit Linked Security will be redeemed by payment of the Credit Event Redemption Amount, if any, on the Credit Event Redemption Date together with accrued interest, if any, and (ii) each Linear Basket Credit Linked Security, Index Credit Linked Security or Long/Short Credit Linked Security may be redeemed (or otherwise) as provided in paragraph (e) or (f) above, as applicable and/or paragraph (i) below, if applicable.
- (i) Where any Credit Event Redemption Amount is zero (whether the Securities are Zero/Set Recovery Securities or otherwise) then, other than for the payment of any accrued interest or any other due but unpaid amounts or any interest amount not subject to the Credit Linked Conditions, the Securities will be cancelled as of the Credit Event Redemption Date or, if other, the day on which it is determined that the Credit Event Redemption Amount is or would be, were it to be so calculated in respect of such day, zero with no payment being due other than any final amount of accrued interest or any other due but unpaid amounts. The Issuer will have no further obligations in respect of the Credit Linked Securities.
- (j) For the avoidance of doubt, the aggregate outstanding nominal amount in respect of Zero Coupon Securities is equal to 100 per cent. of their face amount.
- (k) For the avoidance of doubt the provisions of Credit Linked Conditions 6, 7, 8, 9 and 11 may each apply to First-to-Default Credit Linked Securities and Nth-to-Default Credit Linked Securities meaning that subject to paragraph 1(g) above, the Maturity Date may be delayed beyond the Scheduled Maturity Date in certain circumstances.
- (l) If any purchase and cancellation of Securities occurs under General Condition 6(g) or any further issue under General Condition 12, the Calculation Agent will make such adjustments to the applicable Issue Terms and/or these Credit Linked Conditions as it determines appropriate (including Reference Entity Notional Amounts) to ensure the Securities continue to reflect economic intentions.

2. Auction Settlement

- (a) Where Auction Settlement is specified as the applicable Settlement Method in the Issue Terms and a Credit Event Determination Date occurs on or prior to the Auction Final Price Determination Date, the Issuer shall give notice (such notice an "**Auction Settlement Notice**") to the Securityholders in accordance with General Condition 13, and, subject to these Credit Linked Conditions where "Credit Linked Redemption" is specified as applicable in the Issue Terms only, in particular Credit Linked Condition 1, redeem all but not some only of the Credit Linked Securities, each Credit Linked Security being redeemed by the Issuer at the Credit Event Redemption Amount in the relevant Specified Securities Currency on the Credit Event Redemption Date.
- (b) Unless settlement has occurred in accordance with the paragraph above, if:
 - (i) an Auction Cancellation Date occurs;
 - (ii) a No Auction Announcement Date occurs (and in circumstances where such No Auction Announcement Date occurs pursuant to paragraphs (b) or (c)(ii) of the definition of No Auction Announcement Date, the Issuer has not exercised the Movement Option);
 - (iii) a DC Credit Event Question Dismissal occurs; or

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

- (iv) a Credit Event Determination Date was determined pursuant to paragraph a(i) of the definition of Credit Event Determination Date or paragraph (a) of the definition of Non-Standard Credit Event Determination Date and no Credit Event Resolution Request Date has occurred in respect of the relevant Credit Event on or prior to the date falling three Business Days after such Credit Event Determination Date,
- then:
- (x) if Fallback Settlement Method – Cash Settlement is specified as applicable in the Issue Terms, the Issuer shall redeem the Credit Linked Securities in accordance with Credit Linked Condition 3 below; or
- (y) if Fallback Settlement Method – Physical Delivery is specified as applicable in the Issue Terms, the Issuer shall redeem the Credit Linked Securities in accordance with Credit Linked Condition 4 below.

If a Credit Event Determination Date has occurred and the Securities become redeemable in accordance with this Credit Linked Condition 2, upon payment of the Credit Event Redemption Amounts in respect of the Securities, the Issuer shall have discharged its obligations in respect of the Securities and shall have no other liability or obligation whatsoever in respect thereof. The Credit Event Redemption Amount may be less than the nominal amount of a Credit Linked Security. Any shortfall shall be borne by the Securityholders and no liability shall attach to the Issuer or the Guarantor. For the avoidance of doubt, following redemption of a portion of the Securities in accordance with the foregoing, the Issuer may still have payment obligations in respect of any outstanding portion of the Securities.

3. Cash Settlement

If a Credit Event Determination Date has occurred, then where Cash Settlement is specified as the applicable Settlement Method in the Issue Terms or if Credit Linked Condition 2(b)(iv)(x) above applies, the Issuer shall give notice (such notice a "**Cash Settlement Notice**") to the Securityholders in accordance with General Condition 13, and, where "Credit Linked Redemption" is specified as applicable, subject to these Credit Linked Conditions, in particular Credit Linked Condition 1, redeem all but not some only of the Credit Linked Securities, each Credit Linked Security being redeemed by the Issuer at the Credit Event Redemption Amount in the relevant Specified Securities Currency on the Credit Event Redemption Date.

If Cash Settlement applies and "Mod R" is specified as applicable in the Issue Terms and Restructuring is the only Credit Event specified in a Credit Event Notice, then, unless the Valuation Obligation is a Prior Deliverable Obligation and Asset Package Delivery applies due to a Governmental Intervention, a Valuation Obligation may be included in the Valuation Obligations Portfolio only if it (i) is a Fully Transferable Obligation and (ii) has a final maturity date not later than the applicable Restructuring Maturity Limitation Date in each case as of each such date as the Calculation Agent determines relevant for purposes of the Hedging Arrangements.

If Cash Settlement applies and "Mod Mod R" is specified as applicable in the Issue Terms and Restructuring is the only Credit Event specified in a Credit Event Notice, then unless the Valuation Obligation is a Prior Deliverable Obligation and Asset Package Delivery applies due to a Governmental Intervention, a Valuation Obligation may be included in the Valuation Obligations Portfolio only if it (i) is a Conditionally Transferable Obligation and (ii) has a final maturity date not later than the applicable Modified Restructuring Maturity Limitation Date, in each case, as of each such date as the Calculation Agent determines relevant for purposes of the Hedging Arrangements. For the purposes of this paragraph only and notwithstanding the foregoing, in the case of a Restructured Bond or Loan with a final maturity date on or prior to the 10-year Limitation Date, the final maturity date of such Bond or Loan shall be deemed to be the earlier of such final maturity date or the final maturity date of such Bond or Loan immediately prior to the relevant Restructuring.

If a Credit Event Determination Date has occurred and the Securities become redeemable in accordance with this Credit Linked Condition 3, upon payment of the Credit Event Redemption Amounts in respect of the Securities, the Issuer shall have discharged its obligations in respect of the Securities and shall have no other liability or obligation whatsoever in respect thereof. The Credit Event Redemption Amount may be less than the nominal amount of a Credit Linked Security. Any shortfall shall be borne by the Securityholders and no liability shall attach to the Issuer or the Guarantor. For the avoidance of doubt, following redemption of a portion of the Securities in

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

accordance with the foregoing, the Issuer may still have payment obligations in respect of any outstanding portion of the Securities.

4. Physical Settlement

If a Credit Event Determination Date has occurred, then where Physical Delivery is specified as the applicable Settlement Method in the Issue Terms or if Credit Linked Condition 2(b)(iv)(y) above applies, then, subject to any prior redemption, the Issuer shall, following the receipt of a Calculation Agent Physical Settlement Notice, give notice (such notice a "**Notice of Physical Settlement**") to the Securityholders in accordance with General Condition 13, and where "Credit Linked Redemption" is specified as applicable subject to these Credit Linked Conditions, in particular Credit Linked Condition 1, redeem all but not some only of the Credit Linked Securities, each Credit Linked Security being redeemed by the Issuer by the Delivery of the Deliverable Obligations comprising the Entitlement on the Credit Settlement Date, subject to and in accordance with the General Conditions and these Credit Linked Conditions. The relevant Asset Package, if applicable, will be deemed to be a Deliverable Obligation and the composition of the Asset Package and the Entitlement in respect of each Credit Linked Security equal to the Calculation Amount will be determined by reference to the relevant Prior Deliverable Obligation or Package Observable Bond specified in the relevant Notice of Physical Settlement or Physical Settlement Amendment Notice, as applicable. Where appropriate the Calculation Agent may make any adjustment in relation to provisions for physical delivery and determination of the Entitlement to take account of the relevant Asset Package.

In the Notice of Physical Settlement, the Issuer shall specify the Deliverable Obligations comprising the Entitlement that it reasonably expects to Deliver. For the avoidance of doubt, the Issuer shall be entitled to select any of the Deliverable Obligations to constitute the Entitlement, irrespective of their market value. The Notice of Physical Settlement shall include (i) details of the relevant Reference Entity, (ii) the Outstanding Principal Balance or Due and Payable Amount, as applicable, or the equivalent amount in the Settlement Currency (in each case the relevant "**Outstanding Amount**") and, if different, the face amount, of each such Deliverable Obligation. The aggregate Outstanding Amount of all Deliverable Obligations specified in the Notice of Physical Settlement that the Issuer intends to Deliver shall be the relevant "**Aggregate Outstanding Amount**".

The Issuer may, from time to time, amend a Notice of Physical Settlement by delivering a notice to Securityholders in accordance with General Condition 13, (each such notification, a "**Physical Settlement Amendment Notice**") that the Issuer is replacing, in whole or in part, one or more Deliverable Obligations specified in the Notice of Physical Settlement or a prior Physical Settlement Amendment Notice, as applicable, (to the extent the relevant Deliverable Obligation has not been Delivered as of the date such Physical Settlement Amendment Notice is effective). A Physical Settlement Amendment Notice shall specify each replacement Deliverable Obligation that the Issuer will Deliver (each, a "**Replacement Deliverable Obligation**") and shall also specify the Outstanding Amount of each Deliverable Obligation identified in the Notice of Physical Settlement or a prior Physical Settlement Amendment Notice, as applicable, that is being replaced (with respect to each such Deliverable Obligation, the "**Replaced Deliverable Obligation Outstanding Amount**"). The Outstanding Amount of each Replacement Deliverable Obligation identified in the Physical Settlement Amendment Notice shall be determined by applying the Revised Currency Rate to the relevant Replaced Deliverable Obligation Outstanding Amount. The Outstanding Amount of the Replacement Deliverable Obligation(s) specified in any Physical Settlement Amendment Notice in aggregate with the Outstanding Amount of the Deliverable Obligation(s) specified in the Notice of Physical Settlement or any earlier Physical Settlement Amendment Notice which, in each case, are not being replaced must not be greater than the Aggregate Outstanding Amount. Each such Physical Settlement Amendment Notice must be effective on or prior to the Credit Settlement Date (determined without reference to any change resulting from such Physical Settlement Amendment Notice). Notwithstanding the foregoing, (i) the Issuer may correct any errors or inconsistencies contained in the Notice of Physical Settlement or any Physical Settlement Amendment Notice, as applicable, by notice to Securityholders in accordance with General Condition 13, prior to the relevant Delivery Date; and (ii) if Asset Package Delivery is applicable, the Issuer shall on the PSN Effective Date, or as soon as reasonably practicable thereafter (but in any case, prior to the Delivery Date), notify the Securityholders (in accordance with General Condition 13) of the detailed description of the Asset Package, if any, that the Issuer will Deliver in lieu of the Prior Deliverable Obligation or Package Observable Bond, if any, specified in the Notice of Physical Settlement or Physical Settlement Amendment Notice, as applicable, it being understood in each case that any such notice of correction shall not constitute a Physical Settlement Amendment Notice.

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

If Physical Settlement applies and "Mod R" is specified as applicable in the Issue Terms and Restructuring is the only Credit Event specified in a Credit Event Notice, then, unless the Deliverable Obligation is a Prior Deliverable Obligation and Asset Package Delivery applies due to a Governmental Intervention, a Deliverable Obligation may be included in the Entitlement only if it (i) is a Fully Transferable Obligation and (ii) has a final maturity date not later than the applicable Restructuring Maturity Limitation Date in each case as of each such date as the Calculation Agent determines relevant for purposes of the Hedging Arrangements.

If Physical Settlement applies and "Mod Mod R" is specified as applicable in the Issue Terms and Restructuring is the only Credit Event specified in a Credit Event Notice, then unless the Deliverable Obligation is a Prior Deliverable Obligation and Asset Package Delivery applies due to a Governmental Intervention, a Deliverable Obligation may be included in the Entitlement only if it (i) is a Conditionally Transferable Obligation and (ii) has a final maturity date not later than the applicable Modified Restructuring Maturity Limitation Date, in each case, as of each such date as the Calculation Agent determines relevant for purposes of the Hedging Arrangements. For the purposes of this paragraph only and notwithstanding the foregoing, in the case of a Restructured Bond or Loan with a final maturity date on or prior to the 10-year Limitation Date, the final maturity date of such Bond or Loan shall be deemed to be the earlier of such final maturity date or the final maturity date of such Bond or Loan immediately prior to the relevant Restructuring.

If a Credit Event Determination Date has occurred and the Securities become redeemable in accordance with this Credit Linked Condition 4, upon Delivery of the Deliverable Obligations and/or payment of the Partial Cash Settlement Amounts, as the case may be, the Issuer shall have discharged its obligations in respect of the Securities and shall have no other liability or obligation whatsoever in respect thereof. The value of such Deliverable Obligations and/or the Partial Cash Settlement Amount, as the case may be, may be less than the nominal amount of a Credit Linked Security. Any shortfall shall be borne by the Securityholders and no liability shall attach to the Issuer or the Guarantor. For the avoidance of doubt, following redemption of a portion of the Securities in accordance with the foregoing, the Issuer may still have payment obligations in respect of any outstanding portion of the Securities.

5. Accrual of Interest

- (a) Where "Credit Linked Interest" is specified in the Issue Terms to not apply or the Credit Linked Conditions are specified in the Issue Terms not to apply to any interest provisions of the Securities then, notwithstanding the occurrence of a Credit Event Determination Date, for such purposes, each Security will continue to bear interest in accordance with General Condition 4(g) up to but excluding the Scheduled Maturity Date (with such date being deemed to be the final Interest Payment Date).
- (b) If "Credit Linked Interest" is applicable but "Credit Linked Redemption" is not applicable, then notwithstanding "Credit Linked Redemption" is not applicable, any notice that the Issuer would be obliged under the Credit Linked Conditions to provide to Securityholders if "Credit Linked Redemption" were applicable, shall nevertheless be provided to Securityholders unless the Calculation Agent determines that such notice is not relevant given "Credit Linked Redemption" is not applicable.
- (c) Where the Securities are Single Reference Entity Securities, First-to-Default Credit Linked Securities, or Nth-to-Default Credit Linked Securities, and "Credit Linked Interest" is applicable in the Issue Terms, then, subject as provided in paragraph (d) in respect of Nth-to-Default Credit Linked Securities, if and to the extent that:
 - (i) "Accrual of Interest up to Credit Event" is specified in the Issue Terms as not applicable to any interest provisions of the Securities then, notwithstanding General Condition 4(g), each Security to which the Credit Linked Conditions apply shall, to the extent to which "Credit Linked Interest" is expressed to apply to such Securities, cease to bear interest from the Interest Payment Date immediately preceding the Credit Event Determination Date, or if the Credit Event Determination Date is an Interest Payment Date such Interest Payment Date, or, if the Credit Event Determination Date falls prior to the first Interest Payment Date, no interest shall accrue on the Securities; or
 - (ii) "Accrual of Interest up to Credit Event" is specified in the Issue Terms as applicable to any interest provisions of the Securities then, notwithstanding General Condition 4(g), each Security to which the Credit Linked Conditions apply shall, to the extent to which "Credit Linked Interest" is expressed to apply to such Securities, cease to bear interest from the Credit Event Determination Date; and

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

provided that, in the case of (i) or (ii) if:

- (x) Credit Linked Condition 6, Credit Linked Condition 7 or Credit Linked Condition 8 applies in respect of the Securities and, in the case of Credit Linked Condition 6, a Repudiation/Moratorium has not occurred on or prior to the Repudiation/Moratorium Evaluation Date or, in the case of Credit Linked Condition 7, a Failure to Pay has not occurred on or prior to the Grace Period Extension Date or, in the case of Credit Linked Condition 8, a Credit Event has not occurred on or prior to the DC Cut-off Date, as the case may be; and/or
- (y) Credit Linked Condition 9 applies in respect of the Securities and a Credit Event Determination Date or the Repudiation/Moratorium Extension Condition, as applicable, has not occurred or are not satisfied on or prior to the Postponed Maturity Date,

- (d) Where the Securities are Nth-to-Default Credit Linked Securities and "Credit Linked Interest" is applicable, no interest adjustment in accordance with this Credit Linked Condition 5 will occur until such time as a Trigger has occurred. - (e) Where the Securities are Non-Tranched Linear Basket Credit Linked Securities or Non-Tranched Index Credit Linked Securities to which Credit Payment on Maturity applies, Tranched Linear Basket Credit Linked Securities, Tranched Index Credit Linked Securities, Basket Tranched Index Credit Linked Securities or Long/Short Credit Linked Securities, if a Credit Event Determination Date has occurred in respect of any specified Reference Entity and "Credit Linked Interest" is specified as applicable then, in respect of each Credit Linked Security unless the Credit Linked Security is a Zero Coupon Security, the interest calculation basis described in paragraph (g) below will apply.

For the avoidance of doubt paragraph (e) above will apply in relation to each Reference Entity in respect of which a Credit Event Determination Date has occurred.

- (f) Where the Securities are Non-Tranched Linear Basket Credit Linked Securities or Non-Tranched Index Credit Linked Securities to which Credit Payment As You Go applies and "Credit Linked Interest" is specified as applicable then, if a Credit Event Determination Date has occurred in respect of any specified Reference Entity: (i) the Issuer shall give notice in each case that a Credit Event Determination Date has occurred (such notice a "**Settlement Notice**") to the Securityholders in accordance with General Condition 13 and (ii) in respect of each Credit Linked Security unless the Credit Linked Security is a Zero Coupon Security, the interest calculation basis described in paragraph (g) below will apply.

For the avoidance of doubt paragraph (f) above will apply in relation to each Reference Entity in respect of which a Credit Event Determination Date has occurred.

Any delay in the delivery of a Settlement Notice or failure by the Issuer to deliver a Settlement Notice shall not affect the validity of the Credit Event Determination Date in respect of the affected Reference Entity.

- (g) In the case of Linear Basket Credit Linked Securities or Index Credit Linked Securities or Long/Short Credit Linked Securities, each Security will bear interest pursuant to, and in accordance with, General Condition 4, and for such purposes the aggregate outstanding nominal amount of the Securities shall be deemed to be the Adjusted Credit Outstanding Nominal Amount or, in the case of each of General Condition 4(a)(y) or 4(b)(v)(B), the Calculation Amount shall be deemed to be each Security's pro rata share of the Adjusted Credit Outstanding Nominal Amount, in each case on the relevant Interest Payment Date or the relevant date for payment pursuant to Credit Linked Conditions 6, 7, 8, 9 or 11. For the avoidance of doubt, this paragraph (g) is intended to apply to Linear Basket Credit Linked Securities or Index Credit Linked Securities or Long/Short Credit Linked Securities which are Zero Coupon Securities, subject to the provisions of sub-paragraph (h) below.

- (h) For these purposes "**Adjusted Credit Outstanding Nominal Amount**" means, on any Interest Payment Date or date for payment pursuant to Credit Linked Conditions 6, 7, 8, 9, or 11:

6. Repudiation/Moratorium Extension

If "Repudiation/Moratorium" is specified as a Credit Event in the Issue Terms, the provisions of this Credit Linked Condition 6 shall apply.

Where a Credit Event Determination Date has not occurred on or prior to the Credit Observation End Date or any Interest Payment Date (determined by reference to the Relevant Time) but the Repudiation/Moratorium Extension Condition has been satisfied on or prior to the Credit Observation End Date or any Interest Payment Date or, if Credit Linked Condition 9(y) applies, the Postponed Maturity Date or Postponed Interest Payment Date (as defined in Credit Linked Condition 9) and the Repudiation/Moratorium Evaluation Date in respect of such Potential Repudiation/Moratorium may, in the sole determination of the Calculation Agent, fall after the Scheduled Maturity Date or relevant Interest Payment Date, then the Calculation Agent shall notify the Securityholders in accordance with General Condition 13 that a Potential Repudiation/Moratorium has occurred and the maturity of the Securities and/or relevant interest payment will be delayed and:

In the Partial Cash Settlement Notice, the Issuer must give details of why it is unable to deliver the relevant Undeliverable Obligations or Hedge Disruption Obligation, as the case may be.

Unless otherwise specified in the Issue Terms, for the purposes of this Credit Linked Condition 10 only the following terms shall be defined as follows and such definitions will apply notwithstanding other definitions of such terms in Credit Linked Condition 13:

"Indicative Quotation" means, in accordance with the Quotation Method, each quotation obtained from a Quotation Dealer at the Valuation Time for (to the extent reasonably practicable) an amount of the Undeliverable Obligation or Hedge Disruption Obligations, as the case may be, equal to the Quotation Amount, which reflects such Quotation Dealer's reasonable assessment of the price of such Undeliverable Obligation or Hedge Disruption Obligation, as the case may be, based on such factors as such Quotation Dealer may consider relevant, which may include historical prices and recovery rates.

"Market Value" means, with respect to an Undeliverable Obligation or Hedge Disruption Obligation, as the case may be, on a Valuation Date, (i) if more than three Full Quotations are obtained, the arithmetic mean of such Full Quotations, disregarding the Full Quotations having the highest and lowest values (and, if more than one such Full Quotations have the same highest or lowest value, then one of such highest or lowest Full Quotations shall be disregarded); (ii) if exactly three Full Quotations are obtained, the Full Quotation remaining after disregarding the highest and lowest Full Quotations (and, if more than one such Full Quotations have the same highest value or lowest value, then one of such highest or lowest Full Quotations shall be disregarded); (iii) if exactly two Full Quotations are obtained, the arithmetic mean of such Full Quotations; (iv) if fewer than two Full Quotations are obtained and a Weighted Average Quotation is obtained, such Weighted Average Quotation; (v) if Indicative Quotations are specified as applying in the Issue Terms and exactly three Indicative Quotations are obtained, the Indicative Quotation remaining after disregarding the highest and lowest Indicative Quotations (and, if more than one such Indicative Quotations have the same highest or lowest value, then one of such highest or lowest Indicative Quotations shall be disregarded); (vi) if fewer than two Full Quotations are obtained and no Weighted Average Quotation is obtained (and, if Indicative Quotations are applicable, fewer than three Indicative Quotations are obtained) then, subject to paragraph (b) of the definition of "Quotation" below, an amount as determined by the Calculation Agent on the next Business Day on which at least two Full Quotations or a Weighted Average Quotation or, if applicable, three Indicative Quotations are obtained; and (vii) if fewer than two Full Quotations are obtained and no Weighted Average Quotation is obtained (and, if Indicative Quotations are applicable, fewer than three Indicative Quotations are obtained) on the same Business Day on or prior to the tenth Business Day following the Valuation Date the Market Value shall be any Full Quotation obtained from a Quotation Dealer at the Valuation Time on such tenth Business Day or, if no Full Quotation is obtained, the weighted average of any firm quotations (or, if applicable, Indicative Quotations) for the Undeliverable Obligation or Hedge Disruption Obligation, as the case may be, obtained from Quotation Dealers at the Valuation Time on such tenth Business Day with respect to the aggregate portion of the Quotation Amount for which such quotations were obtained and a quotation

deemed to be zero for the balance of the Quotation Amount for which firm quotations (or, if applicable, Indicative Quotations) were not obtained on such day.

"Partial Cash Settlement Amount" is deemed to be, for an Undeliverable Obligation or a Hedge Disruption Obligation, as the case may be, an amount calculated by the Calculation Agent equal to the greater of (i) (A) the Outstanding Principal Balance, the Due and Payable Amount or the Currency Amount, as applicable, of each Undeliverable Obligation or Hedge Disruption Obligation, as the case may be, multiplied by (B) the Final Price with respect to such Undeliverable Obligation or Hedge Disruption Obligation, determined as provided in this Credit Linked Condition less if applicable (C) a *pro rata* share of Unwind Costs, if any (but excluding any Unwind Costs already taken into account in calculating the relevant Entitlement), and (ii) zero provided that where (i) the relevant Undeliverable Obligation or Hedge Disruption Obligation forms part of the Asset Package and the Calculation Agent determines in its sole discretion that a Final Price cannot reasonably be determined in respect of such Undeliverable Obligation or Hedge Disruption Obligation, then the Partial Cash Settlement Amount will be an amount calculated by the Calculation Agent in its sole discretion equal to the fair market value of the relevant Undeliverable Obligation or Hedge Disruption Obligation less Unwind Costs.

"Partial Cash Settlement Date" is deemed to be the date falling three Business Days after the calculation of the Final Price.

Without prejudice to the paragraphs above:

- (a) in the case of iTraxx Index Credit Linked Securities (or Long/Short Credit Linked Securities referencing such Index), the Reference Obligation will be the Reference Obligation (if any) specified as such opposite the relevant Reference Entity in the Index Annex, subject to the definition of "Substitute Reference Obligation" below and the following paragraph:

ADDITIONAL TERMS AND CONDITIONS FOR EUA CONTRACT LINKED SECURITIES

3. Determination of Market Disruption Events

The Calculation Agent will determine if a Market Disruption Event has occurred acting in good faith and in a commercially reasonable manner. Where the occurrence of an event or set of circumstances is capable of triggering more than one Market Disruption Event, the Issuer may determine which Market Disruption Event is to be triggered, in its sole and absolute discretion.

In considering whether the occurrence of an event or set of circumstances triggers a Market Disruption Event, the Calculation Agent may have regard to the combined effect, from the Trade Date, of any event or set of circumstances, as the case may be, if such event or set of circumstances occurs more than once.

4. Consequences of a Market Disruption Event and Disruption Fallbacks

4.1 If the Calculation Agent determines that a Market Disruption Event has occurred, the Issuer or shall, as soon as reasonably practicable after having been notified of such determination by the Calculation Agent, give notice ("**Market Disruption Event Notice**") to the Securityholders in accordance with in accordance with General Condition 13 (*Notices*) as soon as practicable thereafter (which notice shall be irrevocable) of the occurrence of such Market Disruption Event (the date on which a Market Disruption Event Notice is given, a "**Market Disruption Event Notification Date**") and set out, if determined at that time, the action that it has determined to take in respect of the Market Disruption Event pursuant to EUA Contract Linked Security Condition 4.2 below. Where the action that the Issuer or has determined to take is not, for whatever reason, set out in the Market Disruption Event Notice, the action that the Issuer has determined to take shall be set out in a subsequent notice given to Securityholders in accordance with General Condition 13 (*Notices*) as soon as reasonably practicable after the Market Disruption Event Notification Date.

For such purposes, a Market Disruption Event shall be considered to be "continuing" if it has not been remedied to the reasonable satisfaction of the Issuer.

The Issuer shall provide Securityholders with a Market Disruption Event Notice as soon as reasonably practicable following the determination of a Market Disruption Event. However, neither the Issuer, the Guarantor nor the Calculation Agent shall be responsible for any loss, underperformance or opportunity cost suffered or incurred by any Securityholder or any other person in connection with the Securities as a result of any delay, howsoever arising. If the Issuer gives a Market Disruption Event Notice, it shall have no obligation to make any payment or delivery in respect of the EUA Contract Linked Securities until it has determined the action that it has determined to take pursuant to EUA Contract Linked Condition 4.2 below.

4.2 Following the occurrence of a Market Disruption Event, the Issuer in its sole and absolute discretion may take the action described below in (a), (b), or (c).

(a) ***No Action***

If the Issuer in its sole and absolute discretion determines that the action to be taken in respect of the Market Disruption Event is to be "**No Action**", then the EUA Contract Linked Securities shall continue and there shall be no amendment to the Terms and Conditions and/or the applicable Issue Terms.

(b) ***Adjustment***

If the Issuer in its sole and absolute discretion determines that the action to be taken in respect of the Market Disruption Event is to be "**Adjustment**", then the Calculation Agent acting on instructions from the Issuer may determine, in its sole and absolute discretion, the appropriate adjustment(s), if any, to be made to any of the terms of these Terms and Conditions and/or the applicable Issue Terms (including adjusting any cost or cost adjustment) to take account of the economic effect of the Market Disruption Event and determine the effective date of such adjustment. Such adjustments may but do not have to include determining any EUA Contract Fallback Value(s).

(c) ***Termination***

ADDITIONAL TERMS AND CONDITIONS FOR EUA CONTRACT LINKED SECURITIES

If the Issuer determines that the action to be taken in respect of the Market Disruption Event is to be "**Termination**", on giving notice to Securityholders in accordance with General Condition 13 (*Notices*) (which such notice may be included in the Market Disruption Event Notice in respect of the relevant Market Disruption Event) the outstanding EUA Contract Linked Securities shall be redeemed by payment of the Early Redemption Amount. Payment will be made in such manner and on such date as shall be notified to the Securityholders in accordance with General Condition 13 (*Notices*).

(d) **General**

In determining to take a particular action as a result of a Market Disruption Event, the Issuer is under no duty to consider the interests of Securityholders or any other person. In making any determination as to which action to take following the occurrence of a Market Disruption Event, neither the Issuer, the Guarantor nor the Calculation Agent shall be responsible for any loss (including any liability in respect of interest), underperformance or opportunity cost suffered or incurred by Securityholders or any other person in connection with the EUA Contract Linked Securities as a result of any such determination, howsoever such loss may arise including as a result of any delay in making any payment or delivery in respect of the EUA Contract Linked Securities. Any obligation or role of the Issuer or Guarantor specified in these EUA Contract Linked Conditions may be performed on its behalf by the Calculation Agent.

5. Correction of EUA Contract Reference Price

With the exception of any corrections published after the day which is three EUA Contract Business Days prior to the due date for any payment under the Securities, if the EUA Contract Reference Price published on a given day and used or to be used by the Calculation Agent to make any determination under the Securities is subsequently corrected and the correction published by the relevant Exchange or any other person responsible for the publication or announcement of the EUA Contract Reference Price within 30 calendar days of the original publication, the price to be used shall be the price of the relevant EUA Contract as so corrected. Corrections published after the day which is three EUA Contract Business Days prior to a due date for payment under the Securities will be disregarded by the Calculation Agent for the purposes of determining the relevant amount.

6. Rolling Futures Contract Securities

If the applicable Issue Terms specify that the Securities are "**Rolling Futures Contract Securities**", the EUA Contract Reference Price in respect of the Securities will be valued by reference to rolling futures contracts each of which have delivery months that do not correspond with the term of the Securities. In such case, on or prior to the Issue Date, the Calculation Agent will select the relevant Futures Contract and for each following day until the Futures Rollover Date such futures contract will be the Futures Contract for the purposes of the EUA Contract Reference Price. On each Futures Rollover Date, the Calculation Agent will select another Futures Contract and such contract shall be the Futures Contract for the purposes of the EUA Contract Reference Price until the next occurring Futures Rollover Date. If on a Futures Rollover Date a Market Disruption Event occurs and it is impossible or materially impracticable for the Calculation Agent to select a Futures Contract and/or at such time hedge the Issuer's obligations in respect of the Securities then the provisions of EUA Contract Linked Condition 4.2 (Consequences of a Market Disruption Event and Disruption Fallbacks) shall apply to the Securities

FORM OF SECURITIES

FORM OF SECURITIES

The Securities of each Series will be in either bearer form, with or without interest coupons attached, or registered form, without interest coupons attached, Bearer Securities will be issued outside the United States in reliance on Regulation S. 3(a)(2) Notes will be issued only as Registered Securities. Registered Securities (other than 3(a)(2) Notes) will be issued both outside the United States in reliance on the exemption from registration provided by Regulation S and within the United States in reliance on Rule 144A, and such Registered Securities in definitive form may be sold, in the case of Securities issued by BBVA Global Markets B.V., to Institutional Accredited Investors who are also QPs and, in the case of Securities issued by BBVA Global Securities B.V., to Institutional Accredited Investors and, in either case, to non-US persons. Registered Securities issued by BBVA Global Securities B.V. may be issued as 3(a)(2) Notes. In this Base Prospectus, Bearer Securities and Registered Securities are collectively referred to as "**Certificated Securities**".

Bearer Securities

Each Tranche of Bearer Securities will be initially issued in the form of a temporary bearer global security (a "**Temporary Bearer Global Security**") or a permanent global security (a "**Permanent Bearer Global Security**") as indicated in the Issue Terms, which, in either case, will (i) if the Global Securities are intended to be issued in new global security ("**NGS**") form, as stated in the Issue Terms, be delivered on or prior to the original issue date of the Tranche to a common safekeeper for Euroclear and Clearstream, Luxembourg; or (ii) if the Global Securities are not intended to be issued in NGS form, as stated in the Issue Terms, be delivered on or prior to the original issue date of the Tranche to a common depository for Euroclear and Clearstream, Luxembourg.

Where the Global Securities issued in respect of any Tranche are in NGS form, the applicable Issue Terms will also indicate whether or not such Global Securities are intended to be held in a manner which would allow Eurosystem eligibility. Any indication that the Global Securities are to be so held means that the Securities of a particular Tranche are intended upon issue to be deposited with one of the ICSDs as common safekeeper and does not necessarily mean that the Securities of the relevant Tranche will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any time during their life as such recognition depends upon satisfaction of the Eurosystem eligibility criteria. The common safekeeper for NGSs will either be Euroclear or Clearstream, Luxembourg or another entity approved by Euroclear and Clearstream, Luxembourg, as indicated in the applicable Issue Terms.

Whilst any Bearer Security is represented by a Temporary Bearer Global Security, payments of principal, interest (if any) and any other amount payable in respect of the Securities due prior to the Exchange Date (as defined below) will be made (against presentation of the Temporary Bearer Global Security if the Temporary Bearer Global Security is not intended to be issued in NGS form) only to the extent that certification of non-U.S. beneficial ownership, as required by U.S. Treasury regulations, has been received by Euroclear and/or Clearstream, Luxembourg, as applicable, has given a like certification (based on the certifications it has received) to the Principal Paying Agent.

On and after the date (the "**Exchange Date**") which is 40 days after a Temporary Bearer Global Security is issued, interests in such Temporary Bearer Global Security will be exchangeable (free of charge) upon a request as described therein either for (i) interests in a Permanent Bearer Global Security of the same Series or (ii) for definitive Bearer Securities of the same Series with, where applicable, coupons and talons attached (as indicated in the Issue Terms and subject, in the case of definitive Bearer Securities, to such notice period as is specified in the Issue Terms), in each case against certification of beneficial ownership as described above unless such certification has already been given, provided that purchasers in the United States and certain U.S. persons will not be able to receive definitive Bearer Securities. The holder of a Temporary Bearer Global Security will not be entitled to collect any payment of interest, principal or other amount due on or after the Exchange Date unless, upon due certification, exchange of the Temporary Bearer Global Security for an interest in a Permanent Bearer Global Security or for definitive Bearer Securities is improperly withheld or refused.

