

# POTEN**CEE**AL

# Letter from the Chair of the Managing Board

**Dear Shareholders,  
Ladies and Gentlemen!**

Vienna Insurance Group (VIG) has been focusing on expanding in Central and Eastern Europe (CEE) for more than 25 years. There is a simple reason for this – we are firmly convinced of the potential of the region. The economic outlook certainly appears to support this view. According to forecasts, EU member states in the CEE region will achieve average GDP growth rates of 3% in 2016 and 2017. In comparison, Austria is expected to grow by 1.5% in the same period. The enormous potential of the region is also clearly shown by insurance density. For example, per capita expenditure of the people on insurance averages around EUR 200 per year in the CEE region. In contrast, the corresponding amount is more than EUR 2,000 in Austria. The CEE region therefore still exhibits a great deal of upward potential in this respect. This is particularly the case in Serbia and Romania, where insurance density is just over EUR 90 in each country. In July and August 2016, VIG signed purchase agreements to acquire new insurance companies in these two countries. The closing will allow us to reach our medium-term goal of achieving a market share of more than 10% in Serbia. In addition to the acquisitions, VIG received more good news in July when the Standard & Poor's rating agency confirmed its A+ rating with a stable outlook. This means that VIG continues to enjoy the best credit rating of all companies in the ATX Index.

Looking at our business development in the 1<sup>st</sup> half of 2016, the first point to mention is the change in valuation method and consolidation approach for non-profit housing societies. This was essentially due to a gradual shift from full consolidation to at-equity consolidation to include VIG's shares in nine non-profit housing societies in the consolidated financial statements during the period from 2012 to 2014. The valuation method and consolidation approach that VIG chose were verified by independent auditors. In a notice of August 2016, however, the Austrian Financial Market Authority (FMA) informed the Group that a different valuation method was required for reporting the participations in the non-profit housing societies. The resulting adjustments are

shown in this report. Control has now been acquired over these companies again, which means that the shares in the nine companies will, in future, be included in the financial statements using full consolidation.

With regard to premiums, the Group achieved an increase of 0.4% to EUR 4,928.1 billion in the 1<sup>st</sup> half of 2016, in spite of intentional restraint in sales of single premium life insurance business. However, excluding the single premium business, VIG premiums actually rose by 4.5%. In spite of the expected reduction in the financial result and the effects of the adjustments mentioned above, Group profit before taxes was EUR 201.3 million. The combined ratio was 97.9%, which was in line with the value achieved in the 1<sup>st</sup> quarter (97.8%).

Regardless of the change in the valuation method for the non-profit housing societies and the resulting change in the consolidation approach for these companies, the Group is still maintaining its profit forecast of at least doubling profit (before taxes) to up to EUR 400 million.

A handwritten signature in black ink that reads "Stadler".

# Interim management report

## ECONOMIC ENVIRONMENT

According to the economic research institute WIFO, Austria's economy recovered slightly in the 1<sup>st</sup> half of 2016 compared to 2015. In spite of modest growth in the global economy and continued stagnation in residential construction, Austrian GDP grew 1.6% in the 1<sup>st</sup> quarter of the year. The most important driver to date has been the unexpected strength of private household consumption due to a further drop in the price of oil, which led to an increase in purchasing power, and the positive effects of the tax reform. Public-sector consumption primarily rose as a result of the additional expenditure required to deal with the refugee situation.

Individual growth indicators, such as retail sales, industrial production and employment, exceeded forecasts in the industrialised countries in the 1<sup>st</sup> half of 2016. This especially benefits the EU member states. Fortunately, this year private consumption in the CEE countries has proved to be particularly stimulating for the economy so far.

Capital markets were marked by uncertainty at the end of the 1<sup>st</sup> half of 2016, due to the vote for Brexit in Great Britain. The general level of interest rates fell, partly as a result of the Brexit vote. The yields on 10-year Austrian government bonds have now fallen below 0.1%. The low rate for refinancing operations is helping the public sector prepare and remain within its budgets.

## NEW SEGMENT REPORTING

Since the 1<sup>st</sup> quarter of 2016, regular reporting to the Group Managing Board in its capacity as the ultimate decision-making body has only taken place at the country level. Certain countries were combined based on size according to regional or product-specific factors (Turkey/Georgia, Remaining CEE and Other Markets).

The regular reports will no longer include separate reporting by lines of business (property and casualty, life and health insurance). This change took place in connection with the

## VIG IN THE 1<sup>ST</sup> HALF OF 2016

- **Premium volume of EUR 4,928.1 million – not including single premium life products +4.5%**
- **Profit before taxes of EUR 201.3 million**
- **Retrospective adjustments of non-profit housing societies**
- **Combined ratio of 97.9%**

change in the composition of the Group Managing Board on 1 January 2016. Regular monitoring of goodwill impairment takes place solely at the country level starting as of the 1<sup>st</sup> quarter of 2016.

## RETROSPECTIVE ADJUSTMENT

The adjustment is based on a notice of 2 August 2016 from the Austrian Financial Market Authority (FMA) in accordance with § 3(1) no. 3 of the Austrian Financial Reporting Enforcement Act (Rechnungslegungs-Kontrollgesetz – RL-KG), in which the FMA found that the participations in the non-profit housing societies were not reported in accordance with IFRS. The audit was based on the consolidated financial statements of 31 December 2014 and 31 December 2015 and the half-year reports of 30 June 2014 and 30 June 2015. According to this notice, statutory restrictions on payout and realisation of assets that apply to non-profit housing societies, and indirectly to their holding company, were not taken into account when determining the fair value of these companies at the time of loss of control or recognising the share of their profits. The effects on the Vienna Insurance Group balance sheet and income statement are as follows:

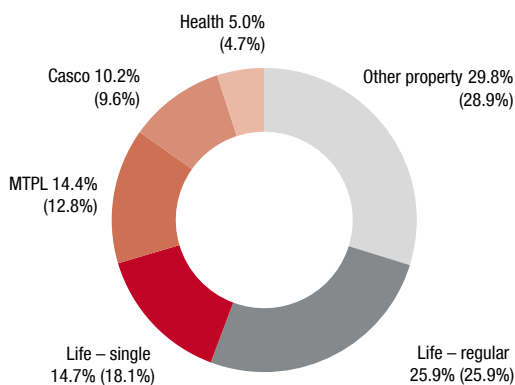

- The non-controlling interests reported due to full consolidation of Neue Heimat Holding are fully eliminated. This causes the non-controlling interests in the shareholders' equity to fall by EUR 57,101,000 (as of 1 January 2015).

