Cash flow before capital changes	230.6	130.6	77%
Capital expenditure	93.4	43.4	115%
Order intake <sup>2)</sup>	1,566.3	1,216.1	29%
Order backlog <sup>2)</sup>	764.2	464.1	65%
Employees	13,864	11,894	17%

In accordance with IAS 1 – Presentation of Financial Statements (revised 2003), this item now also includes minority interest. Prior year data was adjusted accordingly.
 For the production companies

The BÖHLER-UDDEHOLM Group continued its stable growth into the third quarter of 2005 with a substantial improvement over the comparable period of the previous year. The third quarter was characterized by generally high demand on nearly all niche markets and the seasonal effect of the summer months remained almost unnoticed. The increase in sales and earnings also reflects the unchanged high price levels for raw materials (scrap and alloys). Results for the reporting period also include the initial consolidation of Edelstahlwerke Buderus AG for one quarter, which provided additional support for the development of business.

Order intake for the BÖHLER-UDDEHOLM Group rose from 1,216.1 m€ by 29% to a new record mark of 1,566.3 m€ for the first nine months of 2005. Order backlog totalled 764.2 m€ as of 30 September 2005, which represents an increase of 65% over the comparable prior year value of 464.1 m€.

Sales recorded by the BÖHLER-UDDEHOLM Group increased from 1,411.4 m€ by 34% to 1,899.3 m€ for the first nine months of 2005. The largest share of sales was generated in the markets of the European Union at 58%, followed by America at 23%, Asia at 12% and other markets at 7%.

Earnings before interest and tax (EBIT) rose from 134.3 m€ by 80% to 241.8 m€. The EBIT margin improved from 9.5% to 12.8%, which is the highest margin recorded by the воньегирреноым Group to date.

Earnings before tax (EBT) increased from 110.3 m€ by 100% to 221.1 m€. The tax rate for the BÖHLER-UDDEHOLM Group equalled 28% for the first nine months of 2005, versus 35% for the comparable period of 2004. Net income rose to 159.2 m€ for the first three quarters, which represents a significant improvement of 122% over the comparable prior year value of 71.7 m€.

During the first three quarters of 2005, the Group invested 93.4 m€ compared to 43.4 m€ in the comparable prior year period. Increased investment activity and the addition of investments at Buderus will bring capital expenditure for 2005 to a total of 120 m€ to 130 m€. As of 30 September 2005 BÖHLER-UDDEHOLM employed a workforce of 13,864, versus 11,894 in 2004. This plus of 17% was triggered primarily by the acquisition of Edelstahlwerke Buderus AG.

Together with its sales organisation Edelstahlwerke Buderus AG recorded consolidated sales of 129.4 m€ and earnings before interest and tax (EBIT) of 12.2 m€ in the third quarter 2005.

#### **OVERVIEW OF CORE BUSINESSES.**

The High Performance Metals Division confirmed the steady upward trend that started in early 2005 with a strong third quarter. Demand increased above all on Asian markets, and especially in China and Japan. North America and a number of European countries such as Germany, Italy, Switzerland and Sweden also reported rising demand for specialty steels and materials. The level of demand remained sound in South America, but the increasing strength of the Brazilian Real made exports from Brazil to the USA and the European Union more difficult. Sales growth in the individual product segments was generated chiefly by special steels for the energy technology, aircraft construction and oil field technology sectors as well as by valve steels for automobile producers. In contrast, sales volumes of tool steel and high-speed steels weakened somewhat during the third quarter because of lower orders during the summer months. The acquisition of Edelstahlwerke Buderus AG substantially increased the range of special engineering steels for niche applications in the division. Buderus has also noticeably strengthened the division's activities in the segment of plastic moulding steels. In total, the High Performance Metals

Division closed the first nine months of 2005 with solid growth in sales, earnings and order intake.

The Welding Consumables Division continued its growth course during the third quarter of 2005. Concentration on the most demanding customer segments led to a steady improvement in the product mix, and had a positive impact on sales and profitability. Sales volumes increased not only in Europe and America, but also in Asia and especially in China, India and South Korea. Higher demand for mediumalloyed welding consumables was recorded primarily in the area of power plant construction as well as in the chemical and petrochemical sectors. In addition, the demand for high-alloyed welding materials increased in the automobile, steel, machinery and plant construction and LNG tank sectors. During the third quarter the division received one of its largest single orders for the construction of LNG tanks from Korea. For the first nine months of 2005 sales, earnings and order intake increased considerably over the comparable prior year period. The closing of the Avesta Welding AB takeover in October 2005 will strengthen the division, especially in the stainless welding seament.

The Precision Strip Division reported an increase in sales volumes for the third quarter of 2005, while prices remained unchanged at a high level. Since this division records approximately 30% of its sales in the US Dollar region, the slight weakness of the Euro versus the US Dollar had a positive effect during the third quarter. Sales volumes increased significantly, above all on European markets, but momentum also rose markedly in America and Asia. Of special note is the high demand by the wood processing industry for band saw steel and by automobile producers for very thin special cold-rolled strips. Declines were recorded only in rule die steels for the leather industry. The Precision Strip Division increased sales, earnings and order intake for the first nine months of 2005. The acquisition of Edelstahlwerke Buderus AG gives the вöнLer-uddeноLм Group a complete chain for the production of strip steel, ranging from melting to hot- and cold-rolled strip to final products. This represents not only a decisive competitive advantage, but also creates an opportunity to further optimize the quality of niche products in this division.

The Special Forgings Division also reported satisfactory development during the third quarter of 2005. Demand from the aircraft industry stabilized at a high level and remained the primary driver for business in this segment. However, strikes at Boeing in September had an impact because they stopped deliveries to this aircraft producer for a number of days. The demand for forged turbine blades showed good development, in particular due to the construction of power plants in China and overall increased replacement orders by the energy sector. The acquisition of Edelstahlwerke Buderus AG has made component forging for the utility vehicle industry an important area of business in this division. The Special Forgings Division was able to improve sales, earnings and order intake during the reporting period, but rising raw material prices increased pressure on margins. The construction of a second forging press at the Kapfenberg plant is proceeding on schedule, and operations are expected to start in the first quarter 2007.

#### **OUTLOOK ON THE 2005 BUSINESS YEAR.**

The management of вöhler-uddendmag expects the operating environment for specialty steel and materials to remain positive during the last three months of this business year. The Management Board is therefore optimistic that the Group will be able to reach its goals for 2005, which call for an increase in sales to roughly 2,500 m€ and EBIT of about 280 m€. вöhler-uddendmalso plans to continue its shareholder-friendly dividend policy with a payout ratio of 40% to 50%.

Measures to integrate Edelstahlwerke Buderus AG are proceeding as planned, and the most important steps should be completed by the end of 2005. The goal is to strengthen the High Performance Metals, Precision Strip and Special Forgings Divisions on a lasting basis by allocating the related Buderus activities. The Welding Consumables Division will also start work on the integration of Avesta Welding before the end of this year, so all four divisions of the вöhler-uddendm Group will be able to develop their markets with an extended and wider range of products in 2006.
