

Baiterek National Investment Holding JSC
(a joint stock company organised in the Republic of Kazakhstan)
U.S.\$3,000,000,000
MEDIUM TERM NOTE PROGRAMME

Under the U.S.\$3,000,000,000 Medium Term Note Programme (the “**Programme**”) described in this base offering memorandum (the “**Base Offering Memorandum**”), Baiterek National Investment Holding JSC (the “**Issuer**”) may from time-to-time issue notes (the “**Notes**”) in series (each a “**Series**”) and each Series may comprise one or more tranches (each a “**Tranche**”) denominated in any currency agreed between the Issuer and the relevant Dealer(s) (as defined below). The maximum aggregate nominal amount of Notes outstanding under the Programme will not exceed U.S.\$3,000,000,000 (or its equivalent in other currencies calculated as described in the Programme Agreement referred to herein), subject to increase, as described herein. The Notes will be constituted by, and have the benefit of, a trust deed dated 2 May 2025 (as may be further supplemented, amended or restated from time-to-time) (the “**Trust Deed**”) between the Issuer and Citibank, N.A., London Branch (the “**Trustee**”, which term shall include any successor trustee under the Trust Deed).

Application has also been made to Wiener Börse AG (the “**Vienna Stock Exchange**”) for the admission of the Programme and/or any Notes to trading on the Vienna MTF of the Vienna Stock Exchange, a multilateral trading facility (the “**Vienna MTF**”). This Base Offering Memorandum does not constitute a prospectus for the purposes of a listing or an admission to trading on any market in the European Economic Area (the “**EEA**”) which has been designated as a regulated market for the purposes of the Markets in Financial Instruments Directive (Directive 2014/65/EU) (as amended, “**MiFID II**”), and has not been approved by the competent authority in any member state of the EEA pursuant to Regulation (EU) 2017/1129.

Notice of the aggregate nominal amount of Notes, interest (if any) payable in respect of Notes, the issue price of Notes and certain other information which is applicable to each Tranche (as defined under “**Terms and Conditions of the Notes**” (the “**Conditions**”)) of Notes will be set out in a pricing supplement document (the “**Pricing Supplement**”) which will be delivered to the Vienna Stock Exchange.

In addition, unless otherwise agreed with the relevant Dealer(s) (as defined below) and provided for in the Pricing Supplement, the Issuer will use its reasonable endeavours to cause all Notes issued by the Issuer under the Programme to be admitted to the “**Bonds**” category of the “**Debt Securities**” sector of the “**Main**” platform of the Kazakhstan Stock Exchange (the “**KASE**”) from (and including) the date of issue of the relevant Notes in respect of such Notes (the “**Issue Date**”). Simultaneously with an offering of Notes outside of the Republic of Kazakhstan, the Notes must be offered through the KASE on the same terms on which the Notes are being offered in a foreign state. In connection with the listing of the Notes on the KASE and the offer and sale of Notes in Kazakhstan, JSC Halyk Finance will act as dealer and the other Dealer(s) will not be involved in such process.

References in this Base Offering Memorandum to the Notes being “listed” (and all related references) shall mean that the Notes have been admitted to trading on the Vienna MTF. The relevant Pricing Supplement will state on which exchange(s) the Notes are to be admitted to trading. The Programme also permits Notes to be issued on an unlisted basis or to be listed on such other or further listing authorities, stock exchanges or quotation systems as may be agreed between the Issuer and the relevant Dealer(s). Any Notes issued on an unlisted basis will not be issued from this Base Offering Memorandum.

AN INVESTMENT IN NOTES INVOLVES A HIGH DEGREE OF RISK.
SEE “RISK FACTORS” FOR A DISCUSSION OF CERTAIN FACTORS THAT SHOULD BE CONSIDERED
IN CONNECTION WITH AN INVESTMENT IN THE NOTES ISSUED UNDER THE PROGRAMME.

The Notes have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the “**Securities Act**”), or the securities laws of any state of the United States or other jurisdiction and, subject to certain exceptions, may not be offered and sold within the United States or to, or for the account or benefit of, U.S. persons (as defined in Regulation S under the Securities Act (“**Regulation S**”)). The Notes may be offered and sold (i) within the United States to persons who are qualified institutional buyers (each, a “**QIB**”), as defined in Rule 144A under the Securities Act (“**Rule 144A**”) and are also qualified purchasers (each, a “**QP**”), as defined in Section 2(a)(51) of the U.S. Investment Company Act of 1940, as amended (the “**Investment Company Act**”), in reliance on the exemption from registration provided by Rule 144A (such Notes so offered and sold, the “**Rule 144A Notes**”) and (ii) to non-U.S. persons in offshore transactions in reliance on Regulation S (such Notes so offered and sold, the “**Regulation S Notes**”). Prospective purchasers are hereby notified that sellers of the Notes may be relying on the exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A. For a description of these and certain other restrictions, see “**Subscription and Sale**” and “**Transfer Restrictions**”. Regulation S Notes and Rule 144A Notes in a particular Tranche will each initially be represented by a separate global note (a “**Regulation S Global Note**” and a “**Rule 144A Global Note**”, respectively, and together, the “**Global Notes**”). The provisions governing the exchange of interests in Global Notes for other Global Notes and definitive Notes are described in “Summary of the Provisions Relating to Notes in Global Form”.

The Notes may be issued on a continuing basis to one or more of the Dealers specified under “**General Description of the Programme**” and any additional Dealer appointed under the Programme from time-to-time by the Issuer (each, a “**Dealer**” and together, the “**Dealers**”), which appointment may be for a specific issue of Notes or on an ongoing basis. References in this Base Offering Memorandum to the “**relevant Dealer**” shall, in relation to an issue of Notes being (or intended to be) subscribed by more than one Dealer, be to all the Dealers agreeing to subscribe for such Notes, or in the case of a syndicated issue of Notes, the lead manager of such issue, as the case may be.

As of the date of this Base Offering Memorandum, [the long-term foreign currency debt of the Issuer has been rated BBB with Stable Outlook by Fitch Ratings Limited (“**Fitch**”) and Baa1 with stable outlook by Moody’s Investors Service Limited (“**Moody’s**”)]. [Fitch is not established in the EEA, but the rating it has given to the Notes is endorsed by Fitch Ratings Ireland Limited, which is established in the EEA and registered under the Regulation (EC) No. 1060/2009 (the “**EU CRA Regulation**”). Moody’s is not established in the EEA, but the rating it has given to the Notes is endorsed by Moody’s Deutschland GmbH, which is established in the EEA and registered under the EU CRA Regulation.]. Notes issued under the Programme may be rated or unrated. Where an issue of Notes is rated, the applicable rating(s) will be specified in the relevant Pricing Supplement. Such rating will not necessarily be the same as the rating assigned to the Issuer by the relevant rating agency. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.

The date of this Base Offering Memorandum is 27 April 2026

IMPORTANT NOTICES

This Base Offering Memorandum does not comprise a prospectus for the purposes of either Regulation (EU) 2017/1129 or the Prospectus Rules: Admission to Trading on a Regulated Market Sourcebook (the “**PRM**”) and has not been approved as such by the competent authority in any member state of the EEA or by the FCA.

The Issuer accepts responsibility for the information contained in this Base Offering Memorandum. To the best of the knowledge of the Issuer, the information contained in this Base Offering Memorandum is true and accurate and is in accordance with the facts and the Base Offering Memorandum as completed by the relevant Pricing Supplement does not omit anything likely to affect its import.

Certain information in this Base Offering Memorandum contained under the headings “*Risk Factors*” and “*Overview of Kazakhstan*” and certain other macroeconomic data which appear in this Base Offering Memorandum have been extracted from documents and other publications released by the National Statistics Office, the National Bank of Kazakhstan (“**NBK**”) and the Agency of the Republic of Kazakhstan for Regulation and Development of the Financial Market. The Issuer accepts responsibility for accurately reproducing such extracts, and as far as it is aware and is able to ascertain from information published by such sources, no facts have been omitted which would render such information inaccurate or misleading. See “*Presentation of Financial and Other Information - Market and Industry Data*”.

The distribution of this Base Offering Memorandum and the offering or sale of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Base Offering Memorandum comes are required by the Issuer, the Arrangers and the Dealers to inform themselves about and to observe any such restriction.

No person has been authorised to give any information or to make any representation not contained in or not consistent with this Base Offering Memorandum or any other document entered into in relation to the Programme or any information supplied by the Issuer or such other information as is in the public domain and, if given or made, such information or representation should not be relied upon as having been authorised by the Issuer, the Trustee or any Dealer or any of their respective affiliates.

None of the Arrangers, the Dealers or the Trustee has verified the completeness and accuracy of the information contained herein. Accordingly, no representation or warranty is made or implied by the Arrangers, the Dealers, the Trustee or any of their respective affiliates, and none of the Arrangers, the Dealers, the Trustee nor any of their respective affiliates makes any representation or warranty or accepts any responsibility as to the accuracy or completeness of the information contained in this Base Offering Memorandum, and each of them disclaims all and any liability whether arising in tort or contract or otherwise, which it might otherwise have in respect of, this Base Offering Memorandum or any supplement hereto. The delivery of this Base Offering Memorandum, any Pricing Supplement or the offering, sale or delivery of any Note shall not, in any circumstances, create any implication that the information contained in this Base Offering Memorandum is true subsequent to the date hereof or the date upon which this Base Offering Memorandum has been most recently amended or supplemented or that there has been no adverse change, or any event reasonably likely to involve any adverse change, in the condition (financial or otherwise) of the Issuer since the date hereof or, if later, the date upon which this Base Offering Memorandum has been most recently amended or supplemented or that any other information supplied in connection with the Programme is correct at any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

Neither this Base Offering Memorandum nor any other financial statements are intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by any of the Issuer, the Arrangers or the Dealers that any recipient of this Base Offering Memorandum or any other financial statements should purchase the Notes. Each potential purchaser of Notes should determine for itself the relevance of the information contained in this Base Offering Memorandum and its purchase of Notes should be based upon such investigation as it deems necessary. None of the Dealers or the Arrangers undertakes to review the financial condition or affairs of the Issuer during the life of the arrangements contemplated by this Base Offering Memorandum nor to advise any investor or potential investor in the Notes of any information coming to the attention of any of the Dealers or the Arrangers.

The Notes may not be a suitable investment for all investors. Each potential investor in the Notes must determine the suitability of the investment in light of its own circumstances. In particular, each potential investor should (a) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained in this Base Offering Memorandum or any applicable supplement; (b) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact such investment will have on its overall investment portfolio; (c) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where the currency for principal or interest payments is different from the potential investor's currency; (d) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and (e) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

OFFER RESTRICTIONS

This Base Offering Memorandum does not constitute an offer of, or an invitation by or on behalf of the Issuer, the Arrangers or the Dealers to subscribe for, or purchase, any Notes. The distribution of this Base Offering Memorandum, any Pricing Supplement and the offering, sale and delivery of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Base Offering Memorandum or any Pricing Supplement comes are required by the Issuer and the Dealers to inform themselves about and to observe any such restrictions. For a description of certain restrictions on offers, sales and deliveries of Notes and on the distribution of this Base Offering Memorandum or any Pricing Supplement and other offering material relating to the Notes, see *“Transfer Restrictions”* and *“Subscription and Sale”*.

This Base Offering Memorandum may be communicated solely to (A) persons outside the United Kingdom or (B) persons inside the United Kingdom who are (i) persons with professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the **“Order”**), (ii) high net worth entities, and other persons to whom it may lawfully be communicated, falling within Article 49(2)(a) to (d) of the Order or (iii) persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities of the Issuer or any of its subsidiaries (the Issuer and its subsidiaries together, the **“Group”**) may otherwise lawfully be communicated or caused to be communicated (all such persons in (A) and (B) above being **“relevant persons”**). Any investment activity to which this communication relates will only be available to and will only be engaged with relevant persons. Any person who is not a relevant person should not act or rely on this communication.

None of this Base Offering Memorandum, any Pricing Supplement or any other information supplied in connection with the Programme constitutes an offer or an invitation to subscribe for or purchase any Notes and should not be considered as a recommendation by the Issuer, the Dealers, the Trustee or any of their respective affiliates that any recipient of this Base Offering Memorandum or any Pricing Supplement should subscribe for or purchase any Notes. Each recipient of this Base Offering Memorandum or any Pricing Supplement shall be taken to have made its own investigation and appraisal of the condition (financial or otherwise) of the Issuer. The contents of this Base Offering Memorandum are not to be construed as, and should not be relied on as, legal, business or tax advice and each prospective investor should consult its own legal and other advisers for any such advice relevant to it.

PROHIBITION OF SALES TO EEA RETAIL INVESTORS - The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the **“EEA”**). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, **“MiFID II”**); or (ii) a customer within the meaning of the Directive 2016/97/EU (the **“Insurance Distribution Directive”**), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the **“PRIIPs Regulation”**) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

PROHIBITION OF SALES TO UK RETAIL INVESTORS. The Notes are not intended to be offered, distributed or otherwise made available to and should not be offered, sold, distributed or otherwise made available to any retail investor in the United Kingdom (“UK”). For these purposes, a retail investor means a person who is not a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA. Consequently, no disclosure document required by the FCA Product Disclosure Sourcebook (“**DISC**”), for offering, selling or distributing the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering, selling or distributing the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the DISC and the Consumer Composite Investments (Designated Activities) Regulations 2024, as applicable.

MiFID II PRODUCT GOVERNANCE/PROFESSIONAL INVESTORS AND ECPs ONLY TARGET MARKET - The Pricing Supplement in respect of any Notes will include a legend entitled “**MiFID II product governance**” which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a “**distributor**”) should take into consideration the target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the Product Governance rules under EU Delegated Directive 2017/593 (the “**MiFID Product Governance Rules**”), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arrangers nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

UK MiFIR PRODUCT GOVERNANCE / PROFESSIONAL INVESTORS AND ECPs ONLY target market - The Pricing Supplement in respect of any Notes will include a legend entitled “**UK MiFIR Product Governance**”, which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a “**distributor**”) should take into consideration the target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the “**UK MiFIR Product Governance Rules**”) is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arrangers nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

Singapore SFA Product Classification: In connection with Section 309B of the Securities and Futures Act (Chapter 289) of Singapore, as modified or amended from time to time (the “**SFA**”) and the Securities and Futures (Capital Markets Products) Regulations 2018 of Singapore (the “**CMP Regulations 2018**”), the Issuer has determined, and hereby notifies all relevant persons (as defined in Section 309A(1) of the SFA), that the Notes are ‘prescribed capital markets products’ (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in Monetary Authority of Singapore (the “**MAS**”) Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Sales To Canadian Investors: The Notes may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the Notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this Base Offering Memorandum (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should

refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the Joint Bookrunners are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with the offering of the Notes.

Interest and/or other amounts payable under the Notes may be calculated by reference to certain reference rates. Any such reference rate may constitute a benchmark for the purposes of Regulation (EU) 2016/2101, as amended (the “BMR”). If any such reference rate does constitute such a benchmark, the relevant Pricing Supplement will indicate whether or not the benchmark is provided by an administrator included in the register of administrators and benchmarks (the “BMR Register”) established and maintained by the European Securities and Markets Authority (“ESMA”) pursuant to Article 36 (Register of administrators and benchmarks) of the BMR. The registration status of any administrator under the BMR is a matter of public record and, save where required by applicable law, the Issuer does not intend to update any Pricing Supplement to reflect any change in the registration status of the administrator.

Amounts payable on the Notes may be calculated by reference to EURIBOR or SOFR (as defined in the Conditions), as specified in the relevant Pricing Supplement. As of the date of this Base Offering Memorandum, European Money Markets Institute (as administrator of EURIBOR) appears, and the Federal Reserve Bank of New York (as administrator of SOFR) does not appear on the BMR Register. As far as the Issuer is aware, the Federal Reserve Bank of New York (as administrator of SOFR) does not fall within the scope of the BMR by virtue of Article 2 of that regulation.

The language of this Base Offering Memorandum is English. Certain legislative references and technical terms have been cited in their original language in order that the correct technical meaning may be ascribed to them under applicable law. In connection with the listing of the Notes on the KASE, the Issuer will furnish the KASE with a Russian translation of this Base Offering Memorandum (the “Translation”). The Translation has been prepared by the Issuer solely for the purpose of listing the securities described in the Base Offering Memorandum on the KASE. None of the Dealers or any of their affiliates has verified, makes any representation or warranty, or takes any responsibility for the accuracy or completeness of the Translation. This Base Offering Memorandum in English is the only authentic and definitive version for the investment decision making process. In the event of any conflict or discrepancy between the English version of this Base Offering Memorandum and the Translation, or any dispute regarding the interpretation of any statement in the English version or the Translation, the English version shall prevail.

This Base Offering Memorandum has been prepared on the basis that any offer of Notes in the UK will be made pursuant to an exemption under the PRM, from the requirement to publish a prospectus for offers of Notes. Accordingly any person making or intending to make an offer in the UK of Notes, which are the subject of an offering contemplated by the relevant Pricing Supplement may only do so in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to PRM2.3 or supplement a prospectus pursuant to PRM10.1 in each case, in relation to such offer. Neither the Issuer nor any Dealer has authorised, nor do they authorise, the making of any offer of Notes in circumstances in which an obligation arises for the Issuer or any Dealer to publish or supplement a Base Offering Memorandum for such offer.

NEITHER THE NOTES NOR ANY BENEFICIAL INTERESTS THEREIN HAVE BEEN APPROVED OR DISAPPROVED BY THE U.S. SECURITIES AND EXCHANGE COMMISSION, ANY STATE SECURITIES COMMISSION IN THE UNITED STATES OR ANY OTHER U.S. REGULATORY AUTHORITY, NOR HAVE ANY OF THE FOREGOING AUTHORITIES PASSED UPON OR ENDORSED THE MERITS OF THE NOTES OR THE ACCURACY OR THE ADEQUACY OF THIS BASE OFFERING MEMORANDUM. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENCE IN THE UNITED STATES.

Each potential investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained in this Base Offering Memorandum or any applicable supplement;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes may have on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including Notes with principal or interest payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's home currency;
- understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Some Notes are complex financial instruments. A potential investor should not invest in Notes, which are complex financial instruments unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes are expected to perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

The investment activities of certain investors may be subject to law or review or regulation by certain authorities. Each potential investor should determine for itself, on the basis of professional advice where appropriate, whether and to what extent Notes are lawful investments for it, Notes can be used as collateral for various types of borrowing, and other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk based capital or similar rules.

In connection with the issue of any Series of Notes, J.P. Morgan Securities plc will be acting as the Issuer's development finance structuring agent (the **"Development Finance Structuring Agent"**) if named as such in the applicable Pricing Supplement. No assurance is given that any Series of Notes to be issued under the Programme will be qualified by the Development Finance Structuring Agent. No assurance is given by the Issuer or the Development Finance Structuring Agent that investing in the Notes or the use of proceeds by the Issuer will satisfy, whether in whole or in part, any present or future investor expectations or requirements with respect to sustainable development impact financing, including related sustainability criteria or goals. See "Sustainable Development Impact". No independent verification as to the accuracy or completeness or lack thereof of the "Sustainable Development Impact" section of this Base Offering Memorandum has been done by J.P. Morgan Securities plc. The information contained in the section "Sustainable Development Impact" of this Base Offering Memorandum (a) is not a substitute for an investor's independent evaluation and analysis and (b) should not be considered as a recommendation by the Development Finance Structuring Agent that any transactions or related projects described in the "Sustainable Development Impact" section of this Base Offering Memorandum achieve any particular development finance criteria or requirement to which it may be subject. The "Sustainable Development Impact" section of this Base Offering Memorandum has been prepared, in part, based on certain forward-looking statements and projections provided by the Issuer. Any such statements and projections reflect various estimates and assumptions by the Issuer concerning anticipated results. No representations or warranties are made by the Development Finance Structuring Agent as to the accuracy of any such statements or projections. Whether or not any such forward-looking statements or projections are in fact achieved will depend upon future events some of which may not be within the control of the Issuer. See "Forward-Looking Statements". Accordingly, actual results may vary from the projected results, and such variations may be material. No fiduciary duties are owed to any party by the Development Finance Structuring Agent.

STABILISATION

In connection with the issue of any Tranche of Notes, the Dealer or Dealers (if any) named as the stabilising manager(s) (the “**Stabilising Manager(s)**”) (or persons acting on behalf of any Stabilising Manager(s)) in the applicable Pricing Supplement may over-allot Notes or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, there is no assurance that the Stabilising Manager(s) (or persons acting on behalf of a Stabilising Manager) will undertake stabilisation action. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant Tranche of Notes is made and, if begun, may be ended at any time, but it must end no later than the earlier of 30 days after the issue date of the relevant Tranche of Notes and 60 days after the date of the allotment of the relevant Tranche of Notes. Any stabilisation or over-allotment must be conducted by the relevant Stabilising Manager(s) (or person(s) acting on behalf of any Stabilising Manager(s)) in accordance with all applicable laws and rules.

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Financial Statements

In this Base Offering Memorandum, the Issuer is presenting historical consolidated financial information for the Issuer and its subsidiaries (the **“Group”**) as of and for the years ended 31 December 2023, 2024, and 2025, which is derived from the Group’s audited consolidated financial statements as of and for the years ended 31 December 2023, 2024, and 2025. The Issuer is required to maintain its accounts in accordance with relevant laws and regulations in the Republic of Kazakhstan (**“Kazakhstan”**) including those adopted by its regulator (since 1 January 2020, the Agency of the Republic of Kazakhstan for Regulation and Development of the Financial Market and, prior to that date, the Financial Market Supervision Committee of the National Bank of Kazakhstan (the **“NBK”**)). These laws and regulations require that the Issuer’s accounts be prepared in Tenge (as defined below) and in accordance with IFRS Accounting Standards (**“IFRS”**), as promulgated by the International Accounting Standards Board (the **“IASB”**). Accordingly, the Issuer’s audited annual consolidated financial statements contained in this Base Offering Memorandum, including the notes thereto, as of and for the year ended 31 December 2025, which include comparative data as of and for the year ended 31 December 2024 (the **“2025 Financial Statements”**), as of and for the year ended 31 December 2024, which include comparative data as of and for the year ended 31 December 2023 (the **“2024 Financial Statements”**) and, together with the 2025 Financial Statements, the **“Financial Statements”**) were prepared in Tenge in accordance with IFRS and applicable laws and regulations in Kazakhstan and have been audited by KPMG Audit LLC (**“KPMG”**), independent auditors, in accordance with International Standards on Auditing.

KPMG’s independent auditor’s report in respect of the 2024 Financial Statements appears on page F-2 of this Base Offering Memorandum, and KPMG’s independent auditor’s report in respect of the 2025 Financial Statements appears on page F-106 of this Base Offering Memorandum.

Unless otherwise indicated, the financial information presented herein is extracted without material adjustment from the Financial Statements and the notes thereto contained in this Base Offering Memorandum beginning on page F-2, except that all financial information as of and for the year ended 31 December 2023 in this Base Offering Memorandum is derived from the restated comparative column in the 2024 Financial Statements, and, unless otherwise indicated, all financial information as of and for the year ended 31 December 2024 in this Base Offering Memorandum is derived from the restated comparative column in the 2025 Financial Statements.

The contents of the Issuer’s website (or any other website) and the content of any website accessible from hyperlinks on the Issuer’s website are expressly not incorporated into, and do not form any part of, this Base Offering Memorandum.

Restatements and Reclassifications

The Issuer changed the presentation of certain captions in the primary forms of its Financial Statements. Comparative information has been reclassified to conform to changes in presentations in the current period:

- During the year ended 31 December 2025, the Issuer changed its presentation of loans to leasing companies in the consolidated statement of financial position. Comparative information was reclassified to conform to changes in presentation in the current period. Certain amounts in the consolidated statement of financial position as of 31 December 2024 (loans to customers, loans to banks, financial institutions and leasing companies) were changed to reflect the effect of these reclassifications.
- During the year ended 31 December 2024, the Issuer changed its presentation of loans from banks and other financial institutions and other financial liabilities in the consolidated statement of financial position. Comparative information was reclassified to conform to changes in presentation in the current period. Certain amounts in the consolidated statement of financial position as of 31 December 2023 (loans from banks and other financial institutions, other financial liabilities) were changed to reflect the effect of these reclassifications.

See Note 2 to the 2024 Financial Statements and Note 2 to the 2025 Financial Statements for further details of these changes and reclassifications related to the effect on the Group’s consolidated statement of financial position.

Currencies

In this Base Offering Memorandum:

- **“Tenge”** or **“KZT”** refers to Kazakhstan Tenge, the lawful currency of the Republic of Kazakhstan;
- **“U.S.\$”** or **“U.S. dollars”** refers to U.S. dollars, the lawful currency of the United States of America;
- **“euro”** refers to the currency introduced at the start of the third stage of European Economic and Monetary Union pursuant to the Treaty establishing the European community, as amended; and
- **“RUB”** refers to Russian roubles, the lawful currency of the Russian Federation.

Solely for convenience, this Base Offering Memorandum includes conversions of certain Tenge amounts into U.S. dollars at specified rates. Unless otherwise stated, data presented in U.S. dollars is converted from Tenge either at the applicable market exchange rate on the date or at the year-end of the relevant data or at the average exchange rate for the year for the relevant data. In line with the Resolution of the Board of the NBK Ns 15 dated 25 January 2013 and the Order of the Minister of Finance of the Republic of Kazakhstan NE299 dated 22 February 2013, the market exchange rate for the translation of Tenge amounts into U.S. dollars is determined based on the weighted average exchange rate of the Tenge to the U.S. dollar, calculated at 15:30 hours (Astana time) on the basis of morning (main) and daily (additional) sessions of the KASE.

Although the Issuer uses the market exchange rate when preparing its financial statements, the Tenge to U.S. dollar translations included in this Base Offering Memorandum are not reflective of a translation in accordance with IFRS and should not be construed as a representation that the Tenge amounts have been or could be converted into U.S. dollars at that rate or any other rate.

The following table sets forth the year end, average and low and high KZT/U.S.\$ exchange rates quoted on the KASE, as reported by the NBK (after rounding adjustments) for the years indicated:

Period	Year end ⁽¹⁾	Average ⁽²⁾	High	Low
Year ended 31 December 2023	454.56	456.31	482.77	431.08
Year ended 31 December 2024.....	525.11	469.44	525.11	439.40
Year ended 31 December 2025.....	505.53	521.59	549.15	488.53

Note:

- (1) Data for the year end are taken from the website of the NBK (<https://nationalbank.kz/en/exchangerates/ezhednevnye-oficialnye-rynochnye-kursy-valyut>) as of 1 January of the following year. The weighted average exchange rate of Tenge against U.S. dollar fixed on the KASE as of 15:30 Astana time is set as an official exchange rate of the national currency Tenge against U.S. dollar as of the next day after the trading day.
- (2) The average exchange rate for the year is calculated as the arithmetic average for the business days of the year. Source: The NBK, “Official Foreign Exchange Rates on average for the period” (<https://nationalbank.kz/en/news/oficialnye-kursy>).

The Tenge/U.S. dollar exchange rate as quoted on KASE and reported by the NBK on 22 April 2026, was KZT 464.73 per U.S.\$1.00.

The above rates may differ from the actual rates used in the preparation of the Issuer’s financial statements or other financial information appearing in this Base Offering Memorandum. No representation is made that the Tenge amounts in this Base Offering Memorandum could have been converted into U.S. dollars, at any particular rate or at all. Fluctuations in exchange rates between the Tenge and U.S. dollar are not necessarily indicative of fluctuations that may occur in the future.

Certain Definitions

In this Base Offering Memorandum, the **“Issuer”** refers to “Baiterek National Investment Holding” JSC, and the **“Group”** refers to the Issuer together with its subsidiaries. The **“Government”** means the government of the Republic of Kazakhstan and **“State”** means the Republic of Kazakhstan.

Rounding

Certain amounts which appear in this Base Offering Memorandum have been subject to rounding adjustments. Accordingly, figures shown as totals in certain tables may not be the sum of the figures which precede them.

Market and Industry Data

Certain statistical and market information that is presented in this Base Offering Memorandum on such topics as Kazakhstan’s economy in general and related subjects has, unless otherwise stated herein, been extracted from documents and other publications released by the NBK, the Agency of the Republic of Kazakhstan for Regulation and Development of the Financial Market and the National Statistics Office of Kazakhstan (the **“National Statistics Office”**).

The Issuer has accurately reproduced such information, and so far as the Issuer is aware and is able to ascertain from information published by such third parties, no facts have been omitted that would render the reproduced information inaccurate or misleading. Nevertheless, prospective investors are advised to consider this data with caution. Where third-party information has been used in this Base Offering Memorandum the source of such information has been identified. Prospective investors should note that some of the Issuer’s estimates are based on such third-party information. None of the Issuer, the Arrangers or the Dealers have independently verified the figures, market data or other information on which third parties have based their studies.

Official data published by Kazakhstan governmental or regional agencies are substantially less complete or researched than those of more developed countries. Further, official statistics, including those produced by the NBK, the Agency of the Republic of Kazakhstan for Regulation and Development of the Financial Market and the National Statistics Office, may be produced on different bases than those used in more developed countries. The Issuer has not independently verified such official statistics and other data, and any discussion of matters relating to Kazakhstan in this Base Offering Memorandum is, therefore, subject to uncertainty due to questions regarding the completeness or reliability of such information. Specifically, investors should be aware that certain statistical information and other data contained in this Base Offering Memorandum has been extracted from official Kazakhstan government (the **“Government”**) sources and was not prepared in connection with the preparation of this Base Offering Memorandum. Unless otherwise stated, macroeconomic data, which appear in this Base Offering Memorandum have been derived from statistics published by the National Statistics Office. Nevertheless, prospective investors are advised to consider this data with caution. This information has not been independently verified and, therefore, is subject to uncertainties due to questions regarding the completeness or reliability of such information, which was not prepared in connection with the preparation of this Base Offering Memorandum.

Any discussion of matters relating to Kazakhstan’s economy and related topics as well as other participants in Kazakhstan’s economy in this Base Offering Memorandum is, therefore, subject to uncertainty due to concerns about the completeness or reliability of available official and public information.

Presentation of Alternative Performance Measures

In this Base Offering Memorandum, the Issuer uses the following metrics in the analysis of its business and financial position, which the Issuer considers to constitute Alternative Performance Measures (**“APMs”**), as defined in the European Securities and Market Authority Guidelines on Alternative Performance Measures dated 5 October 2015 (the **“ESMA Guidelines”**).

Set out below is a summary of the APM metrics used, the definition, bases of calculation and reconciliation of such metrics and the rationale for the inclusion of such metrics.

Metric	Definition, method of calculation and reconciliation to financial statement line item	Rationale
Return on average assets (ROAA)	Calculated as profit for the year divided by average period total assets. Average period total assets are calculated based on opening and closing balances for each relevant period.	Performance measure
Return on average equity (ROEE)	Calculated as profit for the year divided by average equity balances for the period. Averages are calculated as the average of the opening and closing balances for each relevant period.	Performance measure
Debt to equity	Calculated as the ratio of total liabilities over total equity.	Capital adequacy ratio

The above APMs have been included in this Base Offering Memorandum to facilitate a better understanding of the Issuer's historic trends of operation and financial condition. The Issuer uses APMs as supplementary information to its IFRS operating results. The APMs are not defined by, or presented in accordance with, IFRS. The APMs are not measurements of the Issuer's operating performance under IFRS and should not be considered as alternatives to any measures of performance under IFRS. In addition, other companies, including those in the Issuer's industry, may calculate similarly titled APMs differently from the Issuer. Because companies do not calculate these APMs in the same manner, the Issuer's presentation of such APMs may not be comparable to other similarly titled APMs used by other companies.

FORWARD-LOOKING STATEMENTS

Certain statements included herein may constitute forward-looking statements that involve a number of risks and uncertainties. Certain such forward-looking statements can be identified by the use of forward-looking terminology such as “believes”, “expects”, “may”, “are expected to”, “intends”, “will”, “will continue”, “should”, “would be”, “seeks”, “approximately” or “anticipates” or similar expressions or the negative or other variations thereof or comparable terminology. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout this Base Offering Memorandum and include statements regarding the Issuer’s current intentions, beliefs or expectations concerning, amongst other things, the Issuer’s results of operations, financial condition, liquidity, prospects, growth, strategies and the industry in which it operates. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future.

Prospective investors should be aware that forward-looking statements are not guarantees of future performance and that the Issuer’s actual results of operations, financial condition and liquidity and the development of the sectors and economy in which it operates may differ materially from those made in or suggested by the forward-looking statements contained in this Base Offering Memorandum. In addition, even if the Issuer’s results of operations, financial condition and liquidity and the development of the sectors and economy in which it operates are consistent with the forward-looking statements contained in this Base Offering Memorandum, those results or developments may not be indicative of results or developments in subsequent periods. Important factors that could cause those differences include, but are not limited to:

- overall macro-economic and national and international business conditions and commodity prices;
- economic and political conditions, as well as the stability of the banking sector, in Kazakhstan generally;
- regional and geopolitical challenges, including changes in economic, social or political conditions in Kazakhstan, Russia and the Central Asia region, including changes in government and the impact of Russia’s armed conflict in Ukraine; and
- continued support of the Government and its control of the Group and changes in Government policies with respect to the application of Government funding by the Group.
- competitive factors in the sectors and economy in which Group companies’ customers compete;
- changes in legislation, regulation or Government policy;
- changes in tax requirements, including tax rate changes, new tax laws and revised tax law interpretations;
- interest rate fluctuations, exchange rate fluctuations and other capital market conditions;
- the impact of sanctions on Group companies’ counterparties; and
- restrictions on the ability to transfer capital across borders.

The sections of this Base Offering Memorandum titled “*Risk Factors*”, “*Selected Financial Information and Other Data*”, “*Management’s Discussion and Analysis of Results of Operations and Financial Condition*” “*Selected Statistical and Other Data*” and “*Business*” contain a more complete discussion of the factors that could affect the Issuer’s future performance and the sectors and economy in which it operates. In light of these risks, uncertainties and assumptions, the forward-looking events described in this Base Offering Memorandum may not occur.

The Issuer does not undertake any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. All subsequent written and oral forward-looking statements attributable to the Issuer or to persons acting on its behalf are expressly qualified in their entirety by the cautionary statements referred to above and contained elsewhere in this Base Offering Memorandum.

ADDITIONAL INFORMATION

The Issuer is not required to file periodic reports under Section 13 or 15 of the U.S. Securities Exchange Act of 1934, as amended (the “**Exchange Act**”). For so long as the Issuer is not a reporting company under Section 13 or 15(d) of the Exchange Act, or exempt from reporting pursuant to Rule 12g3-2(b) thereunder, the Issuer will, upon request, furnish to each holder or beneficial owner of Notes that are “restricted securities” (within the meaning of Rule 144(a)(3) under the Securities Act) and to each prospective purchaser thereof designated by such holder or beneficial owner upon request of such holder, beneficial owner or prospective purchaser, in connection with a transfer or proposed transfer of any such Notes, the information required to be delivered pursuant to Rule 144A(d)(4) under the Securities Act. See “*Terms and Conditions of the Notes — Negative Pledge and Covenants*”. As long as the relevant Notes are represented by a Rule 144A Global Note, for the purposes of this paragraph the expression “holder” shall be deemed to include account holders in the clearing systems who have interests in the relevant Rule 144A Global Note.

SUPPLEMENTS TO THIS BASE OFFERING MEMORANDUM

The Issuer has undertaken, in connection with the listing of Notes, that if there is a significant new factor, material mistake or inaccuracy relating to the information contained in this Base Offering Memorandum, which is capable of affecting the assessment of any Notes, whose inclusion would reasonably be required by investors, and would reasonably be expected by them to be found in this Base Offering Memorandum, for the purpose of making an informed assessment of the assets and liabilities, financial position, profits and losses and prospects of the Issuer, and the rights attaching to the relevant Notes, the Issuer will prepare or procure the preparation of a supplement to this Base Offering Memorandum or, as the case may be, publish a new Base Offering Memorandum, for use in connection with that or any subsequent issue by the Issuer of listed Notes.

PRICING SUPPLEMENT

In this section the expression “necessary information” means, in relation to any Tranche of Notes, the information necessary to enable investors to make an informed assessment of the assets and liabilities, financial position, profits and losses and prospects of the Issuer and of the rights attaching to the Notes. In relation to the different types of Notes, which may be issued under the Programme, the Issuer has endeavoured to include in this Base Offering Memorandum all of the necessary information, except for information relating to the Notes, which is not known at the date of this Base Offering Memorandum and which can only be determined at the time of an individual issue of a Tranche of Notes.

Any information relating to the Notes which is not included in this Base Offering Memorandum and which is required in order to complete the necessary information in relation to a Tranche of Notes will be contained the relevant Pricing Supplement.

For a Tranche of Notes, which is the subject of the Pricing Supplement, that Pricing Supplement will, for the purposes of that Tranche only, complete this Base Offering Memorandum and must be read in conjunction with this Base Offering Memorandum. The terms and conditions applicable to any particular Tranche of Notes which is the subject of the Pricing Supplement are the Terms and Conditions of the Notes described in the relevant Pricing Supplement as supplemented to the extent described in the relevant Pricing Supplement.

ENFORCEMENT OF FOREIGN JUDGMENTS

The Issuer is a joint stock company organised under the laws of Kazakhstan, and the majority of its officers and directors and certain other persons referred to in this Base Offering Memorandum are residents of Kazakhstan. All or a substantial portion of the assets of the Issuer and such persons are located in Kazakhstan. As a result, it may not be possible to effect service of process upon the Issuer or any such person outside Kazakhstan, to enforce against any of them, in courts of jurisdictions other than Kazakhstan, judgments obtained in such courts that are predicated upon the laws of such other jurisdictions or to enforce against any of them, in Kazakhstan's courts, judgments obtained in jurisdictions other than Kazakhstan, including judgments obtained in the courts of England.

The Notes and the Trust Deed are governed by the laws of England, and the Issuer has agreed in the Notes and the Trust Deed that disputes arising thereunder are subject to arbitration in London, England or at the election of the Trustee or, in certain circumstances, a Noteholder to the jurisdiction of the English courts. See Condition 22 under "Terms and Conditions of the Notes". Kazakhstan's courts will likely not enforce any judgment obtained in a court established in a country other than Kazakhstan unless (i) there is in effect a treaty between such country and Kazakhstan providing for reciprocal enforcement of judgments and then only in accordance with the terms of such treaty; or (ii) there is a proved reciprocity in enforcement of judgments of Kazakhstan courts in that country, which can be very hard or impossible to prove. There is no such treaty in effect between Kazakhstan and the United Kingdom. However, each of Kazakhstan and the United Kingdom are parties to the 1958 New York Convention on Recognition and Enforcement of Arbitral Awards and, accordingly, an arbitral award obtained in the United Kingdom should generally be recognised and enforceable in Kazakhstan provided the conditions to enforcement set out in that Convention and applicable Kazakhstan laws are met.

The Law "On Arbitration" (No 488-V, dated 8 April 2016) (the "**Arbitration Law**") was signed by the President of Kazakhstan on 8 April 2016. The introductory language to the Arbitration Law, as well as other provisions of the Arbitration Law, imply that the Arbitration Law should apply only where the matter involves dispute resolution in Kazakhstan (i.e., in respect of arbitration bodies with a seat in Kazakhstan). In particular, the preamble to the Arbitration Law states that: "This law regulates social relations arisen in the process of arbitration activity on the territory of the Republic of Kazakhstan as well as the procedure and terms of recognition and enforcement of arbitral awards in Kazakhstan."

There are, however, certain provisions in the Arbitration Law, which may have implications (as described below) in respect of the arbitration provisions contained in the Notes and the Trust Deed. In particular, the provisions of the Arbitration Law do not clearly differentiate between domestic and foreign arbitration. In particular:

- Article 8.8 of the Arbitration Law restricts the trying of disputes involving quasi-sovereign companies by arbitration. The Issuer falls under the definition of a quasi-sovereign company. More specifically, Article 8.8 provides that a dispute between quasi-sovereign companies cannot be resolved by arbitration. While there is no established practice in relation to Article 8.8 of the Arbitration Law, the Issuer's management ("**Management**") believes that this requirement only applies when two or more quasi-sovereign companies are involved in a dispute as adverse parties. Accordingly, Article 8.8 should not apply if two or more quasi-sovereign companies are not adverse parties to the dispute, which would be the case in respect of the Notes, the Agency Agreement and the Trust Deed.
- Article 8.10 of the Arbitration Law requires state-controlled companies to obtain consent from the competent authority of a relevant industry in order to enter into an arbitration agreement. While the Issuer falls within the definition of a state-controlled company, in November 2023, the Supreme Court of Kazakhstan clarified, in Resolution No 3, that no competent authority's consent shall be required for an arbitration agreement between state-controlled companies and non-residents of the Republic of Kazakhstan. Accordingly, Management believes that Article 8.10 should not apply to arbitration agreements under the Notes, the Agency Agreement and the Trust Deed.

Given that there is not a well-developed practice in Kazakhstan on the application of the Arbitration Law, there can be no assurance that Kazakhstan courts would support the above interpretation of the Arbitration Law and that an award against the Issuer in arbitral proceedings in London under English law would be enforced in Kazakhstan. See "Risk Factors — Factors that are material for assessing the market risks associated with Notes issued under the Programme — Enforceability of Judgments."

GENERAL DESCRIPTION OF THE PROGRAMME

The following general description does not purport to be complete and is qualified in its entirety by the remainder of this Base Offering Memorandum. Words and expressions defined in “Forms of the Notes” or “Terms and Conditions of the Notes” below shall have the same meanings in this general description.

Issuer	Baiterek National Investment Holding JSC
Legal Entity Identifier	984500B4F78F04253804
Arrangers	Citigroup Global Markets Limited, J.P. Morgan Securities plc and JSC Halyk Finance, and Société Générale
Dealers	Citigroup Global Markets Limited, J.P. Morgan Securities plc, JSC Halyk Finance, Société Générale and any other Dealer(s) appointed under the Programme from time-to-time by the Issuer, which appointment may be for a specific issue of Notes or on an ongoing basis.
Development Finance Structuring Agent	J.P. Morgan Securities plc
Trustee	Citibank, N.A., London Branch
Principal Paying Agent and Transfer Agent	Citibank, N.A., London Branch
Registrar	Citibank Europe plc
Size	U.S.\$3,000,000,000 (or its equivalent in other currencies calculated in accordance with the provisions of the Programme Agreement) outstanding at any one time. The Issuer may increase the amount of the Programme at any time in accordance with the Programme Agreement.
Issuance	Notes will be issued in Series. Each Series may comprise one or more Tranches issued on different issue dates. The Notes of each Series will all be subject to identical terms, except that the issue date and the amount of the first payment of interest may be different in respect of different Tranches. The Notes of each Tranche will all be subject to identical terms in all respects, save that a Tranche may comprise Notes of different denominations. Each Tranche will be the subject of a Pricing Supplement, which, for the purposes of that Tranche only, supplements the Terms and Conditions of the Notes and this Base Offering Memorandum and must be read in conjunction with this Base Offering Memorandum. The terms and conditions applicable to any particular Tranche of Notes are the Terms and Conditions of the Notes, as supplemented, amended or replaced by the relevant Pricing Supplement.
Forms of Notes	Each Series of Notes will be issued in registered form only. Regulation S Notes and Rule 144A Notes will initially be represented by a Regulation S Global Note and a Rule 144A Global Note, respectively. The Global Notes will be exchangeable for Definitive Notes (as defined herein) in the limited circumstances specified in the Global Notes.

Clearing Systems	DTC (in the case of Rule 144A Notes), unless otherwise agreed, and Clearstream, Luxembourg and Euroclear (in the case of Regulation S Notes), unless otherwise agreed, and such other clearing system as may be agreed between the Issuer, the Principal Paying and Transfer Agent, the Trustee and the relevant Dealer.
Currencies	Notes may be denominated in any currency or currencies, subject to compliance with all applicable legal, regulatory and central bank requirements. Payments in respect of Notes may, subject to such compliance, be made in or linked to, any currency or currencies other than the currency in which such Notes are denominated.
Status of the Notes	The Notes will constitute direct, general and unconditional obligations of the Issuer, which will at all times rank pari passu among themselves and pari passu in right of payment with all other present and future unsubordinated obligations of the Issuer, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application.
Issue Price	Notes may be issued at any price, as specified in the relevant Pricing Supplement.
Maturities	Any maturity, subject, in relation to specific currencies, to compliance with all applicable legal, regulatory and central bank requirements.
Redemption	Notes may be redeemable at par or at such other Redemption Amount (detailed in a formula, index or otherwise), as may be specified in the relevant Pricing Supplement. Notes may also be redeemable in two or more instalments on such dates and in such manner, as may be specified in the relevant Pricing Supplement.
Optional Redemption	Notes may be redeemed before their stated maturity at the option of the Issuer (either in whole or in part), the Noteholders or both to the extent (if at all) specified in the relevant Pricing Supplement.
Tax Redemption	Early redemption will be permitted for certain tax reasons, as set out in Condition 10.2 under “Terms and Conditions of the Notes”.
Interest	Notes may be interest-bearing or non-interest-bearing (as set out in the relevant Pricing Supplement). Interest (if any) may accrue at a fixed rate or a floating rate or other variable rate and the method of calculating interest may vary between the issue date and the maturity date of the relevant Series (as set out in the relevant Pricing Supplement).
Denominations	Notes will be issued in such denominations as may be specified in the relevant Pricing Supplement (the “Specified Denomination”), provided that the Specified Denomination(s) shall not be less than €100,000 or its equivalent in another currency. For so long as the Notes are represented by a Global Note and the relevant clearing system(s) so permit, the Notes shall be tradeable only in the minimum authorised denomination of €100,000 (or its equivalent in another currency) and higher integral multiples of any smaller amount specified in the relevant Pricing Supplement. Interests in the Rule 144A Notes shall be held in amounts of not less than U.S.\$200,000 or its equivalent in another currency.

Negative Pledge and Covenants	The Notes will have, among others, the benefit of a negative pledge and covenants relating to limitations on disposal of Core Assets and limitations on Reorganisations, each as set out in Condition 6 under “Terms and Conditions of the Notes”.
Cross Acceleration	The Notes will have the benefit of a cross-acceleration condition as described in Condition 13.3 under “Terms and Conditions of the Notes”.
Taxation	All payments in respect of Notes will be made free and clear of withholding taxes of Kazakhstan unless the withholding is required by law. In that event, the Issuer will (subject as provided in Condition 11 under “Terms and Conditions of the Notes”) pay such additional amounts as will result in the Noteholders receiving such amounts as they would have received in respect of such Notes had no such withholding been required.
Redenomination	The applicable Pricing Supplement may provide that Notes may be redenominated in Euros in accordance with Condition 21 under “Terms and Conditions of the Notes”.
Governing Law	English law.
Listing	Application has also been made to the Vienna Stock Exchange for the admission of the Programme and/or any Notes to trading on the Vienna MTF. Application has also been made for the Notes issued under the Programme to be admitted to the “Bonds” category of the “Debt Securities” sector of the “Main” platform of the official list of the KASE. The Programme also permits Notes to be issued on an unlisted basis outside of Kazakhstan or to be listed on such other or further listing authorities, stock exchanges or quotation systems outside of Kazakhstan, as may be agreed between the Issuer and the relevant Dealer.
Selling Restrictions	For a description of certain restrictions on offers, sales and deliveries of Notes and on the distribution of offering material in the United States of America, the EEA, the United Kingdom, Singapore, DIFC and Kazakhstan. See “Subscription and Sale”.
Risk Factors	Investing in the Notes involves a high degree of risk, which investors should ensure they fully understand. These include factors that may affect the Issuer’s ability to fulfil its obligations under, or in connection with, Notes issued under the Programme and factors that are material for assessing the market risks associated with Notes issued under the Programme. See “Risk Factors”.

OVERVIEW OF THE ISSUER AND THE GROUP

The following is an overview of certain information contained elsewhere in this Base Offering Memorandum. It does not purport to be complete and is qualified in its entirety by the more detailed information appearing elsewhere in this Base Offering Memorandum. Prospective investors should also carefully consider the information set forth in “Risk Factors” below prior to making an investment decision. Capitalised terms not otherwise defined in this overview have the same meaning as elsewhere in this Base Offering Memorandum.

Baiterek National Investment Holding JSC (the “**Issuer**”, and together with its subsidiaries, the “**Group**”) is a holding company established in May 2013 to grow Kazakhstan’s development institutions and to develop the national economy. The Issuer’s overall mission is to promote the sustainable growth of the economy of the Republic of Kazakhstan through the support of domestic production of goods and services, infrastructure modernization, and strengthening of food security, based on principles of social responsibility in order to implement state policy and achieve the goals set by the Kazakhstan-2050 Strategy. The sole shareholder of the Issuer is the Government of Kazakhstan (the “**Government**”) represented by the Ministry of National Economy of the Republic of Kazakhstan (the “**Ministry of National Economy**”).

The Issuer currently has seven wholly-owned subsidiaries that work to implement Government policy and programmes. The subsidiaries are involved in the following core areas of activity:

- (i) providing financial (e.g., credit and investment) and non-financial support to investment projects in priority sectors of the economy with the aim of diversifying the economy, developing manufacturing and industry, exporting products produced in Kazakhstan, increasing innovation and supporting small and medium-sized enterprises (“**SMEs**”) conducted by the Issuer’s subsidiaries JSC Development Bank of Kazakhstan (“**DBK**”), Export Credit Agency of Kazakhstan JSC (“**ECA**”), Damu Entrepreneurship Development Fund JSC (“**Damu**”) and Qazaqstan Investment Corporation JSC (“**QIC**”);
- (ii) raising capital, providing long-term financing for mortgages, reducing related borrowing costs and participating in the implementation of the Government’s housing construction policy conducted by the Issuer’s subsidiaries Otbasyl Bank JSC (“**Otbasy Bank**”) and Kazakhstan Housing Company JSC (“**KHC**”); and
- (iii) promoting the sustainable development of, and providing technical equipment to, the agro-industrial sector of Kazakhstan conducted by the Issuer’s subsidiary Agrarian Credit Corporation JSC (“**ACC**”).

As of 31 December 2023, 2024, and 2025, the Issuer had consolidated total assets of KZT 13,620,420 million, KZT 14,438,237 million and KZT 19,047,637 million, respectively, with consolidated total equity of KZT 2,665,505 million, KZT 3,001,622 million and KZT 3,574,739 million, respectively. The Issuer generated KZT 407,647 million of consolidated net profit for the year ended 31 December 2023 (including KZT 406,719 million of net profit from continuing operations), KZT 408,220 million of consolidated net profit for the year ended 31 December 2024 (including KZT 417,773 million of net profit from continuing operations) and KZT 409,869 million of both consolidated net profit and profit from continuing operations for the year ended 31 December 2025.

RISK FACTORS

The following factors may affect the ability of the Issuer to fulfil its obligations under the Notes.

Prior to making an investment decision, prospective purchasers of Notes should carefully consider, along with the other matters referred to in this Base Offering Memorandum, the following risks associated with investment in Kazakhstan entities generally and with investment in securities issued by the Issuer (such as the Notes), which could be material for the purpose of assessing the market risks associated with Notes issued under the Programme. Prospective investors should pay particular attention to the fact that the Issuer operates in the legal and regulatory environment in Kazakhstan, which in some respects may differ from that prevailing in other countries.

Prospective investors should note that the risks described below are not the only risks faced by the Issuer. These are the risks that the Issuer considers to be material. However, there may be additional risks that the Issuer currently considers immaterial or of which it is currently unaware, and any of these risks could have the effect set forth above.