- Due to the change in consolidation on 1 January 2014, the at-equity book value of the non-profit housing societies drops by EUR 501,730,000 as of 1 January 2015.
- Only the amount of payouts received from the non-profit housing societies is reported as their current contribution to earnings, instead of the amount previously shown for the pro rata profits of the companies.

## BUSINESS DEVELOPMENT (IN ACCORDANCE WITH IFRS)

In the 1<sup>st</sup> half of 2016, VIG wrote EUR 4,928.1 million in Group premiums, an increase of 0.4% compared to the same period in the previous year. Excluding premium life insurance business, the Group recorded a significant increase in premiums of 4.5%.

### PREMIUM PERCENTAGE BY LINES OF BUSINESS IN THE 1<sup>ST</sup> HALF OF 2016

Values for 1<sup>st</sup> half of 2016 in parentheses

Expenses for claims and insurance benefits less reinsurers' share were EUR 3,467.0 million in the first six months of 2016, representing a year-on-year increase of 3.4%. When interpreting this value, one has to take account of the fact that the 1<sup>st</sup> half of 2015 was affected by positive currency effects in Liechtenstein due to the Swiss franc being unpegged from the euro. These currency effects had no ef-

fect on earnings for the 1<sup>st</sup> half of 2015, since they were offset by a contrary effect in other expenses. Acquisition and administrative expenses less reinsurance commissions rose 1.8% in the 1<sup>st</sup> half of 2016 to EUR 973.3 million (1<sup>st</sup> half of 2015: EUR 956.5 million).

Group profit before taxes decreased to EUR 201.3 million (-17.5%) in the 1<sup>st</sup> half of 2016, primarily due to the significantly lower financial result. In addition, the retrospective adjustment for the non-profit housing societies mentioned above decreases the result for the 1<sup>st</sup> quarter of 2016 by EUR 11.9 million.

The Group had a combined ratio after reinsurance (not including investment income) of 97.9% in the 1<sup>st</sup> half of 2016, due among others to hail losses in the motor lines of business in Poland and the Czech Republic (1<sup>st</sup> half of 2015: 95.9%).

### BREAKDOWN OF INVESTMENTS AS OF 30 JUNE 2016

Restated values as of 31 December 2015 in parentheses

Group investments including cash and cash equivalents were EUR 32.2 billion as of 30 June 2016.

Vienna Insurance Group generated a financial result of EUR 449.5 million in the 1<sup>st</sup> half of 2016. This represented a 13.2% year-on-year decrease that was mainly due to lower realised gains on the disposal of investments in bonds, loans and investment funds.

### Austria

The Austrian VIG Group companies recorded premiums written of EUR 2,264.9 million in the 1<sup>st</sup> half of 2016. The small year-on-year decline of 0.9% was due to the reduction in single premium life insurance. Adjusted for single premium life insurance business, the Austrian Group companies recorded an increase of 0.6%.

Profit before taxes was EUR 75.2 million. This represents a drop of 12.3%, which was mainly due to fewer realised gains from the disposal of investments.

The combined ratio was 99.3% in the 1<sup>st</sup> half of 2016 (1<sup>st</sup> half of 2015: 96.6%), mainly due to a change in the calculation of personnel provisions.

### Czech Republic

Premiums written in the Czech Republic were EUR 791.9

million in the first six months of 2016. The year-on-year decrease of 5.2% was due to restraint in single premium life insurance business. When adjusted for this, however, premiums increased a satisfactory 7.8%.

Profit before taxes declined 11.9% year-on-year to EUR 77.6 million in the 1<sup>st</sup> half of 2016 due to the drop in the financial result.

The combined ratio was 92.8% (1<sup>st</sup> half of 2015: 89.8%). The year-on-year increase was primarily the result of higher insurance payments in the motor lines of business due to hail losses.

### Slovakia

The Slovakian Vienna Insurance Group Group companies recorded premiums written of EUR 374.1 million in the 1<sup>st</sup> half of 2016, representing a year-on-year decrease of 3.7%. When adjusted for single premium life insurance business, however, a satisfactory increase of 4.5% was achieved.

Profit before taxes decreased 1.3% in the first six months of 2016 to EUR 25.9 million (1<sup>st</sup> half of 2015: EUR 26.2 million).

The combined ratio was 96.5% in the 1<sup>st</sup> half of 2016 (1<sup>st</sup> half of 2015: 95.6%).

### Poland

Premiums written in Poland were EUR 414.5 million in the first six months of the current financial year. The 7.8% year-on-year reduction was due to a drop in single premium life insurance business and the transfer of the Baltic non-life insurance business.

The Polish Group companies earned profit before taxes of EUR 13.9 million in the 1<sup>st</sup> half of 2016. The decrease of 46.6% compared to the same period in the previous year was mainly due to a lower financial result due to market conditions, the continuing intense price competition in the motor lines of business, and large hail losses in the motor lines of business.

The ongoing difficult market environment and large hail losses in the motor lines of business had a negative effect

on the combined ratio in the 1<sup>st</sup> half of 2016, which was just under the 100% mark at 99.7% (1<sup>st</sup> half of 2015: 96.8%).

#### **Romania**

The VIG Group companies in Romania generated EUR 266.7 million in premiums written in the 1<sup>st</sup> half of 2016. This strong increase of 37.3% was primarily due to new business in motor third party liability insurance.

