#### MANAGEMENT REPORT

#### Market environment

Global economic development in 2013 was affected by weak business activity in the industrialised countries. The eurozone remained in a state of recession throughout the first half of the year and was recovering only slowly from mid-2013 on, while the US economy was picking up consistently over the year. In the emerging markets a positive development started to show at least at the beginning of the year, but lost its momentum during the second half of 2013. Projected growth rates of some emerging markets had to be revised, primarily of China.

According to current estimates of the International Monetary Fund (IMF) global economic growth (GDP) in 2013 was 3.0%, following 3.1% in 2012. Despite revised forecasts, the largest part of global growth in 2013 of 4.7% was observed in the emerging markets (4.9% in 2012). By contrast, economic growth in the industrialised nations went up by a mere 1.3%, following 1.4% in the year before.<sup>1</sup>

However, while economic development in the industrialised nations was dissatisfying, global demand for oil and gas remained strong.

According to the International Energy Agency (IEA), average global oil consumption in full 2013 was 91.3 million barrels per day (following 90.0 mb/d in 2012).<sup>2</sup> Year-on-year, this represented an increase of 1.3 mb/d, or 1.4%. As in the years before, constantly rising global demand for oil was driven by the emerging markets. Average oil consumption in non-OECD countries in 2013 was 45.2 mb/d, up 1.2 mb/d from the year before. Due to the slowdown in economic growth seen in the emerging markets, oil demand in non-OECD countries in 2013 went up by 2.7% (following 3.7%), at a somewhat decelerated rate than seen before. The oil demand of approximately 46.1 mb/d observed in OECD countries remained almost the same as in the preceding year.

The rig count<sup>3</sup>, the number of globally operating drilling rigs, was slightly declining from the high level in 2013. Following an average of 3518 active rigs in 2012, the average global rig count in 2013 was 3412 units, representing a decrease by 3.0% year-on-year. This was mainly due to a decline by 13.2% of gas wells in the US, whereas the number of oil wells in the US grew by 4.1%. As a result - and because of the rising efficiency in the drilling process - the US oil production rate went up by 12.4%<sup>4</sup>.

The international rig count (worldwide excluding North America) climbed up to 1296 units, up 5.0%.

<sup>&</sup>lt;sup>2</sup> International Energy Agency (IEA), Oil Market Report, February 2014

<sup>&</sup>lt;sup>3</sup> Baker Hughes Inc.

<sup>&</sup>lt;sup>4</sup> International Energy Agency (IEA), Oil Market Report, February 2014

# "Undiminished demand for oil and gas created a stable environment for the oilfield service industry."

Compared to the previous year, global spending for exploration and production rose by around 11% to total USD 682 billion in 2013.<sup>5</sup>

European crude Brent started into 2013 at a price<sup>6</sup> of USD 112.98 per barrel and climbed to its annual high of USD 118.90 (8 February 2013) in the first quarter. Subsequently, the price of Brent crude was falling to reach its annual low of USD 96.84 per barrel on 17 April 2013. By the end of the year Brent had picked up again and arrived at a price of USD 109.95 on 31 December 2013. Year-on-year, the price of one barrel of Brent crude decreased slightly by 2.7%.

The price of US crude WTI started at USD 93.14 per barrel at the beginning of the year and, like Brent, fell to its annual low of USD 86.65 on 17 April 2013. After that, the US brand started to pick up again and reached its annual high of USD 110.62 per barrel on 6 September 2013. On 31 December 2013 the price of one barrel of WTI crude stood at USD 98.17, marking an increase of 5.4% over the year.

As in the years before, the price of US grade WTI was lower than that of European crude Brent in 2013. The price difference diminished during 2013, from around USD 20.00 at the beginning of the year to sometimes less than USD 5.00 in July and August. This was due, experts say, to the improved logistics and transportation system for producing and distributing US crude and low OPEC supplies in the second quarter of 2013 in the wake of political unrest in the Middle East. The rising political risk was also responsible for the price increases observed for both crude grades in the third quarter. The price difference between Brent and WTI was widening again towards the end of the year and stabilised at approximately USD 12.00.

## **Business development**

In fiscal 2013, Schoeller-Bleckmann Oilfield Equipment AG recorded sound business development and continued high profitability. Customers' overordering of high-precision drillstring components still in fiscal 2012 resulted in inventory build-up and declining bookings for SBO in 2013.

As a result, SBO's sales and profit figures declined in 2013 from the record performance in 2012.

Bookings received in fiscal 2013 arrived at MEUR 425.9 (following MEUR 471.4 in the year before). While high inventories kept SBO's bookings low mainly in the first half of the year, orders for high-precision components gradually went up again from the first to the third quarter of 2013, as customers were drawing

<sup>&</sup>lt;sup>5</sup> Barclays Global 2014 E&P Spending Outlook, December 2013

<sup>&</sup>lt;sup>6</sup> U.S. Energy Information Administration, Spot Prices for Crude Oil

"High customer inventories sometimes had a curbing effect on bookings. However, profit margins were kept high due to production capacity adjustments."

down their inventories as expected. In the fourth quarter, customers were cautious in placing new orders as is typical of the season ending the year.

By contrast, the product group of downhole tools, oilfield equipment and services recorded continuous strong demand and encouraging growth compared to the previous year.

At year-end 2013, SBO posted an order backlog of MEUR 111.5 (following MEUR 149.8 at the end of 2012) primarily for the product group of high-precision components, whereas SBO customers preferred short-term planning regarding all other product groups. As the drilling motor and downhole circulation tools business is operated on a leasing basis, it is not listed as order backlog.

SBO adjusted production capacities to the order situation for high-precision components over the year. Although the order situation resulted in lower capacity utilisation and fixed cost coverage, profit margins were kept at above-average levels.

Compared to the previous years, UK-based production companies developed favourably. The new production subsidiary located in Singapore (Knust-SBO Far East) has gained a sound strategic position and covered growing local demand in the Asian region as planned. Equally positive was business development of SBO's production company in Vietnam where growth was continued.

SBO's drilling motor subsidiary BICO and downhole tools company DSI gained market shares in 2013, such as by concluding a two-year framework contract with Brazilian gas and oil company Petrobras for delivering DSI downhole tools worth USD 15 mill. In this respect, the business segments of SBO benefited from the sustained strong drilling activity around the globe. Both BICO high-performance motors and DSI downhole tools gained more and more ground against competitor products for shale gas and shale oil drilling as well as highly challenging offshore drilling operations.

Business development of SBO's globally operating Service & Supply shops profited from the current tendency to overhaul oilfield tools after a certain period of use, as observed in 2013. This product and service group posted encouraging business results, with business in the shops located in Russia and Singapore delivering particularly strong results.

## Capital expenditure

With its long-term capex programme SBO makes sure to fully meet constantly rising customer requirements. The company's state-of-the-art production equipment and streamlined production capacities help to safeguard SBO's market position over the long term.

This is the background against which SBO is making its largest investment at the moment to expand the production site in Ternitz/Austria. Stage 1 of this multi-year investment project will go on stream as planned in January 2014. Total expenses (including stage 2) amount to MEUR 54. During the first project stage, machines and production units will be relocated to optimise material flows at the Ternitz site. Another stage will be dedicated to installing additional production capacities at the Ternitz site.

Owing to the sustained strong market acceptance of SBO downhole tools this segment was the second capex focus in 2013, as the drilling motor fleet of the BICO subsidiary and the downhole circulation tools fleet of the DSI subsidiary were extended.

Total capital additions to fixed assets in fiscal 2013 amounted to MEUR 62.6 (following MEUR 53.1 in the year before) and were financed, as in the previous years, almost exclusively from the company's cash-flow. Total purchase commitments for expenditure in property, plant and equipment as at the end of 2013 were MEUR 7.3 (following MEUR 12.9 at year-end 2012).

## Research and development

At Schoeller-Bleckmann Oilfield Equipment AG, research and development activities have been integrated in its operations for many years, a system that ensures market and customer-oriented R&D activities.

In fiscal 2013 new materials were developed for the high-precision components product group and successfully launched in the market. Additionally, a large number of prototypes were developed in cooperation with SBO customers and built using new and innovative production methods. Moreover, the e-beam welding process will be introduced gradually in fiscal 2014.

In the area of downhole tools the focus of R&D activities was on further developing and optimising BICO drilling motors and designing new tools. In 2013 several fields tests were conducted to obtain findings that will support development of the new Exoko drilling motor technology.

## Risk report

Concerning the risks of the business model of Schoeller-Bleckmann Oilfield Equipment AG we refer to Note 32 of the Consolidated Financial Statements. Concerning the use of Financial Instruments we refer to note 31 of the Consolidated Financial Statements.

#### Outlook

Contrary to the tendency observed in recent years, forecasts for global economic development were generally optimistic at the beginning of 2014. The International Monetary Fund (IMF)<sup>7</sup> expects average global growth in 2014 to arrive at 3.7% (following 3.0% in 2013 and 3.1% in 2012). Emerging markets and developing countries should grow by 5.1% in 2014 (following 4.7% in 2013 and 4.9% in 2012). With expected growth rates of 7.5% and 5.4%, respectively, China and India will remain the driving forces behind the global economy. Growth expectations for the industrialised nations, according to the IMF, stand at 2.2%, following 1.3% in 2013 and 1.4% in 2012, indicating moderate economic recovery for the industrialised countries as well.

Global economic development as predicted above should have an effect on global energy consumption, which will again be influenced substantially by the sustained high level of growth in the emerging markets. According to estimates of the International Energy Agency (IEA)<sup>8</sup> average global oil consumption in non-OECD countries in 2014 is set to go up by 1.4 million barrels per day, or 3.0%, to total 46.6 mb/d. In the OECD countries, however, the IEA expects the slight decline in oil demand that has continued over many years to come to 0.1 mb/d, or 0.1%, in 2014 (46.0 mb/d, following 46.1 mb/d in 2013). Global oil demand in 2014, as projected by the IEA, should come to 92.6 million barrels per day, up by 1.3 mb/d, or 1.4%, year-on-year (2013: 91.3 mb/d).

<sup>&</sup>lt;sup>7</sup> International Montetary Fund (IMF), World Economic Outlook, January 2014

<sup>&</sup>lt;sup>8</sup> International Energy Agency (IEA), Oil Market Report, February 2014

"Constantly growing demand for energy calls for developing further oil and gas reservoirs using increasingly complex technologies. This is why it is safe to assume that growth rates in the oilfield service industry will remain attractive."

Market analysts anticipate a sound market environment for the oilfield service industry in 20149 with spending for exploration and production (E&P) increasing by 6.1%, from USD 682 billion in 2013 to USD 723 billion. What has to be emphasised here is the anticipated rise of spending in the US by around 8%, following zero growth in 2013. Such assumptions are supported by the current oil price development. With oil prices exceeding the 90 USD threshold, even highly complex and technologically challenging oil drilling projects are attractive in economic terms. Following a marked slump of the gas price in the US caused by the shale gas boom, the price also recovered from its lows in 2012 (annual low 1.82 USD/MBtu on 20 April 2012) and went up again to 4.31 USD/MBtu (million british thermal unit) (as at 31 December 2013).<sup>10</sup>

SBO is well positioned to participate in the growth in E&P spending in North America, the Middle East, Latin America, and Russia. Also, in the next years a rising number of offshore rigs will go on stream, and a series of new and extensive drilling projects have been approved. As a result, growth in technologically extremely demanding offshore drilling operations will be a key driver for the future development of SBO.

However, constantly rising E&P costs over many years with stable oil prices are a challenge to the entire value chain that might ultimately impact all decisions on spending.

<sup>9</sup> Barclays Global 2014 E&P Spending Outlook, December 2013

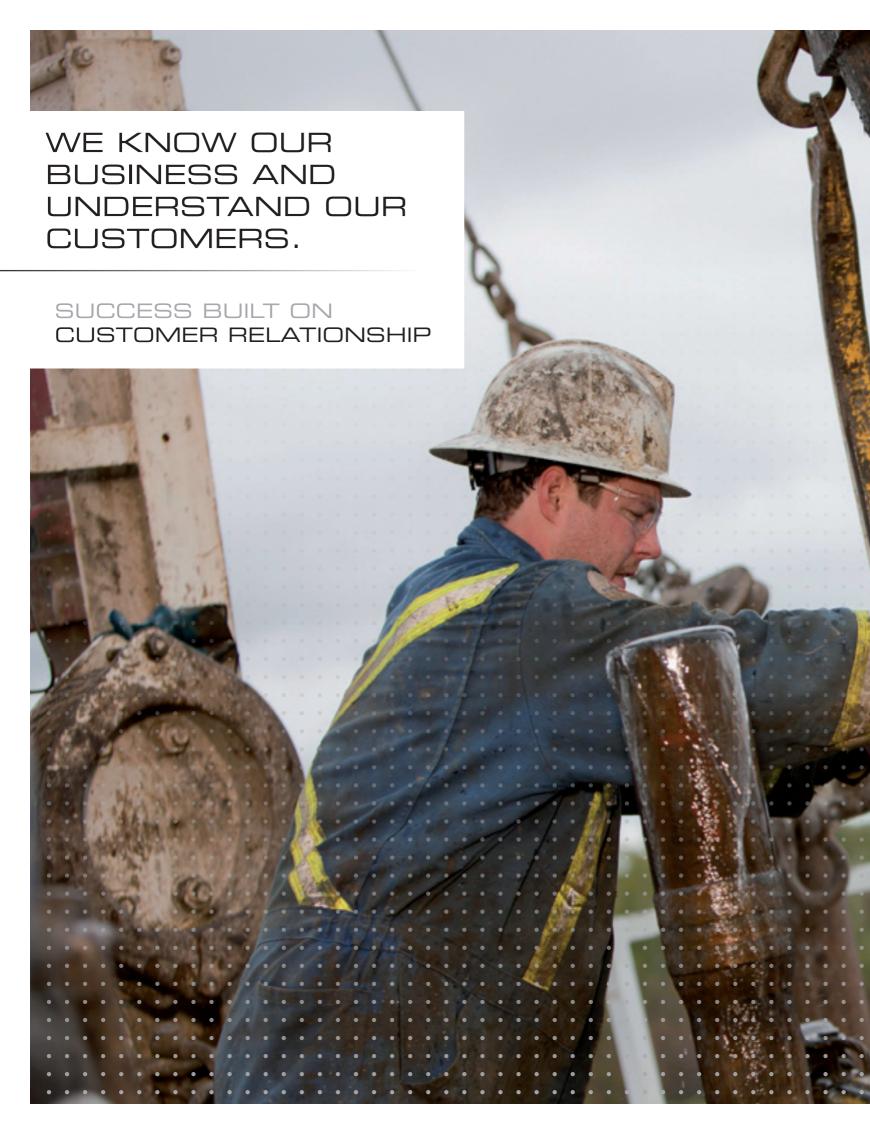

<sup>&</sup>lt;sup>10</sup> U.S. Energy Information Administration (EIA), Henry Hub Natural Gas Spot Price

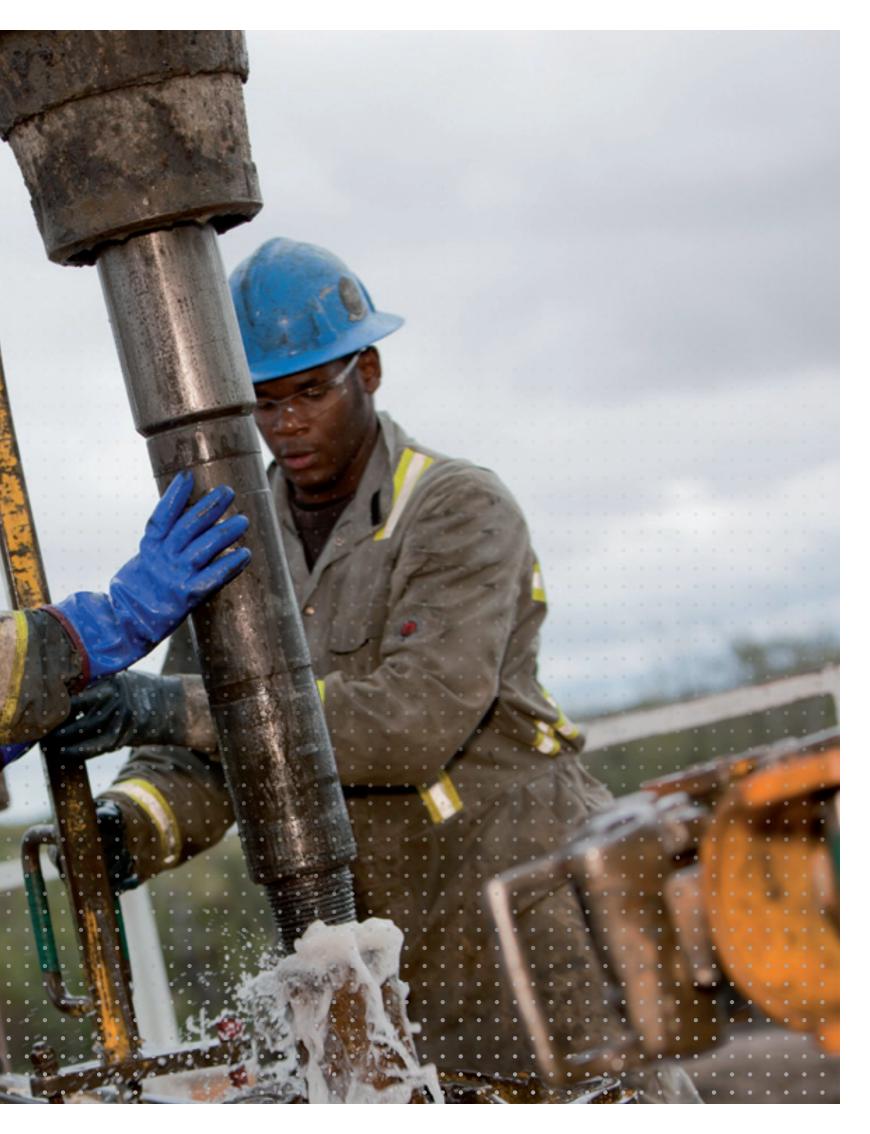

Constantly rising use of high-tech equipment is required to develop new conventional and unconventional oil and gas reserves. On the one hand, this is a consequence of the rising depletion rate of already developed reservoirs (average depletion rates climbed from 5.1% in 2008 to 6.2% in 2013)11 and, on the other hand, of growing demand in the global energy market. It is therefore safe to assume that growth rates in the oilfield service industry will remain attractive.

As the global market leader in high-precision components, SBO has established itself firmly in the growth segment of directional drilling for many years. Directional drilling is applied in all offshore activities and increasingly used in onshore operations as well. Additionally, it is used to drill horizontal wells required for tapping into shale oil and gas reservoirs. In the wide growth field of downhole tools SBO today is a globally active niche player offering high-tech products that are in strong demand in the market for challenging drilling projects.

Apart from its leading-edge technological expertise it is the economic strength of SBO combined with minimum debt and high cash-flow that provides a sound foundation for further growth. In the process, SBO will continue its tried and tested approach and further broaden its business base through organic growth, introduction of new products and technologies as well as acquisition of companies.

<sup>&</sup>lt;sup>11</sup> International Energy Agency (IEA), WEO 2013.

## Analysis and Results

The consolidated financial statements of the company have been prepared in accordance with the International Financial Reporting Standards (IFRS), formerly International Accounting Standards (IAS). No changes were made in the business of the SBO group.

Certain amounts reported in the prior year financial statements have been reclassified to harmonise them with the presentation in this fiscal year. Such reclassifications are of minor importance to the presentation.

Following the 2012 record year generating sales worth MEUR 512.1, sales went down by 10.5% to MEUR 458.6 in 2013. This was due to weaker bookings received for high-precision components since the second half of 2012.

In fiscal 2013 the development of the US dollar exchange rate also had negative effects. The average exchange rate in 2013 was 1 Euro = USD 1.3282, compared to 1 Euro = USD 1.2856 in 2012, which had a negative influence of around MEUR 12.0 on sales.

EXCHANGE RATE		High	Low	Average	Closing
in EUR/USD					
	2013	1.3814	1.2768	1.3282	1.3791
	2012	1.3454	1.2089	1.2856	1.3194

As in the years before, the US dollar continues to be the most important currency by far for the SBO group. In 2013, just under 80% (following 80% in 2012) of total sales and revenues were generated in US dollars, while, as before, around 50% of expenses were also incurred in US dollars.

The average rates for the years ended 31 December 2012 and 31 December 2013 were used by the company in the preparation of the consolidated profit and loss statements, whereas the closing rates for the years 2012 and 2013 were used in the preparation of the consolidated balance sheets.

SALES BY REGIO	DN	2013	2012
in MEUR	North America	284.8	343.7
	Europe	227.6	262.7
	Others	62.3	56.3
	<ul> <li>Intercompany Sales</li> </ul>	-116.1	-150.6
	Total Sales	458.6	512.1

The table above shows sales by regions of origin.

North America, accounting for 59% (2012: 60%) of sales, continues to be the largest market for the company, since all major customers of SBO, i.e. integrated service companies, are located in the United States. However, as those companies increasingly use their international branch offices for procurement, in particular in Europe and the Far East, those sales markets are becoming more and more important for SBO. Apart from that, the products of the SBO group are used all over the world.

SALES B	Y PRODUCTS	2013	2012
in MEUR	High-Precision Components	237.0	283.4
	Downhole tools, oilfield supplies and service	221.6	228.7
	Total Sales	458.6	512.1

In the business segment of high-precision components, sales went down by 16.4%, from MEUR 283.4 in 2012 to MEUR 237.0, mainly due to inventory reductions at SBO customers. This segment essentially comprises MWD/LWD collars, MWD/LWD internals and high-precision parts.