A. RISKS RELATING TO THE GROUP

Risks Relating to the Ownership Structure of the Group and its Mandate and Strategy

The Issuer is Wholly Owned by the Government, which may Exercise Significant Influence Over its Operations

The Issuer was established according to a decree of the President of the Republic of Kazakhstan (the “**President**”) (Decree No. 571 dated 22 May 2013) to seek to optimise the management system of development institutions and financial organisations and to support the growth of the national economy. The sole shareholder of the Issuer is the Government represented by the Ministry of National Economy of the Republic of Kazakhstan. The Government manages the Issuer exclusively through the exercise of the powers of the sole shareholder provided for by the law and/or the Articles of Association of the Issuer, as well as by having members of the Government on the Board of Directors of the Issuer. The sole shareholder of the Issuer has a list of tasks and decisions that must be taken directly by the Ministry of the National Economy as the sole shareholder, to which the rights of ownership and use of the state-owned shares were transferred by decision of the Government of the Republic of Kazakhstan, and includes, amongst others, approving the annual financial statements, approving changes and amendments to the Articles of Association of the Issuer, determining the key corporate governance principles, determining the Issuer’s dividend policy, deciding on the distribution of the Issuer’s net income based on the results of the reporting period, determining the quantitative composition and term of office of the Board of Directors of the Issuer, electing its members and early terminating their powers, determining the procedure, amount and terms of the remuneration of the Independent Directors and electing the Chairman of the Management Board and early terminating his powers. In accordance with the Law on State Property, the development plan of the Issuer is approved directly by the Government of the Republic of Kazakhstan.

As the sole shareholder of the Issuer, the Government is thus in a position to influence the Issuer’s activities and exercise control over all matters requiring shareholder approval, including the ability to appoint and remove the members of the Boards of Directors and Chairman of the Management Board of the Issuer and approval of significant corporate transactions and related party transactions. Moreover, through the Issuer, the Government may influence the activities of the Issuer’s subsidiaries. The Government may ask the Issuer to work on important strategic projects for Kazakhstan, which are expected to contribute to the overall economy of Kazakhstan, but which may not be expected to deliver suitable investment returns for the Issuer or the Group. The Issuer’s reliance on government support and its involvement in State-directed projects may expose it to political and policy changes.

There can be no assurance that the Government will not exercise significant influence over the commercial affairs of the Issuer. The Government’s interests may also conflict with those of the Issuer or the Noteholders. As most of the Issuer’s current portfolio consists of quasi-sovereign enterprises that contribute significantly to public policy objectives, key decisions with respect to these assets may be political in nature. In addition, being controlled by the Government may slow the Issuer’s decision-making process and subject the Issuer to the risks of bureaucracy and inefficiencies commonly attributed to State-controlled companies. Thus, the outcome from any such decision-making processes may not always be strictly commercial or transparent or made on a timely basis, which in turn may have a material adverse effect on the Group’s business, financial condition, results of operations and prospects.

Furthermore, there is a risk that any change of administration in Kazakhstan may result in changes in Issuer's policies, and such new policies may conflict with the interests of the Noteholders. (See further “—The Government may alter its economic development strategy”, “— B. Macroeconomic Risks and Risks Related to Kazakhstan's Position as an Emerging Market — The Issuer and the Group are largely dependent on the economic, social and political conditions prevailing in Kazakhstan. Most of the Issuer's operations are conducted, and most of its assets and operations are located in Kazakhstan” and “— B. Macroeconomic Risks and Risks Related to Kazakhstan's Position as an Emerging Market — Kazakhstan is an emerging market and is subject to greater risk than more developed markets”).)

The Government may Alter its Economic Development Strategy

In December 2012, President Nazarbayev presented the “Kazakhstan-2050 Strategy”, a long-term development strategy with seven main focus areas aiming at making Kazakhstan one of the 30 most developed countries in the world by 2050. The Kazakhstan-2050 Strategy is being carried out through a series of 10-year plans. On 30 July 2024, President Tokayev approved the National Development Plan of the Republic of Kazakhstan 2029 (“**Strategic Plan 2029**”) as part of the Kazakhstan-2050 Strategy, based on 17 development directives falling into four main areas: (i) high quality of life, including healthcare, education and science, social protection and a comfortable living environment; (ii) a strong economic foundation, including the mineral resource base (oil and gas, metals and other minerals), energy and manufacturing; (iii) new growth points, including transport and logistics, the agro-industrial complex, innovation, the digital and creative economy and tourism; and (iv) broad economic and social transformations, including the creation of a dynamic entrepreneurial environment, a new investment cycle, enhanced environmental sustainability, effective public finances, the rule of law and improved public administration. Strategic Plan 2029 is underpinned by five principles of economic transformation, namely: liberalisation and the promotion of competition; protection and development of entrepreneurship through clear, predictable and attractive economic policy for investors; unlocking the potential of Kazakhstan's citizens through quality education and support for entrepreneurial and creative initiative; increasing productivity and the complexity of the economy through innovation, modernisation and digitalisation; and reducing critical regional disparities while enabling regions to realise their economic potential and greater economic independence.

The Issuer is responsible for enhancing the management system of development institutions, national companies and other legal entities in Kazakhstan to promote and diversify the country's economy. The Kazakhstan-2050 Strategy is the main policy document that the Issuer follows when forming its own development strategy, others include the President's “Nation Plan - 100 Concrete Steps” (20 May 2015), the Presidential Address “Third Modernisation of Kazakhstan: Global Competitiveness” (31 January 2017), new State programmes such as the Presidential Address of 1 September, 2023 - “Economic Course of a Fair Kazakhstan” and development concepts, such as the Concept for the Development of Small and Medium Enterprises in the Republic of Kazakhstan 2030 and other strategic initiatives listed in the Development Plan of the Issuer for 2024-2033.

In the event that the Government alters its strategy in any of these State planning documents, the Issuer's development strategy will be impacted, and this could, in turn, materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group and Individual Subsidiaries of the Issuer may not be able to Implement their Strategies Successfully

The Group's strategies are described in this Base Offering Memorandum in “Business of the Group”. The future prospects of the Group are dependent on its ability to implement its strategies successfully, which is, in turn, dependent on a variety of factors, many of which are beyond the Group's control. The success of the Group's strategies is expected to depend on a number of factors, including the Group's ability to implement sustainable development initiatives, carry out responsible investments and achieve efficient and active portfolio management.

There can be no assurance that even if the Group successfully implements its strategies, this will result in an improvement of its results of operations. Furthermore, in addition to the Group's strategies, the Issuer's subsidiaries have their own strategies, the success of which depends on numerous factors beyond the control of the respective Issuer's subsidiaries. Failure of any of the Issuer's subsidiaries to execute their strategy may lead to lower dividend flows. The Group may decide to alter or discontinue certain of its strategies and may adopt alternative or additional strategies in response to the operating environment, competitive situation or factors beyond the Group's control.

The Group's failure to execute its strategies on a timely basis or at all, as well as the failure of subsidiaries of the Issuer to implement their individual strategies could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Issuer Has Paid and Will Continue to Pay Dividends to the Government in the Future

The Issuer pays out dividends to its sole shareholder, the Government, pursuant to a dividend policy (the “**Dividend Policy**”), which sets out specific rules for dividend payments by the Issuer. In accordance with Article 56 of the new Budget Code of the Republic of Kazakhstan No. 171-VIII dated 15 March 2025, state-owned enterprises, including the Issuer, are required to pay 70% of their net income to the Government. The Code also provides for the possibility of reducing the amount of dividends payable to the State by decision of the Budget Committee.

The Group may be Required to Acquire Companies or Dispose of Subsidiaries of the Issuer and/or Certain Investments on Non-Market Terms

As its sole shareholder, the Government may direct that a new asset be transferred to the Group or that an existing subsidiary of the Issuer be placed under the control of another state or municipal authority. For example, on 1 September 2022, the Issuer was directed by the Government to purchase Subsidiary Bank Sberbank of Russia Joint Stock Company from Sberbank of Russia PJSC, later renamed Bereke Bank JSC (“**Bereke Bank**”). The acquisition was undertaken on favourable terms in response to broader financial sector considerations and regulatory developments existing at the time, following which the Group recognised a gain (calculated as fair value of net identifiable assets of the acquired bank minus fair value of consideration transferred in the form of discount on initial recognition) of KZT 30,277 million in 2022.

In May 2023, the Issuer's management resolved to sell the shares of Bereke Bank. An impairment loss of KZT 70,269 million was recognised in 2023 in relation to this transaction. In March 2024, the Issuer entered into a sale and purchase contract with Qatari-based Lesha Bank to sell 100% of shares of Bereke Bank, subject to suspensive conditions. In October 2024, once all suspensive conditions had been met, including the obtaining by Lesha Bank of relevant approvals from regulatory bodies of the Republic of Kazakhstan the Issuer transferred ownership of 100% of shares of Bereke Bank for KZT 65,000 million. As a result of the sale the Issuer recognised a loss on sale of discontinued operation in the amount of KZT 69,664 million in 2024. Bereke Bank's net profit accumulated for the period under the control of the Issuer, from 1 September 2022 to 8 October 2024, amounted to KZT 100,513 million and was recognised in the consolidated retained earnings of the Issuer.

The Issuer is currently considering a sale of part of its shareholding in Otbasys Bank by way of an initial public offering. The size, terms and timing of the offering has not been finalized and there can be no assurance that the sale will proceed. If the sale proceeds, it would result in a reduction of the Issuer's, and accordingly the Government's, ownership and control of Otbasys Bank, which may in turn affect the level of financial and strategic support the Group receives. Any such change could have an adverse impact on the Group's overall operations, particularly in the housing finance sector in which Otbasys Bank plays a key role. There is also no assurance that any proceeds received from a potential privatization would reflect the fair value of Otbasys Bank. Should the proceeds fall below the carrying value of the Group's interest in Otbasys Bank, this may require the Group to recognize an impairment of the related assets. In addition, Otbasys Bank is one of the key subsidiaries of the Issuer, contributing significantly to the Group's total assets, and any reduction in its financial performance, strategic role or Government support following privatization could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

If subsidiaries of the Issuer are required to be transferred out of the Group at the direction of the Government, there can be no assurance that the Group would receive fair, or indeed any, consideration for any such disposal. Any action by the Government that leads the Government to reclaim assets previously granted to the Issuer without the payment of any compensation for such reclaimed assets could, therefore, have a material adverse effect on the Group's business, financial condition, results of operations, and prospects.

Conversely, Government policy may in the future require the Issuer to purchase shares in, or participate in the financial rehabilitation of, other entities in Kazakhstan. Such actions may come at a cost to the Group and require the use of significant internal resources and attention from the Issuer's management. The circumstances under which such acquisitions or disposals may occur are unpredictable and may be driven by broader economic, political, or financial stability considerations rather than purely commercial factors. Moreover, the integration of

such new businesses into the Group may divert the Issuer's resources from its core activities and lead to higher operational costs and exposure to non-performing assets, thus negatively impacting the Group's overall financial condition.

Any dividend payment contribution to the Government could be made out of the Issuer's revenues, retained earnings or proceeds from sales of its subsidiaries and, as such, this may have an adverse effect on the Issuer's ability to perform its financial obligations including to make payments on the Notes and its ability to capitalise on investment opportunities.

The Mandate and Lending Policies of the Group May Differ from those of Standard Commercial Institutions

The Group's lending and investment policies may differ from those of a standard commercial bank or insurance or investment company, and the business activities of the Issuer's subsidiaries are generally driven by the development goals and policy of the Government rather than purely commercial considerations. The Group does not generally compete with commercial lending and financial institutions in providing finance to customers.

The Group concentrates on providing funding for projects that are not typically eligible for financing or refinancing by commercial banks and other non-specialist market investors. Loans and investments made by Group are often extended at preferential rates, which make these activities of relatively low return. As a result, the Group may receive lower profit margins than commercial banks operating in Kazakhstan, which could, in turn, have a material adverse effect on the Group's business, financial condition, cash flows, results of operations and prospects.

Government Support Mechanisms Involving the Group may be Cancelled, Modified or Limited

The Group receives low interest rate loans from the Ministry of Finance of the Republic of Kazakhstan (the “**Ministry of Finance**”) to support various programmes administered by the Group. These loans are given in the form of transfers of resources to the Group in return for past or future compliance with certain conditions relating to the operating activities of the Group and reflected in the Financial Statements as government grants. Loans and grants from the Government amounted to KZT 1,830,112 million as of 31 December 2023, KZT 2,042,048 million as of 31 December 2024, and KZT 1,924,343 million as of 31 December 2025. The Group received loans from the Government of the Republic of Kazakhstan amounting to KZT 288,378 million (including KZT 220,194 million for implementation of the State programmes) in 2023, KZT 340,335 million (including KZT 274,480 million for implementation of the State programmes) in 2024, and KZT 250,560 million (including KZT 172,000 million for implementation of the State programmes) in 2025. In addition, state-owned entities held debt securities issued by the Group totalling KZT 3,365,949 million as of 31 December 2025, compared with KZT 3,107,195 million as of 31 December 2024 and KZT 2,829,114 million as of 31 December 2023.

Such Government funding could be discontinued or modified, including if applicable conditions are not satisfied. Similarly, funding for underlying development programmes for, among other things, the agricultural sector in Kazakhstan, housing, major strategic manufacturing industry and infrastructure projects, support for small and medium-sized businesses and support for exports is determined by the Government and may change depending on prevailing State finances and fiscal policies.

Similarly, any unplanned or unexpected reduction in State funding to support the development of the agricultural sector in Kazakhstan, provision of housing for the population, major strategic manufacturing industry and infrastructure projects, small and medium-sized businesses or exports from Kazakhstan may result in a decrease in operational volumes for the Group or failure of the Group's customers to fulfil their obligations under the existing loans and other arrangements with the Group, which could, in turn, have a material adverse effect on the Group's business, financial condition, results of operations and prospects. Reduced support or participation from the Government may also adversely affect credit ratings of the Issuer, its subsidiaries and/or the Group's customers, hindering their ability to attract funding on the local and international capital markets at favourable terms.

There can be no assurance that the Government will continue to offer subsidies, funding or other support at the same levels, on the same terms or at all. Any cancellation, limitation, modification or decrease in the level of any Government support mechanisms, including as a result of potential privatization plans, could have a material adverse effect on the Group's business, financial condition, results of operations and prospects. (See also “The Group is exposed to liquidity risks and financing risks”).

The Issuer does not Benefit from any Explicit or Implicit Government Guarantee

Although the Issuer is wholly owned by the Government and the Group benefits from certain Government support mechanisms as described above, the Issuer's obligations under the Notes are not guaranteed by the Government. The Government has no direct or indirect obligations to Noteholders in relation to the Notes. There can be no assurance that the Government will provide financial support to the Issuer in the event that the Issuer is unable to meet its obligations under the Notes.

Specific Risks Relating to the Group's Banking, Lending and Leasing Activities

The Group's Credit Policies are Influenced by Government Policies and Programmes

The Group companies provide loans, finance leases and financial guarantees to customers at rates and/or with terms that are not otherwise offered in the market. The provision of such loans, finance leases and financial guarantees is aligned with the respective Government's programmes to, among other things, support the development of the agricultural sector in Kazakhstan, provision of housing for the population, major strategic manufacturing industry and infrastructure projects, small and medium-sized businesses or exports from Kazakhstan and the Group's management cannot unilaterally terminate or drastically change the terms of its activities related to such Government programmes. There can also be no assurance that the Government will not require the Group to participate in new or amended programmes, which could conflict with the Group's existing credit policies, or that the Group's credit policies are, or will be, sufficient to mitigate the risks involved in making loans and granting leases and guarantees in an emerging market such as Kazakhstan.

The Group is Subject to the Banking- and Financial Services-Specific Risks

The Issuer is a holding company and as such is dependent on the operations, revenues and cash flows generated by its subsidiaries. All of these subsidiaries operate in the banking and financial services sector, exposing the Issuer to the risks inherent in this industry. The performance of the Issuer's business is directly affected by the ability of its subsidiaries to generate sufficient revenues and profits, comply with applicable regulations and successfully manage sector-specific challenges described hereinafter. Any significant deterioration in the performance of one or more of the Issuer's subsidiaries could negatively impact the Issuer's financial condition and its ability to meet its obligations, including the repayment of principal and interest on the Notes.

The Group's Lending and Leasing Operations are Concentrated by Sector and Borrower

As a result of the nature of the Group's lending activities, the Group has had and continues to have concentrated exposure in Kazakhstan and to particular industries or economic sectors and particular groups of borrowers (see "— B. Macroeconomic Risks and Risks Related to Kazakhstan's Position as an Emerging Market — The Issuer and the Group are largely dependent on the economic, social and political conditions prevailing in Kazakhstan. Most of the Issuer's operations are conducted, and most of its assets and operations are located in Kazakhstan").

As of 31 December 2025, loans issued by the Group were concentrated in four main sectors: (i) mortgage loans to retail customers, which represented 46.7% of total gross loans to customers, (ii) agro-industrial sector, which represented 13.7%, (iii) mining, metallurgical and mineral resources industries, which represented 14.9%, and (iv) the oil and gas industry, which represented 3.7%. This concentration amplifies the Group's exposure to economic downturns, regulatory changes or market fluctuations in these sectors. For example, the agro-industrial sector is highly sensitive to weather conditions, global commodity price fluctuations and trade restrictions. A decline in agricultural output due to climate change, droughts or natural disasters could lead to higher default rates among borrowers in this sector. Similarly, the mining sector is affected by cyclical demand for raw materials, operational challenges and geopolitical factors. Any decline in global demand for key minerals, disruptions in supply chains or shifts in environmental policies could weaken the creditworthiness of borrowers in this sector.

In the mortgage sector, potential regulatory interventions, such as changes to mortgage lending standards, interest rate caps or stricter borrower eligibility criteria, could impact the Group's lending capacity, cause higher default rates and adversely affect the Group's overall profitability. While the Group seeks to mitigate such risks by securing its exposures with collateral and credit default insurance, there is no guarantee that these measures will be sufficient to offset potential losses. Changes in collateral values, such as those in the real estate sector in Kazakhstan, or industry-specific shocks may further exacerbate credit losses.

As of 31 December 2025, the Group had two borrowers with outstanding loans each exceeding 10% of the Issuer's capital.

As of 31 December 2025, the Group had six lessees (or three groups of related lessees) whose balances comprised over 26% of total carrying amount of the finance lease receivables. The total carrying amount of receivables from these lessees was KZT 618,419 million. In particular, up to 87% of this total carrying amount relates to the group of National Company "Kazakhstan Temir Zholy" JSC ("KTZh") and an entity which is economically dependent on KTh, totalling KZT 537,570 million as of 31 December 2025. Significant exposure to a single industry increased credit risk, particularly given the business model and industry-specific vulnerabilities of KTh. Lease agreements with KTh are categorised into Stage 1 for a total amount of KZT 153,434 million and into Stage 2 for the total amount of KZT 421,941 million for the purpose of assessing expected credit losses.

Accordingly, this sector and customer concentration may cause the Group to experience higher losses in its loan and leasing portfolio than would be the case if it had a more diversified portfolio of lending and leasing, which could, in turn, have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Long-Term Projects can Expose the Group to Certain Risks if such Projects are not Successful

The Group provides financing for long-term projects. Long-term project financing can expose the Group to certain risks if such projects are not successful and the projects may be entered into on terms that would not be acceptable to commercial banks. The macro-economic and political risks inherent in emerging economies, such as Kazakhstan, and other risks, such as commodity price fluctuations, could have a significant effect on the success or failure of these projects and it is difficult to predict at the outset of a project all of the factors that may affect it in the long-term. The main risks are likely to be that a project will not be completed within the agreed timeframe, or on budget, or that it may fail altogether. There is also the risk that, if an event of default occurs under a long-term project, the collateral provided may not be sufficient to cover the value of the loans. The occurrence of any of these events could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Operational Risks are Inherent in the Group's Banking Activities

The Group is exposed to significant operational risks inherent in the banking and financial services sector. These risks can arise from a range of factors, including inadequate or failed internal processes, system failures, human error or fraud. The high volume of transactions processed by the Group increases the likelihood of errors, which may be compounded before being identified and rectified. In addition, reliance on third-party service providers, such as, for example, outsourced payment processors, exposes the Group to additional risks. Any disruption in the functioning of critical systems or third-party services or failure to maintain adequate internal controls could lead to operational breakdowns, financial losses and regulatory scrutiny. Furthermore, misconduct by employees, including violations of anti-money laundering regulations or fraud, could damage the reputation of the Group and result in significant financial penalties. Even with strong risk management procedures, the Group may be unable to eliminate all risks, and any failure to mitigate operational risks could have a material adverse impact on the Group's operations, financial condition and reputation.

The Group is Exposed to Credit Risk

The Group is exposed to credit risk, which is the risk that a customer will be unable to pay amounts in full when due. Increases in the past due loan portfolio require the Group to make additional provisions and reduce its net profit and capital levels, which, in turn, could have a material adverse effect on the Group's business, financial condition, results of operations and prospects. To manage credit risk, the Group has developed comprehensive credit policies and procedures.

As of 31 December 2025, the Group's impairment allowance with respect to loans to customers amounted to KZT 441,464 million, as compared to KZT 408,491 million as of 31 December 2024, and KZT 369,835 million as of 31 December 2023. As of 31 December 2025, the Group's loss allowance with respect to finance lease receivables amounted to KZT 104,963 million, as compared to KZT 93,284 million as of 31 December 2024, and KZT 67,754 million as of 31 December 2023. The recoverability of loans to corporate customers, mortgage loans and finance lease receivables, which are neither past due nor credit-impaired, primarily depends on the creditworthiness of the borrowers or lessees, as applicable, rather than the value of collateral. Thus, misjudgements in assessing the

creditworthiness of borrowers or changes in their financial conditions could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Assessment of Borrower Creditworthiness Presents Challenges in Kazakhstan

Assessing the creditworthiness of borrowers, particularly in emerging markets, is inherently challenging due to volatile financial conditions and limited availability of reliable financial data.

Credit risk assessment is based on various assumptions and is limited by the quality of available information about prospective and current borrowers. On certain occasions, it is difficult to make long-term forecasts with respect to a corporate borrower's financial position because the financial performance of companies in Kazakhstan is generally more volatile and their credit quality is less predictable than those of similar companies in more mature markets and economies. In addition, many potential corporate borrowers do not prepare audited accounts in accordance with IFRS and/or do not have extensive or externally verified credit histories. Furthermore, the availability of accurate and comprehensive financial and general credit information on small and medium-sized enterprises in Kazakhstan is often more limited, which makes it more difficult for the Group to accurately assess the credit risk associated with lending to small and medium-sized enterprises.

The Group's procedures, controls and IT employed in loan origination and verification may generate errors, which may lead to incorrect assessments of the level of risk of particular borrowers. The Group may be unable to accurately evaluate the current financial condition of each prospective borrower or independently assess information provided by prospective borrowers when providing loans, and thus may be unable to determine the long-term economic outlook for each such borrower. Furthermore, the availability and reliability of information of external data bases, the limited availability of recent and reliable credit information on retail and borrowers that are small and medium-sized enterprises constrains the Group's ability to detect and prevent fraudulent activities by potential borrowers, which could result in decreased loan recoveries for the Group.

In 2004, in co-operation with an international credit reference agency Experian, commercial banks in Kazakhstan established a credit reference bureau to provide information about potential borrowers. However, the credit reference bureau may not be as developed as credit reference agencies in other jurisdictions.

Inadequate Collateralisation Levels or Problems with Enforcing Security may Lead to Lower than Expected Recovery Levels on Collateralised Loans and Leases

The Group may hold collateral against loans or finance leases provided to their customers, which could decline in value or fail to satisfy their liabilities in full.

As of 31 December 2025, the fair value of collateral and other credit enhancements securing credit-impaired loans to corporate customers and loans issued to agribusiness companies amounted to 80% of the Group's total carrying amount of such loans, net of loss allowance. As of the same date, the fair value of collateral, leased assets and other credit enhancements securing the Group's credit-impaired finance lease receivables amounted to 90% of the Group's total carrying amount of such finance lease receivables (net of loss allowance and excluding embedded financial derivative instruments).

Downturns in the industries in which the Group's customers operate may result in asset illiquidity and a decline in the value of the collateral securing loans and finance leases. If the fair value of the collateral that the Group holds declines significantly, the Group could experience lower than expected recovery levels on collateralised loans and finance leases. In addition, the Group may face difficulties with enforcing security, which may also lead to lower than expected recovery levels on collateralised loans and finance leases. This may, in turn, have an adverse effect on the Group's business, financial condition, results of operations and prospects.

There are Specific Risks Relating to the Group's Export Credit Activity

One of the Group's subsidiaries ECA, is a specialised insurance firm performing the role of an export credit agency in Kazakhstan. Exports from Kazakhstan are important to the Group's business and the Group expects the volume of its export transactions to increase. Political and economic instability, increased governmental regulation of exports of commodities, the imposition of adverse trade regulations or adverse changes in existing regulation in importing countries could have a material adverse effect on the Group's strategy to increase exports, which

could, in turn, have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Risks Relating to the Group's Investment Activities

The Group has Invested and may Continue to Invest in Portfolio Funds over which the Group has Only Limited Control Exposing the Group to Additional Risks

QIC, a subsidiary of the Issuer, is involved in providing shared financing through private equity funds to companies principally in the priority sectors of the economy. QIC invests in and manages these private equity funds in partnership with international institutional investors, sovereign wealth funds and international financial organisations. As of 31 December 2025, QIC had investments in seven captive funds and in 12 portfolio funds, with various ownership interests.

QIC has a 95.24% ownership interest in Kazakhstan Infrastructure Fund C.V. ("KIF"). As a limited liability partner in the Fund, QIC is not involved in the decision-making process of the Fund's investments. The general partner of the fund, Verno Pe Eurasia GP Limited, is free to select assets for capital investment and makes key decisions on operating activities and investees' capital, including budgets and key management remuneration, and QIC, and ultimately the Issuer, has no control over such decisions. Similarly, QIC cannot control the operations of the other portfolio funds, nor can it unilaterally make major decisions with respect to such funds. This lack of control constrains QIC's ability to cause such portfolio funds to take action that would or might be in the best interests of QIC and the Group. The Group is also exposed to the credit risk of its portfolio funds partners.

Although relations between QIC and its portfolio funds partners are generally positive, the Group's management cannot be sure that relations will remain so in the future. Any deterioration in the relationship with QIC's portfolio funds partners or a deterioration in the Government's relationship with the governments of such portfolio funds partners could have a material adverse impact on the affected private equity funds and, potentially, on the Group's business. If any of the risks described above materialise, this could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The Group May Pursue Investment Opportunities in Sectors in Which it has No Previous Investment Experience

Most of QIC's current investments into private equity funds referred to above are in entities that are based in Kazakhstan. The Group may expand the range of its investments and, in the future, make investments into new sectors. It may consider making investments in sectors in which it has little or no previous investment experience. As a result, the Group may not be able to assess the risks of investing in such sectors adequately. The Group cannot guarantee that its future investments into such new sectors will be successful and it could lose some or all such investments.

Financial Risks Relating to the Issuer and the Group

The Group is Exposed to Liquidity Risks and Financing Risks

Liquidity risk comprises uncertainties in relation to the Group's ability, under adverse conditions, to access funding necessary to cover obligations to the Group's customers, meet payment obligations on time and satisfy regulatory capital requirements at the level of those subsidiaries that are required to comply with them (namely Otbasay Bank, KHC and ACC). It includes, among others, the risk of lack of access to funding, the risk of unexpected increases in the cost of financing and the risk of not being able to structure the maturity dates of the Group's liabilities reasonably in line with its assets, creating an asset-liability maturity gap. These may be caused by factors that are not specific to the Group's operations, such as general market conditions, disruptions of the financial markets or sovereign credit rating downgrades. The Group may face liquidity risks related to its ability to meet financial obligations, particularly in periods of economic stress or market disruptions. The Issuer's liquidity could be impaired by operating losses of its subsidiaries, low free cash flow and capital requirements, any of which could lead to reduced or zero dividend payments. The Group may also be unable to monetise assets and a fail to obtain financing on a timely basis or at a reasonable cost. Thus, there can be no assurance that the Group will not experience liquidity issues. Should the Group fail to meet its net funding requirements due to inadequate liquidity, this could materially adversely affect its business, financial condition, results of operations and prospects.

The Group aims to reduce its reliance on Government funding by developing partnerships with foreign and local investors, international financial institutions, development banks and global corporations. In the year ended 31 December 2025, the Issuer raised KZT 4,723.5 billion, of which 90.9% was non-State financing and 9.1% was State financing. In 2024, total funds raised amounted to KZT 3,882.7 billion, of which 78.2% was non-State financing and 21.8% was State financing. In 2023, the Issuer raised KZT 1,946.4 billion, of which 84.1% was non-State financing and 15.9% was State financing.

Reliance on market-based funding, such as securities placements, exposes the Group to market fluctuations, increasing the risk of liquidity gaps. The Group's ability to realise this strategic goal by obtaining further external financing and the cost of such financing are dependent on numerous factors, including general economic and market conditions in Kazakhstan and globally, international interest rates, credit availability from banks or other lenders, investor confidence in the Group and the success of the Group's businesses. There can be no assurance that external financing, whether on a short-term or long-term basis and whether to fund new projects or investments or to repay existing financing, will be available or, if available, that such financing will be obtainable on terms that are not onerous to the Group. In addition, the terms on which banks and other financial institutions provide funding or any other commercial funding sources will likely be less favourable to the Group than the terms of the concessional-rate loans it currently receives from the Government. Additional costs associated with the Group increasing its exposure to such funding may result in the Group experiencing lower profit margins, which could, in turn, have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Further, if such sources of financing are not readily available or are only available on onerous terms and the Group lacks sufficient operating cash flows and does not receive additional capital from the Government for such shortfall, this could adversely affect the Group's business through increased borrowing costs and reductions in capital and investment expenditure.

Exchange Rate Fluctuations Could Have an Adverse Impact on the Group's Business

Although the Tenge is convertible for current account transactions, it is not a fully convertible currency for capital account transactions outside Kazakhstan. Since the NBK adopted a floating rate exchange policy for the Tenge in April 1999, the Tenge has fluctuated significantly and the NBK has adopted a number of exchange rate policies. The Tenge had generally appreciated in value against the U.S. dollar over the previous decade until its devaluation by the NBK in February 2009. In August 2015, the NBK announced the adoption of a free-floating exchange rate and medium-term inflation targeting policy, which resulted in a 26.2% depreciation against the U.S. dollar.

In 2023, the Tenge appreciated 0.9% against the U.S. dollar and depreciated 1.8% against the euro. In 2024, the Tenge depreciated 15.2% against the U.S. dollar and 8.8% against the euro. In 2025, the Tenge appreciated 3.7% against the U.S. dollar and 8.5% against the euro. As of 31 December 2025, the official KZT/U.S.\$ market exchange rate quoted on KASE reported by the NBK was KZT 505.53 per U.S.\$1.00, as compared to KZT 525.11 per U.S.\$1.00 as of 31 December 2024 and KZT 454.56 per U.S.\$1.00 as of 31 December 2023.

Past devaluations of the Tenge have resulted in reduced access to capital, a higher cost of capital, increased inflation and uncertainty regarding economic growth, all of which have had, and are expected to continue to have, a material effect on the Group's financial position and results of operations.

Many of the Group's borrowers have revenues principally generated in Tenge and, to the extent they borrow in U.S. dollars, any decrease in the value of the Tenge relative to the U.S. dollar may generally adversely affect their financial condition and, in particular, could have a negative effect on the ability of such borrowers to repay U.S. dollar-denominated loans extended by the Group. A devaluation of the Tenge against the U.S. dollar or other foreign currencies could also result in an outflow of Tenge deposits at the subsidiary level.

The Group is also subject to foreign currency risk as a portion of its loans from banks and other financial institutions and debt securities is denominated in U.S. dollars. Any devaluation of the Tenge would increase the Tenge-value of these borrowings and the actual interest expense payable on them.

In addition, in the event of any shortage of availability of U.S. dollars in Kazakhstan in the future, this could have a material adverse impact on the Group's ability to service payments under its U.S. dollar-denominated borrowings (including the Notes) particularly as the Group continues to obtain foreign currency funding by accessing the international capital markets and syndicated and bilateral lending markets.

Accordingly, any future changes in exchange rates could have a material adverse effect on the Group's business, financial condition, cash flows, results of operations and prospects.

The Group is Exposed to Interest Rate and Inflation Risk

The Group is exposed to risk resulting from mismatches between the interest rates on its interest-bearing liabilities and interest earning assets. Generally, the maturities of Group's assets and liabilities are not balanced and, accordingly, an increase or decrease in interest rates could have an adverse effect on the Group's net interest margin and, therefore, profitability. To the extent that the Group's assets reprice more frequently than its liabilities, if interest rates fall, the Group's interest expenses will decrease more slowly than its interest income, which could negatively affect interest margins and result in liquidity problems. According to the Group's credit policies, the subsidiaries of the Issuer intend to pass on such risks to borrowers by lending on similar conditions as they borrow. However, they may not always be able to do so. The Group's interest rate management policies include a system of limits and reporting requirements to monitor and control interest rate risks on a regular basis, and, in order to manage the risk of mismatch in interest rates inherent to the Group's operations, the Government grants low-interest loans to the Group. There can be no assurance, however, that the Group will continue to benefit from such loans in the future.

In addition, there is a risk that the current global inflationary environment could have a more pronounced negative impact on Kazakhstan given its history of sustained high inflation levels, and, in turn, on the Group's business, financial condition, results of operations and prospects. Annual inflation in Kazakhstan was 9.8% in 2023, 8.6% in 2024, and 12.3% in 2025 and inflation levels remain higher than the NBK's target of 5.0%. As a consequence of the high inflation rates, economic growth in Kazakhstan is likely to slow down due to high production costs and low lending activities, in turn caused by increased market borrowing rates. One likely impact of general inflation increases in Kazakhstan in recent years on the Group will be the rising production costs of its debtors, which may increase the risk of delays in debt repayments and loan defaults. This, in turn, could lead to the Group needing to further increase its provisioning levels or experiencing increasing levels of non-performing loans, as well as in a general deterioration of the Group's financial stability.

As illustrated by the above factors, the Group's ability to mitigate interest rate risks is limited and, as such, its financial condition may be negatively affected. In addition, volatility in interest rate movements may have a material adverse effect on Group's business, financial condition, cash flows, results of operations and prospects.

Operational Risks Relating to the Group

The Group is Dependent on Senior Management and Key Personnel

There is a considerable shortage of adequately qualified personnel in Kazakhstan, particularly in such areas as risk management. If the shortage of adequately qualified personnel persists, the Group's ability to offer the desired range and volume of services and maintain the quality of its assets may be affected, which may in turn, have a material adverse effect on the Group's business, financial condition, results of operations and prospects. In addition, a continued shortage of adequately qualified personnel may require the Group to offer additional financial and other incentives to retain its existing personnel and recruit additional personnel, which would increase the Group's expenses. The Group's ability to successfully manage its assets and liabilities, whilst keeping within appropriate risk limits places greater dependency on the Group's ability to recruit, develop and rely upon a core group of highly trained and experienced personnel. There is a shortage of qualified personnel with such experience in the Kazakhstan market and considerable competition for such personnel from the private commercial sector in which traditionally wages and benefit packages are higher. Furthermore, as the Group's business continues to grow and develop, it may, in the future, have to recruit additional personnel. Labour costs in Kazakhstan have historically been lower than labour costs in more developed countries. However, if wages and related costs were to increase in Kazakhstan, the Group's profitability could be reduced. The Group may need to increase the level of employees' compensation at a higher rate than it has done in the past in order to remain competitive and this, in turn, would increase the Group's expenses. A failure to successfully manage its personnel needs may have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The current senior management team includes a number of individuals who contribute to the Group's significant experience and expertise in the banking and financial services industry (see "Management"). The Group's ability to continue to retain, motivate and attract qualified and experienced banking and management personnel is vital

to its business. There can be no assurance that the Group will be able to successfully recruit and retain the necessary qualified personnel. The loss or diminution in the services of members of its senior management team or an inability to recruit, train or retain necessary personnel could have a material adverse effect on the Group's business, financial condition, results of operations and prospects as well as impair its ability to achieve its strategic objectives. Senior management and key personnel may voluntarily terminate their employment with the Issuer or the subsidiaries of the Issuer or leave their positions due to reasons beyond the Group's control. If the Group experiences a large number of retirements or departures of its senior management and key personnel in a relatively short period, attracting and retaining a sufficient number of replacement personnel may be challenging. Moreover, future significant changes in the Group's senior management, either in connection with future changes in the Government or otherwise, could result in a loss of business continuity.

If the Group is unable to hire and retain senior management and key personnel with requisite skills and expertise, it could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The Group's Operations are Dependent on the Reliability and Security of its IT Systems and the Performance, Reliability and Security of the Telecommunications and Internet Infrastructure in Kazakhstan

The Group's operations depend heavily on information technology ("IT") systems to manage financial records, customer data, proprietary information and operational processes. These IT systems are critical to the Group's business and are exposed to rapidly evolving cyber threats, such as data breaches, hacking, denial-of-service attacks, insider threats and other forms of cyber intrusion.

Despite the implementation of security measures, there can be no assurance that these systems will be sufficiently robust to prevent all unauthorised access, disruptions or failures. A significant breach or failure of the Group's IT systems could result in operational disruptions, loss or corruption of data, reputational damage, regulatory penalties, financial loss and litigation.

In January 2025, a phishing attack targeted KazAgroFinance JSC, where fraudsters sent deceptive emails attempting to obtain sensitive information. While the incident was localized and successfully mitigated, any such attacks in the future pose a risk of financial fraud, data breaches, and reputational harm to the Group and its stakeholders.

In addition, the Group's reliance on third-party technology providers and customers' use of personal devices outside the Group's security perimeter increases the risk of cyber incidents. Furthermore, rapid advances in financial technology may render the Group's existing IT systems obsolete, requiring significant investment to maintain competitiveness and security.

Any failure to manage IT, cybersecurity and data protection risks effectively could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The Group's business depends on the performance, reliability and security of the telecommunications and internet infrastructure in Kazakhstan, where the Group's computer hardware is currently located. Any disruptions in, or failures of, the telecommunications and internet infrastructure in Kazakhstan may adversely affect the quality or availability of the Group's platforms. The failure of telecommunications network operators to provide the Group with the requisite bandwidth could affect the speed and availability of the Group's platforms. Moreover, if the security of the Group's domain names is compromised for any reason, the Group will be unable to use such domain names in its business operations, which, in turn, could adversely affect the Group's business and brand image. While the Group has systems and processes designed to implement adequate measures of encryption of data transmitted through the networks, there is no assurance that the Group's data could be misappropriated by a third party due to vulnerabilities in Kazakhstan's telecommunications and internet infrastructure, which could adversely affect the Group's business, financial condition, results of operations and prospects.

The Group's Insurance Policies may not be Sufficient to Cover All Risks that it Faces

The Group maintains a range of insurance policies, which indemnify either the relevant policyholder or third parties for loss or damage to assets and any associated liabilities. The Group believes that its insurance programmes provide coverage in amounts and on terms that are generally consistent with relevant industry practice. However, the insurance industry in Kazakhstan is in a developing state and many forms of insurance

protection common in other parts of the world are not yet generally available. The Group does not have full coverage for its premises and equipment, business interruption or third-party liability in respect of property or environmental damage arising from accidents on its property or related operations. In the absence of adequate insurance cover, the Group or a third party could be subject to a material loss to the extent that a claim is made against the Group that is not covered in whole or in part by insurance and for which third-party indemnification is not available, which could have a material adverse effect on operations and financial condition of the Group.

In addition, there is no assurance that the Group's insurance coverage will continue to be available in the market from either capacity or commercial standpoints.

Financial Reporting and Internal Controls-Related Risks

The Group companies may face challenges related to maintaining an effective system of financial reporting and internal controls. The preparation of the Group's consolidated financial statements involves significant management judgment (see "Management's Discussion and Analysis of Results of Operations and Financial Condition — Critical Accounting Estimates and Judgments"). These judgments can materially affect the Group's financial results, which may differ if alternative assumptions were used. There is no assurance that management's assumptions will accurately predict future events.

In addition, some subsidiaries within the Group lack fully automated financial reporting systems for IFRS data and consolidation, relying instead on manual adjustments. While the Group's management believes these systems are adequate, the process is complex, time-consuming and requires significant oversight from senior accounting personnel. Insufficiently developed reporting processes may affect the Group's financial data and the reporting of the results of operations.

Climate Change may Negatively Affect the Group's Business and Operations

The business environment in which the Group operates is continually changing. ESG-related issues may directly or indirectly impact key stakeholders, including customers, employees, investors, rating agencies and regulators, and these stakeholders are increasingly demanding more climate-related disclosures, including climate risk assessment. The Issuer recognises climate change as an emerging risk for the Group's clients' business and manages this risk in compliance with applicable laws and regulations.

A failure to manage those risks that have ESG implications may adversely impact the reputation of the Group, the results of its operations, its customers and its ability to deliver on its long-term strategy and therefore its long-term success.

Climate change is an ESG theme that poses potentially significant long-term risks to the Group and its customers, not only from the physical impacts of climate change, driven by both specific short-term climate-related events such as acute or chronic weather events and longer-term impacts, but also from transition risks associated with the shift to a low-carbon economy. Kazakhstan is increasingly vulnerable to extreme weather events such as droughts, floods, heatwaves and shifting precipitation patterns (see "— The Occurrence of Pandemics and Natural Disasters and the Impact of Climate Change may Adversely Impact the Economy of Kazakhstan"). These conditions can directly impact sectors central to the Group's operations, including agriculture, infrastructure and energy. For example, prolonged droughts may reduce agricultural productivity, affecting clients' ability to meet loan obligations, particularly those financed through the Group's subsidiaries. Similarly, extreme weather may damage infrastructure and industrial assets supported by the Development Bank of Kazakhstan. Such risks may reduce the value of collateral, increase credit losses, and impact the broader economic environment in which the Group operates. In rural or underserved regions with limited climate resilience, the financial exposure is particularly acute.

Recent severe flooding in parts of Kazakhstan and the risk of increasing water stress, droughts and extreme weather events may adversely affect sectors important to the Group, including agriculture, infrastructure and transport, and may increase borrower distress, collateral deterioration and operational disruption.

Climate change, sustainability and the reduction of emissions is an important issue for the Group. Among other things, transitional and physical risks could impact the performance and financial position of the Group's customers and their ability to service their loan and lease obligations.

Regulatory, Legal and Tax Risks Relating to the Group

The Issuer is Subject to Regulatory Restrictions on its Activities

The Group operates in a regulated environment, subject to oversight and restrictions imposed by relevant authorities, including the NBK and the Agency for Regulation and Development of the Financial Market (“ARDFM”). Some Group subsidiaries, such as Otbasny Bank, KHC and ACC, hold banking licences and are regulated by the NBK and ARDFM, which impose various requirements affecting their operations.

The procurement processes of the Group are regulated by the Law of the Republic of Kazakhstan “On Procurement of Quasi-Public Sector Entities” # 47-VII ZRK dated 8 June 2021 (as amended), and the Procurement Rules for Quasi-Public Sector Entities excluding the National Fund and organisations belonging to the National Fund, approved by the Order of the Minister of Finance of the Republic of Kazakhstan #1253 dated 30 November 2021 (as amended). The Issuer has adopted its own procurement rules in accordance with these rules, and its subsidiaries have implemented similar procurement guidelines.

There can be no assurance that the current regulatory regime will not change or that the Government will not implement new regulations or policies, modify existing regulations, or adopt new legal interpretations affecting taxation, interest rates, inflation, exchange controls or other areas relevant to the Group’s business. Such changes could have a material adverse effect on the Group’s business, financial condition, results of operations and prospects.

The operations of certain subsidiaries of the Issuer are also regulated by various laws and regulations, which may be restrictive with respect to their operations including laws and regulations governing the banking and financial services sector in Kazakhstan. The Group companies operating in the banking sector are required to obtain and maintain various statutory and regulatory licences, permits and approvals in Kazakhstan to carry out their business activities. These include licences some of which may expire in the ordinary course of business and require renewal or re-approval from relevant authorities. Certain of the Issuer’s subsidiaries are regulated by specific laws relating to that institution. For example, DBK is subject to the Law on the Development Bank of Kazakhstan dated 25 April 2001 (as amended).

A breach of regulatory requirements could expose the Group to potential liability, including the suspension or revocation of the banking licences of the banking subsidiaries of the Issuer.

Failure to comply with applicable regulations or changes in regulatory requirements may lead to increased compliance costs, penalties or the cancellation, revocation or suspension of licences, permits or approvals. This could result in operational disruptions and could materially adversely affect the Group’s business, financial condition, results of operations and prospects.

In addition, changes in the interpretation of existing laws or the enactment of new laws could require the subsidiaries of the Issuer to obtain additional licences or approvals, which may further increase compliance costs or delay their operations.

Furthermore, there can be no assurance that the current regulatory regime will remain unchanged or that Government authorities will not implement new regulations, policies or legal interpretations that could affect the operations of the Group. This may include changes relating to taxation, interest rates, inflation, exchange controls or other regulatory matters. Such changes could have a material adverse effect on the Group’s business, financial condition, cash flows, results of operations and prospects.

Corporate Governance and Disclosure Requirements

The corporate governance laws and rules applicable to the Issuer, as a national holding company in Kazakhstan, are primarily governed by the Kazakhstan Joint Stock Company Law, the regulations applicable to national management holdings and other relevant laws of Kazakhstan. The Issuer has an approved Corporate Governance Code which sets forth a set of rules and recommendations designed to ensure efficiency, transparency, accountability and a high level of business ethics in relations within the Group and with the other stakeholders.

Notwithstanding the above, the corporate governance framework in Kazakhstan is generally less developed than that in jurisdictions such as the United States or the United Kingdom. As a result, the responsibilities of the

members of the Board of Directors and the Management Board of the Issuer differ from those typically applicable to companies incorporated in the United States, the United Kingdom or other more developed jurisdictions. The Group may face challenges in aligning its governance practices with international standards, which could affect investor confidence. Additionally, as a national holding company, the Issuer is subject to specific governance obligations and oversight by state authorities, which may result in decision-making processes being influenced by governmental priorities rather than purely commercial considerations. The Issuer may also be required, from time to time, to pursue state policy, developmental or socio-economic objectives in parallel with commercial objectives, which may not always align with the interests or expectations of investors. This could lead to delays in strategic decision-making or the implementation of corporate governance improvements.

A key objective of securities laws in countries such as the United States and the United Kingdom is to promote full and fair disclosure of all material corporate information to the public. Although the Issuer is subject to certain disclosure requirements under Kazakhstan law, these requirements are less rigorous compared to those in the United States, the United Kingdom or other more developed markets. Consequently, there may be less publicly available information about the Issuer and the Group than would be required if it were organised in the United States, the United Kingdom or similar jurisdictions. In particular, the scope, timing, format and level of detail of disclosures made by the Issuer may differ from those customary for issuers in more developed capital markets. This could adversely impact an investor's ability to assess the suitability of Notes issued by the Issuer for their investment purposes.

While the Government has expressed intentions to continue reforming corporate governance regulations applicable to national management holdings and joint stock companies with the aim of enhancing disclosure and transparency to promote growth and stability, there is no guarantee that this policy will be sustained or that such reforms will be effectively implemented. The impact of future legislative developments in this regard is uncertain. The pace and effectiveness of regulatory changes remain uncertain, and the actual enforcement of governance and disclosure requirements may vary. Any delays or inconsistencies in implementing these reforms could result in continued gaps between the Group's corporate governance and disclosure practices and those of issuers in more developed markets. Although the Issuer publishes corporate governance and sustainability reporting, there can be no assurance that such reporting will provide investors with information that is equivalent in scope or comparability to reporting expected in other jurisdictions or by other international issuers.

Furthermore, any regulatory changes that impose additional disclosure or compliance requirements on the Group could increase administrative burdens and costs, while the lack of clarity in evolving regulations may create uncertainty in compliance efforts. The Group's ability to attract international investors or enter into cross-border financing arrangements may be adversely affected by these governance and disclosure limitations.

Accordingly, investment in the Notes is suitable only for sophisticated investors who fully understand the risks involved. Investors should be aware that they may not have access to the same level of public information about the Issuer and the Group as would be available for issuers based in more developed markets.

The Issuer and its Subsidiaries may Become Subject to Legal Proceedings, which could Materially and Adversely Affect the Group

The Group is exposed to legal disputes and litigation with customers and counterparties, among others. These actions may seek, among other things, compensation for alleged losses, civil penalties or injunctive or declaratory relief. In addition, the Group is subject to regulatory investigations and examinations relating to, amongst other things, administrative, environmental, labour and tax claims. These claims could involve a wide range of issues, and, in certain instances, substantial amounts could be claimed.

In the event that any such action or proceeding is ultimately resolved unfavourably at amounts exceeding the Group's accrued liability, or at material amounts, the outcome could materially and adversely affect the Group's results of operations. The conduct and settlement of any legal dispute or litigation can be time-consuming and expensive, creating significant uncertainty in relation to the outcome for a sustained period.

No assurance can be given that such proceedings will not otherwise adversely affect the Group's business, financial condition, results of operations and prospects.

U.S. and EU Sanctions may have an Effect on the Group

The U.S. government imposes economic sanctions and trade embargoes with respect to certain countries in support of its foreign policy and national security goals. These laws and regulations are administered by the U.S. Treasury Department's Office of Foreign Assets Control ("**OFAC**") and, in certain instances, by the U.S. State Department. U.S. economic sanctions impose restrictions on U.S. persons and, in certain circumstances, non-U.S. persons with respect to activities or transactions with certain countries, governments, entities or individuals that are the target of the relevant U.S. economic sanctions. Under applicable U.S. economic sanctions, U.S. persons also are prohibited from facilitating such activities or transactions and non-U.S. persons are prohibited from causing other persons to violate applicable prohibitions. For example, if non-U.S. persons engage in a transaction that would be prohibited for U.S. persons, a U.S. dollar transfer would be prohibited and would create compliance risk for both the non-U.S. persons and the U.S. financial institution that must process the payment.

The EU has adopted different regulations establishing a sanctioning framework against Russia in view of the conflict in Ukraine. These sanctions include the freezing of assets of certain conflict-related entities and individuals (the Regulation No 269/2014) and restrictive measures aimed at limiting trade relations between Russia and the EU and harming the Russian economy (Regulation 833/2014). Since the beginning of the conflict in Ukraine, the EU Council has issued numerous sanctions packages that continuously tighten and improve its sanctions pressure on the Russian Federation.

The United Kingdom has established its own autonomous sanctions regime against Russian Federation in response to conflict situation in Ukraine under the Sanctions and Anti-Money Laundering Act 2018 ("**SAMLA**"). These measures are implemented through the Russia (Sanctions) (EU Exit) Regulations 2019, which provide the legal basis for asset freezes targeting designated individuals and entities, as well as broader sectoral restrictions affecting key areas of the Russian economy, including finance, energy, defence, and trade. Since the escalation of the conflict, the UK government has introduced a series of amendments to expand and strengthen these measures, increasing economic pressure on the Russian Federation and broadly aligning with international partners.

Comparable measures have also been adopted by a number of other jurisdictions, including Australia, Canada, Japan and Switzerland, Republic of Korea. These frameworks establish a range of restrictive measures designed to prohibit or limit financial transactions and other forms of engagement with sanctioned countries, entities and individuals, often including asset freezes, trade restrictions, and controls on the provision of economic resources, with the aim of exerting economic and political pressure.

Whilst neither the Issuer nor any of its subsidiaries are currently subject to sanctions by any U.S., EU and UK authorities, there can be no assurance that the Issuer, any of its subsidiaries, their customers or business associates will not be sanctioned in the future. If the Issuer or its subsidiaries were to be sanctioned in the future, some of its investors, in the U.S., EU, UK and in other jurisdictions in which sanctions similar to the U.S. economic sanctions apply, may be required (by operation of law or regulations or under internal investment policies, or both) to divest their interests in the Notes and others may be prevented from purchasing Notes. Moreover, in such circumstances, other counterparties to the Group, in and outside the U.S. may be required, or may decide for reputational reasons or otherwise, to cease their business relationships with, or divest their financing of or investments in, the Group. Furthermore, banks required to comply with international sanctions regulations may suspend or terminate their operations with the Group in order to avoid regulatory breaches, legal liability, responsibility and/or potential reputational damage. Any of these risks, if they materialise, could have a material adverse effect on the Group's business, financial condition, cash flows, results of operations and prospects.