Profit before taxes increased by 3.2% year-on-year to EUR 3.6 million (1<sup>st</sup> half of 2015: EUR 3.5 million).

The combined ratio improved again compared to the previous year, although at a level of 101.0% it was still above the 100% mark (1<sup>st</sup> half of 2015: 103.2%).

#### **The Baltic**

The Baltic consist of the countries of Estonia, Latvia and Lithuania.

The Baltic Vienna Insurance Group companies significantly increased premiums written to EUR 70.2 million in the 1<sup>st</sup> half of 2016 (1<sup>st</sup> half of 2015: EUR 29.4 million). The increase was primarily due to the first-time consolidation of the newly founded insurance company Compensa Non-Life and the acquisition of the non-life insurance company Baltikums.

The loss of EUR 6.3 million reported in the 1<sup>st</sup> half of 2016 was primarily due to start-up losses for Compensa Non-Life resulting from a transfer of the Baltic non-life business from a Polish Group company (1<sup>st</sup> half of 2015: EUR 0.9 million).

The resulting costs also affected the combined ratio, which was 131.1% in the 1<sup>st</sup> half of 2016.

#### **Hungary**

Premiums written in Hungary were EUR 116.8 million in the first six months of 2016. This marked increase of 15.4% was mainly the result of strong premium growth in single premium life insurance products.

Profit before taxes rose to EUR 1.7 million. This 45.5% year-on-year increase was the result of cost reductions and syn-

ergy effects among the Hungarian companies due to the advanced stage of integration of Vienna Life.

The combined ratio was 105.0% in the 1<sup>st</sup> half of 2016 due to tax charges for insurance tax and trade tax (1<sup>st</sup> half of 2015: 106.5%).

#### **Bulgaria**

The Bulgarian Group companies recorded premiums written of EUR 75.0 million in the 1<sup>st</sup> half of 2016, representing a year-on-year increase of 2.4%. The drop in premiums from motor third party liability insurance due to strong price competition in the market was more than offset by double-digit growth rates for motor own damage insurance (+16.5%) and other property and casualty insurance (+11.2%).

Profit before taxes was EUR 3.8 million. This represents an increase of 24.9% compared to the same period in the previous year, which was primarily due to higher net profits from the pension fund Doverie.

The combined ratio improved considerably compared to the same period in the previous year to 99.0% due to the restrictive underwriting policy used in the motor lines of business (1<sup>st</sup> half of 2015: 101.4%).

#### **Turkey/Georgia**

The VIG Group companies in the Turkey/Georgia segment recorded premiums written of EUR 113.0 million during the first six months of 2016, representing a strong year-on-year increase of 19.1%. This change was due to a sharp rise in new business in the areas of motor third party liability insurance and other property and casualty insurance.

Profit before taxes rose to EUR 3.9 million. This significant year-on-year increase of 138.0% was due to the increase in motor third party liability insurance and other property and casualty insurance in Turkey.

This also had a positive effect on the combined ratio, which improved to 97.0% in the 1<sup>st</sup> half of 2016 (1<sup>st</sup> half of 2015: 101.5%).

### **Remaining CEE**

The Remaining CEE segment comprises the countries of Albania, Bosnia-Herzegovina, Croatia, Macedonia, Moldova, Serbia and Ukraine.

The Group companies in the Remaining CEE segment recorded EUR 165.8 million in premiums written in the 1<sup>st</sup> half of 2016, an increase of 4.9% that was primarily due to good performance in Croatia and Serbia.

An increase in claims expenses reduced profit before taxes 13.8% year-on-year to EUR 8.7 million.

As a result, the combined ratio was only just under the 100% mark at 99.5% in the 1<sup>st</sup> half of 2016 (1<sup>st</sup> half of 2015: 97.1%)

### **Other Markets**

The Other Markets segment comprises the countries of Germany and Liechtenstein.

The Vienna Insurance Group Group companies in the Other Markets segment generated EUR 202.3 million in premiums written. This decrease of 4.4% compared to the same period in the previous year was mainly due to a reduction in single premium life insurance in Liechtenstein.

Profit before taxes rose by 3.8% year-on-year to EUR 10.5 million in the 1<sup>st</sup> half of 2016 (1<sup>st</sup> half of 2015: EUR 10.1 million).

The combined ratio was an excellent 84.4% in the 1<sup>st</sup> half of 2016 (1<sup>st</sup> half of 2015: 83.7%).

### **Central Functions**

Premiums written in the Central Functions rose 3.5% in the first six months of 2016 to EUR 699.6 million. This was mainly due to an increase in premiums under internal Group reinsurance contracts.

The Central Functions recorded a loss of EUR 16.7 million in the 1<sup>st</sup> half of 2016 due to the interest expenses for the subordinated capital of the Group.

## **EMPLOYEES**

VIG had 23,005 employees in the 1<sup>st</sup> half of the current year – 10 more than in 2015 as a whole.

## **GROUP BUSINESS DEVELOPMENT IN THE 2<sup>ND</sup> QUARTER OF 2016**

In spite of the decrease in single premium life insurance, VIG recorded premiums written of EUR 2,222.3 million in the 2<sup>nd</sup> quarter of the current year. This year-on-year growth of 3.3% was primarily due to an increase in motor third party liability insurance and other property and casualty insurance.

Expenses for claims and insurance benefits less reinsurers' share rose 5.8% to EUR 1,716.5 million in the 2<sup>nd</sup> quarter of 2016. The increase was among others due to large hail losses in the motor lines of business in Poland and the Czech Republic.

Acquisition and administrative expenses less received reinsurance commissions were EUR 471.0 million in the 2<sup>nd</sup> quarter of the current year. The year-on-year increase of 5.3% was primarily due to a change in the calculation of personnel provisions in Austria.

Profit before taxes was EUR 111.7 million in the 2<sup>nd</sup> quarter of 2016. The drop of 10.0% was primarily due to a decrease in the financial result to EUR 225.4 million in the 2<sup>nd</sup> quarter of the current year. This year-on-year decrease of 11.8% mainly resulted from lower realised gains on the disposal of equity investments.