Payments of principal, interest (if any) or any other amounts on a Permanent Bearer Global Security will be made through Euroclear and/or Clearstream, Luxembourg (against presentation or surrender (as the case may be) of the Permanent Bearer Global Security if the Permanent Bearer Global Security is not intended to be issued in NGS form) without any requirement for certification.

The Issue Terms will specify that a Permanent Bearer Global Security will be exchangeable (free of charge), in whole but not in part, for definitive Bearer Securities with, where applicable, coupons and talons attached upon either (i) not less than 60 days' written notice from Euroclear and/or Clearstream, Luxembourg (acting on the instructions of any holder of an interest in such Permanent Bearer Global Security) to the Principal Paying

FORM OF SECURITIES

Agent as described therein or (ii) only upon the occurrence of an Exchange Event. For these purposes, "Exchange Event" means that (1) an Event of Default (as defined in General Condition 9) has occurred and is continuing, (2) the Issuer has been notified that both Euroclear and Clearstream, Luxembourg have been closed for business for a continuous period of 14 days (other than by reason of holiday, statutory or otherwise) or have announced an intention permanently to cease business or have in fact done so and no successor clearing system is available or (3) the Issuer has or will become subject to adverse tax consequences which would not be suffered were the Securities represented by the Permanent Bearer Global Security in definitive form. The Issuer will promptly give notice to Securityholders in accordance with General Condition 13 if an Exchange Event occurs. In the event of the occurrence of an Exchange Event, Euroclear and/or Clearstream, Luxembourg (acting on the instructions of any holder of an interest in such Permanent Bearer Global Security) or the Issuer, as the case may be, may give notice to the Principal Paying Agent requesting exchange and, in the event of the occurrence of an Exchange Event as described in (ii) above, the relevant Issuer may also give notice to the Principal Paying Agent requesting exchange. Any such exchange shall occur not later than 60 days after the date of receipt of the first relevant notice by the Principal Paying Agent. If the Global Security is a NGS, the relevant Issuer shall procure that details of such exchange be entered *pro rata* in the records of the relevant clearing system.

In the event that the Permanent Bearer Global Security is exchanged for definitive Bearer Securities, such definitive Bearer Securities shall be issued in the minimum Specified Denomination only. Securityholders who hold Securities in the relevant clearing system in amounts that are not integral multiples of the Specified Denomination may need to purchase or sell, on or before the Exchange Date, a nominal amount of Securities such that their holding is an integral multiple of the Specified Denomination.

The following legend will appear on Bearer Securities:

"ANY UNITED STATES PERSON WHO HOLDS THIS OBLIGATION WILL BE SUBJECT TO LIMITATIONS UNDER THE UNITED STATES INCOME TAX LAWS, INCLUDING THE LIMITATIONS PROVIDED IN SECTIONS 165(j) AND 1287(a) OF THE INTERNAL REVENUE CODE."

The sections referred to provide that United States holders, with certain exceptions, will not be entitled to deduct any loss on Bearer Securities or Coupons and will not be entitled to capital gains treatment in respect of any gain on any sale, disposition, redemption or payment of principal in respect of such Securities or interest coupons.

Securities which are represented by a Bearer Global Security will only be transferable in accordance with the rules and procedures for the time being of Euroclear or Clearstream, Luxembourg, as the case may be.

Bearer Securities with a term of more than one year (taking into account any unilateral right to extend the term) will be issued either in accordance with the provisions of United States Treasury Regulations 1.163-5(c)(1)(ii) and 1.163-5(c)(2)(i)(D) ("TEFRA D"), which definition shall include any successor rules for the purposes of Section 4701 of the U.S. Internal Revenue Code of 1986) or in accordance with the provisions of United States Treasury Regulations 1.163-5(c)(1)(ii) and 1.163-5(c)(2)(i)(C) ("TEFRA C"), which definition shall include any successor rules for the purposes of Section 4701 of the U.S. Internal Revenue Code of 1986). Bearer Securities issued in accordance with TEFRA D will be represented upon issue by a Temporary Bearer Global Security. Bearer Securities issued in accordance with TEFRA C will be represented upon issue by a Permanent Bearer Global Security. Each Temporary Global Security and Permanent Global Security will be delivered on or prior to the issue date for the relevant tranche to a common depository (in the case of Securities not in NGS form) or common safekeeper (in the case of Securities in NGS form) acting as agent for Euroclear and Clearstream, Luxembourg. Beneficial interests in a Permanent Bearer Global Security issued in accordance with TEFRA C will be exchangeable at any time and without any requirement for certification for Definitive Bearer Securities, in accordance with the terms of such Permanent Bearer Global Security and as specified in the relevant Issue Terms. Interests in a Temporary Bearer Global Security issued in accordance with TEFRA D will be exchangeable either for Definitive Bearer Securities or for interests in a Permanent Bearer Global Security, on or after the date which is forty (40) days after the date on which such Temporary Bearer Global Security is issued and upon certification as to non-U.S. beneficial ownership thereof or otherwise as required by U.S. Treasury Regulations, in accordance with the terms of such Temporary Bearer Global Security and as specified in the relevant Issue Terms.

For the purposes of complying with TEFRA D, Bearer Securities may not be offered or sold to a United States person. "United States person" means any person who is, for U.S. federal income tax purposes, (i) a citizen or resident of the United States, (ii) a corporation, partnership or other entity created or organised under the laws of

FORM OF SECURITIES

the United States or any political subdivision thereof or therein, or (iii) an estate or trust the income of which is subject to United States taxation regardless of its source.

Registered Securities

The Registered Securities of each Tranche offered and sold in reliance on Regulation S, which will be sold in offshore transactions to non-U.S. persons outside the United States, will initially be represented by a global security in registered form, without Receipts or Coupons, (a "**Regulation S Global Security**") which will be registered in the name of a nominee for a common safekeeper (if the Regulation S Global Security is issued under the new safekeeping structure ("**NSS**")) or a common depositary for, and registered in the name of a common nominee of, Euroclear and Clearstream, Luxembourg. Prior to expiry of the distribution compliance period (as defined in Regulation S) applicable to each Tranche of the Securities, beneficial interests in a Regulation S Global Security may not be offered or sold to, or for the account or benefit of, a U.S. person save as otherwise provided in General Condition 2 and such Regulation S Global Security will bear a legend regarding such restrictions on transfer.

The Registered Securities of each Tranche issued by BBVA Global Markets B.V. may only be offered and sold in the United States or to U.S. persons in private transactions (a) to "qualified institutional buyers" within the meaning of Rule 144A ("**QIBs**") who are also "qualified purchasers" within the meaning of Section 2(a)(51)(A) of the United States Investment Company Act of 1940, as amended (the "**1940 Act**") and the rules and regulations thereunder ("**QPs**"), or (b) to "accredited investors" (as defined in Rule 501(a)(1), (2), (3) or (7) under the Securities Act) that are institutions ("**Institutional Accredited Investors**") who are also "qualified purchasers" within the meaning of Section 2(a)(51)(A) of the United States Investment Company Act of 1940, as amended (the "**1940 Act**") and the rules and regulations thereunder ("**QPs**"), who agree to purchase the Securities for their own account and not with a view to the distribution thereof. The Registered Securities of each Tranche sold to QIBs who are also QPs will be represented by a global security in registered form (a "**Rule 144A Global Security**").

The Registered Securities of each Tranche issued by BBVA Global Securities B.V. (other than 3(a)(2) Notes) may only be offered and sold in the United States or to U.S. persons in private transactions (a) to QIBs or (b) to Institutional Accredited Investors who agree to purchase the Securities for their own account and not with a view to the distribution thereof. The Registered Securities of each Tranche sold to QIBs will be represented by a Rule 144A Global Security.

The Registered Securities of each Tranche that are 3(a)(2) Notes issued by BBVA Global Securities B.V. will be represented by a global security in registered form (a "**3(a)(2) Global Security**" together with a Regulation S Global Security and a Rule 144A Global Security, the "**Registered Global Securities**"). Unless otherwise set forth in the Issue Terms, 3(a)(2) Notes will be issued only in minimum denominations of US\$1,000 (or the approximate equivalent in the applicable Specified Currency).

Registered Global Securities will either (a) be deposited with a custodian for, and registered in the name of a nominee of, DTC for the accounts of Euroclear and Clearstream, Luxembourg or (b) be deposited with a common depositary for, and registered in the name of a common nominee of, Euroclear and Clearstream, Luxembourg, as specified in the Issue Terms. Persons holding beneficial interests in Registered Global Securities will be entitled or required, as the case may be, under the circumstances described below, to receive physical delivery of definitive Securities in fully registered form.

Registered Global Securities issued in respect of any Tranche and deposited with one of the ICSDs as common safekeeper, and registered in the name of a nominee of one of the ICSDs acting as common safekeeper, that is, held under the New Safekeeping Structure for registered global securities, are intended to be held in a manner which would allow Eurosystem eligibility. This does not necessarily mean that the Securities of such Tranche will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any time during their life, as such recognition depends upon satisfaction of the Eurosystem eligibility criteria.

Registered Securities of each Tranche issued on a partly paid basis ("**Partly Paid Securities**") will be in definitive form, registered in the name of the holder thereof. The Registered Securities of each Tranche issued by BBVA Global Markets B.V. sold to Institutional Accredited Investors who are also QPs and the Registered Securities of each Tranche issued by BBVA Global Securities B.V. sold to Institutional Accredited Investors will be in definitive form, registered in the name of the holder thereof ("**Definitive IAI Registered Securities**"). Unless otherwise set forth in the Issue Terms, Definitive IAI Registered Securities will be issued only in minimum denominations of US\$250,000 and integral multiples of US\$1,000 in excess thereof (or the approximate equivalents in the applicable Specified Securities Currency). Definitive IAI Registered Securities will be subject to the restrictions on transfer set forth therein and will bear the restrictive legend described under

FORM OF SECURITIES

"*Subscription and Sale and Transfer and Selling Restrictions*". Institutional Accredited Investors who are also QPs that hold Definitive IAI Registered Securities issued by BBVA Global Markets B.V. and Institutional Accredited Investors that hold Definitive IAI Registered Securities issued by BBVA Global Securities B.V. may elect to hold such Securities through DTC, but transferees acquiring the Securities in transactions exempt from Securities Act registration pursuant to Regulation S or Rule 144 under the Securities Act (if available) may do so upon satisfaction of the requirements applicable to such transfer as described under "*Subscription and Sale and Transfer and Selling Restrictions*". The Rule 144A Global Security and the Definitive IAI Registered Securities will be subject to certain restrictions on transfer set forth therein and will bear a legend regarding such restrictions. Payments of principal, interest and any other amount in respect of the Registered Global Securities will, in the absence of provision to the contrary, be made to the persons shown on the Register (as defined in General Condition 1) as the registered holder of the Registered Global Securities. None of the Issuer, the Guarantor (if applicable), any Paying Agent or the Registrar will have any responsibility or liability for any aspect of the records relating to or payments or deliveries made on account of beneficial ownership interests in the Registered Global Securities or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

Payments of principal, interest or any other amount in respect of the Registered Securities in definitive form will, in the absence of provision to the contrary, be made to the persons shown on the Register on the relevant Record Date (as defined in General Condition 5) immediately preceding the due date for payment in the manner provided in that General Condition.

Interests in a Registered Global Security will be exchangeable (free of charge), in whole but not in part, for definitive Registered Securities without Receipts, Coupons or Talons attached only upon the occurrence of an Exchange Event. For these purposes, "**Exchange Event**" means that (a) an Event of Default has occurred and is continuing, (b) the Issuer has or will become subject to adverse tax consequences which would not be suffered were the Securities represented by the Registered Global Security in definitive form, (c) in the case of Securities registered in the name of a nominee for a common depository for Euroclear and Clearstream, Luxembourg, the Issuer has been notified that both Euroclear and Clearstream, Luxembourg have been closed for business for a continuous period of 14 days (other than by reason of holiday, statutory or otherwise) or have announced an intention permanently to cease business or have in fact done so and, no successor clearing system is available, (d) in the case of Securities registered in the name of a nominee for DTC, either DTC has notified the Issuer that it is unwilling or unable to continue to act as depository for the Securities and no alternative clearing system is available or DTC has ceased to constitute a clearing agency registered under the Exchange Act or (e) the Securities are required to be removed from (in the case of Securities registered in the name of a nominee for a common depository for Euroclear and Clearstream, Luxembourg) both Euroclear and Clearstream, Luxembourg or (in the case of Securities registered in the name of a nominee for DTC) DTC and, in either case, no alternative clearing system is available. The Issuer will promptly give notice to Securityholders in accordance with General Condition 13 if an Exchange Event occurs. In the event of the occurrence of an Exchange Event, DTC, Euroclear and/or Clearstream, Luxembourg (acting on the instructions of any holder of an interest in such Registered Global Security) or the Issuer, as the case may be, may give notice to the Registrar requesting exchange. Any such exchange shall occur not later than 60 days after the date of receipt of the first relevant notice by the Registrar.

Transfer of Interests

Interests in a Registered Global Security may, subject to compliance with all applicable restrictions, be transferred to a person who wishes to hold such interest in another Registered Global Security or in the form of a Definitive IAI Registered Security and Definitive IAI Registered Securities may, subject to compliance with all applicable restrictions, be transferred to a person who wishes to hold such Securities in the form of an interest in a Registered Global Security. No beneficial owner of an interest in a Registered Global Security will be able to transfer such interest, except in accordance with the applicable procedures of DTC, Euroclear and Clearstream, Luxembourg, in each case to the extent applicable, in each case. Registered Securities are also subject to the restrictions on transfer set forth therein and will bear a legend regarding such restrictions, see "*Subscription and Sale and Transfer and Selling Restrictions*".

General

Pursuant to the Agency Agreement (as defined under "*Terms and Conditions of the Securities*"), the Principal Paying Agent shall arrange that, where a further Tranche of Securities is issued which is intended to form a single Series with an existing Tranche of Securities at a point after the Issue Date of the further Tranche, the Securities of such further Tranche shall be assigned a common code, and ISIN and, where applicable, a CUSIP and CINS number which are different from the common code and ISIN, CUSIP and CINS assigned to Securities of any other Tranche of the same Series until such time as the Tranches are consolidated and form a single

FORM OF SECURITIES

Series, which shall not be prior to the expiry of the distribution compliance period (as defined in Regulation S) applicable to the Securities of such Tranche.

For so long as any of the Securities is represented by a Global Security held on behalf of Euroclear and/or Clearstream, Luxembourg and/or DTC or its nominee each person (other than Euroclear or Clearstream, Luxembourg or DTC) who is for the time being shown in the records of Euroclear or of Clearstream, Luxembourg or of DTC as the holder of a particular nominal amount of such Securities (in which regard any certificate or other document issued by Euroclear or Clearstream, Luxembourg or DTC as to the nominal amount of such Securities standing to the account of any person shall be conclusive and binding for all purposes save in the case of manifest error) shall be treated by the Issuer, the Guarantor and their agents as the holder of such nominal amount of such Securities for all purposes other than with respect to the payment of principal or interest on such nominal amount of such Securities and, in the case of DTC or its nominee, voting, giving consents or making requests, for which purpose the bearer of the relevant Bearer Global Security or the registered holder of the relevant Registered Global Security shall be treated by the Issuer, the Guarantor and their agents as the holder of such nominal amount of such Securities in accordance with and subject to the terms of the relevant Global Security and the expressions "**Securityholder**" and "**holder of Securities**" and related expressions shall be construed accordingly.

Except in relation to Securities issued in NGS form, any reference herein to Euroclear and/or Clearstream, Luxembourg and/or DTC shall, whenever the context so permits, be deemed to include a reference to any additional or alternative clearing system specified in the Issue Terms or as may otherwise be approved by the Issuer and the Principal Paying Agent. A Security may be accelerated by the holder thereof in certain circumstances described in General Condition 9. In such circumstances, where any Security is still represented by a Global Security and the Global Security (or any part thereof) has become due and repayable in accordance with the Terms and Conditions of such Securities and payment in full of the amount due has not been made in accordance with the provisions of the Global Security within a period of 15 days from the giving of a notice by a holder with Euroclear or Clearstream, Luxembourg of such Securities so represented and credited to its securities account that it wishes to accelerate such Securities, then holders of interests in such Global Security credited to their accounts with Euroclear and/or Clearstream, Luxembourg and/or DTC, as the case may be, will become entitled to proceed directly against the Issuer on the basis of statements of account provided by Euroclear, Clearstream, Luxembourg and DTC on and subject to the terms of a deed of covenant dated [February 9, 2021] and executed by the Issuer (the deed of covenant applicable to a Tranche of Securities, the "**Deed of Covenant**"). In addition, holders of interests in such Global Security credited to their accounts with DTC may require DTC to deliver Definitive Securities in registered form in exchange for their interest in such Global Security in accordance with DTC's standard operating procedures.

USE OF PROCEEDS

USE OF PROCEEDS

The net proceeds from each issue of Securities will be deposited with the Guarantor.

The net proceeds from each issue will be used for loans and/or investments extended to, or made in, other companies and entities belonging to the Group (for this purpose, as defined in section 3:2 of the Dutch Financial Markets Supervision Act (*Wet op het financieel toezicht*) ("FMSA")).

In addition, where the "Reasons for the Offer" in paragraph 4 of Part B of the applicable Issue Terms are stated to be for "green", "social" or "sustainability" purposes, as described in this "Use of Proceeds" section the net proceeds from each such issue of Sustainable Securities will be used as so described. If specified otherwise in the applicable Issue Terms, the net proceeds from the issue of the relevant Securities will be used as so specified.

Sustainable Securities issued under the Programme may be subject to the Guarantor's Sustainable Development Goals (SDGs) Bond Framework (April 2018) published on its website (https://shareholdersandinvestors.bbva.com/wp-content/uploads/2018/04/BBVA-SDGs-Bond-Framework_24042018_Eng.pdf) (including as amended, supplemented, restated or otherwise updated on such website from time to time, the "SDGs Bond Framework") (the "SDG Securities").

For any Sustainable Securities, an amount equal to the net proceeds from each issue of Sustainable Securities will be separately identified and applied by the Guarantor in financing or refinancing on a portfolio basis Green Projects and/or Social Projects (each as defined below and further described in the SDGs Bond Framework) (together, the "Sustainability Projects"), including the financing of new or future Sustainability Projects, and the refinancing of existing and on-going Sustainability Projects where originally financed within three years of the issue of the relevant Securities, all in accordance with the SDGs Bond Framework. In the case of Green Securities, such financing or refinancing shall be of Green Projects, in the case of Social Securities, such financing or refinancing shall be of Social Projects and, in the case of Sustainability Securities, such financing or refinancing shall be of Green Projects and Social Projects.

"Green Projects" are projects where at least 80 per cent. of (i) the principal amount financed is for the financing of activities falling or (ii) the business of the borrower in respect of the relevant project falls, under the "green eligible categories" described in the SDGs Bond Framework of energy efficiency, sustainable transport, water, waste management and/or renewable energy, each as further described in the SDGs Bond Framework, and, at any time, include any other "green" projects in accordance with any update of the ICMA Green Bond Principles at such time.

The "ICMA Green Bond Principles", at any time, are the Green Bond Principles published by the International Capital Markets Association at such time, which as of the date of this Base Prospectus are the Green Bond Principles June 2021 (<https://www.icmagroup.org/assets/documents/Sustainable-finance/2021-updates/Green-Bond-Principles-June-2021-140621.pdf>).

"Social Projects" are projects where at least 80 per cent. of (i) the principal amount financed is for the financing of activities falling or (ii) the business of the borrower in respect of the relevant project falls, under the "social eligible categories" described in the SDGs Bond Framework of healthcare, education, SME financing and microfinancing, and/or affordable housing, each as further described in the SDGs Bond Framework, and, at any time, include any other "social" projects in accordance with any update of the ICMA Social Bond Principles at such time.

The "ICMA Social Bond Principles", at any time, are the Social Bond Principles published by the International Capital Markets Association at such time, which as of the date of this Base Prospectus are the Social Bond Principles June 2021 (<https://www.icmagroup.org/assets/documents/Sustainable-finance/2021-updates/Green-Bond-Principles-June-2021-140621.pdf>).

The proceeds of any SDG Securities will not be used to finance nuclear power generation, large scale (above 20 megawatt) dam, defense, mining, carbon related or oil and gas activities.

Pending the application of any net proceeds of SDG Securities in financing or refinancing the relevant Sustainability Projects, such proceeds will be applied by the Guarantor on the same basis as for the management of its liquidity portfolio. The Guarantor will endeavor to apply a percentage of the net proceeds of any SDG Securities in financing Sustainability Projects originated in the year of issue of such SDG Securities. In the event that any Sustainability Project to which the net proceeds of any SDG Securities are allocated, ceases or will cease to comply with the relevant categories for such Sustainability Project to constitute a Green Project or

USE OF PROCEEDS

a Social Project, as the case may be, the Guarantor will substitute that Sustainability Project within the relevant portfolio for a compliant Sustainability Project.

Annually, the Guarantor will publish a report on its website (<https://shareholdersandinvestors.bbva.com>) in respect of that Series of SDG Securities as described in the SDGs Bond Framework.

The Guarantor has obtained an independent verification assessment from DNV GL Business Assurance Services Limited in respect of the SDGs Bond Framework. This independent verification assessment is published on the Guarantor's website (<https://shareholdersandinvestors.bbva.com/wp-content/uploads/2018/04/BBVA-SDG-Bond-Framework-Assessment-19th-April-2018.pdf>).

In addition, the Guarantor may request, on an annual basis starting one year after the issue of each Series of SDG Securities and until maturity (or until redemption in full), a limited assurance report of the allocation of the net proceeds of those SDG Securities to Green Projects and/or Social Projects, as the case may be, which may be provided by its external auditor or another suitably qualified provider and published on its website (<https://shareholdersandinvestors.bbva.com>).

Neither the SDGs Bond Framework, nor any of the above reports, verification assessments or contents of any of the above websites are incorporated in or form part of this Base Prospectus.

BOOK-ENTRY CLEARANCE SYSTEMS

BOOK-ENTRY CLEARANCE SYSTEMS

*The information set out below is subject to any change in or reinterpretation of the rules, regulations and procedures of DTC, Euroclear or Clearstream, Luxembourg (together, the "**Clearing Systems**") currently in effect. The Issuer and the Guarantor take responsibility for the correct extraction and reproduction of the information in this section concerning the Clearing Systems, but none of the Issuer, the Guarantor nor any Dealer takes any responsibility for the accuracy thereof. Investors wishing to use the facilities of any of the Clearing Systems are advised to confirm the continued applicability of the rules, regulations and procedures of the relevant Clearing System. None of the Issuer, the Guarantor nor any other party to the Agency Agreement will have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interests in the Securities held through the facilities of any Clearing System or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.*

DTC

DTC has advised the Issuer and the Guarantor that it is a limited purpose trust company organised under the New York Banking Law, a "banking organisation" within the meaning of the New York Banking Law, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to Section 17A of the Exchange Act. DTC holds securities that its participants ("**Participants**") deposit with DTC. DTC also facilitates the settlement among Participants of securities transactions, such as transfers and pledges, in deposited securities through electronic computerised book-entry changes in Participants' accounts, thereby eliminating the need for physical movement of securities certificates. Direct Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organisations. DTC is owned by a number of its Direct Participants and by the New York Stock Exchange, Inc., the NYSE MKT LLC, Inc. and the Financial Industry Regulatory Authority, Inc. Access to the DTC system is also available to others such as securities brokers and dealers, banks and trust companies that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("**Indirect Participants**").

Under the rules, regulations and procedures creating and affecting DTC and its operations (the "**Rules**"), DTC makes book-entry transfers of Registered Securities among Direct Participants on whose behalf it acts with respect to Securities accepted into DTC's book-entry settlement system ("**DTC Securities**") as described below and receives and transmits distributions of principal and interest on DTC Securities. The Rules are on file with the Securities and Exchange Commission. Direct Participants and Indirect Participants with which beneficial owners of DTC Securities ("**Owners**") have accounts with respect to the DTC Securities similarly are required to make book-entry transfers and receive and transmit such payments on behalf of their respective Owners. Accordingly, although Owners who hold DTC Securities through Direct Participants or Indirect Participants will not possess Registered Securities, the Rules, by virtue of the requirements described above, provide a mechanism by which Direct Participants will receive payments and will be able to transfer their interest in respect of the DTC Securities.

Purchases of DTC Securities under the DTC system must be made by or through Direct Participants, which will receive a credit for the DTC Securities on DTC's records. The ownership interest of each actual purchaser of each DTC Security ("**Beneficial Owner**") is in turn to be recorded on the Direct and Indirect Participant's records. Beneficial Owners will not receive written confirmation from DTC of their purchase, but Beneficial Owners are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the DTC Securities are to be accomplished by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in DTC Securities, except in the event that use of the book-entry system for the DTC Securities is discontinued.

To facilitate subsequent transfers, all DTC Securities deposited by Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. The deposit of DTC Securities with DTC and their registration in the name of Cede & Co. effect no change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the DTC Securities; DTC's records reflect only the identity of the Direct Participants to whose accounts such DTC Securities are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

BOOK-ENTRY CLEARANCE SYSTEMS

Redemption notices shall be sent to Cede & Co. If less than all of the DTC Securities within an issue are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. will consent or vote with respect to DTC Securities. Under its usual procedures, DTC mails an Omnibus Proxy to the Issuer as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the DTC Securities are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Principal and interest payments on the DTC Securities will be made to DTC. DTC's practice is to credit Direct Participants' accounts on the due date for payment in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payment on the due date. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name", and will be the responsibility of such Participant and not of DTC or the Issuer, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to DTC is the responsibility of the Issuer, disbursement of such payments to Direct Participants is the responsibility of DTC, and disbursement of such payments to the Beneficial Owners is the responsibility of Direct and Indirect Participants.

Under certain circumstances, including if there is an Event of Default under the Securities, DTC will exchange the DTC Securities for definitive Registered Securities, which it will distribute to its Participants in accordance with their proportionate entitlements and which, if representing interests in a Rule 144A Global Security, will be legended as set forth under "*Subscription and Sale and Transfer and Selling Restrictions*".

Since DTC may only act on behalf of Direct Participants, who in turn act on behalf of Indirect Participants, any Owner desiring to pledge DTC Securities to persons or entities that do not participate in DTC, or otherwise take actions with respect to such DTC Securities, will be required to withdraw its Registered Securities from DTC as described below.

Euroclear and Clearstream, Luxembourg

Euroclear and Clearstream, Luxembourg each holds securities for its customers and facilitates the clearance and settlement of securities transactions by electronic book-entry transfer between their respective account holders. Euroclear and Clearstream, Luxembourg provide various services including safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Euroclear and Clearstream, Luxembourg also deal with domestic securities markets in several countries through established depository and custodial relationships. Euroclear and Clearstream, Luxembourg have established an electronic bridge between their two systems across which their respective participants may settle trades with each other.

Euroclear and Clearstream, Luxembourg customers are world-wide financial institutions, including underwriters, securities brokers and dealers, banks, trust companies and clearing corporations. Indirect access to Euroclear and Clearstream, Luxembourg is available to other institutions that clear through or maintain a custodial relationship with an account holder of either system. For further information on Euroclear and Clearstream, Luxembourg relating to the Securities, please see "*Taxation*".

Book-entry Ownership of and Payments in respect of DTC Securities

The Issuer may apply to DTC in order to have any Tranche of Securities represented by a Registered Global Security accepted in its book-entry settlement system. Upon the issue of any such Registered Global Security, DTC or its custodian will credit, on its internal book-entry system, the respective nominal amounts of the individual beneficial interests represented by such Registered Global Security to the accounts of persons who have accounts with DTC. Such accounts initially will be designated by or on behalf of the relevant Dealer. Ownership of beneficial interests in such a Registered Global Security will be limited to Direct Participants or Indirect Participants, including, in the case of a Regulation S Global Security, the respective depositories of Euroclear and Clearstream, Luxembourg. Ownership of beneficial interests in a Registered Global Security accepted by DTC will be shown on, and the transfer of such ownership will be effected only through, records maintained by DTC or its nominee (with respect to the interests of Direct Participants) and the records of Direct Participants (with respect to interests of Indirect Participants).

Payments in US dollars of principal and interest in respect of a Registered Global Security accepted by DTC will be made to the order of DTC or its nominee as the registered holder of such Security. In the case of any payment in a currency other than US dollars, payment will be made to the Exchange Agent on behalf of DTC or its nominee and the Exchange Agent will (in accordance with instructions received by it) remit all or a portion

BOOK-ENTRY CLEARANCE SYSTEMS

of such payment for credit directly to the beneficial holders of interests in the Registered Global Security in the currency in which such payment was made and/or cause all or a portion of such payment to be converted into US dollars and credited to the applicable Participants' account.

The Issuer expects DTC to credit accounts of Direct Participants on the applicable payment date in accordance with their respective holdings as shown in the records of DTC unless DTC has reason to believe that it will not receive payment on such payment date. The Issuer also expects that payments by Participants to beneficial owners of Securities will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers, and will be the responsibility of such Participant and not the responsibility of DTC, the Principal Paying Agent, the Registrar or the Issuer. Payment of principal, premium, if any, and interest, if any, on Securities to DTC is the responsibility of the Issuer.

Transfers of Securities Represented by Registered Global Securities

Transfers of any interests in Securities represented by a Registered Global Security within DTC, Euroclear and Clearstream, Luxembourg will be effected in accordance with the customary rules and operating procedures of the relevant clearing system. The laws in some States within the United States require that certain persons take physical delivery of securities in definitive form. Consequently, the ability to transfer Securities represented by a Registered Global Security to such persons may depend upon the ability to exchange such Securities for Securities in definitive form. Similarly, because DTC can only act on behalf of Direct Participants in the DTC system who in turn act on behalf of Indirect Participants, the ability of a person having an interest in Securities represented by a Registered Global Security accepted by DTC to pledge such Securities to persons or entities that do not participate in the DTC system or otherwise to take action in respect of such Securities may depend upon the ability to exchange such Securities for Securities in definitive form. The ability of any holder of Securities represented by a Registered Global Security accepted by DTC to resell, pledge or otherwise transfer such Securities may be impaired if the proposed transferee of such Securities is not eligible to hold such Securities through a direct or indirect participant in the DTC system.

Subject to compliance with the transfer restrictions applicable to the Registered Securities described under "*Subscription and Sale and Transfer and Selling Restrictions*", cross-market transfers between DTC, on the one hand, and directly or indirectly through Clearstream, Luxembourg or Euroclear accountholders, on the other, will be effected by the relevant clearing system in accordance with its rules and through action taken by the Registrar, the Principal Paying Agent and any custodian ("**Custodian**") with whom the relevant Registered Global Securities have been deposited.

On or after the Issue Date for any Series, transfers of Securities of such Series between accountholders in Clearstream, Luxembourg and Euroclear and transfers of Securities of such Series between participants in DTC will generally have a settlement date three business days after the trade date (T+3). Under Rule 15(c)6-1 of the Exchange Act, trades in the U.S. secondary market generally are required to settle in two business days ("**T+2**") (as such term is used for purposes of Rule 15(c) 6-1 of the U.S. Exchange Act), unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade Securities prior to delivery of such Securities will be required, by virtue of the fact that the securities initially will not settle in T+2, to specify an alternative settlement cycle at the time of such trade to prevent a failed settlement and should consult their own adviser. Purchasers of the Securities who wish to make such trades should consult their own advisors. The customary arrangements for delivery versus payment will apply to such transfers.

Cross-market transfers between accountholders in Clearstream, Luxembourg or Euroclear and DTC participants will need to have an agreed settlement date between the parties to such transfer. Because there is no direct link between DTC, on the one hand, and Clearstream, Luxembourg and Euroclear, on the other, transfers of interests in the relevant Registered Global Securities will be effected through the Registrar, the Principal Paying Agent and the Custodian receiving instructions (and, where appropriate, certification) from the transferor and arranging for delivery of the interests being transferred to the credit of the designated account for the transferee. In the case of cross-market transfers, settlement between Euroclear or Clearstream, Luxembourg accountholders and DTC participants cannot be made on a delivery versus payment basis. The securities will be delivered on a free delivery basis and arrangements for payment must be made separately.

DTC, Clearstream, Luxembourg and Euroclear have each published rules and operating procedures designed to facilitate transfers of beneficial interests in Registered Global Securities among participants and accountholders of DTC, Clearstream, Luxembourg and Euroclear. However, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued or changed at any time. None of the Issuer, the Guarantor, the Agents or any Dealer will be responsible for any performance by DTC, Clearstream, Luxembourg or Euroclear or their respective direct or indirect participants or accountholders of their respective obligations under the rules and procedures governing their operations and none of them will have any liability

BOOK-ENTRY CLEARANCE SYSTEMS

for any aspect of the records relating to or payments made on account of beneficial interests in the Securities represented by Registered Global Securities or for maintaining, supervising or reviewing any records relating to such beneficial interests.

Euroclear UK & Ireland Limited

Following their delivery into a clearing system, interests in Securities may be delivered, held and settled in Euroclear UK & Ireland Limited ("**CREST**") by means of the creation of dematerialised depository interests ("**CREST Depository Interests**") representing the interests in the relevant Securities ("**Underlying Securities**"). The CREST Depository Interests will be issued by CREST Depository Limited or any successor thereto (the "**CREST Depository**") to holders of the CREST Depository Interests and will be constituted and governed by English law. CREST International Nominees Limited or another entity appointed to act as nominee in accordance with the CREST Deed Poll (as defined below) (the "**CREST Nominee**") will hold the legal title to the Underlying Securities and the direct enforcement right in respect of the Underlying Securities.

The CREST Depository Interests will represent indirect interests in the interest of the CREST Nominee in the Underlying Securities. Pursuant to the documents setting out the legal relationship of CREST with its users and participants (the "**CREST Manual**"), Securities held in global form by the common depository may be settled through CREST, and the CREST Depository will issue CREST Depository Interests. The CREST Depository Interests will be independent securities which may be held and transferred through CREST.

Interests in the Underlying Securities will be credited to the CREST Nominee's account with Euroclear and the CREST Nominee will hold such interests as nominee for the CREST Depository which will issue CREST Depository Interests to the relevant CREST participants.