In addition, the continuing expansion of sanctions against Russia and related anti-circumvention measures may increase scrutiny of financial institutions, corporates and counterparties in Kazakhstan and elsewhere in Central Asia. Proposed or future measures, including any measures targeting sanctions circumvention or the provision of services to sanctioned persons, could increase compliance costs, disrupt payments, delay transactions, impair relationships with international counterparties and expose the Group to heightened regulatory or reputational risk.

The Group's operations expose it to the risk of violating, or being accused of violating, economic and trade sanctions or engaging in conduct that may create a risk of the imposition of secondary sanctions. The Issuer and the Group companies have had certain relationships with Kazakhstan-established subsidiaries of Russian state-owned banks. Such activities include allocation of funding by the Issuer's subsidiary KHC in connection with state-administered subsidized mortgage lending programmes through second-tier commercial banks, one of which is "Subsidiary Organization VTB Kazakhstan JSC", which is currently subject to EU, UK and U.S. sanctions. All

funding under the programme is denominated in Tenge and the programme involves Kazakh entities only. Companies of the Group terminated all new dealings with Kazakhstan-based subsidiaries of Russian state-owned banks following the expansion of sanctions since February 2022, and KHC's legacy payments to "Subsidiary Organization VTB Kazakhstan JSC" are de minimis, amounting to less than the Tenge equivalent of U.S.\$ 50,000 per month. Except for the foregoing, the Issuer and the Group companies do not currently have contracts or transactions with persons or entities that are targets of U.S. blocking or other applicable sanctions, such as parties included in the Specially Designated Nationals and Blocked Persons List maintained by OFAC, or similar sanctions-related lists of designated persons maintained by EU, UK and other relevant sanctions authorities. However, any failure to timely and accurately screen contracts and transactions may expose the Group to secondary sanctions, reputational harm and significant penalties, including civil and criminal fines, and even investigations of alleged violations can be expensive and disruptive. In addition, despite the Group's adoption of sanctions screening procedures and compliance policies, there can be no assurance that through these procedures and policies the Group will timely and effectively detect all sanctioned business partners or contractual counterparties, including as a result of new sanctions designations, nor achieve full compliance by all of the Group's employees or representatives for which the Group may be held responsible, and any such failure or violation could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

In addition, the sanctions regulatory framework is multi-faceted and complex and there is no guarantee that the Group's past transactions with sanctioned counterparties or the Group's present or future transactions with counterparties would not be determined as falling within the scope of the sanctions regime. Any such determination may expose the Group to the risk of imposition of secondary or other similar sanctions which, in turn, would have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Other Risks Relating to the Group

The Issuer's and Group Companies' Credit Ratings are Subject to Change and Downgrades that may Adversely Affect their Business

The international credit rating agencies have indicated that the ratings and outlook assigned by them to the Issuer remain constrained principally by the sovereign risk of Kazakhstan. This has, on occasion, had a positive effect on the Issuer's credit ratings, for example, in September 2024, the Issuer's long-term rating was upgraded by Moody's from Baa2 to Baa1 after the sovereign ratings were upgraded.

However, the sovereign risk has in the past also led to negative ratings actions. For example, in 2016, Fitch lowered the Issuer's long-term rating from BBB+ to BBB following a corresponding decrease in the sovereign rating.

As of the date of this Base Offering Memorandum, the Issuer's long-term issuer default rating assigned by Fitch is BBB (with a stable outlook) and the long-term rating assigned by Moody's is Baa1. These ratings are currently identical to those assigned to the sovereign long-term ratings.

There can be no assurance that the Issuer or Kazakhstan will be able to maintain their current credit ratings, and any deterioration in the geopolitical situation, the general economic or political environment or the Group's financial condition could lead to downgrades. Any such downgrade in the ratings of the Issuer could undermine confidence in the Issuer, limit its ability to effectively negotiate new loan facilities and make it more difficult and/or expensive for it to raise capital going forward. Such downgrade may also affect or effectively limit the Issuer's access to capital markets as investing in the Issuer will in such case be considered less attractive and/or no longer be allowed for certain investors. Any of the above could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

B. MACROECONOMIC RISKS AND RISKS RELATED TO KAZAKHSTAN'S POSITION AS AN EMERGING MARKET

The Issuer and the Group are Largely Dependent on the Economic, Social and Political Conditions Prevailing in Kazakhstan. Most of the Group's Operations are Conducted, and most of its Assets and Operations are Located in Kazakhstan

The Group's assets and operations are located principally in Kazakhstan, and a majority of the Group's costs is incurred in Kazakhstan. Since the majority of the Group's expenses is denominated in Tenge, inflationary pressures in Kazakhstan are a significant factor affecting the Group's expenses. Any adverse change on a national basis in economic or political conditions in Kazakhstan could negatively affect Group's counterparties and their ability to repay loans due to the Group, thereby negatively affecting the Group's income and profitability. Such adverse changes could also negatively impact the Group's ability to attract funding for its projects either from the Government (through the State budget) or from the international capital markets or lenders on terms that are commercially acceptable to the Group, thereby reducing its ability to offer funding to its customers and to operate its business as currently operated.

Kazakhstan is an Emerging Market and is Subject to Greater Risk than more Developed Markets

The Kazakhstan market, being an emerging market, is subject to greater risk than more developed markets, including in some cases significant legal, economic and political risks. Accordingly, investors should exercise particular care in evaluating the risks involved and must decide for themselves whether, in light of those risks, their investment is appropriate. Generally, investment is only suitable for sophisticated investors who fully appreciate the significance of the risks involved.

Disruptions in the international capital markets and changing regulatory environments can lead to reduced liquidity and increased credit risk premiums for certain market participants and result in a reduction of available financing. Countries located in emerging markets may be particularly susceptible to these disruptions and changes and also to reductions in the availability of credit or increases in financing costs, which could result in them experiencing financial difficulty.

In addition, the availability of credit to emerging markets is significantly influenced by levels of investor confidence in such markets as a whole. Accordingly, any factors that impact market confidence, such as a decrease in credit ratings or state or central bank intervention in a particular market, could affect the price or availability of funding for these markets, which could, in turn, have an impact on the wider economies of such markets. Fluctuations in the global economy or an increase in the perceived risks associated with investing in countries located in emerging markets could reduce foreign investment in Kazakhstan and, as a result, have an adverse effect on the economy of Kazakhstan.

If foreign investment in the economy of Kazakhstan decreases, there may be liquidity constraints, limiting the availability of capital for businesses and potentially slowing Kazakhstan's economic growth. The economy of Kazakhstan is also not immune from developments in the economies of other countries located in emerging markets. Financial unrest or instability experienced in one or more countries located in emerging markets, especially countries in the CIS, around the Caspian Sea, or in Central Asia (some of which have recently experienced significant political instability, including terrorism and internal unrest), could have a negative impact on the economy of Kazakhstan and a material adverse effect on the trading price of the Notes and, potentially, the Issuer's ability to make payments of principal and interest under the Notes.

The Economy of Kazakhstan is Vulnerable to Political Instability

The Group is heavily dependent on Kazakhstan's economic, social and political conditions, as most of its operations are conducted, and most of its assets are located, in Kazakhstan. Since gaining independence in 1991, Kazakhstan has transitioned from a centrally controlled command economy to a market-oriented economy. However, this transition has been accompanied by periods of economic and political uncertainty, high inflation, local currency instability and frequent changes in the legal environment. Despite government efforts to implement economic reforms, including privatisation and deregulation, challenges remain, particularly due to the large shadow economy, which can hinder effective tax collection and economic management. While the Government has pledged to improve business infrastructure, tax administration and privatisation, the timeline and effectiveness of these measures remain uncertain.

Kazakhstan has also experienced periods of political unrest that have had, and could continue to have, a negative impact on its economy. For example, in January 2022, protests triggered by rising fuel prices escalated into widespread unrest, particularly in Almaty and the southern regions. The Government declared a state of emergency, imposed restrictions on communication and transportation, and financial institutions limited their operations. The state of emergency was lifted on 19 January 2022, but internet access remained limited, disrupting online transactions and financial services.

Kazakhstan's political landscape continues to evolve following the events of January 2022 and subsequent reforms. A referendum held on 5 June 2022 resulted in constitutional amendments limiting presidential powers, reforming the Constitutional Council and strengthening local representative authorities. In September 2022, President Tokayev called an early presidential election, which he won in November 2022 with 81.3% of the vote. His re-election extends his term until 2029. However, ongoing political developments, potential reforms or renewed political uncertainty could materially affect Kazakhstan's financial and economic stability, which in turn could have a negative impact on the Group's business, financial condition, results of operations and prospects.

Although the Government has pursued political and institutional reforms following the events of January 2022, there can be no assurance that such reforms will prevent future unrest, dissatisfaction, regional tensions or policy uncertainty, any of which could adversely affect economic activity, investor confidence and the Group's operating environment.

The Economy of Kazakhstan is Vulnerable to External Shocks and Fluctuations in the Global Economy

The economy of Kazakhstan is vulnerable to external shocks and fluctuations in the global economy. The economy of Kazakhstan and finances have been affected adversely by global financial developments and political changes in certain emerging markets. Real GDP growth decreased from 4.5% in 2019 to 2.6% in 2020 principally due to the impact of the COVID-19 pandemic and decline in oil prices, before increasing to 4.3% in 2021, 3.2% in 2022, 5.1% in 2023 and to 4.8% in 2024. In 2025 real GDP growth was 6.5%. While in recent years Kazakhstan has sought to diversify its economy and, in particular, to increase export of manufacturing products, Kazakhstan continues to remain heavily reliant on the oil and gas industry and on hydrocarbon exports. For more information on the risks associated with the relatively undiversified nature of Kazakhstan's economy and a significant degree of reliance of the country's public finances on the performance of the oil and gas industry, see "— The economy of Kazakhstan is heavily dependent on the price of commodities".

Changes in both the global and domestic environment have resulted in, amongst other things, lower liquidity levels across the banking sector, tighter credit conditions for companies of Kazakhstan generally and fluctuating global demand for, and instability in, the price of crude oil and other commodities and downward pressure on the Tenge. For example, the Tenge experienced a significant depreciation against the U.S. dollar in the first quarter of 2022 mainly due to significant deterioration of external factors, such as depreciation of the Russian rouble and the decrease in crude oil prices (starting from October 2018) due to increased oil reserves and oil production by principal exporters. The Tenge depreciated relative to the U.S. dollar by 10.4% in 2020 primarily due to a sharp fall in oil prices caused by the COVID-19 pandemic. In 2022, the Tenge faced new pressures and volatility due to the conflict between Ukraine and Russia, the sanctions imposed by numerous countries on Russia, a major trade partner of Kazakhstan, and resultant disruptions in supply chains and historical trading relationships. The Tenge experienced sharp depreciation in the first quarter of 2022, with the exchange rate reaching KZT 512.19 to U.S.\$1.00 as of 31 March 2022. By the end of 2022, the exchange rate stabilised at KZT 462.65 to U.S.\$1.00. In 2023, the average exchange rate was KZT 456.231 per U.S.\$1.00, in 2024, the average exchange rate increased to KZT 469.44 per U.S.\$1.00 and in 2025, the average exchange rate was KZT 521.59 per U.S.\$1.00.

The economy of Kazakhstan remains vulnerable to external shocks and the economic performance of its trade partners. A significant decline in economic growth in the EU or any of Kazakhstan's other major trade partners, including Russia (whether or not resulting from sanctions imposed by, among others, the U.S., the UK and the EU), could have a material adverse effect on Kazakhstan's balance of trade and adversely affect Kazakhstan's economic growth. Kazakhstan also depends on neighbouring states to access world markets for a number of its major exports. Should access to these export routes be materially impaired, this could adversely impact the economy of Kazakhstan. Events occurring in one geographic or financial market sometimes have so-called "contagion effects", whereby they result in an entire region or class of investments being disfavoured by international investors. Kazakhstan has been adversely affected by contagion effects in the past and it is possible that the market for investments in Kazakhstan, including the Notes, will be similarly affected in the future by negative economic or financial developments in neighbouring countries or countries whose economies or credit

ratings are similar to those of Kazakhstan. See “— The Russia-Ukraine conflict and the sanctions imposed on Russia by numerous national and international authorities in response, as well as countermeasures taken by Russia, have had, and will continue to have, an adverse impact on the Group’s business, financial condition, results of operations and prospects” below. The most significant contagion affecting the economy of Kazakhstan is the global change in prices for energy resources, metals and other commodities. Several global economies, including China, are experiencing a slowdown in economic growth and stock market volatility. China is one of the main trade partners of Kazakhstan, which means that any disruption to economic stability or growth in China, or any rupture in economic or political relations between Kazakhstan and China, could have an adverse effect on the economy of Kazakhstan.

There can be no assurance that weaknesses in the global economy, or a future external economic crisis, will not have a negative effect on the economy of Kazakhstan or on investors’ confidence in markets of Kazakhstan. The Russia-Ukraine Conflict and the Sanctions Imposed on Russia by Numerous National and International Authorities in Response, as well as Countermeasures Taken by Russia, have had, and will continue to have, an Adverse Impact on the Group’s Business, Financial Condition, Results of Operations and Prospects

The Russia-Ukraine conflict that intensified in February 2022, as well as the sanctions imposed on persons in or related to Russia by the U.S., UK, EU and other authorities since 2014 have had, and are expected to continue to have, a significant disruptive effect on Kazakhstan, as well as global markets, including oil and gas markets, and supply chains, more generally. The Russia-Ukraine conflict and the sanctions and export-control measures implemented by various countries and authorities against Russian and Belarusian persons and entities in response, have contributed, and are likely to continue to contribute, to increased inflationary pressures, increased costs, supply chain disruptions, gas supply shortages, market volatility and economic uncertainty. In June 2022, the World Bank Group (the “**World Bank**”) stated that the Russia-Ukraine conflict had magnified the slowdown in the global economy triggered by the COVID-19 pandemic and warned that the global economy was entering a potentially protracted period of low growth and elevated inflation, particularly as the Russia-Ukraine conflict disrupts economic activity, investment and trade, and as pent-up demand following the pandemic fades and fiscal and monetary policy accommodation is withdrawn or tempered by central banks and governments.

Kazakhstan maintains strong independent diplomatic relationships with both Russia and Ukraine and has confirmed its neutral position with respect to the tensions between Russia and Ukraine. Nevertheless, Russia is one of the main trade partners of Kazakhstan. Since February 2022, Kazakhstan has experienced significant inward migration, particularly from Russia, as well as increased financial flows, with several Russian businesses and individuals relocating their operations to, or expanding their activities in, Kazakhstan in response to geopolitical uncertainties. In addition, there are great similarities in the structures of the economies of the two countries, in particular in their dependence on raw materials exports, and there exist historical long-term relationships (political, economic, commercial and cultural). Accordingly, when making decisions in the field of monetary policy, the NBK pays special attention to the Central Bank of the Russian Federation’s actions in the area of interest and currency policy. Accordingly, the economic situation and policy measures in Russia, including monetary policy of the Central Bank of the Russian Federation, have a significant influence on the economic situation in Kazakhstan. Furthermore, Russia and Kazakhstan, together with Belarus, are members of the Customs Union and Common Economic Space and established the Eurasian Economic Union on 1 January 2015 (with subsequent accession by Armenia and Kyrgyzstan). In 2025, trade turnover between the Republic of Kazakhstan and EAEU countries amounted to U.S.\$30,893.1 million, which in nominal terms was 0.1% lower than in 2024. Of this volume, 88.6% accounted for trade with the Russian Federation. In addition, a significant amount of the natural gas transported through Kazakhstan’s natural gas pipeline system is transported to Russia or from one part of Russia to another through Kazakhstan’s territory. Since Russia is the main trade partner of Kazakhstan and is a member of the Eurasian Economic Union, the ongoing geopolitical developments involving Russia may adversely impact the Kazakhstan economy, which could have a material adverse effect on the Group’s business, financial condition, results of operations and prospects.

The U.S. and the EU (as well as other nations, such as Australia, Canada, Japan and Switzerland) first imposed sanctions on certain Russian, Belarussian and Ukrainian persons and entities in connection with the ongoing conflict in Ukraine, including sanctions imposed by the U.S. and the EU on 12 September 2014. These sanctions have been expanded by the U.S. Countering America’s Adversaries Through Sanctions Act of 2 August 2017 as well as a number of directives issued thereunder and under previous sanctions legislation in 2017 and 2018 that target specific individuals and legal entities. On 6 August 2018, under the Chemical and Biological Weapons Control and Warfare Elimination Act of 1991 (“**CBW Act**”), the United States determined that the Russian government has used chemical or biological weapons in violation of international law and, following this

determination, certain sanctions have been imposed which include denial of exports or reexports to Russia of goods or technology controlled for national security reasons. In August 2019, the U.S. imposed a second round of sanctions under the CBW Act, including a prohibition on U.S. banks participating in the primary market for non-Russian rouble-denominated bonds issued by the Russian sovereign and lending non-Russian rouble-denominated funds to the Russian sovereign. The second round of CBW Act sanctions also imposes a presumption of denial, subject to certain exceptions, on applications for licences to export dual-use goods that are controlled by the U.S. Department of Commerce for chemical and biological weapons proliferation reasons and requires the U.S. to oppose the extension of any loan or financial or technical assistance to Russia by international financial institutions, such as the World Bank or International Monetary Fund. On 15 April 2021, the U.S. imposed new sanctions expanding restrictions on the purchase of certain Russian sovereign debt and other financing instruments and adding a number of Russian entities and individuals to the List of Specially Designated Nationals. Since the expansion of the Russian-Ukrainian conflict in 2022, the sanctions against Russia have intensified significantly. The U.S., EU and UK have implemented numerous new sanctions and export controls targeting various sectors of the Russian economy, as well as individuals and entities linked to the conflict. In 2022, the EU introduced several sanction packages, imposing asset freezes, travel bans and restrictions on economic relations with the so-called Donetsk and Luhansk regions. These measures also prohibited dealings in Russian sovereign debt and restricted access to European financial markets for Russian state-owned enterprises. The UK significantly expanded its sanctions regime during 2022, introducing sweeping measures targeting Russia's financial sector, trade, energy exports, and key individuals. These changes transformed the Russia (Sanctions) (EU Exit) Regulations 2019 into a highly comprehensive and flexible framework, including asset freezes, export bans, service prohibitions, and coordinated oil price cap mechanisms with international partners. In 2023 and 2024, the U.S. significantly expanded its sanctions, targeting the metals and mining energy, defence, technology, aerospace, maritime, manufacturing, construction and finance sectors, including restrictions on several Russian financial institutions. These included new designations of Russian banks and actions against entities involved in sanctions evasion. The U.S. also banned all new investment in Russia by U.S. persons and restricted the export of many U.S. services to Russia. Since 2023–2025, both the EU and UK have evolved its sanctions focus to include stronger enforcement and preventing circumvention, particularly through third countries. Amendments to sanctions regulations were introduced to enhance due diligence requirements, broader anti-circumvention measures, and tougher penalties for breaches.

In 2025, the U.S. further intensified sanctions targeting Russia's oil production and exports, including Gazprom Neft and Surgutneftegas, and later designated Rosneft and Lukoil. The EU also continued to enhance its sanctions regime, adopting its 16th, 17th, 18th and 19th sanctions packages in 2025, including measures targeting Russia's shadow fleet, energy revenues, military-related supply chains and sanctions evasion. The UK likewise continued to expand and update its Russia sanctions regime in 2025 and 2026.

In March 2026, U.S. sanctions affecting the purchase of Russian oil were loosened in an attempt to stabilize crude oil price increases resulting from the U.S.-Israel war with Iran. However, the waiver is temporary in nature and relates only to Russian oil that was loaded on vessels by a certain date.

The sanctions imposed to date have had an adverse effect on the Russian economy, causing volatility in Russian markets, which, in turn, has had an adverse effect on Kazakhstan and its economy. These sanctions prompted downward revisions to the credit ratings of the Russian Federation and a number of major Russian companies that are ultimately controlled by the Russian Federation, causing extensive capital outflow from Russia and impairing the ability of Russian issuers to access the international capital markets. While Kazakhstan has maintained a neutral stance in the Russia-Ukraine conflict and continues to comply with international sanctions regimes, recent public statements by senior officials suggest growing concern over the unintended economic consequences of these measures. In some cases, authorities of Kazakhstan have emphasized the need to preserve domestic economic interests, potentially leading to nuanced interpretations or selective application of trade restrictions. These dynamics may contribute to regulatory uncertainty and complicate cross-border operations, which could, in turn, adversely affect the Group's business and operations in the region.

Factors that affect the Russian rouble tend to also impact the exchange rate of the Tenge. The notable depreciation of the Tenge against the U.S. dollar in 2022 was, at least in part, due to the depreciation of the Russian rouble in the same year. Any future actions by the U.S. or other countries towards Russia, such as sanctions, could adversely affect the Russian financial market, potentially causing short-term volatility in the Tenge. In addition, if such sanctions adversely affect the operations or finances of Russian financial institutions with a substantial presence in the Kazakhstan market, this may hinder the ability of such financial institutions to provide certain financial and trade-related services to their customers in Kazakhstan.

The continuation, escalation or expansion of hostilities between Russia and Ukraine, as well as heightened geopolitical tensions in the Middle East in 2026, may lead to further restrictions, sanctions or countersanctions, increased economic instability worldwide, heightened operating risks, cyber disruptions or attacks, volatility in commodity prices and additional disruption to global shipping and supply chains. Kazakhstan's close economic links with Russia, the Russia-Ukraine conflict and the related sanctions, counter-sanctions and restrictions have had, and may continue to have, adverse impacts on the global economy, capital markets, supply chains, energy prices, suppliers and consumer demand as a result of increased inflationary pressures directly associated with the conflict, all of which could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The Economy of Kazakhstan is Heavily Dependent on the Price of Commodities

Kazakhstan is a major exporter of commodities, including oil and natural gas. In 2025, mineral products (including oil, gas and coal as well as metals and precious stones) accounted for 60.4% of Kazakhstan's exports on a customs basis (Source: Bureau of National Statistics, Structure of exports and imports by main commodity groups (January–December 2025)). The economy of Kazakhstan and the State budget, therefore, particularly rely on fiscal revenues from the export of minerals, in particular crude oil and oil products. Taxes on oil and petroleum product companies are a major source of revenue for the National Fund, which has an important stabilising function in the economy of Kazakhstan and is responsible for accumulating financial resources for the benefit of future generations in Kazakhstan. See — “*The Escalation of the Conflict involving the United States and Iran and any Disruption to the Strait of Hormuz could adversely affect Kazakhstan, global markets and the Group*”.

The National Fund is currently the source for official transfers to the State budget, which amounted to KZT 4.0 trillion in 2023, KZT 5.6 trillion in 2024, and KZT 5.25 trillion in 2025. According to the NBK, as of 29 February 2026, the National Fund held foreign currency assets in the amount of U.S.\$65,478 million (Source: The NBK. “International Reserves and Foreign Currency Assets of the National Fund of Republic of Kazakhstan”). These assets allow the National Fund to act as a fiscal buffer against external shocks to the economy and to offset any shortfalls in tax revenues from extraction sector enterprises in a given year. It also provides protection to Kazakhstan against a devaluation of the Tenge. In the event of a sustained decline in oil prices, the resources of the National Fund may be insufficient to maintain the appropriate level of liquidity in order to fund guaranteed transfers from the National Fund to the State budget. In addition, significant withdrawals from the National Fund could adversely impact the country's macroeconomic stability and fiscal resilience, leading to heightened exposure to external shocks. A reduced National Fund balance may also limit the Government's capacity to respond to future crises, exacerbating risks related to the Tenge devaluation, inflation and public debt levels. Such developments could have a material adverse effect on the economy of Kazakhstan and on investors' confidence in Kazakhstani markets.

The Economy of Kazakhstan is Significantly Affected by Volatility in International Oil Prices

Crude oil and oil product prices are subject to international supply and demand, and margins can be volatile. Political developments, increased use of renewable energy sources that alter fuel or power availability, technological change and global economic conditions have an indirect impact on oil demand and prices. In 2022, the yearly average OPEC Reference Basket price reached U.S.\$100.08, principally driven by supply uncertainties caused by the Russian invasion of Ukraine in February 2022 and the sanctions imposed by major countries around the world on Russia as a result. In 2023, the yearly average OPEC Reference Basket price decreased to U.S.\$82.95, following developments in the sanctions regime imposed on Russia as well as a series of announcements by OPEC and non-OPEC members at the end of 2022 and in early 2023 aimed at the stabilisation of oil prices. In 2024, the yearly average OPEC Reference Basket price was U.S.\$79.89 per barrel.

In 2025, oil prices remained volatile and generally lower than in 2024, with the OPEC Reference Basket averaging U.S.\$79.38 per barrel in January 2025, declining to U.S.\$61.74 per barrel in December 2025. In early 2026, oil price volatility increased further, with the OPEC Reference Basket averaging U.S.\$62.31 per barrel in January 2026 and U.S.\$67.90 per barrel in February 2026, while hostilities involving the United States and Iran and the disruption of traffic through the Strait of Hormuz triggered a sharp increase of up to U.S.\$120 per barrel in March 2026. The recent price increases may be temporary in nature and a return to prolonged price declines over the medium or long term or sustained volatility, could adversely affect Kazakhstan's economic stability, leading to reduced Government revenues and constrained public spending. These developments, in turn, may adversely impact the Group's business, financial condition, results of operations and prospects.

The Economy of Kazakhstan may be Adversely Affected by Production and Transportation Problems in the Oil Industry

Production stoppages in the country's oil industry, due to scheduled maintenance, operating constraints or other disruptions affecting Kazakhstan's major oil fields, as was the case with the scheduled turnaround of the Tengiz field in September 2024 and in Kashagan in October 2024, as well as quota-related reductions affecting large upstream projects due to Kazakhstan's commitments under the OPEC+ agreement, such as those experienced in 2024 and 2025, contribute to lower output during those periods, and result in a decrease of revenues for the National Fund and public revenues. No assurance can be given that similar production stoppages will not occur in the future.

Further, any disruption in oil transportation, for any reason, including as a result of infrastructure failure, terrorism, natural disaster, industrial accident, public health threats and global pandemics, sanctions-related constraints, maritime security incidents or a change in national Government policy, could have a material adverse effect on the economy of Kazakhstan and its public finances.

The Russia-Ukraine conflict has heightened operational, security and sanctions-related risks affecting the CPC system, which transports Kazakhstan's crude oil (see “— The economy of Kazakhstan is significantly affected by volatility in international oil prices” and “— The Russia-Ukraine conflict and the sanctions imposed on Russia by numerous national and international authorities in response, as well as countermeasures taken by Russia, have had, and will continue to have, an adverse impact on Kazakhstan's economic situation”).

CPC's largest oil pump station, Kropotkinskaya, was repeatedly attacked by unmanned aircraft-type drones during 2025. The attacks on CPC marine terminals have caused multiple loading stoppages. This prompted producers in Kazakhstan to slow output to avoid bottlenecks and storage constraints. It resulted in sharp reduction of Kazakhstan's oil production in the first quarter of the 2026 year. The Caspian Pipeline Consortium (the “CPC”), is the principal export route for Kazakhstan's crude oil exports through Russia to the Black Sea.

Although Kazakhstan has been seeking to diversify export routes, including by increasing delivery through the Baku-Tbilisi-Ceyhan pipeline, those alternative routes have substantially less capacity than CPC and may not fully offset any prolonged disruption that may occur at CPC in the future.

Any production and/or transportation disruptions of this nature, resulting in a partial or complete shutdown of facilities or reduced flows are likely to have an impact on the revenues of the National Fund and, in turn, could have an adverse effect on the economy of Kazakhstan.

The Escalation of the Israel-United States and Iran war could adversely affect Kazakhstan and the Group

The escalation of hostilities involving Israel, the United States and Iran in 2026, including military actions in and around the Gulf region and the resulting disruption to maritime traffic through the Strait of Hormuz, has had, and may continue to have, a significant disruptive effect on numerous sectors, including energy, food, shipping and financial markets. The conflict has contributed to heightened uncertainty in oil and gas markets, a sharp increase in crude prices, disruptions to petrochemical shipments and broader inflationary pressures. Any continuation, intensification or expansion of the war will likely continue to cause increased market volatility, higher input and transportation costs, supply chain disruptions, tighter financial conditions, food and energy shortages, leading to a global economic downturn. The Strait of Hormuz is a strategically significant transit route for global energy supplies, and recent disruption to traffic through that waterway has highlighted the vulnerability of global trade and commodity flows to geopolitical shocks in the Middle East. Reuters has reported that a prolonged disruption of the Strait of Hormuz could remove approximately 13 to 14 million barrels per day of oil supply from the market, while other reporting indicates that around 20% of global oil and gas transit is ordinarily linked to that corridor. Even if such disruption proves temporary, the uncertainty surrounding access, insurance, vessel routing and safe navigation may continue to affect global pricing and commercial confidence.

Although Kazakhstan is not a party to that conflict, its economy remains exposed to fluctuations in global commodity prices, investor sentiment, inflation and external financing conditions. Kazakhstan is a resource-oriented economy and is sensitive to movements in oil prices and wider global market dislocation. While higher oil prices may in some circumstances support export revenues and fiscal receipts, the broader consequences of a conflict involving the United States and Iran, including shipping disruption, inflationary pressures, volatility in

currency and debt markets and deterioration in global risk appetite, may adversely affect the Kazakhstan economy and, in turn, the Group's business, financial condition, results of operations and prospects.

Any sanctions, export controls, asset freezes, shipping restrictions, financial restrictions or other measures imposed by the US, the UK, the EU or other national or international authorities in connection with the conflict, as well as any countermeasures or retaliatory actions taken by Iran or other regional actors, could further disrupt global trade flows, energy markets and financial systems. Such measures may also increase compliance risks, transaction costs and operational complexity for businesses operating in affected markets or relying on affected trade routes, counterparties, currencies or payment channels. The cumulative effect of such measures could contribute to increased uncertainty in international markets and adversely affect the Group's operating environment.

Furthermore, any prolonged or renewed closure, effective blockade or material restriction of the Strait of Hormuz may lead to further supply chain disruptions, increased freight and insurance costs, shortages of raw materials or energy-related inputs, and additional inflationary pressures in multiple jurisdictions. These developments may adversely affect economic activity, financing conditions, customer demand and investment flows in Kazakhstan and internationally. In addition, heightened geopolitical tensions may contribute to transportation and logistics disruption and broader instability across regional and international markets, all of which could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The Occurrence of Pandemics and Natural Disasters and the Impact of Climate Change may Adversely Impact the Economy of Kazakhstan

The occurrence of pandemics (including but not limited to COVID-19) may adversely impact the economy of Kazakhstan by causing, amongst other things, supply chain disruptions and market volatility.

Natural disasters, including earthquakes and floods, are a threat to the economy of Kazakhstan. Kazakhstan is also increasingly threatened by climate change. A global increase in the mean temperature is likely to lead to changed precipitation patterns, sea level rises and more frequent extreme weather events, such as prolonged droughts and flooding. For example, in April 2024, approximately 117,000 people were reportedly displaced by floods occurring in western and northern parts of the country. The economy of Kazakhstan is dependent on climate-sensitive sectors, such as agriculture, and Kazakhstan has suffered from severe droughts and flooding in the past, which may become more frequent as a result of climate change. Kazakhstan has also publicly acknowledged that Central Asia is warming at approximately twice the global average rate, which may further exacerbate climate-related risks in the country. A change in climate may have several other consequences, including lower agricultural productivity, damage to coastal infrastructure, fragile ecosystems, impact on health and biodiversity, financial market disruption, lower GDP and altered migration patterns.

In an effort to reduce the negative impacts associated with climate change, the Government has incorporated a number of climate change adaptation and mitigation provisions into national legislation. The Environmental Code of the Republic of Kazakhstan No. 400-VI dated 2 January 2021, as amended, includes provisions on adaptation to climate change, which envisages ongoing information gathering and vulnerability assessment, planning, development and implementation of climate change mitigation measures, followed by monitoring and evaluation of the effectiveness of climate change adaptation measures, regular reporting on the impact of climate change on Kazakhstan, and allows for regular adjustment of such measures by the Government. In addition, Kazakhstan has adopted the Strategy for Achieving Carbon Neutrality by 2060 and has been developing a roadmap for its implementation. However, the practical implementation of Kazakhstan's climate adaptation framework remains subject to evolving policy measures and institutional capacity, and there can be no assurance that adaptation and mitigation measures will be implemented effectively or in a timely manner. Expenditures associated with pandemic, natural disaster relief efforts or climate change mitigation efforts may adversely affect Kazakhstan's budgetary position.

Kazakhstan's Banking Sector Remains Weak and Vulnerable to External Shocks

Following the onset of the global financial crisis in 2008, credit growth in Kazakhstan stopped due to the lack of availability of wholesale debt financing, deposits became volatile and property prices decreased significantly. Oil prices declined significantly as well, which had an adverse effect on Kazakhstan's banking sector and the broader economy, as well as the exchange rate of the Tenge. These factors caused significant losses for Kazakhstan's banks and a general destabilisation of Kazakhstan's banking sector. As a result, there was a material deterioration

in the loan portfolio of banks, which, in some cases, continued through 2018. In some banks, the losses were so significant that it led to their insolvency and required the adoption of measures to resolve such insolvencies, including the revocation of their licence and liquidation, the recognition of losses by shareholders and some qualified creditors and Government support measures.

During periods of instability in the financial markets, the Government and the NBK have historically implemented measures to support the liquidity and solvency of banks of Kazakhstan and to increase the availability of credit to businesses, which have been seen as critical for restoring investor confidence and for supporting the economy. For example, in 2017, the Government contributed KZT 2,093 billion to JSC “Fund of Problem Loans” (the “FPL”), which was established in 2012. The FPL focuses on improving the quality of loan portfolios of Kazakhstan’s second-tier banks. It plays a crucial role in the banking system of Kazakhstan as it helps manage and mitigate non-performing loans (loans overdue by more than 90 days) (“NPLs”), ensuring financial stability by acquiring and managing the impaired loans. In November 2020, the FPL purchased a distressed loan portfolio from JSC ATF Bank for KZT 174 billion through the issue and placement of 10-year 9.0% bonds. In August 2021, the FPL carried out a similar transaction by purchasing a distressed loan portfolio from WORLDBUSINESS CAPITAL, INC for KZT 6.5 billion financed through the issue and placement of 5-year 10.0% bonds. However, there can be no assurance that the Government and the NBK will continue to implement such measures or, even if taken, that such measures will succeed in materially improving the liquidity position and financial condition of the affected financial institutions in the future or that such measures will not be implemented selectively.

The low asset quality of banks of Kazakhstan was caused not only by problems among borrowers but also by poor credit practices, including lending and collateral policies and practices. In light of debt restructurings, actual loan quality may be worse than indicated by reported levels of arrears on loans from banking sector, which, according to the NBK, were, 2.3%, 2.5% and 3.3% of total loans for the banking sector as of 31 December 2023, 2024 and 2025, respectively (Source: The NBK, Statistical Bulletin). As a result, the banking sector might need additional financial assistance from the Government, which may be unwilling or unable to provide it. At the same time, loans with low returns and low coverage of provisions remain on the balance sheet of banks, which put pressure on the banks’ capital. Deficiencies in the banking sector of Kazakhstan, combined with a possible deterioration in NPL portfolios held by banks in Kazakhstan, may result in the banking sector being more susceptible to future worldwide credit market downturns and/or economic slowdowns, which could have a material adverse effect on the trading price of the Notes.

The High Level of Concentration in the Banking Sector Elevates the Level of Systemic Risk in the Sector

There is a high level of concentration in the Kazakhstan banking sector. As 31 December 2025, the assets of the 10 largest banks in Kazakhstan accounted for 89% of the total assets of the banking sector. The high level of concentration in the banking sector can significantly elevate systemic risk, making the financial system more vulnerable to shocks and increasing the likelihood of widespread financial instability. Ongoing banking reform and related measures that may facilitate the establishment of foreign bank branches and subsidiaries may mitigate systemic risk to a degree, but the implementation of such measures is ongoing and their impact is not certain.

Continued instability in the financial sector of Kazakhstan and reduced investor confidence caused by any factor, including the downturn of the global economy or volatility of the financial markets, could materially adversely affect the Group’s business, financial condition, results of operations and prospects.

Local Inflationary Pressures have Increased the Prices of Goods and Services, which could Raise the Costs Associated with the Group’s Operations

The Group’s operations are primarily located in Kazakhstan and the majority of its costs are incurred in Kazakhstan. Since the majority of the Group’s expenses is denominated in Tenge, inflationary pressures in Kazakhstan are a significant factor affecting the Group’s expenses. For a variety of reasons, including geopolitical factors, Kazakhstan is facing heightened inflationary pressure, impacting the cost of doing business (in both supply and labour markets). These inflationary pressures have been and could continue to be exacerbated by geopolitical turmoil and economic policy actions, and the duration of such pressures is uncertain. According to the Bureau of National Statistics of Kazakhstan (the “NSB”), the annual inflation rate in 2025, 2024 and 2023 was 12.3%, 8.6%, and 9.8%, respectively. High inflation rates largely reflect the broader regional trend of rising inflation influenced by global economic pressures and will likely be exacerbated by the effects of the US-Israel and Iran war. A period of sustained inflation, coupled with high interest rates, could lead to market instability, new financial crises, a decrease in loan origination, an increase in borrower defaults, reductions in consumer purchasing power and the

erosion of consumer confidence, all of which could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Risks relating to Kazakhstan's Currency Control Law

The Law of Kazakhstan "On Currency Regulation and Currency Control" dated 2 July 2018 (as amended) empowers the Government, by special action and under circumstances when the stability of balance of payments, internal currency market and economic stability of Kazakhstan are seriously threatened, to introduce a set of temporary measures to protect the balance of payments that would (i) require the compulsory sale of foreign currency received by residents of Kazakhstan; (ii) require the placement of a certain portion of funds resulting from currency transactions into a non-interest bearing deposit in an authorised bank or the NBK; (iii) restrict the use of accounts in foreign banks; (iv) limit the volumes, amounts and currency of settlements under currency transactions; and (v) require a special permit from the NBK to conduct currency transactions. Moreover, the Government is authorised to impose other requirements and restrictions on currency transactions when the stability of the balance of payments, internal currency market and the economic stability of Kazakhstan are seriously threatened. In addition, amendments and subordinate regulatory changes effective in 2025 strengthened certain currency-control, monitoring and reporting requirements, including in relation to purchases of non-cash foreign currency.

There can be no assurance that the currency laws and regulations will not be amended further or that any such amendments passed in the future will not materially adversely affect the Group. For instance, any imposition of significant restrictions on the Group's foreign currency dealings could have a material adverse effect on the Group's business, financial condition, results of operations, prospects and ability to make payments on the Notes.

There are Risks of Corruption and Other Business Environment Weaknesses in Kazakhstan

As in many other emerging market jurisdictions, the incidence and perception of elevated levels of corruption remains a significant issue in Kazakhstan, although the climate has improved in this respect in recent years.

Kazakhstan was ranked 96th out of 182 countries in Transparency International's 2025 Corruption Perceptions Index. Kazakhstan's score in the 2025 index was 38, with the index ranking countries from zero (least corrupt) to 100 (most corrupt). Kazakhstan's business climate and competitive indicators are also negatively affected by the need for reform in investor protection arrangements, the cost of establishing a business, the tax system, resolving insolvency and contract enforcement. See "Asset and Liability Management — Anti-Corruption".

Failure to address continued or perceived corruption and governance failures in the public sector and any future allegations, or perceived risk, of corruption in Kazakhstan, could have a material adverse effect upon Kazakhstan's ability to attract foreign investment, which could, in turn, have a material adverse effect on the economy of Kazakhstan and, in turn, a material adverse effect on the Group's business, financial condition, results of operations and prospects.

In January 2017, the National Anti-Corruption Bureau of Kazakhstan arrested a management representative in one of the subsidiaries of the Issuer on corruption charges in connection with alleged bribes and kickbacks from construction companies and other parties in a number of projects of the Issuer's subsidiaries DBK and Baiterek Development JSC. He was subsequently released on parole. There can be no assurance, that any further investigation into these or similar allegations would not result in investigations into the Issuer or any of its subsidiaries or any of their officers or employees.

In light of these risks, the Group continues to monitor developments in governance and regulatory reforms while actively engaging with relevant stakeholders to mitigate the impact of corruption on its operations and on the investment climate in Kazakhstan.

Legislative, Regulatory, Tax and Judicial Risks

Although a large volume of legislation and regulation has been enacted since early 1995 (including new or amended laws and regulations relating to foreign arbitration, foreign investment and foreign currency, additional regulation of the banking sector and other legislation covering such matters as securities exchanges, economic partnerships and companies, and state enterprise reform and privatisation), the legal framework in Kazakhstan

(although one of the most developed among the countries of the former Soviet Union) is still evolving compared to countries with established market economies.

The judicial system, judicial officials and other Government officials in Kazakhstan may not be fully independent of external social, economic and political forces. For example, there have been instances of improper payments being made to public officials. Therefore, court decisions can be difficult to predict, and administrative decisions have on occasion been inconsistent. Kazakhstan is a civil law-based jurisdiction and, as such, judicial precedents have no binding effect on subsequent decisions.

In addition, the legal and tax authorities may make arbitrary judgments and assessments of tax liabilities and challenge previous judgments and tax assessments, thereby rendering it difficult for companies to ascertain whether they are liable for additional taxes, penalties and interest. The new Tax Code No. 214-VIII of the Republic of Kazakhstan of 18 July 2025 came into force on 1 January 2026. Given its recent enactment, there is a degree of uncertainty on how its provisions will be interpreted by the tax authorities and enforced by the courts.

The taxation system in Kazakhstan is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretation by different tax authorities, including opinions with respect to IFRS treatment of revenues, expenses and other items in the consolidated financial statements. Taxes are subject to review and investigation by various levels of authorities, which have the authority to impose severe fines and interest charges. A tax year remains open for review by the tax authorities during the five subsequent calendar years. However, under certain circumstances a tax year may remain open longer. These circumstances may create tax risks in Kazakhstan that are more significant than in other countries. There is no guarantee that future changes in tax legislation will not materially adversely affect the Group's business, financial condition, results of operations and prospects.

Investors in the Notes should be aware that changes to the tax regime, including the withholding tax regime, may lead to the Issuer having the right to redeem the Notes prior to their stated maturity. See “— Kazakhstan's taxation system is subject to frequent change” below for further details on the risks associated with the Kazakh tax system.

The continuous development of Kazakhstan's legislative and regulatory environment may result in further reduced predictability of its legislative and regulatory landscape, which may result in inconsistent interpretations due to the lack of court precedents or guidance from the regulators. Any of these factors could be significant and could have a material adverse effect on the Group's business, financial condition, results of operations and prospects and/or the Noteholders' rights and remedies under the Notes.

Challenges in the Implementation of Economic and Financial Reforms may Mean such Reforms are Delayed or do not happen, which may have a Negative Effect on the Performance of the Economy of Kazakhstan

In order to ensure the sustainable growth of the economy of Kazakhstan, the Government has been implementing a wide range of economic, financial and banking system reforms and reforms of the legal, tax and regulatory environment. The Government has approved policy measures and actions to promote private sector investments, diversify the economy, broaden the tax base and facilitate access to credit to further foster private investment in Kazakhstan by both local and foreign investors. The continued pursuit of Kazakhstan's long-term objectives in these areas, including those contemplated by the Kazakhstan-2050 Strategy, and National Development Plan 2029, will depend on a number of factors, including continued political support in Kazakhstan and across multiple Government ministries, adequate funding, the outcome of policy reviews, improved security, power sector reform, availability of human capital and enhanced coordination between the relevant stakeholders. The economic and other assumptions underlying the objectives set forth in the Kazakhstan-2050 Strategy, National Development Plan 2029, including with respect to oil prices and production, GDP growth, inflation, external debt and the fiscal deficit, may not be met, which would undermine Kazakhstan's ability to achieve its stated objectives. Failure to achieve one or more of the objectives or complete certain reforms or projects set forth in the Kazakhstan-2050 Strategy may render it difficult to achieve other stated objectives, and Kazakhstan's ability to achieve its strategic objectives may be affected by many factors beyond its control. Moreover, some planned reforms may disadvantage certain existing stakeholders, who may seek to curtail such reforms. In addition, the Government has a number of privatisation plans, which may be difficult to achieve without implementing further legislation or active participation from international investors. If the Government is not able to fund or implement the large number of reforms and proposals (including privatisations) currently being proposed, or if there is a delay in such funding or implementation, then the Government may not be able to meet the long-term strategic objectives, which could result in an adverse effect on the economy of Kazakhstan.

Kazakhstan's taxation system is subject to frequent change

Kazakhstan's taxation system is continually evolving and subject to frequent and, at times, ambiguous changes, which could adversely affect the Issuer. Kazakhstan's recently enacted tax legislation, Tax Code No. 214-VIII of the Republic of Kazakhstan dated 18 July 2025, came into force on 1 January 2026 (the "**Tax Code**"). As the Tax Code has not been applied in practice for an extended period of time, there is no precedent or judicial interpretation its practical implementation. Historically, the tax collection system in Kazakhstan has been unpredictable, with changes to tax legislation often occurring on short notice and, in some cases, applied retroactively. Such changes affect not only the rules of tax administration but also other key provisions such as tax base and rate determination. Additionally, Kazakhstan's tax legislation is regularly amended, contributing to tax uncertainties that may have adverse implications for the Issuer. Among other changes, the Tax Code increased the standard VAT rate from 12 per cent. to 16 per cent. and amended VAT rules for certain sectors, and made changes to the scope of VAT exemptions.

The application and interpretation of tax regulations in Kazakhstan vary across and within government bodies. This inconsistency increases uncertainty and tax risks, potentially leading to enforcement challenges. Official explanations and court decisions are often unclear or contradictory, while written clarifications issued by the Kazakhstan tax authorities are not legally binding and may not be considered during dispute resolution. Moreover, tax authorities occasionally revise their positions on specific provisions, adding to the unpredictability.

Due to the ambiguity of certain provisions in Kazakhstan's tax legislation, the complexity of tax matters, and inconsistent practices among tax authorities and courts, taxpayers and authorities may interpret the same provisions in a different way. Therefore, taxation in Kazakhstan remains unclear and inconsistent in some cases, increasing the risk of additional tax assessments and liabilities. These uncertainties could materially and adversely affect, inter alia, the Issuer's business, results of operations, financial condition or prospects.

References to the IFRS in the Tax Code could result in adverse tax assessment for the Issuer

A significant part of the Tax Code contains direct links to the IFRS, which makes the IFRS an important and considerable factor within Kazakhstan's tax system. Given that the IFRS are built on the "substance over form" principle, the application of certain principles and methods of the IFRS is a matter of professional judgment, which may result in tax disputes between the Issuer and the Kazakhstan tax authorities. During tax audits, the Kazakhstan tax authorities sometimes interpret the IFRS in a way that could differ from professional judgment of financial reporting specialists and/or auditors. In addition, the Kazakhstan tax authorities issue letters where they give their own interpretation of the IFRS which does not take into account all aspects of application of the IFRS.

The application of the IFRS in the taxation system of Kazakhstan entails a risk of ambiguous or inconsistent interpretation and may therefore lead to additional, and potentially material, tax assessments on Issuer. Such tax assessments could have a material adverse effect on, inter alia, the Issuer's business, results of operations, financial condition or prospects.

C. FACTORS THAT ARE MATERIAL FOR ASSESSING THE MARKET RISKS ASSOCIATED WITH NOTES ISSUED UNDER THE PROGRAMME

Enforceability of Judgments

Kazakhstan's courts will not enforce any judgment of a court established in a country other than Kazakhstan unless: (i) there is in effect a treaty between such country and Kazakhstan providing for reciprocal enforcement of judgments and then only in accordance with the terms of such treaty; or (ii) there is a proved reciprocity in enforcement of judgments of Kazakhstan courts in that country, which can be very hard or impossible to prove. There is no such treaty in effect between Kazakhstan and the United Kingdom. However, each of Kazakhstan and the United Kingdom are parties to the 1958 New York Convention on Recognition and Enforcement of Arbitral Awards and, accordingly, an arbitration award should be recognised and enforceable in Kazakhstan provided the conditions of enforcement set out in such Convention and applicable Kazakhstan laws are met. See "Enforcement of Foreign Judgments".

On 8 April 2016, the Arbitration Law was signed by the President of Kazakhstan. Whilst the introductory language to the Arbitration Law, as well as other provisions of this law, imply that the Arbitration Law should only apply where the matter involves dispute resolution in Kazakhstan (i.e., in respect of arbitration bodies with a seat in

Kazakhstan) and should not apply to foreign arbitration such as the LCIA with a seat outside of Kazakhstan. In particular, the preamble to the Arbitration Law states that: given that there is no well-developed practice in Kazakhstan on the application of the Arbitration Law, there can be no assurance that Kazakhstan courts would support the interpretation of the Arbitration Law set out in “Enforcement of Civil Liabilities” and that an award against the Issuer in arbitral proceedings in London under English law would be enforced in Kazakhstan. If the Arbitration Law applies to disputes under the Notes and the Trust Deed, there is a risk that an LCIA award in a proceeding related to the Notes and the Trust Deed may not be recognised and enforced in Kazakhstan as being contrary to Kazakhstan public order and/or a dispute under the Notes and the Trust Deed cannot be resolved by arbitration. Furthermore, an event of default could occur under the Notes and the Trust Deed to the extent that the Issuer’s obligations under the Notes and/or the Trust Deed to settle disputes by arbitration in the LCIA and/or under English law become illegal or unenforceable.

The Notes will be structurally subordinated to the claims of creditors of the Issuer’s portfolio companies and joint ventures

The Issuer’s subsidiaries and joint ventures have incurred indebtedness, and in the future will continue to incur indebtedness, in order to finance their operations. A significant proportion of the Group’s indebtedness has been incurred by the Issuer’s subsidiaries and joint ventures. In the event of the insolvency of any of the subsidiaries or joint ventures of the Issuer, claims of secured and unsecured creditors of such entity, including trade creditors, banks and other lenders, will have priority with respect to the assets of such entity over any claims that the Issuer or the creditors of the Issuer, as applicable, may have with respect to such assets. Accordingly, if the Issuer became insolvent at the same time, claims of the Noteholders against the Issuer in respect of any Notes issued under the Programme would be structurally subordinated to the claims of all such creditors of the Issuer’s subsidiaries and joint ventures. The Terms and Conditions of the Notes do not restrict the amount of indebtedness that the Group may incur, including indebtedness of subsidiaries and joint ventures.

Absence of Trading Market for the Notes

Notes issued under the Programme will have no established trading market when issued, and no such market may develop. If a market does develop, it may not be liquid at times or at all. Therefore, investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This is particularly the case for Notes that are especially sensitive to interest rate, currency or market risks, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. These types of Notes generally would have a more limited secondary market and more price volatility than conventional debt securities. Illiquidity may have a severely adverse effect on the market value of Notes.

Application has been made for the admission of the Programme and/or the listing of any Series of Notes for trading on the Vienna MTF. In addition, unless otherwise agreed with the relevant Dealer and provided for in the Pricing Supplement, the Issuer will cause all Notes issued by the Issuer under the Programme to be admitted to the “Bonds” category of the “Debt Securities” sector of the “Main” platform of the official list of the KASE. The liquidity of any market for the Notes will depend on the number of holders of the Notes, the interest of securities dealers in making a market in the Notes and may be affected by political, economic, social and other developments both in Kazakhstan and in other emerging markets. Accordingly, there can be no assurance as to the development or liquidity of any market for the Notes.