## **RELATED PARTY TRANSACTIONS**

Information on related party transactions is provided in the notes to the consolidated financial statements on page 54.

## **SIGNIFICANT EVENTS AFTER THE FINANCIAL STATEMENTS WERE PREPARED**

Significant events after the financial statements were prepared are presented on page 55 in the consolidated interim financial statements.

## RISK REPORT

The core business of VIG consists of assuming risk. A conscious and controlled handling of risks at all levels of the Group therefore forms the basis for sustainable business development. In order to ensure this sustainability, VIG follows a conservative risk policy that forms the foundation of an integrated risk management system that is an integral part of the structural and process organisation of the Company. Local risk departments and a central risk management department at the holding company level assist the VIG operational departments with Group-wide risk management processes, while continuously promoting the risk awareness of each employee and the existing risk culture in the entire Group.

The risk management processes themselves ensure that all risks in the Group can be promptly and appropriately identified, assessed, analysed and controlled. The associated reporting and regular communications between the Managing Board, risk departments and operating departments also ensure transparency and form a framework for ensuring that the risk situation is appropriately taken into account in the decisions made at the individual company and Group levels.

The Vienna Insurance Group risk environment remained practically unchanged in the 1<sup>st</sup> half of 2016, so that information on the significant business risks to which Vienna Insurance Group is exposed can be obtained from the risk reporting in the Group Annual Report 2015.

In addition to very good capital adequacy under Solvency II, with a solvency ratio of 196% as of 31 December 2015 at the level of the listed VIG Group, Standard and Poor's also confirmed its existing A+ rating with a stable outlook for VIG, thereby confirming the large risk-bearing capacity of the Group.

The situation in financial markets, in particular changes in the interest rate environment, are being monitored closely. Vienna Insurance Group will continue to maintain the conservative, security-oriented investment policy it has used to access financial markets in the past.

Given the effective management of risks based on a conservative business and risk strategy and its strong capital base, Vienna Insurance Group feels it is excellently prepared for the future.

## OUTLOOK

### Economic outlook

The forecasts for Austrian economic growth in 2016 and 2017 predict a weakening of export demand. This is likely to be offset, however, mainly by increased consumer demand. The stagnation in global GDP is not expected to spread to Austria until 2017. According to the economic research institute WIFO, the Austrian economy will grow 1.6% in 2016, 0.7 percentage points more than the previous year. In spite of a steady increase in the employment rate, the unemployment rate is also forecast to increase slightly to 5.9% (forecast according to EUROSTAT). Real per capita net wages and salaries are likely to record a strong increase of 2.6%. This relief for private households is one of the most important factors providing support for growth this year.

According to forecasts from the Vienna Institute for International Economic Studies (WIIW), economic growth will generally stabilise in the countries of the CEE region in coming years, with national GDP growth rates of between 2% and 4%. Based on macroeconomic factors, the countries or regions likely to achieve particularly large growth this year include the Baltic (2.2%–3%), Romania (4%) and the Western Balkans (1.6%–3.9%). The Czech Republic is expected to record annual GDP growth of around 2.5% over the medium term.

At the EU level, developments concerning the Brexit vote in the UK will continue to contribute to financial market uncertainty. Nevertheless, it can be assumed that an orderly transition process and deadlines will be established to maintain the architecture of European markets and institutions as far as possible.

### VIG-Outlook

Vienna Insurance Group aims to generate healthy, properly considered growth and, based on this principle, will continue in the future to follow a growth policy focusing on earnings. In doing so, the Group will continue to rely on targeted strengthening of high-margin business areas by deliberately driving forward property and casualty insurance and life insurance with regular premiums. In addition, VIG will pay attention to the potential for insurance in the small and

medium-size company segment (SME) and place a stronger focus on the area of health insurance. Furthermore, on the product and service side, there will be a new focus on digitalisation.

VIG aims to strengthen its market share by organic growth and through further acquisitions aimed at improving its position in the markets and strategically supplementing the existing portfolio. Countries where VIG holds a top market shares will be secured. These include the Czech Republic and Slovakia, each with a market share of significantly more than 30%, and Austria with close to 24%. Vienna Insurance Group wants to increase its market share to a minimum of 10% in each of Poland, Hungary, Croatia, and Serbia over the medium term. Vienna Insurance Group will reach this target in Serbia when official approval is received for the acquisition of AXA Non-Life and AXA Life in Belgrade. In spite of this aim, a focus will still be placed on cost-effectiveness. Checks will be made to determine where it makes sense to consolidate or combine services and processes.

With regard to the development of results of Vienna Insurance Group, it is expected that the current low-interest rate environment will lead to another decline in the financial result in 2016. Investments continue to be made based on the objective of generating stable, secure cash flows. In spite of the change in the valuation method for the non-profit housing societies and the resulting change in consolidation method for these companies, the Group still aims to at least double profit before taxes to up to EUR 400 million. VIG also aims to improve its combined ratio, with a medium-term target of 95%.

## CURRENT TOPICS

### General Meeting

The 25th ordinary general meeting on 13 May 2016 approved the proposal of the Vienna Insurance Group Managing and Supervisory Boards to pay a dividend of EUR 0.60 per share. This corresponds to a dividend payout ratio of around 78% of profit after taxes and minority interests, thereby continuing the Group's long-term dividend

policy of paying out at least 30% of net profit. Further information on the general meeting and a video of the presentation by General Manager Elisabeth Stadler are available on the Internet at [www.vig.com/en/annual-general-meeting](http://www.vig.com/en/annual-general-meeting).

### **Weather-related claims in Central and Eastern Europe**

In total, gross weather-related claims were around EUR 61 million in the 1<sup>st</sup> half of 2016. After deducting reinsurance, Vienna Insurance Group had a net retention of around EUR 52 million.