Each CREST Depository Interest will be treated by the CREST Depository as if it were one Underlying Security, for the purposes of determining all rights and obligations and all amounts payable in respect thereof. The CREST Depository will pass on to holders of CREST Depository Interests any interest or other amounts received by it as holder of the Underlying Securities on trust for such holder. Holders of CREST Depository Interests will also be able to receive from CREST notices of meetings of holders of Underlying Securities and other relevant notices issued by the Issuer.

Transfers of interests in Underlying Securities by a CREST participant to a participant of Euroclear or Clearstream, Luxembourg will be affected by cancellation of the CREST Depository Interests and transfer of an interest in such Securities underlying the CREST Depository Interests to the account of the relevant participant with Euroclear or Clearstream, Luxembourg. The CREST Depository Interests will have the same International Securities Identification Number ("**ISIN**") as the ISIN of the Underlying Securities and will not require a separate listing on the Official List of Euronext Dublin or the Official List of the United Kingdom Listing Authority.

Holders of CREST Depository Interests are referred to Chapter 8 of the CREST International Manual (as contained in the CREST Manual) which contains the form of the CREST Deed Poll to be entered into by the CREST Depository (the "**CREST Deed Poll**"). The rights of the holder of CREST Depository Interests will be governed by the arrangements between CREST, Euroclear, Clearstream, Luxembourg and the Issuer including the CREST Deed Poll executed by the CREST Depository. These rights may be different from those of holders of Securities which are not represented by CREST Depository Interests.

If issued, CREST Depository Interests will be delivered, held and settled in CREST, by means of the CREST International Settlement Links Service (the "**CREST International Settlement Links Service**"). The settlement of the CREST Depository Interests by means of the CREST International Settlement Links Service has the following consequences for holders of CREST Depository Interests:

- (i) holders of CREST Depository Interests will not be the legal owners of the Underlying Securities. The CREST Depository Interests are separate legal instruments from the Underlying Securities to which they relate and represent an indirect interest in such Underlying Securities;
- (ii) the Underlying Securities themselves (as distinct from the CREST Depository Interests representing indirect interests in such Underlying Securities) will be held in an account with a custodian. The custodian will hold the Underlying Securities through a clearing system. Rights in the Underlying Securities will be held through custodial and depository links through the appropriate clearing systems. The legal title to the Underlying Securities or to interests in the Underlying Securities will depend on the rules of the clearing system in or through which the Underlying Securities are held;
- (iii) rights under the Underlying Securities cannot be enforced by holders of CREST Depository Interests except indirectly through the intermediary depositories and custodians described above. The

BOOK-ENTRY CLEARANCE SYSTEMS

enforcement of rights under the Underlying Securities will therefore be subject to the local law of the relevant intermediary. The rights of holders of CREST Depository Interests to the Underlying Securities are represented by the entitlements against the CREST Depository which (through the CREST Nominee) holds interests in the Underlying Securities. This could result in an elimination or reduction in the payments that otherwise would have been made in respect of the Underlying Securities in the event of any insolvency or liquidation of the relevant intermediary, in particular where the Underlying Securities held in clearing systems are not held in special purpose accounts and are fungible with other securities held in the same accounts on behalf of other customers of the relevant intermediaries;

- (iv) the CREST Depository Interests issued to holders of CREST Depository Interests will be constituted and issued pursuant to the CREST Deed Poll. Holders of CREST Depository Interests will be bound by all provisions of the CREST Deed Poll and by all provisions of or prescribed pursuant to, the CREST International Manual and the CREST Rules applicable to the CREST International Settlement Links Service (in each case as contained in the CREST Manual) and such holders must comply in full with all obligations imposed on them by such provisions;
- (v) the provisions of the CREST Deed Poll and the CREST Manual (including for the avoidance of doubt the provisions of the CREST International Manual and the CREST Rules) contain indemnities, warranties, representations and undertakings to be given by holders of CREST Depository Interests and limitations on the liability of the issuer of the CREST Depository Interests, being the CREST Depository;
- (vi) holders of CREST Depository Interests may incur liabilities resulting from a breach of any such indemnities, warranties, representations and undertakings in excess of the money invested by them. The attention of holders is drawn to the terms of the CREST Deed Poll and the CREST Manual (including for the avoidance of doubt the provisions of the CREST International Manual and the CREST Rules), copies of which are available from CREST at 33 Cannon Street, London EC4M 5SB or by calling +44 (0) 207 849 0000 or from the CREST website at: <https://www.euroclear.com/en.html>;
- (vii) holders of CREST Depository Interests may be required to pay fees, charges, costs and expenses to the CREST Depository in connection with the use of the CREST International Settlement Links Service. These will include the fees and expenses charged by the CREST Depository in respect of the provision of services by it under the CREST Deed Poll and any taxes, duties, charges, costs or expenses which may be or become payable in connection with the holding of the Securities through the CREST International Settlement Links Service;
- (viii) neither the Issuer, the Guarantor, the Dealer nor any Agent will have any responsibility for the performance by any intermediaries or their respective direct or indirect participants or accountholders of their respective obligations under the rules and procedures governing their operations; and
- (ix) Securities issued in temporary global form exchangeable for a Permanent Bearer Global Security will not be eligible for CREST settlement as CREST Depository Interests. As such, investors investing in any such Underlying Securities through CREST Depository Interests will only receive the CREST Depository Interests after such Temporary Bearer Global Security is exchanged for a Permanent Bearer Global Security, which could take up to 40 days after the issue of the Securities.

Operating Segments

During the first quarter of 2021, the BBVA Group changed the reporting structure of the BBVA Group's operating segments compared with that presented in its 2020 Form 20-F, mainly as a consequence of the elimination of the United States operating segment as a result of the USA Sale, which was completed on June 1, 2021 (see "Presentation of Financial Information—Sale of BBVA USA Bancshares, Inc.") of Form 20-F. In addition, the Group created a new segment called "Rest of Business" which includes the business previously included in the "Rest of Eurasia" segment (which was eliminated) and the BBVA Group's remaining business in the United States (which was excluded from the scope of the USA Sale), except for the Group's stake in the venture capital fund Propel Venture Partners (which was reallocated to our Corporate Center). For additional information on its current segments, see Note 6 to the Consolidated Financial Statements. In order to make the information as of and for the years ended December 31, 2020 and 2019 comparable with the information as of and for the year ended December 31, 2021, as required by IFRS 8 "Information by business segments", figures as of and for the years ended December 31, 2020 and 2019 were recast in conformity with the new operating segment reporting structure.

Set forth below are the Group's current five operating segments:

- Spain;
- Mexico;
- Turkey;
- South America; and
- Rest of Business.

In addition to the operating segments referred to above, the Group has a Corporate Center which includes those items that have not been allocated to an operating segment. It includes the Group's general management functions, including costs from central units that have a strictly corporate function; management of structural exchange rate positions carried out by the Financial Planning unit; certain proprietary portfolios; certain tax assets and liabilities; certain provisions related to commitments with employees; and goodwill and other intangibles, as well as the financing of such asset portfolios. It also includes the results of the Group's stake in the venture capital fund Propel Venture Partners (which was previously part of our former United States segment). Additionally, the results obtained by the Group's businesses in the United States included within the scope of the USA Sale, through the date of its closing, have been presented in a single line under the heading "Profit (loss) after tax from discontinued operations" in the income statement of the Corporate Center. Until October 15, 2021, BBVA's 20 per cent. stake in Divarian Propiedad, S.A was also included in this unit. On such date, BBVA completed the sale of this stake to Cerberus Capital Management, L.P..

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

- **Other units:** which includes the insurance business unit in Spain (BBVA Seguros) as well as the Group's shareholding in the bancassurance joint venture with Allianz, Compañía de Seguros y Reaseguros, S.A. (see "*History and Development of the Company—Capital Divestitures—2020*"), the Asset Management unit (which manages Spanish mutual funds and pension funds), lending to real estate developers and foreclosed real estate assets in Spain, as well as certain proprietary portfolios and certain funding and structural interest-rate positions of the euro balance sheet which are not included in the Corporate Center.

Cash, cash balances at central banks and other demand deposits as of December 31, 2021 amounted to €26,386 million, a 31.2 per cent. decrease compared with the €38,356 million recorded as of December 31, 2020, mainly due to the decrease in cash held at the Bank of Spain. BBVA had increased its cash held at the Bank of Spain as of December 31, 2020 with a view to reinforcing the Group's cash position in light of the COVID-19 pandemic. See "*Item 5. Operating and Financial Review and Prospects—Operating Results—Factors Affecting the Comparability of our Results of Operations and Financial Condition—The COVID-19 Pandemic*" of Form 20-F for certain information on the impact of the COVID-19 pandemic on the Group.

Financial assets at fair value of this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") amounted to €145,544 million as of December 31, 2021, a 7.3 per cent. increase from the €135,590 million recorded as of December 31, 2020, mainly as a result of the increase in loans and advances to credit institutions (through reverse repurchase agreements) recorded under the "Financial assets held for trading" portfolio.

Financial assets at amortised cost of this operating segment as of December 31, 2021 amounted to €199,663 million, a 0.8 per cent. increase compared with the €198,173 million recorded as of December 31, 2020. Within this heading, loans and advances to customers amounted to €171,097 million as of December 31, 2021, an increase of 1.8 per cent. from the €167,998 million recorded as of December 31, 2020, mainly as a result of the increase in SMEs and consumer loans (including credit card loans) and increased drawdowns under credit facilities especially in the first quarter of 2021.

Financial liabilities held for trading and designated at fair value through profit or loss of this operating segment as of December 31, 2021 amounted to €81,376 million, a 13.7 per cent. increase compared with the €71,542 million recorded as of December 31, 2020, mainly due to an increase in deposits from the Bank of Spain (through repurchase agreements) recorded under the "Financial liabilities held for trading" portfolio.

Customer deposits at amortised cost of this operating segment as of December 31, 2021 amounted to €206,663 million, a 0.1 per cent. increase compared with the €206,428 million recorded as of December 31, 2020.

Off-balance sheet funds of this operating segment (which includes "Mutual funds" and "Pension funds") as of December 31, 2021 amounted to €70,072 million, an 11.7 per cent. increase compared with the €62,707 million as of December 31, 2020, mainly due to the shift from time deposits towards higher profitability investments, which boosted private banking and mutual funds.

This operating segment's non-performing loan ratio decreased to 4.2 per cent. as of December 31, 2021 from 4.3 per cent. as of December 31, 2020, mainly as a result of the increase in SMEs and consumer loans (including credit card loans), increased drawdowns under credit facilities, higher write-offs and an effective and proactive management of loan classification in view of the pandemic, offset, in part, by higher additions to Stage 3 loans as a result of the update in the definition of credit impaired asset (see "*Presentation of Financial Information—Changes in Accounting Policies—New definition of default*") of Form 20-F. This operating segment's non-performing loan coverage ratio decreased to 62 per cent. as of December 31, 2021 from 67 per cent. as of December 31, 2020 as a result of higher additions to Stage 3 loans.

Mexico

The Mexico operating segment includes the banking and insurance businesses conducted in Mexico by BBVA Mexico. It also includes BBVA Mexico's branch in Houston.

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

The Mexican peso appreciated 5.5 per cent. against the euro as of December 31, 2021 compared with December 31, 2020, positively affecting the business activity of the Mexico operating segment as of December 31, 2021 expressed in euros. See *"Item 5. Operating and Financial Review and Prospects—Operating Results—Factors Affecting the Comparability of our Results of Operations and Financial Condition—Trends in Exchange Rates"* of Form 20-F.

Cash, cash balances at central banks and other demand deposits as of December 31, 2021 amounted to €12,985 million, a 41.7 per cent. increase compared with the €9,161 million recorded as of December 31, 2020, mainly due to an increase in cash and cash equivalents held at the Mexican Central Bank ("**BANXICO**") and, in particular, the increase in the treasury bills from BANXICO held by BBVA. This increase was motivated by BBVA's desire to reinforce the Group's cash position in light of the COVID-19 pandemic. See *"Item 5. Operating and Financial Review and Prospects—Operating Results—Factors Affecting the Comparability of our Results of Operations and Financial Condition—The COVID-19 Pandemic"* of Form 20-F for certain information on the impact of the COVID-19 pandemic on the Group.

Financial assets at fair value of this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") as of December 31, 2021 amounted to €35,126 million, a 3.4 per cent. decrease from the €36,360 million recorded as of December 31, 2020, mainly due to the decreases in the value of exchange rate derivatives due to changes in foreign currency positions, offset in part by the appreciation of the Mexican peso against the euro.

Financial assets at amortised cost of this operating segment as of December 31, 2021 amounted to €65,311 million, a 9.2 per cent. increase compared with the €59,819 million recorded as of December 31, 2020. Within this heading, loans and advances to customers of this operating segment as of December 31, 2021 amounted to €55,809 million, an 11.6 per cent. increase compared with the €50,002 million recorded as of December 31, 2020, mainly attributable to the positive performance of the retail portfolio, with increases in credit card and consumer loans and, to a lesser extent, mortgages, supported by the appreciation of the Mexican peso, an increase in the product offering (which contributed to the increase in the number of customers) and the improvement of the Mexican economy (mainly in the first half of 2021).

Financial liabilities held for trading and designated at fair value through profit or loss of this operating segment as of December 31, 2021 amounted to €19,843 million, a 16.6 per cent. decrease compared with the €23,801 million recorded as of December 31, 2020, mainly as a result of decreases in the value of exchange rate derivatives due to changes in foreign currency positions.

Customer deposits at amortised cost of this operating segment as of December 31, 2021 amounted to €64,003 million, an 18.4 per cent. increase compared with the €54,052 million recorded as of December 31, 2020, primarily due to increases in demand deposits, in particular in the retail portfolio, during the first half of 2021 as a result of the customers' preference to hold liquid assets in the prevailing uncertain environment, and the appreciation of the Mexican peso against the euro.

Off-balance sheet funds of this operating segment (which includes "Mutual funds" and "Other placements") as of December 31, 2021 amounted to €26,445 million, a 17.4 per cent. increase compared with the €22,524 million as of December 31, 2020, mainly as a result of the shift from time deposits towards higher profitability investments, which boosted mutual funds during 2021, supported by an improved product offer that includes funds linked to Environmental, Social and Governance ("**ESG**") factors and, to a lesser extent, the appreciation of the Mexican peso against the euro.

This operating segment's non-performing loan ratio decreased to 3.2 per cent. as of December 31, 2021 from 3.3 per cent. as of December 31, 2020, mainly due to higher write-offs and recoveries in the retail portfolio (credit card and consumer loans), partially offset by the higher additions to Stage 3 loans as a result of the update in the definition of credit impaired asset (Stage 3) (see *"Presentation of Financial Information—Changes in Accounting Policies—New definition of default"*) of Form 20-F and the reclassification of a significant customer in the wholesale portfolio. This operating segment's non-performing loan coverage ratio decreased to 106 per cent. as of December 31, 2021 from 122 per cent. as of December 31, 2020 as a result mainly of higher additions to Stage 3 loans.

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

Turkey

This operating segment comprises the activities carried out by Garanti BBVA as an integrated financial services group operating in every segment of the banking sector in Turkey, including corporate, commercial, SME, payment systems, retail, private and investment banking, together with its subsidiaries in pension and life insurance, leasing, factoring, brokerage and asset management, as well as its international subsidiaries in the Netherlands and Romania. As of the date of filing of this Base Prospectus, BBVA holds a 85.97 per cent. stake in Garanti BBVA after completing the voluntary takeover bid addressed to the holders of Garanti BBVA's share capital not owned by BBVA, which was announced on November 15, 2021. For additional information, see "*—History and Development of the Company—Capital Expenditures—2021—Voluntary takeover bid for the entire share capital of Türkiye Garanti Bankası A.Ş.*".

The Turkish lira depreciated 40.2 per cent. against the euro as of December 31, 2021 compared to December 31, 2020, adversely affecting the business activity of the Turkey operating segment as of December 31, 2021 expressed in euros. See "*Item 5. Operating and Financial Review and Prospects—Operating Results—Factors Affecting the Comparability of our Results of Operations and Financial Condition—Trends in Exchange Rates*" of Form 20-F.

Cash, cash balances at central banks and other demand deposits as of December 31, 2021 amounted to €7,764 million, a 41.7 per cent. increase compared with the €5,477 million recorded as of December 31, 2020, mainly due to the increase in cash and cash equivalents held at the Central Bank of the Republic of Turkey, with a view to reinforcing the Group's cash position, partially offset by the depreciation of the Turkish lira against the euro.

Financial assets at fair value of this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") as of December 31, 2021 amounted to €5,289 million, a 0.8 per cent. decrease from the €5,332 million recorded as of December 31, 2020, mainly due to the depreciation of the Turkish lira against the euro, partially offset by increases in the value of currency swaps, mainly as a result of favourable fluctuations in market interest rates.

Financial assets at amortised cost of this operating segment as of December 31, 2021 amounted to €41,544 million, an 11.1 per cent. decrease compared with the €46,705 million recorded as of December 31, 2020. Within this heading, loans and advances to customers of this operating segment as of December 31, 2021 amounted to €31,414 million, a 15.8 per cent. decrease compared with the €37,295 million recorded as of December 31, 2020, mainly due to the depreciation of the Turkish lira against the euro and, to a lesser extent, decreases in loans denominated in foreign currency, offset, in part, by the increase (in local currency) in Turkish lira-denominated consumer loans (supported by the General Purpose Loans program adopted by the Turkish government, which intends to mitigate the effects of the COVID-19 pandemic) and to a lesser extent, increases (in local currency) in commercial loans and credit card loans.

Financial liabilities held for trading and designated at fair value through profit or loss of this operating segment as of December 31, 2021 amounted to €2,272 million, a 2.7 per cent. decrease compared with the €2,336 million recorded as of December 31, 2020, mainly due to the depreciation of the Turkish lira against the euro, partially offset by changes in the value of currency swaps, mainly as a result of fluctuations in market interest rates.

Customer deposits at amortised cost of this operating segment as of December 31, 2021 amounted to €38,341 million, a 2.6 per cent. decrease compared with the €39,353 million recorded as of December 31, 2020, mainly due to the depreciation of the Turkish lira against the euro, partially offset by the increase (in local currency) in demand deposits (both denominated in Turkish lira and in foreign currencies) and, to a lesser extent, time deposits denominated in Turkish lira. In local currency, deposits were positively affected by the depreciation of the Turkish lira and the high inflation environment.

Off-balance sheet funds of this operating segment (which includes "Mutual funds" and "Pension funds") as of December 31, 2021 amounted to €3,895 million, a 13.7 per cent. increase compared with the €3,425 million as of December 31, 2020, mainly due to increases in mutual funds as a result of the shift towards higher profitability investments, partially offset by the depreciation of the Turkish lira against the euro.

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

The non-performing loan ratio of this operating segment increased to 7.1 per cent. as of December 31, 2021 from 6.6 per cent. as of December 31, 2020, mainly as a result of the update in the definition of credit impaired asset (see "*Presentation of Financial Information—Changes in Accounting Policies—New definition of default*") of Form 20-F and the change in staging of a large customer of the wholesale portfolio during the first half of 2021, partially offset by higher write-offs during the second half of 2021. This operating segment's non-performing loan coverage ratio decreased to 75 per cent. as of December 31, 2021 from 80 per cent. as of December 31, 2020.

South America

The South America operating segment includes the Group's banking and insurance businesses in the region.

The main business units included in the South America operating segment are:

- **Retail and Corporate Banking:** includes banks in Argentina, Colombia, Peru, Uruguay and Venezuela.
- **Insurance:** includes insurance businesses in Argentina, Colombia and Venezuela.

The sale of BBVA Paraguay closed in January 2021. See "*—History and Development of the Company—Capital Divestitures—2021*".

As of December 31, 2021, the Argentine peso, the Colombian peso and the Peruvian sol depreciated against the euro compared to December 31, 2020, by 11.3 per cent., 6.6 per cent. and 1.3 per cent., respectively. Changes in exchange rates have adversely affected the business activity of the South America operating segment as of December 31, 2021 expressed in euros. See "*Item 5. Operating and Financial Review and Prospects—Operating Results—Factors Affecting the Comparability of our Results of Operations and Financial Condition—Trends in Exchange Rates*" of Form 20-F.

As of and for the years ended December 31, 2021, 2020 and 2019, the Argentine and Venezuelan economies were considered to be hyperinflationary as defined by IAS 29 (see "*Presentation of Financial Information—Changes in Accounting Policies—Hyperinflationary economies*") of Form 20-F.

Cash, cash balances at central banks and other demand deposits as of December 31, 2021 amounted to €8,549 million, a 20.0 per cent. increase compared with the €7,127 million recorded as of December 31, 2020, mainly due to an increase in cash and cash equivalents held at most of the central banks within this operating segment as a result of the central banks in the region having started rate hike cycles and the withdrawal of stimulus programs intended to mitigate the impact of the COVID-19 crisis.

Financial assets at fair value for this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") as of December 31, 2021 amounted to €7,175 million, a 2.1 per cent. decrease compared with the €7,329 million recorded as of December 31, 2020, mainly due to the depreciation of the currencies of the main countries where the BBVA Group operates within this operating segment against the euro.

Financial assets at amortised cost of this operating segment as of December 31, 2021 amounted to €37,747 million, a 2.1 per cent. decrease compared with the €38,549 million recorded as of December 31, 2020. Within this heading, loans and advances to customers of this operating segment as of December 31, 2021 amounted to €34,608 million, a 3.0 per cent. increase compared with the €33,615 million recorded as of December 31, 2020, mainly as a result of the increase in the retail portfolio and commercial loans in Colombia, the increase in credit card loans in Argentina and the increase in consumer and mortgage loans in Peru (in light of the improved economic conditions), partially offset by the depreciation of the currencies of the main countries where the BBVA Group operates within this operating segment against the euro and the sale of BBVA Paraguay closed in January 2021 (see "*—History and Development of the Company—Capital Divestitures—2021*").

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

Customer deposits at amortised cost of this operating segment as of December 31, 2021 amounted to €36,340 million, a 1.4 per cent. decrease compared with the €36,874 million recorded as of December 31, 2020, mainly as a result of the depreciation of the currencies of the main countries where the BBVA Group operates within this operating segment against the euro and the sale of BBVA Paraguay closed in January 2021 (see "*—History and Development of the Company—Capital Divestitures—2021*"), partially offset by increases in demand deposits.

Off-balance sheet funds of this operating segment (which includes "Mutual funds" and "Pension funds") as of December 31, 2021 amounted to €14,756 million, a 7.5 per cent. increase compared with the €13,722 million as of December 31, 2020, mainly due to the recovery in mutual funds in Argentina, after the temporary withdrawal of funds invested in mutual funds due to market instability, partially offset by the depreciation of the currencies of the main countries where the BBVA Group operates within this operating segment against the euro.

The non-performing loan ratio of this operating segment as of December 31, 2021 and 2020 stood at 4.5 per cent. and 4.4 per cent., mainly as a result of the update in the definition of credit impaired asset, which led to an increase in impaired loans particularly in Peru (see "*Presentation of Financial Information—Changes in Accounting Policies—New definition of default*") of Form 20-F and the increase in impaired loans in the retail portfolio in Argentina and Colombia and in the retail (SME loans segment) and corporate portfolios in Peru, partially offset by higher write-offs and better recovery ratio in Uruguay and the increases in the retail and commercial loans portfolios in Colombia and Argentina. This operating segment's non-performing loan coverage ratio decreased to 99 per cent. as of December 31, 2021, from 110 per cent. as of December 31, 2020.

Rest of Business

This operating segment includes the wholesale activity carried out by the Group in Europe, excluding Spain, and the United States through the New York branch, as well as the institutional business that the Group develops in the United States through its broker-dealer BBVA Securities Inc. It also includes the banking business developed through the five BBVA branches located in Asia (in Taipei, Tokyo, Hong Kong, Singapore and Shanghai).

Cash, cash balances at central banks and other demand deposits as of December 31, 2021 amounted to €3,970 million, a 35.1 per cent. decrease compared with the €6,121 million recorded as of December 31, 2020. Other demand deposits of this operating segment as of December 31, 2020 was positively impacted by the customers' preference for holding liquid assets, in particular, at the New York branch, in response to the uncertain environment caused by the COVID-19 pandemic.

Financial assets at fair value for this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") as of December 31, 2021 amounted to €5,684 million compared with the €1,470 million recorded as of December 31, 2020 mainly due to increased activity of the New York branch, which led to an increase in loans and advances recorded under "Financial assets held for trading", due, in part, to the appreciation of the U.S. dollar against the euro.

Financial assets at amortised cost of this operating segment as of December 31, 2021 amounted to €30,299 million, an 11.3 per cent. increase compared with the €27,213 million recorded as of December 31, 2020. Within this heading, loans and advances to customers of this operating segment as of December 31, 2021 amounted to €26,949 million, a 12.2 per cent. increase compared with the €24,015 million recorded as of December 31, 2020 mainly due to increased activity in the branches located in Asia, and, to a lesser extent, the appreciation of the U.S. dollar against the euro.

Customer deposits at amortised cost of this operating segment as of December 31, 2021 amounted to €6,266 million, a 32.9 per cent. decrease compared with the €9,333 million recorded as of December 31, 2020, mainly as a result of the decrease in deposits from wholesale customers at the New York branch. Customer deposits at amortised cost of this operating segment as of December 31, 2020 was positively impacted by the customers' preference for holding liquid assets in response to the uncertain environment caused by the COVID-19 pandemic, following the implementation of the Paycheck Protection Program in the United States, which effect significantly decreased in 2021.

Off-balance sheet pension funds in this operating segment as of December 31, 2021 amounted to €597 million, a 4.9 per cent. increase compared with the €569 million recorded as of December 31, 2020.

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

The non-performing loan ratio of this operating segment as of December 31, 2021 decreased to 0.7 per cent. from 1.0 per cent. as of December 31, 2020 mainly driven by loan growth due to increased activity and higher recoveries from the wholesale portfolio, in particular, in Europe. This operating segment's non-performing loan coverage ratio increased to 116 per cent. as of December 31, 2021, from 109 per cent. as of December 31, 2020.

Presentation of financial information

Accounting principles

Under Regulation (EC) no. 1606/2002 of the European Parliament and of the Council of July 19, 2002, all companies governed by the law of an EU Member State and whose securities are admitted to trading on a regulated market of any Member State must prepare their consolidated financial statements for the years beginning on or after January 1, 2005 in conformity with International Financial Reporting Standards adopted by the European Union ("EU-IFRS"). The Bank of Spain issued Circular 4/2017 of November 27, 2017 ("**Circular 4/2017**"), on Public and Confidential Financial Reporting Rules and Formats, which requires Spanish credit institutions to adapt their accounting system to the principles derived from the adoption of EU-IFRS.

DIRECTORS AND SENIOR MANAGEMENT

BBVA is managed by a Board of Directors which, in accordance with its current by-laws (*Estatutos*), must consist of no less than 5 and no more than 15 members. All members of the Board of Directors are elected to serve three-year terms. BBVA's Board of Directors' Regulations state that the Board of Directors must try to ensure that there is an ample majority of non-executive directors over the number of executive directors on the Board of Directors.

BBVA's corporate governance system is based on the distribution of functions between the Board of Directors, the Executive Committee (*Comisión Delegada Permanente*) and other specialised Board Committees, namely: the Audit Committee; the Appointments and Corporate Governance Committee; the Remuneration Committee; the Risk and Compliance Committee; and the Technology and Cybersecurity Committee. BBVA's Board of Directors are assisted in fulfilling its responsibilities by the Executive Committee. The Executive Committee will deal with those matters of the Board of Directors that the Board agrees to delegate to it, in accordance with

BBVA may, from time to time, enter into transactions in the ordinary course of its business, and on an arm's length basis, with the Directors.

BBVA's Board of Directors' Regulations includes rules which are designed to prevent situations where a potential conflict of interest may arise. These Regulations provide, among other matters, that directors must refrain from participating in deliberations and votes on resolutions or decisions in which they or a related party may have a direct or indirect conflict of interest. Regulation of the New York Branch and of BBVA in the United States

The New York Branch is licensed by the Superintendent of Financial Services of the State of New York under the banking law of the State of New York. The New York Branch is examined by the New York State Department of Financial Services (the "**Superintendent**") and the Board of Governors of the Federal Reserve System and is subject to banking laws and regulations applicable to a foreign bank that operates a branch in New York State.

New York State banking law authorises the Superintendent to take possession of the business and property of the New York branch of a foreign bank under circumstances similar to those that would permit the Superintendent to take possession of the business and property of a state-chartered bank. These circumstances include the violation of any law, unsafe business procedures, capital impairments, suspension of payment of obligations, the initiation of liquidation proceedings against the foreign bank in the jurisdiction of its domicile or elsewhere or the existence of reason to doubt its ability or willingness to pay in full the accepted claims specified in New York State banking law. Pursuant to Section 606.4 of New York State banking law, in liquidating or dealing with the foreign bank branch's business after taking possession of the branch, the claims of creditors which arose out of transactions with the branch may be accepted or rejected by the Superintendent; those which are not rejected are "accepted" with respect to the branch's assets to the exclusion of the claims of other creditors of the foreign bank, without prejudice to the rights of the holders of such "accepted" claims to be satisfied out of other assets of the foreign bank.

In addition to being subject to New York State banking law and regulations via the New York Branch, BBVA is subject to certain other state regulations and to United States federal regulation, including under the Bank Holding Company Act of 1956, as amended.

TAXATION

TAXATION

Tax legislation, including in the country where the investor is domiciled or tax resident and in the Issuer's country of tax residence, may have an impact on the income that an investor receives from the Securities.

Preliminary consideration: Tax residence of the Issuer

The Issuer is incorporated as a private company with limited liability under the laws of the Netherlands. On the basis of section 2 subsection 4 Dutch Corporate Income Tax Act 1969, a company which is incorporated under Dutch law, is considered to be resident of the Netherlands for Dutch domestic tax purposes. This notwithstanding, the effective management of the company is currently carried out from Spain, since the key management and commercial decisions that are necessary to conduct the entity's business are taken from Spain. On the basis of such circumstance, the Issuer is also regarded as resident in Spain for tax purposes, as provided by Law 27/2014, of November 27, on Corporate Income Tax (*Impuesto sobre Sociedades*).

Under this scenario in which the Issuer is resident for tax purposes both in Spain and in the Netherlands, the provisions contained in the Convention between the Netherlands and Spain for the Avoidance of Double Taxation with respect to Taxes on Income and on Net Wealth (the "**Convention**") apply. The Convention was ratified by Instrument made in Madrid on June 16, 1971 and was published on the Spanish National Gazette on October 16, 1972.

Pursuant to section 4 subsection 4 of the Convention (which deals with the general criteria followed by the Convention to consider a person as a resident of a Contracting State), an entity which is a resident of both Spain and the Netherlands is considered to be a resident of the State in which the place of its effective management is located (i.e., Spain).

Responsibility for Withholding

Payments in respect of Securities will be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed or levied by or on behalf of Spain or any political subdivision thereof or any authority or agency therein or thereof having power to tax, unless the withholding or deduction of such taxes, duties, assessments or governmental charges is required by law. In that event, the Issuer or, as the case may be, the Guarantor will (subject to certain exceptions described in General Condition 7) pay such additional amounts as will result in the holders of Securities receiving such amounts as they would have received in respect of such Securities had no such withholding or deduction been required.

Spanish Taxation

The following summary refers solely to certain Spanish tax consequences of the acquisition, ownership and disposition of the Securities. The tax consequences described in this section are based on the general assumption that the Securities are initially registered for clearance and settlement in DTC, Euroclear and Clearstream, Luxembourg. It does not purport to be a complete analysis of all tax consequences relating to the Securities and does not purport to deal with the tax consequences applicable to all categories of investors, some of which might be subject to special rules. Prospective investors should consult their own tax advisors as to the consequences under the tax laws of the country of which they are resident for tax purposes and the tax laws of Spain of acquiring, holding and disposing of Securities and receiving any payments under the Securities. This summary is based upon the Spanish State law as in effect on the date of this Base Prospectus and is subject to any change in law that may take effect after such date. Regional tax laws may alter the consequences outlined in this summary in certain circumstances. References in this section to Securityholders include the beneficial owners of the Securities.

Acquisition of the Securities

The issue of, subscription for, transfer and acquisition of the Securities is exempt from Transfer and Stamp Tax (*Impuesto sobre Transmisiones Patrimoniales y Actos Jurídicos Documentados*) and Value Added Tax (*Impuesto sobre el Valor Añadido*).

Taxation on the income and transfer of the securities

The tax treatment of the acquisition, holding and subsequent transfer of the Securities is summarised below and is based on the tax regime applicable to the Securities pursuant to Royal Legislative Decree 5/2004 of March 5 approving the consolidated text of the Non-Resident Income Tax Law (*Impuesto sobre la Renta de los no Residentes*), as amended by Law 26/2014 of November 27, 2014, Law 27/2014 of November 27, 2014

TAXATION

approving the consolidated text of the Corporate Income Tax Law (*Impuesto sobre Sociedades*) and Law 35/2006 of November 28, 2006 on Personal Tax Law (*Impuesto sobre la Renta de las Personas Físicas*), as amended by Law 26/2014 of November 27, 2014 Law 19/1991 of June 6, 1991 approving the Wealth Tax Law (*Impuesto sobre el Patrimonio*), and Law 29/1987 of December 18, 1987 approving the Inheritance and Gift Tax Law. Consideration has also been given to the rules for the implementation of such regulations (Royal Decree 1776/2004 of July 30 approving the Non-Resident Income Tax Regulations, Royal Decree 439/2007 of March 30, approving the Individuals Income Tax Regulations as amended by Royal Decree 1003/2014 of December 5, 2014 and Royal Decree 634/2015 of July 10, 2015 approving the Corporate Income Tax Regulations).

Consideration has also been given to Spanish legislation on the issuance of preferred securities and debt securities issued by Spanish financial and non-financial listed entities, either directly or through a subsidiary (Law 10/2014, and RD 1065/2007 (as amended by RD 1145/2011), approving the General Regulations relating to tax inspection and management procedures and developing the common rules of the procedures to apply taxes).

Income obtained by Securityholders who are Non-Resident Income Tax payers in Spain in respect of the Securities

Income obtained by Securityholders who are Non-Resident Income Tax payers, both in respect of interest and in connection with the transfer, repayment or redemption of the Securities, whether or not through a permanent establishment, shall be considered Spanish source income and therefore subject to taxation in Spain under Legislative Royal Decree 5/2004 of March 5 approving the Consolidated Non-Resident Income Tax Law, amended by Law 26/2014 of November 28, 2014, without prejudice to the provisions contained in any applicable tax treaty for the avoidance of double taxation ("**DTT**").