The Notes may not be a suitable investment for all investors seeking exposure to “development finance” assets

There is currently no market consensus on what precise attributes are required for a particular project or financing to be defined as “development”, and, therefore, no assurance can be provided to investors that Notes to be issued under the Programme and the use of proceeds by the Issuer or any development impact projects will satisfy, whether in whole or in part, any expectations or requirements of any investor or any present or future expectations or requirements with respect to development finance. Neither the Issuer nor the Development Finance Structuring Agent makes any representations or assurances as to whether (and are not responsible for ensuring that) (a) the characterisation of the Notes to be issued under the Programme as development finance or the level of its expected development intensity rating impact will (i) conform with any investor’s definition of development finance, (ii) meet any investor’s criteria and expectations with regard to developmental impact, or (iii) conform with the characterisation or definitions used by any other development finance institution in the public or private sectors or (b) the proceeds of the Notes will in fact be used for eligible development finance projects. Notes to be issued

under the Programme will not constitute Green or Social Bonds for purposes of the International Capital Markets Association's Green Bond Principles or Social Bond Principles. Each potential purchaser of Notes should determine for itself the relevance of the information contained in this Base Offering Memorandum regarding the use of proceeds, and its purchase of Notes should be based upon such investigation as it deems necessary.

In addition, although the proceeds from the issue of Notes under the Programme are expected to enable the development finance initiatives described in the section "Sustainable Development Impact" in this Base Offering Memorandum, it will not be an event of default under the Conditions of the Notes if the Issuer fails to comply with such development finance initiatives.

Furthermore, there can be no assurance that the projects or financings defined as "development" will be capable of being implemented in or substantially in such a manner and/or accordance with any timing schedule and that accordingly such proceeds will be totally or partially disbursed for such projects. Nor can there be any assurance that such projects will be completed within any specified period or at all or with the results or outcome (whether or not related to the environment) as originally expected or anticipated by the Issuer. Any such event or failure by the Issuer will not constitute an event of default under the Conditions.

Structure of a Particular Issue of Notes

A wide range of Notes may be issued under the Programme. Certain Notes may have features, which contain particular risks for potential investors.

Set out below is a description of the most common of such features:

Notes Subject to Optional Redemption by the Issuer

If an optional redemption feature is included in a Series of Notes, it is likely to limit their market value. During any period when the Issuer may elect to redeem such Notes, the market value of those Notes will generally not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

The Issuer may be expected to redeem Notes when its cost of borrowing is lower than the interest rate on the Notes. At those times, an investor will generally not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

Variable Rate Notes

Notes with variable interest rates can be volatile investments. If Notes are structured to include multipliers or other leverage factors, caps or floors or any combination of those features or other similar related features, the market value of such Notes may be even more volatile than those for securities that do not include those features.

Floating Rate Notes

The Programme allows for the issuance of floating rate Notes where the Reference Rate (as defined in the Terms and Conditions of the Notes) may be EURIBOR. Reference rates and indices, including interest rate benchmarks such as EURIBOR, which are used to determine the amounts payable under financial instruments or the value of such financial instruments ("**Benchmarks**") have, in recent years, been the subject of political and regulatory scrutiny as to how they are created and operated. This has resulted in regulatory reform and changes to existing Benchmarks, with further changes anticipated. These reforms and changes may cause a Benchmark to perform differently than it has done in the past or to be discontinued. Any change in the performance of a Benchmark or its discontinuation, could have a material adverse effect on the Notes referencing or linked to such Benchmark.

Notes Issued at a Substantial Discount or Premium

The market values of securities issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

Noteholder Meetings Provisions

The Terms and Conditions of the Notes contain provisions for calling meetings of Noteholders to consider matters affecting their interests generally. These provisions permit defined percentages of Noteholders voting in favour to bind all Noteholders including Noteholders who did not attend and vote at the relevant meeting and Noteholders who voted in a contrary manner.

Trading in the Clearing Systems

The Terms and Conditions of the Notes provide that Notes shall be issued with a minimum denomination of €100,000 (or at least its equivalent in another currency) and in amounts, in excess thereof, which are integral multiples of an amount of the relevant Specified Currency, as specified in the applicable Pricing Supplement (the “**Specified Currency**”). Where Notes are traded in a clearing system, it is possible that processing of trades in the clearing systems may result in amounts being held in denominations smaller than the minimum denominations specified in the relevant Pricing Supplement related to an issue of Notes. If Definitive Notes are required to be issued in relation to such Notes in accordance with the provisions of the terms of the relevant Global Notes, a holder who does not have an integral multiple of the minimum denomination in its account with the relevant clearing system at the relevant time may not receive all of its entitlement in the form of Definitive Notes unless and until such time as its holding becomes an integral multiple of the minimum denomination. Holdings of less than a minimum denomination, or integral multiple thereof, may also be less liquid and there may be difficulties in trading such holdings.

Volatility of the Trading Price of the Notes

In recent years stock markets have experienced significant price fluctuations. These fluctuations often were unrelated to the operating performance of the companies whose securities are traded on such stock markets. Market fluctuations as well as adverse economic conditions have negatively affected the market price of many securities and may affect the market price of the Notes.

In particular, the markets for securities bearing emerging market risks, such as risks relating to Kazakhstan, may be volatile. Markets for such securities are, to varying degrees, influenced by economic and securities market conditions in other emerging market countries. Although economic conditions are different in each country, investors’ reactions to developments in one country may affect securities of issuers in other countries, including Kazakhstan. In 2008, the global markets experienced significant financial turmoil that had a ripple effect on other emerging markets. These events caused significant volatility in prices of emerging market debt. Events may occur which would cause significant volatility of the sort which occurred in worldwide financial markets in 1997 and 1998. Any such volatility may adversely affect the liquidity of the market for, or price of, the Notes.

Exchange Rate Risks and Exchange Controls

The Issuer is obliged to pay principal and interest on the Notes in the relevant Specified Currency. This presents certain risks relating to currency conversions if an investor’s financial activities are denominated principally in a currency or currency unit (the “**Investor’s Currency**”) other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor’s Currency) and the risk that authorities with jurisdiction over the Specified Currency or the Investor’s Currency may impose or modify exchange controls. An appreciation in the value of the Investor’s Currency relative to the Specified Currency would decrease equivalent in the Investor’s Currency of the yield on the Notes, the principal payable on the Notes and the market value of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

Interest Rate Risks

Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes.

Credit Ratings

One or more independent credit rating agencies may assign credit ratings to Notes. The ratings may not reflect the potential impact of all risks related to the structure, market, additional factors discussed above or other factors that may affect the value of Notes. A credit rating is not a recommendation to buy, sell, or hold securities and may be revised or withdrawn by the rating agency at any time.

The holders of Notes may not be able to enjoy tax exemptions for agency bonds in case the Issuer loses its status of a financial agency

Holders of the Notes may lose eligibility for tax benefits applicable to agency bonds if the Issuer loses its status as a financial agency.

The Issuer, as a national management holding, qualifies as a financial agency in accordance with Budget Code No. 171-VIII of the Republic of Kazakhstan, dated 15 March 2025 (with all amendments to be in force on or before 31 August 2025). Under Kazakhstan legislation, securities issued by financial agencies are classified as agency bonds and are subject to specific tax treatment.

According to Kazakhstan tax legislation, interest income earned on agency bonds and any gains arising from their sale should not be subject to taxation for both resident and non-resident noteholders.

However, these tax exemptions are contingent upon the Issuer's continued classification as a national management holding and, consequently, as a financial agency. If the Issuer ceases to qualify as a national management holding, the Notes may no longer benefit from these tax exemptions, which could result in additional tax liabilities for noteholders if the alternative benefits for the listed Notes cannot be applied.

CAPITALISATION

The following table sets forth the consolidated capitalisation and long-term indebtedness of the Issuer as of 31 December 2025. This table should be read in conjunction with “Selected Financial Information and Other Data” and “Management’s Discussion and Analysis of Results of Operations and Financial Condition” and the Financial Statements including the notes thereto, included elsewhere in this Base Offering Memorandum.

	As of 31 December 2025	
	<i>(KZT millions)</i>	<i>(U.S.\$ millions)⁽²⁾</i>
<i>Long-term debt⁽¹⁾⁽³⁾</i>		
Customer accounts	2,957,605	5,851
Debt securities issued	6,352,529	12,566
Subordinated debt	9,960	20
Loans from banks and other financial institutions	1,924,898	3,808
Loans from the Government of the Republic of Kazakhstan	698,573	1,382
Other financial liabilities	63,975	127
Total long-term debt	12,007,540	23,752
<i>Equity</i>		-
Share capital	1,568,039	3,102
Fair value reserve (investment securities)	(24,523)	(49)
Business combination reserve and additional paid-in-capital	594,393	1,176
Hedging reserve	1,450	3
Other reserves	59,681	118
Retained earnings	1,375,699	2,721
Total equity	3,574,739	7,071
Total equity and long-term debt	15,582,278	30,824

Note:

- (1) Carrying amount of long-term debt.
- (2) For convenience, these figures have been translated into U.S. dollars at the KZT/U.S.\$ market exchange rate quoted on the KASE, as reported by the NBK, as of 1 January 2026, which was KZT 505.53 per U.S.\$1.00. There can be no assurance that these Tenge amounts could have been converted into U.S. Dollars at this rate or any other rate.
- (3) Indebtedness is classified as long-term if its remaining maturity is not less than one year as of the reporting date.

Since 31 December 2025 there has been no material adverse change in the capitalisation or long-term debt of the Group.

SELECTED FINANCIAL INFORMATION AND OTHER DATA

The audited selected consolidated financial information for the Group presented below as of and for the years ended 31 December 2023, 2024 and 2025 has been derived from, should be read in conjunction with, and is qualified in its entirety by, the Financial Statements, including the notes thereto, included elsewhere in this Base Offering Memorandum.

Prospective investors should read the selected consolidated financial information in conjunction with the information contained under the headings “Risk Factors”, “Capitalisation”, “Management’s Discussion and Analysis of Results of Operations and Financial Condition”, and “Business of the Group”, as well as the Financial Statements, including the notes thereto, included elsewhere in this Base Offering Memorandum.

Note:

- (1) For convenience, these figures have been translated into U.S. dollars at the KZT/U.S.\$ market exchange rate quoted on the KASE as reported by the NBK, as of 1 January 2026, which was KZT 505.53 per U.S.\$1.00. There can be no assurance that these Tenge amounts could have been converted into U.S. dollars at this rate or any other rate.

Selected Financial Ratios

The table below sets forth the Group's selected financial ratios as of, and for the years ended, 31 December 2023, 2024 and 2025:

	As of and for the year		
	2023	2024	2025
Profitability Ratios	(% unless otherwise indicated)		
Assets			
Return on average equity ⁽¹⁾	17.1	14.4	12.5
Return on average assets ⁽²⁾	3.2	2.9	2.4
Balance Sheet Ratio			
Debt/equity ⁽³⁾	3.0	3.2	3.8

Notes:

- (1) Return on average equity is profit for the year divided by average total equity. Average total equity was calculated using opening and closing balances for each year.
- (2) Return on average assets is profit for the year divided by average total assets. Average total assets are calculated based on opening and closing balances for each relevant year.
- (3) Debt/equity is the Issuer's debt divided by total equity. The Issuer's debt includes due to banks, customer accounts, debt securities issued, subordinated debt, loans from banks and other financial institutions and loans from the Government of the Republic of Kazakhstan.

Key Performance Indicators

Key performance indicators ("KPIs") of the Group are a set of indicators that determine the level of achievement of the strategic goals and objectives of the Group.

The following table sets forth planned and actual KPIs of the Group as of or for the years ended 31 December 2023, 2024, and 2025:

Indicator	Planned KPI for 2023	Actual (achieved) KPI for 2023	Planned KPI for 2024	Actual (achieved) KPI for 2024	Planned KPI for 2025	Actual (achieved) KPI for 2025 ⁽²⁾
Portion of loan and investment portfolios of the total assets of the Group, in % ⁽¹⁾	71.8	73.1 ⁽¹⁾	73.0	74.13	74.17	75.59
Portion of non-state borrowing facilities in the overall borrowing structure for the reporting year, in %	70.0	84.1	-	-	52	60.58
Customer satisfaction, in %.	87.0	89.8	-	89.8	89	89
Amount of revenues of enterprises supported by the Group (for the year), in billion Tenge	9,413.2	15,602.06	14,687.02	29,620.90	19,277.61	-
Amount of export revenues of enterprises supported by the Group (for the year) in billion Tenge	1,464.3	2,160.95	1,903.15	2,436.19	2,098.63	2,741.69
Ratio of MSME businesses provided with financial support to the total number of MSME businesses operating in the market, in %	-	-	1	1.67	2.46	-
Amount of investments in capital assets in the AIC industry (for the year), in billion Tenge:	325.46	361.82	337.20	386.56	418.7	428.17
To increase the portion of loans for the primary housing and houses under construction, in %	-	-	26.4	41.56	33.91	34.62
Portion of persons on the waiting list, who have been provided with housing (as accumulated since 2024), in %	-	-	1.1	2.3	0.88	1.39
To increase the share of equity financing	-	-	-	-	10	-
The volume of housing commissioning (multi-family residential buildings) due to housing and communal services instruments (per year)	-	-	-	-	1844.73	2,969.30

Note:

- (1) In 2023, the “Portion of loan and investment portfolios in the total assets of the Issuer” item was not complied with because of a failure to achieve the target loan and investment portfolios (the deviation was 5.8%). The loan portfolio was missed by 7.6% (the loan portfolio was KZT 8,836 billion versus the target of KZT 9,561 billion) as the loans had not been fully issued due to major off-schedule loan repayments and a change in the fair market value for the investment projects. The investment portfolio plan implementation rate was 110.7% (the investment portfolio was KZT 1,118 billion).
- (2) KPIs for 2025 are forecasts, based on the information as of 16 April 2026. The final KPIs are expected to be available in mid-May 2026

MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

The following management's discussion and analysis is intended to assist in the understanding and assessment of the trends and significant changes in the Group's results of operations and financial condition. The selected financial and operating data set forth below, subject to rounding, has been extracted without material adjustment from the Financial Statements. Such data, together with the related discussion and analysis, should be read in conjunction with, and is qualified in its entirety by reference to, the Financial Statements, including the notes thereto, included elsewhere in this Base Offering Memorandum. Unless otherwise indicated, all figures are expressed in or derived from amounts in Tenge. The Financial Statements are consolidated and reflect the results of operations of the Issuer and its subsidiaries (the "Group"). The Group prepares its Financial Statements in accordance with IFRS. This management's discussion and analysis contains forward-looking statements, which involve risks and uncertainties. See "Forward-Looking Statements". The Group's actual results could differ materially from those anticipated in the forward-looking statements contained herein for several reasons, including those set forth under "Risk Factors" and elsewhere in this Base Offering Memorandum. This discussion, insofar as it refers to average amounts, has, unless otherwise stated, been based upon annual opening and closing balances. See "Presentation of Financial and Other Information".

Overview

The Issuer is a holding company established in May 2013 to grow Kazakhstan's development institutions and to develop the national economy. The Issuer's overall mission is to support the sustainable economic development of Kazakhstan in order to implement state policy and achieve the goals set by the Kazakhstan-2050 Strategy. The sole shareholder of the Issuer is the Government represented by the Ministry of National Economy.

The Issuer currently has seven wholly-owned subsidiaries that work to implement Government policy and programmes. The subsidiaries are involved in the following core areas of activity:

- (i) providing financial (e.g., credit and investment) and non-financial support to investment projects in priority sectors of the economy with the aim of diversifying the economy, developing the secondary sector,
- (ii) exporting products produced in Kazakhstan, increasing innovation and supporting SMEs - these activities are carried out through the Issuer's subsidiaries DBK, ECA, Damu and QIC;
- (iii) raising capital, providing long-term financing for mortgages, reducing related borrowing costs and participating in the implementation of a state housing construction policy - these activities are carried out through the Issuer's subsidiaries Otbas Bank and KHC; and
- (iv) promoting the sustainable development of, and providing technical equipment to, the agro-industrial sector of Kazakhstan - these activities are carried out through the Issuer's subsidiary ACC.

As of 31 December 2023, 2024 and 2025, the Issuer had consolidated total assets of KZT 13,620,420 million, KZT 14,438,237 million, and KZT 19,047,637 million, respectively, with consolidated total equity of KZT 2,665,505 million, KZT 3,001,622 million, and KZT 3,574,739 million respectively. The Issuer generated KZT 407,647 million of consolidated net profit for the year ended 31 December 2023 (including KZT 406,719 million of net profit from continuing operations), KZT 408,220 million of consolidated net profit for the year ended 31 December 2024 (including KZT 417,773 million of net profit from continuing operations), and KZT 409,869 million of both consolidated net profit and profit from continuing operations for the year ended 31 December 2025.

Key Factors Affecting the Group's Results of Operations

The Group's results of operations are primarily dependent on the results and contributions of its seven subsidiaries. Significant factors that affect results of operations of the Group's subsidiaries are most likely to have impact on the Group's results of operations. The Group's management believes that the following factors significantly affected, and will have a significant impact on, its results of operations.

The Group's Role as an Integrated Development Institution

The Group is an integrated development institution that was created to promote the high-quality development of the economy of Kazakhstan by providing support to the non-extractive sectors of the economy and that is wholly-owned by the Government. The Issuer has seven direct subsidiaries, the activities of which are aimed at developing the agro-industrial complex, supporting businesses, including small and medium sized enterprises and ensuring the affordability of housing for the population. Accordingly, the Group's lending and investment policies are different from those of standard commercial banks, insurance companies or investment companies in that the Group's business activities are generally driven by economic and social policies in Kazakhstan as a whole rather than purely commercial considerations. As a development institution, the Group does not compete with commercial lending and financial institutions in providing finance to customers and has declined lending opportunities in the past where financing was available elsewhere. In addition, the Group's banking subsidiaries, other than Otbasy Bank, which accepts housing-related deposits, do not generally accept customer deposits. Therefore, the Group's most significant funding source is the issuance of debt securities. Loans from international banks and international and multilateral institutions and concessional loans made by the Government also constitute significant funding sources for the Group. The Group concentrates on providing funding, among other things, to Kazakhstan's agro-industrial complex and investment projects, such as infrastructure projects and high-value manufacturing projects in Kazakhstan, which are not typically eligible for financing or refinancing on terms acceptable to commercial banks and other non-specialist market investors. Loans and investments made by the subsidiaries of the Issuer often involve relatively large principal amounts, have longer-term maturities and are extended at preferential rates, all of which make these activities of relatively high risk and low return. In general, the subsidiaries of the Issuer set interest rates by reference to their respective cost of funding a particular loan plus a margin reflecting their respective administrative costs and risk premiums.

The Economic Environment in Kazakhstan

The economy of Kazakhstan has seen sustained high levels of growth since 2022, with growth rates reaching 5.1% in 2023, 4.8% in 2024 and 6.5% in 2025, in each case, primarily driven by increased and strong performance in construction, transportation, trade as well as in the mining and manufacturing industries (Source: <https://nationalbank.kz/en/news/press-relezy/18296>). While inflationary pressures over the period (with inflation rates of 9.8% in 2023, 8.6% in 2024 and 12.3% in 2025) have had some impact on the Group's costs and those of its customers, the Group's overall performance over the period was not substantially affected given the financial nature of its business.

In February 2022, the Tenge sharply depreciated against major foreign currencies following the outbreak of the armed conflict in Ukraine and, in response, the NBK intervened heavily in the foreign exchange market. In 2023, the Tenge appreciated 0.9% against the U.S. dollar and depreciated 1.8% against the euro. In 2024, the Tenge depreciated 15.2% against the U.S. dollar and 8.8% against the euro. In 2025, the Tenge appreciated 3.7% against the U.S. dollar and depreciated 8.5% against the euro. While the depreciation of the Tenge over the period increased certain costs of the Group such as its foreign currency debt servicing, the majority of the Group's costs and revenues are Tenge-denominated and so the overall impact was generally neutral.

Following several increases to the base rate in 2022 and 2023, in February 2024, the NBK lowered the base rate to 14.75% but in November 2024, the NBK increased the base rate again to 15.25% and, in 2025, it further increased the base rate to 18%. While the trend of increasing base rates since 2022 has had some impact on the Group's cost of funding in Tenge, these were generally offset by an increase in interest income.

Shifts in Composition of Borrowers and Funding Sources

The Group's lending activities and business can be both positively and negatively affected by shifts in the composition of its borrowers and funding sources. In general, as a result of the borrower concentration and relatively large size of individual loans within the corporate loan portfolio, the breakdown of loans granted to customers in different economic sectors can fluctuate significantly as a result of a single loan being made or a single loan being repaid in a given year. Such fluctuations in loans to customers by economic sector, for the most part, occur in the ordinary course of the Group's business.

As a percentage of total gross loans to customers measured at amortised cost and total loans measured at fair value through profit or loss, as of 31 December 2025 as compared to 31 December 2024, mortgage loans to retail customers decreased to 46.7% from 49.2%, while the total amount of mortgage loans to retail customers for those

same periods increased by 16%, or KZT 532,231 million, to KZT 3,958,103 million as of 31 December 2025 from KZT 3,425,872 million as of 31 December 2024. As a percentage of total gross loans to customers measured at amortised cost and total loans measured at fair value through profit or loss, as of 31 December 2025 as compared to 31 December 2024, loans to customers in mining, metallurgical and mineral resources industries decreased to 14.9% from 15.4%, loans to customers in construction industry increased to 6.4% from 3.2% and loans to customers in the oil and gas industry decreased to 3.7% from 4.6%.

As a percentage of total gross loans to customers measured at amortised cost and total loans measured at fair value through profit or loss, as of 31 December 2024 as compared to 31 December 2023, mortgage loans to retail customers decreased to 49.2% from 51.8% although the amount of mortgage loans increased by 8.6%, or KZT 271,287 million, to KZT 3,425,872 million as of 31 December 2024 from KZT 3,154,584 million as of 31 December 2023.

As a percentage of total gross loans to customers measured at amortised cost and total loans measured at fair value through profit or loss, as of 31 December 2024 as compared to 31 December 2023, loans to customers in mining, metallurgical and mineral resources industries increased to 15.4% from 13.4%, loans to customers in construction industry increased to 3.2% from 0.7% and loans to customers in the oil and gas industry decreased to 4.6% from 6.2%.

Changes in policy in respect of the Group's lending and funding strategies, can result in changes to the composition of its borrowers and funding sources. Such shifts have in the past had, and may continue in the future to have, a positive effect of increasing the size of the loan portfolio, thereby helping the Group to further grow its business. Such changes can also, however, result in an increased cost of risk of impairment, thereby adversely affecting profitability.

As part of its funding strategy, the Group also aims to diversify its funding sources by attracting funds from non-Governmental sources, while also maintaining its focus on cost control. Any concentration in new sources of funding will increase the Group's exposure to political and economic conditions in the resident country of the lender, which could have both positive and negative effects on the rates and level of funding available to the Group.

Fluctuations in Interest Rates

Interest rates are sensitive to many factors beyond the Group's control, including the policies of central banks, such as the NBK (the central bank of Kazakhstan), adverse domestic and international economic conditions and political factors.

The Group is exposed to risks resulting from mismatches between the interest rates on its interest-bearing liabilities and interest-earning assets. To the extent that part of the Group's assets may reprice more frequently than its liabilities, if interest rates fall, the Group's interest expense will decrease more slowly than its interest income, which could negatively affect interest margins. As a measure to manage the risk of mismatches in interest rates, which is inherent in operations of the Issuer's subsidiaries, the Government grants loans to certain subsidiaries of the Issuer with low interest rates to ensure that such subsidiaries are able to sustain margins in a falling interest rate environment through the interest income generated by such loans. In addition, subsidiaries of the Issuer seek to structure their respective assets with floating interest rates and their respective overall balance sheets in such a way that a fixed portion of their respective interest income from assets with floating rates covers possible fluctuations in interest rate, resulting in an acceptable balance between interest-bearing liabilities and interest-earning assets. In particular, banking subsidiaries of the Issuer seek to pass on interest rate risks to borrowers by on-lending under similar conditions. Interest rate management policies of the banking subsidiaries of the Issuer are strengthened by a system of limits and reporting requirements to control and monitor interest rate risk.

Although nearly all of the Group's assets are match-funded, an increase in interest rates may generally raise the Group's funding costs and may also increase interest income in the future, but overall demand for new loans may be reduced and the risk of customer defaults may increase. Increased interest rates may also generally decrease the market value of fixed-rate debt securities held by the Group.

Fluctuations in Exchange Rates

Fluctuations in exchange rates impact the Group's financial condition and results of operations. the Issuer's subsidiaries maintain open foreign currency positions, which give rise to foreign exchange rate risk. The Group's exposure to exchange rate risk may increase, particularly as it continues to access international capital markets. A significant portion of Group's exposure to foreign exchange rate risk also depends on numerous factors beyond its control, such as overall market trading activity, fluctuations in interest rate levels and exchange rates, Government actions and general market volatility.

The Group is also subject to foreign currency risk as a portion of its borrowings and debt securities are denominated in U.S. dollars and, in the past, has been adversely affected by past devaluations of the Tenge, including devaluations by the NBK, and their impact on the Tenge-value of loans and balances from banks and other financial institutions, as well as U.S. dollar-denominated debt securities. As of 31 December 2025, 23.9% of the Group's debt securities issued were denominated in U.S. dollars. Accordingly, while the Group takes measures to naturally hedge its foreign currency risk by undertaking U.S. dollar-denominated borrowings only for certain projects that have corresponding hard currency revenues, and the Group has increased its Tenge-denominated borrowings in recent years, any future devaluation of the Tenge against the U.S. dollar may have an adverse effect on the Group.

The following table sets forth the year end, average and low and high KZT/U.S.\$ exchange rates quoted on the KASE, as reported by the NBK (after rounding adjustment) for the years indicated:

Period	Year end ⁽¹⁾	Average ⁽²⁾	High	Low
Year ended 31 December 2023	454.56	456.31	482.77	431.08
Year ended 31 December 2024.....	525.11	469.44	525.11	439.40
Year ended 31 December 2025.....	505.53	521.59	549.15	488.53

Notes:

- (1) Data for the year end is taken from the website of the NBK (<https://nationalbank.kz/en/exchangerates/ezhednevnye-oficialnye-rynochnye-kursy-valyut>) for the 1 January of the next year. This is because the weighted average exchange rate of Tenge against U.S. dollar fixed on the KASE as of 15:30 Astana time is set as an official exchange rate of the national currency Tenge against U.S. dollar for the next day after the trading day.
- (2) The average exchange rate for the year is calculated as the arithmetic average for the working days of the year. Source: The NBK, "Official Foreign Exchange Rates on average for the period" (<https://nationalbank.kz/en/news/oficialnye-kursy>).

Operating Segments

For management purposes, the Group is organised into strategic business units (operating segments) which offer different products and services, and are managed separately because they require different technology and strategies. For each of the strategic business units, the Chairman of the Management Board, reviews internal management reports on at least a quarterly basis. The following summary describes the division of operations based on the operating segments.

- Strategical management (the Issuer);
- Affordable housing (Otbasy Bank and KHC);
- Large business support (DBK);
- Agro-industrial complex support (ACC);
- SME support and development (Damu);
- Investments development (QIC); and
- Export insurance (ECA).

See "— Selected Financial Information and Other Data" for information on the profit and loss, assets and liabilities of the operating segments of the Group.

Recent Developments

In February 2026, the receivables from the Government of the Republic of Kazakhstan for reimbursement of premium on customer accounts in the amount of KZT 15,000 million has been repaid.

In March 2026:

- The Group issued bonds in the amount of KZT 50,000 million, with an interest rate of 17.00% per annum and a maturity of 1 year;
- The Group issued bonds in the amount of KZT 50,000 million, with an interest rate of 17.50% per annum and a maturity of 5 years;
- The Group issued bonds in the amount of KZT 50,000 million, with an interest rate of 17.50% per annum and a maturity of 5 years; and
- The Group redeemed Eurobonds with a nominal value of U.S.\$97,416,000.

In April 2026

- The Ministry of Finance made a contribution to the share capital of the Group in the amount of KZT 50,000 million;
- The Group redeemed debt securities issued in the amount of KZT 100,000 million;
- The Group placed Eurobonds in a private placement in the amount of KZT 150,000 million, with an interest rate of 16.95% per annum and a maturity of 3 years; and
- The Group placed Eurobonds in a private placement in the amount of KZT 100,000 million, with an interest rate of 16.95% per annum and a maturity of 5 years.

Results of Operations for the Years Ended 31 December 2023, 2024 and 2025

The following table presents the Group's consolidated statement of profit or loss data for the years ended 31 December 2023, 2024 and 2025:

	Financial year ended 31 December			Increase / (Decrease)	
	2023	2024	2025	2023 vs 2024	2024 vs 2025

(Loss)/profit from a disposal group classified as held-for-sale (net of income tax)	928	(9,553)	-	n/a	n/a
Profit for the year.....	407,647	408,220	409,869	0.1	0.4

The following discussion of the Group's results of operations for the years ended 31 December 2023, 2024 and 2025 focuses on the most significant changes between the years, which include (i) net interest income, (ii) interest income calculated using the effective interest method, (iii) other interest income, (iv) interest expense, (v) impairment allowance for loan portfolio and finance lease receivables, (vi) net non-interest income/(expense), (vii) administrative expenses, (viii) income tax expense and (ix) (loss)/profit from a disposal group classified as held-for-sale (net of income tax).

Net Interest Income

The following table sets forth the principal components of the Group's net interest income for the years ended 31 December 2023, 2024 and 2025:

	Financial year ended 31 December			Increase / (Decrease)	
	2023	2024	2025	2023 vs 2024	2024 vs 2025
	(KZT millions)			%	
Interest income calculated using the effective interest method.....	970,388	1,064,655	1,344,930	9.7	26.3
Other interest income.....	170,424	220,979	267,124	29.7	20.9
Interest expense	(588,405)	(668,893)	(825,551)	13.7	23.4
Net interest income	552,407	616,741	786,503	11.6	27.5

The Group's net interest income increased by 27.5%, or KZT 169,762 million, from KZT 616,741 million in 2024 to KZT 786,503 million in 2025. The increase in net interest income in 2025 as compared to 2024 was due to increases in both interest income calculated using the effective interest method and other interest income (as discussed below), which were only partially offset by the increase in interest expense. In absolute terms, the increase in interest income calculated using the effective interest method in 2025 as compared to 2024 (by KZT 280,275 million) was significantly larger than the increase in other interest income in 2025 as compared to 2024 (by KZT 46,145 million), and the rate of increase in interest income calculated using the effective interest method in 2025 as compared to 2024 (26.3%) was higher than the rate of increase in other interest income between the same two years (20.9%). The larger rate of increase in interest income calculated using the effective interest method (as compared to the rate of increase in other interest income) in 2025 as compared to 2024 was principally due to the 36.8% increase in the Group's interest income from cash and cash equivalents from KZT 260,502

million in 2024 to KZT 356,392 million in 2025 and the 17.4% increase in the Group's interest income from loans to customers from KZT 599,760 million in 2024 to KZT 704,243 million in 2025.

The Group's net interest income increased by 11.6%, or KZT 64,334 million, from KZT 552,407 million in 2023 to KZT 616,741 million in 2024. The increase in net interest income in 2024 as compared to 2023 was due to increases in both interest income calculated using the effective interest method and other interest income (as discussed below), which were only partially offset by the increase in interest expense. In absolute terms, the increase in interest income calculated using the effective interest method in 2024 as compared to 2023 (by KZT 94,267 million) was significantly larger than the increase in other interest income in 2024 as compared to 2023 (by KZT 50,555 million), but the rate of increase in other interest income in 2024 as compared to 2023 (29.7%) was more than triple of the rate of increase in interest income calculated using the effective interest method between the same two years (9.7%). The much larger rate of increase in other interest income (as compared to the rate of increase in interest income calculated using the effective interest method) in 2024 as compared to 2023 was principally due to the 33.2% increase in the Group's other interest income from finance lease receivables from KZT 151,002 million in 2023 to KZT 201,188 million in 2024.

Interest Income Calculated Using the Effective Interest Method

The following table sets forth the principal components of the Group's interest income calculated using the effective interest method for the years ended 31 December 2023, 2024 and 2025:

	Financial year ended 31 December			Increase / (Decrease)	
	2023	2024	2025	2023 vs 2024	2024 vs 2025
	(KZT millions)			%	
Loans to customers	525,447	599,760	704,243	14.1	17.4
Cash and cash equivalents	234,728	260,502	356,392	11.0	36.8
Investment Securities measured at amortised cost	158,932	133,573	160,336	(16.0)	20.0
Loans to banks and financial institutions ...	35,963	43,820	61,789	21.8	41.0
Investment securities measured at fair value through other comprehensive income	13,572	15,592	23,587	14.9	51.3
Deposits with banks and financial institutions	442	10,105	38,091	2,187.8	277.0
Other	1,305	1,304	493	(0.1)	(62.2)
Total interest income calculated using the effective interest method	970,388	1,064,655	1,344,930	9.7	26.3

Interest income calculated using the effective interest method increased by 26.3%, or KZT 280,275 million, from KZT 1,064,655 million in 2024 to KZT 1,344,930 million in 2025. The year-on-year increase in 2025 was primarily due to the increase in interest received on loans to customers of KZT 104,483 million, or 17.4%, from KZT 599,760 million in 2024 to KZT 704,243 million in 2025, primarily reflecting the increase in total gross loans to customers measured at amortised cost from KZT 6,740,914 million as of 31 December 2024 to KZT 8,073,282 million as of 31 December 2025 and an increase in interest income from cash and cash equivalents of KZT 95,890 million, or 36.8 %, from KZT 260,502 million in 2024 to KZT 356,392 million in 2025, and to a lesser extent, the increase in income from deposits with banks and financial institutions of KZT 27,986 million from KZT 10,105 million in 2024 to KZT 38,091 million in 2025. See “— Selected Statistical Information for the Years Ended 31 December 2023, 2024 and 2025”.

Interest income calculated using the effective interest method increased by 9.7%, or KZT 94,267 million, from KZT 970,388 million in 2023 to KZT 1,064,655 million in 2024. The year-on-year increase in 2024 was primarily due to the increase in interest received on loans to customers of KZT 74,313 million, or 14.1%, from KZT 525,447 million in 2023 to KZT 599,760 million in 2024, primarily reflecting the increase in total gross loans to customers measured at amortised cost from KZT 5,894,808 million as of 31 December 2023 to KZT 6,740,914 million as of 31 December 2024 and, to a lesser extent, the increase in average interest rates with respect to gross loans to customers measured at amortised cost. See “— Selected Statistical Information for the Years Ended 31 December 2023, 2024 and 2025”.

Other Interest Income

The Group generates other interest income from finance lease receivables, loans to customers and financial instruments at fair value through profit or loss.

The following table sets out the principal components of the Group's other interest income for the years ended 31 December 2023, 2024 and 2025:

	Financial year ended 31 December			Increase / (Decrease)	
	2023	2024	2025	2023 vs 2024	2024 vs 2025
	(KZT millions)			%	
Finance lease receivables.....	151,002	201,188	245,162	33.2	21.9
Loans to customers.....	18,966	19,635	21,809	3.5	11.1
Financial instruments at fair value through profit or loss.....	456	156	153	(65.8)	(1.9)
Total other interest income	170,424	220,979	267,124	29.7	20.9

Other interest income of the Group increased by 20.9%, or KZT 46,145 million, from KZT 220,979 million in 2024 to KZT 267,124 million in 2025. The year-on-year increase in 2025 was almost entirely due to a KZT 43,974 million, or 21.9%, increase in interest income in respect of finance lease receivables, which was, in turn, primarily due to the increase in gross finance lease receivables from KZT 1,671,847 million as of 31 December 2024 to KZT 2,460,369 million as of 31 December 2025 and, to a lesser extent, the increase in average interest rates applicable to finance lease receivables in 2025 as compared to 2024. See “— Selected Statistical Information for the Years Ended 31 December 2023, 2024 and 2025”.

Other interest income of the Group increased by 29.7%, or KZT 50,555 million, from KZT 170,424 million in 2023 to KZT 220,979 million in 2024. The year-on-year increase in 2024 was almost entirely due to a KZT 50,186 million, or 33.2%, increase in interest income in respect of finance lease receivables, which was, in turn, primarily due to the increase in gross finance lease receivables from KZT 1,279,885 million as of 31 December 2023 to KZT 1,671,847 million as of 31 December 2024 and, to a lesser extent, the increase in average interest rates applicable to finance lease receivables in 2024 as compared to 2023. See “— Selected Statistical Information for the Years Ended 31 December 2023, 2024 and 2025”.

Interest Expense

The following table sets forth the principal components of the Group's interest expense for the years ended 31 December 2023, 2024 and 2025:

	Financial year ended 31 December			Increase / (Decrease)	
	2023	2024	2025	2023 vs 2024	2024 vs 2025
	(KZT millions)			%	
Debt securities issued	(374,993)	(437,700)	(549,549)	16.7	25.6
Loans from the Government of the Republic of Kazakhstan	(96,064)	(96,648)	(100,481)	0.6	4.0
Loans from banks and other financial institutions	(71,553)	(79,565)	(107,205)	11.2	34.7
Customer accounts.....	(44,803)	(46,668)	(51,261)	4.2	9.8
Amounts payable under repurchase agreements.....	(366)	(7,530)	(16,187)	1,959.3	115.0
Subordinated debt.....	(601)	(741)	(694)	23.1	(6.3)
Other.....	(24)	(42)	(173)	76.1	311.9
Total interest expense.....	(588,405)	(668,893)	(825,551)	13.7	23.4

For the year ended 31 December 2025, the Group's interest expense increased by 23.4%, or KZT 156,658 million, from KZT 668,893 million in 2024 to KZT 825,551 million in 2025. The year-on-year increase in interest expense in 2025 was primarily due to the increase in interest expense on debt securities issued of KZT 111,849 million, or 25.6%, from KZT 437,700 million in 2024 to KZT 549,549 million in 2025 primarily, principally reflecting the

increase in the Group's total debt securities issued from KZT 5,197,698 million as of 31 December 2024 to KZT 7,499,768 million as of 31 December 2025. See "— Selected Statistical Information for the Years Ended 31 December 2023, 2024 and 2025".

For the year ended 31 December 2024, the Group's interest expense increased by 13.7%, or KZT 80,488 million, from KZT 588,405 million in 2023 to KZT 668,893 million in 2024. The year-on-year increase in interest expense in 2024 was primarily due to the increase in interest expense on debt securities issued of KZT 62,707 million, or 16.7%, from KZT 374,993 million in 2023 to KZT 437,700 million in 2024 primarily, principally reflecting the increase in the Group's total debt securities issued from KZT 3,801,898 million as of 31 December 2023 to KZT 5,197,698 million as of 31 December 2024. See "— Selected Statistical Information for the Years Ended 31 December 2023, 2024 and 2025".

Impairment Allowance for Loan Portfolio and Finance Lease Receivables

The following table sets forth the components of the Group's impairment allowance for loan portfolio and finance lease receivables for the years ended 31 December 2023, 2024 and 2025:

	Financial year ended 31 December			Increase / (Decrease)	
	2023	2024	2025	2023 vs 2024	2024 vs 2025
	(KZT millions)			%	
Impairment allowance for loans to customers.....	52,388	(32,577)	(34,244)	n/a	5.1
Impairment allowance for finance lease receivables.....	(10,225)	(25,521)	(11,593)	149.6	(54.6)
Impairment allowance for loan portfolio and finance lease receivables.....	42,163	(58,098)	(45,838)	n/a	(21.1)

The Group incurred impairment losses in respect of loan portfolio and finance lease receivables in the amount of KZT 45,838 million in 2025. This consisted of impairment allowance for loans to customers in the amount of KZT 34,244 million (primarily due to impairment losses on Stage 3 loans) as well as an accrual of impairment allowance for finance lease receivables in the amount of KZT 11,593 million.

The accrual of impairment allowance in 2025 was primarily due to the increase in the impairment allowance for expected credit losses in Stage 3.

The Group incurred impairment losses in respect of loan portfolio and finance lease receivables in the amount of KZT 58,098 million in 2024. This consisted of impairment allowance for loans to customers in the amount of KZT 32,577 million (primarily due to impairment losses on Stage 3 loans) and impairment allowance for finance lease receivables in the amount of KZT 25,521 million. With respect to impairment allowance for finance lease receivables, impairment allowance on Stage 3 finance lease receivables accounted for KZT 18,772 million.

The net reversal of impairment allowance in 2023 was primarily due to the decrease in the impairment allowance for expected credit losses in Stage 3, which was, in turn, attributable to the partial planned early repayment of loans facilitated by the acceptance of additional collateral for certain loans, the update of borrowers' financial data and the entry into an agreement relating to an offtake contract for a Stage 3 loan.

Net Non-Interest Income/(Expense)

The following table sets forth the principal components of the Group's net non-interest income/(expense) for the years ended 31 December 2023, 2024 and 2025:

	Financial year ended 31 December			Increase / (Decrease)	
	2023	2024	2025	2023 vs 2024	2024 vs 2025
	(KZT millions)			%	
Fee and commission income.....	35,447	42,819	56,244	20.8	31.4
Fee and commission expense.....	(8,134)	(9,384)	(13,293)	15.4	(41.7)
Net gain on assets at fair value through profit or loss.....	6,167	1,090	13,528	(82.3)	1141.1
Net foreign exchange gain/(loss)	7,015	26,899	(29,889)	283.5	n/a
Net gain on financial assets at fair value through other comprehensive income	5,028	4,147	7,836	(17.5)	89.0
Net gain on derecognition of financial assets measured at amortised cost.....	3,051	494	871	(83.8)	76.3
Insurance revenue.....	8,453	8,159	9,521	(3.5)	16.7
Insurance service expenses and changes in insurance contract provisions.....	(14,724)	(9,930)	(8,039)	(32.6)	19.0
Other operating expenses, net.....	(71,047)	(20,073)	(67,518)	(71.7)	(236.4)
Net non-interest income/(expense).....	(28,744)	44,222	(30,738)	n/a	n/a

The Group net non-interest income/(expense) decreased by KZT 74,960 million or 169.5 %, from income of KZT 44,222 million in 2024 to expense of KZT 30,738 million in 2025. The difference in the Group's net non-interest income/(expense) between the two years was principally due to (i) higher other operating expenses, net, in 2025 as compared to 2024 (by KZT 47,445 million) and (ii) in net foreign exchange loss partially offset by an increase in fee and commission income and net gains on financial assets at fair value through profit or loss due to an increase in loan and investment portfolios. Other operating expenses/income, net, included losses from the initial recognition of bonds of local executive authorities purchased at below-market rates (KZT 31,218 million during 2025 as compared to KZT 215,907 million during 2024), expenses in the form of negative adjustments on the value of loans issued (KZT 434,846 million during 2025 as compared to KZT 226,381 million during 2024) and expenses on estimates of loan commitments to provide a loan at below market interest rates (KZT 54,876 million during 2025 as compared to KZT 13,907 million during 2024) which were partially offset by other income from utilisation of government grants (KZT 477,077 million during 2025 as compared to KZT 435,971 million during 2024).

In 2024, the Group recognised expenses of KZT 226,381 million in the form of negative adjustment of value of the loans issued at below-market rates. This amount included expenses of KZT 56,105 million arising on the initial recognition of loans to banks and expenses of KZT 170,276 million arising on the initial recognition of loans to customers. During 2024, loss on initial recognition of loans to banks, financial institutions and leasing companies arose from the issuance of loans at a nominal interest rate ranging from 1.00% to 2.00% per annum, the market interest rates of which ranged from 14.36% to 15.82% per annum. During the same year, loss on initial recognition of loans to customers arose from the issuance of loans with a nominal interest rate ranging from 1.00% to 15.00% per annum, markets interest rates of which ranged from 7.00% to 21.26% per annum.

In 2023, the Group recognised expenses of KZT 109,936 million in the form of negative adjustment of value of the loans issued at below-market rates. This amount included expenses of KZT 12,079 million arising on initial recognition of loans to banks and expenses of KZT 97,857 million arising on initial recognition of loans to customers. During 2023, loss on initial recognition of loans to banks, financial institutions and leasing companies arose from the issuance of loans at a nominal interest rate of 2.00% per annum, the market interest rates of which ranged from 14.61% to 17.22% per annum. During the same year, loss on initial recognition of loans to customers arose from the issuance of loans with a nominal interest rate ranging from 2.00% to 14.40% per annum, markets interest rates of which ranged from 7.25% to 23.20% per annum.

With respect to loss on initial recognition of the bonds of local executive authorities purchased at below-market rates referred to above, during 2025, the Group purchased 140,232,106 bonds issued by the local authorities at the value of KZT 1,000 per bond, which were scheduled to mature in 2027 and with below-market coupon rates of 0.35%, 4.25% and 8.99%. During 2025, the Group also purchased 267,500,864 bonds issued by local authorities at the value of KZT 1,000 per bond, which were scheduled to mature in 2035 and 2040 and with market coupon rates of 18.20%, 18.90% and 20.2% per annum. Bonds were recognised at fair value of KZT 376,515 million calculated using the market interest rates ranging from 15.09% to 18.03% per annum. Loss from discount on initial recognition was KZT 31,218 million and was recognised in other operating expenses in the consolidated statement of profit or loss and other comprehensive income and was partially compensated through the decrease

in Government grants liabilities (which grants were received to purchase the bonds) in the amount of KZT 31,218 million. During 2025, local executive authorities repaid bonds in the amount of KZT 119,882 million. The discount recalculated due to the partial or full early redemption of bonds of the local executive authorities for the amount of KZT 63,454 million amounted to KZT 2,578 million and KZT 2,137 million was recognised as Government grants.

During 2024, the Group purchased 462,125,576 bonds issued by the local executive authorities at the value of KZT 1,000 per bond, which are scheduled to mature in 2026 and 2034. The bond coupon rate is 0.02%, 0.35% and 4.25% per annum. Bonds were recognised at fair value of KZT 246,219 million calculated using the market interest rates ranging from 11.43% to 13.40% per annum. Loss from discount on initial recognition of KZT 215,907 million was recognised in other operating expenses in the consolidated statement of profit or loss and other comprehensive income and was partially compensated by the decrease in Government grant liabilities (which grants were received to purchase the bonds) in the amount of KZT 208,732 million.

During 2023, the Group purchased 139,568,819 bonds issued by the local executive authorities at the value of KZT 1,000 per bond, which matured in 2024 and 2025. The bond coupon rate was 0.35% and 4.25% per annum. Bonds were recognised at fair value of KZT 115,692 million calculated using the market interest rates ranging from 13.28% to 16.27% per annum. Loss from discount on initial recognition of KZT 23,876 million was recognised in other operating expenses in the consolidated statement of profit or loss and other comprehensive income and was partially offset by the decrease in Government grant liabilities (which grants were received to purchase the bonds) in the amount of KZT 1,568 million.

Operating Income

As a result of the foregoing, operating income increased by KZT 107,063 million, or 17.8%, to KZT 709,927 million in 2025 from KZT 602,864 million in 2024, having increased by KZT 37,038 million, or 6.5%, from KZT 565,826 million in 2023.

Administrative Expenses

The following table sets forth the components of the Group's administrative expenses for the years ended 31 December 2023, 2024 and 2025:

	Financial year ended 31 December			Increase / (Decrease)	
	2023	2024	2025	2023 vs 2024	2024 vs 2025
	(KZT millions)			%	
Personnel costs	46,820	56,111	67,313	19.8	20.0
Professional services.....	6,147	7,536	9,890	22.6	31.2
Repair and technical equipment.....	5,478	7,063	8,303	28.9	17.6
Depreciation of property, plant and equipment.....	3,483	3,880	4,126	11.4	6.3
Amortisation of software and other intangibles	2,911	3,002	3,439	3.1	14.6
Taxes other than income tax	2,127	2,801	3,496	31.7	24.8
Communication services.....	2,125	2,413	2,866	13.5	18.8
Expenses on realisation of Damu EDF JSC programmes.....	1,779	2,213	3,922	24.4	77.2

Banking services.....	60	52	55	(12.1)	5.8
Charity and sponsorship	148	32	174	(78.7)	452.2
Other.....	1,579	2,687	4,162	70.2	54.9
Total administrative expenses.....	81,148	97,513	118,702	20.2	21.7

Administrative expenses of the Group increased by 21.7%, or KZT 21,189 million, from KZT 97,513 million in 2024 to KZT 118,702 million in 2025. The year-on-year increase in 2025 was primarily due to the increase in personnel costs. Personnel costs increased by KZT 11,202 million, or 20.0%, to KZT 67,313 million in 2025 from KZT 56,111 million in 2024. The increase in personnel costs in 2025 as compared to 2024 was primarily due to the significant increase in salaries of the Group's employees and, to a lesser extent, due to the increase in expenses relating to professional services, repairs and technical equipment, advertising and marketing services, employee training and expenses on realisation of Damu EDF JSC programmes.

Administrative expenses of the Group increased by 20.2%, or KZT 16,365 million, from KZT 81,148 million in 2023 to KZT 97,513 million in 2024. The year-on-year increase in 2024 was primarily due to the increase in personnel costs. Personnel costs increased by KZT 9,291 million, or 19.8%, to KZT 56,111 million in 2024 from KZT 46,820 million in 2023. The increase in personnel costs in 2024 as compared to 2023 was primarily due to the significant increase in salaries of the Group's employees and, to a lesser extent, due to the 5.1% increase in the average number of employees from 3,927 in 2023 (excluding employees of Bereke Bank) to 4,126 in 2024.

Profit Before Income Tax

As a result of the foregoing, profit before income tax increased by KZT 72,415 million, or 14.3%, to KZT 571,133 million in 2025 from KZT 499,718 million in 2024, having increased by KZT 19,609 million, or 4.1%, from KZT 480,109 million in 2023.

Income Tax Expense

Income tax expense increased by 96.8%, or KZT 79,319 million, from KZT 81,945 million in 2024 to KZT 161,264 million in 2025. The year-on-year increase in 2025 was primarily due to the current Law on Amendments to the Tax Code of the Republic of Kazakhstan signed in July 2025, which effected an increase in the corporate income tax rate on certain income.

Income tax expense increased by 11.7%, or KZT 8,555 million, from KZT 73,390 million in 2023 to KZT 81,945 million in 2024. The year-on-year increase in 2024 was primarily due to the increase in taxable income.

The Group's applicable tax rate for current and deferred tax was 20% for each of 2023, 2024 and 2025. The reconciliation between the estimated and actual tax charges is provided in the table below:

	Financial year ended 31 December		
	2023	2024	2025
	(KZT millions)		
Profit before income tax	480,109	499,718	571,133
The estimated tax charges at statutory rate of 20%	96,022	99,944	114,227
- Non-taxable income on securities.....	(23,406)	(26,906)	(23,541)
- Tax exempt interest on finance lease receivables.	(11,161)	(22,779)	(17,841)
- Non-deductible impairment losses	3,011	9,563	1,651
- Other non-deductible expenses.....	8,803	3,854	2,167
- Impact of changes in the tax rate (10% on deposits placed with the National Bank of the Republic of Kazakhstan, reverse repo transactions, and interest income on government securities)	-	-	38,205
- Change in unrecognised deferred tax assets	(6,964)	9,417	768
- Non-deductible expenses from revaluation of financial assets at fair value.....	1,611	344	23,832

-Write-off of current tax asset due to changes in tax legislation	-	-	9,032
- Income tax withheld at the source of payment.....	3,547	5,293	8,200
- Other	4,083	3,293	3,601
Income tax expense for the year	73,390	81,945	161,264

Profit for the Year from Continuing Operations

As a result of all the foregoing, the Group's profit for the year from continuing operations decreased by KZT 7,904 million, or 1.9%, to KZT 409,869 million in 2025, from KZT 417,773 million in 2024, having increased by KZT 11,054 million, or 2.7%, from KZT 406,719 million in 2023.