### **Awards**

#### **VIG receives TÜV award for quality management**

TÜV Austria has awarded the VIG “International Processes and Methods” department, headed by Christian Walter, a certificate for quality management in accordance with EN ISO 9001:2015. This makes VIG the only insurance company in Austria that has received this current seal of quality. TÜV Austria presented the award for the results- and efficiency-oriented management of processes in VIG.

#### **VIG in the Czech Republic: Kooperativa receives the “Golden Crown”**

As in previous years, the Czech Group company Kooperativa has once again succeeded in winning the Golden Crown award in this year’s survey for the most successful insurance company in the Czech Republic. The Group company received awards in four categories: gold for “Industrial and Commercial Insurance”, silver for household insurance and two bronze awards in the “Motor and Liability Insurance” category. This is the 14<sup>th</sup> time in a row the competition has been held to honour the best financial products of the year in the Czech market.

#### **VIG in Austria: s Versicherung celebrates its fifth “Recommender Award”**

s Versicherung, Austria’s leading provider of life insurance, was awarded first place in the “Bank Insurance” category of the coveted Recommender Award, making this the fifth time it has received this special hallmark of excellence. A total of 9,000 customers of Austrian banks, insurance companies and home loan savings associations were surveyed for the award.

# Capital markets & investor relations & share

## CAPITAL MARKETS

### International overview

Concerns about international economic developments sent stock exchanges plunging at the beginning of 2016. Improved economic prospects and positive signals from central banks helped prices to recover from the middle of the 1<sup>st</sup> quarter. Macroeconomic and political uncertainties nevertheless continued to put pressure on equity markets in the 2<sup>nd</sup> quarter, leading to correspondingly weak price performance.

Equity markets in the USA performed relatively well during the 1<sup>st</sup> half of 2016. Although the US Dow Jones Industrial Index (DJI), quoted in USD, lost more than 10% of its value in the first six weeks of the year, as of 30 June 2016 it had converted these losses into a price gain of 2.9% compared to the end of 2015. The broader-based S&P 500 Index in USD recorded a similar gain in the 1<sup>st</sup> half of 2016, while the NASDAQ technology index quoted in USD suffered a small loss. The above-average price performance in the USA was due to comparatively robust US economic data, price speculation based on potential corporate acquisitions and, in particular, the lack of interest rate policy tightening by the US Federal Reserve.

In Europe, on the other hand, even the European Central Bank's strongly expansive policy was unable to keep the price level from eroding. Although the pan-European EuroStoxx 50 equity index quoted in EUR recorded rapid and significant gains from its low in the middle of February 2016, the value of the index at the end of the 1<sup>st</sup> quarter of 2016 was still 8.0% below its value at the end of 2015. A continuation of extremely modest economic growth in Europe and a large number of political uncertainties – ranging from the political stalemate in Spain and the ongoing refugee crisis through to Brexit – put pressure on European prices in the 2<sup>nd</sup> quarter, causing the EuroStoxx 50 to fall by the end of June 2016 to a level 12.3% below its end-of-year value in 2015.

Similar to European stock exchanges, Japanese price losses in the 1<sup>st</sup> quarter of 2016 increased to an overall year-to-date loss of 18.2%. The emerging markets benefited

from the expansive policy maintained by the US Federal Reserve in the 1<sup>st</sup> half of 2016. While the MSCI Emerging Market Index quoted in USD rose 5.4% during the 1<sup>st</sup> half of 2016, emerging market stock exchanges in Central and Eastern Europe suffered significant price losses. The Eastern European CECE Index quoted in EUR fell 9.6% in the first six months of 2016. Given generally solid growth figures, this loss is mainly attributable to investor concerns about future changes in the political and economic architecture of Europe, including in particular the consequences of Brexit.

### Vienna Stock Exchange

The Vienna Stock Exchange was also affected by the general market movements in the 1<sup>st</sup> quarter of 2016. The leading ATX index temporarily fell below 2,000 points, recording a loss of 18.4% at its low for the year in the middle of February compared to its value at the end of 2015. In the following recovery phase, the Vienna Stock Exchange outperformed most international stock exchanges to reach a level of 2,358.44 points by the middle of April, only 1.6% below its level at the end of 2015. Prices fell again, however, in subsequent weeks with relatively low trading volume. As in the CEE countries, the Vienna Stock Exchange was dominated by the topic of Brexit in June, and the ATX dropped below the 2,000 point mark again. Similar to the EuroStoxx 50, the value of 2,095.96 points on 30 June 2016 represented a loss of 12.6% compared to the end-of-year value for 2015.

## INVESTOR RELATIONS

After publishing solid Q1 results at the end of May 2016, VIG took part in a number of international investor conferences in June 2016. These included the European financial conferences organised by Wood & Company in Warsaw, Goldman Sachs in Paris and Autonomous in London, as well as the conference in Frankfurt jointly organised by Berenberg and the Vienna Stock Exchange. Many investors took advantage of these events to hear information from Vienna Insurance Group management on current developments in the Group.

## VIG SHARE PERFORMANCE

VIG share prices essentially followed international markets and moved parallel to the ATX Index in the 1<sup>st</sup> half of 2016. A significant drop in price occurred after VIG's results were published. The share price subsequently recovered slightly and trended sideways, but was affected by the downward movement of stock markets following the unexpected result of the Brexit vote. As a result, the share price fell to a low of EUR 16.275 for the 1<sup>st</sup> half of 2016 on 27 June 2016. Performance continued to be weak as of 30 June 2016, with a total loss of 32.8% compared to the end of financial year 2015. The share price subsequently remained at this level, closing at EUR 17.565 on the editorial deadline of 16 August 2016.

<b>Additional information</b>		
Received interest <sup>4</sup>	408,845	426,330
Received dividends <sup>4</sup>	83,360	83,256
Interest paid <sup>3</sup>	28,650	21,205
Income taxes paid <sup>4</sup>	43,475	42,835

<sup>1</sup> The non-cash expenses and income are primarily from the results of shares held in at-equity companies and exchange rate changes.

<sup>2</sup> The amount of Cash and cash equivalents at end of period correlates with position I. on the Asset side "Cash and cash equivalents".