Sales in the segment of downhole tools, oilfield supplies and services, consisting of product groups drilling motors, circulation tools, non-magnetic drill collars and material as well as service and repair activities, were kept at almost the same level as reported in the previous year.

In 2013, gross profit amounted to MEUR 145.2, from MEUR 170.6 in the year before. The gross margin was 31.7%, following 33.3% in 2012.

The gross margin was kept at a high level despite weaker sales, which is the result of systematic monitoring and steering of costs in all sectors. The price level remained largely unchanged compared to the previous year.

The main elements of production costs are material and energy expenses, personnel expenses and depreciation on fixed assets.

Selling and administrative expenses, in absolute figures, decreased from MEUR 47.0 in 2012 to MEUR 43.6 in 2013. Due to the decline in sales, they accounted for 9.5% of sales in 2013, compared to 9.2% in 2012.

Selling and administrative expenses consist mainly of salary and salary-related expenses, professional fees for operational activities, travel and entertainment costs, communication and insurance expenses as well as expenses for due diligence procedures and mergers.

Other operating expenses amounted to MEUR 13.8 in 2013 (2012: MEUR 15.6). This item contains primarily exchange losses that were offset by almost the same level of exchange gains in other operating income, and R & D costs incurred for the segment of downhole tools, oilfield supplies and services, the latter arriving at MEUR 5.6, following MEUR 3.7 in 2012.

Other operating income in 2013 was MEUR 9.9 (2012: MEUR 15.3). The major item covered here are exchange gains. Further operating income consists of rental income, service charges and income from the sale of fixed assets.

#### IMPAIRMENT OF INTANGIBLE ASSETS

In fiscal 2013, an impairment of MEUR 7.5 (2012: MEUR 2.2) on technology acquired was recorded. The impairment was due to delays in the technological development.

Income from operations was MEUR 90.2 (19.7% of sales), compared to MEUR 121.2 (23.7% of sales) in the year before. This development is mainly due to the decrease in gross profit as a result of declining sales and impairments as shown above.

In 2013, the financial result arrived at MEUR -6.3, after MEUR -10.1 in 2012. Net interest expenses were MEUR -13.7 (2012: MEUR -10.6). Also included as net interest expenses are minority interests in subsidiaries held by the respective managements.

Moreover, the financial result includes other financial income amounting to MEUR 8.3 (2012: MEUR 3.0), referring mainly to gains from the valuation of a bond obligation from puttable non-controlling interests as well as the valuation of contingent purchase price obligations from company acquisitions.

Furthermore, financial expenses amounting to MEUR 0.9 (2012: MEUR 2.5) are recognised under this item. Such expenses relate to the increase of the contingent purchase price of DSI recognised as expense. The purchase price was increased because business developed better than expected at the time of acquisition.

Income after tax for 2013 was MEUR 61.3, following MEUR 76.9 in the year before.

Earnings per share arrived at EUR 3.81, following EUR 4.80 in 2012.

The Executive Board proposes to the Annual General Meeting to pay to the shareholders a dividend of EUR 1.50 per share (basic dividend and bonus) for 2013, resulting in a total distribution of MEUR 24.0 to the shareholders.

#### ASSETS AND FINANCIAL POSITION

Shareholders' equity as of 31 December 2013 was MEUR 382.2, following MEUR 363.1 as of 31 December 2012. The equity ratio arrived at 54.4%, compared to 52.0% in the year before. Net debt as of 31 December 2013 was MEUR 16.6, which is MEUR 17.7 less than as of 31 December 2012. The gearing ratio (net debt in percent of shareholders' equity) was 4.3% as of 31 December 2013, following 9.5% in the year before.

Cash-flow from operating activities arrived at MEUR 110.4 in 2013, following MEUR 118.4 in 2012. The main elements contributing to this key figure were income after tax amounting to MEUR 61.3 (2012: MEUR 76.9) and depreciation and impairment amounting to MEUR 46.3 (2012: MEUR 39.6).

In the wake of weaker business development the net working capital of MEUR 145.7 as of 31 December 2012 fell to MEUR 135.7 as of 31 December 2013. This decline is mainly due to the substantial reduction of inventories (primarily unfinished products), increasing the cash-flow from operating activities compared to the previous year, despite lower income after tax, from MEUR 102.7 to MEUR 109.5.

Net cash outflow from investing activities totalled MEUR 58.7 (2012: MEUR 69.5). Additions to fixed assets were MEUR 62.6 (2012: MEUR 53.1), of which MEUR 14.4 were spent for production facilities mainly in Austria and Vietnam, and MEUR 19.2 for machines and equipment mainly in Austria, the United Stated and the UK, and MEUR 13.6 for further expanding the downhole tools rental fleet.

## Report on the main features of the internal control system and risk management system in relation to the financial reporting process

The Executive Board has overall responsibility for the risk management of the SBO group, whereas direct responsibility lies with the managing directors of the operating entities.

Consequently, the system of internal continuous reporting to corporate headquarters plays a particularly important role in identifying risks at an early stage and implementing counter-measures. Operating subsidiaries provide the necessary performance information by timely monthly reporting to the Executive Board.

The group has defined uniform standards for all global subsidiaries regarding implementation and documentation of the complete internal control system and, in particular, the financial reporting process. The underlying objective is to avoid risks leading to incomplete or erroneous financial reporting.

Furthermore, internal reports prepared by subsidiaries are checked for plausibility at corporate headquarters and compared with budgets in order to take appropriate action whenever deviations occur. For this purpose, subsidiaries are required to prepare annual budgets and mid-term planning to be approved by the Executive Board.

In addition, liquidity planning of the subsidiaries is continuously monitored and aligned with the requirements defined by the holding company.

Group controlling regularly monitors subsidiaries' compliance with accounting regulations. Also in the course of internal audits selective accounting topics are covered. Moreover, the annual financial statements of all operating subsidiaries and holding companies are audited by international auditors.

At the Executive Board's regular meetings with local managing directors the current business development and foreseeable risks and opportunities are discussed.

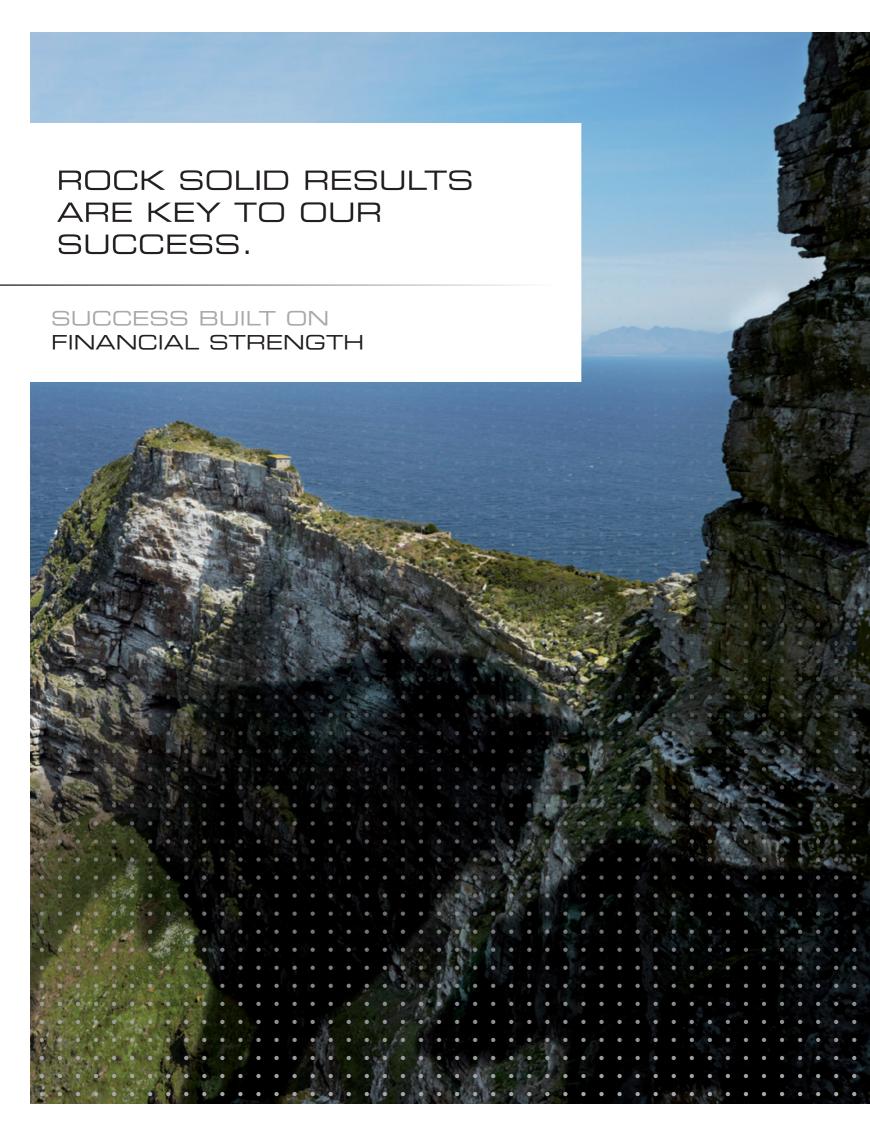

In addition to the International Financial Reporting Standards internal group guidelines are in place for the preparation of the consolidated financial statements to ensure uniform presentation by reporting companies (accounting and valuation issues). A certified consolidation programme equipped with the necessary auditing and consolidation routines is used for automated preparation of the consolidated financial statements.

#### NOTES

### Note 1

#### Information about the company

SCHOELLER-BLECKMANN OILFIELD EQUIPMENT Aktiengesellschaft (the Company), located in 2630 Ternitz at Hauptstrasse 2, was incorporated on 26 May 1994 in Ternitz, Austria and is registered at the Commercial Court in Wiener Neustadt, Austria (FN 102999w).

The Company is engaged in the industrial manufacturing of components and parts for the oil and gas industry, mostly in directional drilling segments, and provides services in these areas.

Since 27 March 2003 the shares of the Company have been listed on the Wiener Börse (Vienna Stock Exchange).

#### Note 2

#### **Accounting standards**

The Company's consolidated financial statements as of 31 December 2013 were prepared in accordance with International Financial Reporting Standards (IFRSs) as well as with the interpretations of the International Financial Reporting Interpretation Committee (IFRIC) as adopted by the EU. In addition, the supplemental requirements of § 245a article 1 UGB (Austrian Commercial Code) were adhered to.

The consolidated financial statements for SCHOELLER-BLECKMANN OILFIELD EQUIPMENT Aktiengesellschaft and its subsidiaries for the business year 2013 (as of 31 December 2013) were released by the Executive Board on 24 February 2014.

The financial statements are denominated in Euros. Unless otherwise provided, all figures have been rounded to thousands of Euros (TEUR). As a result of automated computation, the rounded amounts and percentage figures may display rounding differences.

#### Scope of consolidation

The consolidated financial statements as of 31 December 2013 comprise the accounts of SCHOELLER-BLECKMANN OILFIELD EQUIPMENT Aktiengesellschaft as the group parent company and 31 subsidiaries (2012: 31 subsidiaries).

<sup>(\*)</sup> With respect to the disclosure of the shares which are held by the management of these Companies, please see Note 19.

Regarding the non-disclosure of six subsidiaries (2012: six subsidiaries) we refer to the exemption clause in § 265 article 3 UGB (Austrian Commercial Code).

#### Note 4

#### Significant accounting policies

The applied accounting policies remain generally unchanged compared to the previous year, except for the following changes.

#### O Changes in accounting policies

In 2013 the Group has initially applied the following new and revised standards and interpretations. The adoption of these standards and interpretations only had an impact on group financial statements as of 31 December 2013 if it is marked with "yes" in the table below.

Regulation		Effective Date <sup>1</sup>	Impact on group financial statements
IAS 1	Presentation of Items of Other Comprehensive Income	01/07/2012	yes
IAS 12	Recovery of Underlying Assets	01/01/2013	no
IAS 19	Employee Benefits	01/01/2013	yes
IAS 36	Recoverable Amount Disclosures for Non-Financial Assets	01/01/2014 <sup>2</sup>	yes
IFRS 1	Government Loans	01/01/2013	no
IFRS 1	Severe Hyperinflation	01/01/2013	no
IFRS 7	Offsetting of Financial Assets and Financial Liabilities	01/01/2013	no
IFRS 13	Fair Value Measurement	01/01/2013	yes
IFRIC 20	Stripping costs in the production phase of a surface mine	01/01/2013	no
Diverse	Improvements to IFRSs 2009-2011 Cycle	01/01/2013	no

 $<sup>^{\</sup>rm 1}$  To be applied within the European Union for annual periods beginning on or after this date

<sup>&</sup>lt;sup>2</sup> Early adoption as of 31 December 2013

#### Amendments to IAS 1 - Presentation of Items of Other Comprehensive Income

The amendments to IAS 1 change the grouping of items presented in OCI. Items that could be reclassified (or 'recycled') to profit or loss at a future point in time (for example, translation differences from net investments in foreign entities) would be presented separately from items which will never be reclassified (for example actuarial gains and losses on employee defined benefit plans). The amendments are limited to changes in presentation but do not impact the Group's financial position and financial performance.

#### IAS 19 Revised - Employee Benefits

The IASB issued significant revisions to IAS 19. The accounting options available under current IAS 19 have been eliminated and the defined benefit obligation of defined benefit plans has to be fully recognized in the balance sheet. Actuarial gains and losses are now required to be recognized in other comprehensive income (OCI) and excluded permanently from profit and loss. Up to 2012 the Company recognized actuarial gains and losses in profit and loss which now requires a reclassification from profit and loss into other comprehensive income. Furthermore there are a number of new disclosure requirements concerning defined benefit plans. Impacts from the amendments of IAS 19 refer to cost of goods sold, general and administrative expenses, other comprehensive income, effects on income taxes, and profit after tax attributable to the owners of the parent company and are disclosed in Note 4 - Retrospective adjustments.

#### IAS 36 Impairment

These amendments remove the unintended consequences following IFRS 13 on the disclosures required under IAS 36 and permit to omit additional disclosures on recoverable amounts for CGUs with allocated goodwill for which no impairment is required. The early adoption of these amendments does not lead to any other impacts on the consolidated financial statements.

#### IFRS 13 Fair Value Measurement

IFRS 13 establishes a single source of guidance for all fair value measurements under IFRS and expands required notes disclosures. IFRS 13 aims at providing a standardization of the fair value definition and valuation methods to be applied. Application of IFRS 13 has not materially impacted the fair value measurements of the Group. IFRS 13 also requires a number of additional disclosures relating to fair values. Accordingly, additional disclosures relating to financial assets and liabilities as well as relating to the fair value hierarchy are provided (see Note 31).

The following new or revised standards and interpretations which have been adopted by the European Union, have not been applied early in 2013, but will be applied in the respective reporting periods for which application becomes mandatory:

Regulation		Effective Date <sup>1</sup>	Impact on group financial statements
IAS 27	Separate Financial Statements	01/01/2014	no
IAS 28	Investments in Associates and Joint Ventures	01/01/2014	no
IAS 32	Offsetting Financial Assets and Financial Liabilities	01/01/2014	no
IAS 39	Novation of Derivatives and Continuation of Hedge Accounting	01/01/2014	no
IFRS 10	Consolidated Financial Statements	01/01/2014	no
IFRS 11	Joint Arrangements	01/01/2014	no
IFRS 12	Disclosures of Interests in Other Entities	01/01/2014	yes
Diverse	Amendments to IFRS 10, IFRS 12, IAS 27 – Investment Entities	01/01/2014	no

<sup>&</sup>lt;sup>1</sup> to be applied for annual periods beginning on or after this date

#### IFRS 12 Disclosure of Interests in Other Entities

IFRS 12 requires disclosures relating to interests in subsidiaries, joint arrangements and associates. The disclosures are considerably more extensive than the current requirements of IAS 27, 28 and 31 and will accordingly lead to additional notes disclosures.

#### O Balance sheet date

Balance sheet date of all companies included in the Company's accounts is 31 December.

#### O Consolidation principles

According to International Financial Reporting Standards upon capital consolidation, business combinations are accounted for using the acquisition method i. e. the consideration transferred is offset against the proportionate fair value of the acquired assets and liabilities of the acquired business. The consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability, will be recognized in accordance with IAS 39 in profit and loss under other financial expenses or income, respectively. If the contingent consideration is classified as equity, it shall not be remeasured until it is finally settled within equity. Acquisition costs incurred are expensed (general and administrative expenses).

Non controlling interests are recognized at their fair value of the proportionate share of identifiable net assets as at the acquisition date. Subsequently, their share of profit after tax and other comprehensive income is attributed to non-controlling interests. In case of losses, a negative balance could be recorded. Changes in the ownership without loss of control are recorded as equity transactions.

According to a merger in 2012 the Company entitled non-controlling interests to sell their shares to the Company at any time. The Company has committed itself to purchase the offered shares. The purchase price depends on the profits generated by the acquired company. The anticipated discounted purchase amount of the put option is determined based on current planning figures and is recognized in other liabilities as granting of the put option created an unconditional payment obligation of the Group. The financial liability has initially been recognized by reclassification of the non-controlling interests measured at the proportionate share of revalued net assets at the acquisition date. The remaining difference to the anticipated discounted purchase amount at the acquisition date has been reclassified from equity attributable to the owners of the parent company without any effect on profit and loss. From a group perspective subsidiaries with such put option obligations are fully consolidated. Profits of the respective entity are fully allocated to the owners of the parent company. Dividend payments to non-controlling interests are recognized in other financial expenses.

Subsidiaries are fully consolidated since their acquisition date, i. e. when the Company gets control over the acquired business. The consolidation ends when the Company loses control over the subsidiary. All intercompany receivable and payable balances were reconciled at the balance sheet date and offset in the course of the elimination process.

Sales and other income resulting from activities between the group companies were reconciled in the relating consolidation period and offset against the corresponding expenses.

Intercompany profits arising from the delivery of goods between group companies were also eliminated.

Going concern basis

The consolidated financial statements were prepared on a going concern basis.

O Uniform accounting principles

The financial statements of all consolidated entities were prepared in accordance with uniform group accounting policies.

#### O Foreign currency translation

The consolidated financial statements are denominated in Euros, the functional and reporting currency of the Group. Each group member determines its own functional currency. The line items in the individual company financial statements are measured by using this functional currency.

Foreign currency transactions were translated at the exchange rate in effect at the transaction date. Monetary items denominated in foreign currencies were converted at the rate in effect at the balance sheet date. Currency differences were booked in profit or loss in the period they occurred.

For the group financial statements, the financial statements of foreign subsidiaries are translated into Euros, in accordance with the concept of functional currency:

- The assets and liabilities, both monetary and non-monetary, are translated at the at the exchange rate at balance sheet date.
- All income and expense items of the foreign subsidiaries are translated at an average exchange rate for the year.

The development of the currency rates was as follows:

	Balance sheet date		Average annual rate	
1 EUR =	31.12.2013	31.12.2012	2013	2012
USD	1.3791	1.3194	1.3282	1.2856
GBP	0.8337	0.8161	0.8493	0.8111
CAD	1.4671	1.3137	1.3685	1.2848
MXN	18.0731	17.1845	16.9644	16.9920
BRL	3.2576	2.7036	2.8669	2.5097
VND	29,134.0	27,596.5	28,043.2	26,986.4

Exchange differences resulting from translating the financial statements of the subsidiaries are recognized under "currency translation reserve" within equity in the consolidated financial statements, the movement in the current year is recorded under "other comprehensive income".

#### O Split in current and non-current assets and liabilities

Assets and liabilities with a residual term to maturity of less than one year are reported as current, those with a residual term to maturity of more than one year as non-current. Residual time to maturity is determined on the basis of the balance sheet date.

Operating assets and liabilities, such as Trade Accounts Receivable and Trade Accounts Payable, are always considered as current, even if their maturity is beyond 12 months as of the balance sheet date..

#### O Financial instruments

A financial instrument is an agreement whereby a financial asset is created in one company, simultaneously with a financial liability or equity in the other company.

Such transactions are recognized at the settlement date, according to IAS 39.

A financial asset is derecognized when:

- the rights to receive cash flows from the asset have expired,
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party, or
- the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

A financial liability is derecognized when the underlying obligation is discharged, canceled or when it expires.

The consolidated balance sheet includes the following financial instruments (categorized according to IAS 39):

### Cash and cash equivalents

All cash, bank deposits and short-term financial investments available for sale are recorded under line item Cash and cash equivalents, because they can be converted into cash at any time. They are measured at current value at the balance sheet date and are not subject to significant changes in their value.

Marketable financial instruments are non-derivative financial assets which are not held for trading purposes.

After initial recognition, marketable financial instruments are measured at their fair values while resulting profits and losses are booked into equity. The fair value is the market value of the respective assets at the balance sheet date. Upon disposal or impairment of marketable financial assets recognized in equity to that point, gains or losses are accounted for in the annual profit and loss statement.

Interest and dividends earned on financial investments are recognized trough profit and loss.

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or definable payments, which are not listed at an active market. They particularly include Trade receivables, Loans and Other Receivables. Interest at market rates is charged on those trade receivables which are granted for credit periods which exceed those normally granted in business.

Receivables and other assets are recognized at the settlement date at acquisition costs, thereafter they are measured at amortized costs using the effective interest method, less any allowance for impairment. Gains and losses are booked into the profit and loss statement when the loans and receivables are derecognized or impaired, as well as through the amortization process.

The Company grants credits to its customers in the normal course of business, but generally does not require any collateral or security to support the amounts due, with the exception of occasional customers and customers located in high risk countries from whom the Company obtains confirmed letters of credit. Management performs permanent credit evaluations of its customers and builds up allowances for doubtful accounts if required.

The Company regularly assesses its receivables and records individual allowances for doubtful debts if necessary. These allowances are sufficient to cover the expected risk of default whereas actual defaults result in writing off the respective receivable. The decision whether to account for default risk by means of allowances or to recognize impairment losses depends on the reliability of the risk evaluation.