Profit for the Year

As a result of all the foregoing, the Group's profit for the year increased by KZT 1,649 million, or 0.4%, to KZT 409,869 million in 2025, from KZT 408,220 million in 2024, having increased by KZT 573 million, or 0.1%, from KZT 407,647 million in 2023.

Selected Statistical Information for the Years Ended 31 December 2023, 2024 and 2025

The following table sets forth the consolidated average balances of interest-earning assets and interest-bearing liabilities of the Group for the years ended 31 December 2023, 2024 and 2025. The table also sets forth the amount of interest income earned and interest expense incurred by the Group in the same years, as well as the average interest rates at which interest income was earned on such assets and interest expense was incurred on such liabilities. For the purposes of this table, the average balances on assets and liabilities for the Group in all years have been based upon annual opening and closing balances. The results of this analysis would likely be different if alternative averaging methods were used. The average rates below are calculated by dividing aggregate interest income or expense for the relevant line item below by the average balance for the same line item. Average interest rates are distinct from the effective interest rates presented in the Financial Statements and referred to elsewhere in this Base Offering Memorandum.

Net interest income	-	-	552,409	-	-	616,741			786,503

Notes:

- (1) Average balances are calculated as the arithmetic average of the opening and closing balances for the relevant year.
- (2) Average interest rates are calculated as the ratio of interest income/expense to the average balance for the relevant year.
- (3) Excludes (i) cash balances with the NBK, (ii) mandatory reserves with the NBK and (iii) cash on hand.
- (4) “Other” interest-earning assets consist of (i) other financial assets measured at amortised cost and (ii) accounts receivable under assignment agreements.
- (5) “Other” interest-bearing liabilities consist of other liabilities and long-term lease obligations for 2022 and of long-term lease obligations for 2023, 2024 and 2025.

Financial Condition of the Group

Assets

The following table sets forth the breakdown of total assets of the Group as of 31 December 2023, 2024 and 2025 extracted from the Financial Statements:

	As of 31 December					
	2023	% of total	2024	% of total	2025	% of total
	(KZT millions)	(%)	(KZT millions)	(%)	(KZT millions)	(%)

Other assets.....	428,484	3.1	611,371	4.2	874,470	4.6
Total assets	13,620,420	100.0	14,438,237	100.0	19,047,637	100.0

Loans to Customers

Total loans to customers of the Group increased by 22.5%, or KZT 1,474,815 million, from KZT 6,558,530 million as of 31 December 2024 to KZT 8,033,345 million as of 31 December 2025. This increase in loans to customers between 31 December 2024 and 31 December 2025 was primarily due to the KZT 753,315 million increase in loans to corporate customers and, to a lesser extent, the KZT 532,239 million increase in mortgage loans.

Total loans to customers of the Group increased by 14.8%, or KZT 845,230 million, from KZT 5,713,300 million as of 31 December 2023 to KZT 6,558,530 million as of 31 December 2024. This increase in loans to customers between 31 December 2023 and 31 December 2024 was primarily due to the KZT 439,204 million increase in loans to corporate customers and, to a lesser extent, the KZT 271,237 million increase in mortgage loans.

Composition of Loan Portfolio by Types of Loans. The following table presents (i) the breakdown of the Group's gross loans to customers measured at amortised cost, (ii) impairment allowances for such loans, (iii) total net loans to customers measured at amortised cost, (iv) loans to customers measured at fair value through profit of loss and (v) total loans to customers for the years ended 31 December 2023, 2024 and 2025 extracted from the Financial Statements:

	As of 31 December		
	2023	2024	2025
	(KZT millions)		
Loans to customers measured at amortised cost			
Mortgage loans.....	3,154,584	3,425,822	3,958,061

	As of 31 December		
	2023	2024	2025
	<i>(KZT millions)</i>		
Loans to corporate customers.....	1,822,899	2,262,103	3,015,418
Loans issued to agribusiness companies.....	909,802	1,040,126	1,082,738
Loans issued to small and medium entities	7,522	12,862	17,064
Gross loans to customers measured at amortised cost.....	5,894,808	6,740,914	8,073,282
Less impairment allowance for loans	(369,835)	(408,491)	(441,464)
Total net loans to customers measured at amortised cost	5,524,973	6,332,423	7,631,817
Loans to customers measured at fair value through profit or loss	188,327	226,108	401,528
Total loans to customers	5,713,300	6,558,530	8,033,345

The difference between loans to customers measured at amortised cost and loans to customers measured at fair value through profit and loss is as follows: loans measured at amortised cost are initially recognised at fair value, including transaction costs, and subsequently measured at amortised cost, which is the amount at initial recognition minus the principal repayments, plus or minus the cumulative amortisation of any difference between the initial carrying amount and the maturity amount, using the effective interest method, and adjusted for any expected credit loss allowance in accordance with IFRS 9. Loans measured at fair value through profit or loss (FVTPL) are remeasured to fair value at each reporting date, with all changes in fair value recognised immediately in profit or loss.

Composition of Loan Portfolio by Economic Sector. The following table sets forth an analysis of the Group's (i) gross loans by economic sector before impairment allowance, (ii) impairment allowance and (iii) net loans to customers as of 31 December 2023, 2024 and 2025 extracted from the Financial Statements:

	As of 31 December

Loans to retail customers .						
Mortgage loans	3,154,584	51.9	3,425,872	49.2	3,958,103	46.7
Gross loans to customers...	6,083,135	100.0	6,967,021	100.0	8,474,809	100.0

As of 31 December					
2023	% of total gross loans to customers	2024	% of total gross loans to customers	2025	% of total gross loans to customers
(KZT millions)	(%)	(KZT millions)	(%)	(KZT millions)	(%)
Less: impairment allowance	(369,835)	-	(408,491)	-	(441,464)
Total loans to customers	5,713,300	-	6,558,530	-	8,033,345

As a percentage of total gross loans to customers measured at amortised cost and total loans measured at fair value through profit or loss, as of 31 December 2025, as compared to 31 December 2024, mortgage loans to retail customers decreased to 46.7% from 49.2%, although the amount of mortgage loans increased by 15.5%, or KZT 532,281 million, to KZT 3,958,103 million from KZT 3,425,872 million. This is because mortgage loans to retail customers increased by 15.5% between 31 December 2024 and 31 December 2025 while the total gross loans to customers increased by 21.6% between the same two dates.

As a percentage of total gross loans to customers measured at amortised cost and total loans measured at fair value through profit or loss, as of 31 December 2025, as compared to 31 December 2024, loans to customers in mining, metallurgical and mineral resources industries decreased to 14.9% from 15.4% as of 31 December 2024, loans to customers in construction industry increased to 6.4% from 3.2% and loans to customers in the oil and gas industry decreased to 3.7% from 4.6%.

As a percentage of total gross loans to customers measured at amortised cost and total loans measured at fair value through profit or loss, as of 31 December 2024, as compared to 31 December 2023, mortgage loans to retail customers decreased to 49.2% from 51.9%, although the amount of mortgage loans increased by 8.6%, or KZT 271,237 million, to KZT 3,425,822 million from KZT 3,154,584 million. The decrease of mortgage loans as a percentage of total gross loans was due to an increase in mortgage loans of 8.6% between 31 December 2023 and 31 December 2024 but a larger increase of 14.5% in total gross loans to customers between the same two dates.

As a percentage of total gross loans to customers measured at amortised cost and total loans measured at fair value through profit or loss, as of 31 December 2024, as compared to 31 December 2023, loans to customers in mining, metallurgical and mineral resources industries increased to 15.4% from 13.5%, loans to customers in construction industry increased to 3.2% from 0.7% and loans to customers in the oil and gas industry decreased to 4.6% from 6.2%.

It should also be noted that fluctuations in loans to customers by economic sector, for the most part, occur in the ordinary course of the Group's business. In general, as a result of the borrower concentration and relatively large size of individual loans to corporate customers within the loan portfolio, the breakdown of loans granted to customers in the different economic sectors can fluctuate significantly as a result of a single loan made or a single loan disbursement repaid in a given year.

Loans to Banks, Financial Institutions and Leasing Companies

The Group provides loans to second-tier banks for on-lending, particularly to the private sector, primarily through the implementation of Government programmes.

Loans to banks, financial institutions and leasing companies increased by KZT 125,935 million, or 27.9%, to KZT 577,023 million as of 31 December 2025 from KZT 451,088 million as of 31 December 2024, having increased by KZT 104,429 million, or 30.1%, from KZT 346,659 million as of 31 December 2023.

As of each of 31 December 2023, 2024 and 2025, 100% of the Group's loans to banks, financial institutions and leasing companies were denominated in Tenge.

Finance Lease Receivables

Finance lease receivables increased by KZT 776,843 million, or 49.2%, to KZT 2,355,406 million as of 31 December 2025 from KZT 1,578,563 million as of 31 December 2024, having increased by KZT 366,432 million, or 30.2% from KZT 1,212,130 million as of 31 December 2023.

Finance Lease Receivables by Type of Lessee

The following table sets forth (i) the components of the Group's gross finance lease receivables by type of lessee, (ii) loss allowance and (iii) net finance lease receivables as of 31 December 2023, 2024 and 2025:

	As of 31 December					
	2023	% of total gross finance receivables	2024	% of total gross finance receivables	2025	% of total gross finance receivables
	(KZT millions)	(%)	(KZT millions)	(%)	(KZT millions)	(%)
Leases to agrobusiness entities	501,583	39.2	626,277	37.5	745,452	30.3
Finance leases to large corporates..	372,109	29.1	580,862	34.7	833,985	33.9

Bonds of local executive authorities constituted the largest portion of the Group's investment securities measured at amortised cost. Such bonds accounted for 77.2%, 76.0% and 83.7% of the Group's investment securities measured at amortised cost before impairment allowance as of 31 December 2023, 31 December 2024 and 31 December 2025.

The reason why the Group has such a large portfolio of bonds of local executive authorities is that, in addition to being a development finance institution, the Group is also performing a fiscal agent function for the Government by buying bonds of local executive authorities below market price with some netting of the pricing gap against the Group's obligations to the Government. These bonds are issued by local executive bodies principally to fund the construction of housing in Kazakhstan.

During 2025, the Group purchased 140,232,106 bonds issued by the local authorities at the value of KZT 1,000 per bond, which were scheduled to mature in 2027 and with below-market coupon rates of 0.35%, 4.25% and 8.99%. During 2025, the Group also purchased 267,500,864 bonds issued by local authorities at the value of KZT 1,000 per bond, which were scheduled to mature in 2035 and 2040 and with market coupon rates of 18.20%, 18.90% and 20.2% per annum. Bonds were recognised at fair value of KZT 376,515 million calculated using the market interest rates ranging from 15.09% to 18.03% per annum. Loss from discount on initial recognition was KZT 31,218 million and was recognised in other operating expenses in the consolidated statement of profit or loss and other comprehensive income and was partially compensated through the decrease in Government grants liabilities (which grants were received to purchase the bonds) in the amount of KZT 31,218 million. During 2025, local executive authorities repaid bonds in the amount of KZT 119,882 million. The discount recalculated due to the partial or full early redemption of bonds of the local executive authorities for the amount of KZT 63,454 million amounted to KZT 2,578 million and KZT 2,137 million was recognised as Government grants.

During 2024 the Group purchased 462,125,576 bonds issued by the local executive bodies at a nominal price of KZT 1,000 per bond, which mature in 2026 and 2043. Bond coupon rates were set at three pricing points: 0.02%, 0.35% and 4.25% per annum. Bonds were recognised at fair value of KZT 246,219 million calculated using the market interest rates ranging from 11.43% to 13.40% per annum. Loss from discount on initial recognition of KZT 215,907 million was recognised in other operating expenses in the consolidated statement of profit or loss and other comprehensive income and was partially compensated by decrease in Government grant liabilities (which grants were received to purchase the bonds) in the amount of KZT 208,732 million. During 2024, local executive authorities repaid bonds in the amount of KZT 201,903 million. The discount recalculated due to the partial/full early redemption of bonds of the local executive authorities amounted to KZT 732 million, of which KZT 663 million was recognised in other operating expenses in the statement of profit or loss and other comprehensive income, and KZT 69 million was recognised as Government grants.

During 2023, the Group purchased 139,568,819 bonds issued by the local authorities at the value of KZT 1,000 per bond, which were scheduled to mature in 2024 and 2025. Bond coupon rates were 0.35% and 4.25% per annum. Bonds were recognised at fair value of KZT 115,692 million calculated using the market interest rates ranging from 13.28% to 16.27% per annum. Loss from discount on initial recognition of KZT 23,876 million was recognised in other operating expenses in the consolidated statement of profit or loss and other comprehensive income and was partially compensated by the decrease in Government grant liabilities (which grants were received to purchase the bonds) in the amount of KZT 1,568 million. During 2023, local executive authorities repaid bonds in the amount of KZT 161,233 million. The discount recalculated due to the partial or full early redemption of bonds of the local executive authorities for the amount of KZT 69,723 million amounted to KZT 1,020 million and was recognised as Government grants.

Investment Securities Measured at Fair Value through Other Comprehensive Income

Principal Sources of Funding

The Group's activities are principally funded through the issuance and placement of bonds in both the domestic and international capital markets, customer accounts, Government grants, loans from banks and other financial institutions and loans from the Government of the Republic of Kazakhstan.

Debt Securities Issued

The following table sets forth the breakdown of debt securities issued of the Group as of 31 December 2023, 2024 and 2025:

	As of 31 December					
	2023	% of total	2024	% of total	2025	% of total
	(KZT millions)	(%)	(KZT millions)	(%)	(KZT millions)	(%)
Other Tenge-denominated bonds	3,178,934	83.6	3,905,186	75.1	4,857,413	64.8
U.S. dollar-denominated Eurobonds ...	388,386	10.2	867,115	16.7	1,795,769	23.9
Tenge-denominated Eurobonds	166,268	4.4	312,885	6.0	639,029	8.5
CNY-denominated Eurobonds	-	-	-	-	145,891	1.9
Mortgage bonds	61,494	1.6	61,447	1.2	61,667	0.8
Other U.S. dollar-denominated bonds	6,815	0.2	51,065	1.0	-	-
Total debt securities issued	3,801,898	100.0	5,197,698	100.0	7,499,768	100.0

Debt securities issued increased by 44.3%, or KZT 2,302,070 million, from KZT 5,197,698 million as of 31 December 2024 to KZT 7,499,768 million as of 31 December 2025. This increase in debt securities issued between 31 December 2024 and December 2025 was primarily due to (i) the issuance of 30 series of new other Tenge-denominated bonds in 2025 with the aggregate carrying amount of KZT 1,225,600 million as of 31 December 2025, which was partially offset by the full repayment of 7 series of other Tenge-denominated bonds in 2025 that had an aggregate carrying amount of KZT 408,655 million as of 31 December 2024; (ii) the issuance by DBK of 2 series of U.S. dollar-denominated Eurobonds in the aggregate amount of U.S.\$ 1.2 billion and (iii) the issuance of 2 series of Tenge-denominated Eurobonds in the aggregate amount of KZT 355,000 million.

Debt securities issued increased by 36.7%, or KZT 1,395,800 million, from KZT 3,801,898 million as of 31 December 2023 to KZT 5,197,698 million as of 31 December 2024. This increase in debt securities issued between 31 December 2023 and December 2024 was primarily due to (i) the issuance of 15 series of new other Tenge-denominated bonds in 2024 with the aggregate carrying amount of KZT 1,083,534 million as of 31 December 2024, which was partially offset by the full repayment of eight series of other Tenge-denominated bonds in 2024 that had an aggregate carrying amount of KZT 353,020 million as of 31 December 2023; (ii) the issuance of two series of U.S. dollar-denominated Eurobonds in the aggregate amount of U.S.\$1 billion and (iii) the issuance of two series of Tenge-denominated Eurobonds in the aggregate amount of KZT 165,000 million.

U.S. Dollar-Denominated Eurobonds. As of 31 December 2025, U.S. dollar-denominated Eurobonds comprised the following bonds issued by the Issuer and its subsidiary, DBK: medium-term bonds with nominal value of U.S.\$494.3 million issued on 16 October 2025 at coupon rate of 4.60% per annum that are scheduled to mature in January 2031;

- medium-term bonds with nominal value of U.S.\$500 million issued on 1 October 2025 at coupon rate of 4.65% per annum that are scheduled to mature in October 2030;
- medium-term bonds with nominal value of U.S.\$500 million issued on 8 May 2025 at coupon rate of 5.45% per annum that are scheduled to mature in May 2028
- medium-term bonds with nominal value of U.S.\$700 million issued on 7 April 2025 at coupon rate of 5.63% per annum that are scheduled to mature in April 2030;
- long-term bonds with nominal value of U.S.\$97 million issued on 23 March 2006 at coupon rate of 6.0% per annum that are scheduled to mature in March 2026;

- medium-term bonds with nominal value of U.S.\$500 million issued on 6 May 2021 at coupon rate of 2.95% per annum that are scheduled to mature in May 2031;
- medium-term bonds with nominal value of U.S.\$500 million issued on 12 May 2022 at coupon rate of 5.75% per annum that are scheduled to mature in May 2025;
- medium-term bonds with nominal value of U.S.\$500 million issued on 15 April 2024 at coupon rate of 5.50% per annum that are scheduled to mature in April 2027; and
- medium-term bonds with nominal value of U.S.\$500 million issued on 23 October 2024 at coupon rate of 5.25% per annum that are scheduled to mature in October 2029.

On 17 April 2024, the Group partially redeemed, ahead of schedule, the U.S. dollar-denominated Eurobonds in the amount of U.S.\$163 million. On 2 May 2024, the Group partially redeemed, ahead of schedule, the U.S. dollar-denominated Eurobonds in the amount of U.S.\$1 million. On 9 April 2025, the Group made a partial early redemption of U.S. dollar-denominated Eurobonds in the amount of U.S.\$14 million and on 12 May 2025, made a full repayment in the amount of U.S.\$311 million in connection with the maturity of the notes.

Tenge-Denominated Eurobonds. As of 31 December 2025, Tenge denominated Eurobonds comprised the following bonds issued by the Issuer's subsidiary, DBK:

- bonds with nominal value of KZT 55,000 million issued on 3 July 2025 at coupon rate of 17.3% per annum that are scheduled to mature in July 2028;
- bonds with nominal value of KZT 300,000 million issued on 16 October 2025 at coupon rate of 18.4% per annum that are scheduled to mature in October 2028;
- bonds with nominal value of KZT 62,500 million issued on 12 February 2020 at coupon rate of 10.75% per annum that are scheduled to mature in February 2026;
- bonds with nominal value of KZT 100,000 million issued on 6 May 2021 at coupon rate of 10.95% per annum that are scheduled to mature in May 2026;
- bonds with nominal value of KZT 100,000 million issued on 15 April 2024 at coupon rate of 13.00% per annum that are scheduled to mature in April 2027; and
- bonds with nominal value of KZT 65,000 million issued on 23 October 2024 at coupon rate of 13.49% per annum that are scheduled to mature in May 2028.

On 3 May 2023, the Group fully repaid the Tenge-denominated Eurobonds issued in 2018 in the amount of KZT 100,000 million. On 17 April 2024, the Group made a partial early purchase of the Tenge-denominated Eurobonds for a total amount of KZT 20,162 million. On 12 February 2025, the Group fully repaid the five-year Eurobonds for a total amount of KZT 41,927 million.

CNY-denominated Eurobonds. On 1 September 2025, DBK issued Eurobonds with a total nominal value of CNY 2,000 million at a coupon rate of 3.35% per annum, maturing in September 2028.

Mortgage Bonds. Mortgage bonds comprise debt securities denominated in Tenge that are issued by KHC. These bonds have fixed coupon rates varying from 0.1% to 10.5% per annum (effective interest rates vary from 10.27% to 13.09% per annum). They will be redeemed during the period from 2027 to 2054. Mortgage bonds are secured by customer loan agreements and relevant real estate that is the collateral for these loans.

In 2024, in accordance with the Programme for Refinancing Mortgage Housing Loans approved by the Resolution No. 69 of the Management Board of the NBK dated 24 April 2015 (the “**Programme for Refinancing Mortgage Housing Loans**”), the Group placed coupon bonds in the amount of KZT 1,154 million at coupon rate of 0.10% per annum. The bonds were recognised at fair value of KZT 33 million, calculated using the market rate of 13.09% per annum, and the difference between the nominal value and fair value of KZT 1,121 million was recognised as a Government grant and partially used in the amount of KZT 1,100 million.

As a result of amendments to the Programme for Refinancing Mortgage Housing Loans, the Framework Agreements between the Group and JSC “Kazakhstan Sustainability Fund” were revised to reduce the coupon rate on the existing mortgage bonds to 0.10% per annum effective 1 August 2024. The bonds were recognised at fair value, calculated using a market interest rate of 12.63% per annum, and the difference between the nominal value and the fair value of KZT 276 million was recognised as a Government grant.

In 2023, in accordance with the Programme for Refinancing Mortgage Housing Loans, the Group placed coupon bonds in the amount of KZT 39 million at coupon rates of 0.10% and 2.99% per annum. The bonds were recognised at fair value of KZT 1 million, calculated using the market rate of 13.8% per annum, and the difference between the nominal value and fair value of KZT 38 million was recognised as a Government grant.

Other Tenge-Denominated Bonds. Other Tenge-denominated bonds increased by 24.4%, or KZT 952,227 million, from KZT 3,905,186 million as of 31 December 2024 to KZT 4,857,413 million as of 31 December 2025. This increase in other Tenge-denominated bonds between 31 December 2024 and 31 December 2025 was primarily due to the issuance of 30 series of new other Tenge-denominated bonds in 2025 with the aggregate amount of KZT 1,225,600 million as of 31 December 2025, which was partially offset by the full repayment of 7 series of other Tenge-denominated bonds in 2025 that had an aggregate carrying amount of KZT 408,655 million as of 31 December 2025.

Other Tenge-denominated bonds increased by 22.8%, or KZT 726,252 million, from KZT 3,178,934 million as of 31 December 2023 to KZT 3,905,186 million as of 31 December 2024. This increase in other Tenge-denominated bonds between 31 December 2023 and 31 December 2024 was primarily due to the issuance of 15 series of new other Tenge-denominated bonds in 2024 with the aggregate carrying amount of KZT 1,083,534 million as of 31 December 2024, which was partially offset by the full repayment of eight series of other Tenge-denominated bonds in 2024 that had an aggregate carrying amount of KZT 353,020 million as of 31 December 2023.

Customer Accounts

The following table sets forth the breakdown of customer accounts of the Group as of 31 December 2023, 2024 and 2025 extracted from the Financial Statements:

	As of 31 December					
	2023	% of total	2024	% of total	2025	% of total
	(KZT millions)	(%)	(KZT millions)	(%)	(KZT millions)	(%)
State and public organisations						
- Current accounts.....	199	0.0	197	0.0	0.1	0.0
- Advances received as collateral for customer commitments	3	0.0	-	-	-	-
Other legal entities						
- Term deposits	73,157	2.9	170,577	6.3	11,744	0.4
- Current accounts.....	47,502	1.9	5,756	0.2	6,838	0.2
Individuals						
- Deposits.....	1,261,175	49.4	1,416,391	52.6	1,852,311	59.1
- Deposits received as collateral for customer commitments	1,101,625	43.2	1,007,647	37.4	1,105,309	35.3
- Current accounts/on demand accounts	67,781	2.7	91,402	3.4	157,432	5.0
Total customer accounts	2,551,442	100.0	2,691,970	100.0	3,133,635	100.0

Customer accounts increased by 16.4%, or KZT 441,665 million, from KZT 2,691,970 million as of 31 December 2024 to KZT 3,133,635 million as of 31 December 2025. This increase in customer accounts was primarily due to (i) an increase in amounts held with the Group by individuals in the form of term deposits and (ii) an increase in the balances of deposits received as collateral for customer commitments, partially offset by a decrease in term deposits held by other legal entities.

The Group's term deposits of individuals mainly include housing savings of Otbasys Bank's customers. According to the terms of the contracts on house construction savings, the Otbasys Bank's depositors have the right to receive housing loans in the amount equal to a difference between contract amount and their accumulated deposits, estimated fees and state premium based on the decision of Government if all requirements of signed contract with respect to house construction savings are fulfilled. Accordingly, as the portfolio of mortgage loans at Otbasys Bank increased as of 31 December 2025 as compared to 31 December 2024, housing savings of Otbasys Bank's customers also increased.

Customer accounts increased by 5.5%, or KZT 140,527 million, from KZT 2,551,442 million as of 31 December 2023 to KZT 2,691,970 million as of 31 December 2024. This increase in customer accounts between 31 December 2023 and December 2024 was primarily due to (i) the increase in deposits of individuals from KZT 1,261,175 million as of 31 December 2023 to KZT 1,416,391 million as of 31 December 2024 and (ii) the increase in term deposits of other legal entities from KZT 73,157 million as of 31 December 2023 to KZT 170,577 million as of 31 December 2024. The impact of these two increases was partially offset by the decrease in deposits of individuals received as collateral for customer commitments from KZT 1,101,625 million as of 31 December 2023 to KZT 1,007,647 million as of 31 December 2024.

Government Grants

The Group recorded as Government grants the amount of benefits received from loans provided at low interest rates by the Ministry of Finance.

Subsequent to the initial recognition of Government grants, the Group charged to profit or loss an amount corresponding to the renegotiated debt provided to the borrowers on favourable terms upon fulfilment of the conditions of the respective state programmes. The Group is responsible for allocation of benefits to ultimate borrowers through low-interest loans.

Government grants decreased by 12.1%, or KZT 148,082 million, from KZT 1,221,909 million as of 31 December 2024 to KZT 1,073,827 million as of 31 December 2025. This decrease in Government grants between 31 December 2024 and December 2025 was primarily due to (i) utilisation of government grants upon issuance of low interest loans to commercial banks in the aggregate amount of KZT 201,696 million, (ii) utilisation of government grant to reimburse interest expenses on debt securities issued in the amount of KZT 53,751 million and (iii) utilisation of government grant to issue loans to customer-borrowers under Ken-Dala Government Programme in the amount of KZT 58,612 million. The impact of these increases was partially offset principally by government grants from the Government of the Republic of Kazakhstan for covering expenses related to the interest on debt securities issued in the aggregate amount of KZT 157,979 million.

Government grants increased by 18.1%, or KZT 187,219 million, from KZT 1,034,690 million as of 31 December 2023 to KZT 1,221,909 million as of 31 December 2024. This increase in Government grants between 31 December 2023 and December 2024 was primarily due to (i) new Government grants in the aggregate amount of KZT 609,267 million, (ii) the recovery of the previously recognised amount of the Government grants due to modification of the terms of the contracts for loans issued in the amount of KZT 36,168 million and (iii) the recovery of the previously recognised amount of the Government grant due to early repayment of loans issued as part of the Government programme in the amount of KZT 23,469 million. The impact of these increase was partially offset principally by (i) utilisation of Government grants to purchase bonds issued by local executive authorities in the aggregate amount of KZT 220,609 million, (ii) amortisation for the year in the amount of KZT 66,609 million, (iii) utilisation of Government grants to issue loans under Bakytty Otbasys State Programme and State Programme of Industrial-Innovative Development of the Republic of Kazakhstan in the aggregate amount of KZT 58,327 million and (iv) utilisation of Government grants to issue loans under Ken-Dala and Enbek Government programmes in the aggregate amount of KZT 50,871 million.

Loans from Banks and Other Financial Institutions

The following table sets forth the breakdown of the Group's loans from banks and other financial institutions as of 31 December 2023, 2024 and 2025:

	As of 31 December					
	2023	% of total	2024	% of total	2025	% of total
	(KZT millions)	(%)	(KZT millions)	(%)	(KZT millions)	(%)
Loans from Zhasyl Damu JSC.....	-	-	300,566	30.4	451,457	21.7
Loans from NWF Samruk-Kazyna JSC	2,001	0.2	276,813	28.0	273,342	13.1
Loans with fixed interest rate						
Loans from OECD banks and other financial institutions	-	-	-	-	72,394	3.5
Loans from non-OECD banks and other financial institutions.....	169,278	19.8	107,825	10.9	710,968	34.2
Loans with floating interest rate						
Loans from OECD banks and other financial institutions	47,712	5.6	48,561	4.9	155,338	7.5
Loans from non-OECD banks and other financial institutions.....	657,484	76.8	708,290	71.6	933,151	44.8
Total loans with floating interest rates.....	705,196	82.3	756,851	76.5	1,088,489	52.3
Less unamortised portion of borrowing costs.....	(20,110)	(2.3)	(452,198)	(45.7)	(515,568)	(24.8)
Total loans from banks and other financial institutions	856,365	100.0	989,856	100.0	2,081,082	100.0

Loans from banks and other financial institutions increased by 110%, or KZT 1,091,226 million, from KZT 989,856 million as of 31 December 2024 to KZT 2,081,082 million as of 31 December 2025. (i) the increase in loans from Zhasyl Damu of KZT 150,891 million and (ii) the increase in the amount of loans with fixed interest rate from non-OECD banks and other financial institutions of KZT 603,144 million and (iii) the increase in the amount of loans with floating interest rate from OECD banks and non-OECD banks received by the Group of KZT 106,778 million and KZT 224,861 million, respectively. The impact of these increases was partially offset by a marginal increase in unamortised portion of borrowing costs from KZT 452,198 million as of 31 December 2024 to KZT 515,568 million as of 31 December 2025.

Loans from banks and other financial institutions increased by 15.6%, or KZT 133,491 million, from KZT 856,365 million as of 31 December 2023 to KZT 989,856 million as of 31 December 2024. This increase in loans from banks and other financial institutions between 31 December 2023 and December 2024 was primarily due to (i) the increase in loans from Samruk-Kazyna by KZT 274,513 million and (ii) the increase in the amount of loans with floating interest rate from non-OECD banks and other financial institutions received by the Group by KZT 123,850 million. The impact of these two increases was partially offset by (i) the decrease in the amount of loans with fixed interest rate from non-OECD banks and other financial institutions received by the Group by KZT 72,299 million as of 31 December 2024 as compared to 31 December 2023 and (ii) the increase in unamortised portion of borrowing costs from KZT 20,110 million as of 31 December 2023 to KZT 452,198 million as of 31 December 2024.

During the year ended 31 December 2025, the Group raised a loan from Zhasyl Damu in the amount of KZT 151,451 million. Initially the loan was recognised at fair value and was determined using the market rates ranging from 14.30% to 18.44% per annum. The difference of KZT 85,264 million between fair value and amounts received was recognised as a government grant due to the obligation of the Group to distribute benefits to ultimate borrowers through providing financing to leasing companies for further financing of projects in the processing industry.

In the same year, the Group,

- raised a loan of U.S.\$108 million and a loan of EUR 100 million from Cassa Depositi e Prestiti (CDP), which mature on 29 October 2034, respectively;
- raised a loan of CNY 1 billion from Bank of China Limited, London Branch, which matures on 15 December 2028;

- raised a loan of U.S.\$200 million from Deutsche Bank Trust Company Americas, which was set to matures in May 2026 and repaid the loan in full;
- repaid loans received from China Development Bank in the amount of U.S.\$136 million;
- raised from China Development Bank, (i) a loan of U.S.\$93 million which matures on 19 June 2034, (ii) a loan of CNY 1,254 million which matures on 13 December 2027, (iii) a loan of U.S.\$132 million, which matures on 19 June 2034, (iv) a loan of CNY 743 million, which mature on 11 August 2040 and (v) a loan of CNY 123 million which matures on 20 March 2035;
- raised a loan of KZT 50,000 million from Alatau City Bank JSC, which matures on 26 September 2028;
- raised a loan of KZT 100,000 million from ForteBank JSC, which matures on 29 May 2032;
- raised a loan of KZT 150,000 million from Halyk Bank of Kazakhstan JSC, which matures on 16 September 2032;
- received a deposit from China Construction Bank Corporation Astana Branch in the amount of CNY 350 million, which matures on 24 December 2025;
- fully repaid a loan received from China Construction Bank Corporation Astana Branch in the amount of U.S.\$100 million;
- fully repaid a loan received from The Export-Import Bank of China in the amount of U.S.\$38 million;
- raised a loan of CNY 1,400 million from The Export-Import Bank of China, which matures on 19 December 2028;
- fully repaid a loan received from Eurasian Development Bank in the amount of KZT 1,949 million;
- raised a loan of CNY 1,430 million from Industrial and Commercial Bank of China in Almaty, which matures in 2030; and
- raised a loan of CNY 4,000 million from China Development Bank Hong Kong Branch, which matures in 2030.

On 6 May 2024, the Group entered into a credit line agreement with Samruk-Kazyna. Under this agreement, the Group entered into loan agreements Samruk-Kazyna for a total amount of KZT 272,000 million with a maturity in 2034 and an interest rate of 0.01% per annum. The fair value of the loans at initial recognition was calculated by discounting future cash flows under the loan agreements using market interest rates in the range from 12.96% to 14.53% per annum. The discount on these loans was recognised as a Government grant in the amount of KZT 193,624 million.

In 2024, the Group obtained loans from Zhasyl Damu JSC in the aggregate amount of KZT 120,547 million. Initially the loans were recognised at fair value that was determined using the market rates ranging from 12.83% to 14.54% per annum. The difference between fair value of these loans and amounts received in the amount of KZT 69,739 million was recognised as a Government grant due to the obligation of the Group to distribute benefits to ultimate borrowers through providing financing to leasing companies for further financing of projects in the processing industry.

In the same year, the Group:

- attracted a deposit from China Construction Bank Corporation, Astana Branch, in the total amount of U.S.\$50 million (equivalent to KZT 23,948 million) maturing on 22 October 2024. This deposit was fully repaid by the DBK on the deposit's maturity date;
- raised a loan from Eurasian Development Bank in the total amount of U.S.\$90 million (equivalent to KZT 40,220 million) maturing on 4 October 2024. This loan was fully repaid by the DBK on the loan's maturity date;

- raised a loan from China Development Bank in the total amount of U.S.\$23 million (equivalent to KZT 10,444 million) maturing on 20 June 2033;
- raised a loan from China Construction Bank Corporation, Astana Branch, in the total amount of CNY 1,000 million (equivalent to KZT 67,128 million) maturing on 28 June 2027; and
- raised a loan from China Development Bank in the total amount of CNY 746 million (equivalent to KZT 53,717 million) maturing on 13 December 2027.

In addition, the Group repaid KZT 409,383 million of loans from banks and other financial institutions in 2024.

In 2023, the Group received an interbank deposit of U.S.\$250 million (equivalent to KZT 115,333 million) that was scheduled to mature in April 2024. On initial recognition of the deposit, the Group recognised gain of KZT 335 million. Fair value on initial recognition of the loan was calculated using market rate of 6.16% per annum.

In the same year, the Group:

- fully repaid, ahead of schedule, a loan from a foreign bank in the total amount of RUB 3,887 million (equivalent to KZT 20,199 million). The Group recognised expenses on early repayment of this loan in the amount of KZT 2,913 million; and
- fully repaid the outstanding balance of a loan from Eurasian Development Bank in the total amount of RUB 20,000 million (equivalent to KZT 133,960 million).

Loans from the Government of the Republic of Kazakhstan (“Loans from the Government”)

Loans from the Government increased by 3.7%, or KZT 30,377 million, from KZT 820,139 million as of 31 December 2024 to KZT 850,516 million as of 31 December 2025. The increase as of 31 December 2025 as compared to 31 December 2024 was primarily due to (i) the fact that the aggregate amount of loans from the Government received by the Group in 2025 exceeded the aggregate amount of repayments of loans from the Government by the Group in the same year by KZT 32,638 million and (ii) the incurrence of interest expense of KZT 100,481 million. The impact of these factors was partially offset by the discount on the initial recognition of loans from the Government in the amount of KZT 98,844 million.

Loans from the Government increased by 3.1%, or KZT 24,717 million, from KZT 795,421 million as of 31 December 2023 to KZT 820,139 million as of 31 December 2024. The increase as of 31 December 2024 as compared to 31 December 2023 was primarily due to (i) the fact that the aggregate amount of loans from the Government received by the Group in 2024 exceeded the aggregate amount of repayments of loans from the Government by the Group in the same year by KZT 78,775 million, (ii) the incurrence of interest expense of KZT 96,648 million and (iii) the effect of partial early repayment in the amount of KZT 16,357 million. The impact of these factors was partially offset by the discount on the initial recognition of loans from the Government in the amount of KZT 166,120 million.

In 2025:

- the Group received loans from the Government of the Republic of Kazakhstan in the total amount of KZT 250,560 million, including KZT 172,000 million for the implementation of State programmes;
- discount on initial recognition of KZT 40,027 million was recognised as Government grant in the consolidated statement of financial position. The Group used estimated market interest rates ranging from 13.92% to 18.17% per annum to measure the fair value of the loans received from the Government on initial recognition by discounting their future contractual cash flows; and
- discount on initial recognition of KZT 58,818 million was recognised directly in equity as an additional paid-in capital as the Group’s management determined that the Government acted in the capacity of a shareholder when providing the Group with said financial instruments at interest rates below market rates and without any additional conditions. The Group used estimated market interest rates ranging from 15.67% to 17.71% per annum to measure the fair value of the loans received from the Government on initial recognition by discounting their future contractual cash flows.

In 2024:

- the Group received loans from the Government of the Republic of Kazakhstan in the total amount of KZT 340,335 million, including KZT 274,480 million for the implementation of State programmes;
- discount on initial recognition of KZT 119,169 million was recognised as Government grant in the consolidated statement of financial position. The Group used estimated market interest rates ranging from 12.60% to 14.10% per annum to measure the fair value of the loans received from the Government on initial recognition by discounting their future contractual cash flows;
- discount on initial recognition of KZT 46,508 million was recognised directly in equity as an additional paid-in capital as the Group's management determined that the Government acted in the capacity of a shareholder when providing the Group with said financial instruments at interest rates below market rates and without any additional conditions. The Group used estimated market interest rates ranging from 12.93% to 14.75% per annum to measure the fair value of the loans received from the Government on initial recognition by discounting their future contractual cash flows.
- partially repaid, ahead of schedule, the loans provided by the Government in the amount of KZT 39,345 million. As a result of such early repayment, the Government grants were recalculated for the amount of unamortised portion of the discount of KZT 16,357 million.

In 2023:

- the Group received loans from the Ministry of Finance in the total amount of KZT 288,378 million, including KZT 220,194 million for the implementation of State programmes;
- discount on initial recognition of KZT 84,766 million was recognised as Government grant in the consolidated statement of financial position. The Group used estimated market interest rates ranging from 13.55% to 18.25% per annum to measure the fair value of the loans received from the Government on initial recognition by discounting their future contractual cash flows; and
- discount on initial recognition of KZT 64,334 million was recognised directly in equity as an additional paid-in capital as the Group's management determined that the Government acted in the capacity of a shareholder when providing the Group with said financial instruments at interest rates below market rates and without any additional conditions. The Group used estimated market interest rates ranging from 12.54% to 14.75% per annum to measure the fair value of the loans received from the Government on initial recognition by discounting their future contractual cash flows.

Contingencies, Including Credit-Related Commitments

Credit-Related Commitments

The primary purpose of credit related commitments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances the Group will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions, are collateralised by the underlying shipments of goods to which they relate or cash deposits and, therefore, carry less risk than a direct borrowing. Credit-related commitments are denominated in Tenge.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in the amount equal to the total unused commitments if the unused amounts were to be drawn down.

However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards.

The Group monitors the term to maturity of credit-related commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

The following table sets forth the breakdown of the Group's outstanding credit-related commitments as of 31 December 2023, 2024 and 2025 extracted from the Financial Statements:

	As of 31 December					
	2023	% of total	2024	% of total	2025	% of total
	(KZT millions)	(%)	(KZT millions)	(%)	(KZT millions)	(%)
Loan and credit line commitments to individuals	36,638	2.5	38,288	1.9	39,125	1.3
Loan and credit line commitments....	196,128	13.2	352,325	17.6	1,123,180	36.8
Finance lease commitments	444,299	30.0	697,635	34.9	796,755	26.1
Financial guarantees issued	806,051	54.3	910,386	45.6	1,096,112	35.9
Total credit-related commitments before provision	1,483,115	100.0	1,998,635	100.0	3,055,172	100.0

The total outstanding contractual amount of undrawn credit lines, letters of credit and guarantees does not necessarily represent future cash requirements, as these financial instruments may expire or terminate without being funded.

Credit-related commitments before provision of the Group increased by 52.9%, or KZT 1,056,537 million, from KZT 1,998,635 million as of 31 December 2024 to KZT 3,055,172 million as of 31 December 2025. This increase between 31 December 2024 and 31 December 2025 was primarily due to the increases in Loan and credit line commitments (by KZT 770,855 million) and financial guarantees issued (by KZT 185,726 million).

The increase in finance lease commitments between 31 December 2024 and 31 December 2025 was principally due to new finance lease commitments made in connection with the development of new projects. The increase in loan and credit line commitments between 31 December 2024 and 31 December 2025 was principally due to new agreements with respect to opening credit lines. The increase in financial guarantees issued between 31 December 2024 and 31 December 2025 was principally due to new guarantees issued to customers. Credit-related commitments before provision of the Group increased by 34.8%, or KZT 515,520 million, from KZT 1,483,115 million as of 31 December 2023 to KZT 1,998,635 million as of 31 December 2024. This increase between 31 December 2023 and 31 December 2024 was primarily due to the increases in (i) finance lease commitments (by KZT 253,337 million), (ii) loan and credit line commitments (by KZT 156,198 million) and (iii) financial guarantees issued (by KZT 104,335 million).

The increase in finance lease commitments between 31 December 2023 and 31 December 2024 was principally due to new finance lease commitments made in connection with the development of new projects. The increase in loan and credit line commitments between 31 December 2023 and 31 December 2024 was principally due to new agreements with respect to opening credit lines. The increase in financial guarantees issued between 31 December 2023 and 31 December 2024 was principally due to new guarantees issued to customers.

Legal Proceedings

From time to time and in the normal course of business, claims against the Issuer and/or its subsidiaries may arise. On the basis of its own estimates and internal professional advice, the Group's management is of the opinion that no material losses are expected to be incurred in respect of claims and, accordingly, no provision was made in the Financial Statements.

Tax Contingencies

The taxation system in Kazakhstan is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretations by different tax authorities, including opinions with respect to IFRS treatment of revenues, expenses and other items in the consolidated financial statements. Taxes are subject to review and investigation by various levels of authorities, which have the authority to impose severe fines and interest charges. A tax year remains open for

review by the tax authorities during the five subsequent calendar years. However, under certain circumstances, a tax year may remain open longer.

These circumstances may create tax risks in Kazakhstan that are more significant than in other countries. Management of the Group believes that it has provided adequately for tax liabilities based on its interpretations of applicable tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on the consolidated financial statements of the Group, if the authorities were successful in enforcing their interpretations, could be significant.

Investment-Related Commitments

The Group purchases private equity funds liabilities to include in its portfolio. The Group diversifies the investment portfolio by distributing investments among managers, relevant industries, territories and investment stages. As of 31 December 2025, the contractual amount of investment related commitments totalled KZT 32,680 million as compared to KZT 7,005 million as of 31 December 2024 and KZT 11,159 million as of December 2023. Under the constituent agreements of private equity funds, in case of default on capital commitments, after the manager issued a due claim, the Group may be subject to sanctions, including moratorium on interest, cessation of profit distribution, temporary denial of right to participate in the corporate governance of the funds and forced sale of OIC's share to co-investors and third parties. As of 31 December 2023, 2024 and 2025, the Group had no overdue investment commitments.

Compliance with Covenants

The subsidiaries of the Issuer are subject to certain covenants primarily relating to their borrowings. Non-compliance with these covenants may result in negative consequences for the Group. The Group was in compliance with covenants as of 31 December 2023, 2024 and 2025.

Insurance

The insurance industry in the Republic of Kazakhstan is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. The Group does not have full coverage for its premises and equipment, business interruption or third-party liability in respect of property or environmental damage arising from accidents on its property or related to operations. Until the Group obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on operations and consolidated financial position of the Group.

Material Accounting Estimates and Judgments

The Group makes estimates and assumptions that affect the amounts recognised in the consolidated financial statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgments are reviewed on an ongoing basis based on the Group's management experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group's management also makes certain judgments in the process of applying the accounting policies. Judgments that have the most significant effect on the amounts recognised in the consolidated financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include the following.

Impairment of Financial Instruments

Material accounting estimates and judgments with respect to impairment of financial instruments include the Group's management's assessment of whether credit risk on the financial asset has increased significantly since initial recognition; assessment of probability of default and loss given default; assessment of expected cash flows forecast for financial instruments classified as Stage 3 instruments (financial assets that have experienced a credit loss event, which means that the asset is considered credit impaired or non-performing) and incorporation of forward-looking information in the measurement of expected credit loss.

Tax, Currency and Customs Legislation

Tax, currency and customs legislation in Kazakhstan is subject to varying interpretations. In particular, the taxation system in Kazakhstan is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretations by different tax authorities, including opinions with respect to IFRS treatment of revenues, expenses and other items in the consolidated financial statements. Taxes are subject to review and investigation by various levels of authorities, which have the authority to impose severe fines and interest charges. A tax year remains open for review by the tax authorities during the five subsequent calendar years. However, under certain circumstances, a tax year may remain open longer.

These circumstances may create tax risks in Kazakhstan that are more significant than in other countries. Management of the Group believes that it has provided adequately for tax liabilities based on its interpretations of applicable tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on the consolidated financial statements of the Group, if the authorities were successful in enforcing their interpretations, could be significant.

Initial Recognition of Related Party Transactions

In the ordinary course of business, the Issuer and its subsidiaries transact with their respective related parties. Under IFRS 9, financial instruments on initial recognition are measured at fair value. Where there is no active market for such transactions, management applies judgment in determining whether transactions are priced at market or non-market interest rates. The basis for judgment is pricing for similar types of transactions with unrelated parties and effective interest rate analysis.

Determining the Fair Value of Financial Instruments in Emerging Stock Market in Kazakhstan

In determining the fair value of financial instruments, the Group uses quotes from the KASE as the most reliable source of information in an active market.

The Group's management analyses the frequency of operations conducted on the KASE in respect of securities in the portfolio and securities that are traded with sufficient frequency and sufficient volume are classified as Level 1 securities. The remaining securities that are listed on the KASE are classified as Level 2 securities.

If the Group has investments in unquoted assets, the fair value of such assets is determined based on valuation techniques such as discounted cash flow model as well as models based on data from similar operations performed on market conditions.

Management of the Group believes that it used every possible and most complete and accurate sources of fair value to measure reliably the fair value of these financial instruments.

Initial Recognition of the Borrowings and Investments at the Rates Below Market Rates under the State Development Programmes

Approach to accounting for, and evaluation of, borrowings and loans made under the State programmes to support economic development and approach to accounting for amortisation and utilisation of Government grants are disclosed in notes 8, 10, 11, 12, 15, 16, 17, 19, 22 and 26 of the 2025 Financial Statements, notes 8, 10, 11, 12, 16, 17, 18, 20, 23 and 27 of the 2024 Financial Statements and notes 8, 10, 11, 12, 16, 18, 20, 21 and 28 of the 2023 Financial Statements.

ASSET AND LIABILITY MANAGEMENT

General

The Group's operations are subject to a variety of risks, some of which are not within its control. These include liquidity risk, credit risk and market risk.

The Issuer's risk management policy consists in identifying and analysing risks faced by the Issuer, establishing limits on risk levels and relevant controls, and continuously assessing levels of risks and ensuring that exposure to risks stays within the established limits.

The subsidiaries of the Issuer maintain their own risk management policies and procedures of the subsidiaries which are regularly reviewed to reflect changes in the market conditions, proposed products and services and emerging best practices.

Risk Management Structure

The risk management structure of the Issuer comprises risk management at several levels with engagement of the following bodies and structural units of the Issuer: Board of Directors, Management Board, Committee of Asset and Liability Management, Risk Management Department, Internal Audit Service, collective bodies and other structural units.

Board of Directors

The first level of the risk management process is represented by the Board of Directors of the Issuer. The Board of Directors takes full responsibility for proper operation of risk management control system, management of key risks and corporate risk management system. The Board of Directors defines the objectives of the Issuer's activities and approves documents related to risk management.

Management Board

The second level of the risk management process is represented by the Management Board of the Issuer. The Management Board is responsible for the establishment of an efficient risk management system and risk control structure to provide for compliance with the corporate policy requirements. The Management Board is liable for the creation of a "risk consciousness" culture which reflects the risk management philosophy of the Issuer. In addition, the Management Board also bears liability for the implementation of an efficient risk management system where all employees have a clearly defined responsibility for risk management and are accountable for proper execution of their duties. The Management Board is authorised to execute a part of its functions in the risk management area through the establishment of respective committees.

Audit Committee

The Audit Committee of the Board of Directors is a standing advisory body of the Issuer's Board of Directors, established to enhance the efficiency and quality of the Board of Directors' work through the preparation of recommendations for the Board of Directors related to, among other things, monitoring the reliability and efficiency of the internal control and risk management systems and controlling the independence of the external and internal audit functions.

Committee of Assets and Liabilities Management ("CALM")

The CALM is a permanent collective body of the Issuer, accountable to the Management Board and operating within the powers defined by the Management Board. Its objectives are as follows: (i) ensuring timely and appropriate decision-making in the management of the Issuer's assets and liabilities (ii) attracting investors for cooperation with the Issuer (iii) maintaining an adequate level of financial stability (iv) enhancing the Issuer's profitability and (v) mitigating risks in investment decision-making.

Risk Management Department

The third level of the risk management process is represented by the Risk Management Department, which objectives include coordinating risk management and overseeing the implementation of general principles and methods of identifying, assessing, managing, and reporting financial and non-financial risks.

Internal Audit Service

The Internal Audit Service audits risk management procedures and risk assessment methods and develops proposals aimed at improving the efficiency of risk management procedures. The Internal Audit Service provides reports on the risk management system to the Board of Directors of the Issuer.

Structural units

One of the key elements of the Issuer's risk management structure is its structural units, represented by each employee. These structural units play a crucial role in the risk management process. The Issuer's employees identify, address, and manage risks daily, ensuring control over their potential impact on the business. Structural units are responsible for implementing the risk management action plan, timely identifying and communicating major risks in their business areas, and developing risk management proposals to be incorporated into the action plan.

Risk Management System

When assessing and identifying key risks, the Issuer follows a unified standard within a centralised risk management system model, developed with the involvement of an external consultant. This model includes an assessment of key risk types (liquidity risk, market risk, credit risk, and operational risk), as well as their aggregation and an evaluation of whether available funds are sufficient to cover the total calculated risk under both normal and stress conditions. The centralised risk management system also includes the identification of strategic risks that may impact the achievement of the Issuer's mission and key strategic performance indicators. It is designed to support the attainment of current strategic goals and objectives while minimising risks once these goals are achieved. The Group's key risks are identified through an assessment of risks inherent in all business processes within the Group and are visually represented on a risk map based on their materiality. Measures to minimise the key risks are implemented on a consistent basis pursuant to the approved Action Plans, according to the risk register. The risk map, risk register, the Key Risk Action Plan and the report of the implementation of the Action Plan are considered and approved by the Board of Directors of the Issuer on a quarterly basis.

Credit Risk

Credit risk is the risk that the Group will incur a loss because a counterparty to a financial instrument will fail to discharge its obligations.

The Group mitigates its credit risk by conducting a qualitative analysis of the counterparty's creditworthiness, structuring investment projects, diversifying assets, setting credit limits, requiring collateral, and implementing other measures to enhance credit quality.