<sup>3</sup> Interest paid result primarily from financing activities.

<sup>4</sup> Income tax payments, dividends received and interest received are included in the cash flow from operating activities.

# Notes to the consolidated interim financial statements

## SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These consolidated interim financial statements for the 1<sup>st</sup> half of 2016 were prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union and the applicable commercial law provisions of § 245a of the Austrian Commercial Code (Unternehmensgesetzbuch – UGB) and § 138(8) of the Austrian Insurance Supervision Act (Versicherungsaufsichtsgesetz – VAG) and are in compliance with IAS 34 "Interim Financial Reporting". The same IFRS accounting policies were used as for the last financial statements for the previous financial year. Similarly, the estimates and discretionary assessments needed to prepare the consolidated financial statements were made in the same way. This does not include newly applicable or amended standards.

### Adoption of new standards and the new interpretation

Vienna Insurance Group has applied the IFRS annual improvements (2010–2012 cycle), IAS 19 "Employee benefits", amendments to IAS 27 "Consolidated financial statements", IAS 1 "Presentation of financial statements", IFRS annual improvements (2012–2014 cycle), amendments to IAS 16 "Property, plant and equipment" and amendments to IAS 41 "Agriculture" since 1 January 2016. Application of the amended standards that were relevant for Vienna Insurance Group had either no effect, or no material effect on the condensed consolidated interim financial statements.

### New standards and amendments to existing reporting standards that have not yet been adopted by the EU

		<b>Applicable as of</b>
<b>New Standards</b>		
IFRS 14	Regulatory Deferral Accounts	EU decided this standard shall not be transferred into EU law
IFRS 15	Revenue from contracts with customers	1.1.2018
IFRS 16	Leases	1.1.2019
IFRS 9	Financial instruments	1.1.2018
<b>Amendments to existing standards</b>		
IFRS 10 and IAS 28	Sale or contribution of assets between an investor and is associate or joint venture	still open
IFRS 10, 12 and IAS 28	Consolidation of investment companies	1.1.2016
IAS 12	Recognition of deferred tax assets for unrealised losses	1.1.2017
IAS 7	Changes to the statement of cash flows	1.1.2017

Vienna Insurance Group is not planning early adoption of the revised provisions. With the exception of the amendments to IAS 7 and IFRS 9, these amendments are expected to have no effect, or no material effect on the consolidated financial statements.

With respect to the amendments to IAS 7, VIG will adjust the consolidated financial statements in 2017 in accordance with the new presentation and notes disclosure requirements.

The amendment to IFRS 9 can, however, be expected to lead to considerably higher volatility of profit for the period. Further amendments which are likely to have greater effects on VIG primarily concern the treatment of interest clauses in debt instruments and the treatment of impairment. It must be noted that there is a draft of an amendment to IFRS 9 that would allow insurance companies to apply IFRS 9 at the same time as the forthcoming IFRS for insurance contracts. In this case, IFRS 9 would be applicable by no later than 2021.

## Foreign currency translation

### FOREIGN CURRENCY TRANSACTIONS

The individual Group companies recognise transactions in foreign currency using the mean rate of exchange on the date of each transaction. Monetary assets and liabilities in foreign currency existing on the balance sheet date are translated to euros using the mean rate of exchange on the balance sheet date. Any resulting foreign currency gains and losses are recognised through profit or loss during the reporting period.

### TRANSLATION OF SEPARATE FINANCIAL STATEMENTS IN FOREIGN CURRENCIES

For purposes of the IFRS, the functional currency of Vienna Insurance Group subsidiaries located outside the Eurozone is generally the currency of their respective country. All assets and liabilities reported in the separate financial statements are translated to euros using the mean rate of exchange on the balance sheet date. Items in the income statement are translated using the average month-end mean rate of exchange during the reporting period. In the statement of cashflows, the mean rate of exchange on the balance sheet date is used for changes in balance sheet items, and the mean exchange rate at the end of the month is used for income statement items. Foreign exchange gains and losses have been recognised directly in other comprehensive income since 1 January 2004.

The following table shows the relevant exchange rates for the consolidated financial statements:

Name	Currency	Period-end exchange rate 30.6.2016	Period-end exchange rate 30.6.2015	Average exchange rate 1.1.-30.6.2016	Average exchange rate 1.1.-30.6.2015

## DISCLOSURES ON SEASONAL AND ECONOMIC INFLUENCES

Within VIG, seasonal fluctuations mainly affect the areas of premiums, losses and the financial result. Due to the large number of insurance contracts beginning in January, the 1<sup>st</sup> quarter is also normally the strongest quarter of the year in terms of premiums. In terms of losses, the 1<sup>st</sup> quarter (or 1<sup>st</sup> half) also normally shows a higher level of charges, mainly due to adverse environmental influences (snow, snowmelt, storms, floods). Adverse weather events, such as storms, can also occur during the summer and autumn. With respect to the financial result, the majority of dividend income occurs in the 2<sup>nd</sup> quarter.

## CHANGES TO THE SCOPE OF CONSOLIDATION

Acquired companies are added to the scope of consolidation based on an internal Group guideline. The guideline includes quantitative thresholds and quantitative criteria that take into account IFRS 10.

The following company was deconsolidated during the reporting period from 1 January 2016 to 30 June 2016:

<b>Deconsolidations</b>	<b>Reason for deconsolidation</b>	<b>Deconsolidation date</b>	<b>Region</b>
TECH GATE	Sale	30.6.2016	Austria

The following changes took place in the scope of consolidation during the reporting period:

<b>Retrospective change of consolidation method to at equity consolidation</b>	<b>% share</b>	<b>Date of change</b>
Neue Heimat Holding	87.07	1.1.2014

The reasons for retrospective adjustments to the consolidation methods are presented on page 32.