Management evaluates the adequacy of the allowances for doubtful debts using structural analyses of due dates and balances in accounts receivable, the history of payment defaults, customer ratings and changes in terms of payment.

#### Liabilities

Financial liabilities particularly include Trade payables, Payables due to banks, Bonds, Payables under finance leasing and Derivative financial liabilities.

Liabilities are initially recognized at its fair value minus directly attributable transaction costs; subsequently they are measured at amortized costs, using the effective interest method. Income and expenses resulting from the use of the effective interest method are booked into profit and loss.

In addition, the interest in subsidiaries, which are held by the respective management, is recorded under financial liabilities. The management is obliged by contract to sell these shares to the Company under specific circumstances, and the Company is obliged to buy these shares. The selling price is based on the value of the respective equity portion at the date of the transaction. Pursuant to IAS 32.23, such contracts constitute a financial liability, valued at the present value of the redemption amount. As no exact measurement of the future value is available subsequent measurement refers to the respective portion of the equity at the balance sheet date, which includes the portion of the income from the current year. The respective current year's income portion is recognized in the consolidated profit and loss statement under interest expenses and is considered to be representative for the effective interest expense.

Furthermore, participation rights granted to the management of subsidiaries are recorded under financial liabilities. A transfer of such rights to third parties needs the approval of the Company. The Company has the option to purchase participation rights under specific circumstances, with the purchase price being based on the respective equity portion at the date of the transaction. Current year's income portion is considered to be representative for the effective interest expense and accordingly increases the liability.

### Derivative financial instruments and hedging relationships

The Group uses financial instruments, such as currency futures and interest swaps to cover its interest and currency risks. These derivative financial instruments are recognized at fair value at the contract dates and are measured at the respective fair values in the following periods. Derivative financial instruments are recognized as assets if their fair values are positive and as liabilities if fair values are negative.

The Company uses the following instruments:

#### Other derivatives

In order to cover the foreign currency risk relating to monetary assets and liabilities in the balance sheet, the Company applies hedging measures, which, although not in compliance with the strict requirements set out in IAS 39 for hedge accounting, effectively contribute to hedge the financial risk from the risk management perspective.

Income or expenses resulting from changes in the fair value of financial instruments which do not fulfil the accounting criteria regarding hedging relationships under IAS 39, are directly booked to the profit and loss statement.

Income and expenses resulting from foreign currency hedging transactions which were made to hedge the exchange risk related to intra-group trading in foreign currencies are not displayed separately but reported together with the foreign exchange income and expenses from the hedged items in the operating result.

In addition, the Company records liabilities for contingent purchase price payments from business combinations and an option commitment relating to cancelable non-controlling interests. The valuation at the balance sheet date is made according to the underlying agreements based on the discounted payments using the most recent sales forecast. The addition of accrued interest related to liabilities for contingent purchase price payments is recognized in interest expenses. Gains or losses resulting from changes in the expected discounted cash flows are recorded as other financial income or other financial expenses, respectively.

#### **Hedging relationships**

In the course of a business combination in 2010 the foreign currency hedge transaction of the purchase price between signing and closing dates of the business combination was recognized as fair value hedge of a fixed underlying transaction not recognized in the balance sheet. The loss attributable to the secured risk was recognized as basis adjustment for the acquired assets and is now expensed in the profit and loss statement according to the profit and loss effectiveness of the assets (according to the depreciation based on the estimated useful lives).

#### O Inventories

Inventories consist of materials and purchased parts in various stages of assembly and are stated at the lower of cost or net realizable value at the balance sheet date. Costs are determined by the first-in, first-out, weighted average or specific identification methods. The costs of finished goods comprise raw material expenses, other direct costs and related production overheads, but exclude interest expense. The Company reviews inventories for slow moving or obsolete items on an ongoing basis and establishes appropriate adjustment provisions if necessary.

#### O Tangible and intangible fixed assets

The Company's non-current assets are recorded at cost less depreciation/amortization. Depreciation is principally computed by means of the straight-line method, over the expected useful life of the asset. The estimated useful lives are as follows:

	Useful life in years		
Other Intangibles	4 - 10		
Buildings and improvements	5 - 50		
Plant and machinery	3 - 17		
Fixtures, furniture and equipment	2 - 10		

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or cash-generating unit exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses of continuing operations are recognized in the profit and loss account in expense categories consistent with the function of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the profit and loss account.

Repairs and refurbishments are charged to profit and loss at the time the expenditure has been incurred. Borrowing costs are also expensed as incurred, unless they are related to a qualifying asset with a commencement date (acquisition or production) after 1 January 2009.

Where tangible assets are financed by leasing agreements which give rights approximating to ownership (finance leases), they are treated as if they were purchased outright at the lower of the fair value or the fair value of the minimum lease payments. The corresponding leasing liabilities are shown in the balance sheet as finance lease obligations.

Interest expenditures on capitalized lease objects are based on interest rates between 5.0% and 7.0%. This rate is in turn determined using the Company's incremental borrowing rate at the inception of each lease or the lessor's implicit rate of return.

The determination whether an arrangement contains a lease is based on its economic substance and requires a judgement as to whether the fulfilment of the contractual arrangement depends on the use of a specific asset or assets and whether the arrangement conveys a right to use the asset.

#### O Goodwill

Goodwill is recognized at acquisition cost and is not amortized but tested for impairment annually as of 31 December. For this purpose, the goodwill is assigned to cash generating units. The impairment test for cash generating units is performed by calculating the value in use on the basis of expected future cash flows.

A write down of goodwill cannot be reversed in future periods.

#### Current and deferred income taxes

The actual tax refund receivables and tax payables for the current and previous periods are measured in the amount of the expected refund by, or payment to the tax authority. The respective amounts are based on the current tax rates and tax laws applicable at the balance sheet date.

The Company uses the "balance sheet liability method" according to IAS 12 under which deferred taxes are determined, based on the temporary difference between the amounts attributed to assets or liabilities in the individual group companies for tax purposes (tax base) and the carrying amounts of those assets or liabilities in the balance sheet. They are measured by the tax rates which become effective when the differences reverse (IAS 12). Deferred tax income or expenses arise from any movement in deferred tax assets or liabilities. Deferred tax assets are recognized to the extent it is probable that there will be taxable income in future against which the deductible temporary differences may be offset. Deferred tax assets are to be formed for tax loss carry forwards, provided these tax loss carry forwards can be consumed with future tax profits.

Deferred taxes are measured at the tax rates that are expected to apply to the year, when the asset is realized or the liability is settled.

Current and deferred taxes which relates to items recognized under "other comprehensive income" or equity are also posted in "other comprehensive income" or equity but not through profit and loss.

#### O Government grants

Subsidies are recognized only when there is reasonable assurance that the Company will comply with any conditions attached to the grants and that the grants will in fact be received. Grants are recognized systematically as income over the period necessary to match them with the related costs, for which they are intended to compensate.

Grants relating to assets are recognized as a liability upon fulfilment of all requirements for the receipt of such grants. They are released over the useful life of the respective assets. The release is displayed in the consolidated profit and loss statement (line item "other operating income").

#### **O** Provisions

In accordance with IAS 37, provisions are recognized when the Company has current legal or constructive obligations which are based on past events and which will probably lead to a payment. The provisions are measured at the best estimate of the management at the balance sheet date. If a reliable estimate is not possible, no provision is made.

### o Employee benefits

#### Defined benefit plans

Defined benefit plans exclusively refer to severance payment obligations of Austrian companies. Employers are obliged to pay a lump sum upon normal retirement or termination of an employment agreement, if the employee has been with the Company for at least three years, and provided that the employment commenced before 1 January 2003. Severance payments range from two to twelve months of salary at the time of termination based on the length of service. Payments are made on normal retirement or any other termination, with the exception of voluntary terminations by employees. The obligations accrued for at each balance sheet are determined on the basis of actuarial reports applying the Projected Unit Credit Method using a service period of 25 years and correspond to the present value of the benefits accruing to the employees at the end of the reporting period. Pension entry ages are considered in compliance with current legal provisions. Expected future salary increases and fluctuation rates are considered based on medium-term past experiences.

All remeasurements relating to defined benefit plans (actuarial gains and losses) are recognized under other comprehensive income according to IAS 19 (2011). For further details on provisions for severance payments please refer to Note 18.

### **Defined contribution plans**

According to the legal requirements for employment agreements commenced after 1 January 2003 under Austrian labor law, the Company has to contribute 1.53% of current remunerations to an external providence fund.

Further contribution-based pension schemes are in place in several group entities. These are based either on legal obligations or bargaining agreements or subject to individual contractual agreements. The obligation of the Group is limited at paying the contribution to each pension fund when it is due. There is no legal or constructive obligation for future benefits.

All contributions to defined contribution plans are recognized as expense at the time when employees have fulfilled their services obliging the Company to make this contribution.

### Employees' jubilee payments for long service

According to the collective work agreement, employees in Austria are entitled to jubilee payments, depending on their length of service with their company (defined benefit plan). The amounts accrued for these provisions were also calculated by applying the Projected Unit Credit Method. The actuarial assumptions used for the severance payments are also applied for the calculation of the jubilee payment provision. Remeasurements (actuarial gains or losses) are recognized in the profit and loss statement as incurred.

### O Own shares

Own shares are carried at acquisition costs and are subtracted from the equity. The purchase, sale, issuance and redemption of own shares are not recognized in profit or loss. Potential differences between the par value and the related settlements are recorded under Contributed capital.

#### O Revenue recognition

Sales revenue is recognized when title passes, generally upon delivery to the customer or on performance of the related service.

Revenue on operating leases is recognized on a pro-rated basis over the period. Income on interest is recognized on a pro-rated basis over the period, by taking the effective interest into account.

#### O Research and development

Pursuant to IAS 38, research costs are expensed as incurred. Development costs are only expensed, if the requirements of IAS 38 for a capitalization of development expenses are not fully met.

#### O Earnings per share

Earnings per share are calculated in line with IAS 33 by dividing the profit after tax attributable to the owners of the parent company by the average number of ordinary shares outstanding during the period.

#### O Estimates, discretionary decisions and assumptions

The **preparation of consolidated annual financial statements** in conformity with International Financial Reporting Standards (IFRS) requires estimates and assumptions as well as discretionary decisions to be made by the management that affect the amounts reported in the balance sheet, in the notes and in the profit and loss statement. Actual future results may differ from such estimates, however, as seen from today's perspective, the Board does not expect any major negative implications on the financial results in the near future.

Assumptions and discretionary decisions need to be taken for the recognition and valuation of **intangible assets** acquired in the course of business combinations (see Note 36).

In **Property, plant and equipment** and **Intangible assets** it is necessary to include estimates for the period during which these assets are expected to be used (see Notes 8 and 9).

For the yearly **impairment test of goodwill** and **intangible assets not yet in use**, an estimate of the value in use is necessary. Management has to make assumptions on the expected future cash flows of the cash-generating units and has to choose an adequate discount rate (see Note 9).

For the consideration of **deferred taxes assets**, it is necessary to make estimates of the future taxable income which will be available for the utilization of tax loss carry forwards and other timing differences (see Note 11).

In order to measure inventories, management expectations of price and market developments are required (see Note 7).

It is necessary to make assumptions regarding the default probability of receivables (see Note 5).

For the recognition of **provisions** the probability of occurrence needs to be evaluated at balance sheet date by management. Provisions are carried at those values which correspond to the best estimate by the management at the balance sheet date (see Note 15).

The accruals for defined benefit plans and other employee benefits are based on actuarial computations. For such calculations it is necessary to make assumptions for the discount rate, future salary increases, mortality rate and fluctuation rates (see Note 18).

The option commitment relating to cancellable non-controlling interests is recorded at the balance sheet date with its fair value, which is derived from the most recent profit planning (see Notes 14 and 36).

**Liabilities for contingent purchase price payments** due to business combinations are recorded at the balance sheet date with their fair value, which is derived from the most recent sales forecast (see Note 19).

The valuation of **liabilities** for management interest in subsidiaries and similar participation rights is based on assumptions about the service life for the respective managers with the company and the expected profitability of the subsidiaries as well. The Company considers the proportion of the yearly profit as representative for the effective interest expense in the period payable to the managers (see Note 19).

#### O Retrospective adjustments

In 2013 SBO Group retrospectively applied IAS 19 (2011) for the first time. This means that any remeasurements (actuarial gains or losses) will no longer be recognized through profit or loss for the period but under other comprehensive income. Prior year figures have been adjusted accordingly.

Based on materiality considerations impairment on other intangible assets amounting to TEUR 7,517 was presented in 2013 in a separate line item "impairment on other intangible assets" in the profit and loss statement in order to allow for a more reliable and relevant presentation of the Company's financial performance. For enhancing comparability impairment on other intangible assets amounting to TEUR 2,181 which was recognized in the consolidated financial statements 2012 under expenses for research and development within "other operating expenses" was retrospectively reclassified to "impairment on other intangible assets".

In addition, the current income portions relating to shares held by management of individual subsidiaries of the Group, which up to 2012 were recognized under other financial expenses, were retrospectively reclassified to interest expenses in order to achieve enhanced clarity of the presentation of the Company's financial performance.

The following table presents the retrospective adjustments of financial information 2012 and the effects of these adjustments on the financial information 2013:

Effects on the consolidated profit and loss statement:

in TEUR	2013	2012
Cost of goods sold	-280	814
General and administrative expenses	25	92
Other operating expenses	7,517	2,181
Impairment on other intangible assets	-7,517	-2,181
Interest expenses	-3,537	-3,508
Other financial expenses	3,537	3,508
Profit from operations and profit before tax	-255	906
Income taxes	64	-226
Profit after tax	-191	680
Thereof attributable to the owners of the parent company	-191	680
Earnings per share (basic = dilluted in EUR)	-0.01	0.04

The retrospective application of IAS 19 (2011) reduced other comprehensive income for 2012 by TEUR 680. For the financial year 2013, the application of IAS 19 (2011) resulted in an increase of other comprehensive income by TEUR 191.

Accordingly, there were adjustments within cash-flow from profit for the year 2012.

Application of IAS 19 (2011) had no effects on balance sheet amounts of provisions for severance payments as obligations from defined benefit plans already were fully provided for.

### Trade accounts receivable

An analysis of trade receivables as of 31 December shows the following situation:

	Carrying	Not past-due and	Past-due, not impaired				
in TEUR	value	not impaired	≤ 30 days	31-60 days	61-90 days	91-120 days	> 120 days
2013	78,636	49,507	16,045	6,190	3,187	1,434	2,073
2012	71,854	43,081	16,198	5,704	2,340	2,201	2,238

The book value of impaired balances amounted to TEUR 200 (2012: TEUR 92).

The allowance account reflects the following:

in TEUR	2013	2012
As of 1 January	2,449	2,399
Exchange differences	-95	-48
Usage	-124	-208
Reversal	-797	-654
Expensed additions	623	960
As of 31 December	2,056	2,449

The receivables listed are not secured.

# Other accounts receivable and prepaid expenses

This line item mainly consists of balances due from tax authorities and deferred charges.

The receivables are not secured, and no allowances were recorded.

# Note 7

### **Inventories**

Inventories are detailed by major classification as follows:

in TEUR	31 December 2013	31 December 2012
Raw materials	11,160	12,292
Work in progress	65,299	74,899
Finished goods	56,427	70,353
Prepayments	171	429
Total	133,057	157,973

Allowance expenses booked for 2013 were TEUR 3,477 (2012: TEUR 4,361).

Note 8

# Property, plant & equipment

The following is a summary of the gross carrying amounts and the accumulated depreciation of property, plant and equipment held:

Year 2013 in TEUR	Land & buildings	Plant & machinery	Fixtures, furniture & equipment	Prepayments & assets under construction	Total
At cost					
1 January 2013	69,109	280,586	12,575	10,286	372,556
Exchange differences	-2,074	-8,491	-315	-130	-11,010
Additions	14,380	32,780	1,792	13,641	62,593

31 December 2012	51,786	100,213	3,177	10,286	165,462
31 December 2011	49,021	87,532	3,109	7,845	147,507

The Company has manufacturing facilities in the following countries: USA, Austria, UK, Mexico, Vietnam and Singapore.

Service and maintenance as well as marketing outlets are maintained in the USA, Canada, UK, Singapore, the UAE, Russia and Brazil.

In 2013 and 2012 no impairments were made.

In 2013 write-ups in the amount of TEUR 1,264 (2012: TEUR 0) were made in the segment Europe as a sustained repair possibility of a damaged production facility was found (recorded in the profit and loss account under cost of sales).

As of 31 December 2013 commitments for capital expenditure amounted to TEUR 7,260 (2012: TEUR 12,881).

#### **Finance Lease**

Plant and machinery held under finance lease are as follows:

in TEUR	31 December 2013	31 December 2012
Acquisition cost	480	1,228
Accumulated depreciation	-290	-811
Carrying value	190	417

The following minimum lease payments arise from the utilization of such assets:

in TEUR	31 December 2013	31 December 2012
For the following year	83	192
Between one and five years	0	85
More than five years	0	0
Total minimum lease payments	83	277
Less discount	-2	-5
Present value	81	272

### **Operating lease**

Commitments arising from lease and rental contracts (for items not shown in the balance sheet) amounted to:

in TEUR	31 December 2013	31 December 2012
For the following year	1,345	1,299
Between one and five years	1,757	2,582
After five years	168	160

Payments for operating leases which were expensed in the current year amounted to TEUR 1,458 (2012: TEUR 1,299).

# Intangible assets

The list below summarizes the gross carrying amounts and the accumulated amortization of intangible assets:

Year 2013		Other	
in TEUR	Goodwill	intangibles	Total
At cost			
1 January 2013	89,640	82,549	172,189
Exchange differences	-2,787	-2,114	-4,901
Additions	0	164	164

Disposals	0	-13	-13
31 December 2013	23,336	34,961	58,297
Carrying value			
31 December 2013	63,517	45,625	109,142
31 December 2012	65,560	61,091	126,651

Year 2012 in TEUR	Goodwill	Other intangibles	Total
At cost			
1 January 2012	83,021	60,793	143,814
Exchange differences	-1,066	-578	-1,644
Business combinations	7,685	22,147	29,832
Additions	0	174	174
Transfers	0	16	16
Disposals	0	-3	-3
31 December 2012	89,640	82,549	172,189
Accumulated amortization &			
impairments			
1 January 2012	24,287	12,336	36,623
Exchange differences	-207	-85	-292
Additions amortization	0	7,026	7,026
Additions impairments	0	2,181	2,181
Transfers	0	3	3
Disposals	0	-3	-3
31 December 2012	24,080	21,458	45,538
Carrying value			
31 December 2012	65,560	61,091	126,651
31 December 2011	58,734	48,457	107,191

As of 31 December 2013, commitments for acquisitions of intangible assets amounted to TEUR 0 (2012: TEUR 0).

### 1. Goodwill

Impairment testing for each cash generating unit was computed by using their value in use, which is based on the estimated future cash flows and a 11.9% - 15.6% (2012: 11.2% - 14.9%) capital cost rate before taxes (WACC = Weighted Average Costs of Capital). The WACC was determined based on the current figures for similar companies in the same industry segment and adjusted for specific inflation rates in different countries. A detailed planning period of 3 years is used, which is based on the budgets of the management. For the terminal period, a fixed growth rate of 1% was considered.

Cash flows are determined based on revenue expectations and planned capital expenditures. The value in use of the cash generating unit is largely determined by sales revenues. Organic sales growth has been taken into account in the cash flow estimation. Sales plans are based on the demand forecasts of our main customers on the one hand and on the

current backlog of orders and expected market growth according to industry analyses on the other hand. In addition, margin plans are derived from the estimated product mix (based on purchase orders on hand and feedback of the sales departments) and estimated cost developments of material (based on price indications of current suppliers and material price development on commodity markets and deducible trends) and planned capital expenditures. Furthermore, estimated personnel development (based on planned headcount, required qualification of employees and expected personnel cost based on current economic climate) is considered.

The impairment tests carried out as of 31 December 2013 and 2012 demonstrated that no write-down of goodwill was necessary. The Company prepared sensitivity analyses for all cash generating units, which revealed that except for the cash generating unit Godwin-SBO L. L. C. any realistic changes in planned cash flows or capital costs would not result in any impairment requirements. For the cash generating unit Godwin-SBO L. L. C. a slight increase of the discount rate by 0.5 percentage points or a decrease of the expected cash flows by 3.0% would lead to a write-down of the related goodwill.

Goodwill amounts according to the balance sheet refer to the following cash generating units:

in TEUR	31 December 2013	31 December 2012
Drilling Systems International Limited	18,206	19,009
Knust-SBO L. L. C.	13,828	14,454
Godwin-SBO L. L. C.	12,390	12,925
Schoeller-Bleckmann Oilfield Technology GmbH	4,655	4,655
Schoeller-Bleckmann Oilfield Equipment (UK) Limited	3,675	3,675
Techman Engineering Limited	1,550	1,590
BICO Drilling Tools Inc.	9,086	1,425
BICO Faster Drilling Tools Inc.	127	142
Goodwill not yet assigned to cash generating units	0	7,685
Total	63,517	65,560

Relating to a business combination in 2012 goodwill at TEUR 7,685 was temporarily allocated to the segment "Europe". After final evaluation of the expected synergies from the acquisition of the developing engineering company goodwill was allocated to the cash generating unit BICO Drilling Tools Inc. within the segment "North America" in 2013. Mainly, synergies are expected from competitive advantages due to the extension of the existing product programs in North America.

Further changes in the carrying amounts 2013 were exclusively due to the conversion of foreign exchange amounts.