The level of credit risk is regularly assessed, and measures to minimise it are implemented using various tools to evaluate the counterparty's creditworthiness and establish ceiling limits for individual borrowers or groups of related borrowers. When setting these limits, the Issuer considers the counterparties' minimum credit ratings assigned by international rating agencies and assesses their financial standing based on available financial statements and independent analysis. This risk is monitored and controlled on a consolidated basis by the Issuer's authorised body. For further information on the Group's management of liquidity risk, see Note 32 to the 2023 Financial Statements, Note 31 to the 2024 Financial Statements and Note 30 to the 2025 Financial Statements.

Liquidity Risk

Liquidity risk is the risk that the Group may face difficulties in obtaining funds to meet its liabilities. This risk arises when the maturities of assets and liabilities are mismatched, affecting the Group's ability to secure adequate liquid funds at an acceptable cost to meet its balance sheet and off-balance sheet obligations in a timely manner.

The Issuer manages liquidity seeking to ensure the continuous availability of funds required to discharge all its liabilities as they become due. The Issuer's liquidity management procedures include: (i) predicting cash flows and calculating the required level of liquid assets (ii) maintaining a diversified structure of the sources of financing (iii) managing the borrowings concentration and structure (iv) preparing the plans for debt financing (v) managing the portfolio of highly liquid assets, which can be freely sold as a protective measure in case of a gap in cash liquidity (vi) developing the backup options to maintain liquidity and the specified level of financing (vii) controlling the compliance of the Group's balance sheet liquidity figures with the established rates and limits.

For further information on the Group's management of liquidity risk, see Note 32 to the 2023 Financial Statements, Note 31 to the 2024 Financial Statements and Note 30 to the 2025 Financial Statements.

The following tables set forth a breakdown of the Group's assets and liabilities at carrying amounts by remaining contractual maturity as of 31 December 2023, 2024 and 2025:

As of December 2023							
	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 1 to 5 years	More than 5 years	No maturity	Total
	(KZT millions)						
Total assets	2,371,478	728,696	2,511,721	2,544,771	5,255,096	208,659	13,620,420
Total liabilities	(412,533)	(668,305)	(2,019,369)	(2,597,986)	(5,256,723)	-	(10,954,915)
Net position	1,958,945	60,391	492,352	(53,215)	(1,626)	208,659	2,665,505
As of December 2024							
	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 1 to 5 years	More than 5 years	No maturity	Total
	(KZT millions)						
Total assets	2,684,086	1,371,121	949,469	4,464,285	4,757,056	212,219	14,438,237
Total liabilities	(637,560)	(844,941)	(419,726)	(3,660,849)	(5,873,539)	-	(11,436,615)
Net position	2,046,526	526,180	529,744	803,436	(1,116,483)	212,219	3,001,622
As of December 2025							
	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 1 to 5 years	More than 5 years	No maturity	Total
	(KZT millions)						
Total assets	3,736,990	2,068,861	1,318,651	5,839,146	5,833,121	250,868	19,047,637
Total liabilities	(486,987)	(1,021,079)	(763,083)	(6,666,789)	(6,534,961)	-	(15,472,898)
Net position	3,250,003	1,047,783	555,568	(827,643)	(701,840)	250,868	3,574,739

For further information on the Group's management of maturity gaps, see Note 32 to the 2023 Financial Statements, Note 31 to the 2024 Financial Statements and Note 30 to the 2025 Financial Statements.

Market Risk

Market risks are risks associated with open positions in currency, interest rates and equity products, all of which are subject to the risk of general and specific changes in the market. Management of the Issuer sets limits on the value of risk that may be accepted, which is monitored on a regular basis. The subsidiaries of the Issuer set separate limits on the basis of the general limits established by the Issuer and also monitor their compliance on a regular basis.

Foreign Currency Risk

Currency risk is the risk that the value of a financial instrument may fluctuate due to changes in foreign exchange rates. The management of the Issuer and its subsidiaries monitors foreign exchange exposure, analyses the sensitivity of financial results to currency fluctuations, and assesses the level of foreign exchange risk. If necessary, limits may be set on the acceptable level of risk for currencies.

For further information relating to the sensitivity of the Group's income statement to changes in exchange rates, see Note 32 to the 2023 Financial Statements, Note 31 to the 2024 Financial Statements, and Note 30 to the 2025 Financial Statements.

Interest Rate Risk

Interest rate risk arises from the possibility that changes in interest rates may impact future cash flows or the fair value of financial instruments. The subsidiaries manage interest rate risk based on the principle of full cost coverage, ensuring that interest income sufficiently covers the costs of raising and deploying funds while also generating net profit and maintaining competitiveness. Report on interest rate classifies assets, liabilities, off-balance sheet claims and liabilities which are sensitive to changes in interest rates, and groups them in economically homogeneous and significant items, by time period depending on their maturities (for fixed rates) or time to their next reprice (for floating rates). Time periods and items of recorded assets, liabilities, off-balance sheet claims and liabilities can be changed by the Management Board of the Issuer.

For further information relating to the sensitivity of the Group's income statement to changes in interest rates, see Note 32 to the 2023 Financial Statements, Note 31 to the 2024 Financial Statements, and Note 30 to the 2025 Financial Statements.

Prepayment Risk

Prepayment risk is the risk that the Issuer will incur a financial loss because its customers or counterparties repay or request repayment earlier. The Issuer's financial results for the year ended 31 December 2023, 2024 and 2025 and equity for the year ended 31 December 2023, 2024 and 2025 have not been significantly impacted by changes in prepayment rates because such loans are carried at amortised cost and the prepayment right is at, or close to, the amortised cost of the loans and advances made to customers. See Note 32 to the 2023 Financial Statements, Note 31 to the 2024 Financial Statements, and Note 30 to the 2025 Financial Statements.

Operational Risk

Operational risk is the risk of losses to which is exposed the Group resulting from inadequate or erroneous internal processes, operation of systems, employees' actions and certain external events. The Issuer manages the operational risk using the following tools: (i) classification of events categorised as operational risks by maintaining a database of realised and potential risks, with the involvement of the responsible structural subdivision, which develops risk management recommendations for each event; (ii) calculation of capital provisions for operational risk, including comparisons with actual losses incurred due to the realisation of such risks; (iii) monitoring operational risk reports; and (iv) ensuring an adequate level of business continuity management. The results of operational risk monitoring are communicated to the relevant collegial bodies.

Anti-Corruption

In 2022, the Group formed an Anti-Corruption Compliance Service that reports to the Board of Directors of the Issuer in order to comply more effectively with prevailing anti-corruption rules. The Group has in place an Anti-Corruption Policy, Code of Business Conduct, Rules for Prevention of Corruption and Fraud, and other related regulatory documents. The Group's 2023 Anti-Corruption Compliance Programme that provides for measures aimed to combat corruption and fraud was approved by a resolution of the Issuer's Board of Directors.

BUSINESS OF THE GROUP

Overview

The Issuer is a holding company established in May 2013 to grow Kazakhstan's development institutions and to develop the national economy. The Issuer's overall mission is to promote the sustainable growth of the economy of the Republic of Kazakhstan through the support of domestic production of goods and services, infrastructure modernization, and strengthening of food security, based on principles of social responsibility in accordance with state policy and goals set by the Kazakhstan-2050 Strategy. The sole shareholder of the Issuer is the Government represented by the Ministry of National Economy.

The Issuer's seven wholly-owned subsidiaries undertake the following core activities:

- (i) providing financial (e.g., credit and investment) and non-financial support to investment projects in priority sectors of the economy with the aim of diversifying the economy, developing manufacturing and industry, exporting products produced in Kazakhstan, increasing innovation and SMEs conducted by DBK, ECA, Damu and QIC;
- (ii) raising capital, providing long-term financing for mortgages, reducing related borrowing costs and participating in the implementation of the Government's housing construction policy, conducted by Otbasyl Bank and KHC; and
- (iii) promoting the sustainable development of, and providing technical equipment to, the agro-industrial sector of Kazakhstan, conducted by ACC.

As of 31 December 2023 and, 2024 and 2025, the Issuer had consolidated total assets of KZT 13,620,420 million and, KZT 14,438,237 million and KZT 19,047,637 million, respectively, and consolidated total equity of KZT 2,665,505 million and, KZT 3,001,622 million and KZT 3,574,739 million, respectively. The Issuer generated KZT 407,647 million of consolidated net profit for the year ended 31 December 2023 (including KZT 406,719 million of net profit from continuing operations), KZT 408,220 million of consolidated net profit for the year ended 31 December 2024 (including KZT 417,773 million of net profit from continuing operations) and KZT 409,869 million of both consolidated net profit and profit from continuing operations for the year ended 31 December 2025.

The Issuer's legal address and place of business is 55a Mangilik Yel Avenue, Yessil district, Astana, Kazakhstan.

Development

The Issuer was incorporated in accordance with the Decree of the President of the Republic of Kazakhstan No. 571 *"On measures for optimisation of the management system of development institutions and financial organisations, and development of the national economy"* dated 22 May 2013 and the Decree of the Government of the Republic of Kazakhstan No. 516 entitled *"About measures for implementation of the Decree of the President of the Republic of Kazakhstan No. 571 dated 22 May 2013"* dated 25 May 2013.

The Group initially consisted of ten development institutions managed by government bodies and Samruk-Kazyna. These institutions included DBK, the Investment Fund of Kazakhstan, KazakhExport Export Insurance Company JSC (renamed the Export Credit Agency of Kazakhstan in May 2024), the Damu Entrepreneurship Development Fund, Kazyna Capital Management (renamed the Qazaqstan Investment Corporation in January 2023), QazTech Ventures, Housing Construction Savings Bank of Kazakhstan JSC (renamed Otbasyl Bank Housing Construction Savings Bank JSC in 2020), KHC, Housing Construction Guarantee Fund and Baiterek Development.

In December 2018 the Issuer listed its first series of Tenge bonds on the Kazakhstan Stock Exchange.

In 2019, the housing business of the Group was enhanced by merging Baiterek Development and Housing Construction Guarantee Fund into Kazakhstan Mortgage Company (renamed Kazakhstan Housing Company in January 2021).

On 15 March 2021, the Issuer established another development institution by taking over KazAgro National Managing Group and acquiring three subsidiaries: KazAgroFinance, ACC and the Fund for the Financial Support of Agriculture. In 2022, the Issuer transferred all its shares in KazAgroFinance to Agrarian Credit Corporation.

In August 2021, the Issuer sold its shareholding in the Investment Fund of Kazakhstan.

In September 2022, on the instruction of the Government, the Issuer purchased the Subsidiary Bank Sberbank of Russia Joint Stock Company from Sberbank of Russia PJSC. Subsidiary Bank Sberbank of Russia Joint Stock Company was later renamed Bereke Bank. In October 2024, the Issuer completed the sale of all of its shares in Bereke Bank to Lesha Bank.

In accordance with Order No. 297 of the Minister of National Economy of the Republic of Kazakhstan dated 22 December 2025, on 30 December 2025, the Issuer completed its state re-registration under its new name Baiterek National Investment Holding Joint Stock Company.

Mission and Strategies

General

The Kazakhstan-2050 Strategy is the most important state planning document that the Issuer considers in forming its development strategy. (See further “The Republic of Kazakhstan - Development Strategy”.) The Issuer’s mission is to pursue sustainable economic development in Kazakhstan in order to achieve the goals set by the Kazakhstan-2050 Strategy.

The Issuer’s development strategy is also based on other Government documents, including, the President of the Republic of Kazakhstan’s “Nation Plan - 100 Concrete Steps” (20 May 2015), the Presidential Address “Third Modernisation of Kazakhstan: Global Competitiveness” (31 January 2017), new state programmes such as the Presidential Address “Economic Course of a Fair Kazakhstan” (1 September 2023), and development concepts, such as the Concept for the Development of Small and Medium Enterprises in the Republic of Kazakhstan until 2030, approved by Government Decree No. 250 dated 27 April 2022, and other relevant strategic initiatives outlined in the Development Plan of the Issuer for 2024–2033 approved by Decree No. 1180 of the Government dated 25 December 2023 (the “**Development Plan**”).

The Development Plan is designed to be implemented by the Issuer on a sector-by-sector basis. The Development Plan describes the Issuer’s mission and vision for the economy of Kazakhstan as follows:

- The mission of the Issuer is to develop a competitive business, provide housing and strengthen food security based on principles of social responsibility; and
- The vision of the Issuer is a pro-active managing holding that qualitatively transforms the structure of the economy of Kazakhstan by developing new industry “growth points”.

The Development Plan stipulates the following eight key tasks in support of its mission:

- developing the non-resource sectors of the economy;
- developing entrepreneurship;
- developing the manufacturing industry;
- supporting the export of non-primary products;
- improving labour productivity;
- developing a competitive agro-industrial sector;
- increasing the investment attractiveness of the economy; and

- improving the welfare of the population.

The first six key tasks of the Group can be grouped together under the strategy of support for entrepreneurship, covering micro, small, medium and large businesses, industrial development and regional development.

The seventh key task of increasing investment attractiveness ties in with the Group's strategy of developing the ecosystem of equity financing in Kazakhstan, the Central Asian region and in the Eurasian Economic Union countries.

The eighth task of improving the welfare of the population related to the Group's strategy of providing housing for the population.

Entrepreneurship Support

Industrial Development

The Group's activities in support of industrial projects are principally accomplished through DBK and its subsidiary "Industrial Development Fund" JSC, which support industrial development through debt financing and leasing instruments.

When funding priority industrial projects, the Group seeks to attract private investors as a means of reducing State participation, through co-financing instruments such as (syndicated loans), and loan portfolio securitisation. The use of such tools seek to reduce the economic cost of financing for the Group by effective structuring of projects, distributing risks between co-financing parties, and improving the requirements for transparency and quality of management at enterprises being funded.

Syndicated loans to support industrial development are expected to be provided with the participation of DBK and commercial banks. DBK intends to participate in financing during the investment phase. Subsequently, when the project targets are reached (the post-investment phase of the project), DBK will seek a phased transfer of its loan share to commercial banks.

In addition, participation of private investors at the initial stage of project financing is expected to significantly increase the likelihood of the projects' success. Furthermore, the presence of a State partner in the financing structure represented by the National Development Institute is expected to increase the trust and confidence of private investors in joint projects.

Consequently, priority in the selection of industrial projects will be given to projects with a greater share of private investor participation. The Group aims to finance joint projects on a parity basis, thereby effectively sharing risks and increasing the effect of financial leverage by attracting additional private investment.

In addition, co-investment in industrial projects is expected to involve QIC by using the private equity funds in QIC's portfolio to attract additional investments from international institutional investors under co-investment agreements. Furthermore, QIC intends to work on improving the market for distressed assets in Kazakhstan by creating and investing in distressed asset funds with the involvement of experienced general partners to assist with their management. It also intends to attract funds from other investors in this segment of the market.

Support for Micro, Small and Medium-Sized Enterprises

The activities of the Group in supporting micro, small and medium-sized enterprises are handled by the Issuer's subsidiary Damu, which provides both financial (lending at subsidised rates, guaranteeing loans of commercial banks, conditional placement of funds in commercial banks and microcredit operations) and non-financial support (advisory support for projects).

The Group intends to focus its financial support to micro, small and medium-sized enterprises on sub-segments of micro and small businesses in order to achieve the maximum effect in terms of jobs created. To this end, within the framework of the National Entrepreneurship Development Project, Damu will continue to support micro and small businesses through interest rate subsidies and loan guarantees for commercial banks and microfinance organisations.

In accordance with the Concept of the Development of the Manufacturing Industry of the Republic of Kazakhstan for 2023-2029, support projects will be selected on the basis of their potential effect on labour productivity, modernisation and expansion of production as well as their general effectiveness.

In order to support SMEs, the Group intends to encourage large enterprises to cooperate with SMEs by providing supply chain support and work with the regions to develop SMEs.

Increasing Export Potential

Support in increasing export potential is provided principally through the activities of the Issuer's subsidiary ECA. In the near future, the Group intends to expand ECA's foreign presence to increase the number of partners and customers in countries of priority and high interest.

As part of the digitalisation of the business processes of the Group, domestic exporters' access to the services provided by ECA will be improved and further automated through bgov.kz.

In addition, the Group intends to continue to provide package support through ECA, QIC, DBK, ACC and Damu with the aim of increasing the number of new exporters.

Agribusiness Development

Within the Group, the Issuer's subsidiary ACC is responsible for supporting agribusiness development in Kazakhstan. Its activities are guided by the "Concept of Development of the Agro-Industrial Complex of the Republic of Kazakhstan for 2021-2030", which deals with various measures for agribusiness development, including subsidising interest rates on loans and leasing, developing a loan guarantee system, improving the efficiency of the agricultural insurance system, equity financing, co-financing, funding through ACC and other measures. It also seeks to involve commercial banks and other private financial organisations in lending to the agro-industrial sector.

To implement those measures that directly involve ACC, the Group's management intends to continue to work on automation of ACC's business processes in line with best practices and standards in the financial services industry. In general, the Group's focus on financing agricultural producers and rural development will be maintained, and the pace of financing agriculture and the agro-industrial sector will be aligned with the Government's policies and funds allocated by the Government.

Development of the Private Equity Ecosystem

Development of the Venture Financing Market

QIC, as an international fund of funds, has the opportunity to cooperate with global venture funds, which is expected to help to further increase the attractiveness of projects in Kazakhstan in the global market. QIC intends to participate in the development of the venture financing segment with a focus on investments in the early (post-seed) and growth stages.

Investments at the seed stages of projects are very risky and have a high failure rate. Consequently, QIC, with the participation of its international partners, intends to invest in the most promising projects both at the post-seed stage and as they scale on the market.

As part of the development of venture financing, QIC intends to act as an operator of the co-financing programme for private venture funds. It will promote the dissemination of standards, best practices and analytical reviews of the activities of professional venture market participants to ensure gradual integration into the global innovation ecosystem. This goal is expected to be achieved by creating and participating in venture funds, creating an extensive network of partners and expanding the pool of projects.

Development of the Private Equity Market

Foreign investments play a special role in the economy of Kazakhstan, being a source of capitalisation as well as the development of the country's infrastructure and new technologies. Attracting foreign investments into the economy of Kazakhstan creates new jobs and new innovative enterprises with high added value.

The key player in the direct investment market within the Group is QIC, whose tasks are to attract direct investments and promote the sustainable economic development of Kazakhstan by providing equity financing through direct investment funds. QIC invests and manages direct investment funds in partnership with international institutional investors, sovereign wealth funds and international financial institutions with the aim of further growing and improving the competitiveness of such funds.

QIC focusses on creating additional value for portfolio companies by developing a business network of contacts in key industries, working together with captive funds and supporting general partner teams in acquiring investment assets.

Further development of the direct investment market in the country through the activities of QIC is expected to (i) contribute to increasing the investment attractiveness of Kazakhstan; (ii) facilitate access to capital available in the global direct investment market; and (iii) allow the creation of market-leading companies. This in turn is expected to further promote economic diversification.

Development of the Distressed Asset Market

Currently, the distressed asset market in Kazakhstan has no specialised fund managers among its active participants. Nevertheless, the size of the distressed asset market is large and it has a high potential for development. Currently, participants in this market are mainly represented by commercial banks and State funds.

In order to improve the distressed asset market, QIC intends to participate in distressed asset funds, which will invest in distressed assets, including debt obligations of companies that are unable to service their debts or companies that are experiencing liquidity problems and need additional capital for restructuring and operational changes. To effectively manage the available capital of funds allocated for investment in this segment of the market, QIC plans to attract independent and experienced general partners, which will invest in companies with a reliable business models and significant intrinsic value, allowing them to return to profitability through restructuring.

Development of the Infrastructure Assets Market

The infrastructure market represents a relatively small part of the global direct investment market, but the volume of assets under management in this sector is steadily growing due to the consistently high profitability of infrastructure investment projects. At the same time, the main advantage of infrastructure is that the sector has a low correlation with other assets, is hedged against inflation and provides a reliable income stream.

Infrastructure investments are mainly carried out through public-private partnerships (“PPP”). In view of the potential of the market for further development, QIC intends to contribute to the development of the infrastructure assets market through the creation of a fund/platforms focused on financing infrastructure projects in such industries as transit infrastructure (roads, railways and water channels), social infrastructure (construction of medical and educational facilities) and sustainable energy projects with the involvement of local institutional investors.

Providing the Population with Affordable Housing

Otbasy Bank and KHC are responsible for the Group’s activities aimed at increasing housing affordability in Kazakhstan.

Increase in Housing Stock

In order to increase the volume of construction of housing and create a comfortable urban environment, KHC intends to increase the financing of complex development projects.

Assistance in Increasing the Affordability of Housing for the Population

Otbasy Bank participates in a number of mortgage programmes directed at lower income groups. Under the “Nauryz” and “Nauryz – Zhumysker” programmes over 16,000 loans totalling KZT 426 billion were issued. The Group’s management believes that the lack of a developed mortgage market and lack of robust participation from commercial banks leads to “unsatisfied demand” totalling KZT 450 to 500 billion per year.

The Prime Minister directed that (i) the relevant authorities develop new approaches to expanding commercial mortgage lending by second-tier banks in order to reduce reliance on state housing programmes, while Otbasys Bank is expected to focus primarily on supporting vulnerable segments of the population; (ii) the Ministry of Industry and Construction updates and adopts the necessary regulatory acts under the Construction Code; and (iii) the Ministry of Industry and Construction (together with the Issuer) ensures the timely launch of 38 new construction sector projects in 2026. In this context, Otbasys Bank aims to originate its new housing loans (secured by KHC guarantees) in an amount of KZT 1,600 billion (compared to KZT 2,350 for 2025).

Provision of Housing for People on Waiting Lists

Citizens of Kazakhstan who are in need of housing from the State housing fund or in need of housing rented by a local executive body in a private housing fund are registered on waiting lists.

Working within the framework of the Government's Concept of Development of Housing and Communal Infrastructure for 2023-2029 and with the goal of increasing the supply of affordable housing for people on waiting lists, the Group currently plans to provide financing for the construction of affordable housing by repurchasing bonds of local executive authorities. Working within the framework of the Government's Concept of Development of Housing and Communal Infrastructure for 2023-2029 and with the goal of increasing the supply of affordable housing for people on waiting lists, the Group currently plans to provide financing for the construction, acquisition and renovation of affordable housing by repurchasing bonds of local executive authorities. According to the Group's Development Strategy through 2033, KZT 839 billion is allocated for this purpose as a cumulative amount starting from 2024. This figure is subject to revision as the Strategy and Development Plan are updated and are contingent on receiving funds from the Government specifically for this purpose.

The Group intends to continue to provide preferential loans for people on waiting lists within the framework of the relevant Government programmes and in line with the funds allocated from the State budget.

Furthermore, the Group and the responsible Governmental agencies and local executive authorities are currently considering transferring the rental housing fund being used by local executive authorities (39,000 apartments) to KHC. Under the proposal, people on the waiting lists who currently rent these apartments from local executive authorities and who can confirm their income, would be able to switch from a lease with an indefinite term to becoming owners of their apartments. This will allow reinvestment of these funds in the purchase of new rental housing without additional allocation of funds from State budget.

Reducing the Share of the Shadow Market in the construction of Multi-Apartment Residential Buildings

Kazakhstan's shadow market for multi-apartment housing construction is large, and its very existence is detrimental to the development of an effective housing market. In the context of housing and construction, a "shadow market" refers to an unregulated, private sector market in which transactions occur outside the formal, transparent channels of the mainstream housing market. This might involve activities like unregulated construction and property transactions or financing, which often lack the oversight and documentation of conventional markets.

To tackle this issue, the Group plans to implement a number of measures including:

- stimulating the supply of multi-apartment housing by significantly reducing the legal requirements for developers and projects while at the same time increasing responsibility for breach. This will be done in particular by increasing penalties for violation and enhancing measures that penalise the mis-advertising of housing under construction;
- introducing additional requirements for notaries and commercial banks to monitor housing construction contracts (including housing cooperatives), as well as studying the feasibility of moving all real estate transactions to a non-cash settled system;
- introducing legislation that will provide for the right of the local executive authorities and KHC to acquire guaranteed multi-apartment housing under construction and covered by KHC guarantees; and

- ensuring that guaranteed housing under construction is included in the Government's "7-20-25" mortgage programme.

Participation in Government Programmes

The Issuer participates in the implementation of the following strategic policies:

- The Concept for the Development of Small and Medium-Sized Businesses in the Republic of Kazakhstan 2030, approved by Resolution No. 250 of the Government of the Republic of Kazakhstan dated 27 April 2022;
- The Concept for the Development of the Agro-Industrial Complex of the Republic of Kazakhstan for 2021-2030, approved by Resolution No. 960 of the Government of the Republic of Kazakhstan dated 30 December 2021;
- The Concept for the Development of the Manufacturing Industry of the Republic of Kazakhstan for 2023-2029, approved by Resolution No. 846 of the Government of the Republic of Kazakhstan dated 20 December 2018;
- The Concept for Housing and Communal Infrastructure Development for 2023-2029, approved by Resolution No. 736 of the Government of the Republic of Kazakhstan dated 23 September 2022; and
- The National Project for the "Modernization of the Energy and Utility Sectors," approved by Resolution No. 1102 of the Government of the Republic of Kazakhstan dated 25 December 2024.

Description of the Issuer, its Subsidiaries and their Activities

The Issuer as the Holding Company of the Group

The Issuer is an integrated development institution, which was created to promote the high-quality development of the economy of Kazakhstan by rendering support to the priority economic sectors.

The Issuer is a holding company and performs its principal business activities through its subsidiaries. In doing this, the Issuer's main goals and objectives are as follows:

- implementing an efficient risk management system for the Group;
- increasing transparency and public confidence in the economy;
- capitalising on synergies from its subsidiaries' activities;
- improving the subsidiaries' economic performance;
- attracting additional investments; and
- maintaining business relationship with the private sector.

The activities of the Issuer's subsidiaries are directed at developing the agro-industrial complex, supporting businesses and ensuring the affordability of housing for the population of Kazakhstan. The Issuer has seven direct subsidiaries involved in the implementation of Government policy and Government programmes, which consist of:

- four development institutions: DBK, ECA, Damu and QIC. The objective of these institutions is to provide credit, investment and other financial and non-financial support to investment projects in priority sectors of the economy with the aim of diversifying the economy, developing manufacturing and industry, exporting products produced in Kazakhstan, increasing innovation and supporting SMEs;

- two other financial institutions: Otbas Bank and KHC. These institutions are tasked with raising capital, providing long-term financing for mortgages and reducing related borrowing costs, as well as participating in the implementation of the Government's housing construction policy.
- ACC, a financial institution established to promote the sustainable development of, and to provide technical equipment to, the agro-industrial sector of Kazakhstan through accessible and effective financing arrangements for agro-industrial operations.

The Issuer manages and supervises the operations of its subsidiaries and is one of the sources of funding for them. Although certain subsidiaries borrow directly from third parties or in the public debt markets, the Issuer also acts as a central source of funding for the Group consolidating funds such as concessional loans from the State Budget and the National Fund of the Republic of Kazakhstan and on-lending such funds to its subsidiaries. The Issuer is moving away from a purely financing-focused approach toward becoming a central co-ordinator of Kazakhstan's investment system.

As development finance institutions, these Group companies typically provide financing on concessional terms, focusing on long-term, high-value, and high-risk projects that are underserved by the commercial banking sector. With the exception of Otbas Bank, which collects housing-related deposits, the Group's banking subsidiaries do not take deposits from the public. Accordingly, the Group's primary funding sources include Government capital, concessional funding, and the issuance of debt securities on the domestic and international capital markets.

Subsidiaries of the Issuer

The table below provides certain information on the direct wholly-owned subsidiaries of the Issuer as of the date of this Base Offering Memorandum.

Full legal name	Year founded	Issuer ownership	Focus area	Methods of support
Export Credit Agency of Kazakhstan JSC (formerly the KazakhExport Export Insurance Company JSC)	2003	100%	Support growth of Kazakhstan's non-primary exports.	• Insurance • Export and pre-export financing
Development Bank of Kazakhstan JSC	2001	100%	Large and medium business support	• Debt financing • Guarantees • Leasing • Export and pre-export financing
Damu Entrepreneurship Development Fund JSC	1997	100%	Support for SMEs	• Guaranteeing • Subsidy assistance • Lending through conditional deposits with second-tier banks and microfinance organisations
Qazaqstan Investment Corporation JSC (formerly Kazyna Capital Management Joint Stock Company)	2007	100%	Shared financing Venture capital funding	• Shared financing • Participating in venture funds
Agrarian Credit Corporation JSC	2001	100%	Supporting the agro-industrial sector	• Lending to agro-industrial entities • Financing investment projects • Lending for spring sowing and harvesting campaigns • Funding financial institutions • Microlending for small businesses • Assistance with insurance premium subsidy
Kazakhstan Housing Company JSC	2000	100%	Providing housing for the population of Kazakhstan	• Financing developers through purchase of LEA securities • Rental housing with an option to buy • Mortgage lending

				• Guaranteeing shared housing construction • Subsidising private development loans • Financing investment projects
Otbasy Bank JSC	2003	100%	Providing housing for the population of Kazakhstan	• Issuing housing loans • Mortgage lending

ECA

ECA was incorporated by Government Decree 442 of 12 May 2003. It is the only specialised insurance organisation in Kazakhstan that performs the functions of an export and credit agent. In March 2017, ECA was assigned the status of a national company and officially became the single centre for export financing support. The bill “*On Changes and Amendments to Certain Legal Acts of the Republic of Kazakhstan Concerning the Export Credit Agency and Enhancement of the Export of Non-Resource Goods (Works, Services)*”, which was adopted in January 2024, created a special legal status for ECA and contained measures aimed at supporting and developing its role. By Resolution 261 of the Government of the Republic of Kazakhstan dated April 8, 2024, ECA was officially granted the status of export credit agency, making it the first export credit institution in the Central Asian region.

The ECA Development Plan aims to achieve the objectives set out in the National Development Plan of the Republic of Kazakhstan 2029 which include supporting non-primary exports by improving operational activities, including boosting efficiency and providing financial stability.

In December 2025, ECA approved a Climate Strategy defining the ECA’s long-term approach to managing climate risks, reducing carbon impact, and supporting the sustainable development of the country’s exports. The adoption of the Climate Strategy aligns with global trends in the development of the financial sector and sustainability and climate-related disclosure standards.

ECA’s registered office is located in Astana. It also has a representative office in Almaty.

In September 2025, Moody’s affirmed the long-term rating of ECA of “Baa1” with stable outlook.

Key Financial Information

	As of, or for the year ended, 31 December 2023	As of, or for the year ended, 31 December 2024	As of, or for the year ended, 31 December 2025
Return on average assets ⁽¹⁾ (in %)	3.4	5.3	7.2
Debt/equity ⁽²⁾	0.3	0.4	0.4
Assets (in KZT millions)	153,387	179,241	207,862
Growth in assets ⁽³⁾ (in %)	8.7	16.9	16
Net profit (in KZT millions)	4,954	8,819	14,003

Notes:

(1) Return on average assets is calculated as net profit divided by average total assets during the year and expressed as a percentage. Average total assets during the year are calculated based on opening and closing balances for each year.

(2) Debt/equity is calculated as total liabilities of the subsidiary over total equity of the subsidiary.

(3) Growth in assets is calculated as the closing balance of total assets for the year divided by the opening balance of total assets for the year and expressed as a percentage.

Description of Activities

ECA is a single operator for the promotion of products from Kazakhstan by insuring non-primary exports. It provides insurance protection to manufacturing sector exporters and commercial banks, covering the risk of non-payment in foreign trade transactions and ensuring the security of export deals. ECA’s coverage includes political risks such as restrictions or prohibitions on currency conversion and payment transfers, riots, civil unrest, war,

contract termination or non- execution by a foreign government agency and restrictions or prohibitions on the supply of goods by a foreign state. It also protects against commercial risks, including a buyer’s failure to meet contractual obligations, buyer bankruptcy or liquidation and bankruptcy of a foreign bank. ECA’s work focuses on mitigating these commercial and political risks in order to support exports of goods services from Kazakhstan and investments abroad. Its insurance instruments are designed in line with international best practices in export credit insurance and tailored to meet the needs of both potential and existing clients.

ECA relies on 25 support mechanisms including export credit insurance and short-term receivables insurance to protect exporters based in Kazakhstan from the risk of non-payment by foreign buyers, as well as pre-export financing granted to exporters from Kazakhstan to replenish working capital. Other tools include insurance of exporters’ civil liability to protect foreign importers who have made advance payments, third-party liability insurance for exporters which have issued bonds to protect bondholders against default risks and insurance granted to exporters against non-payment for completed works/services. ECA also offers exporters’ banks protection against risks related to letters of credit issued on behalf of importers, letters of credit as a form of payment to foreign buyers and loan and project finance insurance to protect financial institutions that have granted loans to exporters. Additional tools include financial leasing insurance, which provides access to leasing products, civil liability insurance for exporters, which grants financial institutions protection against exporters’ non-payment risks, and insurance for banks/exporters of bank guarantees issued by foreign banks. Other mechanisms include insurance for banks for exporters’ foreign exchange obligations, insurance for financial organisations for international factoring operations, insurance for credit institutions financing importers, insurance for financial institutions financing exporters based in Kazakhstan and insurance for investors from Kazakhstan financing a foreign company. The expansion of the mandate allowed the introduction of new support tools, including the launch of export operation guarantees for which the ECA established its own collateral service.

ECA is a member of Net Zero Export Credit Agencies Alliance (“**NZECA**”).

In 2026 the Issuer and ECA launched the Exporters Showcase digital platform, designed to promote products made in Kazakhstan to international buyers by providing ECA-certified, export-oriented product listings in certain key sectors: light industry, food and chemicals, agriculture, metallurgy, machine engineering, and construction.

For the year ended 31 December 2025, ECA supported the implementation of 535 export contracts totalling KZT 1,668 billion (compared to 468 projects worth KZT 1,178 billion in 2024).

Trade financing provided for the year ended 31 December 2025 amounted to KZT 16,717 million in 2025 (compared to KZT 22,544 million in 2024 and KZT 6,612 million in 2023).

Pre-export financing provided for the year ended 31 December 2025 amounted to KZT 75,452 million (compared to KZT 7,622 million in 2024 and KZT 12,723 million in 2023).

DBK

Introduction

DBK was incorporated in 2001 under the law “On the Development Bank of Kazakhstan” No. 178-II dated 25 April 2001. DBK is a national development institution, the main aims of which are to improve and increase the efficiency and effectiveness of Government investment, to develop industrial infrastructure and the manufacturing industry and to promote foreign and domestic investment in Kazakhstan.

DBK’s registered office is located in Astana.

Fitch affirmed DBK’s long-term foreign- and local-currency ratings of ‘BBB’ with stable outlook. Moody’s assigned long-term rating to DBK of “Baa1” with stable outlook.

Key Financial Information

Notes:

- (1) Return on average assets is calculated as net profit divided by average total assets during the year and expressed as a percentage. Average total assets during the year are calculated based on opening and closing balances for each year.
- (2) Debt/equity is calculated as total liabilities of the subsidiary over total equity of the subsidiary.
- (3) Growth in assets is calculated as the closing balance of total assets for the year divided by the opening balance of total assets for the year and expressed as a percentage.

Description of Activities

As a part of its role in Kazakhstan's industrial development programme, DBK provides medium (five or more years) and long-term (ten to twenty years) financing for (i) investment projects of KZT 7 billion or more; (ii) food or beverage industry investment projects and public private partnership projects of KZT 3 billion or more; and (iii) export transactions of KZT 1 billion or more. In addition to the potential impact of each project, DBK assesses whether a project has the potential to increase output capacity, improve labour productivity and increase export revenues and the amount of tax revenues and analyses the shareholding structure of each project. In determining which projects or transactions to finance, DBK gives priority to private investor projects, projects that have high development scores and those that are designed to establish new or develop existing energy, communication, transport infrastructure, agricultural and production facilities, as well as commercial service industries including tourism and hospitality.

DBK does not participate in retail banking activities and does not accept deposits from customers who are not borrowers of DBK or customers of DBK under an agency agreement.

Industrial Development Fund JSC ("**IDF**"), DBK's wholly-owned subsidiary, offers short- and long-term (up to 20 years) lease financing in various forms, including for industrial equipment and leasing of industrial buildings. IDF invests only in large-scale projects valued at over KZT 500 million or more. IDF provides financial leasing for investment projects in priority sectors of the economy under Government support programmes and investment projects in the consumer goods industry. In 2024, IDF, as one of the key lease financing and lending operators under Government programmes, continued its work to help develop new production facilities and modernise existing ones, support domestic automotive companies, and provide lease financing to renew passenger railway car fleet in Kazakhstan.

Damu

Introduction

Damu was incorporated under Government Decree 665 dated 26 April 1997. Damu's mission is to play an active role in the sustainable development of micro enterprises and SMEs in Kazakhstan, through the implementation of comprehensive and effective support tools.

Damu's registered office is located in Almaty.

Moody's assigned a long-term rating to Damu of "Baa2" with stable outlook.

Key Financial Information

	As of, or for the year ended, 31 December 2023	As of, or for the year ended, 31 December 2024	As of, or for the year ended, 31 December 2025
Return on average assets ⁽¹⁾ (in %)	9.1	6.3	3.9
Debt/equity ⁽²⁾	1.1	1.2	1.3
Assets (in KZT millions)	422,136	418,050	526,361
Growth in assets ⁽³⁾ (in %)	(1.3)	(1.0)	20.5
Net profit (in KZT millions)	38,592	26,341	18,763

Notes:

(1) Return on average assets is calculated as net profit divided by average total assets during the year and expressed as a percentage. Average total assets during the year are calculated based on opening and closing balances for each year.

(2) Debt/equity is calculated as total liabilities of the subsidiary over total equity of the subsidiary.

(3) Growth in assets is calculated as the closing balance of total assets for the year divided by the opening balance of total assets for the year and expressed as a percentage.

Description of Activities

Damu provides financing to SMEs and microfinancing organisations through commercial banks. The credit risk of the ultimate borrowers is transferred to commercial banks.

Damu assists SME development through offering a range of products and services to entrepreneurs, including:

- concessional lending under lending programmes with commercial banks, microfinance organisations, leasing companies and other partners of Damu;
- subsidising interest rates on loans (including microloans) and leasing deals;
- guaranteeing loans;
- consultancy support;
- disseminating informational and analytical materials; and
- monitoring and compliance reporting of the intended use of loan proceeds and the implementation the entrepreneurial projects.

The metrics of Damu's financing programmes for 2023, 2024 and 2025 are as follows:

Instrument	2023	2024	2025
Financing entrepreneurs through a conditional placement of funds with commercial banks/ microfinance organisations/leasing companies			
Number of participants	3,330	2,717	3,546
Total financing amounts (in KZT billions)	197.9	254	817
Subsidised loans			
Number of participants	12,339	17,623	3,831
Total loans (in KZT billions)	1,005.2	1,014	433,3
Loan guarantees			
Number of participants	8,183	9,173	5,657

Instrument	2023	2024	2025
Total loans (in KZT billions)	363.2	445	966,1

Under the “Regional financing of small and medium-sized private businesses’ projects” programme, Damu raises funds from local executive authorities and distributes these funds alongside its own. These funds are used to finance entrepreneurs who implement their projects in specified sectors of the economy. The local executive authorities determine which sectors of the economy are to be prioritised in their regions.

To expand the coverage of micro enterprises and SMEs with its financial programmes, Damu continues to implement conditional placement funds through financial partners, including commercial banks, microfinance organisations and leasing companies.

In 2024, in addition to subsidising interest rates on loans, a new programme was introduced to subsidise part of the coupon interest rate on bonds or Islamic finance securities issued by SMEs. This initiative aims to encourage SMEs to enter the stock market and attract alternative financing sources. In March 2026, Damu announces the launch of the “Örleu – Leasing,” program to support modernization for small and medium-sized enterprises (“SMEs”) in the manufacturing sector.

In addition, Damu provides guarantees to partially cover the risks for financial institutions lending to SMEs.

QIC

Introduction

QIC was incorporated on 7 March 2007. Its activities are governed, among other regulations, by the Law of the Republic of Kazakhstan No. 576-II “On Investment and Venture Funds” dated 7 July 2004, and the Law of the Republic of Kazakhstan No. 379-V ZRK, “On Public-Private Partnership” dated 31 October 2015. QIC is a private equity fund of funds established to promote sustainable growth of the economy. QIC’s registered office is in Astana.

Fitch affirmed QIC’s long-term foreign- and local-currency ratings of ‘BBB-’ with stable outlook.

Key Financial Information

Description of Activities

QIC focuses on building Kazakhstan's private equity infrastructure, attracting foreign investments into priority economic sectors, leveraging international best practices, and facilitating the transfer of innovative knowledge and technologies in the private equity sector. QIC's objectives include attracting private equity investment and promoting the sustainable economic development of Kazakhstan by providing financing through private equity funds ("PEFs"). QIC invests and manages the PEFs in partnership with international institutional investors, sovereign wealth funds and international financial organisations.

As of 31 December 2025, QIC participated in 19 private equity funds with a total of U.S.\$2.2 billion in assets under management. The funds focus on a variety of sectors, broadly split as follows: energy (3%), transportation and logistics (7%), food industry and agribusiness (8%), metallurgy (56%), fruit and vegetable storage (5%), holding companies (7%), manufacture of construction materials (2%), other (12%).

In 2025, QIC made an investment and holds a 99.99% interest in Kokzhiyek Fund L.P. (manufacturing, metals and mining, energy and green technology sectors), a 9.9% interest in Forebright Life Science Technology Fund L.P.

In 2025, QIC made a transition from a traditional institutional investor model to a multi-level capital management platform with a diversified investment portfolio and international presence.

In 2025, funds with QIC participation financed 15 new projects. As a result, the total number of implemented and supported projects exceeded 140 in key sectors of the economy including manufacturing, agriculture to IT and infrastructure displaying a greater focus on the non-resource sectors.

- In 2025 QIC established a new private equity fund in the Astana International Financial Centre ("AIFC") and six full and partial exits from projects totalling KZT 21.7 billion, including a full exit from Aitas KZ, Kazakhstan's largest poultry holding, with an investment gain of KZT 5.2 billion, and a partial exit from EMC Agro, generating KZT 1.7 billion in investment income and, outside Kazakhstan, QIC sold its interests in Arctic Green Energy and Falah Growth Fund L.P. QIC's portfolio is broadly categorized as follows: funds engaged in active investment: Baiterek Venture Fund, Baiterek Investment Fund, KCM Sustainable Development Fund I C.V., Da Vinci Emerging Technologies Fund III L.P., QUEST VENTURES ASIA FUND II, L.P., APEX Fund I Limited Partnership;
- funds with a completed investment term, being funds that have completed the investing process and are focused on its managing portfolio companies and searching for successful exit opportunities: DBK Equity Fund C.V., Kazakhstan Infrastructure Fund C.V., Kazakhstan Hungarian Investment Private Equity Fund C.V., 500 STARTUPS V, L.P.;
- funds with an expired life cycle: Kazakhstan Capital Restructuring Fund C.V., Kazakhstan Growth Fund L.P., CITIC Kazyna Investment Fund I L.P., VTB Capital-I2BF Innovation L.P., Falah Growth Fund L.P., Wellington Partners III Technology Fund, Flagship Ventures Fund;
- funds in liquidation: Macquarie Russia & CIS Infrastructure Fund, VTB Capital-I2BF Innovation L.P., Kazakhstan Capital Restructuring Fund C.V., Falah Growth Fund L.P.; and
- liquidated funds: Da Vinci Emerging Technologies Fund III L.P., Wellington Partners III Technology Fund.

The following table provides details of QIC's investment portfolio as at 31 March 2026:

No.	Private Equity Fund	Year of Establishment	Investors	Objectives
Captive Funds				
1	Baiterek Venture Fund	2014	QIC (100%)	Priority sectors of economy
2	DBK Equity Fund C.V.	2017	QIC (2.99%), DBK (97%), BV Management (0.01%)	DBK and IDF projects

No.	Private Equity Fund	Year of Establishment	Investors	Objectives
3	KCM Sustainable Development Fund I C.V.	2019	QIC (99.99%), BV Management (0.01%)	Priority sectors of economy
4	Baiterek Investment Fund	2024	QIC (98.99%), Baiterek Venture Fund JSC (1%), BV Management (0.01%)	Priority sectors of economy
5	Kokzhiyek Fund L.P.	2024	QIC (99.99%), BV Management (0.01%)	Priority sectors of economy
6	Adal Fund L.P.	2025	QIC (99.99%), BV Management (0.01%)	Priority sectors of economy

10	Kazakhstan Hungarian Investment Private Equity Fund C.V.	2015	QIC (49.5%), EXIM Bank (49.5%), CCL KAGF Carried Interest L.P. (1%)	Agro-industrial sector of economy
11	CITIC Kazyna Investment Fund I L.P.	2010	QIC (49.9%), CITIC Group (37.43%), Sun Success International (12.48%), others investors (0.19%)	Non-resource sectors of economy
12	Kazakhstan Growth Fund L.P.	2009	QIC (49.5%), EBRD (49.5%), CEECAT (1%)	Food industry, manufacturing of equipment for the mining industry, metallurgy, woodworking, and textile manufacture
13	Kazakhstan Capital Restructuring Fund C.V.	2010	QIC (49.5%), EBRD (49.5%), CEECAT (1%)	Transferred to the liquidation phase SME with a high debt burden, but not requiring restructuring
14	VTB Capital-I2BF Innovation L.P.	2011	QIC (100%)	Being liquidated
15	Falah Growth Fund L.P.	2008	QIC (10%), Ordabasy Shrakat Limited (40%), Aztech Investment Limited (50%)	Transferred to the liquidation phase Energy, mining, infrastructure projects, agriculture, etc.
16	QUEST VENTURES ASIA FUND II, L.P.	2020	QIC (30.7%), Pavilion Capital and other investors	High-tech companies in all sectors of economy
17	500 STARTUPS V, L.P.	2019	QIC (7.1%), Abu Dhabi Financial Group, SeAH Group and other investors	Investments in IT, including Internet and information technologies and/or other technology-related fields
18	Flagship Ventures Fund	2005	QIC (6.6%), State Treasurer for the State of Michigan Bureau of Investments, Delaware Public Employees' Retirement System and other investors	Investments in life science, selective technologies, breakthrough software, etc.
19	Macquarie Russia & CIS Infrastructure Fund	2009	QIC (9.09%), Vnesheconombank (30.3%), IFC (30.3%), Macquarie Group (30.3%)	In liquidation

ACC

Introduction

ACC was established by Government Decree 137 of 25 January 2001. The principal object of ACC is to facilitate the sustainable development of the agro-industrial sector by creating an accessible and efficient financing system. ACC holds a banking licence issued by the NBK and is regulated by the ARDFM.

ACC's registered office is located in Astana and it has 19 branches throughout Kazakhstan.

Fitch has assigned ACC long-term foreign- and local-currency ratings of 'BBB-' with stable outlook. Moody's has assigned long-term rating to ACC of "Baa2" with stable outlook.

Key Financial Information

	As of, or for the year ended, 31 December 2023	As of, or for the year ended, 31 December 2024	As of, or for the year ended, 31 December 2025
Return on average assets ⁽¹⁾ (in %)	2.2	3.5	4.3
Debt/equity ⁽²⁾	2.1	3.1	3.47
Assets (in KZT millions)	1,412,101	1,998,448	2,514,539
Growth in assets ⁽³⁾ (in %)	7.1	41.5	26.3
Net profit (in KZT millions)	29,555	60,357	97,579

Notes

(1) Return on average assets is calculated as net profit divided by average total assets during the year and expressed as a percentage. Average total assets during the year are calculated based on opening and closing balances for each year.

(2) Debt/equity is calculated as total liabilities of the subsidiary over total equity of the subsidiary.

(3) Growth in assets is calculated as the closing balance of total assets for the year divided by the opening balance of total assets for the year and expressed as a percentage.

Description of Activities

ACC and its subsidiary KazAgroFinance JSC ("KAF") operate lending and leasing programmes in priority areas of agricultural production development. ACC is specialised in lending to companies working in the agro-industrial sector, funding financial institutions (credit cooperatives, microfinance organisations, commercial banks and leasing companies), microlending, lending for spring-sowing and harvesting campaigns. It also acts as an insurer in the agro-industrial sector.

The principal activities of ACC are:

- implementing Government programmes to support the agricultural sector;
- attracting domestic and foreign investments to implement its own projects in the agro-industrial sector;
- developing and implementing projects in the agro-industrial sector;
- selling pledged properties and agricultural products received by way of repayment of funds granted; and
- bank lending, leasing and other activities permitted by law.

Various ACC programmes offer funding for working capital, modernisation, construction and other investments, while an agricultural insurance framework ensures risk protection for farmers.

ACC operates the following lending and insurance programmes:

Ken Dala Programme. The Ken Dala programme funds agricultural entities for seasonal fieldwork and harvesting. Financing is available through credit partnerships, microfinance organisations, commercial banks and regional investment centres. Loan amounts range from KZT 1 million to KZT 10 billion, with an interest rate of 1.5% per annum and repayment due by 10 March of the following year.

Agribusiness Programme. The Agribusiness programme supports wide range of participants, including direct borrowers, credit unions, leasing companies, second-tier banks, microfinance institutions, and regional investment centres. Loans range from KZT 50 million to KZT 15 billion, for investment projects and, up to KZT 75 billion for social-entrepreneurial corporations. Interest rates depend on funding sources: for own/absorbed funds, the rate is the National Bank's base rate plus 7.5% for direct borrowers or plus 3.5% for financial institutions; for attracted bond-based funds, the rate is 5% for direct borrowers and 1.5% for financial institutions. Loan terms extend up to 120 months for investments and 48 months for working capital replenishment and 12 months when financed from bond proceeds.

Isker Programme. The Isker programme is aimed at supporting and developing small and medium-sized businesses in the agro-industrial complex of Kazakhstan. It provides entrepreneurs with access to financing for projects in agriculture and related industries. The programme is accessible through credit partnerships, microfinance organisations and direct lending channels. The interest rate for loans under the Isker programme is 6% per annum (or 4% for low-income/large families). Loan terms extend up to 84 months for projects related to livestock farming and up to 60 months for other types of ventures.

Youth Microcredit Programme. This programme offers financing to young entrepreneurs aged 21 to 35. The maximum loan is KZT 5 million, with an interest rate of 2.5% per annum. Loan terms extend up to 60 months for general businesses and 84 months for livestock projects.

Insurance Support. The voluntary insurance system in the agro-industrial sector is supported by the Government through the subsidising of insurance premiums at a rate of 80%, making insurance policies more affordable for agricultural enterprises. There are numerous insurance products available within the agricultural insurance industry, covering crop and livestock production, with part of the insurance premiums being subsidised.

Agrobusiness: Livestock Development Program. This program focuses on supporting livestock development by financing the replenishment of working capital for feedlots. Funds may be used for the purchase of cattle and small ruminants for fattening, fuels and lubricants, spare parts for feed preparation equipment, as well as chips and ear tags. At least 70% of the loan amount must be directed toward livestock acquisition. The interest rate is 5% per annum for direct and end borrowers with loan amounts ranging from KZT 1,000,000 to KZT 1.5 billion per borrower and loan terms for working capital replenishment of up to 12 months, subject to collateral requirements.

Ken Dala 2 Programme. This enhanced version of the Ken Dala programme supports end borrowers, credit partnerships, microfinance organizations, second-tier banks, regional investment centres, and social-entrepreneurial corporations. The program finances working capital for spring field and harvesting operations, supports processing enterprises for advance payments to agricultural producers, and allows replacement of previously issued credit funds. The interest rate is 5% per annum for end borrowers and 1.5% per annum for financial institutions with loan amounts limited to 25% of a borrower's share capital for end borrowers and up to KZT 75 billion for social-entrepreneurial corporations. The maximum loan term is 18 months. Collateral requirements apply and Damu Fund may be required for part of the loan amount.