The following company was added to the scope of consolidation during the reporting period from 1 January 2016 to 30 June 2016:

<b>Companies acquired during the reporting period</b>	<b>Shares acquired (%)</b>	<b>Date of first consolidation</b>	<b>Goodwill in EUR million</b>
Nova	100.00	1.1.2016	0.56

The requirements for including the (90%) interest in BTA Baltic in the consolidated financial statements were still not satisfied as of 30 June 2016, since prior to the closing of the transaction the Group still had no control over this company.

## SEGMENT REPORTING

The new composition of the Vienna Insurance Group Managing Board took effect on 1 January 2016. The resulting changes to areas of responsibility also led to a stronger focus on countries in the management of the Group. This was used as a reason to review the accounting business segments and, therefore, also the cash generating units and to adjust them to match the country focus.

In accordance with IFRS, the management focus on countries led to a change in the accounting for Group assets (e.g. insurance portfolios, brands, goodwill, etc.) based on cash generating units. As a result, Group assets are no longer recognised based on balance sheet units of the parent company concerned, but at the country level. This makes it necessary to make retrospective adjustments to previous regional result shown for comparative periods in the interim report.

Segment reporting also had to be adjusted and has provided a breakdown by markets since 1 January 2016. with certain countries combined based on size according to their regional or product-specific factors (Turkey/Georgia, Remaining CEE and Other Markets). The quantitative thresholds in IFRS 8 were used to determine the segments that should be published separately.

## RETROSPECTIVE ADJUSTMENT

The adjustment is based on a notice of 2 August 2016 from the Austrian Financial Market Authority (FMA) in accordance with § 3(1) no. 3 of the Austrian Financial Reporting Enforcement Act (Rechnungslegungs-Kontrollgesetz – RL-KG), in which the FMA found that the participations in the non-profit housing societies were not reported in accordance with FRS. The audit was based on the consolidated financial statements of 31 December 2014 and 31 December 2015 and the half-year reports of 30 June 2014 and 30 June 2015. According to this notice, statutory restrictions on payout and realisation of assets that apply to non-profit housing societies, and indirectly to their holding company, were not taken into account when determining the fair value of these companies at the time of loss of control or recognising the share of their profits. The effects on the Vienna Insurance Group balance sheet and income statement are as follows:

- The non-controlling interests reported due to full consolidation of Neue Heimat Holding GmbH are fully eliminated. This causes the non-controlling interests in the shareholders' equity to fall by EUR 57,101,000 (as of 1 January 2015).
- Due to the change in consolidation on 1 January 2014, the at-equity book value of the non-profit housing societies drops by EUR 501,730,000 as of 1 January 2015.
- Only the amount of payouts received from the non-profit housing societies is reported as their current contribution to earnings, instead of the amount previously shown for the pro rata profits of the companies.

This means the following adjustments for financial year 2015 and for shareholders' equity as of 1 January 2015:

As of 1.1.2015	As originally reported	Non-profit adjustment	After adjustment
<b>ASSETS</b>			
B. Investments*	30,359,543	-501,485	29,858,058
E. Receivables	1,502,027	1,801	1,503,828
F. Tax receivables and advance payments out of income tax	119,209	-71	119,138
I. Cash and cash equivalents	781,987	-2,204	779,783
<b>LIABILITIES AND SHAREHOLDERS' EQUITY</b>			
F. Liabilities	1,679,355	-202	1,679,153
<b>Shareholders' equity</b>	<b>5,283,427</b>	<b>-501,757</b>	<b>4,781,670</b>

#### Other expenses

The decrease in other expenses over the previous year was mainly due to smaller currency fluctuations, which were due to the Swiss franc being unpegged from the euro in the previous year. This exchange rate effect is neutral with respect to the Group result, since an offsetting change took place in the underwriting result.

## ADDITIONAL DISCLOSURES

### 13. FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENT HIERARCHY

Information on the nature and extent of risks arising from financial instruments is provided in the section titled “Financial instruments and risk management” on page 106 of the consolidated financial statements for 2015.

#### Fair value and book value of financial instruments

\* The market values are derived from internal and external expert reports.

Due to reasons of materiality, book value was used as the fair value of all liabilities other than derivative liabilities.

### Measurement process:

Note 36 "Financial instruments and fair value measurement hierarchy" in the 2015 Group Annual Report as of 31 December 2015 provides information on the measurement process.

### OTHER DISCLOSURES ABOUT THE MEASUREMENT PROCESS:

The fair value of shares and other participations with a book value of EUR 157,570,000 (31 December 2015: EUR 140,096,000) could not be reliably estimated as of 30 June 2016. The shares are mainly invested in companies that are not listed on any stock exchange.

### Reclassification of financial instruments

Reclassifications were performed based on the criteria and time points indicated in Note 36 "Financial instruments and fair value measurement hierarchy" in the Group Annual Report as of 31 December 2015.

Twenty-two reclassifications between level 1 and level 2 were performed during the reporting period in the financial instruments available for sale category and three in the financial instruments recognised at fair value through profit and loss category. These were primarily due to changes in liquidity, trading frequency and trading activities, but also resulted from a harmonisation of measurement hierarchies due to the introduction of Solvency II, and consolidation effects between the measurement hierarchies.

One reclassification from level 3 to level 2 was also performed in the financial instruments available for sale category resulting from the harmonisation of measurement hierarchies due to the introduction of Solvency II, and one reclassification from level 3 to level 1 in the financial instruments available for sale category due to consolidation effects between the measurement hierarchies.

### Hierarchy for financial instruments measured at fair value

The tables below show the hierarchy for financial instruments measured at fair value as of 30 June 2016 and 31 December 2015:

Hierarchy for financial instruments measured at fair value	Level 1		Level 2		Level 3	
	30.6.2016	31.12.2015	30.6.2016	31.12.2015	30.6.2016	31.12.2015
in EUR '000						
<b>FINANCIAL ASSETS</b>						
<b>Financial investments available for sale</b>	<b>18,952,761</b>	<b>17,750,295</b>	<b>2,800,978</b>	<b>2,763,552</b>	<b>137,069</b>	<b>135,634</b>

The level 3 financial instruments still in the portfolio had an effect on the result (net profit or loss) of EUR -1,289,000 (EUR 1,684,000) as of 30 June 2016.