### 2. Other intangible assets

Other intangible assets mainly comprise acquired technology and non-compete agreements. In the year 2013 impairment at TEUR 7,517 was recorded in the segment "Europe" relating to acquired technology not yet in use which was allocated to the developing engineering company as cash generating unit. This impairment was the result of delays in the current product development and the corresponding planning adjustments. The recoverable amount at TEUR 13,144 is determined based on the value in use considering the company's business plans and is calculated by discounting the expected future cash flows resulting from the technology over the remaining service life using a discount rate of 51.5%. This discount rate includes an adequate risk component pertaining to the current status of the company. A reduction of planned cashflows by 10% would increase the required impairment amount by approximately TEUR 1,500.

In 2012 impairment of TEUR 2,181 relating to this technology was booked under other operating expenses (research and development expenses). In order to enhance clarity of presentation of the Company's financial performance this impairment amount was retrospectively reclassified to "impairment on other intangible assets". See Note 4 – Retrospective adjustments.

In addition, other intangible assets comprise right-of-use for IT software.

### Note 10

### Long-term receivables and assets

This line item mainly refers to interest-bearing loans which have been granted to the management of subsidiaries of the Company for the acquisition of stock or participation rights in their respective companies (also see Note 19). As the stock has to be returned in the event of non-compliance with the loan agreements, there is no material credit risk for the Group.

in TEUR	31 December 2013	31 December 2012
Loans	16,621	17,530
Other receivables and assets	425	206
Total	17,046	17,736

As there were no past-due receivables, no write-downs had to be made either as of 31 December 2013 or 31 December 2012.

Other receivables and assets are not secured.

### **Deferred taxes**

The Company's deferred tax assets and deferred tax payables result from the following positions:

in TEUR	31 December 2013	31 December 2012
Property, plant & equipment (differences in useful lives)	-6,033	-6,487
Property, plant & equipment (differences in valuation)	-4,374	-5,901
Other intangible assets (differences in useful lives)	-267	-200
Goodwill and other intangible assets (differences in valuation)	-9,877	-11,575
Inventories (differences in valuation)	6,001	8,845
Write-down in subsidiaries	1,200	58
Other items (differences in valuation)	823	1,239
Not deductible accruals	2,755	2,195
Exchange differences intercompany debt elimination	-592	-1,221
Tax loss carry forwards	3,163	2,454
Total	-7,201	-10,593

The line items as reflected in the group balance sheet:

in TEUR	31 December 2013	31 December 2012
Deferred tax assets	11,681	12,356
Deferred tax liabilities	-18,882	-22,949
Total	-7,201	-10,593

Not recognized are deferred tax assets in the amount of TEUR 528 (2012: TEUR 232) related to tax loss carried forwards, because the utilization of these losses could not be expected for the foreseeable future (thereof TEUR 61 (2012: TEUR 140) must be utilized until 2014, the balance has indefinite duration).

Relating to consolidated subsidiaries included in the consolidated financial statements differences exist between the tax base of equity interests and the proportional share of equity (outside basis differences) which in particular result from retained earnings and uncovered losses. Such timing differences as at 31 December 2013 amount to TEUR 68,478 due to the fact that dividend payments or the sale of certain subsidiaries would be taxable. However, as the Group does not plan dividends or sales relating to these subsidiaries in the foreseeable future no tax deferrals were recognized according to IAS 12.39. For planned dividend payments deferred tax liabilities of TEUR 362 were recognized at 31 December 2013.

### Bank loans and overdrafts

As of 31 December 2013, the short-term loan arrangements were as follows:

Currency	Amount in TEUR	Interest rate in %
USD loans	8,701	1.30% variabel
GBP loans	7,197	1.16% variabel
Subtotal	15,898	
Export promotion loans (EUR)	16,234	0.63% variabel
Total	32,132	

As of 31 December 2012, the short-term loan arrangements were as follows:

Currency	Amount in TEUR	Interest rate in %
USD loans	9,095	1.10% variabel
GBP loans	6,126	1.36% variabel
Subtotal	15,221	
Export promotion loans (EUR)	16,234	0.78% variabel
Total	31,455	

The export promotion loans represent revolving short-term credit facilities; according to those arrangements the Company may use these funds permanently as long as it complies with the terms of agreement. In accordance with export promotion guidelines, the Company has agreed to assign receivables in the amount of TEUR 19,480 (2012: TEUR 19,480) to securitize these loans.

The USD borrowings due to banks in the amount of TEUR 8,701 (2012: TEUR 9,095) are collateralized by specific current assets of the borrowing company ("floating charge").

### **Government grants**

The subsidies include a grant by the Federal Investment and Technology Fund, as well as other investment subsidies received for the acquisition of fixed assets, and investments in research and development. For some investment grants specific covenants have to be met (e. g. number of workers employed), as was the case at the balance sheet dates 2013 and 2012.

# Note 14

### Other payables

Other short-term payables were as follows:

in TEUR	31 December 2013	31 December 2012
Vacation not yet used	1,792	1,867
Other personnel expenses	11,113	12,025
Legal and other counseling fees	701	644
Taxes	2,259	2,350
Social expenses	1,270	1,435
Option commitment relating to cancelable non-controlling interests	4,160	6,054
Earn-outs from business combinations	1,978	1,291
Sundry payables	4,249	4,739
Total	27,522	30,405

In the course of a business combination in 2012, the Company offered to the non-controlling shareholders the right to sell their remaining interest to the Company at any time, whereas the Company is obliged to purchase the offered shares. The purchase price for these shares is based on the achieved financial results of the acquired entity. As at 31 December 2013 an option commitment relating to cancelable non-controlling interests in the amount of TEUR 4,160 (2012: TEUR 6,054) was recognized.

Regarding contingent purchase price payments relating to cancelable non-controlling interests please see Note 19.

# Other provisions

The other provisions developed as follows:

Yea	ar	2	0	1	3

in TEUR	31 Dec. 2012	Usage	Reversal	Additions	31 Dec. 2013
Warranty/ Product liability	4,316	-427	0	5,352	9,241
Restructuring	575	0	-575	0	0
Other	1,882	-113	-1,709	9	69
Total	6,773	-540	-2,284	5,361	9,310

Year	2012

in TEUR	31 Dec. 2011	Usage	Reversal	Additions	31 Dec. 2012
Warranty/ Product liability	4,172	-441	0	585	4,316
Restructuring	575	0	0	0	575
Other	1,478	-59	-102	565	1,882
Total	6,225	-500	-102	1,150	6,773

Due to nonconformance of parts delivered within a comprehensive single order a warranty provision of TEUR 4,720 relating to this particular case was recognized in 2013.

Major items in the line "other provisions" refer to pending proceedings and governmental instructions.

It is expected that the costs accounted for in short-term provisions will be incurred in the following business year.

At the end of 2013 a competitor claimed patent infringements by a subsidiary of SBO. Management evaluates this complaint to be entirely unfounded and vigorously rejects any allegations. Based on the current circumstances a reliable estimate on the amount of a potential obligation can not yet be made and is not evaluated to be probable. Accordingly, no provision was recognized in the consolidated financial statements as of 31 December 2013.

# Note 16

#### **Bonds**

In June 2008, two bonds with a total face value of MEUR 20.0 each were issued, in the form of 800 equally ranking bearer debentures with a par value of EUR 50,000 each.

The debentures were 100% securitized by two changeable collective certificates which were deposited with Oesterreichische Kontrollbank Aktiengesellschaft in Vienna on the day of issuance. Individual debentures or coupons have not been issued.

The annual interest rates on the debentures until maturity are 5.75% (on bond 2008-2013) and 5.875% (on bond 2008-2015), related to their par values. The interest is payable in arrears, on 18 June of each year. One of these debentures was repaid on 18 June 2013 in the amount of the par value, i. e., MEUR 20.0; the redemption of the second debenture in the amount of the par value, i. e., MEUR 20.0 will be on 18 June 2015.

The bonds are traded in the third market at the Vienna Stock Exchange under ISIN AT0000A09U32 and AT0000A09U24.

Note 17 Long-term loans including current portion (amortization in following year)

As of 31 December 2013, long-term borrowings consist of the following:

Currency	Amount in TEUR	Interest rate in %	Term	Repayment
EUR	2,712	0.00 % fix	2008 – 2024	quarterly from 2011
EUR	20,000	3.11 % fix	2013 – 2020	2020
EUR	10,000	3.11 % fix	2013 – 2020	2020
EUR	7,500	0.50 % fix	2013 – 2019	semi-annually from 2015
EUR	8,000	3.10 % fix	2010 – 2018	2018
EUR	25,000	3.05 % fix	2010 – 2018	semi-annually from 2012
EUR	1,804	0.00 % fix	2011 – 2017	quarterly from 2012
EUR	5,000	2.40 % fix	2012 – 2017	2017
EUR	10,000	2.31 % fix	2012 – 2017	2017
EUR	15,000	2.40 % fix	2012 – 2017	2017
EUR	2,084	4.73 % fix	2009 – 2016	semi-annually from 2010
EUR	5,000	5.25 % fix	2009 – 2016	2016
EUR	706	3.99 % fix	2006 – 2015	semi-annually
EUR	1,733	0.00 % fix	2008 – 2015	quarterly from 2011
EUR	1,954	2.25 % fix	2009 – 2015	semi-annually from 2011
EUR	5,000	2.55 % fix	2010 – 2015	yearly from 2013
EUR	66	2.50 % fix	2008 – 2014	2014
EUR	70	2.00 % fix	2010 – 2014	2014
EUR	722	2.25 % fix	2008 – 2014	semi-annually from 2010
USD	437	6.35 % fix	2003 – 2016	monthly
	122,788			

The following borrowings were collateralized:

- EUR-loans: TEUR 14,471 – land and building and machinery pledged with a carrying-value of TEUR 21,844.
- USD-loans: TEUR 437 – mortgage on land and building with a carrying-value of TEUR 1,347.

As of 31 December 2012, long-term borrowings consist of the following:

Currency	Amount in TEUR	Interest rate in %	Term	Repayment
EUR	2,977	0.00 % fix	2008 – 2024	quarterly from 2011
EUR	8,000	3.10 % fix	2010 – 2018	2018
EUR	30,000	3.05 % fix	2010 – 2018	semi-annually from 2012
EUR	2,285	0.00 % fix	2011 – 2017	quarterly from 2012
EUR	5,000	2.40 % fix	2012 – 2017	2017
EUR	10,000	2.31 % fix	2012 – 2017	2017
EUR	15,000	2.40 % fix	2012 – 2017	2017
EUR	2,917	4.73 % fix	2009 – 2016	semi-annually from 2010
EUR	5,000	5.25 % fix	2009 – 2016	2016
EUR	1,177	3.99 % fix	2006 – 2015	semi-annually
EUR	2,503	0.00 % fix	2008 – 2015	quarterly from 2011
EUR	3,257	2.25 % fix	2009 – 2015	semi-annually from 2011
EUR	6,000	2.55 % fix	2010 – 2015	annually from 2013
EUR	66	2.50 % fix	2008 – 2014	2014
EUR	70	2.00 % fix	2010 – 2014	2014
EUR	2,166	2.25 % fix	2008 – 2014	semi-annually from 2010
EUR	1,500	1.40 % variabel	2010 – 2013	annually from 2012
EUR	2,400	4.79 % fix	2008 – 2013	semi-annually from 2010
USD	595	6.35 % fix	2003 – 2016	monthly
	100,913			

The following borrowings were collateralized:

- EUR-loans:
  - TEUR 9,931 Machinery pledged with a carrying-value of TEUR 10,685.
- USD-loans:

TEUR 595 – Mortgage on land and building with a carrying-value of TEUR 1,449.

Adjustments to variable interest rates are made quarterly.

Referring to disclosures on the fair value of the loans see Note 31, regarding interest rate risk and hedging see Note 32.

# **Employee benefit obligations**

As of the balance sheet date, the employee benefit obligations consisted of the following:

in TEUR	31 December 2013	31 December 2012
Severance payments	4,728	4,706
Jubilee payments for long service	1,259	1,178
Total	5,987	5,884

The actuarial assumptions for the provisions of severance payments were as follows:

	2013	2012
Interest rate	3.00%	3.00%
Salary increases	4.50%	4.50%
Fluctuation rate (mark-down)	0.0 – 15.0%	0.0 – 15.0%

Provisions were determined based on mortality tables AVÖ 2008-P (2012: AVÖ 2008-P) of Pagler & Pagler. Remeasurements of provisions for severance payments (actuarial gains or losses) are recognized under other comprehensive income according to IAS 19 (2011) (see Note 4 - Retrospective adjustments).

No contributions were made to separately maintained funds for these obligations.

### **Provisions for severance payments**

The status of the accrual for severance payments has developed as follows:

in TEUR	2013	2012 adjusted *)
Defined benefit obligation as of 1 January	4,706	3,620
Current service cost	240	184
Interest cost	140	161
Total expenses for severance payments	380	345
Remeasurements during the year	-255	906
Current severance payments	-103	-165
Defined benefit obligation as of 31 December	4,728	4,706

<sup>\*)</sup> See Note 4 - Retrospective adjustments

The expenses shown in the table are recognized within profit and loss under personnel expenses of each functional cost group (see Note 25).

Remeasurements recognized under other comprehensive income according to IAS 19 (2011) are as follows:

in TEUR	2013	2012 adjusted *)
Remeasurement of obligations		
from changes to demographic assumptions	0	0
from changes to financial assumptions	0	703
adjustments based on past experience	-255	203
Total	-255	906

<sup>\*)</sup> See Note 4 - Retrospective adjustments

The average duration of the defined benefit plan obligation as of 31 December 2013 is 14.5 years (2012: 15.8 years).

### Sensitivity analysis

The effects on the obligations resulting from changes in significant actuarial assumptions were presented in the following sensitivity analyses. One significant factor of influence was changed in each case, while the remaining factors were held constant. In reality, however, these factors of influence are more likely to be correlated. The changed obligation was determined in accordance with IAS 19 (2011) in the same way as the actual obligation, using the projected unit credit method.

Severance payments	Present value of obligation (DBO)
	31 December 2013

in TEUR	Change in assumption	increase in assumption	decrease in assumption
Interest rate	+/- 0.5 percentage points	-235	+259
Increases in salaries	+/- 0.5 percentage points	+251	-231

### Pension plans (defined contributions)

Payments made under the defined contribution plans (pensions and other providence funds) were expensed and amounted to TEUR 559 in 2013 (2012: TEUR 775). For the following year, a similar amount of contributions is expected to be paid as in the current financial year.

### Note 19

### Other payables

Other long-term payables were as follows:

	31 December 2013	31 December 2012
Management interest	24,066	22,572
Contingent considerations	6,982	11,140
Participation rights	4,122	3,810
Non-compete agreements	2,308	2,588
Interest swap	139	279
Other obligations	0	80
Total	37,617	40,469

Other payables include contingent considerations from business combinations in the amount of TEUR 8,960, thereof short-term TEUR 1,978 (2012: TEUR 12,431, thereof short-term TEUR 1,291). The contingent purchase price payments determined as a certain percentage of achieved sales (to a certain extent when sales are exceeding a contractually agreed upon amount) are to be paid on a yearly basis with a residual term of further 2-6 years.

The liabilities for contingent purchase price payments were adjusted through profit and loss in 2013: increases are recorded as other financial expenses of TEUR -842 (2012: TEUR -2,518), decreases are recorded as other financial income of TEUR +3,547 (2012: TEUR +252). These adjustments were derived from discounting expected payments based on the most recent sales forecasts.

For the settlement of contingent purchase price payments in 2013 the payments exceeded the accrued amount in the previous balance sheet by TEUR 103 (2012: TEUR 88). Differences from settlements are recorded under other financial income or expenses, respectively. The addition of accrued interest related to liabilities for contingent purchase price payments in the amount of TEUR 1,004 (2012: TEUR 275) is recognized under interest expenses.

The management of the following (fully consolidated) subsidiaries held the following interest in their respective companies:

Company	31 December 2013	31 December 2012
BICO Drilling Tools Inc.	15.00 %	15.00 %
BICO Faster Drilling Tools Inc.	15.00 %	15.00 %
Schoeller-Bleckmann Energy Services L. L. C.	11.20 %	12.20 %
Schoeller-Bleckmann Darron Limited	9.00 %	9.85 %
Techman Engineering Limited	8.65 %	0.00 %
Knust-SBO L. L. C.	6.40 %	5.40 %
Schoeller-Bleckmann Darron (Aberdeen) Limited	5.35 %	7.35 %
Godwin-SBO L. L. C.	3.40 %	3.40 %
Schoeller-Bleckmann de Mexico S. A. de C. V.	3.00 %	3.00 %
Darron Tool & Engineering Limited	2.95 %	1.05 %

Accordingly, the management holds pro-rated shares in these companies.

As of 31 December 2013 participation rights were granted by Schoeller-Bleckmann Oilfield Technology GmbH, Ternitz, and DSI FZE, Dubai (2012: BICO-DSI Investment GmbH, Ternitz).

The effective interest expense recorded for management interest and participation rights in 2013 at TEUR 5,387 (2012: TEUR 3,508) is recorded under interest expenses. In 2012 these effective interest expenses were recognized under other financial expenses. In order to enhance accurate presentation of the Company's financial performance these expenses were reclassified retrospectively into interest expenses (see Note 4 – Retrospective adjustments).

# Note 20

### **Share capital**

The share capital of the Company as of 31 December 2013 as well as of 31 December 2012 was EUR 16 million; divided into 16 million common shares with a par value of EUR 1.00 each.

The Ordinary Shareholders' Meeting on 25 April 2012 authorized the Management Board for a period of 30 months to buy back own shares of the Company up to a maximum of 10% of the share capital, the redemption price has to be EUR 1.00 at least and EUR 300.00 at the most. In 2013 the Company acquired 47,877 own shares for a purchase price of TEUR 3,684. In 2012 this right was not exercised.

As of 31 December 2013, the Company holds 87,761 of its own shares (2012: 39,884 shares) at acquisition costs of TEUR 5,238 (2012: TEUR 1,554), equaling a 0.55% share in its capital stock (2012: 0.25%). There are 15,912,239 shares in circulation (2012: 15,960,116).

In connection with the business combination with EXOKO COMPOSITES COMPANY LLC. in 2010, a conditional earn-out of 50,000 shares of the Company would become due, if future sales levels are achieved as agreed. Since the sales target was not met in 2013, no dilution in the number of shares in circulation was effected at 31 December 2013.

As of 31 December 2013, approximately 31% of the share capital is held by Berndorf Industrieholding AG, Berndorf (2012: 31%).

### Note 21

### Legal reserve - non-distributable

Austrian law requires the establishment of a legal reserve in the amount of one tenth of the nominal value of the Company's share capital. As long as the legal reserve and other restricted capital reserves have not reached such an amount, the Company is required to allocate five percent of its annual net profit (net of amounts allocated to make up losses carried forward from prior years, after changes in untaxed reserves have been taken into consideration) to such reserves. For the formation of such reserves, only the annual financial statements of the parent company are relevant, which are prepared in accordance with Austrian Accounting Principles. No further allocation is required because of the contributions already made.

### Note 22

### Other reserves

The other reserves as shown in the balance sheet result from accelerated depreciation on specific, non-current assets for which a tax break is available. These reserves are untaxed profit allocations.

# Non-controlling interests

The amount in the balance sheet represents the portion of the equity which is held by non-controlling interests relating to the following companies:

	2013	2012
BICO-DSI Investment GmbH	10%	10%
DSI FZE	10%	10%
Drilling Systems International Limited	10%	10%

# Note 24

### Additional breakdown of revenues

### Net sales consist of:

in TEUR	2013	2012
Sale of goods and services	361,897	416,120
Operating lease revenue	96,676	96,026
Total net sales	458,573	512,146

The Company leases drilling machinery under operating leases with terms of less than a year. The respective leasing fees are charged to customers according to the duration of use.

# Additional breakdown of expenses

As the Company classifies its expenses by function, the following additional information is given as required by IAS 1 (disclosure according to "total cost accounting method"):

in TEUR	2013	2012 adjusted *)
Material expenses	171,719	229,109
Personnel expenses	97,868	104,628
Depreciation property plant & equipment	32,124	30,403
Amortization other intangible assets (including impairments)	14,213	9,207

<sup>\*)</sup> See Note 4 - Retrospective adjustments

# Note 26

### Other operating income and expenses

The main contents in the position other operating expenses are:

in TEUR	2013	2012 adjusted *)
Exchange losses	7,937	11,491
Research and development expenses	5,601	3,728

<sup>\*)</sup> See Note 4 - Retrospective adjustments

Up to present development costs were not capitalized due to the uncertainties of the future economic benefits attributable to them.

The main contents in the position other operating income are:

in TEUR	2013	2012
Exchange gains	6,333	12,218
Other income	3,599	3,125

# Note 27

### **Income taxes**

A **reconciliation of income taxes** applying the Austrian statutory tax rate to income taxes stated for the Group is as follows:

in TEUR	2013	2012 adjusted *)
Income tax expense at tax rate of 25%	-20,982	-27,760
Foreign tax rate differentials	-1,475	-3,657
Not deductable expenses	-845	-620
Income exempt from tax and tax incentives	3,210	1,509
Withholding and other foreign taxes	-1,771	-1,709
Prior year adjustments	229	-110
Tax loss carryforwards not recognized	-369	0
Other differences	-601	-1,771
Consolidated income tax expense	-22,604	-34,118
Profit before tax	83,928	111,042
Profit allocation to management participations	3,537	3,508
	87,465	114,550
Consolidated income tax expense	-22,604	-34,118
Consolidated tax rate	25.8 %	29.8 %

<sup>\*)</sup> See Note 4 - Retrospective adjustments

The **components of income taxes** were as follows:

in TEUR	2013	2012 adjusted *)
Current taxes	-25,138	-35,169
Deferred taxes	2,534	1,051
Total	-22,604	-34,118

<sup>\*)</sup> See Note 4 - Retrospective adjustments

**Deferred taxes** mainly result from the formation and reversal of temporary differences and the capitalization of current tax losses.