Agribusiness 2.0 Programme. This programme is directed at end borrowers requiring significant capital investment. Loan amounts range from KZT 1 million to KZT 15 billion per investment project at an interest rate of 12.6% per annum and loan terms of up to 180 months or 48 months for working capital. Borrowers must provide co-financing of at least 20% of the total project cost and collateral requirements apply.

In addition to the lending and insurance programmes described above, ACC's wholly-owned subsidiary KAF leases agricultural machinery and equipment, offering a comprehensive range of financing programmes tailored to the diverse needs of agricultural producers. These programmes enable producers to purchase equipment on favourable terms. KAF is represented by fifteen branches across all regions of Kazakhstan.

While commercial banks mainly offer short-term loans for working capital requirements of large agricultural enterprises, ACC and KAF provide long-term financing of up to 10 years to SMEs, with the aim of fostering the development of a competitive production base.

In 2024, ACC and KAF allocated KZT 827 billion to finance farmers through loans and leasing. This included KZT 599 billion from ACC and KZT 228 billion from KAF. Approximately 5,000 agricultural enterprises received KZT 319.5 billion for spring field and harvesting works, covering 5 million hectares. Additionally, KZT 176 billion was directed towards other financing programmes, including microfinancing and agribusiness. Financial leasing contracts were signed for 10,500 units of agricultural machinery and equipment, totalling KZT 228.5 billion, with 4,300 units of domestic equipment purchased under a preferential leasing programme at 5% per annum for KZT 120 billion. In 2025, ACC allocated KZT 814.2 billion to finance farmers through loans and leasing. Financial leasing contracts were signed for 10,299 units of agricultural machinery and equipment.

KHC

Introduction

KHC was established on 29 December 2000 in accordance with the Resolution No. 469 of the National Bank of the Republic of Kazakhstan dated 20 December 2000. The main aim of KHC is to increase the availability of affordable, high-quality housing in Kazakhstan. The principal activity of KHC is providing mortgage loans under a licence granted by regulatory authorities as well as conducting trust management, factoring and leasing operations. KHC, as the unified operator of housing construction in the Republic of Kazakhstan, operates in accordance with the key directions of the state policy in the housing construction sector, in particular, the Concept for the Development of Housing and Communal Infrastructure for 2023–2029, as well as legislation on equity participation in housing construction and real estate mortgage.

KHC's registered office is located in Astana.

Fitch has assigned KHC long-term foreign- and local-currency ratings of 'BBB' with stable outlook. Moody's has assigned long-term rating to KHC of "Baa2" with stable outlook.

Key Financial Information

	As of, or for the year ended, 31 December 2023	As of, or for the year ended, 31 December 2024	As of, or for the year ended, 31 December 2025
Return on average assets ⁽¹⁾ (in %)	2.9	2.7	2.9
Debt/equity ⁽²⁾	5.1	5.1	5.8
Assets (in KZT millions)	1,486,195	1,573,236	1,871,756
Growth in assets ⁽³⁾ (in %)	2.6	5.9	19
Net profit (in KZT millions)	41,850	40,665	49,101

Notes

(1) Return on average assets is calculated as net profit divided by average total assets during the year and expressed as a percentage. Average total assets during the year are calculated based on opening and closing balances for each year.

(2) Debt/equity is calculated as total liabilities of the subsidiary over total equity of the subsidiary.

(3) Growth in assets is calculated as the closing balance of total assets for the year divided by the opening balance of total assets for the year and expressed as a percentage.

Description of Activities

KHC's main activities consist of:

- supporting housing supply and increasing the volume of housing construction by stimulating the private

sector and providing services for developers: this is done by financing developers through the purchase of municipal securities, guaranteeing multi-apartment housing construction, providing subsidies with respect to private developers' loans and financing investment projects; and

- providing support for housing demand and increasing housing affordability for the citizens of Kazakhstan: this is done by providing rental housing and subsidising mortgage loans.

In its activities, KHC employs the following financing methods:

- Purchasing local executive authority bonds: KHC finances the construction and renovation of housing for depositors of Otbasyl Bank and persons on housing waiting lists maintained by local executive authorities through the purchase of bonds issued by such local executive authorities. The total amount of such bonds purchased by KHC and other Group subsidiaries (Damu, ACC and Otbasyl Bank) amounted to KZT 2,689 million in 2023, KZT 2,832 million in 2024, and KZT 2,834 million in 2025.
- Guarantees: KHC ensures that the construction of residential properties is completed in the event that its guarantee is called.
- Subsidising interest rates on loans to private developers: to boost private developers' offerings in the primary housing market, KHC subsidises the interest rate on loans issued to private developers by banks for housing construction under the Nurly Zher programme which it operates in a number of cities and regions in Kazakhstan.
- Rent-to-buy housing schemes: The sale of rental housing is a socially significant area of the activity of KHC. Rental housing is provided to people on waiting lists maintained by local executive authorities. KHC facilitates rent-to-buy housing programmes, offering properties for people on waiting lists of local executive authorities with a rental period of up to 240 months an option to purchase. The programme operates in more than 20 cities in Kazakhstan.

In 2025 the total amount of bonds of local executive authorities purchased by KHC amounted to KZT 407.7 billion, as compared to KZT 462.1 billion in 2024.

Otbasy Bank

Introduction

Otbasy Bank was established in accordance with the Decree of the Government No. 364 dated 16 April 2003 in order to develop a residential construction savings system in Kazakhstan. Otbasy Bank's main aim is to improve and enhance the efficiency of long-term financing of housing construction and to develop a system of housing construction savings aimed at improving the housing conditions of the population.

Otbasy Bank's registered office is located in Almaty. As of March of 2026, Otbasy Bank had 20 regional branches and 17 service centres and 2 service points throughout Kazakhstan.

Fitch has assigned Otbasy Bank long-term foreign- and local-currency ratings of 'BBB' with stable outlook. Moody's has assigned long-term rating to Otbasy Bank of "Baa1" with stable outlook.

Key Financial Information

	As of, or for the year ended, 31 December 2023	As of, or for the year ended, 31 December 2024	As of, or for the year ended, 31 December 2025
Return on average assets ⁽¹⁾ (in %)	4.0	2.9	2.7
Debt/equity ⁽²⁾	5.7	5.0	5.8
Assets (in KZT millions)	3,996,059	4,279,621	5,199,340
Growth in assets ⁽³⁾ (in %)	16.2	7.1	21.5

	As of, or for the year ended, 31 December 2023	As of, or for the year ended, 31 December 2024	As of, or for the year ended, 31 December 2025
Net profit (in KZT millions)	147,528	120,793	126,434

Notes

- (1) Return on average assets is calculated as net profit divided by average total assets during the year and expressed in percentages. Average total assets during the year are calculated based on opening and closing balances for each year.
- (2) Debt/equity is calculated as total liabilities of the subsidiary over total equity of the subsidiary.
- (3) Growth in assets is calculated as percentage growth of total assets as of 31 December of the relevant year as compared to total assets as of 31 December of the previous year.

Description of Activities

The principal activities of Otbasý Bank are:

- accepting deposits in the form of housing construction savings, opening and maintaining depositors' accounts; providing mortgage loans for deposit holders to improve their housing conditions and loans for home improvement activities;
- opening and maintaining special accounts for depositing lump-sum pension payments; and
- opening and maintaining current accounts for depositing subsidies to pay for rented accommodation in privately-owned housing.

Otbasy Bank is the only bank in Kazakhstan that operates a housing construction savings system. This system enables citizens to access mortgage loans at low interest rates by utilising housing construction deposits. Otbasy Bank implements specialised market programmes for military personnel and offers mortgage loans for women under the "Umai" programme to promote gender equality. In addition, it supports ESG principles through the "Green Mortgage" initiative. As an operator of Government programmes, Otbasy Bank plays a key role in implementing Government policies aimed at providing affordable housing. This includes executing both the Government's and regional housing programmes and to increase housing affordability for socially disadvantaged or unprotected population groups through loans with interest rates from 2% to 5% funded by the Government and local executive authorities.

The Issuer is currently considering the privatization of a part of its shareholding in Otbasy Bank, which will potentially be offered for sale by way of an IPO. No firm decision has yet been taken in this regard as to the privatization method or the stake to be privatized, and no assurance can be given that such privatization will in fact take place.

Health, Safety, Environment and Sustainable Development

Health, Safety and Environment

The Group aims to ensure that its occupational health and safety record strictly complies with the requirements of the laws of Kazakhstan, international standards and its own internal regulations.

Employees are briefed on relevant safety regulations in accordance with the Occupational Health and Safety Instructions adopted and approved by the Issuer and the applicable laws of Kazakhstan. In accordance with Order No. 1019 of the Minister of Health and Social Development of the Republic of Kazakhstan dated 25 December 2015 "On Approval of Rules and Deadlines of Training, Briefings and Employees' Testing of Knowledge of Occupational Health and Safety", training events for employees of the Group are organised annually. In 2023, the Issuer received ST RK ISO 45001-2019 (ISO 45001:2018 - Occupational Health and Safety Management Systems) certificate. This certification was affirmed in 2024.

In 2023, 2024 and 2025 no injuries were recorded at the premises of the Issuer or its subsidiaries.

Sustainable Development and Responsible Investment

The Group pays particular attention to sustainable development and responsible investing. The Group's management seeks to introduce and integrate ESG factors into the investment decision-making process, including by familiarising the counterparties with ESG factors.

The Group's management expects counterparties to:

- apply an environmental risk management system in order to identify and assess actual and potential impacts of investments on the environment and communities, determine and effectively implement appropriate management and control measures and monitor the level of environmental risks;
- implement a human resource management system and seek to minimise occupational health risks to their employees, which should be based on respect for employee rights, including freedom of association and the right to enter into collective agreements; and
- implement a system of good corporate governance based on the principles of fairness, integrity, responsibility, transparency, professionalism and competence (where good corporate governance implies respect for the rights and interests of all stakeholders, while maintaining financial stability and profitability).

ESG ratings are a means of assessing how resilient a company is to ESG risks. On 4 December 2025, Sustainable Fitch granted the Issuer an ESG Rating of “2” (the rating scale is from 1 to 5, where “1” is the strongest rating), accompanied by a score of 65 (according to a 100-point scale, where “100” is the strongest rating). The rating is stated to reflect the Group's sustainable development plan and initiatives, the consideration of ESG factors in the Group's financial activities, as well as its social guarantees and management practices. The rating confirmed the Issuer's commitment to the principles of social responsibility, corporate governance and business ethics, as well as its desire to integrate ESG considerations into its development plan and business processes.

The Group's Investment Policy sets out the Group's intention to integrate ESG factors into the process of providing financial support to its customers. In addition, the Group's management has introduced a Development Index tool to evaluate potential projects. This index highlights the most significant social and economic projects that could contribute to Kazakhstan's development.

In 2020, the Issuer approved its Environmental and Social Policy. The policy sets forth the principles and processes for recording and monitoring environmental and social factors within the Group's investment activities. In developing the policy, the following international responsible investment initiatives were taken into account: the UN Principles for Responsible Investment, the Equator Principles and the IFC Performance Standards for Ensuring Environmental and Social Sustainability. The policy also defines “green” project criteria based on the taxonomy developed by the Astana International Financial Centre.

In 2021, the Group's Investment Policy was updated to take into account recent structuring changes within the Group, as well as aligning with the applicable regulations. This policy focuses on increasing the accessibility of financing and measuring the development of green financing.

In 2023, the Environmental and Social Policy was updated with the green project taxonomy approved by Decree No. 996 of the Government dated 31 December 2021. In addition, under the Sustainable Development Action Plan for 2024–2026 (the “**Sustainable Development Action Plan**”), the Group's management intends to create and publish semi-annually a unified database of the Group's green and social projects on its official website.

Sustainable Development Management System

The Group's management aims to ensure that the Group's economic, environmental and social goals are coherent, through:

- increasing investment in the creation and development of advanced technologies;
- encouraging the growth of exports of both the manufacturing industry and the non-resource industry;

- promoting labour productivity and promoting the creation of new jobs;
- applying transparent competition procedures and equal employment opportunities; and
- ensuring the relevant health and safety standards are applied to its employees.

The Issuer is committed to applying the sustainable development principles set forth by its Corporate Governance Code. The Issuer also adheres to the UN Global Compact Principles in the fields of human rights, labour relations, environmental protection and anti-corruption and in 2024 joined the UN Global Compact and became a signatory to the Green Investment Principles (“GIP”) ‘One Belt, One Road’. The Issuer’s goals, objectives, and principles in this regard are described in greater detail in the Group’s Sustainable Development Policy.

In 2023, the Issuer approved its Human Rights Policy. The policy focuses on freedom of association and collective bargaining, as well as equal rights and opportunities of its employees. This demonstrates the Issuer’s commitment to ensuring compliance with Kazakhstan’s legal and regulatory framework as well as international standards. In addition, this facilitates a positive corporate culture and supports global sustainable development goals. The Issuer places particular emphasis on integrating ESG principles, aligning with global trends and national priorities. This includes efforts towards low-carbon transition, decarbonisation and the development of sustainable financing instruments that comply with ESG principles.

The Issuer practises sustainable development management as part of its overall corporate governance system, which is overseen and guided by the Board of Directors of the Issuer (the “**Board of Directors**”). Responsibility for addressing sustainable development matters has been delegated to the Issuer’s Strategic Planning Committee. The Management Board of the Issuer (the “**Management Board**”) is responsible for establishing and implementing a robust sustainable development management system, as well as approving the relevant Sustainable Development Action Plan. In addition, in the third quarter of each year, the Management Board must submit a Sustainable Development Report to the Board of Directors for review. The corporate key performance indicators (“**KPIs**”) tracked by members of the Management Board include KPIs related to sustainable development. These metrics are drawn from the report on the implementation of the Sustainable Development Action Plan. Heads of relevant structural divisions within the Group are personally accountable for implementing measures and achieving sustainable development KPIs within their areas of responsibility.

The Strategy and Corporate Development Department is the primary unit responsible for coordinating the Group’s sustainable development initiatives. This department carries out the following tasks:

- plans sustainable development activities;
- coordinates the sustainable development activities of the Group’s structural subdivisions;
- prepares reports on the implementation of the Sustainable Development Action Plan and KPIs;
- prepares the Issuer’s Annual Report, including its sustainable development section, as well as the sustainable development report in compliance with international GRI Standards; and
- communicates with the Issuer’s subsidiaries and international organisations with respect to the sustainable development matters.

Employees and Human Resources

The following table presents the average number of employees of the Issuer and each of its direct subsidiaries for the years ended 31 December 2024 and 2025:

	For the year ended 31 December	
	2024	2025
The Issuer	129	133
DBK	352	375

	For the year ended 31 December	
Damu	435	440
QIC	88	93
KHC	215	215
ECA	112	129
Otbasy Bank	1,661	1,711
ACC	1,141	1,144
Total	4,133	4,240

Since 1 January 2023, the Group has not experienced any material strikes or work stoppages.

The Group's investment in its human resources policies and staff aligns with its aim of creating a professional and sustainable workforce and culture. Between 2023 and 2025, the Group implemented the Unified HR Policy for 2023–2025 (the “**HR Policy**”), one of the objectives of which was to develop a corporate culture based on the ESG principles within the Group. Under the HR Policy, the “number of women in the management of the Issuer and its subsidiaries” was included in the development plans as a KPI for 2023–2025. According to the 2025 results, the percentage of women among managing directors and heads of the structural subdivisions was 33%, and 32% of the total number of such managing directors and heads of the structural subdivisions.

	Managing Directors	Heads of the structural subdivisions
The Issuer	33%	32%
DBK	43.3%	0.43%
Otbasy bank	60%	40%
KHC	1%	25%
ECA	50%	54%
QIC	0%	30.8%
Damu	0.63%	3.82%
ACC	3%	34%

Following the expiration of the HR Policy for 2023–2025, the Group adopted a new Unified Personnel Policy for 2025–2029. The new policy enhances existing processes by leveraging HR analytics to evaluate the effectiveness of organisational structures, introducing mentoring programmes for new employees, and implementing standardised training on the Group's policies and procedures across subsidiaries, including the use of IT solutions. The policy also establishes an internal assessor framework, invest in developing digital literacy (including big data, analytics, and artificial intelligence skills), and offers reskilling and upskilling programmes to adapt to evolving labour market conditions. Furthermore, it focuses on automating employee selection, onboarding, training, and evaluation processes using AI and HR analytics, and embedding ESG principles into daily operations through training, communications, and internal initiatives.

Employee training and professional development are essential components of the Group's human resources policies ensuring that employees continuously improve their knowledge and skills. This includes both theoretical and practical learning, as well as improving various skills and managerial abilities.

Training and professional development initiatives are based on the following key principles:

- aligning training content with employees' job responsibilities and performance assessments;
- supporting employees in achieving their individual goals and objectives;
- enhancing the Group's overall performance by implementing best corporate practices and standards;

- seeking to ensure a structured, systematic and well-planned approach to training and professional development; and
- seeking to maximise employee participation in training programmes.

Information Technology

The Group's IT strategies are outlined in its Digitalisation Strategy for 2024–2026 that was adopted in 2023.

Hardware systems monitor web traffic, email and antivirus protections using data leak prevention tools and other security measures designed to ensure cybersecurity compliance. Suspicious events are handled by the Issuer's cybersecurity operations centre. Proactive measures include employee briefings, training, awareness initiatives and regular updates to internal regulations. Staff training is continuously updated based on evolving cybersecurity threats to improve preparedness against phishing attacks and other risks. The Group also tracks cybersecurity market trends, emerging technologies and new services to stay ahead. Products and services introduced by the Group are assessed against market offerings to maintain competitiveness and seek to identify optimal solutions, with marketing surveys conducted to provide further recommendations for the Group. Information security specialists offer expert guidance and implement initiatives to strengthen cybersecurity compliance across the Group's subsidiaries.

Legal Proceedings

There are no governmental, legal or arbitration proceedings, including any such proceedings pending or threatened of which the Issuer is aware, during the last twelve months preceding the date of this Base Offering Memorandum, which may have, or have had in the recent past, significant effects on the financial position or profitability of the Issuer or the Group.

Credit Ratings

In October 2025, Fitch Ratings affirmed the Issuer's long-term foreign- and local-currency issuer default ratings at 'BBB' with stable outlook.

On 10 September 2025, Moody's Investors Service completed a periodic review of the Issuer and affirmed its issuer rating at Baa1 with a stable outlook. The stable outlook for the long-term ratings of the Issuer remains aligned with the rating of the Kazakhstan sovereign.

SUSTAINABLE DEVELOPMENT IMPACT

As the key financial institution of the Government of the Republic of Kazakhstan, the Issuer recognizes the importance of its impact on the economy, environment, and society to ensure long-term sustainable development and strives to maintain a balance of stakeholders' interests. The Government of Kazakhstan, as the sole shareholder, ensures that the Issuer's activities align with national goals and policies, facilitating seamless interaction between investors and the state. In 2024, the Issuer published its Sustainable Development Report prepared in accordance with GRI Standards, IFRS S1 and IFRS S2, SASB and relevant national guidance, covering the period from 1 January to 31 December 2024.

The Issuer's activities in the field of sustainable development are carried out in accordance with the following principles: openness, accountability, transparency, ethical conduct, respect for stakeholders' interests, legality, respect for human rights, zero tolerance for corruption and prohibition of conflict of interest. The Issuer's Human Rights Policy has been in place since 2023, and in 2024 the Issuer reported no cases of discrimination, no human rights violations and no corruption offences by employees.

The Issuer views sustainable development and the implementation of ESG principles as key benchmarks of its long-term strategy, reflected in the Issuer's Development Plan for 2024–2033. These priorities are also implemented through the Issuer's Sustainable Development Action Plan for 2024–2026, which the Issuer reports was fully implemented for 2024.

A key tool for assessing the effectiveness of ESG principles integration into the company's activities is the ESG rating. In this regard, since 2023 the Issuer has engaged the international rating agency Sustainable Fitch to obtain an ESG rating. In 2025, Sustainable Fitch raised the Issuer's ESG rating to level "2" and increased its score from 57 in 2023 to 59 in 2024, and then to 65 in 2025.

The Issuer is applying the Impact Disclosure Guidance available at: <https://www.icmagroup.org/sustainable-finance/other-sustainable-finance-guidance-publications-and-initiatives/other-initiatives>, 2024, to produce a Sustainable Development Impact Disclosure ("**SDID**"). The Impact Disclosure Guidance was prepared by the Impact Disclosure Taskforce, a working group comprised of institutional investors, commercial and investment banks, and other stakeholders including non-governmental organisations, law firms and other capital markets stakeholders. The SDID outlines the impact intentions of the Issuer's business strategy and operations in Kazakhstan. The Issuer reports that it is expected to contribute to the achievement of the following UN Sustainable Development Goals ("**SDGs**") SDGs #2 (Zero Hunger), #7 (Affordable and Clean Energy), #8 (Decent Work and Economic Growth), #9 (Industry, Innovation and Infrastructure), #10 (Reduced Inequalities), #11 (Sustainable Cities and Communities), #13 (Climate Action) and #17 (Partnerships for the Goals).

In 2024, the Issuer also joined the UN Global Compact and became a signatory to the Green Investment Principles "One Belt, One Road", further formalising its participation in international sustainability initiatives. In addition, the Issuer is a member of National ESG Club and UN Women's Empowerment Principles (WEPs) initiative.

The Issuer's mission is to support the sustainable development of the economy of Kazakhstan through three focus areas: (1) Business Support, (2) Development of the shared financing ecosystem, and (3) Provision of housing for the population. The Group comprises seven subsidiaries which collaborate to enhance business competitiveness, provide housing and improve food security. Within these three focus areas, the Issuer has outlined the strategic objectives that it intends to achieve through its subsidiaries. This section highlights the Group's anticipated contributions to specific SDGs, intentions to generate incremental positive impact in Kazakhstan, and metrics and incremental targets for metrics. See the "Reporting Table" below for targets and annual reporting. The Issuer will annually track and report on all indicators listed in the Reporting Table, including those for which there are no explicit targets. In 2024, key sustainability-related outcomes reported by the Issuer included: (i) KZT 573.5 billion of support for green projects; (ii) the placement of the Issuer's debut social bonds in an amount of KZT 100 billion, with proceeds used through Agrarian Credit Corporation JSC to support spring field and harvesting works; (iii) approximately 3.2 million square metres of multi-apartment housing commissioned using the instruments of Kazakhstan Housing Company JSC; and (iv) 1,255 "green mortgage" loans issued by Otbas Bank JSC for an aggregate amount of KZT 31.4 billion since the launch of that programme, including 763 loans for KZT 18.6 billion in 2024 alone.

The Issuer has also enhanced its climate-related governance and disclosure. In 2024, it approved a Methodology for calculating greenhouse gas emissions and disclosed Scope 1, Scope 2 and Scope 3 emissions. Total greenhouse

gas emissions for 2024 amounted to 511.8 tCO₂-eq. (comprising 18.8 tCO₂-eq. for Scope 1, 435.1 tCO₂-eq. for Scope 2 and 57.9 tCO₂-eq. for Scope 3), and the Issuer has stated that target indicators for reducing GHG emissions are intended to be developed by the end of 2025.

The Issuer further reports that, as of 31 December 2024, the share of green projects in certain subsidiary portfolios included 11.6% for Kazakhstan Development Bank JSC, 18% for Agrarian Credit Corporation JSC and 5.9% for Qazaqstan Investment Corporation JSC, while “green mortgages” represented 0.9% of Otbasy Bank JSC’s loan portfolio and its social mortgage portfolio represented 39%.

In addition, the Issuer reports key social and governance indicators for 2024 including employee engagement of 78.9%, women representing 51% of the Issuer’s workforce and 23.7% of management across the Holding and its subsidiaries, and zero reported cases of discrimination, corruption or work-related injuries at the Issuer level in 2024.

Focus Area	Subsidiary Objectives	Subsidiary	SDG Contribution
Business Support	Debt financing, guarantees, leasing, export and pre-export financing to support industrial development and strategic projects, including renewable energy projects	Kazakhstan Development Bank JSC	SDG 7 (Affordable and Clean Energy); SDG 8 (Decent Work and Economic Growth); SDG 9 (Industry, Innovation and Infrastructure); SDG 13 (Climate Action)
Business Support	Insurance, guarantees and export / pre-export financing to increase the export potential and competitiveness of Kazakhstani producers	Export Credit Agency of Kazakhstan JSC	SDG 8 (Decent Work and Economic Growth); SDG 9 (Industry, Innovation and Infrastructure); SDG 17 (Partnerships for the Goals)
Business Support	Guaranteeing, subsidising and lending through partner financial institutions to support MSMEs, including green projects and entrepreneurship development	Damu Entrepreneurship Development Fund JSC	SDG 8 (Decent Work and Economic Growth); SDG 9 (Industry, Innovation and Infrastructure); SDG 13 (Climate Action) and, where relevant, SDG 5 (Gender Equality)
Business Support	Lending to agro-industrial entities, funding spring field and harvesting works, microcrediting and support for irrigation / water-saving and other green agricultural projects	Agrarian Credit Corporation JSC	SDG 2 (Zero Hunger); SDG 6 (Clean Water and Sanitation); SDG 8 (Decent Work and Economic Growth); SDG 13 (Climate Action)
Development of the shared financing ecosystem	Shared financing, participation in private equity / venture funds and mezzanine financing to develop the private investment ecosystem	Qazaqstan Investment Corporation JSC	SDG 8 (Decent Work and Economic Growth); SDG 9 (Industry, Innovation and Infrastructure); SDG 13 (Climate Action); SDG

Focus Area	Subsidiary Objectives	Subsidiary	SDG Contribution
	and support innovative projects		17 (Partnerships for the Goals)
Provision of housing for the population	Mortgage lending, including social housing programmes and green mortgage products for energy-efficient housing	Otbasy Bank JSC	SDG 11 (Sustainable Cities and Communities); SDG 13 (Climate Action) and, where relevant, SDG 5 (Gender Equality)
Provision of housing for the population	Financing developers, rental housing with the right to buy, guarantees for shared housing construction, subsidising loans to private developers and financing affordable housing projects	Kazakhstan Housing Company JSC	SDG 10 (Reduced Inequalities); SDG 11 (Sustainable Cities and Communities)

For the purposes of measuring and monitoring progress towards its intended impact, the Issuer has identified subsidiary-level SDG targets and indicators, including the following:

- for Kazakhstan Development Bank JSC: SDG target 7.2 (share of renewable energy in total final energy consumption), SDG target 9.1 (Logistics Performance Index: infrastructure assessment) and SDG target 13.2 (total annual greenhouse gas emissions per capita);
- for Damu Entrepreneurship Development Fund JSC: SDG target 8.3, using women's unemployment rate as a proxy indicator;
- for Export Credit Agency of Kazakhstan JSC: SDG target 17.11 (share of developing and least developed countries in global merchandise exports);
- for Agrarian Credit Corporation JSC: SDG target 2.3 (cereal yield);
- for Qazaqstan Investment Corporation JSC: SDG target 7.2 (share of renewable energy in total final energy consumption) and SDG target 9.2 (Logistics Performance Index: quality of trade and transport infrastructure);
- for Otbasy Bank JSC: SDG target 11.1 (proportion of the urban population living in slums); and
- for Kazakhstan Housing Company JSC: SDG target 10.3, using the right to housing as a proxy indicator, and SDG target 11.1 (proportion of the urban population living in slums).

To support delivery of the above objectives, the Issuer has identified, among others, the following intended actions through its subsidiaries:

- through Kazakhstan Development Bank JSC, financing investment projects in accordance with its strategy for 2024–2033, with priority given to sectors with high socioeconomic impact, including manufacturing, infrastructure, export-oriented enterprises and green and sustainable projects;
- through Damu Entrepreneurship Development Fund JSC, continuing the “Umit” programme to support women entrepreneurs through preferential loans and financial literacy courses, expanding support for MSMEs and domestic trade through “Damu-Micro”, “Damu-Leasing” and “Factoring”, and establishing a guarantee fund intended to improve the existing guarantee system;

- through Export Credit Agency of Kazakhstan JSC, guaranteeing export transactions, subsidising interest rates on export credits, expanding insurance solutions for Kazakhstani exporters and attracting new foreign importers through cooperation arrangements with international organisations;
- through Agrarian Credit Corporation JSC, providing accessible financing to rural businesses, agricultural cooperatives and large processing enterprises through preferential loans, microloans and investment projects;
- through Qazaqstan Investment Corporation JSC, attracting foreign investors to private investment funds and projects, investing in healthcare and pharmaceutical projects, improving fundraising conditions through the Astana International Financial Centre platform, increasing the share of equity financing and supporting Kazakhstan's venture ecosystem;
- through Otbasny Bank JSC, issuing housing loans totalling KZT 1.2 trillion in 2025, introducing a mortgage product based on Islamic finance principles, continuing issuance of loans under the "Green Mortgage" product and continuing mortgage lending under the "Nauryz" programme; and
- through Kazakhstan Housing Company JSC, financing local executive authorities through bond buyback programmes, providing guarantees for the completion of shared-equity construction projects, subsidising loans to private developers, financing urban development and housing projects, providing rental housing with an option to purchase, subsidising mortgage loans and developing market-based mortgage lending instruments.

To mitigate negative impacts, the Issuer applies a responsible investment policy aligned with the Green Investment Principles of the Belt and Road Initiative, addresses resource consumption under its Environmental Impact Policy and seeks to integrate sustainable development principles into its strategy in accordance with the UN Global Compact and other international standards.

The Issuer will annually track and report on all indicators listed below, including those for which there are no explicit targets:

- for Kazakhstan Development Bank JSC: total infrastructure and manufacturing investment of KZT 2.0 trillion in 2024, with a target of KZT 9.3 trillion by 2033; total revenue of supported enterprises of KZT 5,010.1 billion in 2024, with a target of KZT 5,168.1 billion by 2033; commissioned wind power capacity target of 300.0 MW by 2033; commissioned solar power capacity target of 220.0 MW by 2033; and commissioned hydropower capacity of 14.9 MW in 2024, with a target of 40.0 MW by 2033;
- for Damu Entrepreneurship Development Fund JSC: 117 loans provided to women entrepreneurs in 2024; 9,000 jobs created by supported businesses in 2024; support to SMEs through conditional financing totalling 2,717 transactions and KZT 253.6 billion in 2024; support to SMEs through guarantees totalling 9,173 transactions and KZT 444.9 billion in 2024; support to SMEs through subsidies totalling 17,623 transactions and KZT 1,014 billion in 2024; total loans to SMEs of KZT 1.713 billion in 2024; regional funding of KZT 49.8 billion in 2024; and KZT 10 billion allocated to the "Umit" women's entrepreneurship support programme in 2024;
- for Export Credit Agency of Kazakhstan JSC: support for 96 exporters in 2024; support for 15 new exporters in 2024; export trade and pre-export financing volume of KZT 30.2 billion in 2024; and 10 new foreign importers in 2024;
- for Agrarian Credit Corporation JSC: financing of the agricultural sector of KZT 822.3 billion in 2024; 6,606 jobs created in 2024; and funded green projects totalling KZT 50.9 billion in 2024;
- for Qazaqstan Investment Corporation JSC: new investments of KZT 60,313 million in 2024 and 11 projects in 2024;

- for Otbas Bank JSC: 71,452 housing loans issued in 2024 and a target of KZT 1.2 trillion of housing loans to be issued in 2025; and
- for Kazakhstan Housing Company JSC: total commissioned real estate area of 3,163 thousand m² in 2024, with a target of 21,664 thousand m² by 2033; 40,616 completed housing units in 2024, with a target of 348,982 by 2033; construction guarantees and subsidies issued totalling KZT 189.5 billion in 2024, with a target of KZT 1.887 by 2033; financing for the construction, acquisition and renovation of housing through the purchase of bonds issued by local executive authorities of KZT 462.1 billion in 2024, with a target of KZT 839 billion by 2033; housing commissioned within urban development investment projects of 64.4 thousand m² in 2024, with a target of 1,000 thousand m² by 2033; and 236 apartments for rent with an option to buy in 2024, with a target of 2,903 by 2033.

MANAGEMENT

The following organisation chart sets forth the corporate governance structure of the Issuer as of the date of this Base Offering Memorandum:

Sole Shareholder

The sole shareholder of the Issuer is the Government of the Republic of Kazakhstan represented by the Ministry of National Economy of the Republic of Kazakhstan. The relationship between the Issuer and the Government is governed by the laws of the Republic of Kazakhstan and internal regulations of the Issuer.

The sole shareholder of the Issuer has a list of tasks and decisions that must be taken directly by the Government as the sole shareholder. Such tasks and decisions include, amongst others, the following:

Marie-Hélène Bérard graduated from the Institute of Political Studies, Paris, and earned a Master of Laws from Paris University in 1969. She later attended the École nationale d'administration (ENA) from 1970 to 1972. From 1972 to 1976, she worked at the Ministry of Economy and Finance before serving as an advisor to the Minister of Health and Social Security, Mrs. Simone Veil, from 1976 to 1978. She then returned to the Ministry of Economy and Finance from 1978 to 1979. Between 1979 and 1981, she was Deputy Adviser to Prime Minister Raymond Barre, followed by a role as Deputy Director in the Budget Department of the Ministry of Economy and Finance from 1981 to 1986. From 1986 to 1988, she served as Adviser to the Prime Minister Jacques Chirac. She then transitioned to the private sector, working as Deputy Managing Director at Marceau Investissements in 1988-1989. Between 1990 and 2000, she was a member of the management board of Crédit Commercial de France, overseeing project financing, export lending, mergers and acquisitions, and privatisations. Since 2000, she has been the President/Founder of MHB SAS, an investment advisory company located in Paris, focusing on Eastern Europe and the former Soviet Union. Since 5 January 2023, she has been an independent director of the Board of Directors of the Issuer.

Daniel Alan Witt earned a BBA (with honors) in Public Administration and an MBA in Finance from Western Michigan University. In 2021, he received the WMU Outstanding Alumnus Award, the university's highest honor for alumni who have achieved excellence in their professional careers. With 30 years of experience, he has worked to promote free markets and reduce barriers to taxation, trade, and investment in transition economies. He was among the first foreigners to discuss international taxation and investment issues with the Russian Federation (1991), Republic of Kazakhstan (1993), Vietnam (1996), Iraq (2004), Libya (2006), and Myanmar (2012), as a recognised expert on newly opened frontier markets. He co-founded the Arab Regional Tax Forum, the Asia Pacific Tax Forum, the Eurasian Fiscal Experts Workshop, and the African Tax Forum, which bring together government officials, legislators, industry leaders, academics, and experts to consider tax and investment climate reforms. Since 1993 until now, he has served as President of the International Tax and Investment Centre (ITIC). In 1999, he was appointed Honorary Professor of Economics at the Kazakh State Academy of Management. In 2011, he was awarded the Order of Dostyk (Friendship), the highest honor granted to foreigners, by the President of Kazakhstan. Since 5 January 2023, he has been an independent director of the Board of Directors of the Issuer.

Norbert Manfred Grundke earned a Diploma in General Engineering from the Rhineland-Palatinate University of Applied Sciences in Bingen. He began his career at the Federal Defence Industry Agency in Koblenz, where he worked from 1982 to 1984. In 1984, he joined Feinmechanische Werke Mainz GmbH as Project Manager, a role he held until 1989. From 1989 to 1998, he advanced to become the Head of Airflow System Development and Technical Director at the company. Between 1998 and 2004, he served on the Management Board of Mannesmann Rexroth AG, which later became Bosch Rexroth AG, initially overseeing the hydraulics division and, from 2001, also taking on responsibility for the automation sector. From 2004 to 2022, he held the position of Chairman of the Management Board of Bosch Rexroth AG, overseeing industrial automation and functional manufacturing. Additionally, he served as Managing Partner at Knauf Group from 2004 to 2022, where he was responsible for production, sales, technical support, and development functions. Since 5 January 2023, he has been an independent director of the Board of Directors of the Issuer.

The business address of the members of the Board of Directors is the registered office of the Issuer, namely 55a Mangilik Yel Avenue, Yessil district, Astana, Republic of Kazakhstan

Management Board

The Management Board is a collegial executive body of the Issuer, which manages the day-to-day activities of the Issuer. The Management Board acts for the benefit of the Issuer and its Sole Shareholder and is accountable to the Sole Shareholder and the Board of Directors.

Members of the Management Board are appointed by the Board of Directors, at the suggestion of the Chairman of the Management Board. The latter is appointed by the Sole Shareholder. The Chairman of the Management Board provides the overall direction of the Issuer's activities in accordance with law and the Issuer's internal regulations and ensures the implementation of resolutions from the Sole Shareholder, the Board of Directors and the Management Board of the Issuer.

The members of the Management Board are:

From July to December 2009, he worked as a Consultant at Astana Knowledge City JSC. Between December 2009 and May 2011, he served as Deputy Chairman of the Agency for Statistics. From May 2011 to July 2013, he held the role of Executive Secretary at the Agency for Statistics. From July 2013 to October 2014, he was the Director of the Department of

Social and Demographic Statistics at the Agency for Statistics. From January to April 2015, he was the Executive Director of the Centre for Statistical Research LLP. From March 2015 to April 2016, he served as the General Director of KAN Group LLP. From February to April 2016, he was the Deputy General Director of OPN Management LLP. From May 2016 to October 2020, he was the Chairman of the Statistics Committee at the Ministry of National Economy of the Republic of Kazakhstan. Lastly, from October 2020 to January 2022, he served as the Head of the Bureau of National Statistics at the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan. He was appointed First Deputy Chairman of the Management Board of the Issuer in January 2022.

Yersain Khamitov graduated from Kostanay State University named after A. Baitursynov with a degree in finance and credit qualified as an economist-financier fluent in a foreign language in 2004. He also graduated from Lomonosov Moscow State University under the MBA programme with a degree in Economics. Since 2004 to 2009, he was employed as the Head of the Credit Analysis Section at Halyk Bank of Kazakhstan JSC (Kostanai Branch), Chief Analyst of the Credit Analysis Department at Halyk Bank of Kazakhstan JSC, and the Deputy Head of the Corporate Business Department at BTA Bank JSC. During 2009-2014, he was holding positions of the Chief Manager of the Department for Investment Management at Samruk Energo JSC, Chief Manager of the Corporate Finance Department at “Samruk-Kazyna” National Welfare Fund” JSC, and Director of the Corporate Finance Department of the Issuer. In February 2016, he was appointed member of the Management Board of the Issuer. Since 2022, he was appointed Deputy Chairman of the Management Board of the Issuer.

Ussen Galym graduated from the School of Economics at Osaka University (Osaka, Japan) with a Bachelor of Economics and Business in 2008. He also graduated from Harvard University, John F. Kennedy School of Government (Massachusetts, USA) with a Master of Public Administration in 2023. From 2008 to 2011, he was a software developer at Simplex Inc. (Tokyo, Japan). From 2012 to 2018, he held several positions at Deloitte Tohmatsu Consulting LLC (Tokyo, Japan). From January to May 2019, he served as a chief expert at the Centre for the Development of Labor Resources Joint Stock Company. He then became the Head of the Public Services Optimisation and Automation Office and Director of the Public Services Analysis and Development Department at the Ministry of Labor and Social Protection of the Republic of Kazakhstan from May 2019 to August 2020. From August 2020 to May 2021, he was the Director of the Department for Digitalisation of Corporate Solutions at BI Innovations LLP in Astana. He was appointed Deputy Chairman of the Management Board of the Issuer in June 2023.

Zhandos Shaikhy graduated from KIMEP University NJSC, Almaty, with a Bachelor of Business Administration and Accounting with Honors in 2004. He began his career at Ernst & Young Kazakhstan LLP, where he worked as a Tax Consultant from January 2002 to April 2004, and later as an Analyst for the Caucasus and Central Asia region from May 2004 to March 2005. Following this, he joined Citibank Kazakhstan JSC, where he held several positions, starting as an Account Manager in Almaty from April 2005 to May 2007. He then advanced to Vice President and Country Director for Corporate Finance in Almaty from June 2007 to February 2011, and later served as Vice President and Senior Key Account Manager in Astana from March 2011 to January 2013. From February 2013 to April 2024, he was appointed Director and Head of the Branch of Citibank Kazakhstan JSC. Since April 2024, he was appointed Deputy Chairman of the Management Board of the Issuer.

Timur Onzhanov graduated from the University of Bern (Switzerland) with a Bachelor of Science in Business Administration and Economics in 2008. He then went on to the University of St. Gallen (Switzerland), where he earned a Master’s degree in Banking and Finance with a focus on corporate finance, markets, and foreign trade in 2012. From July 2013 to July 2016, he served as a Sales Manager in the Structured Trade and Export Finance Department at Deutsche Bank AG in Frankfurt, Germany. From September 2016 to June 2024, Timur held various key roles at the Astana International Financial Centre (AIFC), including Deputy Director of the Department for Development of the Asset Management and Large Private Capital Services Market, Director of the Department for Development of the Asset Management and Large Private Capital Services Market, Managing Director for Business Development, First Deputy General Director for Development of International Business and Cooperation, and Executive Director and Chief Representative for the Financial Sector of the AIFC Administration. He was appointed Deputy Chairman of the Management Board of the Issuer in June 2024.

Vyacheslav Son, graduated from Kazakh University of Humanities and Law, majoring in Jurisprudence in 2002. He also specialised in Linguistics at the Modern University for the Humanities in 2002 and earned a Master of Laws in Commercial and Corporate Law from the University of London in 2021. From 2002 to 2009, he held various positions, including lawyer in the Department of Legal Support for Work with Securities, Chief Lawyer of the Department of Legal Support, Head of the Legal Department of DBK-Leasing JSC, Head of the Department

of Legal Support of the bank's activities, and Director of the Legal Department of Development Bank JSC Kazakhstan. From 2009 to 2012, he served as Managing Director for Legal and Administrative Issues, Managing Director, and Managing Director for Project Development at JSC National Mining Company Tau-Ken Samruk. In 2012 to 2013, he led the apparatus of the RSE "Kazspetsexport" and later became the Deputy General Director of the RSE "Kazspetsexport" of the Ministry of Defence of the Republic of Kazakhstan. From 2013 to November 2023, he headed the Audit and Control Department. Since 23 November 2023, he was elected as a member of the Management Board of the Issuer.

The business address of the members of the Management Board is the registered office of the Issuer, namely 55a Mangilik Yel Avenue, Yessil district, Astana, Republic of Kazakhstan, Republic of Kazakhstan.

Corporate Governance

The Issuer's Corporate Governance Code is constructed upon the following principles:

- division of powers;
- protection of the rights and interests of the Sole Shareholder;
- efficient management of the Issuer by the Board of Directors and the Management Board;
- sustainable development;
- risk management, internal controls and internal audit;
- settlement of corporate conflicts and conflicts of interests; and
- transparency and objectivity in the disclosure of information.

Three members of the Board of Directors are independent directors. These directors are appointed by the sole shareholder of the Issuer.

In addition to establishing committees of the Board of Directors, as described below, the Issuer also has a Corporate Secretary who ensures that the Issuer's bodies and officials comply with corporate rules and management policy. The Corporate Secretary works to assist the Board of Directors in fulfilling its duties and protecting the rights and interests of the Sole Shareholder.

The Issuer has established an Ombudsman institution, which is directly accountable to the Board of Directors, to ensure compliance with the Issuer's Code of Business Conduct. Additionally, the Anti-Corruption Compliance Service aims to strengthen compliance with regulatory anti-corruption requirements and minimise corruption risks.

Board Committees

The Board of Directors has established the following committees:

Audit Committee

The Audit Committee was established to facilitate the monitoring of the Issuer's financial and economic activities and to ensure that there is an adequate system of internal control and risk management in operation. The Audit Committee is responsible for the supervision of the Issuer's internal and external audit functions.

As of the date of this Base Offering Memorandum, the members of the Audit Committee are Norbert Grundke (Chair), Marie-Hélène Bérard and Daniel Alan Witt.

Nominations, Remuneration and Social Issues Committee

The Nominations, Remuneration and Social Issues Committee is an advisory body of the Board of Directors, which was created to improve efficiency and quality of the work of the Board of Directors through an in-depth

consideration and monitoring of matters falling within the competence of the Board of Directors in the context of the Human Resource Policy, the system of appointments and remunerations, as well as the assessment of the performance of the members of the Management Board and the Corporate Secretary.

As of the date of this Base Offering Memorandum, the members of the Nominations, Remuneration and Social Issues Committee are Marie-Hélène Bérard (Chair), Norbert Grundke and Daniel Alan Witt.

Strategic Planning Committee

The role of the Strategic Planning Committee is to make recommendations to the Board of Directors in relation to the development of the Issuer's priority areas and the strategy of its development, including the development of measures that will improve the Issuer's performance in the medium and long-term.

As of the date of this Base Offering Memorandum, the members of the Strategic Planning Committee are Daniel Witt (Chair), Norbert Grundke, Marie-Hélène Bérard, Karagoishin Rustam Timurovich and Kasenov Arman Bakitzhanovich.

Other Committees and Support Bodies

The Management Board is also assisted by the Activity Planning and Assessment Committee, the Assets and Liabilities Management Committee and the Strategy and Corporate Development Committee.

The Activity Planning and Assessment Committee is a standing advisory and consultative body under the Management Board of the Issuer, which coordinates the process of business planning and budgeting for the Group.

The Assets and Liabilities Management Committee is a standing advisory and consultative body of the Management Board of the Issuer, which develops recommendations for improving the efficiency of management of assets and liabilities of the Group with the view of complying with the principles of diversification of assets and liabilities, optimisation of financial, operating, strategic and legal risks, and ensuring the financial sustainability.

The Strategy and Corporate Development Committee is a collegial advisory and consultative body established to develop recommendations concerning the strategy and corporate development of the Group, and to ensure that the Development Plan is more effectively implemented. It also seeks to improve of the corporate governance system and ensure the sustainable development of the Group's activities.

Internal Audit Service

The mission of the Internal Audit Service is to conduct objective internal audits using a risk-based approach, providing recommendations and sharing knowledge.

To ensure the independence and objectivity of the internal audits, the Internal Audit Service is accountable to the Board of Directors and the Audit Committee. The Internal Audit Service conducts its activities in accordance with the requirements of the legislation of the Republic of Kazakhstan, the Charter and the Code of Corporate Governance of the Issuer, the norms of the IAS internal regulatory documents approved by the Board of Directors of the Issuer and the International Professional Practices Framework recommended by the Institute of Internal Auditors and based on the risk-oriented audit plan. The Internal Audit Service carries out its activities in compliance with the legislation of the Republic of Kazakhstan, the International Professional Practices Framework recommended by the global Institute of Internal Auditors and internal regulations of the Issuer. An external assessment of the Internal Audit Service's activity is generally performed, with the last such assessment completed in 2022 by "KPMG Tax and Advisory" LLP - confirmed that the IAS activities conformed to the Internal Audit Standards and Code of Ethics (99%). The assessment approved the activities of the Internal Audit Service, in line with the International Professional Standards for Internal Audit and the Code of Ethics.

The head and employees of the Internal Audit Service are appointed by the Board of Directors based on a competitive selection process. The Board of Directors approves the audit plan and key performance indicators applicable to the Internal Audit Service. The report on the activities of the Internal Audit Service is submitted to the Audit Committee and the Board of Directors on a quarterly basis.

Board and Management Remuneration

Determining the procedure, amount and terms of the remuneration of the members of the Board of Directors is the responsibility of the Ministry of the National Economy as the sole shareholder of the Issuer.

In 2025, remuneration was paid solely to the Independent Directors of the Board of Directors of the Issuer. If an Independent Director attends a half of or less than a half of all the meetings of the Board of Directors and its Committees, his remuneration will be reduced, unless such absence is due to an illness or leave on his main job. Remuneration of executive management is based on the Issuer's financial results and shall not exceed six official salaries.

Conflicts of Interest

In 2025, no corporate conflicts or implications of any situations related to an occurred conflict of interests were observed at the Issuer.

The Issuer has instituted and maintains a policy regarding the settlement of corporate conflicts and conflicts of interest involving officials and employees of the Issuer, which is aimed at ensuring the prevention and settlement of any actual or potential conflicts of interest.

RELATIONSHIP WITH THE GOVERNMENT

State authorities in the management of the Issuer

The sole shareholder of the Issuer is the Government of the Republic of Kazakhstan represented by the Ministry of National Economy of the Republic of Kazakhstan. The Government manages the Issuer exclusively through the exercise of the powers of the sole shareholder provided for by the law and/or the Articles of Association of the Issuer, as well as the representation of some members of the Government on the Board of Directors of the Issuer.

The Government as the sole shareholder is empowered, among other things, to approve the Issuer's development strategy, determine the Issuer's key corporate governance principles; appoint members of the Board of Directors and the Chairman of the Management Board and early terminate their powers, approve financial results, and determine the Issuer's dividend policy.

The Issuer was established according to a decree of the President of the Republic of Kazakhstan (Decree #571 dated 22 May 2013) to optimise the management system of development institutions and financial organisations and to support the growth of the national economy. The interaction between the Issuer and the Government is based in particular on the following principles: (i) the Government is entitled to participate in administering the Issuer according to the procedure set forth by the laws of the Republic of Kazakhstan and/or the Articles of Association and (ii) Principle of transparency and objectivity in the disclosure of information about the Issuer's activities to the government as the sole shareholder.

The Board of Directors of the Issuer is comprised of: (i) the Prime Minister of the Republic of Kazakhstan; (ii) the First Deputy Prime Minister of the Republic of Kazakhstan; (iii) the Deputy Prime Minister - Minister of National Economy of the Republic of Kazakhstan; (iv) the Minister of Finance of the Republic of Kazakhstan; (v) the Minister of Industry and Construction of the Republic of Kazakhstan; (vi) the Chairman of the Management Board; and (vii) three independent directors.

Contributions from the Government

For the years ended 31 December 2023, 2024 and 2025, the Government has provided financial support to the Issuer in the form of cash contributions, loans and grants.

The Issuer has issued shares for the total nominal amount of KZT 155,000 million in the year ended 31 December 2023. No shares were issued in the year ended 31 December 2024. The Issuer has issued shares for the total nominal amount of KZT 46,800 million in the year ended 31 December 2025.

Loans received from the Government of the Republic of Kazakhstan amounted to KZT 850,516 million for the year ended 31 December 2025, KZT 820,139 million for the year ended 31 December 2024 and KZT 795,421 million for the year ended 31 December 2023.

Government grants to the Issuer amounted to KZT 1,073,826 million for the year ended 31 December 2025, KZT 1,221,909 million for the year ended 31 December 2024 and KZT 1,034,690 million for the year ended 31 December 2023.

Dividends distributed to the Government

The amount of dividends to be distributed to the Government is determined based on the following principles: (i) respecting the interests of the Issuer's Sole Shareholder; (ii) ensuring the profitability of operations and financial sustainability; (iii) financing activities, including investment projects implemented using the Issuer's funds; (iv) transparency of the mechanisms used to determine such amounts; and (v) balancing the short-term (income generation) with the long-term (Issuer's development) interest of the Sole Shareholder.

In the year ended 31 December 2025, the Issuer declared and paid dividends amounting to KZT 159,043 million as compared to KZT 126,167 million in 2024 and KZT 58,616 million in 2023.

RELATED PARTY TRANSACTIONS

Parties are generally considered to be related if the parties are under common control, or one party has the ability to control the other party or can exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form. The Government has control over the Issuer as the Government is the ultimate controlling party of the Issuer since members of the Government are represented on the Board of Directors of the Issuer and the Government represented by the Ministry of National Economy of the Republic of Kazakhstan is the sole shareholder of the Issuer.

Transactions with the Board of Directors and Management Board

For the year ended 31 December 2025, the total remuneration of members of the Board of Directors and the Management Board was KZT 679 million in 2025, as compared to KZT 586 million for the year ended 31 December 2024 and KZT 442 million for the year ended 31 December 2023.