### Unobservable input factors

asset class	Measurement methods	Unobservable input factors	Range
Real estates	Market value	Capitalisation rate	1.5% – 7.5%
		rental income	3,000 EUR – 5,220,000 EUR
		Land prices	0 – 5,000 EUR
	Discounted Cash Flow	Capitalisation rate	4.25% – 8.25%
		rental income	500,000 EUR – 3,800,000 EUR

### Sensitivities

Sensitivities - real estate	Market value
in million EUR	
Fair value as of 30.6.2016	2,885.25
rental income - 5%	2,779.46
rental income +5%	2,991.21
Capitalisation rate - 50bp	3,033.01
Capitalisation rate +50bp	2,758.62
Land prices - 5%	2,853.95
Land prices +5%	2,916.24

A present value method is used to determine the fair value of certain corporate bonds that are generally measured at fair value. The primary input for this method is an issuer-specific risk premium, which may not be observable on the market. Depending on time to maturity, a significant increase in this spread, which might be derived from a sector or rating category, would have a major negative effect on the fair value determined in this way. Conversely, a significant decrease in this spread would increase the fair value of these financial investments.

With respect to the value of shares measured using a level 3 method (multiples approach), VIG assumes that alternative inputs and alternative methods do not lead to significant changes in value.

The following sensitivities were calculated for a derivative with the most material fair value: a 100 basis point increase in the discount rate leads to a 46% increase in option value; a 100 basis point decrease leads to a 67% drop in option value.

Due to a lack of available data, no sensitivity analysis information can be provided for the other securities whose fair value in level 3 has been determined by independent third parties.

## 15. RELATED PARTY TRANSACTIONS

These mainly concern minor reinsurance relationships between companies in the Group, financing at market terms, chiefly in the real estate area, and intercompany charges. These transactions have, however, no material effect on the performance of the Company. No loans or guarantees were granted to the members of the Managing Board or Supervisory Board during the reporting period.

## 16. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

### Changes in the valuation method and consolidation approach for non-profit housing societies.

On 3 August 2016, the Supervisory Board approved the re-establishment of a controlling influence over the non-profit housing societies by VIG. The shares in the nine companies and Neue Heimat Holding are therefore fully consolidated in the 3<sup>rd</sup> quarter of 2016 and their material assets included in the consolidated balance sheet. These assets include property with a book value of around EUR 3.5 billion. Full consolidation increases the shareholders' equity from non-profit housing societies by around EUR 1 billion based on data for the 1<sup>st</sup> half of 2016. This increase will be recognised separately in full under "non-controlling interests" in the balance sheet in the future, as this shareholders' equity is attributable to the public sector. The contribution to earnings for the 1<sup>st</sup> half of 2016 would have been EUR 40.4 million if VIG had re-established control as of 1 January 2016. VIG expects a contribution to earnings before taxes of around EUR 30 million for 2016 after full consolidation.

The VIG balance sheet will show the following changes due to the change to full consolidation (based on data as of 30 June 2016):

ASSETS	30.6.2016	Effects of full consolidation of the non-profit companies	30.6.2016 as if
<b>in EUR '000</b>			
A. Intangible assets	2,051,877	1,264	2,053,141

**Purchase of the AXA company in Romania**

At the beginning of August 2016, Vienna Insurance Group signed an agreement to acquire the Romanian life insurance company AXA Life Insurance S.A. (AXA Life), thereby confirming its leading position in the Romanian insurance market. The buyers are the two Romanian VIG Group companies BČR Life and Omniasig. The acquisition is subject to approval by the local authorities.

**Rating confirmed**

In mid-July 2016, the internationally recognised rating agency Standard & Poor's once again confirmed its A+ rating with a stable outlook for Vienna Insurance Group AG Wiener Versicherung Gruppe. This means that VIG continues to enjoy the best credit rating of all companies in the ATX Index.

**Purchase of the AXA company in Serbia**

At the beginning of July 2016, VIG signed an agreement to acquire the non-life insurance company AXA Nezivotno Osiguranje a.d.o. Beograd and the life insurance company AXA Zivotno Osiguranje a.d.o. Beograd (AXA Serbia). The acquisition is subject to approval by the local authorities. The acquisition increases VIG's market share in Serbia to around 11.5%.

**Resolution of the government bank resolution company HETA**

On 6 July 2016, the National Council approved an increase in the maximum liability of the Austrian federal government as a pre-condition for funding a compromise solution between the Austrian Ministry of Finance and HETA creditors. VIG is currently examining the steps to take next.

# Declaration by the Managing Board

We declare to the best of our knowledge that the consolidated interim financial statements prepared in accordance with applicable accounting standards give a true and fair view of the Group's net assets, financial position and results of operations, the interim management report gives a true and fair view of the net assets, financial position and results of operations of the Group with regard to important events during the first six months of the financial year and their impact on the consolidated interim financial statements, of the principal risks and uncertainties for the remaining six months of the financial year and material related party transactions to be disclosed. The interim report was not fully audited or reviewed by an auditor.

Vienna, 16 August 2016

## NOTICE

This report includes forward-looking statements based on current assumptions and estimates that were made by the management of VIENNA INSURANCE GROUP AG Wiener Versicherung Gruppe to the best of its knowledge. Statements using the words “expectation”, “target” or similar formulations indicate such forward-looking statements. Forecasts related to the future development of the Company are estimates made on the basis of information available as of the date this interim report went to press. Actual results may differ from the forecasts if the assumptions underlying the forecast prove to be wrong or if unexpectedly high risks occur.

Calculation differences may arise when rounded amounts and percentages are summed automatically.

The interim report was prepared with the greatest possible care in order to ensure that the information provided in all parts is correct and complete. The possibility of rounding, type-setting or printing errors, however, cannot be ruled out completely.

All references in the text are to be understood as referring equally to men and women without discrimination.

In case of doubt, the German version is authoritative.