The following income taxes were recognized under "other comprehensive income":

in TEUR	2013	2012 adjusted *)
Current taxes		
Exchange rate differences	-59	-144
Remeasurements IAS 19 (2011)	-64	226
Deferred taxes		
Exchange rate differences	252	205
Total	129	287

<sup>\*)</sup> See Note 4 - Retrospective adjustments

The total balance of deferred taxes included in the balance sheet was increased by TEUR 606 during 2013 due to exchange rate differences.

The utilization of tax loss carry forwards reduced effective taxes by TEUR 0 in 2013 (2012: TEUR 235). Changes in income tax rates in 2013 had a positive effect on income taxes in the amount of TEUR 140.

The payment of dividends to the shareholders will not result in any implications on income taxes for the business year 2013 and the comparative period of 2012 for the Company.

## **Segment reporting**

The Company operates worldwide mainly in one industry segment, the designing and manufacturing of drilling equipment for the oil and gas industry.

For management purposes, the Group is organized into regions. Accordingly, the segment reporting is made by regions, the allocation of the business units is based on the location of the business units. No operating segments have been aggregated to form the reportable operating segments. Management monitors revenues and operating results of the business units separately for the purpose of making decisions about resource allocation.

As the figures stated represent a summary of the single balance sheets and income statements of the consolidated companies, holding adjustments and consolidation entries (elimination of intercompany profits and other group transactions) have to be taken into account, in order to arrive at the reported group numbers.

Intersegment sales are carried out in accordance with the "at arm's length" principle.

As shown in the following schedule, the Company's operations are concentrated in North America and Europe:

Year 2013 in TEUR		North	Other	SBO-Holding & consolidation	
IN TEUR	Europe	America	regions	adjustments	SBO Group
Sales by origin					
External sales	133,347	267,251	57,975	0	458,573
Intercompany sales	94,245	17,562	4,342	-116,149	0
Total sales	227,592	284,813	62,317	-116,149	458,573
Operating income	51,044	36,320	8,516	-5,677	90,203
Attributable assets	220,753	300,985	104,456	77,266	703,461
Attributable liabilities	106,161	88,291	32,828	93,994	321,274
Capital expenditure	38,905	16,222	7,594	36	62,757

### Sales by product line

in TEUR	2013	2012
High-precision components	237,010	283,373
Oilfield supplies and services	221,563	228,773
Total Sales	458,573	512,146

The following categories are used, based on the intended purpose of the goods and services.

### 1. High-precision components

For applications in the MWD/LWD technology sector, collars and internals made of highly alloyed steel and other non-magnetic metals are required. These collars and internals are used to mount antennas, sensors, batteries, generators and other kind of electronic parts, for making measurements and analyses during the drill operation. All those components need the utmost high dimensional accuracy in intricate machining.

### 2. Oilfield supplies and services

This group comprises the following products:

- Non-Magnetic Drill Collars (NMDC), steel bars which are used to prevent magnetic interference during MWD operations.
- Drilling motors, which drive the bit for directional drilling operations.
- Circulation tools steer the flow direction of drilling muds in the drill string.
- Various other tools for the oilfield such as stabilizers, reamers, hole openers, drilling jars and shock tools.

In addition to the manufacture of the above mentioned products, service and repair work is carried out. These activities focus on drillstring components which need to be inspected, checked for magnetic inclusions, rethreaded, buttwelded, resurfaced with hard metal, reground, shot peened, etc. as quickly as possible and with the highest standard in workmanship.

### **Geographic information:**

**Sales** to external customers were as follows:

in TEUR	2013	2012
Austria	2,949	3,303
Great Britain	48,313	40,726
U. S. A.	252,540	283,908
Other countries	154,771	184,209
Total Sales	458,573	512,146

The classification is based on the location of the customer.

For information regarding most important customers we refer to Note 32.

### Long-term assets are located as follows:

in TEUR	2013	2012
Austria	64,638	44,357
Great Britain	58,126	61,069
U. S. A.	102,355	108,860
Other countries	72,453	77,827
Total Sales	297,572	292,113

Assets are classified according to the location of the entity.

### Note 29

### Remuneration for the executive and supervisory board

The remuneration paid to the Executive Board was as follows:

20	1	2
ZU	•	- 5

in TEUR	fixed	variable	total
Gerald Grohmann	439	626	1,065
Franz Gritsch	356	483	839
Total	795	1,109	1,904

2012				
in TEUR	fixed	variable	total	
Gerald Grohmann	444	608	1,052	
Franz Gritsch	355	474	829	
Total	799	1,082	1,881	

Expenses for pensions and severance payments relating to the Executive Board amounted to TEUR 187 (2012: TEUR 442). Thereof, TEUR 97 (2012: TEUR 294) referred to defined contribution pension plans

The remuneration for the Supervisory Board amounted to TEUR 128 in the business year 2013 (2012: TEUR 93), which is a combination of a flat rate and a variable rate depending on the Group's results.

In 2013 and 2012 no loans were granted to the members of the Executive Board or to the Supervisory Board, respectively.

### Note 30

### Transactions with related parties

The following transactions with related but non-consolidated companies and persons were carried out at generally acceptable market conditions:

The law firm Schleinzer & Partner is the legal consultant to the Company. One of the law firm's partners, Dr. Karl Schleinzer, is a member of the Supervisory Board. Total charges for 2013 amounted to TEUR 36 (2012: TEUR 36), thereof outstanding as of 31 December 2013 is TEUR 0 (31 December 2012: TEUR 12).

In the business year 2013 BICO-DSI Investment GmbH, Ternitz paid dividends to its shareholders at a total amount of TEUR 2,450 (2012: TEUR 0). Thereof TEUR 245 were paid to the executive board member of SCHOELLER-BLECKMANN Oilfield Equipment AG, Gerald Grohmann, who held 10% of the shares of this company during the full year 2013.

### Note 31

### **Financial instruments**

#### **Derivative Financial Instruments**

### 1. Forward exchange contracts

The Austrian company hedges its net receivables and order backlog denominated in US dollars and CAN dollars on an ongoing basis by entering into forward exchange contracts. All transactions have short-term durations (3 – 8 months).

Forward exchange transactions as of 31 December 2013	Hedged receivables in TEUR	Receivables at balance sheet date rates in TEUR	Fair value in TEUR
USD	22,776	22,444	+332
CAD	1,870	1,799	+71
Forward exchange transactions as of 31 December 2012	Hedged receivables in TEUR	Receivables at balance sheet date rates in TEUR	Fair value in TEUR
USD	33,322	32,580	+742
CAD	2,295	2,202	+93

The forward exchange transactions are measured at fair value and recognized in the profit and loss statement, since the requirements under IAS 39 for hedge accounting are not fully met.

#### 2. Interest swap

The Company entered into an interest swap until 2015. For this purpose, a variable interest rate was swapped with a fixed interest rate of 5.48%.

The fair value at 31 December 2013 amounted to TEUR - 139 (31 December 2012: TEUR - 279), the variance was expensed into profit and loss.

#### 3. Other derivative financial instruments

The Group has recognized liabilities for contingent purchase price payments from business combinations (see Note 19) and an option commitment relating to cancelable non-controlling interests (see Note 14).

#### **Overview financial instruments**

The following table shows the financial instruments, classified in accordance with IAS 39 and IFRS 7:

		Cate	gory acc. to IA	AS 39		Classification acc. to IFRS 7: Valuation method

#### Fair value of financial instruments

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have significant effects on the recorded fair value are observable, either directly or indirectly;

Level 3: Techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The financial instruments measured at fair value are classified as follows:

2013 in TEUR	Balance sheet item	Total	Level 2	Level 3
Assets				
Derivatives	Other receivables and assets	394	394	0
Liabilities				
Derivatives	Other liabilities	-13,259	-139	-13,120
2012 in TEUR	Balance sheet item	Total	Level 2	Level 3
Assets				
<b>Assets</b> Derivatives	Other receivables and assets	835	835	0
	Other receivables and assets	835	835	0

During the reporting years 2013 and 2012, there were no transfers between level 1 and level 2 fair value measurements. In general, if required, transfers are carried out at the end of each reporting period.

Derivatives shown under level 3 only consist of contingent liabilities for purchase price payments, which are disclosed in Note 14 and 19, and the option commitment relating to cancelable non-controlling interests to purchase the offered shares from the minority shareholders due to the business combinations (see Note 14).

in TEUR	2013	2012
As of 1 January	-18,484	-7,275
Additions from business combinations	0	-3,275
Addition from option commitment relating to cancelable non-	-486	-6,313
controlling interests		
Addition of accrued interest	-3,323	-2,379
Revaluation gains	8,246	2,615
Revaluation losses	-842	-2,518
Disposals from settlements of contingent purchase price payments	1,366	449
Currency adjustment	403	212
As of 31 December	-13,120	-18,484

Revaluation gains and losses as shown in the table above refer to financial instruments still existing at balance sheet date. Revaluation gains are recognized under other financial income, revaluation losses under other financial expenses.

In 2013 an unilateral capital increase by one of the option holding non-controlling interests resulted in an increase of the option liability by TEUR 486 and a reduction of consolidated equity by TEUR 131.

The foreign currency forward contracts are measured based on observable spot exchange rates. The fair value of interest swaps has been determined using a discounted cash flow model based on interest curves observable on the market.

The contingent purchase price payments from business combinations and the option commitment relating to cancelable non-controlling interests are measured at balance sheet date according to the underlying agreements based on the expected discounted payments using the most recent sales forecast. The contingent purchase price payments determined as a certain percentage of achieved sales (to a certain extent when sales are exceeding a contractually agreed upon amount) are to be paid on a yearly basis with a residual term of further 2-6 years. The exercise price of the option commitment relating to cancelable non-controlling interests is based on the achieved financial results of the acquired entity. The liabilities are discounted using a risk adequate discount rate for the duration of each liability.

The sensitivity analysis for significant, non-observable input factors is as follows:

in TEUR	Assumption	Change in assumption	If assumption increases, liability changes by	If assumption decreases, liability changes by
Option Commitment relating to	Net results	+/- 10%	+403	-405
canceable non-controlling interests	Interest rate 38.3%	+/- 10%	-1,184	+2,378
<b>Contingent Purchase price payments</b>	Sales	+/- 10%	+1,810	-1,810
from business combinations	Interest rate 38.3%,16.3%, 4%	+/- 10%, +/- 1%, +/- 1%	-140	+153

For assessing the fair value of lendings, borrowings and leasing obligations, the expected cash-flows have been discounted using market interest rates. The fair value for bonds was derived from the stock exchange price.

Regarding bank and other long-term loans with variable interest, the interest rates charged are current market rates, resulting in the fact that the carrying values equal the fair values to a large extent.

Cash and cash equivalents, trade receivables and payables and all other items have mostly short residual lives. Therefore, the carrying values equal the fair values at the balance sheet date.

For each category of financial instruments which are amortized at acquisition costs, both the carrying value and the deviating fair value are provided in the table below:

		2013		2012	
		Carrying	'	Carrying	
in TEUR	Level	value	Fair value	value	Fair value
Liabilities					
Bonds	1	-19,980	-21,400	-39,951	-41,000
Borrowings from banks, finance lease obligations and other loans	2	-155,001	-155,130	-132,640	-134,405

#### Net result from financial instruments

The following table shows the net result by classification, according to IAS 39:

Year 2013		Revaluation		Deletion/Disposal		_	
in TEUR	Allowance	P/L	OCI (*)	P/L	OCI (*)	Net result	
Loans and receivables	+171	-	-	-	-	+171	
Derivatives	-	+3,779	-	-	-	+3,779	
Year 2012		Reval	uation	Deletio	n/Disposal	_	
in TEUR	Allowance	P/L	OCI (*)	P/L	OCI (*)	Net result	
Loans and receivables	-671	-	-	-	-	-671	
Derivatives	-	+380	-	_	_	+380	

<sup>\*)</sup> OCI = other comprehensive income

The total amount of interest expenses determined by using the effective interest rate method for financial liabilities not valued at fair value through profit or loss is TEUR 11,301 (2012: TEUR 9,157).

### Note 32

### Risk management

The operations of the Company are exposed to a great number of risks that are inextricably linked to its worldwide business activities. Efficient steering and control systems are being used to detect, analyze, and cope with these risks, with the help of which the management of each company monitors the operating risks and reports them to the group management board.

From a current point of view, no risks are discernible that may pose a threat to the survival of the Company.

#### O General economic risks

The business situation of Schoeller-Bleckmann Oilfield Equipment highly depends on cycles, in particular on the cyclical development of oil and gas drilling activities performed by the international oil companies. In order to minimize the risks of pertinent order fluctuations, the manufacturing companies of the Group have been designed to ensure maximum flexibility.

#### O Sales and procurement risks

The market for products and services of the Company is to a great extent determined by continuous development and the application of new technologies. Therefore, securing and maintaining the Company's customer stock depends on the ability to offer new products and services tailored to the customers' needs.

In the year 2013, the three biggest customers (which are the worldwide dominant service companies in the directional drilling market) accounted for 58.1% of all sales worldwide (2012: 61.6%). SBO addresses the risk of potential sales declines following the loss of a customer by means of continuous innovation, quality assurance measures and close customer relationship management.

On the procurement side, raw materials and in particular alloy surcharges for non-magnetic steel are subject to significant price fluctuations. These alloy surcharges are partly passed on to the customers as part of our agreements.

The Company procures non-magnetic steel, its most essential raw material, almost exclusively from one supplier and therefore faces the risk of delayed deliveries, capacity shortages or business interruptions. From today's perspective, the Company foresees no difficulty in obtaining quality steel from this supplier in future. In the event this supplier falls short of deliveries, there is only limited potential of substitution in the short-term.

#### O Substitution risks

SBO is subject to the risk of substitution of its products and technologies, which may result in the emergence of new competitors. SBO counteracts that risk through continuous market observation, intensive customer relationship management and proprietary innovations.

#### Financial risks

As a direct result of its business operations, the Company on the one hand holds various financial assets, such as trade receivables as well as cash and cash equivalents. On the other hand, it also uses financial instruments to ensure the continuity of its operations, such as bonds, payables due to banks and trade payables.

In addition, the Company also uses derivative financial instruments to hedge interest rate and foreign exchange risks arising from its financing and business operations. However, derivates are not used for trading or speculative purposes.

The financial instruments principally entail interest-related cash-flow risks, as well as liquidity, currency and credit risks.

### Foreign currency risks

Foreign currency risks arise from fluctuations in the value of financial instruments or cash-flows caused by foreign exchange fluctuations.

Foreign currency risks arise in the Company where balance sheet items as well as income and expenses are generated or incurred in a currency other than the local one. Forward exchange contracts (mainly in US dollars) are concluded in order to secure receivables and liabilities in foreign currencies.

From a long-term perspective, SBO invoices approximately 80% of its sales volume in US dollars. This is due to its customer structure. All dominating service companies on the directional drilling market are located in the US, handling their worldwide activities in US dollars. Also from a long-term perspective, approximately 50% of the costs are incurred in US dollars, with important production facilities being located both in the US and Europe. In order to minimize the currency exposure involved, orders are hedged between the times of order acceptance and invoicing. However, for reasons of costs and expedience, SBO does not hedge its entire net dollar exposure. In any case, the profit generated by SBO is contingent on the dollar-euro exchange rates.

The Company also faces currency translation risks when sales revenues, operating results and balance sheets of foreign subsidiaries are converted into the group currency. The respective values depend on the exchange rate in force at the respective date. The US is not only the main market for the Group but also the base of important production facilities with significant investments. Therefore, changes in the US dollar rate have a strong impact on the group balance sheet, which SBO addresses by taking out US dollar loans.

The table below shows the implications of a potential change in the US dollar exchange rate on the consolidated financial statements only in respect of the value of the derivative instruments in place at balance sheet date, as no material accounts receivable or accounts payable exist which are not denominated in the functional currency of each group currency:

in TEUR	20	13	2012	
Changes in EURO – US dollar rate	+10 cents	-10 cents	+10 cents	-10 cents
Change in profit before taxes	+1,651	-1,651	+2,582	-2,582

#### Interest rate risks

Interest rate risks result from fluctuations in interest rates on the market; these fluctuations may lead to changes in value of financial instruments and interest-related cash-flows.

All long-term borrowings at 31 December 2013 have fixed interest rates; therefore they are without any interest rate risk. However, the fair value of these credit facilities is subject to fluctuations. The interest rates for all loans are disclosed in Note 17. With the exception of bonds, loans and finance-lease obligations, no other liabilities are interest bearing and therefore not subject to any interest rate risk.

The interest rate risk is further reduced by short-term interest-bearing investments which the Company holds on a permanent basis. Depending on whether there is a credit or debit balance, the interest risk may result from increasing or decreasing interest rates.

The table below shows the reasonably foreseeable implications of a potential change in interest rates on profit before taxes (there are no implications on group equity). These implications could affect the amount of interest payable to banks or interest earned on bank deposits, both only in the case of variable rates.

in TEUR	20	013	2012	
Change in basic points	+10	+20	+10	+20
Change in profit before taxes	+137	+274	+70	+140

#### **Credit risks**

Credit risk arises from the non-compliance with contractual obligations by business partners and the resulting losses. The maximum default risk equals the book value of the respective receivables.

The credit risk with our customers can be considered as low as there have been long-standing, stable and smooth business relations with all major customers. Furthermore, we regularly check the credit rating of new and existing customers and monitor the amounts due. Adequate allowances for default risks are established.

With regard to loans granted to the management of subsidiaries, the default risk is eliminated as the loans are securitized by the acquired shares (see Note 10).

As for other financial assets (liquid funds, marketable securities), the maximum credit risk equals the respective book values, in the event the counterparty defaults. The pertinent credit risk may, however, be considered as low since we choose highly rated banks and well-renowned issuers of securities only.

### Liquidity risks

Liquidity risk bears the uncertainty whether or not the Company has the liquid funds required to settle its obligations at all times and in a timely manner.

Due to the high self-financing capability and earning power of the Company, the liquidity risk is relatively low. The Company earns liquid funds through its operating business and uses external financing when needed. The worldwide spread of financing sources prevents any significant concentration of risk.

As the most important risk spreading measure, the group management constantly monitors the liquidity and financial planning of the Company's operative units. Also the financing requirements are centrally managed and based on the consolidated financial reporting of the group members.

The table below shows all obligations for repayments and interest on financial obligations accounted for and agreed by contract as of 31 December. For the other obligations, the non-discounted cash-flows for the following business years are stated.

in TEUR	Due at call	2014	2015	2016	2017 cont'd

### Other financial market risks

The risk variables are in particular the share prices and stock indexes.

### o Capital management

It is a paramount goal of the Group to ensure that we maintain a high credit rating and equity ratio in order to support our operations and to maximize the shareholder value.

It is particularly the gearing ratio (net indebtedness as a percentage of equity) that is used to monitor and manage capital. The indebtedness includes bonds, long-term loans, payables due to banks and leasing rates, less cash and cash equivalents and long-term financial investments.

Gearing was 4.3% as of 31 December 2013 and 9.5% as of 31 December 2012.

in TEUR	31 December 2013	31 December 2012
Bank loans	32,132	31,455
Long-term loans	122,788	100,913
Finance lease obligations	81	272
Bonds	19,980	39,951
-Less: Cash and cash equivalents	-158,366	-138,260
Net debt	16,615	34,331
Total equity	382,187	363,130
Gearing	4.3 %	9.5 %

The Company considers a gearing ratio of up to 60% reasonable without having an impact on the refinancing conditions.

In addition an average dividend ratio of 30 - 60% (of the consolidated profit after tax) payable to the shareholders is deemed to be appropriate.

### Note 33

### Contingencies

No contingencies existed as of the balance sheet dates 31 December 2013 and 31 December 2012.

### Note 34

#### **Other Commitments**

The Company has operating lease commitments and commitments for capital expenditure (see Note 8). Apart from that no other commitments existed.

### Note 35

### Cash flow statement

The consolidated cash flow statement displays the change of cash and cash equivalents in the reporting year as a result of inflows and outflows of resources.

The liquid fund corresponds to cash and cash equivalents in the consolidated balance sheet and only includes cash on hand and bank balances as well as short-term investments/marketable securities.

In the cash flow statement, cash flows are classified into cash flow from operating activities, cash flow from investing activities and cash flow from financing activities.

The cash flows from foreign operations have been allowed for by applying average foreign exchange rates.

The cash flow from operating activities is determined using the indirect method, based on income after taxation and adjusting it for non-cash expenses and revenues. The result plus changes in net working capital (excluding liquid funds) as shown in the balance sheet is the cash flow from operating activities.

Inflows/outflows of resources from current operations include inflows and outflows from interest payments and income taxes.

Dividend payments are shown under cash flow from financing activities.

For the changes of shares in subsidiaries and participation rights held by managers in 2013 amounting to TEUR -1,487 (2012: TEUR +5,007) the Company granted loans or reduced loans to the participants in the same amounts. Hence, no cash flows were effected.

### Note 36

**Business combinations** 

#### Year 2013

No business combinations were executed in 2013.

#### Year 2012

As of 28 February 2012, 85.02% of the shares of D-TECH (UK) Limited, Bristol, UK, including its subsidiary D-TECH Inc., Houston, US, were acquired. D-TECH (UK) Limited is an engineering company in the process of being set up. By integrating this company into the SBO Group, the Group expects to gain know-how to optimize the product range in the segment Oilfield Supplies & Services.

Furthermore, the company Foxano AG, Luzern, Switzerland, was acquired on 13 December 2012. This company does not yet carry out any operating activities.

For further information on business combinations in 2012 we refer to the consolidated financial statements 2012. Regarding the development of the liabilities for contingent purchase price payments we refer to Note 19.

