Shareholders' Letter Result 3rd Quarter 2005

Profit Situation

Sales proceeds total TEUR 1,757 within Q3 2005 (comparison period 2004: TEUR 5,111). As in the first 6 months 2005 these are mainly generated from the sales of titles already published in 2004 (back catalogue). In this Industry the months of July and August show traditionally small turnover. Thus sales of Q3 are mostly generated in September.

Titles of the planned line-up 2005/2006, for which new distribution agreements were closed within the past months and which will be released during Q4 2005 respectively during the first quarters of 2006, are therefore not included in the results of cumulated Q3 2005.

Compared to the comparison period the reduced turnover is mainly the result of the fact that a total of 8 titles was published and sold within Q3 2004.

2005 saw the introduction of the matching principle depreciation method for games titles. The values of the titles published in 2004 were entered on a loss-free basis and then depreciated on a quarterly basis. For better transparency the depreciation of game titles are separately shown. We now have a total gross profit before and after depreciation of the game titles.

The gross profit before depreciation of the game titles is TEUR 1,233 (comparison period 2004: TEUR 3,810). The gross margin of Q3 2005 of 70 % is only slightly lower than within the comparison period of 2004 (75 %).

The depreciation of game titles dependent on turnover totals TEUR 249 (comparison period 2004: TEUR 1,300) in Q3 2005. The low depreciation within Q3 2005 is a result of the fact that mostly already depreciated back catalogue titles were sold.

The gross profit after depreciation of the game titles is TEUR 985 (comparison period 2004: TEUR 2,510). The gross margin of 56 % is higher than in the comparison period of 2004 (49 %).

Within the sales and management costs the realised reduction of the cost structure during Q3 2005 is now apparent for the first time. The total of the cost reductions will be fully effective in Q4 2005. The further reduction of sales and management costs within Q3 2005 (TEUR 1,147) compared to the comparison period of 2004 (TEUR 2,307) is principally generated by the cost reductions within personnel in the course of the final consolidation of the German subsidiaries Neon and Massive. As of September 30, 2005, the cumulated sales and management costs thus could be reduced from TEUR 5,987 to TEUR 4,758, compared to the expenses of the comparison period of 2004.

The sales results of back catalogue titles during Q3 2005 as well as the strict reduction of sales, management and other costs show a positive EBIT before restructuring of TEUR 85 (comparison period 2004: TEUR 184). The EBIT expressed in percentage of the turnover could be increased to 5 % (comparison period 2004: 4 %).

Within restructuring and extraordinary expenses of total TEUR 16,594, the positions that are not directly connected to the operative business of 2005 are listed. These are expenses which became necessary due to the renewed restructuring of the company as well as expenses which concern events of 2004 but became evident only during 2005.

For the sake of caution and due to the latest developments the game title "Stargate SG-1TM: The Alliance" was completely depreciated. In order to avoid further loss of cash to subsidiaries, the German development studios Massive and Neon were sold and finally consolidated. The closing of the German Studio Wings is in progress and will be completed in Q4 2005. In Q3 a total of TEUR 5,605 had therefore to be considered within expenses, TEUR 5,536 of which for the depreciation of the game "Stargate SG-1TM: The Alliance".

The main positions comprise value adjustments of accounts receivable (TEUR 210), closing respectively final consolidation of studios and the connected stop of game developments (TEUR 2,340), discontinuation of game developments due to unprofitability (TEUR 921), loss-free evaluation without "Stargate SG-1TM: The Alliance" (TEUR 4,489), value adjustment game title "Stargate SG-1TM: The Alliance" (TEUR 6,196), price credits for deliveries out of 2004 due to lack of usability in the retail market (TEUR 2,308) and other restructuring expenses (TEUR 130).

For the sake of caution a further depreciation of deferred taxes was effected in Q3 2005. Because of the positive results of the going concern prognosis the tax savings of the coming years were calculated and the difference was depreciated (TEUR 2,440). These expenses are not cash relevant.

The reduced EBITDA and EBITA margin compared to the comparison period 2004 are a result of the above mentioned changes of the depreciation method, the reduced turnover, the restructuring expenses and the value adjustment of the deferred taxes.

The number of employees is lower compared to Q3 2004 and totals 54 as of September 30, 2005, 4 of which are freelancers (comparison period 2004: 189 including 49 freelancers). The main reason for this reduction is the closing of development studios for economic considerations, the outsourcing of the QA-department and reductions within administration.

Asset situation

The active deferred taxes mainly result from the accumulated deficit of the critical year 2002. Due to the change of the corporate income tax rate from 34 % to 25 %, parts of these were reduced by extraordinary depreciations in 2003 and 2004. As mentioned above in profit situation a further value adjustment was made, leading to an asset value of TEUR 1,551 as of September 30, 2005. This value corresponds to the expected tax savings in the coming years which have been calculated on a basis of the positive results of the going concern prognosis.

The reduction of the semi-finished and finished goods compared to the year end 2004 by TEUR 11,365 as well as compared to the comparison period by TEUR 19,872 to TEUR 5,503 is caused by the depreciation method now applied, necessary discontinuation of the unprofitable product developments, the consideration of loss- free evaluations, the value adjustment of the game title "Stargate SG-1TM: The Alliance" and the increased balancing of advances. The reduction in the position goods concerns mainly titles of the back catalogue.

The considerable reduction in the receivables from supplies and services totalling approximately TEUR 8,750 compared to the year end 2004 is due both to an above-average deadline-related receivables situation at the year end 2004 as well as to the set-off against reserves and liabilities. Considerable price credits for games deliveries in 2004 also had to be issued.

The reduction of other accounts receivable is also explained with the payment of granted subsidies, the new structuring of accounts receivable under the position receivables from supplies and services and the setting up of creditory allocation accounts.

The high losses result in a negative equity of TEUR 7,212 as of September 30, 2005. Negotiations with creditors concerning the correction of the balance sheet structure and improvement of the liquidity situation are ongoing. Furthermore JoWooD negotiates with investors who shall participate in the company and strengthen the equity basis. These negotiations are under the assumption that no mandatory offer according to the Austrian take-over law will be caused by the participation of an investor. The management acts on the assumption of a positive going concern prognosis.

The long-term debts to banks were further reduced by financing agreements, whereas the short-term financial liabilities increased.

The increase in the liabilities from supplies and services compared to the year end 2004 is the result of a conversion of accruals into liabilities and the disclosure of incoming debtors as liabilities.

The increase in advances compared to year end 2004 is due to payments from contracts with new customers as well as with co-publishing partners. A total of TEUR 4,608 was set off from the inventory.

The decrease of other liabilities and deferred income is essentially the result of the repayment of a supplier credit.

Financial situation

The cumulated operative cash flow as of September 30, 2005 (TEUR -544) remained almost unchanged compared to the first half year 2005. (TEUR -523). The operative cash flow of Q3 2005 is therefore almost balanced. So the positive development compared to the comparison period of last year is ongoing. The cumulative operative cash flow in the comparison period 2004 was TEUR -17,284. During the nine-month-period ending September 30, 2005 the company thus managed to almost completely finance its activities without third party funds, although the overall conditions (reduced turnover, high restructuring expenses) were very unfavourable.

The payments of investments of TEUR 119 are within usual bounds and due to the closing of studios significantly lower than in the comparison period of 2004 (TEUR 473).

The financing cash flow of TEUR 411 comprises repayments of long-term financial liabilities and the taking of short-term cash.