Income not obtained through a permanent establishment in Spain in respect of the Securities

Income obtained by Securityholders who are not tax resident in Spain acting for these purposes without a permanent establishment within Spain is exempt from Non-Resident Income Tax in the terms described under "Tax reporting obligations of the Issuer and the Guarantor" below.

Income obtained through a permanent establishment in Spain in respect of the Securities / Corporate Income Tax taxpayers

The holding of Securities by investors who are not resident for tax purposes in Spain will not in itself create the existence of a permanent establishment in Spain.

Income obtained by non-Spanish resident holders acting through a permanent establishment in Spain in respect of the Securities will be taxed under the rules provided by Chapter III of the Non-Resident Income Tax Law. These Securityholders will be subject to taxation substantially in the same manner as Spanish Corporate Income Tax taxpayers and, therefore, it shall be computed as taxable income in accordance with the general rules set out in the Corporate Income Tax Law and will therefore be taxed at the general current rate of 25 per cent.

Income derived from the transfer and holding of the Securities shall not be subject to withholding tax as provided by Section 61(s) of the Corporate Income Tax Regulations, to the extent that the Securities are traded on organised markets in OECD countries.

For withholding on income derived from payment of interest, redemption or repayment of the Securities see "Taxation - Tax Reporting Obligations of the Issuer and the Guarantor".

Individuals with tax residency in Spain

TAXATION

Income obtained by Securityholders who are Personal Income Tax payers, both as interest and in connection with the transfer, redemption or repayment of the Securities, shall be considered income on investments obtained from the assignment of an individual's capital to third parties, as defined in Section 25.2 of Individuals Income Tax Law and therefore will be taxed as savings income at the applicable rate currently varying from 19 per cent. to 26 per cent.

The above mentioned income will be subject to the corresponding personal income tax withholding at the applicable tax rate (currently 19 per cent.). Article 44 of the RD 1065/2007 has established new information procedures for debt instruments issued under the Law 10/2014 (which do not require identification of the Securityholders) and has provided that the interest will be paid by the relevant Issuer to the Paying Agent for the whole amount, provided that such information procedures are complied with.

Nevertheless, withholding tax at the applicable rate (currently 19 per cent.) may have to be deducted by other entities (such as depositaries or financial entities), provided that such entities are resident for tax purposes in Spain or have a permanent establishment in Spanish territory.

The Issuer and the Guarantor consider that, according to RD 1145/2011, they are not obliged to withhold any tax amount provided that the new simplified information procedures (which do not require identification of the Securityholders) are complied with by the Paying Agent as it is described in section "Tax Reporting Obligations of the Issuer and the Guarantor".

However, regarding the interpretation of the "Tax Reporting Obligations of the Issuer and the Guarantor" please refer to "Risk Factors – Spanish Tax Rules may impose withholding tax in certain circumstances (subject to certain exceptions) and neither the Issuer nor the Guarantor is obliged to pay additional amounts in such event."

Wealth Tax

Under Law 19/1991, June 6, 1991, as amended, individuals with tax residency in Spain are subject to Wealth Tax on tax year 2022 to the extent that their net worth exceeds €700,000. Therefore, they should take into account the value of the Securities which they hold as at December 31, 2022.

Individuals resident in a country with which Spain has entered into a double tax treaty in relation to Wealth Tax would generally not be subject to such tax. Otherwise, non-Spanish resident individuals whose properties and rights located in Spain, or that can be exercised within the Spanish territory, exceed €700,000 would be subject to Wealth Tax at the applicable rates, ranging between 0.2 per cent. and 3.5 per cent., without prejudice of any exemption that should be applicable and the laws and regulations in force in each Autonomous Region.

As a consequence of the European Court of Justice Judgment (Case C-127/12), the Wealth Tax Law has been amended by Law 26/2014. As a result, non-Spanish tax resident individuals who are residents in the EU or in the European Economic Area or in a country that is not a member of the European Union as well as a country or territory whose citizens do not enjoy the European Union right to free movement can apply the legislation of the region in which the highest value of the assets and rights of the individuals are located.

Legal entities are not subject to Wealth Tax.

Inheritance and Gift Tax

The transfer of the Securities to individuals by inheritance, legacy or donation shall be subject to the general rules of Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones) in accordance with the applicable Spanish and State rules even if title passes outside Spain and neither the heir nor the beneficiary, as the case may be, is resident in Spain for tax purposes, without prejudice to the provisions of any DTT signed by Spain.

The effective tax rates, after applying all relevant factors, range between 0 per cent. and 81.6 per cent.

TAXATION

However, the Judgment from the European Court of Justice dated September 3, 2014 has declared that Spanish Inheritance and Gift Tax Law is against the principle of free movement of capital within the EU as the Spanish residents are granted tax benefits that, in practice, allow them to pay much lower taxes than non residents. According to Law 26/2014, it will be possible to apply tax benefits approved in some Spanish regions to EU residents following specific rules.

In the event that the beneficiary is an entity other than a natural person, the income obtained shall be subject to Corporate Income Tax or Non-Resident Income Tax, as the case may be, and without prejudice, in the latter event, to the provisions of any DTT that may apply.

Tax rules for payments made by the Guarantor

Payments which may be made by the Guarantor to Securityholders, if the Guarantee is enforced, will be subject to the same tax rules previously set out for payments made by the Issuer.

Tax Reporting Obligations of the Issuer and the Guarantor

RD 1145/2011 modified, among other provisions, article 44 of RD 1065/2007, which sets out the reporting obligations applicable to preference shares and debt instruments issued under Law 10/2014. The new procedures apply to interest deriving from preference shares and debt instruments to which Law 10/2014 refers, including debt instruments issued at a discount for a period equal to or less than twelve months.

Securities originally registered with the entities that manage clearing systems located outside Spain

According to the literal wording of article 44.5 of RD 1065/2007, income derived from securities originally registered with the entities that manage clearing systems located outside Spain, that are recognised by Spanish law or by the law of another OECD country (such as Euroclear or Clearstream), will be paid free of Spanish withholding tax provided that the Paying Agent appointed by the Issuer submits a statement to the issuer, in accordance with the form attached as annex to RD 1065/2007 (see "Supplementary Annex" below), with the following information:

- (i) identification of the securities; and
- (ii) total amount of the income corresponding to each clearing house located outside Spain.

Common References

For these purposes, "income" means interest and the difference, if any, between the aggregate redemption price paid upon the redemption of the Securities and the issue price of the Securities.

In accordance with Section 44 of RD 1065/2007, the statements mentioned above must be provided to the relevant Issuer on the business day immediately prior to each interest payment date. In the event that on the date, the entities obliged to provide the declaration fail to do so, the relevant Issuer or the Paying Agent on its behalf will make a withholding at the general rate (currently 19 per cent.) on the total amount of the return on the relevant Securities otherwise payable to such entity. Regarding the interpretation of Article 44 RD 1065/2007 and the new simplified information procedures please see "*Risk Factors - Spanish Tax Rules may impose withholding tax in certain circumstances (subject to certain exceptions) and neither the Issuer nor the Guarantor is obliged to pay additional amounts in such event.*"

Please note that this is for general information purposes only and is not intended to be nor shall it be deemed to be, or constitute legal advice.

Refund by the Spanish tax authorities

Securityholders who might otherwise have been entitled to a gross payment but in respect of whom the Principal Paying Agent does not provide with the relevant Supplementary Annex on or before the 10th calendar day of the month that follows the month in which the interest is payable may seek a refund of Spanish tax withheld directly from the Spanish tax authorities.

TAXATION

Set out below is the Supplementary Annex in English which has been translated from the original Spanish. Such translation constitutes a direct, accurate and complete translation of the Spanish language text. In the event of any discrepancy between the Spanish language version of the Supplementary Annex and the corresponding English translation, the Spanish tax authorities will give effect to the Spanish language version of the relevant Supplementary Annex only.

Tax reporting related to Article 100.3 of the Spanish Personal Income Tax Law

According to Article 100.3 of the Spanish Personal Income Tax Law, in the case of any Individual with tax residence in Spain acquired an Implicit Yield Security, this Individual will only be entitled to either sale or obtain the reimbursement of the Implicit Yield Securities should the income derived from such Securities be subject to withholding tax, if the previous acquisition of these Securities was made with the intervention of a notary or a financial institution in a way that the previous acquisition is duly accredited, as well as the price of the aforementioned acquisition. The issuer or the financial institution in charge of the acquisition that should not make the reimbursement to the holder of the security according to the previous paragraph, must constitute a deposit for said amount at the disposal of the judicial authority.

According to Article 92.2 of the Spanish Individual Income Tax Regulation, either the issuer, or the financial institution acting on its behalf, or the notary, or the financial institution acting or intervening on behalf of the acquirer or depositor, as appropriate, must issue a certification accrediting the following:

- a) Date of the operation and identification of the asset.
- b) Name of the acquirer.
- c) Tax Identification Number of the aforementioned acquirer or depositor.
- d) Acquisition price.

Two copies of the aforementioned certification, which must be issued in triplicate, will be delivered to the acquirer, keeping in its possession another one the person or entity issuing that certification.

Irish Taxation

The following is a summary of the Irish withholding tax treatment of the Securities. It is based on the laws and practice of the Revenue Commissioners currently in force in Ireland as at the date of this Base Prospectus and may be subject to change. The summary does not purport to be a comprehensive description of all of the Irish tax considerations that may be relevant to a decision to purchase, own or dispose of the Securities. The summary does not constitute tax or legal advice and the comments below are of a general nature only and it does not discuss all aspects of Irish taxation that may be relevant to any particular holder of Securities, such as the consequences of the exchange or the conversion of the Securities. Prospective investors in the Securities should consult their professional advisers on the tax implications of the purchase, holding, redemption or sale of the Securities and the receipt of payments thereon under any laws applicable to them.

Withholding Tax

Irish withholding tax applies to certain payments including payments of:

- (a) Irish source yearly interest (yearly interest is interest payable on a loan that may exist for a period in excess of one year);
- (b) Irish source annual payments (annual payments are payments that are capable of being made for a period in excess of one year and are pure income-profit in the hands of the recipient); and
- (c) Distributions (including interest that is treated as a distribution under Irish law) made by companies that are resident in Ireland for the purposes of Irish tax;

at the standard rate of income tax (currently 20 per cent.) in the case of (a) and (b) above and at the rate of 25 per cent. in the case of (c) above.

On the basis that the Issuer is not resident in Ireland for the purposes of Irish tax, nor does the Issuer operate in Ireland through a branch or agency with which the issue of the Securities is connected, nor are the Securities held in Ireland through a depository or otherwise located in Ireland, then to the extent that payments of interest or annual payments arise on the Securities, such payments should not be regarded as payments having an Irish

TAXATION

source for the purposes of Irish taxation. Similarly, the mere offering of the Securities to Irish investors or the listing of the Securities, for example, on Euronext Dublin (if applicable) should not cause the interest to have an Irish source.

Accordingly, the Issuer or any paying agent acting on behalf of the Issuer should not be obliged to deduct any amount on account of these Irish withholding taxes from payments made in connection with the Securities.

Separately, for as long as the Securities are quoted on a stock exchange, a purchaser of the Securities should not be obliged to deduct any amount on account of Irish tax from a payment made by it in connection with the purchase of the Securities.

Encashment Tax

Payments on any Securities paid by a paying agent in Ireland or collected or realised by an agent in Ireland acting on behalf of the beneficial owner of Securities should be subject to Irish encashment tax at a 25 per cent. rate, unless it is proved, on a claim made in the required manner to the Revenue Commissioners of Ireland, that the beneficial owner of the Securities entitled to the interest or distribution is not resident in Ireland for the purposes of Irish tax (or if resident for the purposes of tax in Ireland is entitled to an exemption from encashment tax) and such interest or distribution is not deemed, under the provisions of Irish tax legislation, to be income of another person that is resident in Ireland.

Dutch Taxation

The following is a general summary of certain material Dutch tax consequences of the acquisition, holding and disposal of the Securities. This summary does not purport to describe all possible tax considerations or consequences that may be relevant to a holder or prospective holder of Securities and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as trusts or similar arrangements) may be subject to special rules. In view of its general nature, this general summary should be treated with corresponding caution. For purposes of Dutch tax law, a Securityholder may include an individual or entity who does not have the legal title of these Securities, but to whom nevertheless the Securities or the income thereof is attributed based on specific statutory provisions or on the basis of such individual or entity having an interest in the Securities or the income thereof.

This summary is based on the tax laws of the Netherlands, published regulations thereunder, published authoritative case law and the Convention, all as in effect on the date hereof, and all of which are subject to change, possibly with retroactive effect. Where the summary refers to "the Netherlands" or "Dutch" it refers only to the part of the Kingdom of the Netherlands located in Europe. In addition, the summary is based on the assumption that the Securities issued by the Issuer do not qualify as equity of the Issuer for Dutch tax purposes.

This discussion is for general information purposes only and is not Dutch tax advice or a complete description of all Dutch tax consequences relating to the acquisition, holding and disposal of the Securities. Holders or prospective holders of Securities should consult their own tax advisors regarding the Dutch tax consequences relating to the acquisition, holding and disposal of the Securities in light of their particular circumstances.

This summary does not describe the consequences of the exchange or the conversion of the Securities.

Tax position of the Issuer

Under the Convention, the Issuer is considered to be solely resident of Spain for tax purposes and therefore the Netherlands should refrain from levying corporate income tax on profits generated by the Issuer, except if and to the extent such profits are allocable to a Dutch permanent establishment or permanent representative of the Issuer.

Withholding tax

All payments of interest and principal made by or on behalf of the Issuer under the Securities may be made free of withholding or deduction of, for or on account of any taxes of whatever nature imposed, levied, withheld or assessed by the Netherlands or any political subdivision or taxing authority thereof or therein, except that Dutch withholding tax at a rate of 25.8 per cent. (rate for 2022) may apply with respect to payments of interest made or deemed to be made by or on behalf of the Issuer, if the interest payments are made or deemed to be made to an entity related to the Issuer (within the meaning of the Dutch Withholding Tax Act 2021; *Wet bronbelasting 2021*) (see below), if such related entity:

- (a) is considered to be resident (*gevestigd*) in a jurisdiction that is listed in the yearly updated Dutch Regulation on low-taxing states and non-cooperative jurisdictions for tax purposes (*Regeling*

TAXATION

laagbelastende staten en niet-coöperatieve rechtsgebieden voor belastingdoeleinden) (a "Listed Jurisdiction"); or

- (b) has a permanent establishment located in a Listed Jurisdiction to which the interest payment is attributable; or
- (c) is entitled to the interest payment with the main purpose or one of the main purposes of avoiding taxation for another person or entity and there is an artificial arrangement or transaction or a series of artificial arrangements or transactions; or
- (d) is not considered to be the recipient of the interest in its jurisdiction of residence because such jurisdiction treats another entity as the recipient of the interest (a hybrid mismatch); or
- (e) is not resident in any jurisdiction (also a hybrid mismatch); or
- (f) is a reverse hybrid (within the meaning of Article 2(12) of the Dutch Corporate Income Tax Act; *Wet op de vennootschapsbelasting 1969*), if and to the extent (x) there is a participant in the reverse hybrid holding a Qualifying Interest in the reverse hybrid, (y) the jurisdiction of residence of the participant holding the Qualifying Interest in the reverse hybrid treats the reverse hybrid as transparent for tax purposes and (z) such participant would have been subject to Dutch withholding tax in respect of the payments of interest without the interposition of the reverse hybrid,

all within the meaning of the Dutch Withholding Tax Act 2021.

Related entity

For purposes of the Dutch Withholding Tax Act 2021, an entity is considered an entity related to the Issuer if:

- (a) such entity has a Qualifying Interest (as defined below) in the Issuer;
- (b) the Issuer has a Qualifying Interest in such entity; or
- (c) a third party has a Qualifying Interest in both the Issuer and such entity.

The term "Qualifying Interest" means a direct or indirectly held interest – either by an entity individually or jointly if an entity is part of a collaborating group (*samenwerkende groep*) – that enables such entity or such collaborating group to exercise a definite influence over another entity's decisions and allows it to determine the other entity's activities (within the meaning of case law of the European Court of Justice on the right of freedom of establishment (*vrijheid van vestiging*)).

Taxes on income and capital gains

A Securityholder who derives income or is deemed to derive income from a Security or who realises a gain from the disposal, deemed disposal or redemption of a Security will not be subject to Dutch taxation on such income or gain, provided that:

- (a) the Securityholder is neither a resident nor deemed to be a resident of the Netherlands for Dutch tax purposes;
- (b) the Securityholder does not have an enterprise or deemed enterprise (as defined in Dutch tax law) or an interest in an enterprise or deemed enterprise (as defined in Dutch tax law) that is, in whole or in part, carried on through a permanent establishment (*vaste inrichting*) or a permanent representative (*vaste vertegenwoordiger*) in the Netherlands and to which enterprise or part of that enterprise, as the case may be, the Securities are attributable;
- (c) the Securityholder is not entitled to a share in the profits of an enterprise that is effectively managed in the Netherlands, other than by way of securities and to which enterprise the Securities are attributable;
- (d) the Securityholder does not have a substantial interest (*aanmerkelijk belang*) or a deemed substantial interest in the Issuer as defined in the Dutch Income Tax Act 2001 (*Wet op de inkomstenbelasting 2001*) and will not obtain such interest under the Securities. Generally, a holder of Securities in a company is considered to hold a substantial interest in such company, if such holder alone or, in the case of an individual, together with such holder's partner for Dutch income tax purposes, or any relatives by blood or marriage in the direct line (including foster children), directly or indirectly, holds
 - (i) an interest of 5 per cent. or more of the total issued and outstanding capital of that company or of 5 per cent. or more of the issued and outstanding capital of a certain class of shares of that company; or
 - (ii) rights to acquire, directly or indirectly, such interest; or
 - (iii) certain profit sharing rights in that company that relate to 5 per cent. or more of the company's annual profits or to 5 per cent. or more of

TAXATION

the company's liquidation proceeds. A deemed substantial interest may arise if a substantial interest (or part thereof) in a company has been disposed of, or is deemed to have been disposed of, on a non-recognition basis;

- (e) the Securityholder, and in the case of an individual, his or her partner or certain of their relatives by blood or marriage on the direct line (including foster children), does not have (a) a substantial interest or deemed substantial interest or right in a Dutch company and will not obtain, under the Securities, an additional interest or right in this Dutch company or (b) a substantial interest or deemed substantial interest in a Dutch company by reason of the acquisition or the settlement of the Securities;
- (f) the Securities do not entitle the Securityholder to the beneficial ownership of (a) profit participating loans or a right in a Dutch entity or (b) an interest in the enterprise of a Dutch tax transparent entity;
- (g) the Securityholder does not hold Securities that are or are treated as (a) shares (*aandelen*), (b) profit participating certificates (*winstbewijzen*), (c) linked to the profits, (d) profit participation rights, (e) debt characterised as equity for Dutch tax purposes, or (f) redeemable in exchange for, convertible into or linked to shares or other equity instruments issued or to be issued by a Dutch entity;
- (h) the Securityholder does not have an interest or could obtain an interest under the Securities in (a) real estate located in the Netherlands or (b) an entity of which the assets consist or have consisted, directly or indirectly, on a consolidated basis or not, for 30 per cent. or more, of real estate located in the Netherlands; and
- (i) if the Securityholder is an individual, the Securityholder does not derive benefits from the Securities that are taxable as benefits from miscellaneous activities in the Netherlands (*resultaat uit overige werkzaamheden in Nederland*) as defined in the Dutch Income Tax Act 2001, which include, but are not limited to, activities in respect of the Securities which are beyond the scope of "regular active asset management" (normaal actief vermogensbeheer) or benefits which are derived from the holding, whether directly or indirectly, of (a combination of) shares, debt claims or other rights which form a "lucrative interest" (*lucratief belang*). A lucrative interest is an interest which the holder thereof has acquired under such circumstances that benefits arising from this lucrative interest are intended to be a remuneration for work or services performed by such holder (or a person related to such holder) in the Netherlands, whether within or outside an employment relationship, where such lucrative interest provides the holder thereof, economically, with certain benefits that have a relationship to the relevant work or services.

Under Dutch tax law a Securityholder will not be deemed a resident, domiciled or carrying on a business in the Netherlands by reason only of its holding of the Securities or the performance by the Issuer of its obligations under the Securities.

Gift and Inheritance Taxes

No gift or inheritance taxes will arise in the Netherlands with respect to a transfer of the Securities by way of gift by, or on the death of, a Securityholder, unless:

- (a) the Securityholder is a resident or deemed to be resident of the Netherlands for the purpose of the relevant Dutch tax law provisions;
- (b) in the case of a gift of the Securities by an individual who at the date of the gift was neither a resident nor deemed to be a resident of the Netherlands, such individual dies within 180 days after the date of the gift, while being a resident or deemed to be a resident of the Netherlands;
- (c) in the case of a gift of the Securities is made under a condition precedent, the Securityholder is resident or is deemed to be resident of the Netherlands at the time the condition is fulfilled; or
- (d) the transfer is otherwise construed as a gift or inheritance made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident of the Netherlands.

For the purpose of Dutch gift and inheritance tax, an individual who has the Dutch nationality will be deemed to be a resident of the Netherlands at the date of the gift or the date of his death, if he has been a resident of the Netherlands at any time during the ten years preceding the date of the gift or the date of his death.

For the purposes of Dutch gift tax, an individual who does not have Dutch nationality will be deemed to be a resident of the Netherlands, at the date of the gift, if he has been a resident of the Netherlands at any time during the twelve months preceding the date of the gift. Applicable tax treaties may override deemed residency.

TAXATION

Value Added Tax

No Value Added Tax (*Omzetbelasting*) will arise in the Netherlands in respect of any payment in consideration for the issue of the Securities or with respect to any payment of principal or interest by the Issuer on the Securities.

Other Taxes and Duties

No registration tax, stamp duty or any other similar documentary tax or duty, other than court fees, will be payable in the Netherlands in respect of or in connection with the issue of the Securities or the payment of interest or principal by the Issuer on the Securities.

Swiss Taxation

The following discussion is a summary of certain material Swiss tax considerations relating to (i) Securities where the holder is tax resident in Switzerland or has a tax presence in Switzerland or (ii) Securities where the paying agent is located in Switzerland. The discussion is based on legislation as of the date of this Base Prospectus. It does not aim to be a comprehensive description of all the Swiss tax considerations that may be relevant for a decision with respect to an investment in Securities. The tax treatment for each investor depends on the particular situation. All prospective investors / investors are advised to consult with their professional tax advisors as to the respective Swiss tax consequences relevant events, such as e.g. of the purchase, ownership, disposition, lapse, exercise or redemption of Securities (or options embedded therein) in light of their particular circumstances.

Swiss Withholding Tax

Payments by the Issuer on Securities are not subject to Swiss federal withholding tax provided that the Issuer is at all times resident and managed outside Switzerland for Swiss tax purposes.

Swiss Income Taxation

Securities held as Private Assets by a Swiss Resident Holder

(a) Structured Products

If, for Swiss income tax purposes, a Security classifies as a structured product, its income tax treatment depends on whether the bond and the derivative financial instrument(s) embedded therein are recognised, for Swiss income tax purposes, as separable from each other and whether the Security classifies, in terms of Swiss income tax law, as a structured product with or without a predominant one-time interest payment.

Non-transparent derivative financial instruments: If the (deemed) embedded bond is not recognised, for Swiss tax income purposes, as separable from the (deemed) embedded derivative financial instrument(s), the Security classifies as a so-called "non-transparent" derivative financial instrument, meaning that any return over the initial investment classifies as a taxable income item. Non-transparent derivative financial instruments may generally be expected to include a predominant one-time interest payment in terms of Swiss income tax law. On this basis, Swiss resident private investors in Securities classified as non-transparent derivative financial instruments will be taxed on any interest payments and on any gains, including capital and foreign exchange gains, realised on the Securities ("differential taxation method").

Transparent derivative financial instruments without a predominant one-time interest payment: If the (deemed) embedded bond is recognised, for Swiss income tax purposes, as separable from the (deemed) embedded derivative financial instrument(s) and the yield-to-maturity at issue is considered, in terms of Swiss income tax law, to solely or predominantly derive from periodic interest payments and not from a one-time interest-payment (see below "*Transparent derivative financial instruments with a predominant one-time interest payment*"), then any periodic interest payments and any one-time interest payment are taxed when paid (due) to the current holder of the Security. Any gain, including in respect of the derivative financial instrument(s) (deemed) embedded in the Security, or e.g. interest accrued or changes in foreign exchange rates or the level of market interest rates realised on the sale of the Security is a tax-free private capital gain, whereas a loss is a non-tax-deductible private capital loss (see below "*Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*"). The same applies if a Security is redeemed except that interest accrued is taxed when paid on behalf of the Issuer.

TAXATION

Transparent derivative financial instruments with a predominant one-time interest payment: If the (deemed) embedded bond is recognised, for Swiss income tax purposes, as separable from the (deemed) embedded derivative financial instrument(s) and the yield-to-maturity at issue is considered, in terms of Swiss income tax law, to exclusively or predominantly derive from a one-time interest-payment such as an original issue discount or a redemption premium, and not from periodic interest payments, then any interest payments due as well as any positive difference between the relevant Swiss income tax value of the (deemed) embedded bond at sale or redemption and at issuance or (secondary market) purchase, as applicable, (which difference may include e.g., interest accrued although not yet due on such Security or gains in respect of foreign exchange rate or market interest rate changes) ("modified differential taxation method") constitutes taxable income. A loss, as determined accordingly, realised on the sale or redemption of the Security may be offset against any qualifying taxable income items (including periodic interest payments) realised within the same taxation period from all financial instruments with a pre-dominant one-time interest component in terms of Swiss income tax law. Any residual return realised on the (deemed) embedded derivative financial instrument(s) is a tax-free private capital gain, and any residual loss is a non-tax-deductible private capital loss (see below "*Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*").

(b) Securities/Bonds

Securities without a predominant one-time interest payment: If, for Swiss income tax purposes, a Security classifies as a pure bond and the yield-to-maturity at issue of the Security is considered, in terms of Swiss income tax law, to exclusively or predominantly derive from periodic interest payments and not from a one-time interest-payment, Swiss tax resident private investors will be taxed on the periodic and any one-time interest payments fallen due to the current holder. Any gain (which may include e.g., interest accrued although not yet due on such Security or gains in respect of foreign exchange rate or market interest rate changes), realised on the sale of a Security is a tax-free private capital gain, whereas a loss is a non-tax-deductible private capital loss (see below "*Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*").

Securities with a predominant one-time interest payment: If, for Swiss income tax purposes, a Security classifies as a pure bond and the yield-to-maturity at issue of the Security is considered, in terms of Swiss income tax law, to exclusively or predominantly derive from a one-time interest-payment such as an original issue discount or a redemption premium and not from periodic interest payments, Swiss tax resident private investors will be taxed on any interest payments due and any positive difference between the relevant Swiss income tax value of such Security at sale or redemption and its value at issuance or (secondary market) purchase, as applicable (which difference may include e.g., interest accrued although not yet due on such Security or gains in respect of foreign exchange or market interest rate changes) ("differential taxation method"). Any losses, as determined accordingly, realised on the sale or redemption of the Security may be offset against any qualifying taxable income items (including periodic interest payments) realised within the same taxation period from all financial instruments with a predominant one-time interest component in terms of Swiss income tax law.

(c) Pure Derivative Financial Instruments

If a Security which classifies, for Swiss income tax purposes, as a pure derivative financial instrument (such as e.g., plain vanilla call or put options, on shares, commodities, precious metals, currencies or interest rate; whereby a Security's characterisation as a pure derivative financial instrument, for Swiss tax purposes, may, depending on the product, such as e.g. in the case of low exercise price call options, also depend on the extent of any prefunding and the product term) and such Security is held as part of the taxpayer's private assets in terms of Swiss income tax law, only the periodic and one-time dividend equalisation payments constitute taxable investment income, and any other return, including option premium payments and gain realised on the sale or redemption of such a Security, is a tax-exempt private capital gain, whereas a loss is a non-tax deductible private capital loss (see below "*Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*").

(d) Fund-like Products

A Security which classifies, for Swiss income tax purposes, as an interest in a collective capital investment scheme or as collective capital investment-like product will be considered a pass-through instrument for Swiss income tax purposes if dividend and interest income from, and capital gains and losses realised on, the underlying assets, are reported and distributed separately as required for Swiss income tax purposes. Under such conditions and under the condition that the Issuer reports the income

TAXATION

items and the capital gain and loss items to the Swiss Federal Tax Administration, an individual holding such a Security as part of his or her private assets must declare annually the dividend and interest distribution (in case the Security is distributing the income realised on the underlying investments) or the dividend and interest credited (in case the Security is reinvesting the income realised on the underlying investments) as taxable investment income (less attributable costs) on the underlying instruments. Any distributions or credits relating to items of qualifying capital gain on the underlying assets constitute tax-free private capital gains and, conversely any loss attributable a non-tax-deductible private capital loss. Gain realised on the sale of such a Security (including gains relating to dividends and interest accrued on the underlying assets) is exempt from income taxation as a private capital gain, and, conversely, any loss is not tax-deductible (see below "*Capital Gains Taxation – Securities held as Private Assets by a Swiss resident Holder*"). If the dividend and interest income from, and capital gains and losses realised on, the underlying assets, are not reported and distributed separately as required for Swiss income tax purposes, or the income items and capital gain and loss items are not reported to the Swiss Federal Tax Administration, the relevant Swiss tax authority can determine a taxable yield on the basis of a discretionary estimate (taking into account the nature of the assets in which the product is invested).

Securities held as Assets of a Business with Swiss tax nexus

Corporate entities, and individuals who hold Securities as business assets (as opposed to private assets) in terms of Swiss income tax law, with relevant tax nexus to Switzerland (i.e., whether e.g. as tax residents of Switzerland or, in the case of non-residents, through a permanent establishment in Switzerland) are required to recognise any payments on, and any capital gains or losses realised on the sale or redemption of, any such Securities (irrespective of their nature) in their income statement and will be taxed on any net taxable earnings for the respective taxation period.

The same taxation treatment also applies to individuals who are classified by the tax authorities as "professional securities dealers" for reasons of, *inter alia*, frequent dealing or leveraged investments in securities (including Securities).

Swiss Capital Gains Taxation

Securities held as Private Assets by a Swiss Resident Holder

A qualifying gain or a loss realised by an individual tax resident in Switzerland upon the sale or other disposal of a Security held as part of his or her private assets in terms of Swiss income tax law, is a tax-free private capital gain or a non-tax deductible private capital loss, respectively (see above under "Securities held as Assets of a Business with Swiss tax-nexus" for a summary of the tax treatment of individuals classified as "professional securities dealers"). Notwithstanding the foregoing, concerning the taxation treatment of Securities which classify as so-called (for Swiss income tax purposes) "non-transparent" derivative financial instruments or Securities which classify as securities with a predominant one-time interest payment in terms of Swiss income tax law, see the taxation principles set forth above with regard to the different instruments under "*Income Taxation – Securities held as Private Assets by a Swiss Resident Holder*").

Securities held as Assets of a Business with Swiss tax nexus

Capital gains realised on Securities held as assets of a business with relevant Swiss tax nexus are taxed in accordance with the taxation principles set forth above under "*Income Taxation – Securities held as Assets of a Business with Swiss tax nexus*".

Swiss Federal Securities Turnover Tax

The issue and the sale of a Security by the Issuer on the issuance day (i.e., a qualifying primary market transaction in terms of the Swiss federal stamp tax act) and the redemption of a Security are not subject to Swiss federal securities turnover tax, except that the issuance of a Security classified as a fund-like product where a Swiss domestic bank or a Swiss domestic securities dealer is a party to, or acts as an intermediary for, the transaction, all as defined in the Swiss federal stamp tax act for the relevant purpose, may be subject to Swiss federal securities turnover tax of up to 0.30 per cent. on the consideration.

Secondary market transactions in a Security with a maturity in excess of 12 months where a Swiss domestic bank or a Swiss domestic securities dealer (as defined in the Swiss federal stamp tax act) is a party to, or acts as an intermediary for, the transaction, may, if no statutory exemptions apply, be subject to Swiss securities turnover tax at a rate of up to 0.30 per cent. on the consideration. In contrast, a secondary market transaction in a Security is generally exempt from Swiss federal securities turnover tax if the Security classifies, for this

TAXATION

purpose, as pure derivative financial instrument (c.f. above "Income Taxation – Securities held as Private Assets by a Swiss Resident Holder – Pure Derivative Financial Instruments").

The delivery of an Underlying, where such Underlying classifies as a taxable security for purposes of the Swiss federal stamp tax act, such as a stock, a bond or an interest in a fund-like product, to the holder of a Security, is subject to Swiss federal securities turnover tax at a rate of 0.15 per cent. if the Underlying is a taxable security issued by a Swiss domestic issuer and at a rate of 0.30 per cent. if the Underlying is a taxable security issued by an issuer not qualifying as a Swiss domestic issuer, however, only if a Swiss securities dealer is a party to, or acts as an intermediary for, the transaction and if no exemption applies, all as defined in the Swiss federal stamp tax act for the relevant purpose.

Swiss Gift, Inheritance and Estate Taxes

Subject to an applicable international tax treaty in an international scenario, transfers of Securities may be subject to cantonal and/or communal inheritance tax, estate tax or gift tax if the deceased person had his or her last domicile in Switzerland, or if the donor is resident in Switzerland; or in the case of a deceased or donor not tax resident in Switzerland for the purpose of such taxes, the transfer involves an unincorporated business (partnership or sole proprietorship) in Switzerland and Securities are held as part of such business. No such taxes exist at the federal level. The tax rate depends on the relationship (i.e. the relationship between the deceased and the heirs, or between the donor and the donee) and the relevant value of the inheritance or gift. Interspousal gifts and gifts to descendants in direct line, as well as inheritances of the surviving spouse and descendants in direct line are exempt or taxed at privileged rates in most Swiss cantons/municipalities. Gifts and inheritances from unrelated persons are taxed at rates ranging from approx. 20 per cent. to 60 per cent. The taxable base is usually the market value of the asset transferred.