### Note 37

### **Personnel**

The total average number of employees was as follows:

	2013	2012
Blue collar	1,215	1,230
White collar	349	329
	1,564	1,559

### Note 38

Events after the balance sheet date

After the balance-sheet date no events of particular significance have occurred that would have changed the presentation of the Group's financial position and financial performance of the group financial statements as of 31 December 2013.

In order to condense the group structure, a resolution to merge the two non-operating entities Schoeller-Bleckmann Drilling and Production Equipment GmbH, Ternitz, and BICO-DSI Investment GmbH, Ternitz, with SCHOELLER-BLECKMANN Oilfield Equipment Aktiengesellschaft, Ternitz, was adopted on 21 February 2014. In this regard the minority shareholder of BICO-DSI Investment GmbH will withdraw in 2014 and will be compensated with 57,761 SBO shares (see Note 30). Non-controlling interests amounting to TEUR 1,843 will cease to exist. No further effects on the consolidated financial statements will occur.

In addition, no further reportable events occurred.

### Note 39

### Proposed dividend

The Executive Board proposes to the shareholders that a dividend of EUR 0.50 per share (2012: EUR 0.50) plus a bonus of EUR 1.00 per share (2012: EUR 1.00), in total EUR 1.50 (2012: EUR 1.50) per share should be paid. Thus, the total distribution will amount to MEUR 24.0 compared to MEUR 23.9 in the preceding year.

### Note 40

### **Expenses incurred for the group auditors**

The following expenses were incurred from Ernst & Young Wirtschaftsprüfungsgesellschaft m.b.H.:

in TEUR	2013	2012
Audit of the consolidated annual financial statements	73	65
Due diligence	0	162
Other services	56	52

End of current appointment: 2017

In each year one member of the Supervisory Board withdraws from the Supervisory Board with the end of the Annual General Meeting, thereby guaranteeing that in the course of the Annual General Meeting the election of one member of the Supervisory Board can be resolved. As far as the order of withdrawal cannot be ascertained from the term of office it shall be ascertained by lot. In the Supervisory Board meeting that takes place before the Annual General Meeting for consultation on the proposed resolutions and elections in accordance with section 108 paragraph 1 Austrian Stock Corporation Act the lot shall decide which member of the Supervisory Board shall withdraw with the end of the next Annual General Meeting. The withdrawing member can immediately be reelected.

Ternitz, 24 February 2014

Gerald Grohmann Franz Gritsch Members of the Executive Board

### AUDITOR'S REPORT \*1 (TRANSLATION)

### Report on the Financial Statements

We have audited the accompanying consolidated financial statements of SCHOELLER-BLECKMANN OILFIELD EQUIPMENT Aktiengesellschaft, Ternitz, for the fiscal year from January 1, 2013 to December 31, 2013. These consolidated financial statements comprise the consolidated balance sheet as of December 31, 2013, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated cash flow statement and the consolidated statement of changes in equity for the fiscal year ended December 31, 2013, and the notes.

# Management's Responsibility for the Consolidated Financial Statements and for the Accounting System

The Company's management is responsible for the group accounting system and for the preparation and fair presentation of the consolidated financial statements in accordance with the International Financial Reporting Standards (IFRSs) as adopted by the EU, and the additional requirements under Section 245a UGB. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; making accounting estimates that are reasonable in the circumstances.

### Auditor's Responsibility and Description of Type and Scope of the Statutory Audit

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with laws and regulations applicable in Austria and Austrian Accounting Standards on Auditing, as well as in accordance with International Standards on Auditing (ISAs), issued by the International Auditing and Assurance Standards Board (IAASB) of the International Federation of Accountants (IFAC). Those standards require that we comply with professional guidelines and that we plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Group's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for

the purpose of expressing an opinion on the effectiveness of the Group's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a reasonable basis for our audit opinion.

### Opinion

Our audit did not give rise to any objections. In our opinion, which is based on the results of our audit, the consolidated financial statements comply with legal requirements and give a true and fair view of the financial position of the Group as of December 31, 2013 and of its financial performance and its cash flows for the fiscal year from January 1, 2013 to December 31, 2013 in accordance with the International Financial Reporting Standards (IFRSs) as adopted by the EU.

### Comments on the consolidated Management Report

Pursuant to statutory provisions, the consolidated management report is to be audited as to whether it is consistent with the consolidated financial statements and as to whether the other disclosures are not misleading with respect to the Company's position. The auditor's report also has to contain a statement as to whether the consolidated management report is consistent with the consolidated financial statements and whether the disclosures pursuant to Section 243a UGB (Austrian Commercial Code) are appropriate.

In our opinion, the consolidated management report is consistent with the consolidated financial statements. The disclosures pursuant to Section 243a UGB (Austrian Commercial Code) are appropriate.

Vienna, February 24, 2014

Ernst & Young Wirtschaftsprüfungsgesellschaft m.b.H.

Mag. Karl Fuchs mp Certified Auditor Mag. Markus Jandl mp Certified Auditor

<sup>\*)</sup> Disclosure, publication and duplication of the financial statements together with the auditor's report according to Section 281 (2) UGB in a form not in accordance with statutory requirements and differing from the version audited by us is not permitted. Reference to our audit may not be made without prior written permission from us.

### REPORT OF THE SUPERVISORY BOARD OF THE SBO AG CONCERNING THE 2013 BUSINESS YEAR

During the business year 2013 the Supervisory Board performed all duties assigned to it by law and the articles of association and held 5 meetings. The Executive Board provided the Supervisory Board with regular written and verbal reports concerning business developments and the Company's status, including the situation of the Group and Group companies. Focus of discussions were the strategic development of the Group, key business events and measures. An Audit Committee for handling questions regarding the financial statements and a Remuneration Committee for handling questions regarding the reimbursement of the Executive Board was installed.

The financial statements as of 31 December 2013 and the management report including the Company's accounting records were audited by SST Schwarz & Schmid Wirtschaftsprüfungsgesellschaft m.b.H. The audit revealed that the financial statements comply with legal requirements, that they give a true and fair view of the Company's assets and financial position on 31 December 2013 and of the Company's earnings for the fiscal year from 1 January 2013 to 31 December 2013 in compliance with generally accepted Austrian accounting principles, and that the management report is consistent with the financial statements.

The consolidated financial statements as of 31 December 2013 of SBO Group, which were prepared in compliance with International Financial Reporting Standards (IFRSs) as adopted by the EU, and the consolidated management report, which was prepared in accordance with the Austrian Commercial Code (UGB), were audited by Ernst & Young Wirtschaftsprüfungsgesellschaft m.b.H. The auditor confirmed that the consolidated financial statements comply with legal requirements, that they give a true and fair view of the Group's assets and financial position on 31 December 2013 and of the Group's financial performance and cash flows for the fiscal year from 1 January 2013 to 31 December 2013, and that the Group management report is consistent with the consolidated financial statements.

The audits did not give rise to any objections. The auditors issued an unqualified audit opinion on the financial statements for 2013 and the consolidated financial statements for 2013.

At its meeting on 7 March 2014, the Supervisory Board approved the financial statements as of 31 December 2013 and the management report, thereby adopting the financial statements 2013 according to sec. 96 para. 4 Austrian Stock Corporation Act (AktG). In addition, the Supervisory Board approved the consolidated financial statements as of 31 December 2013 and the consolidated management report, the Corporate Governance Report submitted by the Executive Board as well as the proposal for the distribution of profits 2013.

The Supervisory Board would like to thank the Executive Board and all the employees for their high level of dedication and their successful work during financial year 2013. The Supervisory Board would also like to thank the Group's shareholders and customers for their trust.

Ternitz, 7 March 2014

Norbert Zimmermann Chairman of the Supervisory Board

### **ANHANG ZUM JAHRESABSCHLUSS 2013**

#### I. Allgemeine Angaben

Der Jahresabschluss der SCHOELLER-BLECKMANN OILFIELD EQUIPMENT Aktiengesellschaft (SBO) wurde nach den Vorschriften des Unternehmensgesetzbuches (§§ 189ff UGB) in der geltenden Fassung erstellt.

Der Jahresabschluss wurde unter Beachtung der Grundsätze ordnungsmäßiger Buchführung sowie unter Beachtung der Generalnorm, ein möglichst getreues Bild der Vermögens-, Finanz- und Ertragslage des Unternehmens zu vermitteln, aufgestellt.

Bei der Erstellung des Jahresabschlusses wurde der Grundsatz der Vollständigkeit eingehalten. Bei der Bewertung der einzelnen Vermögensgegenstände und Schulden wurden der Grundsatz der Einzelbewertung und eine Fortführung des Unternehmens unterstellt. Dem Vorsichtsprinzip wurde dadurch Rechnung getragen, dass nur die am Abschlussstichtag verwirklichten Gewinne ausgewiesen wurden.

Für erkennbare Risiken und drohende Verluste, die aus dem vergangenen und früheren Geschäftsjahren resultieren und in der Zukunft schlagend werden könnten, wurden entsprechende Vorsorgen in die Bilanz eingestellt.

Die Gewinn- und Verlustrechnung wurde nach dem Gesamtkostenverfahren erstellt.

Die SBO erstellt einen Konzernabschluss gemäß § 245a UGB nach international anerkannten Rechnungslegungsgrundsätzen. Der Konzernabschluss wird beim Firmenbuch des Handelsgerichtes Wiener Neustadt hinterlegt.

### II. Bilanzierungs- und Bewertungsmethoden

Die beim Jahresabschluss 2012 angewendeten **Bilanzierungs- und Bewertungsmethoden** wurden beibehalten. Allfällige Ausweisänderungen sind bei den Erläuterungen zu den betreffenden Positionen angeführt.

Bei der Bewertung des **Anlagevermögens** wurde das Niederstwertprinzip eingehalten. Die vorgenommenen Abschreibungen tragen den verbrauchsbedingten und sonstigen Wertminderungen voll Rechnung. Die planmäßige Abschreibung wird linear vorgenommen.

Die Forderungen und sonstigen Vermögensgegenstände wurden nach dem strengen Niederstwertprinzip bilanziert. Fremdwährungsforderungen wurden mit dem Devisen-Geldkurs zum Bilanzstichtag oder zu niedrigeren Anschaffungskursen bewertet. Allen erkennbaren Einzelrisiken wurde durch Wertberichtigungen Rechnung getragen. Pauschalwertberichtigungen wurden nicht vorgenommen.

Auf Fremdwährung lautende **Guthaben bei Kreditinstituten** wurden mit dem Devisen-Geldkurs zum Bilanzstichtag bilanziert.

Die Bewertung der **Verbindlichkeiten** erfolgte unter Bedachtnahme auf den Grundsatz der Vorsicht mit ihrem Rückzahlungsbetrag. Fremdwährungsverbindlichkeiten wurden mit ihrem Entstehungskurs oder mit dem höheren Devisen-Briefkurs zum Bilanzstichtag bewertet.

Die Berechnung der **Abfertigungsrückstellungen** erfolgte mittels versicherungsmathematischem Verfahren gemäß IAS 19 (Methode der laufenden Einmalprämien). Hierzu wurden die folgenden Berechnungsannahmen verwendet: Zinssatz 3,0 % (Vorjahr: 3,0 %), Gehaltssteigerung 4,5 % (Vorjahr: 4,5 %) p. a., Pensionseintrittsalter gemäß den aktuellen gesetzlichen Regelungen.

Die Jubiläumsgeldrückstellungen wurden ebenfalls gemäß IAS 19 berechnet.

#### III. Erläuterungen zu den Posten der Bilanz und der Gewinn- und Verlustrechnung

#### 1. ERLÄUTERUNGEN ZUR BILANZ

#### ANLAGEVERMÖGEN

Die Entwicklung des Anlagevermögens ist im beiliegenden Anlagenspiegel dargestellt.

Das **abnutzbare Anlagevermögen** wird über folgende Nutzungsdauern planmäßig linear abgeschrieben:

EDV-Software
 Rechte
 Gebäude und Grundstückseinrichtungen
 Betriebs- und Geschäftsausstattung
 4 Jahre
 10 bis 50 Jahre
 4 bis 8 Jahre

In den **immateriellen Vermögensgegenständen** ist "Intellectual Property" (gewerbliche Schutz- und Musterrechte) enthalten, welches von einem verbundenen Unternehmen im Jahr 2008 erworben wurde (Buchwert per 31.12.2013: TEUR 3.999,1; Vorjahr: TEUR 4.420,0) und seit 2009 gegen Lizenzgebühr zur Nutzung überlassen wird.

Bei den Anteilen an verbundenen Unternehmen gab es folgende Bewegungen:

Schoeller-Bleckmann do Brasil Ltda.

KapitalerhöhungTEUR2.222,2TeilwertabschreibungTEUR- 2.486,6

- Foxano AG

Teilwertabschreibung TEUR - 5.600,0

Die Ausleihungen betrafen ausschließlich Konzerngesellschaften. Deren Fristigkeit stellt sich wie folgt dar:

in TEUR	<1 Jahr	1-5 Jahre	> 5 Jahre	Bilanzwert
31.12.2013	4.506,2	14.884,9	0,0	19.391,1
31,12.2012	3.557,2	21.569,6	0,0	25.126,8

Bei der Bewertung der **Fremdwährungsausleihungen** (USD) wurde vom Niederstwertprinzip Gebrauch gemacht.

Vom Zuschreibungswahlrecht gem. § 208 Abs. 2 UGB in Höhe von TEUR 1.168,4 wurde nicht Gebrauch gemacht (Vorjahr: TEUR 2.178,0). Die daraus resultierende steuerliche Belastung wäre TEUR 292,1 (Vorjahr: TEUR 544,5).

#### **UMLAUFVERMÖGEN**

#### Forderungen und sonstige Vermögensgegenstände

Die Restlaufzeit stellt sich wie folgt dar:

31.12.2013 (in TEUR)	RLZ < 1 Jahr	RLZ > 1 Jahr	Bilanzwert
Forderungen gegenüber verbundenen Unternehmen	45.025,6	3.708,6	48.734,2
sonstige Forderungen	57,4	10.498,6	10.556,0
Summe	45.083,0	14.207,2	59.290,2

31.12.2012 (in TEUR)	RLZ < 1 Jahr	RLZ > 1 Jahr	Bilanzwert
Forderungen gegenüber			
verbundenen Unternehmen	40.423,0	1.921,4	42.344,4
sonstige Forderungen	9,0	11.499,3	11.508,3
Summe	40.432,0	13.420,7	53.852,7

Die Forderungen gegenüber verbundenen Unternehmen resultieren ausschließlich aus Konzernfinanzierungen.

Die größten Positionen in den **sonstigen Forderungen** waren Darlehen an Mitarbeiter von Konzerngesellschaften (TEUR 10.478,8; Vorjahr: TEUR 11.479,5).

Erträge, welche nach dem Abschlussstichtag zahlungswirksam werden, betrafen Zinsabgrenzungen (TEUR 64,1; Vorjahr: TEUR 5,3).

### Eigene Anteile

Im Jahr 2013 hat die Gesellschaft 47.877 Stück eigene Aktien erworben (Vorjahr: 0 Stück). Zum Bilanzstichtag 2013 hält die Gesellschaft nun 87.761 Stück eigene Aktien (31.12.2012 39.884 Stück). Dies entspricht einem Anteil von 0,55 % am Grundkapital (Vorjahr: 0,25 %) mit einem Buchwert von TEUR 4.557,7 (Vorjahr: TEUR 873,5).

Vom Zuschreibungswahlrecht gemäß § 208 Abs. 2 UGB in Höhe von TEUR 680,1 (Vorjahr TEUR 680,1) wurde nicht Gebrauch gemacht. Die daraus resultierende steuerliche Belastung wäre TEUR 170,0 (Vorjahr: TEUR 170,0).

### **EIGENKAPITAL**

Das **Grundkapital** von TEUR 16.000,0 besteht aus 16.000.000 auf Inhaber lautende Aktien zu je EUR 1,00.

In der Hauptversammlung vom 25. April 2012 wurde der Vorstand für die Dauer von 30 Monaten ermächtigt, eigene Aktien der Gesellschaft bis zu maximal 10 % des Grundkapitals zu erwerben, wobei der niedrigste beim Rückerwerb zu leistende Gegenwert EUR 1,00 und der höchste beim Rückerwerb zu leistende Gegenwert EUR 300,00 beträgt. Im Jahr 2013 hat die Gesellschaft 47.877 Stück eigene Aktien um TEUR 3.684,2 erworben. Im Jahr 2012 wurde von dieser Ermächtigung kein Gebrauch gemacht

Die **gebundene Kapitalrücklage** betrug zum Bilanzstichtag unverändert TEUR 69.976,0 und resultiert aus dem Agio bei der Ausgabe junger Aktien in 1997 und in 2005.

Die gesetzliche Rücklage betrug zum Bilanzstichtag unverändert TEUR 785,3.

Die **freie Rücklage** betrug zum Bilanzstichtag TEUR 12.226,2 (Vorjahr: TEUR 15.910,4). Im Jahr 2013 erfolgte eine erfolgsneutrale Umwidmung in die Rücklage für eigene Anteile in der Höhe von TEUR 3.684,2.

Die **Rücklage für eigene Anteile** betrug zum Bilanzstichtag TEUR 4.557,7 (Vorjahr: TEUR 873,5). Dies entspricht dem Buchwert der eigenen Aktien zum Bilanzstichtag.

Gemäß dem Hauptversammlungsbeschluss vom 18. April 2013 wurden vom **Bilanzgewinn 2012** TEUR 23.940,0 an die Aktionäre ausgeschüttet und die verbleibenden TEUR 12.961,0 auf neue Rechnung vorgetragen.

Summe	53.786,1	83.848,1	14.653,8	152.288,0

Im Juni 2008 wurden zwei **Anleihen** im Gesamtnennbetrag von jeweils MEUR 20,0, eingeteilt in 800 untereinander gleichrangige auf den Inhaber lautende Teilschuldverschreibungen im Nennbetrag von je EUR 50.000 emittiert. Die Teilschuldverschreibungen werden zur Gänze durch zwei veränderbare Sammelurkunden verbrieft, die am Tag der Begebung bei der Oesterreichischen Kontrollbank Aktiengesellschaft, Wien, hinterlegt wurden. Einzelne Teilschuldverschreibungen oder Zinsscheine wurden nicht ausgegeben. Die Teilschuldverschreibungen werden bezogen auf ihren Nennbetrag bis zum Fälligkeitstag mit jährlich 5,75 % (Anleihe 2008-2013) bzw. 5,875 % (Anleihe 2008-2015) verzinst. Die Zinsen sind jeweils nachträglich am 18. Juni eines jeden Jahres zahlbar. Eine Teilschuldverschreibung wurde am 18. Juni 2013 zum Nennbetrag von MEUR 20,0 zurückgezahlt, die weitere ist am 18. Juni 2015 zum Nennbetrag von MEUR 20,0 fällig. Die Anleihen sind in den Dritten Markt an der Wiener Börse unter den ISIN AT0000A09U32 bzw. AT0000A09U24 einbezogen.

Die Verbindlichkeiten gegenüber verbundenen Unternehmen resultieren ausschließlich aus Konzernfinanzierungen.

In den **sonstigen Verbindlichkeiten** betrafen TEUR 1.818,3 (Vorjahr: TEUR 1.759,3) Aufwendungen, die nach dem Abschlussstichtag zahlungswirksam werden.

### **HAFTUNGSVERHÄLTNISSE**

Haftungsverhältnisse bestanden in folgendem Ausmaß:

	31.12	.2013	31.12.	.2012
in TEUR	Gesamtbetrag	davon für verbundene Unternehmen	Gesamtbetrag	davon für verbundene Unternehmen
Haftungen für Kredite und Kurssicherungen	34.265,1	34.265,1	39.515,6	39.515,6

Darüber hinaus wurden für ein Bankdarlehen eines verbundenen Unternehmens Pfandrechte an Liegenschaften der Gesellschaft bis zu einem Höchstbetrag von TEUR 9.000,0 eingeräumt (Vorjahr: TEUR 0,0).

Weiters hat die Gesellschaft gegenüber einem verbundenen Unternehmen eine Patronatserklärung mit Befristung bis März 2014 abgegeben, die eine unwiderrufliche Zusicherung enthält, das Unternehmen derart zu unterstützen, dass dieses jederzeit ihren finanziellen Verpflichtungen nachkommen kann.

### FINANZIELLE VERPFLICHTUNGEN

Im Zuge eines Unternehmenszusammenschlusses im Jahr 2012 hat die Gesellschaft den anderen Gesellschaftern das Recht eingeräumt, ihre Anteile der Gesellschaft anzubieten und hat sich diesfalls die Gesellschaft verpflichtet, die angebotenen Anteile zu erwerben. Der Kaufpreis ist von den erzielten Ergebnissen des erworbenen Unternehmens abhängig.

Die Gesellschaft hat sich verpflichtet, für eine Wettbewerbsvereinbarung jährlich USD 500.000 zu zahlen, sofern sich der Vertragspartner während der Laufzeit bis 2020 an die Vertragsbedingungen hält.

Für die Nutzung von nicht in der Bilanz ausgewiesenen Sachanlagen bestehen Mietverträge mit folgenden Verpflichtungen:

- fällig innerhalb 1 Jahr: TEUR 5,5 (Vorjahr: TEUR 5,5)
- fällig innerhalb der nächsten 5 Jahre: TEUR 5,5 (Vorjahr: TEUR 11,0)

Für **Bestellungen zu Sachanlagen** bestanden Verpflichtungen in der Höhe von TEUR 0,0 (Vorjahr: TEUR 0,0).

### 2) ERLÄUTERUNGEN ZUR GEWINN- UND VERLUSTRECHNUNG

### <u>UMSATZERLÖSE</u>

Die größten Posten sind:

in TEUR	2013	2012
Verrechnete Holdingleistungen	4.369,4	4.526,9
Mieterträge	1.647,9	2.122,2

Im Posten Aufwendungen für Abfertigungen und Leistungen an betriebliche Mitarbeiter-Vorsorgekassen sind Leistungen an betriebliche Mitarbeiter-Vorsorgekassen in der Höhe von TEUR 12,2 (Vorjahr: TEUR 10,3) enthalten.

Von den Aufwendungen für Abfertigungen und Pensionen entfallen TEUR 187,4 (Vorjahr TEUR 441,7) auf die Mitglieder des Vorstands.

### SONSTIGE BETRIEBLICHE AUFWENDUNGEN

Die größten Posten in den übrigen sonstigen betrieblichen Aufwendungen sind:

in TEUR	2013	2012
Kursverluste	935,0	325,2
Forschungs- und Entwicklungs- aufwendungen	900,0	48,1
Rechts-, Prüfungs- und Beratungskosten	569,5	2.666,3
Versicherungen	304,2	346,3

Darüber hinaus sind Spesen des Geldverkehrs, EDV-Aufwand sowie sonstige Verwaltungsund Vertriebsaufwendungen unter dieser Position verbucht.

### **BETEILIGUNGSERGEBNIS**

Die **Erträge aus Beteiligungen** des Jahres 2013 betreffen überwiegend die Ausschüttung aus 2013 von der Schoeller-Bleckmann Oilfield Technology GmbH.

### STEUERN VOM EINKOMMEN UND VOM ERTRAG

Die Schoeller-Bleckmann Oilfield Equipment AG hat die Möglichkeit der Bildung einer steuerlichen Unternehmensgruppe gemäß § 9 KStG unter Anwendung der Belastungsmethode genutzt. Gruppenmitglieder sind:

### Inland:

- Schoeller-Bleckmann Oilfield Technology GmbH., Ternitz.......(ab 2008),
- Schoeller-Bleckmann Drilling and Production Equipment GmbH., Ternitz.....(ab 2010),
- BICO-DSI Investment GmbH., Ternitz......(ab 2010).

### Ausland:

- Schoeller-Bleckmann de Mexico S. A. de C. V., Monterrey......(ab 2005),
- Schoeller-Bleckmann Oilfield Equipment Vietnam LLC, Binh Duong......(ab 2009),
- Schoeller-Bleckmann do Brasil Ltda., Macae.....(ab 2009).

Die aktive Steuerlatenz beträgt TEUR 1.357,5 (Vorjahr: TEUR 184,0). Sie wurde gemäß § 198 Abs. 10 UGB nicht in der Bilanz ausgewiesen.

Im Geschäftsjahr 2013 weist die Gesellschaft nach Verrechnung der Steuerumlagen an inländische Gruppenmitglieder in Höhe von TEUR 10.824,3 (Vorjahr: TEUR 17.531,6) einen Steuerertrag in Höhe von TEUR 903,6 (Vorjahr: TEUR 118,4) aus. Darin sind Aufwendungen für Quellensteuern in Höhe von TEUR 392,1 (Vorjahr: TEUR 424,6) sowie auf Vorjahre entfallende Steuern von TEUR 0,0 (Vorjahr: TEUR 180,9) enthalten.

### BILANZGEWINN

Das Geschäftsjahr 2013 schließt mit einem Jahresüberschuss von TEUR 11.502,4 Nach Berücksichtigung der Rücklagenbewegungen sowie zuzüglich des Gewinnvortrags aus 2012 ergibt sich ein Bilanzgewinn von TEUR 24.466,9.

Der Vorstand schlägt vor, an die dividendenberechtigten Aktien eine Dividende von EUR 1,50 je Aktie auszuschütten und den verbleibenden Bilanzgewinn auf neue Rechnung vorzutragen.

### GESCHÄFTSFÄLLE MIT NAHESTEHENDEN UNTERNEHMEN UND PERSONEN

Für das Geschäftsjahr 2013 liegen keine berichtspflichtigen Geschäftsfälle gemäß § 237 Z. 8b UGB vor.

Zur Straffung der Konzernstruktur wurde am 21. Februar 2014 beschlossen, die beiden nicht operativ tätigen Gesellschaften Schoeller-Bleckmann Drilling and Production Equipment GmbH, Ternitz, sowie die BICO-DSI Investment GmbH, Ternitz, als übertragende Gesellschaften mit der SCHOELLER-BLECKMANN Oilfield Equipment Aktiengesellschaft, Ternitz, als übernehmende Gesellschaft rückwirkend zum 30. September 2013 zu verschmelzen. In diesem Zusammenhang wird im Geschäftsjahr 2014 der Minderheitsgesellschafter der BICO-DSI Investment GmbH ausscheiden und mit 57.761 Stück SBO-Aktien abgefunden.

### AUFWENDUNGEN FÜR DEN ABSCHLUSSPRÜFER

Im Jahr 2013 sind für den Abschlussprüfer, die **SST Schwarz & Schmid Wirtschaftsprüfungsges.m.b.H.**, und mit diesem verbundene Unternehmen folgende Aufwendungen angefallen:

Prüfung des Jahresabschlusses .......TEUR 20,0
 Steuerberatungsleistungen ......TEUR 6,0
 (Vorjahr: TEUR 23,0)
 (Vorjahr: TEUR 21,0)

### V. Angaben über Organe und Arbeitnehmer

Der durchschnittliche Personalstand gliedert sich wie folgt:

	2013	2012
Gehaltsempfänger	15	14
Lohnempfänger	8	7
Summe Mitarbeiter	23	21

Zum 31.12.2013 betrug der Personalstand 22 Mitarbeiter: 15 Gehaltsempfänger ur 7 Lohnempfänger (Vorjahr: 23 Mitarbeiter, 16 Gehaltsempfänger und 7 Lohnempfänger).

Die Bezüge für die Mitglieder des Vorstands betrugen im Jahr 2013 TEUR 1.904 (davon fix Anteil TEUR 795, davon variabler Anteil TEUR 1.109 (Vorjahr: TEUR 1.881 (davon fixer A teil TEUR 799, davon variabler Anteil TEUR 1.082).

Im Geschäftsjahr 2013 erhielten die Aufsichtsratsmitglieder in Summe eine Vergütung von TEUR 128,3 (Vorjahr: TEUR 92,8).

### Aufsichtsrat:

Mag. NORBERT ZIMMERMANN Vorsitzender seit 10.04.1995

Dr. PETER PICHLER Mitglied seit 10.04.1995, stellvertretender Vorsitzender seit 29.04.2003

Mag. DI HELMUT LANGANGER Mitglied seit 29.04.2003

KARL SAMSTAG Mitglied seit 24.10.2005

Dr. KARL SCHLEINZER Mitglied seit 24.05.1995

### Vorstand:

Ing. GERALD GROHMANN seit 03.10.2001

Mag. FRANZ GRITSCH seit 01.12.1997

Ternitz, am 21. Februar 2014

### Schoeller-Bleckmann Oilfield Equipment Aktiengesellschaft

### LAGEBERICHT

### für das Geschäftsjahr 2013

### 1) Bericht über den Geschäftsverlauf und die wirtschaftliche Lage

Die Schoeller-Bleckmann Oilfield Equipment Aktiengesellschaft (SBO) fungiert als konzernleitende Holdinggesellschaft zur Steuerung und Beratung der Tochter- und Beteiligungsgesellschaften.

### Finanzielle und nichtfinanzielle Leistungsindikatoren

Wegen ihrer Holdingfunktion haben die finanziellen Kennzahlen der SBO keine Aussagekraft für die wirtschaftliche Entwicklung des Konzerns. Die Beurteilung der Vermögens- und Ertragslage des SBO-Konzerns ist deshalb nur anhand des Konzernabschlusses möglich.

Die **Umsatzerlöse** der SBO betrugen 2013 MEUR 7,4 (Vorjahr: MEUR 8,2). Bei den von SBO ausgewiesenen Umsatzerlösen handelt es sich um konzerninterne Leistungen, Lizenzeinnahmen sowie um Erlöse aus der Vermietung von Grund- und Gebäudeflächen in Ternitz.

Das Ergebnis der gewöhnlichen Geschäftstätigkeit (EGT) betrug 2013 MEUR 10,6 (Vorjahr: MEUR 33,5). Es war wesentlich gekennzeichnet durch Erträge aus Beteiligungen in Höhe von MEUR 23,1 (Vorjahr: MEUR 37,4). Es handelt sich hierbei um Ausschüttungen von Schoeller-Bleckmann Oilfield Technology GmbH., Ternitz und BICO Drilling Tools Inc, Houston.

Die **Zugänge zu Sachanlagen und immateriellen Vermögensgegenständen** betrugen 2013 MEUR 0,0 (Vorjahr: MEUR 2,0).

Die **Zugänge zu Finanzanlagen** betrugen MEUR 10,0 (Vorjahr: MEUR 20,4) und betrafen mit MEUR 2,3 *Anteile an verbundenen Unternehmen und Wertrechte* (Vorjahr: MEUR 20,4) und mit MEUR 7,7 *Ausleihungen an verbundene Unternehmen* (Vorjahr: MEUR 0,0). Es wurden Ausleihungen an verbundene Unternehmen in der Höhe von MEUR 14,1 planmäßig getilgt. Bei den Anteilen an verbundenen Unternehmen waren keine Abgänge zu verzeichnen.

Die Bilanzsumme 2013 blieb mit MEUR 310,3 nahezu unverändert (Vorjahr: MEUR 310,7).

Die Eigenkapitalquote betrug 41,3 % (Vorjahr: 45,2 %).

Das **langfristig gebundene Vermögen** (überwiegend Finanzanlagen) betrug 52,2 % der Bilanzsumme (Vorjahr: 56,1 %).

Der **Personalstand** der SBO zum 31. Dezember 2013 betrug 22 Mitarbeiter (15 Gehaltsempfänger und 7 Lohnempfänger), verglichen mit einem Personalstand zum 31. Dezember 2012 von 23 Mitarbeitern (16 Gehaltsempfänger und 7 Lohnempfänger).

Es bestehen keine Zweigniederlassungen der SBO.

### Marktumfeld des SBO-Konzerns

Die weltwirtschaftliche Entwicklung war im Jahr 2013 von der schwachen Konjunktur in den Industrieländern dominiert. Der Euro-Raum verharrte in der ersten Jahreshälfte weiterhin in der Rezession und erholte sich nur langsam ab Jahresmitte. Die US-Konjunktur erholte sich im Jahresverlauf dagegen stetig. In den Schwellenländern zeichnete sich zumindest zu Jahresbeginn eine positive Entwicklung ab, die jedoch im Verlauf des zweiten Halbjahres wieder an Dynamik verlor. Die prognostizierten Wachstumsraten einiger Schwellenländer wurden zurückgenommen, vor allem von China.

Der aktuellen Schätzung des Internationalen Währungsfonds (IWF) zufolge betrug das globale Wirtschaftswachstum (BIP) im Jahr 2013 3,0% nach 3,1% im Jahr 2012. Trotz der zurückgenommenen Prognosen fand der Großteil des globalen Wachstums 2013 mit 4,7% in den Emerging Markets statt (4,9% im Jahr 2012). Im Gegensatz dazu wuchs die Wirtschaft in den Industrienationen um lediglich 1,3%, nach 1,4% im Jahr zuvor.<sup>1</sup>

Trotz der unbefriedigenden Konjunktur in den Industrieländern war die globale Nachfrage nach Öl und Gas anhaltend hoch.

Der durchschnittliche globale Ölverbrauch stieg laut Internationaler Energie Agentur (IEA) im Gesamtjahr 2013 auf 91,2 Millionen Barrel pro Tag (nach 90,0 Mb/d 2012). Im Jahresvergleich bedeutet dies einen Anstieg von 1,2 mb/d bzw. 1,4%. Der stetig wachsende weltweite Ölbedarf wurde wie in den Jahren zuvor von den Emerging Markets getragen. Der durchschnittliche Ölverbrauch der Nicht-OECD Länder betrug 2013 45,2 mb/d, was einer Zunahme von 1,2 mb/d im Vorjahresvergleich entspricht. Aufgrund des verlangsamten Wirtschaftswachstums der Emerging Markets stieg die Ölnachfrage in Nicht-OECD Ländern im Jahr 2013 allerdings mit plus 2,6% (nach 3,6%) etwas langsamer als zuvor. Die Ölnachfrage in den OECD-Ländern blieb im Jahresvergleich mit rund 46,0 mb/d nahezu gleich.

Der Rig Count<sup>3</sup>, die Maßzahl der weltweit eingesetzten Bohranlagen, war 2013 auf hohem Niveau leicht rückläufig. Nach durchschnittlich 3.518 in Betrieb befindlichen Anlagen pro Monat 2012 betrug der weltweite Rig Count 2013 durchschnittlich 3.412 Bohranlagen pro Monat, was einem Rückgang um 3,0% im Jahresvergleich entsprach. Dies war vor allem auf eine Abschwächung der Gasbohrungen in den USA um 13,2% zurückzuführen, während die Ölbohrungen um 4,1% anstiegen. Durch den Anstieg der US-Öl-Rigs und aufgrund der steigenden Effizienz beim Bohrprozess konnte die Ölförderung in den USA um 12 %<sup>4</sup> gegenüber dem Vorjahr angehoben werden.

Der internationale (weltweit exklusive Nordamerika) Rig Count stieg um 5,0% auf 1.296 Anlagen.

Die weltweiten Ausgaben für Exploration und Produktion stiegen im Jahr 2013 gegenüber dem Vorjahr um ca. 11% auf insgesamt rund 682 Mrd. USD.<sup>5</sup>

Die europäische Ölsorte Brent startete zu Jahresbeginn 2013 mit einem Preis<sup>6</sup> von USD 112,98 pro Barrel und stieg noch im ersten Quartal auf ein Jahreshoch von USD 118,90 (08.02.2013). Im weiteren Verlauf fiel der Preis der Sorte bis zu seinem Jahrestief von USD

<sup>&</sup>lt;sup>1</sup> Internationaler Währungsfonds (IWF), World Economic Outlook Update, January 2014

<sup>&</sup>lt;sup>2</sup> International Energy Agency (IEA), Oil Market Report, January 2014

<sup>&</sup>lt;sup>3</sup> Baker Hughes Inc.

<sup>&</sup>lt;sup>4</sup> International Energy Agency (IEA), Oil Market Report, January 2014

<sup>&</sup>lt;sup>5</sup> Barclays, Global 2014 E&P Spending Outlook, December 2013

<sup>&</sup>lt;sup>6</sup> International Energy Agency (IEA), Spot Prices for Crude Oil

96,84 pro Barrel am 17.04.2013. Bis Jahresende legte die Sorte Brent wieder zu und erreichte am 31. Dezember 2013 einen Preis von USD 109,95. Im Jahresvergleich sank der Preis pro Barrel Brent somit leicht um 2,7%.

Der Ölpreis der US-Sorte WTI fiel nach USD 93,14 pro Barrel zu Jahresbeginn auf ein Jahrestief von USD 86,65, ebenso wie jener der Sorte Brent am 17.04.2013. Danach zog die US-Handelssorte wieder an und erreichte mit USD 110,62 pro Barrel am 06.09.2013 den Jahreshöchststand. Am 31. Dezember 2013 lag der Preis für ein Barrel der Sorte WTI bei USD 98,17, was somit einen Anstieg von 5,4% im Jahresverlauf bedeutet.

Traditionell lag auch 2013 der Preis der US-Handelssorte WTI unter jenem der europäischen Sorte Brent. Die Preisdifferenz verringerte sich im Verlauf des Jahres 2013, von rund USD 20,00 zu Jahresbeginn auf teilweise weniger als USD 5,00 im Juli und August. Den Grund sahen Experten im verbesserten Logistik- und Transportsystem zur Förderung und Distribution von US-Öl sowie in einer Angebotsschwäche seitens der OPEC im zweiten Quartal 2013. Ursache der schwächeren OPEC-Fördermenge waren politische Unruhen im Nahen Osten. Dieses wachsende politische Risiko zeichnete auch für das Ansteigen des Ölpreises beider Handelssorten im dritten Quartal verantwortlich. Die Preisdifferenz zwischen Brent und WTI vergrößerte sich gegen Jahresende wieder und pendelte sich bei rund USD 12,00 ein.

### Geschäftsentwicklung des SBO-Konzerns

Der SBO-Konzern verzeichnete im abgelaufenen Geschäftsjahr 2013 eine solide Geschäftsentwicklung bei anhaltend hoher Profitabilität. Noch im Geschäftsjahr 2012 getätigte Überbestellungen seitens der Kunden bei Hochpräzisions-Bohrstrangkomponenten (High Precision Components) führten zu einem entsprechenden Lageraufbau und nachfolgend zu rückläufigen Bestelleingängen für den SBO-Konzern in 2013. Als Folge dieser Entwicklung kam es beim SBO-Konzern im Geschäftsjahr 2013 gegenüber dem Rekordjahr 2012 zu einem Umsatz- und Ergebnisrückgang.

Der Auftragseingang betrug im Geschäftsjahr 2013 MEUR 425,9 (nach MEUR 471,4 im Jahr zuvor). Die hohen Lagerbestände drückten zu Beginn des Jahres den Auftragseingang des SBO-Konzerns. Allerdings war im Zuge des erwarteten Lagerabbaues bei High Precision Components zwischen erstem und drittem Quartal 2013 ein Anziehen der Bestelleingänge für diese Produktgruppe feststellbar. Im vierten Quartal hielten sich die Kunden, saisonbedingt zu Jahresende, mit Bestellungen wieder eher zurück.

Die Produktgruppe Downhole Tools, Ölfeldausrüstung und Service verzeichnete dagegen eine kontinuierlich gute Nachfrage und gegenüber dem Vorjahr ein erfreuliches Wachstum.

Der SBO-Konzern erreichte zu Jahresende 2013 einen Auftragsstand von MEUR 111,5 (nach MEUR 149,8 Ende 2012), der im Wesentlichen die Produktgruppe Hochpräzisions-Bohrstrangteile (High Precision Components) betrifft. Bei allen anderen Produktgruppen disponieren die SBO-Kunden kurzfristig, das Bohrmotorengeschäft und das Geschäft mit Zirkulations-Tools werden auf Leasing-Basis betrieben und finden im Auftragsstand daher keinen Niederschlag.

Der SBO-Konzern passte im Jahresverlauf seine Produktionskapazitäten an die Auftragslage bei High Precision Components an. Obwohl die Auftragslage zu einer geringeren Kapazi-

tätsauslastung und Fixkostenabdeckung führte, konnten dadurch die Ergebnismargen auf überdurchschnittlichem Niveau gehalten werden.

Erfreulich entwickelten sich gegenüber den Vorjahren die Produktionsgesellschaften im U.K. Die neue Produktionstochter in Singapur (Knust-SBO Far East) hat sich strategisch gut positioniert und konnte plangemäß die steigende lokale Nachfrage im asiatischen Raum abdecken. Ebenso positiv war die Geschäftsentwicklung der SBO-Produktionsgesellschaft in Vietnam, wo ein kontinuierliches Wachstum verzeichnet wurde.

Die SBO-Bohrmotoren-Tochtergesellschaft BICO und die Downhole Tools-Gesellschaft DSI konnten 2013 Marktanteile gewinnen. Ein Beispiel dafür war der Abschluss eines 15 Mio. USD Rahmenvertrages zur Lieferung von DSI-Downhole Tools mit der brasilianischen Ölund Gasgesellschaft Petrobras für die kommenden zwei Jahre. Der SBO-Konzern nutzt in diesen Geschäftsfeldern die global betrachtet anhaltend hohe Bohrtätigkeit. Sowohl die BICO-Hochleistungsmotoren als auch die Downhole Tools der DSI konnten sich gegen Konkurrenzprodukte bei Schiefergas- und Schieferölbohrungen sowie im technisch besonders anspruchsvollen Offshore-Drilling zunehmend behaupten.

Die weltweit tätigen SBO Service & Supply Shops nutzte 2013 den aktuellen Trend, Oilfield-Tools nach entsprechender Nutzungsdauer wieder aufbereiten zu lassen. Diese Produktund Servicegruppe verzeichnete einen erfreulichen Geschäftsverlauf, wobei sich das Geschäft in den Shops in Russland und Singapur besonders gut entwickelte.

### **Investitionen**

Das langfristige Investitionsprogramm des SBO-Konzerns stellt sicher, dass der SBO-Konzern den stetig steigenden Anforderungen der Kunden voll entsprechen kann. Ein hochmoderner Maschinenpark und entsprechende Produktionskapazitäten sichern die Marktposition der SBO langfristig ab.

Unter diesem Gesichtspunkt ist die derzeit größte Investition des SBO-Konzerns im Ausbau des Produktionsstandortes Ternitz/Österreich zu sehen. Phase 1 dieser Mehrjahresinvestition ging plangemäß Anfang Jänner 2014 in Betrieb. In der ersten Projektphase wird durch Verlagerung von Maschinen und Produktionseinheiten der Materialfluss am Standort Ternitz optimiert. In einer weiteren Phase werden zusätzliche Produktionskapazitäten am Standort Ternitz installiert. Der gesamte Investitionsaufwand (inkl. Phase 2) beläuft sich auf MEUR 54.

Aufgrund der anhaltend guten Marktakzeptanz der SBO-Downhole Tools erfolgte in diesem Bereich der zweite Investitionsschwerpunkt im Jahr 2013. Investiert wurde in die Erweiterung der Bohrmotorenflotte der Tochtergesellschaft BICO sowie der Downhole Circulation Tools-Flotte bei der Tochtergesellschaft DSI.

Insgesamt betrugen die Investitionen des SBO-Konzerns in das Sachanlagevermögen im Geschäftsjahr 2013 MEUR 62,6 (nach MEUR 53,1 im Jahr zuvor). Die Finanzierung erfolgte wie schon in den Jahren zuvor so gut wie ausschließlich aus dem Cashflow. Das Bestellobligo für das Anlagevermögen betrug zu Jahresende 2013 MEUR 7,3 (nach MEUR 12,9 zu Jahresende 2012).