Swiss Net Worth and Capital Taxes

A holder of a Security who is (i) an individual and tax resident in Switzerland or (ii) a corporate tax resident in Switzerland or (iii) an individual or a corporate tax resident outside Switzerland holding the Security through a permanent establishment in Switzerland, is required to report such Security as part of the wealth tax relevant assets or as part of the business assets with Swiss tax nexus, as applicable, and is subject to annual cantonal and/or communal wealth tax or capital tax, as applicable, on any net taxable wealth (including the Securities) or net taxable capital, as applicable, which tax will, if such holder is an individual or corporate taxpayer resident outside of Switzerland holding the Security as described in clause (iii) above, be limited to the extent such net taxable wealth or capital, as applicable, is attributable to Switzerland.

The proposed financial transactions tax ("FTT")

On February 14, 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the participating Member States). However, Estonia has since stated that it will not participate.

The Commission's Proposal has very broad scope and could, if introduced in its current form, apply to certain dealings in the Securities (including secondary market transactions) in certain circumstances. The issuance and subscription of Securities should, however, be exempt.

Under the Commission's Proposal the FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in the Securities where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, "established" in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

However, the FTT proposal remains subject to negotiation between the participating Member States and the scope of any such tax is uncertain. Additional EU Member States may decide to participate.

Prospective holders of Securities are advised to seek their own professional advice in relation to the FTT.

Automatic exchange of tax information between States

On November 17, 2015, the Spanish Government published Royal Decree 1021/2015, of November 13, (the "**Royal Decree**") in force since January 1, 2016 which establish the obligation on financial institutions to identify the tax residence of persons holding or controlling certain financial accounts and to report them to the Spanish tax authorities within the context of mutual assistance.

TAXATION

The Royal Decree implements into Spanish domestic legislation the rules on the information to be reported to the tax authorities in respect of financial accounts and due diligence procedures that must be applied by affected financial institutions when obtaining such information per EC Council Directive 2011/16/EU on administrative cooperation in the field of taxation (as amended by EC Council Directive 2014/107/EU) as regards mandatory automatic exchange of information in the field of taxation and the provisions of article 29 bis and additional provision twenty-two of Spanish General Taxation Law.

Based on the Royal Decree, as amended by Royal Decree 366/2021 of May 25, BBVA may be compelled to provide the Spanish tax authorities with certain information in respect of certain categories of financial accounts held or controlled by some investors in the Securities.

UNITED STATES FEDERAL TAXATION

The following is a general discussion of certain U.S. federal income tax consequences of the ownership and disposition of the Securities. This discussion applies only to initial investors in the Securities who:

- purchase the Securities at the "issue price," which will equal the first price at which a substantial amount of the Securities is sold to the public (not including bond houses, brokers, or similar persons or organisations acting in the capacity of underwriters, placement agents or wholesalers); and
- hold the Securities as capital assets within the meaning of Section 1221 of the Internal Revenue Code of 1986, as amended (the "**Code**").

Subject to any additional discussion in the applicable Issue Terms, it is expected, and the discussion below assumes, that, for U.S. federal income tax purposes, the issue price of a Security is equal to its stated issue price indicated in the applicable Issue Terms.

This discussion does not describe all of the tax consequences that may be relevant to a holder in light of the holder's particular circumstances or to holders subject to special rules, such as:

- certain financial institutions;
- insurance companies;
- certain dealers and traders in securities or commodities;
- investors holding the Securities as part of a "straddle," conversion transaction, integrated transaction or constructive sale transaction;
- U.S. Holders (as defined below) whose functional currency is not the U.S. dollar;
- partnerships or other entities or arrangements classified as partnerships for U.S. federal income tax purposes;
- regulated investment companies;
- real estate investment trusts; or
- tax-exempt entities, "individual retirement accounts" or "Roth IRAs" as defined in Section 408 or 408A of the Code, respectively.

If an entity or arrangement that is classified as a partnership for U.S. federal income tax purposes holds a Security, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. If you are a partnership holding a Security, or a partner in such a partnership, you should consult your tax adviser as to the particular U.S. federal tax consequences of holding and disposing of the Security to you.

We will not attempt to ascertain whether any issuer of any shares of a corporation (or equity interests treated as shares of a corporation for U.S. federal income tax purposes) to which a Security relates (such shares hereafter referred to as "**Underlying Shares**") is treated as a "passive foreign investment company" ("**PFIC**") within the meaning of Section 1297 of the Code or as a "United States real property holding corporation" ("**USRPHC**") within the meaning of Section 897 of the Code. If any issuer of Underlying Shares were so treated, certain adverse U.S. federal income tax consequences might apply to a U.S. Holder in the case of a PFIC, and to a Non-U.S. Holder (as defined below) in the case of a USRPHC, upon the sale, exchange or retirement of a Security. You should refer to information filed with the SEC or other governmental authorities by the issuers of the

TAXATION

Underlying Shares and consult your tax adviser regarding the possible consequences to you if any issuer of Underlying Shares is or becomes a PFIC or USRPHC.

This summary does not address the U.S. federal income tax consequences of the ownership or disposition of any Underlying Shares (whether or not the issuer of the Underlying Shares is treated as a PFIC or USRPHC) received by a holder upon the maturity (or acceleration), exchange or exercise of a Security. You should consult your tax adviser regarding the potential U.S. federal income tax consequences of the ownership or disposition of any Underlying Shares received upon the maturity (or acceleration), exchange or exercise of a Security.

This summary also does not address the U.S. federal income tax consequences of holding or disposing of Credit-Linked Securities or EUA-Contract Linked Securities. The U.S. federal income tax consequences of holding or disposing of Credit-Linked Securities or EUA-Contract Linked Securities will be set forth in the applicable Issue Terms. U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of holding or disposing of Credit-Linked Securities or EUA-Contract Linked Securities.

This summary assumes that any Fund to which a Security relates will not be treated as a partnership for U.S. federal income tax purposes. If any such Fund were so treated, certain adverse U.S. federal income tax consequences might apply. You should consult your tax adviser regarding the possible consequences to you if any Fund to which a Security relates is or becomes treated as a partnership for U.S. federal income tax purposes.

This discussion is based on the Code, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations, all as of the date hereof, changes to any of which subsequent to the date hereof may affect the tax consequences described herein. This discussion is necessarily general and does not address all aspects of U.S. federal income taxation, including the alternative minimum tax, special tax accounting rules under Section 451 of the Code or the Medicare tax on investment income, or any U.S. federal taxes other than income taxes (such as U.S. federal estate and gift tax) or any state, local or non-U.S. tax laws to a holder of Securities. Persons considering the purchase of Securities should consult their tax advisers with regard to the application of the U.S. federal income tax laws to their particular situations as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

This discussion is subject to any additional disclosure regarding U.S. federal taxation contained in the applicable Issue Terms. Accordingly, you should also consult the applicable Issue Terms for any additional discussion of U.S. federal taxation with respect to the specific Securities offered thereunder.

TAX CONSEQUENCES TO U.S. HOLDERS

This section only addresses Securities that are in registered form for U.S. federal income tax purposes. If a Security is not in registered form for U.S. federal income tax purposes, certain adverse U.S. federal income tax consequences will apply to U.S. Holders. You should consult your tax adviser regarding the U.S. federal tax consequences of holding and disposing of a Security that is not in registered form for U.S. federal income tax purposes.

This section applies to you only if you are a U.S. Holder. As used herein, the term "**U.S. Holder**" means a beneficial owner of a Security that is for U.S. federal income tax purposes:

- a citizen or individual resident of the United States;
- a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States, any state thereof or the District of Columbia; or
- an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes

This section discusses only Securities treated as debt instruments for U.S. federal income tax purposes. Securities for which the principal amount payable at maturity or upon early settlement must equal or exceed the issue price should be treated as indebtedness for U.S. federal income tax purposes. The applicable Issue Terms will indicate whether the Issuer will treat as indebtedness for U.S. federal income tax purposes other Securities for which the principal amount payable at maturity or upon early settlement is not substantially lower than the issue price. In either case, there can be no assurance that the IRS or a court will agree.

TAXATION

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, will be treated as U.S.-source income. Interest income (including original issue discount, if any) from an investment in Securities will be treated as non-U.S. source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

Payments of Stated Interest. Unless otherwise specified in the applicable Issue Terms and subject to the discussions below, stated interest paid on a Security will be taxable to a U.S. Holder as ordinary interest income at the time it accrues or is received in accordance with the holder's method of accounting for U.S. federal income tax purposes.

Special rules governing the treatment of interest paid with respect to discount securities, short-term securities, floating rate securities, foreign currency securities, foreign currency contingent payment securities and contingent payment securities are described under "*Discount Securities*," "*Short-Term Securities*," "*Floating Rate Securities*," "*Foreign Currency Securities*," "*Foreign Currency Contingent Payment Securities*" and "*Contingent Payment Securities*" below.

Discount Securities

General. A Security (other than a short-term security, a contingent payment security or a foreign currency contingent payment security, all as defined below) that is issued at an issue price less than its "stated redemption price at maturity" will be considered to have been issued with "original issue discount" for U.S. federal income tax purposes (and will be referred to in this discussion as a "**discount security**") unless the Security satisfies a *de minimis* threshold (as defined below). The amount of original issue discount is equal to the excess of the stated redemption price at maturity over the issue price. The "stated redemption price at maturity" of a Security equals the sum of all payments required under the Security other than payments of "qualified stated interest." "Qualified stated interest" is stated interest unconditionally payable as a series of payments (other than in debt instruments of the issuer) at least annually during the entire term of the Security. For a Security that provides for interest solely at a single fixed rate, qualified stated interest is equal to the outstanding principal balance of the Security multiplied by the single fixed rate of interest. Subject to the discussion below under "*Securities Subject to Early Redemption or Repurchase*," if a Security provides for more than one fixed rate of stated interest, interest payable at the lowest stated fixed rate generally is qualified stated interest and the excess, if any, is included in the stated redemption price at maturity for purposes of determining whether the Security will be issued with original issue discount. See "*Floating Rate Securities*" below with regard to qualified stated interest in the case of floating rate securities.

A Security will not be considered to have original issue discount if the difference between the Security's stated redemption price at maturity and its issue price is less than a *de minimis* amount, generally defined by applicable Treasury regulations as $\frac{1}{4}$ of 1 percent of the stated redemption price at maturity multiplied by the number of complete years to maturity or, in the case of an installment obligation (as defined by applicable Treasury regulations), the weighted average maturity. The weighted average maturity is the sum of the following amounts determined for each payment under the Security other than a payment of qualified stated interest: (i) the number of complete years from the issue date of the Security until the payment is made, multiplied by (ii) a fraction, the numerator of which is the amount of the payment and the denominator of which is the Security's stated redemption price at maturity.

A U.S. Holder of discount securities will be required to include any qualified stated interest payments in income in accordance with the U.S. Holder's method of accounting for U.S. federal income tax purposes. U.S. Holders of discount securities will be required to include original issue discount in income for U.S. federal income tax purposes as it accrues, in accordance with a constant yield method based on a compounding of interest, without regard to the timing of the receipt of cash payments attributable to this income. Under this method, U.S. Holders of discount securities generally will be required to include in income increasingly greater amounts of original issue discount in successive accrual periods.

A U.S. Holder may make an election to include in gross income all interest that accrues on any Security (including stated interest, original issue discount and *de minimis* original issue discount, as adjusted by any amortizable bond premium (as defined below)) in accordance with a constant yield method based on the compounding of interest (a "**constant yield election**"). Such election may be revoked only with the permission of the IRS.

TAXATION

Additional rules applicable to discount securities that are denominated in a specified currency other than the U.S. dollar, or have payments of interest or principal determined by reference to the value of one or more currencies other than the U.S. dollar, are described under "*Foreign Currency Securities*" below.

Securities Subject to Early Redemption or Repurchase. A Security that is subject to redemption or repurchase prior to maturity may be subject to rules that differ from the general rules described above for purposes of determining the yield and maturity of the Security (which may affect whether the Security is treated as issued with original issue discount and, if so, the timing of accrual of the original issue discount). Under applicable Treasury regulations, the relevant Issuer will generally be presumed to exercise an unconditional option to redeem a Security if the exercise of the option will lower the yield on the Security. Conversely, you will generally be presumed to exercise an unconditional option to require the relevant Issuer to repurchase a Security if the exercise of the option will increase the yield on the Security. If such an option is not in fact exercised, the Security will be treated, solely for purposes of calculating original issue discount, as if it were redeemed and a new Security were issued on the presumed exercise date for an amount equal to the Security's "adjusted issue price" on that date. A Security's "adjusted issue price" generally is defined as the sum of its issue price and the aggregate amount of previously accrued original issue discount, less any prior payments on the Security other than payments of qualified stated interest.

Under these rules, if a Security provides for multiple fixed rates of interest that increase over the term of the Security, the Security's issue price is not below its stated principal amount and the relevant Issuer has an option to redeem the Security for an amount equal to the stated principal amount prior to the first date on which an increased rate of interest is in effect, the yield on the Security will be lowered if the relevant Issuer redeems the Security before the initial increase in the interest rate, and therefore the relevant Issuer's redemption option will be treated as exercised. Since the Security will therefore be treated as if it were redeemed prior to the initial increase in the interest rate, the Security will not be treated as issued with original issue discount. If a Security is not treated as issued with original issue discount and if, contrary to the presumption in the applicable Treasury regulations, the relevant Issuer does not redeem the Security before the initial increase in the interest rate, the Security will be treated, solely for purposes of calculating original issue discount, as redeemed and reissued. The rules governing short-term debt instruments (as described under "*Short Term Securities*" below) may apply to a Security deemed reissued if the term of the deemed reissued Security (as determined under the applicable Treasury regulations) is one year or less. You should consult your tax adviser concerning the possible application of these rules.

Floating Rate Securities

General. Securities that pay interest at a variable rate are subject to special rules. The following discussion applies to a Security (a "**floating rate security**") that satisfies the following conditions:

- the issue price does not exceed the total noncontingent principal payments due under the floating rate security by more than a specified *de minimis* amount;
- it provides for stated interest, paid or compounded at least annually, at current values of:
 - one or more qualified floating rates,
 - a single fixed rate and one or more qualified floating rates,
 - a single objective rate, or
 - a single fixed rate and a single objective rate that is a qualified inverse floating rate, each as defined in the applicable Treasury regulations; and
- certain other conditions, as set forth in the applicable Treasury regulations, are satisfied.

In general, a "**qualified floating rate**" is any variable rate where variations in the value of such rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds in the currency in which the floating rate security is denominated. For example, the commercial paper rate, USD LIBOR (in its current form) and SOFR will generally be treated as qualified floating rates. In general, a variable rate is not a "qualified floating rate" if it is subject to (i) a restriction or restrictions on the maximum stated interest rate (a "**cap**"), (ii) a restriction or restrictions on the minimum stated interest rate (a "**floor**"), (iii) a restriction or restrictions on the amount of increase or decrease in the stated interest rate (a "**governor**"), or (iv) any other restrictions similar to (i), (ii) and (iii). Notwithstanding the preceding sentence, the following restrictions will not cause a variable rate to fail to be a "qualified floating rate":

- a cap, floor, or governor that is fixed throughout the term of the floating rate security;

TAXATION

- a cap or similar restriction that is not reasonably expected as of the issue date to cause the yield on the floating rate security to be significantly less than the expected yield determined without the cap;
- a floor or similar restriction that is not reasonably expected as of the issue date to cause the yield on the floating rate security to be significantly more than the expected yield determined without the floor; or
- a governor or similar restriction that is not reasonably expected as of the issue date to cause the yield on the floating rate security to be significantly more or significantly less than the expected yield determined without the governor.

In general, an "**objective rate**" is a rate that is not itself a qualified floating rate but that is determined using a single fixed formula that is based on objective financial or economic information. A "**qualified inverse floating rate**" generally is any objective rate (i) that is equal to a fixed rate minus a qualified floating rate and (ii) the variations which can reasonably be expected to inversely reflect contemporaneous variations in the qualified floating rate (disregarding any caps, floors, governors or similar restrictions that would not, as described above, cause a rate to fail to be a qualified floating rate).

Unless otherwise provided in the applicable Issue Terms, it is expected, and the discussion below assumes, that a floating rate security should qualify as a "variable rate debt instrument." If a floating rate security with a term of more than one year (after taking into account the last possible day that the Security could be outstanding under its terms) does not qualify as a "variable rate debt instrument," then such a floating rate security will generally be treated as a "contingent payment debt instrument." For a description of the treatment of "contingent payment debt instruments," see the discussion under "*Contingent Payment Securities*" below.

Floating Rate Securities that Provide for a Single Variable Rate. All stated interest on a floating rate security will constitute qualified stated interest and will be taxable accordingly (as described under "*Discount Securities—General*" above) if:

- the floating rate security provides for stated interest at a single variable rate throughout the term thereof; and
- the stated interest on the floating rate security is unconditionally payable in cash or other property (other than debt instruments of the issuer) at least annually.

Thus, such a floating rate security will generally not be treated as issued with original issue discount unless the floating rate security is issued at an issue price below its stated principal amount and the difference between the issue price and the stated principal amount is equal to or greater than a specified *de minimis* amount, as defined above under "*Discount Securities—General*." For this purpose, and for purposes of the discussion below under "*Floating Rate Securities that Provide for Multiple Rates*," if a floating rate security provides for stated interest at a fixed rate for an initial period of one year or less followed by a variable rate and if the variable rate on the floating rate security's issue date is intended to approximate the fixed rate (which will be presumed to be the case if the value of the variable rate on the issue date does not differ from the value of the fixed rate by more than 0.25 per cent.), then the fixed rate and the variable rate together will constitute a single variable rate. In addition, two or more qualified floating rates that can reasonably be expected to have approximately the same values throughout the term of the floating rate security (which will be presumed to be the case for two or more qualified floating rates with values within 0.25 per cent. of each other as determined on the issue date) will be treated as a single qualified floating rate.

If a floating rate security that provides for stated interest at a single variable rate is issued with original issue discount equal to or greater than a specified *de minimis* amount, as discussed above, the amount of qualified stated interest and the amount of original issue discount that accrues during an accrual period on the floating rate security are determined under the rules applicable to fixed rate debt instruments, discussed under "*Discount Securities*" above, by assuming that the variable rate is a fixed rate equal to:

- in the case of a qualified floating rate or qualified inverse floating rate, the value, as of the issue date, of the qualified floating rate or qualified inverse floating rate; or
- in the case of an objective rate (other than a qualified inverse floating rate), a fixed rate that reflects the yield that is reasonably expected for the floating rate security.

TAXATION

The qualified stated interest required to be recognised in an accrual period is increased (or decreased) if the interest actually paid during the accrual period exceeds (or is less than) the interest assumed to be paid during the accrual period pursuant to the foregoing rules.

Floating Rate Securities that Provide for Multiple Rates. In general, a floating rate security that provides for (i) multiple floating rates or (ii) one or more floating rates in addition to a single fixed rate (other than an initial fixed rate for one year or less that meets the conditions described above) will be converted into an "equivalent" fixed rate debt instrument for purposes of determining the amount and accrual of original issue discount and qualified stated interest on the floating rate security. A floating rate security that only provides for multiple floating rates must be converted into an "equivalent" fixed rate debt instrument by replacing any qualified floating rate or qualified inverse floating rate provided for under the terms of the floating rate security with a fixed rate equal to the value of the qualified floating rate or qualified inverse floating rate, as the case may be, as of the floating rate security's issue date. In the case of a floating rate security that provides for stated interest at a fixed rate in addition to either one or more qualified floating rates or a qualified inverse floating rate, the fixed rate is initially converted into a qualified floating rate (or a qualified inverse floating rate, if the floating rate security provides for a qualified inverse floating rate). Under such circumstances, the qualified floating rate or qualified inverse floating rate that replaces the fixed rate must be such that the fair market value of the floating rate security as of the floating rate security's issue date is approximately the same as the fair market value of an otherwise identical debt instrument that provides for the substitute qualified floating rate or qualified inverse floating rate, as appropriate, rather than the fixed rate. Subsequent to converting the fixed rate into either a qualified floating rate or a qualified inverse floating rate, the floating rate security is then converted into an "equivalent" fixed rate debt instrument in the manner described above.

Once the floating rate security is converted into an "equivalent" fixed rate debt instrument pursuant to the foregoing rules, the amount of original issue discount and qualified stated interest, if any, are determined for the "equivalent" fixed rate debt instrument by applying the general original issue discount rules to the "equivalent" fixed rate debt instrument, and a U.S. Holder of the floating rate security must account for such original issue discount and qualified stated interest as if the U.S. Holder held the "equivalent" fixed rate debt instrument, as described under "*Discount Securities*" above. In each accrual period, appropriate adjustments must be made to the amount of qualified stated interest (or, in certain circumstances, original issue discount) assumed to have been accrued or paid with respect to the "equivalent" fixed rate debt instrument in the event that such amounts differ from the actual amount of interest accrued or paid on the floating rate security during the accrual period.

Amortizable Bond Premium

If a U.S. Holder purchases a Security (other than a contingent payment security or foreign currency contingent payment security, as defined below) for an amount that is greater than the sum of all amounts payable on the Security other than qualified stated interest, the holder will be considered to have purchased the Security with amortizable bond premium equal to such excess. A U.S. Holder generally may elect to amortize such bond premium allocable to an accrual period to offset qualified stated interest required to be included in such holder's income with respect to the Security in that accrual period. However, special rules may limit the amount of bond premium that can be amortised during certain accrual periods in the case of Securities that are subject to optional redemption. A holder who elects to amortise bond premium must reduce its tax basis in the Security by the amount of the premium previously amortised. If an election to amortize bond premium is not made, a U.S. Holder will take premium into account in computing its gain or loss on the sale or other disposition of the Security, which may reduce such capital gain or increase such capital loss. An election to amortise bond premium applies to all taxable debt obligations then owned and thereafter acquired by the holder and may be revoked only with the consent of the IRS.

If a holder makes a constant yield election (as described under "*Discount Securities*" above) for a Security with amortizable bond premium, such election will result in a deemed election to amortise bond premium for all of the holder's debt instruments with amortizable bond premium and may be revoked only with the permission of the IRS with respect to debt instruments acquired after revocation.

Sale, Exchange or Retirement of the Securities

Upon the sale, exchange or retirement of a Security, a U.S. Holder will recognise taxable gain or loss equal to the difference between the amount realised on the sale, exchange or retirement and the holder's adjusted tax basis in the Security. The amount realised upon the sale, exchange or retirement of a Security is generally equal to the amount of cash plus the fair market value of any other property received by the U.S. Holder, including the

TAXATION

fair market value of any common stock received, from the sale, exchange or retirement of the Security. For these purposes, the amount realised does not include any amount attributable to accrued but unpaid qualified stated interest. Amounts attributable to accrued but unpaid qualified stated interest are treated as interest as described under "*Payments of Stated Interest*" above. A U.S. Holder's adjusted tax basis in a Security will equal the cost of the Security to the holder, increased by the amounts of any original issue discount previously included in income by the holder with respect to the Security, and reduced by any principal payments received by the holder, by the amounts of any bond premium previously amortised by the holder and by the amounts of any other payments that do not constitute qualified stated interest.

Except as described below or as otherwise provided in the applicable Issue Terms, gain or loss recognised on the sale, exchange or retirement of a Security will generally be capital gain or loss and will be long-term capital gain or loss if at the time of sale, exchange or retirement the Security has been held for more than one year. Exceptions to this general rule apply in the case of a short-term security, to the extent of any accrued discount not previously included in the holder's taxable income. See "*Short-Term Securities*" below. In addition, other exceptions to this general rule apply in the case of certain foreign currency securities, foreign currency contingent payment securities and contingent payment securities. See the discussions under "*Foreign Currency Securities*," "*Foreign Currency Contingent Payment Securities*" and "*Contingent Payment Securities*" below.

Short-Term Securities

A Security that matures (after taking into account the last possible date that the Security could be outstanding under its terms) one year or less from its issue date will be treated as a "short-term security." As described below, certain aspects of the tax treatment of short-term securities with certain features are uncertain. U.S. Holders of short-term securities should consult their tax advisers as to the U.S. federal tax consequences of the ownership and disposition of such short-term securities.

Tax Treatment Prior to Maturity of the Short-Term Securities. Under the applicable Treasury regulations, a short-term security will be treated as being issued at a discount, the amount of which will be equal to the excess of the sum of all payments on the short-term security (including all stated interest and the amount to be paid at maturity) over its issue price. No payments on a short-term security are treated as qualified stated interest.

A U.S. Holder who is a cash-method taxpayer generally will not be required to include the discount in income as it accrues for U.S. federal income tax purposes unless the holder elects to do so. A U.S. Holder who is a cash-method taxpayer and does not make such election should generally include the stated interest payments on the short-term securities, if any, as ordinary income upon receipt. Except in the case of stated interest payments, cash-method holders generally will not be required to recognise income with respect to the short-term securities prior to maturity, other than pursuant to a sale, exchange or retirement, as described below.

A U.S. Holder who is an accrual-method taxpayer will be required to include the discount in income as it accrues on a straight-line basis, unless the holder makes an election to accrue the discount according to a constant yield method based on daily compounding.

Tax Treatment at Maturity of the Short-Term Securities. Upon retirement of the short-term securities at maturity, any gain recognised will be treated as ordinary income.

Sale, Exchange or Retirement of the Short-Term Securities. Upon a sale, exchange or retirement of a short-term security, a U.S. Holder should treat any gain recognised as ordinary income to the extent of the discount accrued on a straight-line basis (or, if elected, according to a constant yield method based on daily compounding) and not yet included in income. Any gain in excess of this amount will be treated as short-term capital gain. Any loss recognised will be treated as a capital loss.

Tax Treatment of Short-Term Securities that Provide for a Payment at Maturity that is Not Fixed as of the Issue Date. Except as specifically stated below, the tax treatment of short-term securities that provide for a payment at maturity that is not fixed as of the issue date ("**contingent short-term securities**") is the same as described above for short-term securities. As described below, certain aspects of the tax treatment of contingent short-term securities are uncertain. Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority regarding the proper method of accrual of discount on contingent short-term securities, the Issuers' counsel is expected to be unable to opine regarding issues identified below as uncertain or unclear. Although accrual-method holders, and cash-method holders that have elected to apply an accrual method of tax accounting to the short-term securities, generally are required to accrue the discount on the short-term securities

TAXATION

in income on a current basis over the term of the Securities, in the case of contingent short-term securities, because the amount payable at maturity with respect to the contingent short-term securities is uncertain, it is unclear how such accruals should be determined. Additionally, in the case of contingent short-term securities, it is unclear whether or to what extent gain from a sale, exchange or retirement prior to maturity should be treated as capital gain or ordinary income. U.S. Holders should consult their tax advisers regarding the proper treatment of an investment in contingent short-term securities.

Interest on Indebtedness Incurred to Purchase the Short-Term Securities. A cash-method U.S. Holder who does not elect to apply an accrual method of tax accounting to the short-term securities will be required to defer deductions for certain interest paid on indebtedness incurred to purchase or carry the short-term securities until the U.S. Holder includes the discount on the Securities in income or disposes of the Securities in a taxable transaction. As noted above, however, there is no authority regarding the proper method of accrual of discount on short-term debt instruments such as contingent short-term securities. It is therefore unclear how, if at all, the rules regarding deferral of interest deductions would apply to contingent short-term securities. U.S. Holders should consult their tax advisers regarding these deferral rules.

Foreign Currency Securities

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities (i) that are denominated in a specified currency other than the U.S. dollar or (ii) the payments of interest and principal on which are payable in (or determined by reference to) a specified currency other than the U.S. dollar, which are referred to herein as "**foreign currency securities**." For a description of the treatment of foreign currency securities that provide for contingent payments or for payments made in or determined by reference to multiple currencies, see the discussion under "*Foreign Currency Contingent Payment Securities*" below.

The rules applicable to foreign currency securities could require gain or loss realised upon the sale, exchange or other disposition (including retirement) of the Securities that is attributable to fluctuations in currency exchange rates ("**foreign currency gain or loss**") to be recharacterised as ordinary income or loss. The rules applicable to foreign currency securities are complex and their application may depend on the holder's particular U.S. federal income tax situation. For example, various elections are available under these rules, and whether a holder should make any of these elections may depend on the holder's particular U.S. federal income tax situation. U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of the ownership and disposition of foreign currency securities.

Payments of Interest on Foreign Currency Securities. A U.S. Holder who uses the cash method of accounting for U.S. federal income tax purposes and who receives a payment of qualified stated interest (or who receives proceeds from a sale, exchange or other disposition (including retirement) attributable to accrued qualified stated interest) in a foreign currency with respect to a foreign currency security will be required to include in income the U.S. dollar value of the foreign currency payment as determined on the date of actual or constructive receipt by such U.S. Holder, using the spot rate of exchange on such date, regardless of whether the payment is in fact converted to U.S. dollars at that time, and this U.S. dollar value will be the U.S. Holder's tax basis in the foreign currency. To the extent that a cash-method holder is required to accrue original issue discount on a foreign currency security, rules similar to the rules described in the following paragraph will apply with respect to the original issue discount.

In the case of a U.S. Holder that uses the accrual method of accounting for U.S. federal income tax purposes, the holder will be required to include in income the U.S. dollar value of the amount of interest income (including original issue discount, but reduced by amortizable bond premium to the extent applicable) that has accrued and is otherwise required to be taken into account with respect to a foreign currency security during an accrual period. The U.S. dollar value of the accrued income will be determined by translating the income at an average rate of exchange for the accrual period or, with respect to an accrual period that spans two taxable years, at the average rate for the partial period within the taxable year. Alternatively, a U.S. Holder may elect to translate interest income (including original issue discount) for an interest accrual period into U.S. dollars at the spot rate on the last day of the interest accrual period (or, in the case of a partial accrual period, the spot rate on the last day of the taxable year) or, if the date of receipt is within five business days of the last day of the interest accrual period, the spot rate on the date of receipt. A U.S. Holder that makes this election must apply it consistently to all debt instruments from year to year and cannot change the election without the consent of the IRS. In addition to the interest income accrued as described above, the U.S. Holder will recognise foreign currency gain or loss as ordinary income or loss (which will not be treated as interest income or expense) with respect to accrued interest income on the date the interest payment or proceeds from the sale, exchange or other

TAXATION

disposition (including retirement) attributable to accrued interest are actually received. The amount of ordinary income or loss recognised will equal the difference between the U.S. dollar value of the foreign currency payment received (determined based on a spot rate on the date the payment is received) in respect of the accrual period (or, where a holder receives U.S. dollars, the amount of the payment in respect of the accrual period) and the U.S. dollar value of interest income that has accrued during the accrual period (as determined above).

Original Issue Discount and Amortizable Bond Premium on Foreign Currency Securities. Original issue discount and amortizable bond premium (each as defined above) on a foreign currency security are to be determined in the relevant foreign currency. If an election to amortise bond premium is made, amortizable bond premium taken into account on a current basis will reduce interest income in units of the relevant foreign currency. Foreign currency gain or loss is realised on amortised bond premium with respect to any period by treating the bond premium amortised in the same period as a return of principal that is treated in the same manner as on the sale, exchange or retirement of the foreign currency security (as discussed below). Any foreign currency gain or loss will be ordinary income or loss as described below.

Tax Basis in Foreign Currency Securities. A U.S. Holder's tax basis in a foreign currency security, and the amount of any subsequent adjustment to the holder's tax basis, will be the U.S. dollar value of the foreign currency amount paid for such foreign currency security, or of the foreign currency amount of the adjustment, determined on the date of the purchase or adjustment (or, in the case of cash-method and electing accrual-method taxpayers, the date of settlement for Securities that are traded on an established securities market). A U.S. Holder who purchases a foreign currency security with previously owned foreign currency will recognise ordinary income or loss in an amount equal to the difference, if any, between such U.S. Holder's tax basis in the foreign currency and the U.S. dollar fair market value of the foreign currency security on the date of purchase.

Sale, Exchange or Retirement of Foreign Currency Securities. Foreign currency gain or loss recognised upon the sale, exchange or retirement of a foreign currency security will be ordinary income or loss that will not be treated as interest income or expense. The amount of foreign currency gain or loss generally will equal the difference between (i) the U.S. dollar value of the U.S. Holder's purchase price (excluding any amortizable bond premium previously accrued) in the foreign currency of the Security, determined on the date the payment is received in exchange for the Security or the Security is disposed of, and (ii) the U.S. dollar value of the U.S. Holder's purchase price (excluding any amortizable bond premium previously accrued) in the foreign currency of the Security, determined on the date the U.S. Holder acquired the Security. Payments received attributable to accrued interest will be treated in accordance with the rules applicable to payments of interest on foreign currency securities described above. Foreign currency gain or loss realised upon the sale, exchange or retirement of any foreign currency security will be recognised only to the extent of the total gain or loss realised by a U.S. Holder on the sale, exchange or retirement of the foreign currency security. Any gain or loss realised by a U.S. Holder in excess of the foreign currency gain or loss will be capital gain or loss (except in the case of a short-term security, to the extent of any discount not previously included in the holder's income). If a U.S. Holder recognises an ordinary loss upon a sale or other disposition of a foreign currency security and such loss is above certain thresholds, the holder may be required to file a disclosure statement with the IRS. See "—*Disclosure Requirements*" below.

A U.S. Holder will have a tax basis in any foreign currency received on the sale, exchange or retirement of a foreign currency security equal to the U.S. dollar value of the foreign currency, determined at the time of such sale, exchange or retirement. A cash-method taxpayer who buys or sells a foreign currency security that is traded on an established securities market is required to translate units of foreign currency paid or received into U.S. dollars at the spot rate on the settlement date of the purchase or sale. Accordingly, no exchange gain or loss will result with respect to such foreign currency from currency fluctuations between the trade date and the settlement of the purchase or sale. An accrual-method taxpayer may elect the same treatment for all purchases and sales of foreign currency obligations if such obligations are traded on an established securities market. This election cannot be changed without the consent of the IRS. Any gain or loss realised by a U.S. Holder on a sale or other disposition of foreign currency (including its exchange for U.S. dollars or its use to purchase foreign currency securities) will be ordinary income or loss.

Foreign Currency Contingent Payment Securities

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that (i) are denominated in a specified currency other than the U.S. dollar or the payments of interest and principal on which are payable in (or determined by reference to) a specified currency other than the U.S. dollar and provide for contingent payments or (ii) provide for payments made in or determined by reference to multiple

TAXATION

currencies (other than the U.S. dollar) (such Securities hereinafter referred to as "**foreign currency contingent payment securities**"). These Securities will be subject to special rules that govern the tax treatment of foreign currency contingent payment securities under applicable Treasury regulations (the "**foreign currency contingent debt regulations**").