### **Nachtragsbericht**

Nach dem Bilanzstichtag sind keine Vorgänge von besonderer Bedeutung eingetreten, die zu einer anderen Darstellung der Vermögens-, Finanz- und Ertragslage geführt hätten.

Zur Straffung der Konzernstruktur wurde am 21. Februar 2014 beschlossen, die beiden nicht operativ tätigen Gesellschaften Schoeller-Bleckmann Drilling and Production Equipment GmbH, Ternitz, sowie die BICO-DSI Investment GmbH, Ternitz, als übertragende Gesellschaften mit der SCHOELLER-BLECKMANN Oilfield Equipment Aktiengesellschaft, Ternitz, als übernehmende Gesellschaft rückwirkend zum 30. September 2013 zu verschmelzen. In diesem Zusammenhang wird im Geschäftsjahr 2014 der Minderheitsgesellschafter der BICO-DSI Investment GmbH ausscheiden und mit 57.761 Stück SBO-Aktien abgefunden.

### 2) <u>Bericht über die voraussichtliche Entwicklung und die Risiken des</u> Unternehmens

### Ausblick des SBO-Konzerns

Die Prognosen für die globale Konjunktur waren zu Jahresbeginn 2014 entgegen dem Trend der letzten Jahre von einem optimistischen Grundton geprägt. Der Internationale Währungsfond (IWF)<sup>7</sup> erwartet für das Jahr 2014 ein durchschnittliches globales Wachstum von 3,7% (nach 3,0% im Jahr 2013 und 3,1% im Jahr 2012). Die Schwellen- und Entwicklungsländer sollen im Jahr 2014 um 5,1% (nach 4,7% im Jahr 2013 und 4,9% im Jahr 2012) wachsen. Wiederum sind China und Indien mit erwarteten Wachstumsraten von 7,5% bzw. 5,4% die treibenden Kräfte der Weltwirtschaft. Die Wachstumserwartungen für die Industrienationen liegen laut IWF bei 2,2%, nach 1,3% im Jahr 2013 und 1,4% im Jahr 2012. Damit zeichnet sich auch in den Industrienationen eine moderate Erholung der Konjunktur ab.

Diese globale Konjunkturentwicklung sollte sich auch auf den weltweiten Energieverbrauch auswirken, der weiterhin maßgeblich vom anhaltend hohen Wachstumsniveau der Emerging Markets geprägt sein wird. Nach Einschätzung der International Energy Agency (IEA)<sup>8</sup> soll sich 2014 der durchschnittliche Ölverbrauch in Nicht-OECD Ländern um 1,4 Millionen Barrel pro Tag bzw. 3,0% auf insgesamt 46,5 mb/d erhöhen. In den OECD Ländern hingegen rechnet die IEA 2014 mit einer Fortsetzung des seit Jahren leicht rückläufigen Ölbedarfs um 0,1 mb/d bzw. 0,2% (45,9 mb/d nach 46,0 mb/d im Jahr 2013). Der weltweite Ölbedarf 2014 wird sich laut IEA auf insgesamt 92,5 Millionen Barrel pro Tag belaufen, was einen Anstieg um 1,3 mb/d bzw. 1,4% im Jahresvergleich (2013: 91,2 mb/d) bedeutet.

Marktanalysen erwarten für 2014<sup>9</sup> ein solides Marktumfeld für die Oilfield Service-Industrie mit einem Zuwachs der Ausgaben für Exploration und Produktion (E&P) von 6,1% von USD 682 Milliarden im Jahr 2013 auf USD 723 Milliarden. Hervorzuheben ist die erwartete Steigerung der Ausgaben in den USA von ca. 8%, nach einem Null-Wachstum 2013. Diese Annahmen werden durch die aktuelle Ölpreisentwicklung unterstützt. Bei einem Ölpreis (WTI) über der 90 USD-Marke, sind auch sehr schwierige und technologisch aufwendige Ölbohrungen wirtschaftlich attraktiv. Nach dem starken Rückgang des Gaspreises in den USA infolge des Schiefergas-Booms erholte sich auch der Preis wieder von den Tiefständen im Jahr 2012 (Tiefststand 1,82 USD/MBtu am 20.04.2012) und stieg auf 4,31 USD/MBtu (31.12.2013).

Der SBO-Konzern ist gut positioniert, um am Wachstum der E&P-Ausgaben in Nordamerika, dem Mittleren Osten, Lateinamerika und Russland zu partizipieren. In den kommenden Jahren wird zudem eine steigende Anzahl von Offshore Rigs in Betrieb genommen, ebenso wurden bereits eine Reihe neuer und umfassender Bohrvorhaben genehmigt. Das Wachstum im technologisch höchst anspruchsvollen Offshore-Bereich wird somit ein wesentlicher Motor der weiteren Entwicklung des SBO-Konzerns sein.

Allerdings sind die seit vielen Jahren stetig ansteigenden E&P-Kosten bei einem stabilen Ölpreis für die gesamte Wertschöpfungskette eine Herausforderung, die letztlich auf alle Investitionsentscheidungen einen entsprechenden Einfluss haben könnte.

<sup>&</sup>lt;sup>7</sup> Internationaler Währungsfonds (IWF), World Economic Outlook, January 2014

International Energy Agency (IEA), Oil Market Report, January 2014
 Barclays Global 2014 E&P Spending Outlook, December 2013

<sup>&</sup>lt;sup>10</sup> U.S. Energy Information Administration (EIA), Henry Hub Natural Gas Spot Price

Ein ständig steigender Technologieeinsatz ist erforderlich, um immer neue konventionelle und unkonventionelle Öl- und Gasvorkommen zu erschließen. Dies ergibt sich einerseits aus der wachsenden Depletion Rate der bereits erschlossenen Vorkommen (Anstieg der durchschnittlichen Depletion Rate von 5,1% im Jahr 2008 auf 6,2% per 2013)<sup>11</sup> und dem stetigen Nachfragewachstum am globalen Energiemarkt. Deshalb ist auch weiterhin von anhaltend attraktiven Wachstumsraten in der Oilfield Service-Industrie auszugehen.

Der SBO-Konzern hat sich im Wachstumssegment Directional Drilling seit Jahren als Weltmarktführer für Hochpräzisions-Komponenten optimal positioniert. Directional Drilling kommt bei allen Offshore-Aktivitäten sowie immer öfter auch bei Landrigs zum Einsatz. Es ermöglicht zudem Horizontalbohrungen, die für die Erschließung von Öl- und Gasvorkommen in Schiefergestein notwendig sind. In dem breiten Wachstumsfeld Downhole Tools ist der SBO-Konzern heute ein weltweit aktiver Nischenplayer mit technologisch anspruchsvollen Produkten, die am Markt für anspruchsvolle Bohrungen stark nachgefragt werden.

Neben dieser technologischen Kompetenz bildet die wirtschaftliche Stärke des SBO-Konzerns mit minimaler Verschuldung und hohem Cash Flow eine gute Basis für weiteres Wachstum. Dabei wird der SBO-Konzern den bewährten Weg fortsetzen und durch organisches Wachstum, die Einführung neuer Produkte und Technologien, als auch durch den Zukauf von Unternehmen die Geschäftsbasis weiter ausbauen.

### Risikomanagement

Die SBO AG fungiert als strategische Managementholding für ihre Tochtergesellschaften. Ein wesentliches Aufgabengebiet der Holding ist, sich mit den strategischen und operativen Risiken auseinander zu setzen und rechtzeitig Maßnahmen zur Optimierung dieser Risiken zu setzen. Ein konzernweites Reportingsystem unterstützt den Vorstand der SBO AG beim laufenden Monitoring des operativen Geschäftes und damit der Einschätzung operativer Risiken der Tochtergesellschaften. Die strategischen Risiken werden in Zusammenhang mit der jährlichen Erstellung der Mittelfristplanung zwischen dem Vorstand der SBO AG und den Geschäftsführern der Tochtergesellschaften erörtert und bewertet.

<sup>11</sup> International Energy Agency (IEA), WEO 2013

### **Finanzinstrumente**

Die Ausleihungen wurden nur an verbundene Unternehmungen gewährt und sind fix verzinst. Diese lauten auf USD und unterliegen daher Fremdwährungsschwankungen. Ebenso besteht der Großteil der sonstigen Forderungen aus langfristigen verzinslichen Forderungen in USD, GBP und CAD.

Die liquiden Mittel bestehen aus Guthaben bei österreichischen Banken mit marktkonformer Verzinsung.

Der Großteil der zum Bilanzstichtag bestehenden langfristigen Bankverbindlichkeiten wird fix verzinst und unterliegt daher keinem Zinsänderungsrisiko.

Zur langfristigen Finanzierung des Wachstums und zur Optimierung der Fremdkapitalkosten emittierte Schoeller-Bleckmann im Juni 2008 eine in zwei Tranchen geteilte Unternehmensanleihe im Volumen von MEUR 40. Der Kupon für die erste Tranche beträgt 5,75 % bei einer Laufzeit von fünf Jahren, für die zweite Tranche 5,875 % bei einer Laufzeit von sieben Jahren.

Eine der beiden Teilschuldverschreibungen wurde planmäßig am 18. Juni 2013 zum Nennbetrag von MEUR 20,0 zurückgezahlt, die zweite wird am 18. Juni 2015 zum Nennbetrag von ebenso MEUR 20,0 zurückgezahlt werden.

Aufgrund der derzeitig verfügbaren liquiden Mittel bestehen aus heutiger Sicht keine Liquiditäts-Probleme.

### 3) Bericht über die Forschung und Entwicklung im SBO-Konzern

Die Schoeller-Bleckmann Oilfield Equipment AG hat ihre Forschungs- und Entwicklungstätigkeiten seit vielen Jahren in den operativen Geschäftsbetrieb integriert. Dieses System gewährleistet eine markt- und kundennahe F&E-Tätigkeit.

Im Geschäftsjahr 2013 wurden in der Produktgruppe High Precision Components neue Werkstoffe entwickelt und erfolgreich am Markt eingeführt. Zudem entwickelte SBO gemeinsam mit Kunden eine Vielzahl von Prototypen, die mit Hilfe neuer, innovativer Produktionsverfahren gefertigt werden konnten. Des Weiteren wird das e-beam welding Verfahren im Geschäftsjahr 2014 schrittweise in Betrieb gehen.

Im Bereich Downhole Tools lag der Schwerpunkt der F&E-Tätigkeit auf der Weiterentwicklung und Optimierung der BICO-Bohrmotoren und der Neuentwicklung weiterer Tools. Im Zuge der Entwicklung einer neuen Exoko-Bohrmotorentechnologie wurden 2013 mehrere Feldversuche unternommen. Die Entwicklung wird auf Basis der dadurch gewonnenen Erkenntnisse weiter vorangetrieben.

### 4) <u>Berichterstattung über wesentliche Merkmale des internen Kontrollsystems und des Risikomanagementsystems im Hinblick auf den</u> Rechnungslegungsprozess

Die Gesamtverantwortung für das Risikomanagement der SBO-Gruppe liegt beim Vorstand, während die unmittelbare Verantwortung bei den Geschäftsführern der operativen Einheiten liegt. Demzufolge besitzt das interne laufende Berichtswesen an die Konzernzentrale besonders hohe Bedeutung, um Risiken frühzeitig erkennen und Gegenmaßnahmen ergreifen zu können. Dies erfolgt durch eine zeitnahe monatliche Berichterstattung über die Geschäftsentwicklung und Gebarung von den operativen Einheiten an den Vorstand.

Für die Tochterunternehmen wurden vom Konzern weltweit einheitliche Standards für die Umsetzung und Dokumentation des gesamten internen Kontrollsystems und damit vor allem auch für den Rechnungslegungsprozess vorgegeben. Dadurch sollen jene Risiken vermieden werden, die zu einer unvollständigen oder fehlerhaften Finanzberichterstattung führen können.

Weiters werden die von den Tochtergesellschaften erstellten internen Berichte in der Konzernzentrale auf Plausibilität geprüft und mit Planungsrechnungen verglichen, um bei Abweichungen geeignete Maßnahmen setzen zu können. Hierzu werden von den Gesellschaften Jahresbudgets und Mittelfristplanungen angefordert, welche vom Vorstand genehmigt werden müssen.

Die Ordnungsmäßigkeit des Rechnungswesens bei den Tochtergesellschaften wird durch laufende Prüfungstätigkeiten des Konzerncontrollings überwacht. Auch im Zuge der internen Revision werden schwerpunktmäßige Prüfungen über das Rechnungswesen durchgeführt. Weiters werden alle Jahresabschlüsse durch internationale Prüfungsgesellschaften geprüft.

Im Zuge von regelmäßigen Sitzungen des Vorstandes mit den lokalen Geschäftsführungen werden die laufende Geschäftsentwicklung sowie absehbare Chancen und Risiken besprochen.

Für die Erstellung des Konzernabschlusses bestehen in Ergänzung zu den Internationalen Rechnungslegungsvorschriften konzerninterne Richtlinien, um eine einheitliche Darstellung bei den berichtenden Gesellschaften zu gewährleisten (Bewertungs- und Ausweisfragen).

Für die automationsunterstützte Aufstellung des Konzernabschlusses wird ein zertifiziertes Konsolidierungsprogramm verwendet, welches mit den notwendigen Prüf- und Konsolidierungsroutinen ausgestattet ist.

Die für den Konzern dargestellten Merkmale des internen Kontrollsystems und des Risikomanagementsystems im Hinblick auf den Rechnungslegungsprozess sind auch uneingeschränkt für die Holdinggesellschaft anwendbar. Für das Rechnungswesen der Holdinggesellschaft sind ebenfalls anerkannte Standardprogramme im Einsatz.

### 5) Angaben zu Kapital-, Anteils-, Stimm- und Kontrollrechten und damit verbundenen Verpflichtungen

Das Grundkapital der Gesellschaft beträgt MEUR 16,0 und ist zerlegt in 16 Mio. Stück Nennbetragsaktien zum Nennbetrag von je EUR 1,00.

In der Hauptversammlung vom 25. April 2012 wurde der Vorstand für die Dauer von 30 Monaten ermächtigt, eigene Aktien der Gesellschaft bis zu maximal 10 % des Grundkapitals zu erwerben, wobei der niedrigste beim Rückerwerb zu leistende Gegenwert EUR 1,00 und der höchste beim Rückerwerb zu leistende Gegenwert EUR 300,00 beträgt.

Im Jahr 2013 hat die Gesellschaft 47.877 Stück eigene Aktien um TEUR 3.684,2 erworben. Im Jahr 2012 wurde von dieser Ermächtigung kein Gebrauch gemacht.

Zum Bilanzstichtag 2013 hält die Gesellschaft 87.761 Stück eigene Aktien (Vorjahr: 39.884 Stück). Dies entspricht einem Anteil von 0,55 % (Vorjahr: 0,25 %) am Grundkapital mit einem Anschaffungswert von TEUR 5.238 (Vorjahr TEUR 1.554). Die Anzahl der im Umlauf befindlichen Aktien beträgt somit 15.912.239 Stück (Vorjahr: 15.960.116 Stück).

Zum 31.12.2013 hält die Berndorf Industrieholding AG, Berndorf, rund 31 % vom Grund-kapital.

Darüber hinaus bestehen keine weiteren angabepflichtigen Sachverhalte gemäß § 243a UGB.

### 4. Bestätigungsvermerk

### Tz 14 Bericht zum Jahresabschluss

Wir haben den beigefügten Jahresabschluss der SCHOELLER-BLECKMANN OILFIELD EQUIPMENT Aktiengesellschaft, Ternitz, für das Geschäftsjahr vom 1. Jänner 2013 bis zum 31. Dezember 2013 unter Einbeziehung der Buchführung geprüft. Dieser Jahresabschluss umfasst die Bilanz zum 31. Dezember 2013, die Gewinn- und Verlustrechnung für das am 31. Dezember 2013 endende Geschäftsjahr sowie den Anhang.

Verantwortung der gesetzlichen Vertreter für den Jahresabschluss und für die Buchführung

Die gesetzlichen Vertreter der Gesellschaft sind für die Buchführung sowie für die Aufstellung und den Inhalt des Jahresabschlusses verantwortlich, der ein möglichst getreues Bild der Vermögens-, Finanz- und Ertragslage der Gesellschaft in Übereinstimmung mit den österreichischen unternehmensrechtlichen Vorschriften vermittelt. Diese Verantwortung beinhaltet: Gestaltung, Umsetzung und Aufrechterhaltung eines internen Kontrollsystems, soweit dieses für die Aufstellung des Jahresabschlusses und die Vermittlung eines möglichst getreuen Bildes der Vermögens-, Finanz- und Ertragslage der Gesellschaft von Bedeutung ist, damit dieser frei von wesentlichen Fehldarstellungen ist, sei es auf Grund von beabsichtigten oder unbeabsichtigten Fehlern; die Auswahl und Anwendung geeigneter Bilanzierungs- und Bewertungsmethoden; die Vornahme von Schätzungen, die unter Berücksichtigung der gegebenen Rahmenbedingungen angemessen erscheinen.

Verantwortung des Abschlussprüfers und Beschreibung von Art und Umfang der gesetzlichen Abschlussprüfung

Unsere Verantwortung besteht in der Abgabe eines Prüfungsurteils zu diesem Jahresabschluss auf der Grundlage unserer Prüfung. Wir haben unsere Prüfung unter Beachtung der in Österreich geltenden gesetzlichen Vorschriften und Grundsätze ordnungsgemäßer Abschlussprüfung durchgeführt. Diese Grundsätze erfordern, dass wir die Standesregeln einhalten und die Prüfung so planen und durchführen, dass wir uns mit hinreichender Sicherheit ein Urteil darüber bilden können, ob der Jahresabschluss frei von wesentlichen Fehldarstellungen ist.

Eine Prüfung beinhaltet die Durchführung von Prüfungshandlungen zur Erlangung von Prüfungsnachweisen hinsichtlich der Beträge und sonstigen Angaben im Jahresabschluss. Die Auswahl der Prüfungshandlungen liegt im pflichtgemäßen Ermessen des Abschlussprüfers unter Berücksichtigung seiner Einschätzung des Risikos eines Auftretens wesentlicher Fehldarstellungen, sei es auf Grund von beabsichtigten oder unbeabsichtigten Fehlern. Bei der Vornahme dieser Risikoeinschätzung berücksichtigt der Abschlussprüfer das interne Kontrollsystem, soweit es für die Aufstellung des Jahresabschlusses und die Vermittlung eines möglichst getreuen Bildes der Vermögens-, Finanz- und Ertragslage der Gesellschaft von Bedeutung ist, um unter Berücksichtigung der Rahmenbedingungen geeignete Prüfungshandlungen festzulegen, nicht jedoch um ein Prüfungsurteil über die Wirksamkeit der internen Kontrollen der Gesellschaft abzugeben. Die Prüfung umfasst ferner die Beurteilung der Angemessenheit der angewandten Bilanzierungs- und Bewertungsmethoden und der von den gesetzlichen Vertretern vorgenommenen wesentlichen Schätzungen sowie eine Würdigung der Gesamtaussage des Jahresabschlusses.

Wir sind der Auffassung, dass wir ausreichende und geeignete Prüfungsnachweise erlangt haben, sodass unsere Prüfung eine hinreichend sichere Grundlage für unser Prüfungsurteil darstellt.

### Prüfungsurteil

Unsere Prüfung hat zu keinen Einwendungen geführt. Auf Grund der bei der Prüfung gewonnenen Erkenntnisse entspricht der Jahresabschluss nach unserer Beurteilung den gesetzlichen Vorschriften und vermittelt ein möglichst getreues Bild der Vermögens- und Finanzlage der SCHOELLER-BLECKMANN OILFIELD EQUIPMENT Aktiengesellschaft zum 31. Dezember 2013 sowie der Ertragslage der Gesellschaft für das Geschäftsjahr vom 1. Jänner 2013 bis zum 31. Dezember 2013 in Übereinstimmung mit den österreichischen Grundsätzen ordnungsmäßiger Buchführung.

### Aussagen zum Lagebericht

Der Lagebericht ist auf Grund der gesetzlichen Vorschriften darauf zu prüfen, ob er mit dem Jahresabschluss in Einklang steht und ob die sonstigen Angaben im Lagebericht nicht eine falsche Vorstellung von der Lage der Gesellschaft erwecken. Der Bestätigungsvermerk hat auch eine Aussage darüber zu enthalten, ob der Lagebericht mit dem Jahresabschluss in Einklang steht und ob die Angaben nach § 243a UGB zutreffen.

Der Lagebericht steht nach unserer Beurteilung in Einklang mit dem Jahresabschluss. Die Angaben gemäß § 243a UGB sind zutreffend.

Die Veröffentlichung oder Weitergabe des Jahresabschlusses mit unserem Bestätigungsvermerk darf nur in der von uns bestätigten Fassung erfolgen. Dieser Bestätigungsvermerk bezieht sich ausschließlich auf den deutschsprachigen und vollständigen Jahresabschluss samt Lagebericht. Für abweichende Fassungen sind die Vorschriften des § 281 Abs 2 UGB zu beachten.

Declaration of all Legal Representatives Pursuant to § 82 Sect. 4 (3) of the Austrian Stock Exchange Act

We confirm to the best of our knowledge that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the group as required by applicable accounting standards and that the group management report gives a true and fair view of the development and performance of the business and the position of the group, together with a description of the principal risks and uncertainities the group faces.

We confirm to the best of our knowledge that the separate financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the parent company as required by applicable accounting standards and that the management report gives a true and fair view of the development and performance of the business and the position of the company, together with a description of the principal risks and uncertainities the company faces.