Pursuant to the foreign currency contingent debt regulations, a U.S. Holder of a Security will be required to accrue interest income on the Security on a constant yield basis, based on a comparable yield, as described below, regardless of whether such holder uses the cash or accrual method of accounting for U.S. federal income tax purposes. All determinations and computations required under the foreign currency contingent debt regulations (including the relevant Issuer's determination of the "comparable yield" and "projected payment schedule" for the Security, each as defined below) will be made in the denomination currency of the Security. The foreign currency contingent debt regulations provide that the denomination currency of Securities that have principal or interest payments denominated in, or determined by reference to, more than one currency is the currency with the greatest value determined by comparing the values of the noncontingent and projected payments denominated in, or determined by reference to, each currency on the issue date, discounted to present value and, if necessary, translated into U.S. dollars at the spot rate on the issue date.

The foreign currency contingent debt regulations provide that a U.S. Holder must accrue into income original issue discount for U.S. federal income tax purposes for each accrual period prior to and including the maturity date of the Security. The amount of original issue discount that a U.S. Holder must accrue for each accrual period is determined in the denomination currency by applying the "noncontingent bond method" to the Security in the denomination currency and equals the product of:

- the adjusted issue price (as defined below) of the Security in the denomination currency as of the beginning of the accrual period;
- the comparable yield of the Security, adjusted for the length of the accrual period; and
- a fraction, the numerator of which is the number of days during the accrual period that the U.S. Holder held the Security and the denominator of which is the number of days in the accrual period.

The "**adjusted issue price**" of a Security is its issue price, increased by any interest income previously accrued (determined without regard to any net positive or net negative adjustments as described below), and decreased by the amount of any projected payments that previously have been scheduled to be made in respect of the Security, each determined in the denomination currency.

The term "**comparable yield**" as used in the foreign currency contingent debt regulations is determined in the denomination currency and is equal to the greater of (i) the annual yield the relevant Issuer would pay, as of the issue date, on a fixed rate debt instrument in the denomination currency with no contingent payments, but with terms and conditions otherwise comparable to those of the Security, and (ii) a rate of interest that is analogous to the applicable federal rate that would be used if the U.S. dollar were the denomination currency.

The foreign currency contingent debt regulations require that the relevant Issuer provides to U.S. Holders, solely for U.S. federal income tax purposes, a schedule of the projected amounts of payments in the denomination currency (the "projected payment schedule") on a Security. This schedule must produce a yield to maturity that equals the comparable yield.

The comparable yield and the projected payment schedule will not be provided for any purpose other than to determine a U.S. Holder's interest accruals and adjustments thereto in respect of the Security for U.S. federal income tax purposes. The comparable yield and the projected payment schedule will not constitute a projection or representation by the relevant Issuer regarding the actual amounts that will be paid on the Security.

Translation of Amounts Determined Under Noncontingent Bond Method. The accruals of interest computed with respect to a Security in the denomination currency (adjusted by certain net positive or negative adjustments as described below) must be translated into U.S. dollars. The U.S. dollar value of the accrued income will be determined by translating the income at an average rate of exchange for the accrual period or, with respect to an accrual period that spans two taxable years, at an average rate for the partial period within the taxable year. A U.S. Holder may elect to translate interest income for an interest accrual period into U.S. dollars at the spot rate on the last day of the interest accrual period (or, in the case of a partial accrual period, the spot rate on the last day of the taxable year). A U.S. Holder that makes this election must apply it consistently to all debt instruments from year to year and cannot change the election without the consent of the IRS.

TAXATION

Adjustments to Interest Accruals on the Securities. If, during any taxable year, a U.S. Holder of a Security receives actual payments with respect to such Security that, in the aggregate, exceed the total amount of projected payments for that taxable year, as determined in the denomination currency, the U.S. Holder will incur a "net positive adjustment" under the foreign currency contingent debt regulations equal to the amount of such excess. The U.S. Holder will treat a net positive adjustment as additional interest income in that taxable year, translated into U.S. dollars at the spot rate on the last day of the taxable year in which the adjustment is taken into account or, if earlier, the date of a sale, exchange or retirement of the Security.

If a U.S. Holder receives in a taxable year actual payments with respect to a Security that, in the aggregate, are less than the amount of projected payments for that taxable year, as determined in the denomination currency, the U.S. Holder will incur a "net negative adjustment" under the foreign currency contingent debt regulations equal to the amount of such deficit. This net negative adjustment:

- (i) will first reduce interest on the Security that otherwise would accrue in the denomination currency for that taxable year and be included in income in the taxable year;
- (ii) to the extent of any excess after applying (i), will give rise to an ordinary loss to the extent of the U.S. Holder's accrued but unpaid interest on the Security in prior taxable years (translated into U.S. dollars at the spot rate used to translate interest in the relevant prior taxable year);
- (iii) to the extent of any excess after applying (i) and (ii), will give rise to an ordinary loss to the extent of the U.S. Holder's accrued and paid interest on the Security in prior taxable years (translated into U.S. dollars at the spot rate on the date the Security was issued or, if later, acquired); and
- (iv) to the extent of any excess after applying (i), (ii) and (iii), will be treated as a net negative adjustment carryforward that will be applied to reduce interest accruals in subsequent years and the amount realised in the year of a sale, exchange or retirement of the Security (in the denomination currency).

With respect to non-corporate U.S. Holders, a net negative adjustment is not subject to the two percent floor limitation on miscellaneous itemised deductions.

Sale, Exchange or Retirement of Foreign Currency Contingent Payment Securities. Generally, the sale, exchange or retirement of a Security will result in taxable gain or loss to a U.S. Holder. The amount of gain or loss on a sale, exchange or retirement of a Security will be equal to the difference between the amount realised on the sale, exchange or retirement and such holder's adjusted tax basis in the Security. As discussed above, to the extent a U.S. Holder has any net negative adjustment carryforward, the U.S. Holder may use such net negative adjustment from a previous year to reduce the amount realised in the denomination currency on the sale, exchange or retirement of the Security.

A U.S. Holder's adjusted tax basis in a Security will equal the U.S. dollar cost as of the day the U.S. Holder purchased the Security, increased by the U.S. dollar value of the holder's total interest accruals with respect to the Security (determined without regard to any adjustments to interest accruals as described above), translated as described above, and decreased by the amount of any projected payments that previously have been scheduled to be made in respect of the Security (translated into U.S. dollars).

The amount realised on the sale, exchange or unscheduled retirement of a Security is generally equal to the U.S. dollar value of cash and the fair market value of any other property received by the U.S. Holder, including the fair market value of any Underlying Shares received, reduced by the amount of any net negative adjustment carryforward (translated into U.S. dollars). Any gain, other than foreign currency gain (as discussed below), will be treated as interest income. Any loss, other than foreign currency loss (as discussed below), will be treated as an ordinary loss to the extent of the excess of the holder's total interest accruals over the total net negative adjustments previously taken into account as ordinary losses in respect of the Security, and as a capital loss thereafter. If a U.S. Holder recognises an ordinary loss upon a sale, exchange or retirement of a Security and such loss is above certain thresholds, the holder may be required to file a disclosure statement with the IRS. See "*Disclosure Requirements*" below.

For purposes of determining the amount realised at maturity of a Security, the U.S. Holder will be deemed to receive the projected amount of any contingent payment due on that date, reduced by the amount of any net negative adjustment carryforward. The projected amount is translated into U.S. dollars by translating the portion attributable to principal into U.S. dollars at the spot rate on the issue date and translating the portion attributable to accrued interest into U.S. dollars at the rates at which such amounts of interest were translated when accrued. To the extent that the actual amount a U.S. Holder receives at the maturity of a Security is greater or less than

TAXATION

the projected amount, a U.S. Holder will incur a net positive adjustment or a net negative adjustment, which will be treated as described above under "*Adjustments to Interest Accruals on the Securities*." To the extent that there is any net negative adjustment carryforward as described above under "*Adjustments to Interest Accruals on the Securities*," it will reduce the amount realized on the Security (translated into U.S. dollars at the spot rate on the issue date of the Security).

Foreign Currency Gain or Loss on Foreign Currency Contingent Payment Securities. A U.S. Holder may recognise foreign currency gain or loss with respect to a Security when the U.S. Holder receives payments on the Security. The amount of foreign currency gain or loss attributable to payments of interest previously accrued on the Security is determined by translating the amount of interest received into U.S. dollars at the spot rate on the date of receipt and subtracting from such amount the amount determined by translating the interest received into U.S. dollars at the rate at which such interest was accrued as described above. The amount of foreign currency gain or loss attributable to payments of principal is determined by translating the amount of principal received into U.S. dollars at the spot rate on the date of receipt and subtracting from such amount the amount determined by translating the principal received into U.S. dollars at the spot rate on the date the Security was issued or, if later, acquired. For purposes of determining the amount of foreign currency gain or loss, the amount received (i) shall first be attributed to any net positive adjustment on the Security that has not previously been taken into account and (ii) then to accrued but unpaid interest remaining after reduction by any net negative adjustment and (iii) any remaining amount shall be attributed to the principal.

Upon a sale, exchange or unscheduled retirement of a Security, a U.S. Holder would also recognise foreign currency gain or loss. Payments received upon such a sale, exchange or unscheduled retirement of a Security shall first be applied against the principal of the Security and then against accrued but unpaid interest (and treated, in each case, as described in the preceding paragraph).

The total amount of foreign currency gain or loss on a Security is equal to the sum of the foreign currency gains or losses on principal and interest, calculated as described above. Any such foreign currency gain or loss will be treated as ordinary income or loss. Prospective purchasers should consult their tax advisers regarding these rules. If a U.S. Holder recognises an ordinary loss upon a sale or other disposition of a foreign currency contingent payment security and such loss is above certain thresholds, the holder may be required to file a disclosure statement with the IRS. See "*Disclosure Requirements*" below.

Special rules will apply if one or more contingent payments on a Security become fixed. If one or more contingent payments on a Security (determined in the denomination currency) become fixed more than six months prior to the date each such payment is due, a U.S. Holder will be required to make a positive or negative adjustment, as appropriate, equal to the difference between the present value of the amounts that are fixed and the present value of the projected amounts of the contingent payments as provided in the projected payment schedule (determined in the denomination currency), using the comparable yield as the discount rate in each case. If all remaining scheduled contingent payments on a Security become fixed substantially contemporaneously, a U.S. Holder will be required to make adjustments to account for the difference between the amounts treated as fixed and the projected payments in a reasonable manner over the remaining term of the Security. For purposes of the preceding sentence, a payment (including an amount payable at maturity) will be treated as fixed if (and when) all remaining contingencies with respect to it are remote or incidental within the meaning of the applicable Treasury regulations. A U.S. Holder's tax basis in the Security and the character of any gain or loss on the sale of the Security will also be affected. U.S. Holders should consult their tax advisers concerning the application of these special rules.

Contingent Payment Securities

General. Unless otherwise noted in the applicable Issue Terms, a Security that has principal or interest determined by reference to commodities, funds, securities or indices, other than a Short-Term Security (see the discussion under "*Short-Term Securities*" above), or a Foreign Currency Contingent Payment Security (see the discussion under "*Foreign Currency Contingent Payment Securities*" above), (such Securities hereinafter referred to as "contingent payment securities") will generally be treated as a "contingent payment debt instrument" for U.S. federal income tax purposes. As a result, the contingent payment securities will be subject to special rules that govern the tax treatment of debt obligations that are treated under applicable Treasury regulations (the "**contingent debt regulations**") as providing for contingent payments.

Pursuant to the contingent debt regulations, a U.S. Holder of a contingent payment security will be required to accrue interest income on the contingent payment security on a constant yield basis, based on a comparable

TAXATION

yield, as described below, regardless of whether such holder uses the cash or accrual method of accounting for U.S. federal income tax purposes. As a result, a U.S. Holder may be required to include interest in income each year in excess of any stated interest payments actually received in that year.

The contingent debt regulations provide that a U.S. Holder must accrue an amount of ordinary interest income, as original issue discount for U.S. federal income tax purposes, for each accrual period prior to and including the maturity date of the contingent payment security that equals the product of:

- the adjusted issue price (as defined below) of the contingent payment security as of the beginning of the accrual period;
- the comparable yield (as defined below) of the contingent payment security, adjusted for the length of the accrual period; and
- a fraction, the numerator of which is the number of days during the accrual period that the U.S. Holder held the contingent payment security and the denominator of which is the number of days in the accrual period.

The "**adjusted issue price**" of a contingent payment security is its issue price, increased by any interest income previously accrued, determined without regard to any adjustments to interest accruals described below, and decreased by the projected amount of any payments (in accordance with the projected payment schedule described below) previously made with respect to the contingent payment security.

The term "**comparable yield**" as used in the contingent debt regulations means the greater of (i) the annual yield the relevant Issuer would pay, as of the issue date, on a fixed-rate, nonconvertible debt instrument with no contingent payments, but with terms and conditions otherwise comparable to those of the contingent payment securities, and (ii) the applicable federal rate.

The contingent debt regulations require that the relevant Issuer provides to U.S. Holders, solely for U.S. federal income tax purposes, a schedule of the projected amounts of payments (the "projected payment schedule") on the contingent payment securities. This schedule must produce a yield to maturity that equals the comparable yield.

The comparable yield and the projected payment schedule will not be provided for any purpose other than to determine a U.S. Holder's interest accruals and adjustments thereto in respect of the contingent payment securities for U.S. federal income tax purposes. They will not constitute a projection or representation by the relevant Issuer regarding the actual amounts that will be paid on the contingent payment securities.

Adjustments to Interest Accruals on the Securities. If, during any taxable year, a U.S. Holder of a contingent payment security receives actual payments with respect to such contingent payment security that, in the aggregate, exceed the total amount of projected payments for that taxable year, the U.S. Holder will incur a "net positive adjustment" (*i.e.*, the excess of projected payments over actual payments) under the contingent debt regulations equal to the amount of such excess. The U.S. Holder will treat a net positive adjustment as additional interest income in that taxable year.

If a U.S. Holder receives in a taxable year actual payments with respect to the contingent payment security that, in the aggregate, are less than the amount of projected payments for that taxable year, the U.S. Holder will incur a "net negative adjustment" under the contingent debt regulations equal to the amount of such deficit. This net negative adjustment:

- (i) will first reduce the U.S. Holder's interest income on the contingent payment security for that taxable year;
- (ii) to the extent of any excess after applying (i), will give rise to an ordinary loss to the extent of the U.S. Holder's interest income on the contingent payment security during prior taxable years, reduced to the extent such interest was offset by prior net negative adjustments; and
- (iii) to the extent of any excess after applying (i) and (ii), will be carried forward as a negative adjustment to offset future interest income with respect to the contingent payment security or to reduce the amount realized on a sale, exchange or retirement of the contingent payment security.

With respect to non-corporate U.S. Holders, a net negative adjustment is not subject to the two percent floor limitation on miscellaneous itemised deductions.

TAXATION

Generally, the sale, exchange or retirement of a contingent payment security will result in taxable gain or loss to a U.S. Holder. The amount of gain or loss on a sale, exchange or retirement of a contingent payment security will be equal to the difference between (a) the amount of cash plus the fair market value of any other property received by the U.S. Holder, including the fair market value of any Underlying Shares received (the "**amount realised**"), from the sale, exchange or retirement of the contingent payment security and (b) the U.S. Holder's adjusted tax basis in the contingent payment security. As discussed above, to the extent that a U.S. Holder has any net negative adjustment carryforward, the U.S. Holder may use such net negative adjustment from a previous year to reduce the amount realised on the sale, exchange or retirement of the contingent payment security.

For purposes of determining the amount realised on the scheduled retirement of a contingent payment security, a U.S. Holder will be treated as receiving the projected amount of any contingent payment due at maturity. As previously discussed, to the extent that actual payments with respect to the contingent payment securities during the year of the scheduled retirement are greater or less than the projected payments for such year, a U.S. Holder will incur a net positive or negative adjustment, resulting in additional ordinary income or loss, as the case may be.

A U.S. Holder's adjusted tax basis in a contingent payment security generally will be equal to the U.S. Holder's original purchase price for the contingent payment security, increased by any interest income previously accrued by the U.S. Holder (determined without regard to any adjustments to interest accruals described above) and decreased by the amount of any projected payments that previously have been scheduled to be made in respect of the contingent payment security (without regard to the actual amount paid).

Gain recognised by a U.S. Holder upon a sale, exchange or retirement of a contingent payment security generally will be treated as ordinary interest income. Any loss will be ordinary loss to the extent of the excess of previous interest inclusions over the total net negative adjustments previously taken into account as ordinary losses in respect of the contingent payment security, and thereafter capital loss (which will be long-term capital loss if the contingent payment security has been held for more than one year). The deductibility of capital losses is subject to limitations. If a U.S. Holder recognises a loss upon a sale or other disposition of a contingent payment security and such loss is above certain thresholds, the holder may be required to file a disclosure statement with the IRS. See "*Disclosure Requirements*" below.

Special rules will apply if one or more contingent payments on a contingent payment security become fixed. If one or more contingent payments on a contingent payment security become fixed more than six months prior to the date each such payment is due, a U.S. Holder will be required to make a positive or negative adjustment, as appropriate, equal to the difference between the present value of the amounts that are fixed and the present value of the projected amounts of the contingent payments as provided in the projected payment schedule, using the comparable yield as the discount rate in each case. If all remaining scheduled contingent payments on a contingent payment security become fixed substantially contemporaneously, a U.S. Holder will be required to make adjustments to account for the difference between the amounts treated as fixed and the projected payments in a reasonable manner over the remaining term of the contingent payment security. For purposes of the preceding sentence, a payment (including an amount payable at maturity) will be treated as fixed if (and when) all remaining contingencies with respect to it are remote or incidental within the meaning of the applicable Treasury regulations. A U.S. Holder's tax basis in the contingent payment security and the character of any gain or loss on the sale of the contingent payment security will also be affected. U.S. Holders should consult their tax advisers concerning the application of these special rules.

Securities Treated as Open Transactions

This discussion applies to Securities that do not pay coupons and provide for a single payment at maturity or early settlement that is determined by reference to the performance of a relevant Reference Item and that thus may be greater than or substantially lower than the Security's issue price. Except as otherwise provided in the applicable Issue Terms, under current law, any such Securities should be treated as a single financial contract that is an "open transaction" for U.S. federal income tax purposes.

Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of Securities described above for U.S. federal income tax purposes, no assurance can be given that the IRS or a court will agree with the treatment described herein. Accordingly, you should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in such Securities

TAXATION

(including possible alternative treatments of such Securities). Unless otherwise stated, the following discussion is based on the treatment of each Security as described above.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, will be treated as U.S.-source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

Tax Treatment of Securities Treated as Open Transactions

Tax Treatment Prior to Settlement. Subject to the discussions below under "*Possible Taxable Events*" and "*Possible Application of Section 1256 of the Code*," a U.S. Holder should not be required to recognise taxable income over the term of the Securities prior to settlement, other than pursuant to a sale or exchange as described below.

Tax Basis. Subject to the discussions below under "*Possible Taxable Events*" and "*Possible Application of Section 1256 of the Code*," a U.S. Holder's tax basis in a Security should equal the amount paid by the U.S. Holder to acquire the Security.

Sale, Exchange or Settlement of a Security. Upon a sale, exchange or settlement of a Security for cash, a U.S. Holder should recognise gain or loss equal to the difference between the amount realised on the sale, exchange or settlement and the U.S. Holder's tax basis in the Security sold, exchanged or settled. Subject to the discussion above regarding the possible application of the PFIC rules and the discussions below regarding the possible application of Sections 1260, 1258, 1256 and 988 of the Code and under "*Possible Taxable Events*," any gain or loss recognised should be long-term capital gain or loss if the U.S. Holder has held the Security for more than one year at the time of the sale, exchange or settlement, and short-term capital gain or loss otherwise.

A U.S. Holder that, upon physical settlement of a Security, receives Underlying Shares and cash in lieu of any shares, should, subject to the discussion above regarding the possible application of the PFIC rules and the discussions below regarding the possible application of Sections 1260, 1258 and 1256 of the Code, be treated as recognising capital gain or loss equal to the difference between the amount of cash received in lieu of any fractional share and the pro rata portion of the U.S. Holder's tax basis in the Securities that is allocable to such fractional share, based on the amount of cash received and the fair market value of the Underlying Shares received, as of the final determination date of the Securities. The U.S. Holder should not recognise any gain or loss with respect to any Underlying Shares received. The U.S. Holder should have a basis in the Underlying Shares equal to the U.S. Holder's tax basis in the Securities, other than any amount allocated to a fractional share. The holding period for such Underlying Shares should start on the day after receipt.

Possible Taxable Events

In the event of a change in the methodology by which a Reference Item to which a Security relates is calculated, a change in the components of such a Reference Item, the discontinuance of such a Reference Item, the designation of a successor to such a Reference Item or other similar circumstances resulting in a material change to such a Reference Item, it is possible that a Security could be treated, in whole or in part, as terminated and reissued for U.S. federal income tax purposes. Similar consequences could apply if the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Securities. In the event of a deemed retirement, a U.S. Holder might be required to recognise gain or loss (subject to the possible application of the wash sale rules) with respect to the Security. Moreover, the tax treatment of the Security after the deemed reissuance could be materially adversely affected. U.S. Holders should consult their tax advisers regarding the risk of such an event.

Possible Application of Section 1260 of the Code

If a Security (other than a Security that provides for only a single fixed upside payment if the relevant Reference Item increases in value over the term of the Security or a Security that provides for an upside payment only if the relevant Reference Item decreases in value over the term of the Security) is linked to an equity interest in one of a specified list of entities ("**Pass-Thru Entities**"), including an exchange-traded fund or other regulated investment company, a real estate investment trust, a partnership or a PFIC, there is a substantial risk that an investment in the Security will be treated as a "constructive ownership transaction," as defined in Section 1260 of the Code. If an investment in the Security is treated as a constructive ownership transaction, all or a portion of any long-term capital gain recognised by a U.S. Holder in respect of the Security could be recharacterised as

TAXATION

ordinary income (the "**Recharacterised Gain**"). In addition, an interest charge would be imposed on any deemed underpayment of tax for each year that the constructive ownership transaction was outstanding. The amount of the interest charge is determined by treating any Recharacterised Gain as having accrued such that the gain in each successive year is equal to the gain in the prior year increased by the applicable federal rate (determined as of the date of sale, exchange or settlement of the Security) during the term of the constructive ownership transaction.

The amount of the Recharacterised Gain (if any) that would be treated as ordinary income in respect of the Security equals the excess of (i) any long-term capital gain recognised by the U.S. Holder in respect of the Security over (ii) the "net underlying long-term capital gain" (as defined in Section 1260 of the Code). Even if an investment in the Security is treated as a constructive ownership transaction, the amount of net underlying long-term capital gain, and therefore the amount of Recharacterised Gain, is unclear. It is possible, for example, that the net underlying long-term capital gain is equal to the aggregate net capital gain that the U.S. Holder would have had if the Underlying Shares had been acquired for fair market value on the issue date of the Security and sold for fair market value upon the date of sale, exchange or settlement of the Security (which would reflect the percentage increase, without any multiple, in the value of the Underlying Shares over the term of the Security). However, the net underlying long-term capital gain could alternatively be calculated using a number of Underlying Shares that reflects the multiple upon which any gain on the Security will be calculated, in which case the amount of Recharacterised Gain would generally be zero. Moreover, other features of a Security (such as a Security linked to multiple Pass-Thru Entities or a Pass-Thru Entity and one or more indices which do not contain any Pass-Thru Entities), may also give rise to uncertainty about the proper method for calculating the amount of Recharacterised Gain. Under Section 1260 of the Code, the amount of net underlying long-term capital gain is treated as zero unless otherwise "established by clear and convincing evidence." Furthermore, if a Pass-Thru Entity holds certain commodities, the long-term capital gain that a U.S. Holder would otherwise recognise in respect of the Security up to the amount of the net underlying long-term capital gain could, if the U.S. Holder is an individual or other non-corporate investor, be subject to tax at the higher rates applicable to "collectibles" instead of the general rates that apply to long-term capital gain.

Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether or how Section 1260 of the Code applies to Securities linked to Pass-Thru Entities. U.S. Holders should consult their tax advisers regarding the potential application of the "constructive ownership" rule to the Securities.

Possible Application of Section 1258 of the Code

It is possible that an investment in certain Securities, particularly those that provide for a single fixed upside payment, could be treated as a "conversion transaction" under Section 1258 of the Code. A conversion transaction includes, among others, a transaction marketed or sold as producing capital gains and from which substantially all of the taxpayer's expected return is attributable to the time value of the taxpayer's net investment. If an investment in the Securities were treated as a conversion transaction, the gain from the sale, exchange or settlement of the Securities would be treated as ordinary income to the extent of the "applicable imputed income amount." The applicable imputed income amount is an amount equal to the amount of interest that would have accrued on the taxpayer's net investment in the conversion transaction (i.e., the amount paid by the U.S. Holder to acquire the Securities) for the period ending on the date of sale (including a deemed sale described above under "*Possible Taxable Events*" or under the mark-to-market treatment discussed below under "*Possible Application of Section 1256 of the Code*"), exchange or settlement at a rate equal to 120 percent of the applicable federal rate. U.S. Holders should consult their tax advisers regarding the possible application of Section 1258 of the Code to the Securities.

Possible Application of Section 1256 of the Code

Special rules will apply if a Security constitutes, in whole or in part, a "Section 1256 Contract" under Section 1256 of the Code. Section 1256 Contracts include, among others, "listed options." Accordingly, if a Security is listed on (or subject to the rules of) an exchange, board of trade or market, it is possible that the Security may be treated, in whole or in part, as a Section 1256 Contract. If Section 1256 of the Code were to apply to a Security, U.S. Holders would be required (i) to mark to market all or a portion of the Security as if it were sold at its fair market value on the last business day of each year it is held, and (ii) to recognise any gain or loss in respect of the portion of the Security that is treated as a Section 1256 Contract as 40 per cent. short-term capital gain or loss and 60 per cent. long-term capital gain or loss. U.S. Holders should consult their tax advisers regarding the potential application of Section 1256 of the Code to the Securities.

TAXATION

Possible Application of Section 988 of the Code

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that are open transactions and for which the Reference Item includes one or more currencies (other than the U.S. dollar).

Sale, Exchange or Retirement. Because the return on the Security is "determined by reference to the value" of one or more foreign currencies, unless otherwise provided in the applicable Issue Terms, we intend to treat the Security as subject to Section 988 of the Code. In that case, any gain or loss recognised on the Security (including any gain or loss resulting from the possible application of Section 1256 of the Code, as discussed above) generally will be ordinary income or loss unless an election under Section 988(a)(1)(B) of the Code to treat such gain or loss as capital gain or loss (the "**Section 988 election**") is available and the U.S. Holder makes such election before the close of the day on which the U.S. Holder purchases the Security. While a taxpayer may make a Section 988 election to treat gain or loss on certain forward contracts, futures contracts or option contracts linked to one or more foreign currencies as capital gain or loss, it is unclear whether a Section 988 election is available for the Security. Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether the Section 988 election is available for the Security. U.S. Holders should consult their tax advisers about the potential application of Section 988 of the Code and the Section 988 election to the Security. In addition, a U.S. Holder might be subject to special reporting requirements that apply to foreign currency losses that exceed certain thresholds.

Possible Alternative Tax Treatments of an Investment in a Security

Due to the absence of authorities that directly address the proper tax treatment of the Security, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. The IRS could, for instance, seek to treat a Security as a debt instrument. The risk that financial instruments providing for downside protection features would be recharacterised, for U.S. federal income tax purposes, as debt instruments giving rise to ordinary income and possible accrual of income prior to maturity or disposition of the Security, rather than as open transactions, is greater than the risk of recharacterisation for comparable financial instruments that do not have such features. If the Security were recharacterised as a debt instrument, the U.S. federal income tax consequences to the U.S. Holder would depend on the terms of the Security and could be materially adverse to the U.S. Holder. For a description of the tax treatment of Securities that are treated as debt instruments, see the discussion under "*Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes*" above.

Even if debt treatment does not apply to the Security, other alternative U.S. federal income tax treatments of the Security are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Security. It is possible, for example, that a Security could be treated as a unit consisting of a loan and a forward contract, in which case a U.S. Holder might be required to accrue OID into income on a current basis.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; and whether these instruments are or should be subject to the "constructive ownership" rule (as discussed above under "*Possible Application of Section 1260 of the Code*"). While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Security, possibly with retroactive effect.

Prospective investors should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Security, including the possible implications of the IRS notice.

Securities Providing for Upside Potential and Treated as Single Financial Contracts with Associated Coupons

This discussion applies to Securities that pay coupons and provide for a single payment at maturity or early settlement that is determined by reference to the performance of a relevant Reference Item and that thus may be

TAXATION

greater than or substantially lower than the Security's issue price. Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities or instruments that are similar to the Securities for U.S. federal income tax purposes, no assurance can be given that the IRS or a court will agree with the tax treatment described herein. We intend to treat the Securities for U.S. federal income tax purposes as a single financial contract that provides for a coupon that will be treated as gross income to you at the time received or accrued in accordance with your regular method of tax accounting.

Our counsel has not rendered an opinion as to the proper U.S. federal income tax treatment of the Securities, and no assurance can be given that the IRS or a court will agree with the treatment described herein. Significant aspects of the U.S. federal income tax consequences of an investment in the Securities are uncertain. Accordingly, you should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments) and with respect to any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction. Unless otherwise stated, the following discussion is based on the treatment of each Security as described in the previous paragraph.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, will be treated as U.S.-source income. Coupon payments received from an investment in Securities will be treated as non-U.S. source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

Tax Treatment of the Securities

Assuming the treatment of the Securities as set forth above is respected, the following U.S. federal income tax consequences should result.

Tax Basis. Subject to the discussions below under "*Possible Taxable Events*" and "*Possible Application of Section 1256 of the Code*," a U.S. Holder's tax basis in the Securities should equal the amount paid by the U.S. Holder to acquire the Securities.

Coupon Payments on the Securities. Any coupon payments on the Securities should be taxable as ordinary income to a U.S. Holder at the time received or accrued, in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes.

Sale, Exchange or Settlement of the Securities. Upon a sale, exchange or settlement of the Securities for cash, a U.S. Holder should recognise gain or loss equal to the difference between the amount realised on the sale, exchange or settlement and the U.S. Holder's tax basis in the Securities so sold, exchanged or settled. For this purpose, the amount realised does not include any coupon paid at settlement, and may not include sale proceeds attributable to an accrued coupon, which may be treated as a coupon payment. Subject to the discussion above regarding the possible application of the PFIC rules and the discussions below regarding the possible application of Sections 1260, 1258, 1256 and 988 of the Code and under "*Possible Taxable Events*," any such gain or loss recognised should be long-term capital gain or loss if the U.S. Holder has held the Securities for more than one year at the time of the sale, exchange or settlement, and should be short-term capital gain or loss otherwise. The ordinary income treatment of the coupon payments, in conjunction with the capital loss treatment of any loss recognised upon the sale, exchange or settlement of the Securities, could result in adverse tax consequences to holders of the Securities because the deductibility of capital losses is subject to limitations.

A U.S. Holder that, upon settlement of the Securities, receives Underlying Shares and cash in lieu of any fractional share should, subject to the discussion above regarding the possible application of the PFIC rules and the discussions below regarding the possible application of Sections 1260, 1258 and 1256 of the Code, be treated as recognising capital gain or loss equal to the difference between the amount of cash received in lieu of any fractional share and the pro rata portion of the U.S. Holder's tax basis in the Securities that is allocable to such fractional share, based on the amount of cash received and the fair market value of the Underlying Shares received, as of the final determination date of the Securities. The U.S. Holder should not recognise any gain or loss with respect to any Underlying Shares received. The U.S. Holder should have a basis in the Underlying Shares equal to the U.S. Holder's tax basis in the Securities, other than any amount allocated to a fractional share. The holding period for such Underlying Shares should start on the day after receipt.

Possible Taxable Events

TAXATION

In the event of a change in the methodology by which a Reference Item to which a Security relates is calculated, a change in the components of such a Reference Item, the discontinuance of such a Reference Item, the designation of a successor to such a Reference Item or other similar circumstances resulting in a material change to such a Reference Item, it is possible that a Security could be treated, in whole or in part, as terminated and reissued for U.S. federal income tax purposes. Similar consequences could apply if the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Securities. In the event of a deemed retirement, a U.S. Holder might be required to recognise gain or loss (subject to the possible application of the wash sale rules) with respect to the Security. Moreover, the tax treatment of the Security after the deemed reissuance could be materially adversely affected. U.S. Holders should consult their tax advisers regarding the risk of such an event.

Possible Application of Section 1260 of the Code

If a Security (other than a Security that provides for only a single fixed upside payment if the relevant Reference Item increases in value over the term of the Security or a Security that provides for an upside payment only if the relevant Reference Item decreases in value over the term of the Security) is linked to an equity interest in one of a specified list of entities ("**Pass-Thru Entities**"), including an exchange-traded fund or other regulated investment company, a real estate investment trust, a partnership or a PFIC, there is a substantial risk that an investment in the Security will be treated as a "constructive ownership transaction," as defined in Section 1260 of the Code. If an investment in the Security is treated as a constructive ownership transaction, all or a portion of any long-term capital gain recognised by a U.S. Holder in respect of the Security could be recharacterised as ordinary income (the "**Recharacterised Gain**"). In addition, an interest charge would be imposed on any deemed underpayment of tax for each year that the constructive ownership transaction was outstanding. The amount of the interest charge is determined by treating any Recharacterised Gain as having accrued such that the gain in each successive year is equal to the gain in the prior year increased by the applicable federal rate (determined as of the date of sale, exchange or settlement of the Security) during the term of the constructive ownership transaction.

The amount of the Recharacterised Gain (if any) that would be treated as ordinary income in respect of the Security equals the excess of (i) any long-term capital gain recognised by the U.S. Holder in respect of the Security over (ii) the "net underlying long-term capital gain" (as defined in Section 1260 of the Code). Even if an investment in the Security is treated as a constructive ownership transaction, the amount of net underlying long-term capital gain, and therefore the amount of Recharacterised Gain, is unclear. It is possible, for example, that the net underlying long-term capital gain is equal to the aggregate net capital gain that the U.S. Holder would have had if the Underlying Shares had been acquired for fair market value on the issue date of the Security and sold for fair market value upon the date of sale, exchange or settlement of the Security (which would reflect the percentage increase, without any multiple, in the value of the Underlying Shares over the term of the Security). However, the net underlying long-term capital gain could alternatively be calculated using a number of Underlying Shares that reflects the multiple upon which any gain on the Security will be calculated, in which case the amount of Recharacterised Gain would generally be zero. Moreover, other features of a Security (such as a Security linked to multiple Pass-Thru Entities or a Pass-Thru Entity and one or more indices which do not contain any Pass-Thru Entities), may also give rise to uncertainty about the proper method for calculating the amount of Recharacterised Gain. Under Section 1260 of the Code, the amount of net underlying long-term capital gain is treated as zero unless otherwise "established by clear and convincing evidence." Furthermore, if a Pass-Thru Entity holds certain commodities, the long-term capital gain that a U.S. Holder would otherwise recognise in respect of the Security up to the amount of the net underlying long-term capital gain could, if the U.S. Holder is an individual or other non-corporate investor, be subject to tax at the higher rates applicable to "collectibles" instead of the general rates that apply to long-term capital gain.

Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether or how Section 1260 of the Code applies to Securities linked to Pass-Thru Entities. U.S. Holders should consult their tax advisers regarding the potential application of the "constructive ownership" rule to the Securities.

Possible Application of Section 1258 of the Code

It is possible that an investment in certain Securities, particularly those that provide for a single fixed upside payment, could be treated as a "conversion transaction" under Section 1258 of the Code. A conversion transaction includes, among others, a transaction marketed or sold as producing capital gains and from which substantially all of the taxpayer's expected return is attributable to the time value of the taxpayer's net

TAXATION

investment. If an investment in the Securities were treated as a conversion transaction, the gain from the sale, exchange or settlement of the Securities would be treated as ordinary income to the extent of the "applicable imputed income amount." The applicable imputed income amount is an amount equal to the amount of interest that would have accrued on the taxpayer's net investment in the conversion transaction (i.e., the amount paid by the U.S. Holder to acquire the Securities) for the period ending on the date of sale (including a deemed sale described above under "*Possible Taxable Events*" or under the mark-to-market treatment discussed below under "*Possible Application of Section 1256 of the Code*"), exchange or settlement at a rate equal to 120 percent of the applicable federal rate. U.S. Holders should consult their tax advisers regarding the possible application of Section 1258 of the Code to the Securities.

U.S. Holders should consult their tax advisers regarding the possible application of Section 1258 of the Code to the Securities.

Possible Application of Section 1256 of the Code

Special rules will apply if a Security constitutes, in whole or in part, a "Section 1256 Contract" under Section 1256 of the Code. Section 1256 Contracts include, among others, "listed options." Accordingly, if a Security is listed on (or subject to the rules of) an exchange, board of trade or market, it is possible that the Security may be treated, in whole or in part, as a Section 1256 Contract. If Section 1256 of the Code were to apply to a Security, U.S. Holders would be required (i) to mark to market all or a portion of the Security as if it were sold at its fair market value on the last business day of each year it is held, and (ii) to recognise any gain or loss in respect of the portion of the Security that is treated as a Section 1256 Contract as 40 per cent. short-term capital gain or loss and 60 per cent. long-term capital gain or loss. U.S. Holders should consult their tax advisers regarding the potential application of Section 1256 of the Code to the Securities.

Possible Application of Section 988 of the Code

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that are single financial contracts with associated coupons and for which the Reference Item includes one or more currencies (other than the U.S. dollar).

Sale, Exchange or Retirement. Because the return on the Security is "determined by reference to the value" of one or more foreign currencies, unless otherwise provided in the applicable Issue Terms, we intend to treat the Security as subject to Section 988 of the Code. In that case, any gain or loss recognised on the Security (including any gain or loss resulting from the possible application of Section 1256 of the Code, as discussed above) generally will be ordinary income or loss unless an election under Section 988(a)(1)(B) of the Code to treat such gain or loss as capital gain or loss (the "**Section 988 election**") is available and the U.S. Holder makes such election before the close of the day on which the U.S. Holder purchases the Security. While a taxpayer may make a Section 988 election to treat gain or loss on certain forward contracts, futures contracts or option contracts linked to one or more foreign currencies as capital gain or loss, it is unclear whether a Section 988 election is available for the Security. Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether the Section 988 election is available for the Security. U.S. Holders should consult their tax advisers about the potential application of Section 988 of the Code and the Section 988 election to the Security. In addition, a U.S. Holder might be subject to special reporting requirements that apply to foreign currency losses that exceed certain thresholds.

Possible Alternative Tax Treatments of an Investment in the Securities

TAXATION

Due to the absence of authorities that directly address the proper tax treatment of the Security, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. The IRS could, for instance, seek to treat a Security as a debt instrument. The risk that financial instruments providing for downside protection features would be recharacterised, for U.S. federal income tax purposes as debt instruments giving rise to ordinary income and possible accrual of income prior to maturity or disposition of the Security, rather than as single financial contracts with associated coupons, is greater than the risk of recharacterisation for comparable financial instruments that do not have such features. If the Security were recharacterised as a debt instrument, the U.S. federal income tax consequences to the U.S. Holder would depend on the terms of the Security and could be materially adverse to the U.S. Holder. For a description of the tax treatment of Securities that are treated as debt instruments, see the discussion under "*—Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes*" above.

Even if debt treatment does not apply to the Security, other alternative U.S. federal income tax treatments of the Security are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Security. It is possible, for example, that a Security could be treated as a unit consisting of a loan and a forward contract, in which case a U.S. Holder might be required to accrue OID into income on a current basis.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; and whether these instruments are or should be subject to the "constructive ownership" rule (as discussed above under "*—Possible Application of Section 1260 of the Code*"). While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Security, possibly with retroactive effect.

Prospective investors should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Security, including the possible implications of the IRS notice.

Securities Treated as Single Financial Contracts with Associated Coupons That Do Not Provide for Upside

This discussion applies to Securities that pay contingent coupons and provide for a single payment at maturity or early settlement that is determined by reference to the performance of a relevant Reference Item and that may be substantially lower than but may not exceed the Security's issue price (other than the contingent coupons). Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities or instruments that are similar to the Securities for U.S. federal income tax purposes, no assurance can be given that the IRS or a court will agree with the tax treatment described herein. We intend to treat the Securities for U.S. federal income tax purposes as a single financial contract that provides for a coupon that will be treated as gross income to you at the time received or accrued in accordance with your regular method of tax accounting.

Our counsel has not rendered an opinion as to the proper U.S. federal income tax treatment of the Securities, and no assurance can be given that the IRS or a court will agree with the treatment described herein. Significant aspects of the U.S. federal income tax consequences of an investment in the Securities are uncertain. Accordingly, you should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments) and with respect to any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction. Unless otherwise stated, the following discussion is based on the treatment of each Security as described in the previous paragraph.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, will be treated as U.S.-source income. Coupon payments received from an investment in Securities will be treated as non-U.S. source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

TAXATION

Tax Treatment of the Securities

Assuming the treatment of the Securities as set forth above is respected, the following U.S. federal income tax consequences should result.

Tax Basis. Subject to the discussions below under "*Possible Taxable Events*" a U.S. Holder's tax basis in the Securities should equal the amount paid by the U.S. Holder to acquire the Securities.

Coupon Payments on the Securities. Any coupon payments on the Securities should be taxable as ordinary income to a U.S. Holder at the time received or accrued, in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes.

Sale, Exchange or Settlement of the Securities. Upon a sale, exchange or settlement of the Securities for cash, a U.S. Holder should recognise gain or loss equal to the difference between the amount realised on the sale, exchange or settlement and the U.S. Holder's tax basis in the Securities so sold, exchanged or settled. For this purpose, the amount realised does not include any coupon paid at settlement, and may not include sale proceeds attributable to an accrued coupon, which may be treated as a coupon payment. Subject to the discussions below regarding the possible application of Sections 988 and 1256 of the Code under "*Possible Taxable Events*," any such gain or loss recognised should be long-term capital gain or loss if the U.S. Holder has held the Securities for more than one year at the time of the sale, exchange or settlement, and should be short-term capital gain or loss otherwise. The ordinary income treatment of the coupon payments, in conjunction with the capital loss treatment of any loss recognised upon the sale, exchange or settlement of the Securities, could result in adverse tax consequences to holders of the Securities because the deductibility of capital losses is subject to limitations.

A U.S. Holder that, upon settlement of the Securities, receives Underlying Shares and cash in lieu of any fractional share should, subject to the discussion below regarding Section 1256 of the Code, be treated as recognising capital gain or loss equal to the difference between the amount of cash received in lieu of any fractional share and the pro rata portion of the U.S. Holder's tax basis in the Securities that is allocable to such fractional share, based on the amount of cash received and the fair market value of the Underlying Shares received, as of the final determination date of the Securities. The U.S. Holder should not recognise any gain or loss with respect to any Underlying Shares received. The U.S. Holder should have a basis in the Underlying Shares equal to the U.S. Holder's tax basis in the Securities, other than any amount allocated to a fractional share. The holding period for such Underlying Shares should start on the day after receipt.

Possible Taxable Events

In the event of a change in the methodology by which a Reference Item to which a Security relates is calculated, a change in the components of such a Reference Item, the discontinuance of such a Reference Item, the designation of a successor to such a Reference Item or other similar circumstances resulting in a material change to such a Reference Item, it is possible that a Security could be treated, in whole or in part, as terminated and reissued for U.S. federal income tax purposes. Similar consequences could apply if the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Securities. In the event of a deemed retirement, a U.S. Holder might be required to recognise gain or loss (subject to the possible application of the wash sale rules) with respect to the Security. Moreover, the tax treatment of the Security after the deemed reissuance could be materially adversely affected. U.S. Holders should consult their tax advisers regarding the risk of such an event.

Possible Application of Section 1258 of the Code

It is possible that an investment in certain Securities, particularly those that provide for a single fixed upside payment, could be treated as a "conversion transaction" under Section 1258 of the Code. A conversion transaction includes, among others, a transaction marketed or sold as producing capital gains and from which substantially all of the taxpayer's expected return is attributable to the time value of the taxpayer's net investment. If an investment in the Securities were treated as a conversion transaction, the gain from the sale, exchange or settlement of the Securities would be treated as ordinary income to the extent of the "applicable imputed income amount." The applicable imputed income amount is an amount equal to the amount of interest that would have accrued on the taxpayer's net investment in the conversion transaction (i.e., the amount paid by the U.S. Holder to acquire the Securities) for the period ending on the date of sale (including a deemed sale described above under "*Possible Taxable Events*" or under the mark-to-market treatment discussed below under "*Possible Application of Section 1256 of the Code*"), exchange or settlement at a rate equal to 120

TAXATION

percent of the applicable federal rate. U.S. Holders should consult their tax advisers regarding the possible application of Section 1258 of the Code to the Securities.

Possible Application of Section 1256 of the Code

Special rules will apply if a Security constitutes, in whole or in part, a "Section 1256 Contract" under Section 1256 of the Code. Section 1256 Contracts include, among others, "listed options." Accordingly, if a Security is listed on (or subject to the rules of) an exchange, board of trade or market, it is possible that the Security may be treated, in whole or in part, as a Section 1256 Contract. If Section 1256 of the Code were to apply to a Security, U.S. Holders would be required (i) to mark to market all or a portion of the Security as if it were sold at its fair market value on the last business day of each year it is held, and (ii) to recognise any gain or loss in respect of the portion of the Security that is treated as a Section 1256 Contract as 40 per cent. short-term capital gain or loss and 60 per cent. long-term capital gain or loss. U.S. Holders should consult their tax advisers regarding the potential application of Section 1256 of the Code to the Securities.

Possible Application of Section 988 of the Code

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that are single financial contracts with associated coupons and for which the Reference Item includes one or more currencies (other than the U.S. dollar).

Sale, Exchange or Retirement. Because the return on the Security is "determined by reference to the value" of one or more foreign currencies, unless otherwise provided in the applicable Issue Terms, we intend to treat the Security as subject to Section 988 of the Code. In that case, any gain or loss recognised on the Security generally will be ordinary income or loss unless an election under Section 988(a)(1)(B) of the Code to treat such gain or loss as capital gain or loss (the "**Section 988 election**") is available and the U.S. Holder makes such election before the close of the day on which the U.S. Holder purchases the Security. While a taxpayer may make a Section 988 election to treat gain or loss on certain forward contracts, futures contracts or option contracts linked to one or more foreign currencies as capital gain or loss, it is unclear whether a Section 988 election is available for the Security. Possible Alternative Tax Treatments of an Investment in the Securities

Due to the absence of authorities that directly address the proper tax treatment of the Security, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. The IRS could, for instance, seek to treat a Security as a debt instrument. The risk that financial instruments providing for downside protection features would be recharacterised for U.S. federal income tax purposes as debt instruments giving rise to ordinary income and possible accrual of income prior to maturity or disposition of the Security, rather than as single financial contracts with associated coupons, is greater than the risk of recharacterisation for comparable financial instruments that do not have such features. If the Security were recharacterised as a debt instrument, the U.S. federal income tax consequences to the U.S. Holder would depend on the terms of the Security and could be materially adverse to the U.S. Holder. Even if debt treatment does not apply to the Security, other alternative U.S. federal income tax treatments of the Security are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Security. regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Security, possibly with retroactive effect.

Prospective investors should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Security, including the possible implications of the IRS notice.

Securities Treated as Put Rights and Deposits

General. This discussion applies to Securities that pay coupons at a fixed rate and provide for a single payment at maturity or early settlement that is determined by reference to the performance of a relevant Reference Item and that may be substantially lower than but may not exceed the Security's issue price (other than the coupon). Except as otherwise provided in the applicable Issue Terms, we intend (in the absence of an administrative determination or judicial ruling to the contrary) to treat each Security, under current law, for U.S. federal income tax purposes, as a unit consisting of the following:

- (i) a put right (the "**Put Right**") written by the investor to us that, if exercised, requires the investor to pay us an amount equal to the Deposit (as defined below) in exchange for a cash amount based on the performance of the relevant Reference Item (or, if the relevant Reference Item consists of Underlying Shares, in exchange for the Underlying Shares (and cash in lieu of a fractional share) or, at our option, the cash value of such Underlying Shares as determined on the determination date (or, if applicable, the date of acceleration)); and
- (ii) a deposit with us of a fixed amount of cash, equal to the issue price, to secure the investor's obligation under the Put Right (the "**Deposit**") that pays interest based on our cost of borrowing at the time of issuance (the "**Yield on the Deposit**").

Assuming the characterisation of the Securities as set forth above is respected, a portion of the coupon on the Securities will be treated as Yield on the Deposit and the remainder will be attributable to the premium on the Put Right (the "**Put Premium**"). The Yield on the Deposit will be determined as of the pricing date and set forth in the applicable Issue Terms.

Unless otherwise indicated in the applicable Issue Terms, we will allocate 100 per cent. of the issue price of the Securities to the Deposit and none to the Put Right. Our allocation of the issue price between the Put Right and the Deposit will be binding on investors in the Securities, unless an investor timely and explicitly discloses to the IRS that its allocation is different from ours. The treatment of the Securities described above and our allocation are not, however, binding on the IRS or a court. No statutory, judicial or administrative authority directly addresses the treatment of the Securities or instruments similar to the Securities for U.S. federal income tax purposes, and no ruling is being requested from the IRS with respect to the Securities.

Our counsel has not rendered an opinion as to the proper U.S. federal income tax treatment of the Securities, and no assurance can be given that the IRS or a court will agree with the treatment described herein. Significant aspects of the U.S. federal income tax consequences of an investment in the Securities are uncertain, and no assurance can be given that the IRS or a court will agree with the treatment described herein. Accordingly, you should consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the Securities (including alternative treatments of the Securities). Unless otherwise stated, the following discussion is based on the treatment of each Security and the allocation described above.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, and the portion of any coupon payments attributable to the Put Premium will be treated as U.S.-source income. The portion of any coupon payments attributable to the Yield on the Deposit will be treated as non-U.S. source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

Unless otherwise provided in the applicable Issue Terms, the following U.S. federal income tax consequences should result.

Securities with a Term Equal to or Less Than One Year

TAXATION

The following discussion describes certain U.S. federal income tax consequences of ownership and disposition of a Security with a term that is equal to or less than one year (taking into account the last possible date that the Securities could be outstanding under its terms).

Coupon Payments on the Securities. Under the characterisation described above under "—General," only a portion of the coupon payments on the Securities will be attributable to the Yield on the Deposit. The remainder of the coupon payments will represent payments attributable to the Put Premium. The Put Premium will generally not be taxable to a U.S. Holder upon receipt, but instead will be accounted for as described below.

The Deposit will be treated as a "short-term obligation" for U.S. federal income tax purposes. Accordingly, to the extent attributable to the Yield on the Deposit, coupon payments on the Securities will generally be taxable to a U.S. Holder as ordinary interest income, as set forth herein. A U.S. Holder who is a cash-method taxpayer will not be required to include the Yield on the Deposit currently in income for U.S. federal income tax purposes prior to receipt of such amounts unless the holder elects to do so. A U.S. Holder who is a cash-method taxpayer and does not make such election should include the Yield on the Deposit as income upon receipt. An accrual-method U.S. Holder will be required to include the Yield on the Deposit in income as it accrues on a straight-line basis, unless the holder makes an election to accrue the Yield on the Deposit according to a constant yield method based on daily compounding.

Additionally, a cash-method U.S. Holder who does not elect to accrue the Yield on the Deposit will be required to defer deductions for certain interest paid on indebtedness incurred to purchase or carry the Securities until the Yield on the Deposit is included in income. The amount of deductions required to be deferred should not exceed the amount of the Yield on the Deposit the U.S. Holder would have taken into income under an election to accrue such amounts.

Tax Basis. Based on our determination set forth above, the U.S. Holder's tax basis in the Put Right will be zero, and the U.S. Holder's tax basis in the Deposit will be 100 per cent. of the issue price, increased by any accrued Yield on the Deposit previously included in income and decreased by the amount of any payment received on the Deposit.

Expiration of the Put Right

Receipt of Stated Principal Amount in Cash upon Settlement or Early Redemption of the Securities. If a U.S. Holder receives the stated principal amount of a Security in cash (excluding cash attributable to coupon payments on the Securities, which will generally be taxed as described above under "—*Coupon Payments on the Securities*"), the Put Right will be deemed to have expired unexercised. In that case, the U.S. Holder will not recognise any gain upon the return of the Deposit, but will recognise the total amount of Put Premium received by the U.S. Holder over the term of the Securities (including Put Premium received at maturity) as short-term capital gain at such time.

Exercise of the Put Right

Receipt of Cash Based on the Performance of the Reference Item Upon Maturity of the Securities. If a U.S. Holder receives an amount of cash (excluding cash attributable to coupon payments on the Securities, which will generally be taxed as described above under "—*Coupon Payments on the Securities*") that is less than the stated principal amount of the Securities (such difference, the "**Deficit**"), the Put Right will be deemed to have been exercised and the U.S. Holder will be deemed to pay the Deficit to us upon settlement of the Put Right. In that case, the U.S. Holder will recognise short-term capital gain or loss with respect to the Put Right in an amount equal to the difference between (i) the total Put Premium received by the holder over the term of the Securities (including Put Premium received at maturity) and (ii) the Deficit.

Receipt of Underlying Shares Upon Maturity of the Securities. If a U.S. Holder receives Underlying Shares (and cash in lieu of a fractional share), the Put Right will be deemed to have been exercised. In that case, the U.S. Holder will generally not recognise any gain in respect of the Deposit. In addition, the U.S. Holder will not recognise any income or gain in respect of the total Put Premium received (including Put Premium received at maturity) and will not recognise any gain or loss with respect to any Underlying Shares received. The U.S. Holder will have an aggregate tax basis in the Underlying Shares received (including a fractional share) equal to the Deposit less the total Put Premium received over the term of the Securities. A U.S. Holder's holding period for any Underlying Shares received will start on the day after receipt. With respect to any cash received in lieu of a fractional share, a U.S. Holder will recognise short-term capital gain or loss in an amount equal to the

TAXATION

difference between the amount of cash received in lieu of the fractional share and the pro rata portion of the U.S. Holder's aggregate adjusted tax basis in Underlying Shares that is allocable to the fractional share.

Sale or Exchange of the Securities Prior to Maturity. Upon the sale or exchange of the Securities, a U.S. Holder will generally recognise gain or loss with respect to the Deposit and the Put Right. For the purpose of determining such gain or loss, a U.S. Holder should apportion the amount realised on the sale or exchange of the Securities between the Deposit and the Put Right based on their respective values on the date of such sale or exchange. The amount of gain or loss on the Deposit will equal the amount realised that is attributable to the Deposit, less the U.S. Holder's adjusted tax basis in the Deposit. Such gain will be treated as ordinary interest income to the extent of the amount of any accrued but unpaid Yield on the Deposit not previously included in income, and any remaining gain will be treated as short-term capital gain. Loss on the Deposit will be treated as short-term capital loss. The amount realised that is attributable to the Put Right, together with the total Put Premium received over the term of the Securities, will be treated as short-term capital gain.

If the value of the Deposit on the date of the sale or exchange exceeds the amount realised, the U.S. Holder will be treated as having (i) sold or exchanged the Deposit for an amount equal to its value on that date and (ii) made a payment (the "**Put Right Assumption Payment**") to the purchaser of the Securities equal to the amount of the excess, in exchange for the purchaser's assumption of the U.S. Holder's rights and obligations under the Put Right. In that case, the U.S. Holder will recognise gain or loss in respect of the Put Right, as set forth in the previous paragraph, in an amount equal to the total Put Premium received over the term of the Securities, less the amount of the Put Right Assumption Payment deemed to be made by the U.S. Holder.

Stop Loss Event. Although the tax consequences of a Stop Loss Event are uncertain, we intend to treat a Stop Loss Event as (i) the repayment by us of the Deposit for a price equal to the Deposit plus the present value of the portion of the remaining scheduled payments on the Securities (from and including the date of acceleration) that is attributable to the Yield on the Deposit, (ii) the payment by us of the remaining Put Premium equal to the present value of the portion of the remaining scheduled payments on the Securities (from and including the date of acceleration) that is attributable to the Put Premium, and (iii) the exercise of the Put Right, followed by settlement through the delivery by the U.S. Holder to us of the Deposit in exchange for underlying shares, or, if the Issuer so elects, the cash value of the underlying shares. We will also pay cash representing unpaid coupon payments on the Securities that accrued up to but excluding the date of acceleration.

Any cash received with respect to accrued coupon payments on the Securities will be taxed as described above under "*Coupon Payments on the Securities.*"

Assuming the characterisation of the Stop Loss Event described above is respected, any amount received attributable to the unaccrued Put Premium should be treated as Put Premium received under the Put Right. A U.S. Holder will, with respect to the amount paid by us to repay the Deposit, generally recognise short-term capital gain equal to the difference between such amount and the U.S. Holder's adjusted tax basis in the Deposit and ordinary income to the extent of the accrued Yield on the Deposit. In the case of an initial investor, such difference would equal the present value of the portion of the remaining scheduled payments on the Securities attributable to the unaccrued Yield on the Deposit. In general, other than gain recognised on the Deposit as described in the previous sentences, the tax treatment of our exercise of the Put Right upon a Stop Loss Event would be the same as described above under "*Exercise of the Put Right—Receipt of Cash Equal to the Value of the Reference Item Upon Maturity of the Securities*" or "*Exercise of the Put Right—Receipt of Underlying Shares Upon Maturity of the Securities*," as the case may be.

Securities with a Term of More Than One Year

The following discussion describes certain U.S. federal income tax consequences of ownership and disposition of a Security with a term of more than one year (taking into account the last possible date that the Securities could be outstanding under its terms).

Coupon Payments on the Securities. Under the characterisation described above under "*General*," only a portion of the coupon payments on the Securities will be attributable to the Yield on the Deposit. The remainder of the coupon payments will represent payments attributable to the Put Premium. The Put Premium will generally not be taxable to a U.S. Holder upon receipt, but instead will be accounted for as described below.

To the extent attributable to the Yield on the Deposit, coupon payments on the Securities will generally be taxable to a U.S. Holder as ordinary interest income at the time accrued or received, in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes.

TAXATION

Tax Basis. Based on our determination set forth above, the U.S. Holder's tax basis in the Put Right will be zero, and the U.S. Holder's initial tax basis in the Deposit will be 100 per cent. of the issue price.

Expiration of the Put Right

Receipt of Stated Principal Amount in Cash upon Settlement or Early Redemption of the Securities. If a U.S. Holder receives the stated principal amount of the Securities in cash (excluding cash attributable to coupon payments on the Securities, which would be taxed as described above under "*Coupon Payments on the Securities*"), the Put Right will be deemed to have expired unexercised. In that case, the U.S. Holder will generally not recognise any gain upon the return of the Deposit, but will recognise the total amount of Put Premium received by the U.S. Holder over the term of the Securities (including Put Premium received at maturity) as short-term capital gain at such time.

Exercise of the Put Right

Receipt of Cash Equal to the Value of Reference Item Upon Maturity of the Securities. If a U.S. Holder receives an amount of cash (excluding cash attributable to coupon payments on the Securities, which would be taxed as described above under "*Coupon Payments on the Securities*") that is less than the stated principal amount of the Securities (such difference, the "**Deficit**"), the Put Right will be deemed to have been exercised and the U.S. Holder will be deemed to pay the Deficit to us upon settlement of the Put Right. In that case, the U.S. Holder will not recognise any gain in respect of the Deposit, but will recognise short-term capital gain or loss in an amount equal to the difference between (i) the total Put Premium received by the holder over the term of the Securities (including Put Premium received at maturity) and (ii) the Deficit.

Receipt of Underlying Shares Upon Maturity of the Securities. If a U.S. Holder receives Underlying Shares (and cash in lieu of a fractional share), the Put Right will be deemed to have been exercised. In that case, the U.S. Holder will not recognise any gain in respect of the Deposit. In addition, the U.S. Holder will not recognise any income or gain in respect of the total Put Premium received (including Put Premium received at maturity) and will not recognise any gain or loss with respect to any Underlying Shares received. The U.S. Holder will have an aggregate tax basis in the Underlying Shares received (including a fractional share) equal to the Deposit less the total Put Premium received over the term of the Securities. A U.S. Holder's holding period for any Underlying Shares received will start on the day after receipt. With respect to any cash received in lieu of a fractional share, a U.S. Holder will recognise short-term capital gain or loss in an amount equal to the difference between the amount of cash received in lieu of the fractional share and the pro rata portion of the U.S. Holder's aggregate adjusted tax basis in underlying shares that is allocable to the fractional share.

Sale or Exchange of the Securities Prior to Maturity. Upon the sale or exchange of the Securities, a U.S. Holder will generally recognise long-term capital gain or loss with respect to the Deposit if the U.S. Holder has held the Securities for more than one year at the time of such sale or exchange and short-term capital gain or loss otherwise. The U.S. Holder will also generally recognise short-term capital gain or loss with respect to the Put Right. For the purpose of determining gain or loss, a U.S. Holder should apportion the amount realised on the sale or exchange of the Securities (excluding any amount attributable to accrued but unpaid Yield on the Deposit, which would be taxed as described above under "*Coupon Payments on the Securities*") between the Deposit and the Put Right based on their respective values on the date of such sale or exchange. The amount of capital gain or loss on the Deposit will equal the amount realised that is attributable to the Deposit, less the U.S. Holder's adjusted tax basis in the Deposit. The amount realised that is attributable to the Put Right, together with the total Put Premium received by the U.S. Holder over the term of the Securities, will be treated as short-term capital gain.

If the value of the Deposit on the date of the sale or exchange exceeds the total amount realised, the U.S. Holder will be treated as having (i) sold or exchanged the Deposit for an amount equal to its value on that date and (ii) made a payment (the "**Put Right Assumption Payment**") to the purchaser of the Securities equal to the amount of such excess, in exchange for the purchaser's assumption of the U.S. Holder's rights and obligations under the Put Right. In that case, the U.S. Holder will recognise short-term capital gain or loss in respect of the Put Right in an amount equal to the total Put Premium received by the U.S. Holder over the term of the Securities, less the amount of the Put Right Assumption Payment deemed to be made by the U.S. Holder.

Stop-Loss Event. Although the tax consequences of a Stop Loss Event are uncertain, we intend to treat a Stop Loss Event as (i) the repayment by us of the Deposit for a price equal to the Deposit plus the present value of the portion of the remaining scheduled payments on the Securities (from and including the date of acceleration) that

TAXATION

is attributable to the Yield on the Deposit, (ii) the payment by us of the remaining Put Premium equal to the present value of the portion of the remaining scheduled payments on the Securities (from and including the date of acceleration) that is attributable to the Put Premium, and (iii) the exercise of the Put Right, followed by settlement through the delivery by the U.S. Holder to us of the Deposit in exchange for Underlying Shares, or, if the relevant Issuer so elects, the cash value of the Underlying Shares. We will also pay cash representing unpaid coupon payments on the Securities that accrued up to but excluding the date of acceleration.

Any cash received with respect to accrued coupon payments on the Securities will be taxed as described above under "*Coupon Payments on the Securities*."

Assuming the characterisation of the Stop Loss Event described above is respected, any amount received attributable to the unaccrued Put Premium will be treated as Put Premium received under the Put Right. A U.S. Holder would, with respect to the amount paid by us to repay the Deposit, generally recognise capital gain or loss equal to the difference between such amount and the U.S. Holder's adjusted tax basis in the Deposit. In the case of an initial investor, such difference would equal the present value of the portion of the remaining scheduled payments on the Securities attributable to the unaccrued Yield on the Deposit. In general, other than gain recognised on the Deposit as described in the previous sentences, the tax treatment of our exercise of the Put Right upon a Stop Loss Event would be the same as described above under "*Exercise of the Put Right—Receipt of Cash Equal to the Value of the Reference Item Upon Maturity of the Securities*" or "*Exercise of the Put Right—Receipt of Underlying Shares Upon Maturity of the Securities*," as the case may be.

Other Tax Considerations Pertaining to Securities

The following discussion describes certain U.S. federal income tax consequences of the ownership and disposition of a Security, regardless of the length of the term of the Security.

Possible Taxable Events

In the event of a change in the methodology by which a Reference Item to which a Security relates is calculated, a change in the components of such a Reference Item, the discontinuance of such a Reference Item, the designation of a successor to such a Reference Item or other similar circumstances resulting in a material change to such a Reference Item, it is possible that a Security could be treated, in whole or in part, as terminated and reissued for U.S. federal income tax purposes. Similar consequences could apply if the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Securities. In the event of a deemed retirement, a U.S. Holder might be required to recognise gain or loss (subject to the possible application of the wash sale rules) with respect to the Security. Moreover, the tax treatment of the Security after the deemed reissuance could be materially adversely affected. U.S. Holders should consult their tax advisers regarding the risk of such an event.

Possible Application of Section 988 of the Code

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that are treated as a Put Right plus a Deposit and for which the Reference Item includes one or more currencies (other than the U.S. dollar).

Sale, Exchange or Retirement. Because the return on the Security is "determined by reference to the value" of one or more foreign currencies, unless otherwise provided in the applicable Issue Terms, we intend to treat the Security as subject to Section 988 of the Code. In that case, any gain or loss recognised on the Security generally will be ordinary income or loss unless an election under Section 988(a)(1)(B) of the Code to treat such gain or loss as capital gain or loss (the "**Section 988 election**") is available and the U.S. Holder makes such election before the close of the day on which the U.S. Holder purchases the Security. While a taxpayer may make a Section 988 election to treat gain or loss on certain forward contracts, futures contracts or option contracts linked to one or more foreign currencies as capital gain or loss, it is unclear whether a Section 988 election is available for the Security. In addition, any such election, if available, would not apply to the Deposit portion of the Security. Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether the Section 988 election is available for the Security. U.S. Holders should consult their tax advisers about the potential application of Section 988 of the Code and the Section 988 election to the Security. In addition, a U.S. Holder might be subject to special reporting requirements that apply to foreign currency losses that exceed certain thresholds.

Possible Alternative Tax Treatments of an Investment in the Securities

TAXATION

Due to the absence of authorities that directly address the proper tax treatment of the Security, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. The IRS could, for instance, seek to treat the entire Security as a debt instrument. The risk that financial instruments providing for downside protection features would be recharacterised for U.S. federal income tax purposes as debt instruments giving rise to ordinary income and possible accrual of income prior to maturity or disposition of the Security, rather than as a Put Right plus a Deposit, is greater than the risk of recharacterisation for comparable financial instruments that do not have such features. If the entire Security were recharacterised as a debt instrument, the federal income tax consequences to the U.S. Holder would depend on the terms of the Security and could be materially adverse to the U.S. Holder. For a description of the tax treatment of Securities that are treated as debt instruments, see the discussion under "*—Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes*" above.

Even if debt treatment does not apply to the entire Security, other alternative U.S. federal income tax treatments of the Security are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Security. In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; and whether these instruments are or should be subject to the "constructive ownership" rule (as discussed above under "*—Possible Application of Section 1260 of the Code*"). While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Security, possibly with retroactive effect.

Prospective investors should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Security, including the possible implications of the IRS notice.

Payments in a Currency Other Than U.S. Dollars

General. Subject to the discussion above under "*—Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes—Foreign Currency Securities*," the following discussion describes certain special rules applicable to a U.S. Holder of Securities if the holder acquires a Security with a currency other than the U.S. dollar or receives a payment on a Security or proceeds of a sale of a Security in a currency other than the U.S. dollar.

Payments in a Currency Other Than U.S. Dollars. Subject to the discussions below under "*—Payments of Contingent Coupons to Accrual Method Taxpayers*" and "*—Payments of Coupons on Deposit Portion of Securities Treated as Put Rights Plus a Deposit*," a U.S. Holder who receives a payment in a foreign currency with respect to a Security generally should determine the amount received based on the U.S. dollar value of the foreign currency payment regardless of whether the payment is in fact converted to U.S. dollars at that time, and this U.S. dollar value will be the U.S. Holder's tax basis in the foreign currency. Any gain or loss realised by a U.S. Holder on a subsequent sale or other disposition of the foreign currency received will be ordinary income or loss.

Payments of Contingent Coupons to Accrual Method Taxpayers. While there are no clear authorities to address how a U.S. Holder that uses the accrual method of accounting for U.S. federal income tax purposes should account for contingent coupons paid in a foreign currency with respect to a Security, we believe that it is reasonable for such a holder to determine the U.S. dollar value of the amount of the coupon payment that has accrued and is otherwise required to be taken into account with respect to a Security during an accrual period by translating the coupon at an average rate of exchange for the accrual period or, with respect to an accrual period that spans two taxable years, at the average rate for the partial period within the taxable year.

In addition to the coupons accrued as described above, the U.S. Holder will recognise foreign currency gain or loss as ordinary income or loss (which will not be treated as interest income or expense) with respect to accrued coupon payments on the date the coupon payment or proceeds from the sale, exchange or other disposition (including retirement) attributable to an accrued coupon are actually received. The amount of ordinary income or loss recognised will equal the difference between the U.S. dollar value of the foreign currency payment received (determined based on a spot rate on the date the payment is received) in respect of the accrual period

TAXATION

(or, where a holder receives U.S. dollars, the amount of the payment in respect of the accrual period) and the U.S. dollar value of the coupon payment that has accrued during the accrual period (as determined above).

Payments of Coupons on Deposit Portion of Securities Treated as Put Rights Plus a Deposit. A coupon that is paid to a U.S. Holder in a foreign currency with respect to the Deposit portion of a Security that is treated as a Put Right plus a Deposit will be treated as an interest payment described under "*Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes—Foreign Currency Securities.*"

General Considerations for U.S. Holders

Backup Withholding and Information Reporting

Backup withholding may apply in respect of payments on the Securities and the payment of proceeds from a sale or other disposition of the Securities, unless a U.S. Holder provides proof of an applicable exemption or a correct taxpayer identification number and otherwise complies with applicable requirements of the backup withholding rules. The amounts withheld under the backup withholding rules are not an additional tax and may be refunded or credited against the U.S. Holder's U.S. federal income tax liability, provided that the required information is timely furnished to the IRS. In addition, information returns may be filed with the IRS in connection with payments on the Securities and the payment of proceeds from a sale or other disposition of the Securities unless the U.S. Holder provides proof of an applicable exemption from the information reporting rules.

Disclosure Requirements

Applicable Treasury regulations require taxpayers that participate in certain "reportable transactions" to disclose their participation to the IRS by attaching Form 8886 to their tax returns and to retain a copy of all documents and records related to the transaction. In addition, organisers and sellers of such transactions are required to maintain records, including lists identifying investors in the transaction, and must furnish those records to the IRS upon demand. A transaction may be a "reportable transaction" based on any of several criteria. Whether an investment in a Security constitutes a "reportable transaction" for any holder depends on the holder's particular circumstances. In particular, for example, certain transactions in which a U.S. Holder realizes a foreign currency loss in excess of certain thresholds can be a "reportable transaction." Holders should consult their tax advisers concerning any possible disclosure obligation that they may have with respect to their investment in the Securities and should be aware that the relevant Issuer (or other participants in the transaction) may determine that the disclosure or investor list maintenance requirement applies to the transaction and comply accordingly with these requirements.

Individual U.S. Holders (and certain entities) that own "specified foreign financial assets," including financial instruments issued by non-U.S. issuers, or non-U.S. financial accounts through which they may be held, may be required to file an information report with respect to such assets with their tax returns. You should consult your tax adviser regarding the application of these rules to your ownership of the Securities.

TAX CONSEQUENCES TO NON-U.S. HOLDERS

This section applies to you only if you are a Non-U.S. Holder. As used herein, the term "**Non-U.S. Holder**" means a beneficial owner of a security that is for U.S. federal income tax purposes:

- an individual who is classified as a nonresident alien;
- a foreign corporation; or
- a foreign estate or trust.

The term "Non-U.S. Holder" does not include any of the following holders:

- a holder who is an individual present in the United States for 183 days or more in the taxable year of disposition and who is not otherwise a resident of the United States for U.S. federal income tax purposes;
- certain former citizens or residents of the United States;
- a holder for whom income or gain in respect of the Securities is effectively connected with the conduct of a trade or business in the United States; or

TAXATION

- a holder who holds or invests in a Security through a U.S. financial institution or intermediary, or through a financial institution or intermediary that is related to a U.S. financial institution or intermediary.

Such holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the Securities. In addition, non-U.S. Holders that hold Securities through U.S. or certain U.S.-related intermediaries should consult their tax advisers regarding any certification requirements that may need to be complied with to avoid U.S. backup withholding.

General

Subject to the discussions below under "*Possible Application of Section 871(m) of the Code*" and "*FATCA*," and the discussion above concerning Section 897, the Issuers expect to treat payments on the Securities, and any gain realised on a disposition of a Security (including at maturity or early settlement), as exempt from U.S. federal income tax (including withholding tax).

Possible Application of Section 871(m) of the Code

Section 871(m) of the Code and Treasury regulations promulgated thereunder ("**Section 871(m)**") impose a withholding tax of 30 per cent. (or lower treaty rate applicable to dividends) on certain "dividend equivalents" paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities. Subject to the discussion below concerning Securities issued before January 1, 2023, a Security linked to U.S. equities or indices that include U.S. equities (a "**U.S. equity linked Security**") will generally be subject to the Section 871(m) withholding regime if at issuance it (i) has a "delta" of 0.80 or higher with respect to the underlying U.S. equity or (ii) substantially replicates the economic performance of the underlying U.S. equity, as determined by a "substantial equivalence" test that, among other factors, takes into account the initial number of shares of the underlying U.S. equity needed to hedge the transaction fully. The tests described above are set forth in the regulations, and the applicable test will depend on the terms of the relevant U.S. equity linked Security. Under these rules, withholding may apply even where the relevant U.S. equity linked Security does not provide for any payment that is explicitly linked to a dividend. The regulations provide for certain exceptions to the withholding requirements, in particular for instruments linked to certain broad-based indices (a "**qualified index**") that meet standards set forth in the regulations, as well as certain securities that track a qualified index.

Pursuant to an IRS notice, Section 871(m) will not apply to Securities issued before January 1, 2023 that do not have a "delta" of one with respect to any U.S. equity. If the terms of a U.S. equity linked Security are significantly modified (including in the event the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Security) and if such modification or substitution results in a deemed exchange of the Security for U.S. federal income tax purposes, the U.S. equity linked Security will generally be treated as reissued at the time of the significant modification. Under Treasury regulations, certain "benchmark" rate replacements would not give rise to deemed exchanges for U.S. federal income tax purposes, provided that certain conditions set forth in the regulations are met.

The calculations of "delta" are generally made at the "calculation date," which is the earlier of (i) the time of pricing of the Security, i.e., when all material terms have been agreed on, and (ii) the issuance of the Security. However, if the time of pricing is more than 14 calendar days before the issuance of the Security, the calculation date is the date of the issuance of the Security. In those circumstances, information regarding the Issuer's final determinations for purposes of Section 871(m) may be available only after the issuance of the Security. As a result, a Non-U.S. Holder should acquire such a Security only if it is willing to accept the risk that the Security is treated as subject to withholding.

The amount of a "dividend equivalent" is equal to, for a "simple" contract, the product of (a) the per-share dividend amount, (b) the number of shares of the underlying U.S. equity referenced in the U.S. equity linked Security and (c) the delta, and, for a "complex" contract, the product of (a) the per-share dividend amount and (b) the initial hedge.

The dividend equivalent amount will be determined on the earlier of (a) the record date of the dividend and (b) the day prior to the ex-dividend date. The dividend equivalent amount will include the amount of any actual or, under certain circumstances, estimated dividend. If a Security is subject to withholding in respect of dividend

TAXATION

equivalents, withholding will, depending on the applicable withholding agents' circumstances, generally be required either (i) on the underlying dividend payment date or (ii) when cash payments are made on the relevant U.S. equity linked Security or upon the date of maturity, lapse or other disposition thereof by the Non-U.S. Holder.

The relevant Issuer will determine whether a U.S. equity linked Security is subject to withholding under Section 871(m). If the Issuer has determined, as specified in the applicable Issue Terms, that a U.S. equity linked Security should be subject to withholding under Section 871(m), the relevant Issuer will be deemed to instruct its agents and withholding agents that withholding is required, unless such agent or withholding agent knows or has reason to know otherwise. If withholding is required, the relevant Issuer will not be required to pay any additional amounts with respect to the amounts so withheld.

The relevant Issuer's determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on the Non-U.S. Holder's particular circumstances. For example, the application of Section 871(m) may be affected if a Non-U.S. Holder enters into another transaction in connection with the acquisition of a U.S. equity linked Security. Accordingly, Non-U.S. Holders should consult their tax advisers regarding the potential application of Section 871(m) to the Securities in their particular circumstances.

FATCA

Legislation commonly referred to as "FATCA" generally imposes a withholding tax of 30 per cent. on payments to certain non-U.S. entities (including financial intermediaries) with respect to certain financial instruments, unless various U.S. information reporting and due diligence requirements have been satisfied. An intergovernmental agreement between the United States and the non-U.S. entity's jurisdiction may modify these requirements. FATCA generally applies to certain financial instruments that are treated as paying U.S.-source interest or dividends or other U.S.-source "fixed or determinable annual or periodical" income ("**FDAP Income**"). Withholding (if applicable) applies to any payment of amounts treated as U.S.-source interest or dividend equivalents (as discussed above under "*Possible Application of Section 871(m) of the Code*") on the Securities. The FATCA legislation imposes withholding also on any payment of gross proceeds of the disposition (including upon retirement) of Securities treated as providing for U.S.-source interest or dividends. However, under proposed regulations (the preamble to which specifies that taxpayers are permitted to rely on them pending finalisation) no withholding will apply to payments of gross proceeds (other than amounts treated as FDAP Income). Although, under current law, withholding under FATCA does not apply to payments of non-U.S. source income, such withholding could apply in the future with respect to certain payments attributable to U.S.-source income ("**foreign passthru payments**"). Securities that pay only foreign passthru payments that are not treated as equity for U.S. federal income tax purposes and have a stated expiration date are generally grandfathered from FATCA withholding if issued prior to the date that is six months after final Treasury regulations that define the term "foreign passthru payments" are published. However, such Securities may become subject to FATCA withholding if they are significantly modified after the grandfathering date (including in the event the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Security) if such modification or substitution results in a deemed exchange of the Securities for U.S. federal income tax purposes. Under Treasury regulations, certain "benchmark" rate replacements would not give rise to deemed exchanges for U.S. federal income tax purposes, provided that certain conditions set forth in the regulations are met. If withholding under current or future law applies to the Securities, the relevant Issuer will not be required to pay any additional amounts with respect to amounts withheld under FATCA. Non-U.S. Holders should consult their tax advisers regarding the potential application of FATCA to the Securities.

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

The Dealer(s) have, in a programme agreement (as further modified and/or supplemented and/or restated from time to time, the "**Programme Agreement**") dated July 1, 2021 agreed with the Issuer and the Guarantor a basis upon which they or any of them may from time to time agree to purchase Securities. Any such agreement will extend to those matters stated under "*Form of Securities*" and "*Terms and Conditions of the Securities*". In the Programme Agreement, the Issuer (and, failing which, the Guarantor) have agreed to reimburse the Dealer(s) for certain of their expenses in connection with the establishment and any future update of the Programme and the issue of Securities under the Programme and to indemnify the Dealer(s) against certain liabilities incurred by them in connection therewith.

The Dealers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and its affiliates in the ordinary course of business.

In order to facilitate the offering of any Tranche of the Securities, certain persons participating in the offering of the Tranche may engage in transactions that stabilise, maintain or otherwise affect the market price of the relevant Securities during and after the offering of the Tranche. Specifically such persons may over-allot or create a short position in the Securities for their own account by selling more Securities than have been sold to them by the Issuer. Such persons may also elect to cover any such short position by purchasing Securities in the open market. In addition, such persons may stabilise or maintain the price of the Securities by bidding for or purchasing Securities in the open market and may impose penalty bids, under which selling concessions allowed to syndicate members or other broker-dealers participating in the offering of the Securities are reclaimed if Securities previously distributed in the offering are repurchased in connection with stabilisation transactions or otherwise. The effect of these transactions may be to stabilise or maintain the market price of the Securities at a level above that which might otherwise prevail for a limited period after the Issue Date. The imposition of a penalty bid may also affect the price of the Securities to the extent that it discourages resales thereof. No representation is made as to the magnitude or effect of any such stabilisation or other transactions. Such transactions, if commenced, may be discontinued at any time and must be brought to an end after a limited period. Under UK laws and regulations stabilisation activities may only be carried on by the Stabilisation Manager named in the Issue Terms (or persons acting on its behalf) and may only continue for a limited period following the Issue Date (or, if the ending day would be earlier, 60 days after the date of allotment) of the relevant Tranche of Securities.

Conflicts of Interest

BBVA Securities Inc. is an affiliate of BBVA Global Securities B.V. and the Guarantor and, as such, will have a "conflict of interest" in any offering of 3(a)(2) Notes in which it participates, as either principal or agent, within the meaning of Rule 5121 of the Financial Industry Regulatory Authority ("**FINRA**") (or any successor rule thereto) ("**Rule 5121**"). Consequently, any such offering will be conducted in compliance with the provisions of Rule 5121. BBVA Securities Inc. is not permitted to sell Notes in any such offering to an account over which it exercises discretionary authority without the prior specific written approval of the account holder.

Transfer Restrictions

As a result of the following restrictions, purchasers of Securities issued by BBVA Global Markets B.V. in the United States are advised to consult legal counsel prior to making any purchase, offer, sale, resale or other transfer of such Securities

Each person purchasing an interest in a Registered Global Security will be deemed to have acknowledged, represented and agreed, as follows (terms used in this paragraph that are defined in Rule 144A or in Regulation S are used herein as defined therein):

- (a) that (i) it is a QIB who is also a QP, purchasing (or holding) the Securities for its own account or for the account of one or more QIBs who are also QPs and it is aware that any sale to it is being made in reliance on Rule 144A, or (ii) it is outside the United States and is not a U.S. person;
- (b) that the Securities are being offered and sold in a transaction not involving a public offering in the United States within the meaning of the Securities Act, and that the Securities have not been and will not be registered under the Securities Act or any other applicable U.S. state securities laws and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except as set forth below;

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

- (c) that, unless it holds an interest in a Regulation S Global Security and either is a person located outside the United States or is not a U.S. person, if in the future it decides to resell, pledge or otherwise transfer the Securities or any beneficial interests in the Securities, it will do so, prior to the date which is one year after the later of the last Issue Date for the Series and the last date on which the Issuer or an affiliate of the Issuer was the owner of such Securities, only (i) to the Issuer or any affiliate thereof, (ii) inside the United States to a person whom the seller reasonably believes is a QIB who is also a QP purchasing for its own account or for the account of a QIB who is also a QP in a transaction meeting the requirements of Rule 144A, (iii) outside the United States in compliance with Rule 903 or Rule 904 under the Securities Act, (iv) pursuant to the exemption from registration provided by Rule 144 under the Securities Act (if available) or (v) pursuant to an effective registration statement under the Securities Act, in each case in accordance with all applicable U.S. state securities laws;
- (d) that it will, and will require each subsequent holder to, notify any purchaser of the Securities from it of the resale restrictions referred to in paragraph (c) above, if then applicable;
- (e) that Securities initially offered in the United States to QIBs who are also QPs will be represented by one or more Rule 144A Global Securities, that Securities offered to Institutional Accredited Investors who are also QPs will be in the form of Definitive IAI Registered Securities and that Securities offered outside the United States in reliance on Regulation S will be represented by one or more Regulation S Global Securities;
- (f) that the Securities, other than the Regulation S Global Securities, will bear a legend to the following effect unless otherwise agreed to by the Issuer:

"THIS SECURITY HAS NOT BEEN REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE "**SECURITIES ACT**"), OR ANY STATE SECURITIES LAWS AND THE ISSUER HAS NOT BEEN AND WILL NOT BE REGISTERED AS AN "INVESTMENT COMPANY" UNDER THE U.S. INVESTMENT COMPANY ACT OF 1940, AS AMENDED (THE "**1940 ACT**"). NEITHER THIS SECURITY NOR ANY INTEREST OR PARTICIPATION HEREIN MAY BE REOFFERED, SOLD, ASSIGNED, TRANSFERRED, PLEDGED, ENCUMBERED OR OTHERWISE DISPOSED OF UNLESS SUCH TRANSACTION IS REGISTERED PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT, OR IS EXEMPT FROM, OR NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND UNDER CIRCUMSTANCES WHICH DO NOT REQUIRE THE ISSUER TO REGISTER UNDER THE 1940 ACT.

Unless otherwise provided in the applicable Issue Terms, each Institutional Accredited Investor who is also a QP who purchases Registered Securities in definitive form offered and sold in the United States in reliance upon the exemption from registration provided by Regulation D of the Securities Act is required to execute and deliver to the Registrar an Investment Letter. Upon execution and delivery of an Investment Letter by an Institutional Accredited Investor who is also a QP, Securities will be issued in definitive registered form, see "*Form of Securities*". Each QIB who is also a QP who purchases Rule 144A Global Securities offered and sold in the United States in reliance upon the exemption from registration provided by Rule 144A of the Securities Act is required to execute and deliver to the Registrar an Investment Letter.

The Investment Letter referred to above shall include the following representations and agreements (undefined terms used in this section that are defined in Rule 144A or in Regulation S are used herein as defined therein):

- (a) **Purchaser Requirements.** Securities may be offered in the United States to a purchaser who: (i) is an Eligible Investor (as defined below), (ii) will hold at least the minimum denomination of US\$250,000, (iii) will provide notice of applicable transfer restrictions to any subsequent transferee (and each subsequent transferee will be deemed to have made the same representations and agreements contained in clauses (i) through (v) of this paragraph), (iv) understands that the issuer may receive a list of all participants holding positions in its Securities from one or more book-entry depositaries and that the participants may further disclose to the issuer the names and positions of holders of its Securities, and (v) is purchasing for its own account or for the accounts of one or more other persons each of whom meets all of the requirements of clauses (i) through (v) and over which it exercises sole investment discretion.
- (b) **Notice of Transfer Restrictions.** Each purchaser acknowledges and agrees that (a) the Securities have not been and will not be registered under the Securities Act and the Issuer has not been registered as an "investment company" under the 1940 Act, (b) neither the Securities nor any beneficial interest therein may be re-offered, resold, pledged or otherwise transferred except in accordance with the provisions set out in paragraph (a) above and (c) the purchaser will notify any transferee of such transfer restrictions and that each subsequent holder will be required to notify any subsequent transferee of such Securities of such transfer restrictions.
- (c) **Mandatory Transfer/Redemption.** Each purchaser acknowledges and agrees that in the event that at any time the Issuer determines or is notified by a Dealer acting on behalf of the Issuer that such purchaser was in breach, at the time given or deemed to be given, of any of the representations or agreements set out in paragraph (a) above or otherwise determines that any transfer or other disposition

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

of any Securities would, in the sole determination of the Issuer or a Dealer acting on behalf of the Issuer, require the Issuer to register as an "investment company" under the provisions of the 1940 Act, such purchase or other transfer will be void *ab initio* and will not be honoured by the Registrar. Accordingly, any such purported transferee or other holder will not be entitled to any rights as a Securityholder and the Issuer shall have the right, in accordance with the conditions of the Securities, to force the transfer of, transfer on behalf of the Securityholder or redeem, any such Securities.

- (d) **Rule 144A Information.** Each purchaser of Securities offered and sold in the United States under Rule 144A is hereby notified that the offer and sale of such Securities to it is being made in reliance upon the exemption from the registration requirements of the Securities Act provided by Rule 144A. - (e) **ERISA.** If the purchaser is a U.S. person purchasing an interest in a Rule 144A Global Security, it is not a benefit plan investor, is not using the assets of a benefit plan investor to acquire such Securities and shall not at any time hold such Securities for a benefit plan investor (including assets that may be held in an insurance company's separate or general accounts where assets in such accounts may be deemed "plan assets" for purposes of the U.S. Employee Retirement Income Security Act of 1974, as amended ("**ERISA**")). For the purposes hereof, the term "**benefit plan investor**" means (a) any employee benefit plan (as defined in section 3(3) of ERISA), (b) any plan described in section 4975(e)(1) of the U.S. Internal Revenue Code, or (b) any entity whose underlying assets include plan assets by reason of a plan's investment in the entity (within the meaning of the U.S. Department of Labor Regulations Section 2510.3-101 as modified by Section 3(42) of ERISA).
- (f) **Relevant Information.** The purchaser has received a copy of this Base Prospectus and such other information as it deems necessary in order to make its investment decision.
- (g) **Legends on Global Securities.** Each purchaser acknowledges that each of the Rule 144A Global Security and the Regulation S Global Security will bear legends substantially to the effect set out in this Base Prospectus and that the Issuer has covenanted not to remove either such legend so long as it shall be necessary for the Issuer to rely on the exception to the 1940 Act.
- (h) **Regulation S Transfers During the Distribution Compliance Period.** If the purchaser has acquired a portion of a Regulation S Global Security in a sale or other transfer being made in reliance upon Regulation S, the purchaser agrees that during the Distribution Compliance Period it will not offer, resell, pledge or otherwise transfer such portion of such Regulation S Global Security to or for the account or benefit of any U.S. person other than to a person meeting the requirements set out in paragraph (a) above and in the legend set out on the Regulation S Global Security.

If the purchaser is an Institutional Accredited Investor who is also a QP, the Investment Letter will also contain the following representations and agreements:

- (j) that, in the event that the Institutional Accredited Investor who is also a QP purchases Securities, it will acquire Securities having a minimum purchase price of at least US\$500,000 (or the approximate equivalent in another Specified Securities Currency).

No sale of Legended Securities in the United States to any one purchaser will be for less than US\$250,000 (or its foreign currency equivalent) nominal amount or, in the case of sales to Institutional Accredited Investors who are also QPs, US\$500,000 (or its foreign currency equivalent) nominal amount and no Legended Security will be issued in connection with such a sale in a smaller nominal amount. If the purchaser is a non-bank fiduciary acting on behalf of others, each person for whom it is acting must purchase at least US\$250,000 (or its foreign currency equivalent) or, in the case of sales to Institutional Accredited Investors who are also QPs, US\$500,000 (or its foreign currency equivalent) nominal amount of Registered Securities.

Any transfer or other disposition of any Securities that would, in the sole determination of the Issuer, require the Issuer to register as an "investment company" under the provisions of the 1940 Act will be void *ab initio*, and

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

such transfer or other disposition will not be recognised by the Issuer. If, at any time a Security is held by or on behalf of a U.S. person who is not an Eligible Investor at the time it purchases such Security the Issuer may, in its discretion and at the expense and risk of such holder, (a) redeem such Securities, in whole or in part, to permit the Issuer to avoid registration under the 1940 Act or (b) require any such holder to transfer such Securities to an Eligible Investor or to a non-U.S. person outside the United States or cause such Securities to be transferred on behalf of the Securityholder. The determination of which Securities will be redeemed or sold in any particular case is in the discretion of the Issuer.

Securities Selling Restrictions

General Selling Restrictions

This Base Prospectus has been prepared on the basis that Securities may be directed to any category of potential investors unless specified otherwise in the applicable Issue Terms.

Each Dealer has agreed, and each further Dealer appointed under the Programme will be required to agree, that:

- (i) unless specified otherwise in the applicable Issue Terms, no action has been or will be taken in any country or jurisdiction by the Issuer or the Dealers that would permit a public offering of Securities, or possession or distribution of any offering material in relation thereto, in such country or jurisdiction where action for that purpose is required; and
- (ii) it will (to the best of its knowledge and belief) comply with all applicable securities laws and regulations in force in any jurisdiction in which it purchases, offers, sells or delivers Securities or possesses or distributes this Base Prospectus and will obtain any consent, approval or permission required by it for the purchase, offer, sale or delivery by it of Securities under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers, sales or deliveries and neither the Issuer, the Guarantor nor the Dealers shall have any responsibility therefor.

None of the Issuer, the Guarantor nor the Dealer(s) represents that Securities may at any time lawfully be sold in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to any exemption available thereunder, or assumes any responsibility for facilitating such sale.

Persons into whose hands the Base Prospectus, any Issue Terms or any Security comes are required by the Issuer and the Dealers to comply with all applicable laws and regulations in each country or jurisdiction in or from which they purchase, offer, sell or deliver Securities or have in their possession or distribute such offering material, in all cases at their own expense.

United States

Securities other than 3(a)(2) Notes

Terms used in this paragraph have the meanings given to them by Regulation S.

Each purchaser who satisfies clauses (i) through (v) above acknowledges and agrees that in the event that at any time the Issuer determines or is notified by a Dealer acting on behalf of the Issuer that such purchaser was in breach, at the time given or deemed to be given, of any of the representations or agreements set out in clauses (i) through (v) above or otherwise determines that any transfer or other disposition of any Securities would, in the sole determination of the Issuer or a Dealer acting on behalf of the Issuer, require the Issuer to register as an "investment company" under the provisions of the 1940 Act, such purchase or other transfer will be void *ab initio* and will not be honoured by the Registrar. Accordingly, any such purported transferee or other holder will not be entitled to any rights as a Securityholder and the Issuer shall have the right, in accordance with the conditions of the Securities, to force the transfer of, transfer on behalf of the Securityholder or redeem, any such Securities.

Such Securities will be offered by BBVA (acting through its agent BBVA Securities Inc.) (in such capacity, the "**Initial Purchaser**").

Dealer(s) may arrange for the resale of Securities issued by BBVA Markets B.V. to QIBs who are also QPs pursuant to Rule 144A and Dealer(s) may arrange for the resale of Securities issued by BBVA Global Securities B.V. to QIBs pursuant to Rule 144A and each such purchaser of Securities is hereby notified that the Dealer(s) may be relying on the exemption from the registration requirements of the Securities Act provided by Rule 144A and one or more exemptions and/or exclusions from regulation under the CEA. The minimum aggregate nominal amount of Securities which may be purchased by a QIB pursuant to Rule 144A is US\$250,000 (or the approximate equivalent thereof in any other currency). To the extent that the Issuer is not subject to or does not comply with the reporting requirements of Section 13 or 15(d) of the Exchange Act or the information furnishing requirements of Rule 12g3-2(b) thereunder, the Issuer has agreed to furnish to holders of Securities and to prospective purchasers designated by such holders, upon request, such information as may be required by Rule 144A(d)(4) so long as the Securities are considered restricted securities within the meaning of Rule 144A(a)(3) under the Securities Act.

The Securities, the Guarantee and any Entitlement(s) do not constitute, and have not been marketed as, contracts of sale of a commodity for future delivery (or options thereon) subject to the CEA, and trading in the Securities has not been approved by the U.S. Commodity Futures Trading Commission pursuant to the CEA.

Each issuance of Securities shall be subject to such additional U.S. selling restrictions as the Issuer and the relevant Dealer may agree as a term of the issuance and purchase of such Securities, which additional selling restrictions shall be set out in the Issue Terms.

Prospectus Regulation to publish a prospectus. Any such offer is referred to as a "**Non-exempt Offer**". This Base Prospectus has been prepared on a basis that permits Non-exempt Offers of Securities in each Member State in relation to which the Issuer has given its consent as specified in the applicable Final Terms (each specified Member State a "**Non-exempt Offer Jurisdiction**" and together the "**Non-Exempt Offer Jurisdictions**"). Any person making or intending to make a Non-exempt Offer of Securities on the basis of this Base Prospectus must do so only with the Issuer's consent to the use of this Base Prospectus as provided under "*Consent given in accordance with Article 5 of the Prospectus Regulation*" and provided such person complies with the conditions attached to that consent.

Save as provided above, none of the Issuer, the Guarantor or any Dealer have authorised, nor do they authorise, the making of any Non-exempt Offer of Securities in circumstances in which an obligation arises for the Issuer or any Dealer to publish or supplement a prospectus for such offer.

Consent given in accordance with Article 5 of the Prospectus Regulation

In the context of a Non-exempt Offer of such Securities, the Issuer and the Guarantor each accept responsibility, in each of the Non-exempt Offer Jurisdictions, for the consent of this Base Prospectus in relation to any person (an "**Investor**") who purchases any Securities in a Non-exempt Offer made by a Dealer or an Authorised Offeror (as defined below), where that offer is made during the Offer Period specified in the applicable Final Terms and provided that the conditions attached to the giving of consent for the use of this Base Prospectus are complied with. The consent and conditions attached to it are set out under "*Consent*" and "*Conditions to Consent*" below.

None of the Issuer, the Guarantor or any Dealer makes any representation as to the compliance by an Authorised Offeror with any applicable conduct of business rules or other applicable regulatory or securities law requirements in relation to any Non-exempt Offer and none of the Issuer or the Dealers has any responsibility or liability for the actions of that Authorised Offeror.

Except in the circumstances set out in the following paragraphs, neither the Issuer nor the Guarantor has authorised the making of any Non-exempt Offer by any offeror and the Issuer has not consented to the use of this Base Prospectus by any other person in connection with any Non-exempt Offer of Securities. Any Non-exempt Offer made without the consent of the Issuer is unauthorised and none of the Issuer, the Guarantor or, for the avoidance of doubt, any Dealer accepts any responsibility or liability in relation to such offer or for the actions of the persons making any such unauthorised offer.

If, in the context of a Non-exempt Offer, an Investor is offered Securities by a person who is not an Authorised Offeror, the Investor should check with that person whether anyone is responsible for this Base Prospectus for the purposes of the relevant Non-exempt Offer and, if so, who that person is. If the Investor is in any doubt about whether it can rely on this Base Prospectus and/or who is responsible for its contents it should take legal advice.

Consent

In connection with each Tranche of Securities and subject to the conditions set out below under "*Conditions to Consent*" the Issuer consents to the use of this Base Prospectus (as supplemented as at the relevant time, if applicable) in connection with a Non-exempt Offer of such Securities by:

- (i) the relevant Dealer(s) or Manager(s) stated in the applicable Final Terms;
- (ii) any financial intermediaries specified in the applicable Final Terms; and
- (iii) any other financial intermediary appointed after the date of the applicable Final Terms and whose name is published on the Guarantor's website (www.bbva.com) and identified as an Authorised Offeror in respect of the relevant Non-exempt Offer.

The financial intermediaries referred to in paragraphs (ii) and (iii) above are together the "**Authorised Offerors**" and each an "**Authorised Offeror**".

Conditions to Consent

The conditions to the Issuer's consent to the use of this Base Prospectus in the context of the relevant Non-exempt Offer are that such consent:

- (i) is only valid during the Offer Period specified in the applicable Final Terms; and

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

- (ii) only extends (as at the date of this Base Prospectus) to the use of this Base Prospectus to make Non-exempt Offers of the relevant Tranche of Securities in a Non-exempt Offer Jurisdiction, as specified in the applicable Final Terms.

The consent referred to above relates to Offer Periods (if any) occurring within 12 months from the date of this Base Prospectus.

As of the date of this Base Prospectus, the only relevant Member State which may, in respect of any Tranche of Securities, be specified in the applicable Final Terms (if any relevant Member States are so specified) as indicated in (ii) above, will be Ireland, and accordingly each Tranche of Securities may only be offered to Investors as part of a Non-exempt Offer in Ireland, as specified in the applicable Final Terms, or otherwise in circumstances in which no obligation arises for the Issuer or any Dealer to publish or supplement a prospectus for such offer.

ARRANGEMENTS BETWEEN INVESTORS AND AUTHORISED OFFERORS

AN INVESTOR INTENDING TO PURCHASE OR PURCHASING ANY SECURITIES IN A NON-EXEMPT OFFER FROM AN AUTHORISED OFFEROR WILL DO SO, AND OFFERS AND SALES OF SUCH SECURITIES TO AN INVESTOR BY SUCH AUTHORISED OFFEROR WILL BE MADE, IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF THE OFFER IN PLACE BETWEEN SUCH AUTHORISED OFFEROR AND SUCH INVESTOR INCLUDING ARRANGEMENTS IN RELATION TO PRICE, ALLOCATIONS, EXPENSES AND SETTLEMENT. THE ISSUER WILL NOT BE A PARTY TO ANY SUCH ARRANGEMENTS WITH SUCH INVESTORS IN CONNECTION WITH THE NON-EXEMPT OFFER OR SALE OF THE SECURITIES CONCERNED AND, ACCORDINGLY, THIS BASE PROSPECTUS AND ANY FINAL TERMS WILL NOT CONTAIN SUCH INFORMATION. THE RELEVANT INFORMATION WILL BE PROVIDED BY THE AUTHORISED OFFEROR AT THE TIME OF SUCH OFFER. NONE OF THE ISSUER, THE GUARANTOR OR, FOR THE AVOIDANCE OF DOUBT, ANY DEALER HAS ANY RESPONSIBILITY OR LIABILITY TO AN INVESTOR IN RESPECT OF THE INFORMATION DESCRIBED ABOVE.

AN INVESTOR INTENDING TO PURCHASE OR PURCHASING ANY SECURITIES IN A NON-EXEMPT OFFER FROM AN AUTHORISED OFFEROR SHOULD BE AWARE THAT INFORMATION ON THE TERMS AND CONDITIONS OF THE NON-EXEMPT OFFER BY ANY AUTHORISED OFFEROR SHALL BE PROVIDED AT THE TIME OF THE NON-EXEMPT OFFER BY SUCH AUTHORISED OFFEROR. ANY AUTHORISED OFFEROR USING THIS BASE PROSPECTUS FOR THE SECURITIES CONCERNED FOR THE PURPOSE OF ANY OFFERING MUST STATE ON ITS WEBSITE THAT IT USES THIS BASE PROSPECTUS IN ACCORDANCE WITH THE CONSENT GIVEN AND THE CONDITIONS ATTACHED THERETO.

Non-Exempt Offers: Issue Price and Offer Price

Securities to be offered pursuant to a Non-Exempt Offer will be issued by the Issuer at the Issue Price specified in the applicable Final Terms. The Issue Price will be determined by the Issuer in consultation with the relevant Dealer at the time of the relevant Non-Exempt Offer and will depend, amongst other things, on prevailing market conditions at that time. The offer price at which the Authorised Offeror will offer such Securities to the Investor will be the Issue Price or (where agreed with the relevant Dealer) such other price as may be agreed between an Investor and the Authorised Offeror making the offer of the Securities to such Investor. Neither the Issuer nor the Guarantor will be party to arrangements between an Investor and an Authorised Offeror, and the Investor will need to look to the relevant Authorised Offeror to confirm the price at which such Authorised Offeror is offering the Securities to such Investor.

S&P Global

An obligor rated "A" has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories.

An S&P Global negative outlook means that a rating may be lowered. (Source: https://www.standardandpoors.com/en_US/web/guest/article/-/view/sourceId/504352)

Moody's

Obligations rated "A" are considered upper-medium-grade and are subject to low credit risk. (Source: https://www.moodys.com/Pages/amr002002.aspx?stop_mobi=yes)

Fitch

"A" ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings. Provisions have been made for the Securities, in such a case, to be represented by definitive Securities (see "*Form of Securities*"). The procedures agreed and described in the Agency Agreement dated July 1, 2021 (the "**Agency Agreement**") may, in the future, be amended to comply with Spanish tax law and regulations and operational procedures of the European Clearing Systems.