Transactions with other Related Parties

The Issuer's principal related party transactions are with its subsidiaries and other affiliated companies. Related parties may also include entities under common control (including, where applicable, state-controlled entities), as well as key management personnel. Such transactions are conducted in the ordinary course of business and may include, among other things, funding arrangements, loans and deposits, debt securities and other financial services. Further information on the Group's related party transactions is set out in Note 36 to the 2025 Financial Statements, Note 37 to the 2024 Financial Statements and Note 39 to the 2023 Financial Statements.

OVERVIEW OF KAZAKHSTAN

Territory, Population and Natural Resources

The Republic of Kazakhstan, which is the second largest former Soviet Union republic after Russia based on land mass, became an independent state in 1991.

Kazakhstan is the largest landlocked country located in Central Asia and is bordered by Russia to the north and west, China to the east, Kyrgyzstan, Uzbekistan and Turkmenistan to the south and the Caspian Sea to the west. In the Caspian Sea, Kazakhstan shares maritime boundaries with Russia, Iran, Turkmenistan and Azerbaijan. It is the ninth largest country in the world based on land mass, covering 2.7 million square kilometres, approximately the same size as Western Europe. In December 1997, the capital moved from Almaty to Astana (formerly known as Akmola), which is located in northern Kazakhstan, and the President, the Parliament and all ministries have since relocated to Astana. In 2019, Astana was renamed as Nur-Sultan to honour the first President of the Republic of Kazakhstan, Nursultan Nazarbayev, who resigned in March 2019. In 2022, Nur-Sultan was renamed back to Astana. Almaty remains, however, the financial, cultural and scientific centre of the country and is the largest city in Kazakhstan.

As of 1 February 2026, the population of Kazakhstan surpassed 20.5 million. Kazakhstan is one of the most sparsely populated countries in the world with an average population density of approximately 7.4 people per square kilometre. The population of Kazakhstan is ethnically diverse. Kazakhs are the largest among the country's approximately 130 different ethnic groups, accounting for 71.3% of the population at the beginning of 2025, followed by Russians (14.6%), Uzbeks (3.3%), Ukrainians (1.8 %) and others (9%). The relative size of the Kazakh ethnic group has increased since the country's independence, mainly because of the emigration of non-Kazakh ethnic groups and because of the return of many ethnic Kazakhs to the country.

Historically, Kazakhstan belongs to the Turkic-speaking world. Kazakh is the official language of Kazakhstan. Russian is widely spoken and is permitted under Kazakhstan's Constitution to be used officially on equal grounds with the Kazakh language in State institutions and local self-administrative bodies.

The secular status of the country is enshrined in Kazakhstan's constitution, which also provides for the right to religious freedom. Various religious and ethnic groups live in peaceful co-existence. The principal religions are Islam and Orthodox Christianity. The country is also home to Jews, Buddhists, Catholics and Protestants, particularly in the German communities.

Kazakhstan is rich in natural resources. According to the Energy Institute Statistical Review of World Energy 2025, in 2024, Kazakhstan was the thirteenth largest oil producer in the world and the second largest oil producer in the CIS after Russia. The country is also a significant exporter of wool, wheat, meat, machinery and various chemicals. Kazakhstan has enjoyed relatively high levels of foreign direct investment ("**FDI**"), particularly in the oil and gas sector. From 2020 to 2024, FDI in Kazakhstan amounted to approximately U.S.\$110.8 billion. Net FDI inflows were approximately U.S.\$3.6 billion in 2023 and U.S.\$151.2 million in 2024. For the first nine months of 2025, net FDI inflows amounted to approximately U.S.\$1.18 billion.

Constitution, Government and Political Parties

Constitution

Kazakhstan's current constitution (the "**Constitution**") was adopted in August 1995 by a national referendum and came into force on 5 September 1995. The Constitution has since been amended in 1998, 2007, 2011, 2017, 2019 and 2022. The Constitution provides for a separation of powers between the executive, legislative and judicial functions. It establishes and sets out the powers and functions of the President, Parliament (of two chambers: the upper chamber, the Senate and the lower chamber, the Majilis), the Government (headed by the Prime Minister), the Supreme Court, the Constitutional Court and local governments and administrations.

The Constitution protects certain fundamental rights and personal freedoms of the citizens of Kazakhstan, including the right to life and protection from discrimination based on ethnicity, social status, occupation, gender, race, nationality or beliefs. The Constitution also provides for the right to a private life, the right to own property and the right to defend oneself in a court of law. Foreign individuals and stateless persons benefit from the fundamental rights under the Constitution (although this is subject to statutory derogations). Death penalty is prohibited under the Constitution.

On 15 March 2026, a national referendum approved a new Constitution of the Republic of Kazakhstan. The new Constitution is to enter into force on 1 July 2026. The new Constitution retains Kazakhstan's status as a unitary presidential republic and preserves a number of core constitutional principles, while introducing a revised institutional framework including the Kurultai of the Republic of Kazakhstan as the highest representative body exercising legislative power.

As of the date of this Base Offering Memorandum, the 1995 Constitution, as amended, remains in force.

The President

Under the Constitution, the President is the head of State and Kazakhstan's highest ranking official. The President ensures the responsibility and accountability of Kazakhstan's authorities to the citizens of Kazakhstan, is commander-in-chief of the armed forces and has the power to issue decrees and orders that are binding on the entire State. The President can initiate constitutional amendments and call referenda. The President also appoints administrative heads of oblasts and the heads of the capital, Astana, the city of Shymkent and the city of Almaty with consent from the local representative body (the "**maslikhat**") of the relevant oblast, the capital, Astana, the city of Shymkent and the city of Almaty. The President has the power to dissolve Parliament as a whole or solely the Majilis following consultation with the chairpersons of both chambers of Parliament and the Prime Minister.

The President has other significant powers of appointment and dismissal, including the power to appoint and dismiss the Prime Minister (in consultation with and following the approval of the Majilis), members of the Government (in consultation with the Prime Minister), the Governor of the NBK (following approval from the Senate and the Chairperson of the Constitutional Court (following approval from the Senate)).

In December 1991, Nursultan Nazarbayev, who had been the First Secretary of the Kazakh Communist Party, was elected as the first President of Kazakhstan. A referendum in April 1995 extended the term of his presidency until 2000, and he was re-elected in January 1999, December 2005, April 2011 and April 2015.

On 19 March 2019, the President of Kazakhstan Nursultan Nazarbayev resigned from his post. The President's powers were transferred to Kassym-Jomart Tokayev, who was of the time the Chairman of the Senate and who became the President until the next presidential election, which was of the time scheduled to be held in April 2020. On 9 April 2019, Kassym-Jomart Tokayev announced that the early presidential election will take place on 9 June 2019. Tokayev said that he called for the early election because it was "absolutely necessary" to ensure "continuity, predictability and stability" at the time of political transition and "to remove any uncertainty". Before the announcement, on 8 April 2019, consultations were held with the participation of the Chairman of the Senate, Prime Minister, Chairman of the Constitutional Court and Deputy Chairman of the Majilis. On 9 June 2019, a presidential election was held and President Tokayev won the election receiving 70.96% of the votes.

Following the January 2022 protests, President Tokayev introduced the political concept of "New Kazakhstan" in his state-of-the-nation address on 1 September 2022. Tokayev stated that "for the successful implementation of radical and comprehensive reforms aimed at building a just Kazakhstan, a new mandate of trust from the people is required." He further noted that these reforms can only be implemented over an extended period of time which is why he would be seeking re-election. In September 2022, President Tokayev signed a decree for an early presidential election which he won in November 2022 after securing 81.31% of the votes.

Under the Constitution, with effect from September 2022 the President is elected to office by a popular vote for a term of seven years; the same person may not be elected President more than once.

If the President is unable to perform his duties for a sustained period of time due to illness, the Parliament must form a commission consisting of an equal number of members of Parliament from both chambers of Parliament and a number of medical experts. If the commission opines that the President is unable to perform his or her duties due to illness and the Constitutional Court opines that the established constitutional procedures have been complied with, the President can be removed if, at a meeting of both chambers of Parliament, at least 75.0% of each chamber of Parliament votes in favour of such removal. The President may also be dismissed from office if found guilty of high treason. An investigation into accusations of high treason may be conducted with the approval of a majority of the members of the Majilis at the initiative of at least one third of its members. Following an investigation arranged for by the Senate, the President may, at a joint meeting of both chambers of Parliament, be dismissed by a final vote of at least 75.0% of each chamber of Parliament, provided that the Supreme Court confirms that the accusations are valid, and the Constitutional Council confirms that the established constitutional procedures have been complied with. Should the resolution dismissing the President not be voted within two

months from the charges of high treason being brought, the charges against the President shall be discharged. Upon discharge of such charges, the members of the Majilis who had initiated the investigation shall be dismissed from their office.

In the case of premature release or dismissal of the President from office (including in the case of death), the presidential powers and duties are assumed by the chairperson of the Senate for the remainder of the presidential term and, if the chairperson of the Senate is unable to assume the presidential powers and duties, they are assumed by the chairperson of the Majilis. If the chairperson of the Majilis is unable to assume the presidential powers they are passed on to the Prime Minister.

Following the entry into force of the new Constitution on 1 July 2026, the office of the President will continue to be elected by popular vote for a single seven-year term. However, the new Constitution introduces a Vice-President appointed by the President with the consent of the Kurultai and restructures the President's constitutional relationship with the legislative branch by requiring the consent of the Kurultai for a number of key appointments, including the Prime Minister. The succession mechanism is also revised, with presidential powers passing first to the Vice-President, then to the Chair of the Kurultai and then to the Prime Minister.

The Parliament

The Parliament is the highest representative body of Kazakhstan exercising legislative power.

The current parliamentary structure of Kazakhstan includes a bicameral Parliament, consisting of two chambers: the Senate and the Majilis.

The Senate consists of 50 deputies, 10 of whom are appointed by the President (five of which on the proposal of the Assembly of People of Kazakhstan) and the remainder of whom are appointed by the representative body of each region, the cities of republican status are Astana, Almaty and Shymkent. The term of office for members in the Senate is six years. Every three years, half of the seats in the Senate are up for re-election. Senate elections were last held on 14 January 2023.

The Majilis consists of 98 members elected under a mixed electoral system, which includes proportional representation from a unified national election district based on party lists and single-mandate territorial election districts. The term of office for members in the Majilis is five years. The most recent election for the Majilis took place on 19 March 2023, in which seven political parties participated. The Amanat party (formerly known as Nur Otan party) received 53.9% of the votes, winning 40 seats, the Auly party received 10.9% of the votes, winning 8 seats, the Respublica party received 8.59% of the votes, winning 6 seats, the People's Party of Kazakhstan received 6.8% of the votes, winning 5 seats, the Democratic Party of Kazakhstan Ak Zhol received 8.41% of the votes, winning 6 seats, and the National Social Democratic party received 5.20% of the votes, winning 4 seats, and the Baytaq party received 2.30% of the votes. Besides, 29 candidates were elected in the Majilis in single-mandate territorial election districts.

The process of introducing new legislation is initiated by Government agencies, which send proposals for new legislation to the Ministry of Justice of Kazakhstan. The Ministry of Justice drafts an overall legislative plan containing all proposals that have been received. The draft legislative plan, which is signed by the Prime Minister, is then sent to the Presidential administration, for review.

If the proposal is included into the legislative plan, the relevant Government agency drafts the bill. The Government then forwards the relevant bill to Parliament, where following adoption by the Majilis, it is sent to the Senate. The Senate can then either approve the bill, or suggest amendments and submit the amended bill back to the Majilis for its consideration. Once both chambers of Parliament have approved the bill, it is sent to the President for signature, after which the law becomes effective.

Following the entry into force of the new Constitution, Kazakhstan's current bicameral Parliament will be replaced by the Kurultai of the Republic of Kazakhstan, which will be the highest representative body exercising legislative power. The Kurultai will consist of 145 deputies elected for a five-year term under a proportional representation system in a single nationwide electoral district.

The right of legislative initiative will belong to the President, deputies of the Kurultai, the Government and the Kazakhstan Halyk Kenesi, and will be exercised exclusively in the Kurultai. Laws will be adopted by the Kurultai and submitted to the President for signature, with the President retaining the right to return a law or individual

provisions for reconsideration and revote. During the temporary absence of the Kurultai caused by the early termination of its powers, the President may issue decrees having the force of constitutional laws or laws.

The Government

The executive branch is the Government, headed by the Prime Minister. The Government is responsible for the development and implementation of social and economic policies of Kazakhstan, its defence, security and ensuring public order; implementation of legislation and international treaties; and preparation and implementation of the Republican Budget, as well as the conduct of the foreign policy. The Government is a collegial body, which exercises the executive power of the State, heads the countrywide system of various executive bodies and manages their activities. The Government is accountable to the President and Parliament. The Government is formed by the President in the manner prescribed by the Constitution. The Government consists of the Prime Minister, the Prime Minister's deputies, ministers representing 21 ministries and other officials.

Under the new Constitution, the Government will remain the collegial body exercising executive power, but its accountability to the legislative branch is strengthened. The Government will be responsible before both the President and the Kurultai, which will have the power to hear reports from members of the Government and, in certain cases, raise the issue of their dismissal before the President. The Prime Minister will be appointed by the President with the consent of the Kurultai.

Kazakhstan Halyk Kenesi

The new Constitution establishes the Kazakhstan Halyk Kenesi (People's Council of Kazakhstan) as the highest consultative body representing the interests of the people. Among other functions, it will be entitled to submit draft laws to the Kurultai and to initiate a proposal for a national referendum. The organisation and activities of the Kazakhstan Halyk Kenesi are to be regulated by a constitutional law.

The Supreme Court and Judicial System

Judicial authority is vested in the Supreme Court, local courts and other courts created by legislation. The Supreme Court is the highest judicial body of last instance for all civil, criminal and other matters tried in local and other courts. The chairperson and the judges of the Supreme Court are elected by the Senate from candidates nominated by the President based on recommendations of the Supreme Judicial Council. The President approves the number of judges on the Supreme Court based on the recommendation of the chairperson of the Supreme Court. The chairperson of the Supreme Court is elected for a term of five years. The Supreme Judicial Council is comprised of the chairperson of the Supreme Judicial Council and other members appointed by the President. The Chairperson of the Supreme Judicial Council shall be appointed by the President following approval from the Senate. Chairpersons and judges of all local and other courts, other than the Supreme Court are appointed by the President on a permanent basis upon the recommendation of the Supreme Judicial Council and may be removed if a panel of judges (consisting of nine judges, including judges from district and regional courts and the Supreme Court) determines that the judge is professionally incompetent, commits a disciplinary offence or fails to meet certain prescribed standards.

On 5 July 2024, amendments to the Law "On the Judicial System and the Status of Judges of the Republic of Kazakhstan" was adopted, which took effect on 1 July 2025. These amendments establish separate Cassation courts in Kazakhstan, which will function as interregional courts. The President will establish the Cassation courts based on the proposal of the Chairperson of the Supreme Court, with the consent of the Supreme Judicial Council. The Cassation courts will serve as the cassation instance, a role currently fulfilled by the Supreme Court until the amendments come into force.

The new Constitution largely preserves the existing judicial framework.

The Constitutional Court

In 2022, the Constitution was amended to transform the Constitutional Council into the Constitutional Court. Prior to the amendments, Constitutional Council was responsible for providing official interpretations of the provisions of the Constitution, ensuring the constitutionality of legislation and international treaties and resolving disputes over presidential and parliamentary elections and public referenda.

The Constitutional Court, in addition to the powers formerly exercised by Constitutional Council, examines legal acts that directly affect the rights and freedoms of individuals enshrined in the Constitution for their compliance with the Constitution. The Constitutional Court consists of 11 judges, including the Chairperson, whose term of office is eight years. The Chairperson of the Constitutional Court is appointed by the President following approval from the Senate.

The new Constitution retains the Constitutional Court as the body exercising constitutional review. It will consist of the Chairperson and 10 judges serving eight-year terms. Judges of the Constitutional Court are to be appointed by the President with the consent of the Kurultai. The Court's constitutional jurisdiction continues to include, among other matters, applications by citizens in respect of normative legal acts directly affecting their constitutional rights and freedoms.

Local Government

The structure of local government was established in December 1993 and is comprised of maslikhats for each of the country's 17 oblasts and the cities which have the status of "cities of republican status" (Astana, Almaty and, since 19 June 2018, Shymkent). Approximately 188 districts and a further 89 cities together make up the second tier of territorial administration. The maslikhats are responsible for, among other things, approval of economic and social development plans and the local budget and are also required to report on the execution of such budget.

The heads of local government ("**Akims**") are appointed as follows: (i) Akims of Astana, Almaty, Shymkent and oblasts are appointed by the President following approval by the maslikhats of Astana, Almaty, Shymkent or the oblast, respectively; (ii) Akims of districts and important cities within oblasts are appointed by the Akim of that oblast following approval by the maslikhat of that district or city; (iii) Akims of districts within cities, other than Astana, Almaty and Shymkent, are appointed by the Akim of that city following approval by the maslikhat of that city; (iv) Akims of districts within Astana, Almaty and Shymkent are appointed by the Akims of Astana, Almaty and Shymkent following approval by the maslikhats of Astana, Almaty and Shymkent, respectively; and (v) Akims of towns, rural districts and villages are elected by the residents of the relevant towns, rural districts and villages, respectively.

The new Constitution largely preserves the existing local government framework.

Political Parties

The principle of political plurality is enshrined in the Constitution. There are seven registered political parties, the main ones being the Amanat party (formerly known as Nur-Otan party), the Democratic party of Kazakhstan Ak Zhol, the People's party of Kazakhstan, the National Social Democratic party and the Auyl party.

In order to formally establish a political party, a party must consist of at least 700 citizens representing at least two-thirds of the oblasts, and the cities of Astana, Almaty and Shymkent. A political party must obtain at least 5.0% of the total number of votes in a unified national election district to hold one of the elected seats in the Majilis. Elected seats in the Majilis are allocated on the basis of proportional representation. If only one party receives at least 5.0% of the total number of votes, the party that receives the second highest number of votes will automatically be allocated at least two seats in the Majilis.

The President cannot be a member of a political party while exercising his or her powers.

The new Constitution preserves the principle of political pluralism. It provides that the President and the Vice-President may not be members of a political party while exercising their powers.

International Relations

Kazakhstan has established diplomatic relations with over 187 countries. Kazakhstan is a full member of the United Nations, the International Monetary Fund, the World Bank (including the International Bank for Reconstruction and Development, the International Development Association, the Multilateral Investment Guarantee Agency and the International Finance Corporation), the Organisation for Security and Cooperation in Europe, the United Nations Educational, Scientific and Cultural Organisation, the International Atomic Energy Agency, the European Bank for Reconstruction and Development, the Asian Development Bank, the International Organisation of Securities Commissions, Japan International Cooperation Agency and the Islamic Development

Bank. Kazakhstan was elected twice as a member of the UN Human Rights Council for the terms 2013-2015 and 2022-2024.

Kazakhstan maintains peaceful relations with countries of the global community and has no outstanding disputes relating to state borders. On 8 February 2019, Kazakhstan ratified the Convention on the Legal Status of the Caspian Sea, which was signed on 12 August 2018 by the leaders of Azerbaijan, Iran, Kazakhstan, Russia and Turkmenistan. Under this convention, the waters of the Caspian Sea are divided into three zones: territorial waters, fishery zones and the “common maritime space”. The territorial waters extend from the coastline up to 15 nautical miles. They are subject to the sovereignty of the coastal state. The signatories’ respective fishery zones extend to a belt of a further 10 nautical miles adjacent to the territorial waters, in which each signatory state has exclusive rights over the aquatic biological resources. The waters located beyond the signatories’ respective fishery zones (i.e., beyond a maximum of 25 nautical miles from the coasts) are part of the “common maritime space”. It is open for use by all signatory states. Thus far, Azerbaijan, Kazakhstan, Russia and Turkmenistan have ratified this convention. Iran has not yet ratified the convention. The convention will enter into force once all signatories have ratified it.

Russia

Kazakhstan has historically maintained significant political and economic relations with Russia. After gaining independence in 1991, Kazakhstan concluded a so-called zero option agreement with Russia, which provided for Russia’s acceptance of responsibility for virtually all external debt liabilities of the former Soviet Union, in return for Kazakhstan waiving all claims on former Soviet Union assets located outside the territory of Kazakhstan.

Space exploration began for the first time in 1957 when the first satellite was launched by the former Soviet Union from the Baikonur Space Centre located in Kazakhstan from which, in 1961, the first man was launched into space. In 1994, Kazakhstan concluded a series of agreements with Russia (the “**Baikonur Agreements**”) on the future use of the Baikonur Space Centre. Under the Baikonur Agreements, the Government leased the facilities to Russia for 20 years in return for the payment of annual rent of U.S.\$115 million. An agreement to extend the lease until 2050 was signed between Russia and Kazakhstan in January 2004 and was ratified in April 2010. Russia currently leases approximately 6,000 square kilometres of territory enclosing the Baikonur Space Centre.

In May 1997, Kazakhstan and Russia (together with other parties) signed documents confirming their legal status as the shareholders of the Caspian Pipeline Consortium (the “**CPC**”) in relation to a pipeline (the “**CPC Pipeline**”) linking the Tengiz oil field in the western part of Kazakhstan with the Black Sea port of Novorossiysk in Russia.

Russia is one of Kazakhstan’s largest trade partners and, together with Kazakhstan and Belarus, is a member of the Eurasian Economic Union.

In 2025 Kazakhstan’s imports from Russia accounted for 29.7% of Kazakhstan’s total imports, compared with 30.5% for 2024 and 26.5% for 2023. Over the same period, Kazakhstan’s exports to Russia accounted for 10.3% of Kazakhstan’s total exports, compared with 11.7% for 2024 and 12.4% for 2023.

In 2025, the trade turnover between Kazakhstan and Russia amounted to U.S.\$27.4 billion, a decrease of 2,71% since 2024.

In 2025, in the total amount of foreign trade turnover of the Republic of Kazakhstan with the Eurasian Economic Union countries, the major share is occupied by the Russian Federation-88.6%. The main partner country of the Republic of Kazakhstan in import is Russia.

If the current sanctions against Russia are extended or further expanded, this could have a negative impact on both imports from, and exports to, Russia.

Kazakhstan is not a party to the current conflict in Ukraine or the dispute over the alleged role of Russia in events in Eastern Ukraine and Crimea. The conflict has had no material impact on Kazakhstan’s relations with Russia or Ukraine. Kazakhstan has been taking an active role in trying to facilitate the peaceful resolution of the conflict.

Kazakhstan maintains friendly relations with both Ukraine and Russia. Kazakhstan expresses particular concern about the significant loss of life, destruction of civilian infrastructure, and the unprecedented humanitarian impact, including the large number of refugees.

Consistently aligning with its principled stance on international issues, Kazakhstan firmly advocates for a peaceful resolution to the conflict. It stands ready to provide a neutral platform for peace talks if the conflicting parties express interest in such negotiations.

The conflict in Ukraine has direct repercussions for Kazakhstan, especially due to its geographical location, which disrupts established transport and logistics routes crucial for foreign trade and transit. Additionally, Kazakhstan is affected indirectly by extensive anti-Russian sanctions, as Russia remains a pivotal trade and economic partner both bilaterally and through regional integration associations.

While Kazakhstan has implemented a series of measures aimed at ensuring that the country is not used as a conduit in the circumvention of Russian sanctions imposed by the U.S., UK, the EU and certain other countries, it has refrained from imposing equivalent sanctions due to a number of political, economic and geographical considerations. Kazakhstan's approach underscores its commitment to regional stability, peace, and maintaining constructive relationships with all parties involved in the conflict in Ukraine, while also safeguarding its own national interests and sovereignty.

China

Political relations with China, Kazakhstan's significant neighbour, have steadily developed since Kazakhstan's independence. Kazakhstan first established diplomatic relations with China in 1992. In 1994, both countries signed an accord defining the China-Kazakhstan border and further reaffirmed the position through supplemental agreements in 1996, 1997, 1998 and 1999. In 2001, Kazakhstan and China signed an agreement on cooperation for cross-boundary river use and protection. China also publicly announced its intention to cease testing nuclear weapons at the Lop Nur test site, near the Kazakhstan border in Xinjiang province, a long-standing source of dispute between the two countries. Kazakhstan and China continue to cooperate within international and regional frameworks such as the UN and the Shanghai Cooperation Organisation ("**SCO**").

China entered Kazakhstan's energy market after signing an Intergovernmental Agreement on Cooperation in the Field of Oil and Gas in September 1997. A general agreement between Kazakhstan's Ministry for Energy and Mineral Resources and China's National Petroleum Corporation ("**CNPC**") was also signed, which included the development of oil projects in Kazakhstan and the construction of the Kazakhstan-China Oil Pipeline. This agreement facilitated the implementation of additional joint projects beneficial to both countries. In July 2013, ConocoPhillips sold its 8.4% of shares in Kazakhstan's Kashagan oil field to CNPC, marking the first equity holding by a Chinese company in a major offshore Caspian energy field.

Oil is downstreamed directly to China from Kazakhstan via the Kazakhstan-China Oil Pipeline, which consists of two existing Soviet-era pipeline sections and three major new sections, totalling around 2,800 km from Atyrau in western Kazakhstan to Alashankou on the Kazakhstan-China border. It is one of the world's longest oil pipeline systems. The three new segments are operated by joint ventures between KazMunayGas and CNPC or PetroChina. The Turkmenistan-China Gas Pipeline (lines A, B, and C) operated by Asian Gas Pipeline LLP is a major transit pipeline transporting Turkmen and Uzbek gas to China, exporting Kazakh gas to China. The length of the gas pipeline through Kazakhstan is 2,612 km for lines A and B and 1,304 km for line C.

The two countries also cooperate in security and military spheres. In August 2006, Kazakhstan's National Security Committee and China's Public Security Ministry conducted an anti-terrorist exercise at the border. Law enforcement agencies of both countries continue to collaborate on combating drug trafficking, weapons and explosive materials smuggling and organised transnational crimes.

In May 2015, the Chinese President Xi Jinping and former President of Kazakhstan Nazarbayev agreed to align the China-proposed Belt and Road Initiative with Kazakhstan's "Nurly Zhol" infrastructure development programme to achieve common development and prosperity based on equality and reciprocity. Kazakhstan has also agreed to cooperate with China on trade, industrial capacity, energy and technology. Significant investments have been made in transportation infrastructure related to the Belt and Road Initiative, particularly in railways. The railway linking China with Western Europe runs through Kazakhstan, reducing transport time between China and Western Europe to approximately 15 days, compared to about 45 days by sea.

Economic relations between Kazakhstan and China continue to develop. According to NBK statistics, gross inflow of direct investment from China into Kazakhstan amounted U.S.\$1.19 billion in 2024 and U.S.\$2.63 billion in 2025. China remains one of the largest external trade partners of Kazakhstan, accounting for 19.2% of

Kazakhstan's exports and 29.2% of Kazakhstan's imports for 2025, compared with 18.3% and 25.3% for 2024, respectively.

Cooperation between Kazakhstan and China in the energy sector and other economic sectors has developed within the framework of the SCO. Initially, the main purpose of the SCO was to find a civilised solution to border disputes following the collapse of the Soviet Union, as well as addressing security issues. The SCO has become a key platform for fostering regional security, economic cooperation and diplomatic engagement. As a founding member of the SCO, Kazakhstan has been actively involved in developing the organisation's strategic direction since its establishment in 2001. In recent years, the SCO's scope has expanded beyond political and security issues to include combating extremism, terrorism and separatism, as well as strengthening economic cooperation in energy, transport, industry and agriculture. The Energy Club within the SCO was established to resolve energy issues among member states by facilitating energy dialogues and the signing of bilateral agreements. The importance of Kazakhstan's membership was enhanced by its recent chairmanship in the SCO for the term 2023-2024. Kazakhstan has chaired the SCO on four occasions in total.

Given Kazakhstan's central location in Central Asia, regional security is of prime importance to the SCO. The SCO provides a multilateral forum for combating terrorism, extremism, and separatism. Through the SCO's Regional Anti-Terrorist Structure ("RATS"), Kazakhstan works closely with member states like Russia, China, and its Central Asian neighbours to enhance regional stability. During the 24th Meeting of the Council of Heads of State of the SCO held in Astana in July 2024, Kazakhstan's president Kassym-Jomart Tokayev also outlined the security as the one of the priorities of strategic importance under Kazakhstan's chairmanship of the SCO. He emphasised that the SCO has exceptional opportunities to serve as a guarantor of peace and security throughout the Eurasian continent. In this regard, Kazakhstan's Initiative on World Unity for Just Peace, Harmony, and Development has received unanimous support from SCO member states.

The SCO also offers Kazakhstan opportunities for economic cooperation with key members, particularly China and Russia. Mutual trade among SCO member states continues to grow, with Kazakhstan's trade with SCO member states increased by 6.5% in 2024 as compared to 2023.

From a multilateral diplomacy perspective, Kazakhstan's membership of the SCO strengthens its diplomatic ties with other member and observer states, such as India, Pakistan, and Iran. The SCO enhances Kazakhstan's international standing and allows it to balance relations with major global powers.

Kazakhstan also engages in broader cultural and humanitarian cooperation through the SCO. The Kazakhstan chairmanship has, for instance, focused on enhancing cultural and humanitarian ties. Key projects include the SCO Spiritual Sanctuaries and its first international music festival, SCO Silk Road. Ten tourist territories have also been identified for the implementation of joint projects. The city of Almaty in Kazakhstan has been designated as the cultural and tourist capital of the SCO.

In June 2025, Chinese President Xi Jinping paid a further state visit to Kazakhstan. During the visit, the parties discussed the further expansion of trade, industrial and logistics cooperation, including the development of transport connectivity and transit routes.

United States

Over the past 30 plus years, Kazakhstan and the U.S. built a strong partnership based on mutual respect and trust. Tested by time, this partnership excels in all areas, including but not limited to politics, trade and investment, defence and security, culture and education, climate and environment, critical minerals, transport and infrastructure. Maturity of bilateral ties is embedded in the enhanced strategic partnership status that Astana and Washington D.C. established six years ago. According to the 2025 U.S. Investment Climate Statement on Kazakhstan, as of 1 January 2025, the stock of foreign direct investment from the U.S. to Kazakhstan totalled U.S \$40.1 billion.

Traditionally, Astana and Washington D.C. have a very dynamic bilateral agenda. Since 1 January 2024, a number of high-profile visits have been organised. At the invitation of Secretary Blinken, His Excellency Murat Nurtleu paid a working visit to Washington D.C. in March, followed by the annual meetings of HLD and ESPD in Astana and Washington D.C. respectively. As a champion and avid supporter of C5+1 dialogue, Kazakhstan hosted the inaugural B5+1 Forum in Almaty in March 2024 that paved the way for further productive discussions at the TIFA Council and USTR Ambassador Katherine Tai's first visit to Astana in March 2024.

On 31 July 2025, the United States issued an Executive Order further modifying the reciprocal tariff rates by introducing a 25% ad valorem duty on imports from Kazakhstan, effective 1 August 2025. According to the Ministry of Trade and Integration of Kazakhstan, approximately 95% of Kazakh exports to the U.S.—including strategic commodities such as oil, uranium, silver, and ferroalloys—remain exempt from the newly imposed tariff.

In November 2025, President Kassym-Jomart Tokayev paid an official visit to Washington, D.C., where he held talks with President Donald Trump at the White House and met with senior members of the U.S. Administration and Congress. In the same period, Kazakhstan also participated in the C5+1 summit in Washington, D.C., reflecting the continuing importance of the U.S.-Central Asia dialogue. In 2025, Kazakhstan and the United States signed 29 agreements worth nearly U.S.\$17 billion, highlighting the continued development of bilateral economic cooperation.

International Organisations

World Trade Organisation

On 30 November 2015, Kazakhstan became a full member of the World Trade Organisation (the “WTO”), having initially applied for WTO membership in 1996. In the process of acceding to the WTO, Kazakhstan made various commitments, including in relation to access to the commodity market, access to the services market, technical regulation, sanitary and phytosanitary measures, agriculture, investment policy and intellectual property rights.

Due, in part, to the benefits of Kazakhstan’s membership in the WTO, imports have been increasing in recent periods. For example, imports into Kazakhstan from non-CIS countries, based on actual trade flows, increased by 196.0% from U.S.\$14.0 billion in 2016 to U.S.\$41.5 billion in 2023.

Kazakhstan participated in the 10th WTO Ministerial Conference held in December 2015 in Nairobi. Kazakhstan urged WTO members to follow its example and abolish subsidies for the export of agricultural products. A number of key WTO members supported this initiative and actively expressed their support for the proposal. The WTO passed a Ministerial Decision on 19 December 2015, pursuant to which developed country members of the WTO undertook to eliminate export subsidy entitlements immediately, and developing country members of the WTO agreed to do so by the end of 2023, in each case subject to certain exceptions.

As of 2024, only Net Food-Importing Developing Countries (“NFIDCs”) and Least-Developed Countries (“LDCs”) are permitted to provide export subsidies to their own entities under Article 9.4 of the WTO Agreement on Agriculture.

In October 2018, WTO members agreed to hold the next Ministerial Conference of the WTO in Astana in June 2020, but the conference was postponed due to the COVID-19 pandemic and the next conference dates were subsequently set for November and December 2021 in Geneva. However, due to travel restrictions put in place following the identification of a new variant of the COVID-19 virus, the Ministerial Conference was indefinitely postponed. Eventually, the Ministerial Conference took place in June 2022 in Geneva and was co-hosted by Kazakhstan and chaired by Mr. Timur Suleimenov, former Deputy Chief of Staff of Kazakhstan’s President. The conference concluded successfully on 17 June 2022, with agreement on a package of key trade initiatives. Following the successful chairmanship, Kazakhstan secured significant multilateral outcomes, including unprecedented decisions on fisheries subsidies, the WTO response to emergencies, food safety and agriculture, and WTO reform.

Commonwealth of Independent States

Kazakhstan is one of the founding members of the CIS, which was established in December 1991 to promote the resolution of key issues for the development of its members, including economic, security, political and human cooperation issues, as well as migration and development of contacts between citizens of the member states. Currently, the CIS consists of 11 states, including nine full member states. An agreement of the CIS free trade zone was signed in October 2011. A series of programme documents aimed at trade and economic cooperation is currently being implemented. Development of cooperation in other fields including security, culture, education and sport is in progress.

Collective Security Treaty Organisation

Kazakhstan is a member of the Collective Security Treaty Organisation (the “**CSTO**”) established in 2002 on the basis of the Collective Security Treaty dated 15 May 1992. The charter goals of the CSTO are strengthening of peace, international and regional security and stability, prevention of security threats and collective protection of independence, territorial integrity and sovereignty of CSTO member states, with a priority of achieving these goals through political means. Article 4 of the Collective Security Treaty (the “**CST**”) establishes a mutual defence pact among member states. According to Article 4, if one member state is subjected to aggression defined as an armed attack that threatens its security, stability, territorial integrity, or sovereignty, it will be considered as an aggression against all CSTO members. In response, the other members are obligated to provide assistance, including military support, to counter the threat. The CSTO’s current members include Russia, Armenia, Belarus, Kazakhstan, Kyrgyzstan, and Tajikistan, all of which are committed to mutual security and defence.

Eurasian Economic Union

In 1994, former President Nazarbayev proposed the establishment of a Eurasian economic union. In October 2000, Belarus, Kazakhstan, Kyrgyzstan, Russia and Tajikistan signed the Agreement on the Establishment of the Eurasian Economic Union, an international economic organisation established for the purpose of deepening economic and human integration among the member states, with the goal of establishing a customs union and a free trade area.

As part of the process leading to the establishment of the Eurasian Economic Union, the Customs Union of Belarus, Kazakhstan and Russia (the “**Customs Union**”) was established and came into effect on 1 January 2010. On 1 January 2012, the Common Economic Space (the “**CES**”) between Belarus, Kazakhstan and Russia and a new supranational body, the Eurasian Economic Commission (“**EEC**”), which replaced the commission of the Customs Union, was established. The Customs Union provides for tariff-free trade among the member countries and a uniform customs tariff applicable to trade by member states with other countries. The goal of the EEC is to establish and maintain conditions in which the Customs Union and CES can function and to develop proposals for further economic integration between the member countries. In connection with the establishment of the CES, in November 2011 and December 2012, the three member countries entered into a number of agreements which provide for the free movement of goods, services, capital and labour among the member countries and set out common principles in respect of competition, industry subsidies and currency policy.

On 29 May 2014, the presidents of Kazakhstan, Belarus and Russia signed the Eurasian Economic Union Agreement, and on 1 January 2015 the Eurasian Economic Union came into effect. The Eurasian Economic Union represents a comprehensive cooperation among the member states with deadlines for integration in various areas and expansion of the areas of responsibility of its supra-national bodies. Its objective is to form a legal framework for a united economic zone, establish a common energy market and provide for the free movement of people within the zone. Most of the existing CES agreements are codified in the Eurasian Economic Union Agreement. The Eurasian Economic Union has an integrated single market. As of 2023, it consists of 183 million people and a gross domestic product of over U.S.\$2.4 trillion. Membership in the Eurasian Economic Union gives Kazakhstan significant opportunities for further economic development. The main drivers behind Kazakhstan’s membership in the Eurasian Economic Union are that it is a landlocked country and thus the maintenance of good relations with its neighbours is imperative, its internal market’s ability to invest in the manufacturing sector is limited and a stable local export zone mitigates against global economic downturns.

Since the establishment of the Eurasian Economic Union, Armenia and Kyrgyzstan have acceded as members and Moldova, Cuba and Uzbekistan have been granted observer status. In 2015, the Eurasian Economic Union signed its first free trade agreement, which was with Vietnam. Since then, several other free trade agreements have been signed, including with Singapore, Iran (a limited scale free trade agreement due to the existing sanctions regime) and Serbia (replacing then-existing respective bilateral agreements with the key Eurasian Economic Union economies). The Free Trade Agreement between the Eurasian Economic Union and Iran was signed on 25 December 2023. The Agreement will enter into force after all the necessary procedures are completed and will replace the Interim Agreement dated 17 May 2018. In 2018, the Eurasian Economic Union signed a non-preferential agreement on economic and trade cooperation with China. Negotiations of free trade agreements with Egypt, India, Indonesia, UAE and Mongolia are ongoing.

As a permanent regulatory body of the Eurasian Economic Union, the EEC has authority to make decisions of a normative and legal nature that are binding on member states. These decisions are part of Union law and are

subject to direct application in the territories of the member states. Therefore, the EEC and the Eurasian Economic Union have a significant influence on Kazakhstan's legislation and economy.

European Union

The European Union (the "EU") is the main trade partner of Kazakhstan, accounting for 30.0% of Kazakhstan's external trade turnover in 2023. The New Strategy of the EU on Central Asia approved in June 2019 establishes the basis for cooperation of the EU with Central Asian countries for the next 10-15 years.

In January 1995, Kazakhstan signed a Partnership and Co-operation Agreement with the EU, which came into force on 1 July 1999. Due to Kazakhstan's progression from the status of an assistance recipient to a partner country of the EU, on 21 December 2015, the EU and Kazakhstan signed a new, Enhanced Partnership and Cooperation Agreement (the "**Enhanced Partnership and Cooperation Agreement**"), which entered into provisional application on 1 May 2016. The Enhanced Partnership and Cooperation Agreement covers 29 areas of cooperation, including the issues of international and regional security, trade, investment, and infrastructure development, as well as innovation, culture, sport and tourism. Kazakhstan became the first country in Central Asia to sign a second-generation agreement that is supposed to stimulate the cooperation between the EU and Kazakhstan and forms the legal basis for the whole spectrum of Kazakhstan-EU relations. Second generation agreements have a broader scope and increased level of regulatory and other cooperation at state level than standard "first generation" bilateral trade agreements. The Partnership and Cooperation Agreement was drafted in a way to take into account Kazakhstan's obligations within the WTO and the Eurasian Economic Union. It also outlines the commitment towards a facilitated EU visa regime for citizens of Kazakhstan, which establishes a dialogue on migration issues between both parties.

North Atlantic Treaty Organisation ("NATO")

Kazakhstan has taken part in the NATO Partnership for Peace (the "**PfP**") programme since 1994. The goal of Kazakhstan's cooperation with NATO is to prepare its Armed Forces' peacekeeping units for deployment in UN peacekeeping missions that adhere to NATO standards. This partnership significantly enhances the peacekeeping capabilities of Kazakhstan's Armed Forces. Since 2002, Kazakhstan's involvement in the PfP Planning and Review Process has strengthened the interoperability between its armed forces and NATO Allies. Kazakhstan actively participates in both hosting and participating in PfP training and exercises. Since 2006, Kazakhstan has hosted military exercises entitled "Steppe Eagle" in cooperation with NATO Allies and regional partners. Through these exercises, Kazakhstan has developed its military's technical and operational standards to align with international expectations. In December 2010, Kazakhstan's PfP Training Centre (the "**KAZCENT**") received NATO accreditation as a Partnership Training and Education Centre. The country's peacekeeping military unit (the "**KAZBAT**"), has also been trained to operate under NATO guidelines, enhancing its ability to participate in multilateral missions worldwide.

OSCE

Kazakhstan has been a member of the OSCE since 1992. In 2010, Kazakhstan assumed the chairmanship of the OSCE, which demonstrates the recognition of the country's increasing role in the region and within the OSCE. Kazakhstan is the first post-Soviet Union state to have chaired the OSCE. In December 2010, the OSCE Summit was held in Astana.

At the summit, the Astana Declaration was adopted, in which participants reaffirmed their commitment to the principles and values of the OSCE.

Organisation of Islamic Cooperation

In December 1995, Kazakhstan became a member of the Organisation of Islamic Cooperation (formerly known as the Organisation for the Islamic Conference) (the "**OIC**"), which comprises 57 countries across four continents. Since joining the OIC, Kazakhstan has actively participated in significant events, including summits, conferences of foreign ministers and annual coordination meetings of foreign ministers at the UN General Assembly.

In June 2011, Astana hosted the 38th session of the Council of Foreign Ministers of the OIC, where Kazakhstan was elected Chairman of the Council. Kazakhstan was selected as the Vice Chairman of the Standing Committee for Economic and Commercial Cooperation of the OIC for 2011-2013. Kazakhstan also participates in the Conference of the Parliament Union of the OIC. During the 38th session of the Council of Foreign Ministers of

the OIC, Kazakhstan's President proposed establishing a system of food cooperation within the OIC. On 19 February 2018, the Islamic Organisation for Food Security, headquartered in Astana, was officially launched.

On 10 September 2017, Astana hosted the first OIC Summit on Science and Technologies, presided over by former President of Kazakhstan. The summit resulted in the adoption of the Astana Declaration and the OIC Programme for the Development of Science, Technologies and Innovation until 2026. At the 45th Session of the OIC Ministers of Foreign Affairs, held in May 2018 in Bangladesh, a Kazakhstan diplomat Askar Musinov was elected Vice-General Secretary (Assistant Secretary General for Science and Technology) of the OIC for Science and Technology for the term 2019-2023. Kazakhstan is currently advancing the "Dialogue Platform OIC-15" initiative, which aims to unify 15 leading Muslim countries in science and technology to enhance the potential of Islamic countries in these fields. The first Ministerial meeting of the OIC-15 Dialogue Platform took place in Almaty on 25-26 May 2023. The second OIC-15 Ministerial Meeting is to be held in Tehran, Iran. Kazakhstan places significant importance on cooperation with the economic bodies of the OIC, including the Islamic Development Bank ("IDB"), one of the largest development institutions. One of the four regional offices of the IDB is located in Almaty.

Other Regional Organisations

In 1992, at the initiative of Kazakhstan's President, the Conference on Interaction and Confidence-Building Measures in Asia (the "CICA") was established with its secretariat located in Kazakhstan. The CICA currently comprises 28 member states and aims to enhance cooperation by multilateral approaches towards peace, security and stability in Asia. Kazakhstan has been chaired the CICA for the 2020-2024 term.

In 1993, an Agreement on the Establishment of an Economic Union was signed by the CIS countries, and the Interstate Bank was established by the CIS member governments and central banks. The main goals of the Interstate Bank include facilitating multilateral settlements among CIS national central banks and providing financing for interstate projects. The SCO is an international organisation dedicated to ensuring security and promoting stability across the Eurasian region. Its activities encompass addressing emerging challenges and threats, fostering trade relations and enhancing cultural and humanitarian cooperation. The SCO aims to establish a fair, polycentric global order that serves the interests of all its member states.

At the initiative of Kazakhstan, the Association of Investors of the SCO Member States was established. During Kazakhstan's chairmanship in the SCO, significant milestones were achieved. In June 2017, the SCO welcomed India and Pakistan as new members. Then, on 4 July 2024, during the Astana SCO summit, the Belarus was granted full membership, becoming the tenth full member of the SCO. Full members of the SCO include Kazakhstan, China, Russia, India, Iran, Pakistan, Kyrgyzstan, Tajikistan, Belarus and Uzbekistan.

In January 2006, Kazakhstan and Russia established the Eurasian Development Bank, a regional development bank focussed on promoting economic development and facilitating integration in Eurasia. The bank currently has six member states, including Armenia, Belarus, Kyrgyzstan, Tajikistan and Russia.

Legal System

Civil Code

Kazakhstan has a civil law legal system. The central legal act is the Civil Code of the Republic of Kazakhstan, which consists of a general part and a special part.

The general part was adopted on 27 December 1994 and became effective on 1 March 1995. The special part entered into force on 1 July 1999. The general part of the Civil Code regulates such issues as the legal status of private and legal entities, transactions, general provisions of obligations, ownership rights and general provisions of contracts.

The special part of the Civil Code regulates specific types of obligations (such as sale and purchase, leases and the provision of services), intellectual property rights, inheritance rights and international private law. Although certain aspects of general commercial law are contained in the Civil Code, there are also separate legal acts relating to specific forms of legal entities. The most commonly used forms of legal entities are joint-stock companies, which are established under the Law "On Joint Stock Companies" No. 415-II dated 13 May 2003, and partnerships, which are established under the Law "On Partnerships with Limited and Additional Liability" No. 220-I dated 22

April 1998. Incorporated legal entities are required to register with the Ministry of Justice or NJSC State Corporation “Government for Citizens”, as applicable.

Certain restrictions are placed on foreign persons having shareholdings in companies in Kazakhstan that engage in certain types of activities, including telecommunications, mass media and aviation.

Entrepreneurship Code and Investment Regime

The current investment regime is principally governed by the Entrepreneurship Code of the Republic of Kazakhstan, dated 29 October 2015 (the “**Entrepreneurship Code**”). The Entrepreneurship Code sets out the rights of market participants and consumers and protects against anti-monopoly activity, anti-competitive actions of state authorities and unfair competition. The aim of the Entrepreneurship Code is to protect competition, create conditions for the efficient functioning of commodity markets and ensure unity of economic space and the free movement of goods and free economic activity in Kazakhstan. Among other things, the Entrepreneurship Code provides that certain transactions that increase market concentration are subject to prior approval by the Agency of the Republic of Kazakhstan for Protection and Development of Competition (the “**Competition Authority**”). Market participants are also restricted from entering into anti-competitive agreements or undertaking any action that leads to the restraint of competition.

Domestic and foreign investors generally fall under the same investment regime, with certain exceptions. In addition, Kazakhstan is a party to bilateral investment protection treaties, which, as of the date of this Base Offering Memorandum, were entered into and are currently in force with 45 nations, under which protections are available to investors from the relevant nation that is a party to the treaty. Kazakhstan is also a party to the 1997 Moscow Convention for the Protection of the Investor’s Rights, under which protections are available to foreign investors irrespective of their nationality. The guarantees provided for by the above instruments include (depending on the instrument) guarantees of fair and equitable treatment, of full protection of security, of certainty of contracts with the Kazakhstan State and Kazakhstan’s obligation to pay compensation to the investor in the event of (direct or indirect) expropriation of the investment. The Entrepreneurship Code and the bilateral investment protection treaties include rights for an investor to submit a dispute arising out of, or in connection with, its investment to international arbitration (as an alternative to submitting the dispute to the local courts).

In 1995, Kazakhstan ratified the Energy Charter Treaty, which provides protections to investors from other parties to the Energy Charter Treaty in respect of investments associated with economic activities in the energy sector. These protections encompass all economic activities related to the exploration, extraction, refining, production, storage, land transport, transmission, distribution, trade, marketing or sale of energy materials and products. They also extend to services such as the construction of energy facilities, prospecting, consulting, management and design and activities aimed at improving energy efficiency.

Subsoil Code

With effect from 29 June 2018, a new Subsoil and Subsoil Use Code (the “**Subsoil Code**”) replaced the Law “On Subsoil and Subsoil Use” from 2010. The Subsoil Code’s main aims include the attraction of investment into the mining sector and expansion of exploration activities. The Subsoil Code has for the first time introduced the rule under which licences for exploration of solid subsoil resources can be granted to the first applicant (provided no one else has applied for the same deposit), while retaining the pre-existing procedure under which licences are granted on the basis of a tender. The Subsoil Code has also significantly simplified the licence application process. Taken together with the changes in tax laws (including beneficial tax treatment of exploration activities and the decrease in the administrative and tax burdens on taxpayers), the introduction of the new Subsoil Code is expected to foster foreign and local direct investments in the subsoil sector. In addition to the Subsoil Code, subsoil use is also regulated by certain other civil, environmental, corporate, currency and property legislation. Government decrees and other secondary legislation are used to regulate subsoil use. Under the Subsoil Code, subsoil contracts and licences may be granted to local or foreign legal entities or individuals. Transfers of subsoil use rights are only permitted after consent of the competent authority has been obtained. The transfer of a subsoil use right (a share in the subsoil use right) is prohibited (i) under a licence for the exploration of solid minerals in the first year of its operation, (ii) under a licence for geological study of subsurface resources, and (iii) under a licence for prospecting. Subsoil users are also required to use equipment, materials and finished products that are manufactured in Kazakhstan, and to use and train local staff when conducting subsoil use operations.

Anti-Corruption, Anti-Money Laundering and Anti-Terrorist Financing

In common with many other countries around the world, the fight against corruption continues to be a high-priority item on the governmental agenda in Kazakhstan.

Since its independence, Kazakhstan has been gradually creating effective anti-corruption institutions and mechanisms that meet international standards. Kazakhstan was one of the first in the post-Soviet space to create a legal framework for combating corruption. Since 2001, a number of anti-corruption programmes have been implemented and specific measures have been taken within the framework provided by these programmes to eliminate the causes of, and conditions conducive to, corruption.

In recent years, Kazakhstan has taken a number of measures to improve domestic anti-corruption legislation. The country's Criminal Code provides an extensive list of corruption-related crimes. A life-long ban has been introduced on holding public office in Government bodies for persons who have committed corruption offenses, as well as the mechanisms for seizing property or income derived from property obtained in violation of criminal law.

As part of Kazakhstan's efforts to promote social justice, on 12 July 2023, Kazakhstan adopted the Law "On Return of Illegally Acquired Assets" aimed at recovering unlawfully appropriated assets. As of 2025, more than U.S \$4 billion has been recovered and allocated to social development projects, including the construction of 82 schools for 46,000 students. Cooperation with international partners, including Interpol and UN agencies, has enabled the recovery of an additional U.S \$750 million from foreign jurisdictions.

In the past several years, a number of anti-corruption projects have been introduced, such as "Adaldyk Alany-Regions Free from Corruption" (aimed at eradication of petty corruption in governmental institutions), "Protecting business and investments" (aimed at combating corruption in the business sector), "Adal Zhol" (aimed at controlling the quality of train services), "Sanaly Urpaq" (aimed at helping to form and strengthen an anti-corruption culture through the educational system, "Adal komek" (aimed at increasing the legal literacy of citizens, providing legal assistance on certain matters), "Antikor-live" (aimed at explaining the integrity policy and creating an anti-corruption culture among the population through social networks and other information resources) and "Adal bilim" (aimed at eradication of corruption and increasing the trust of citizens in the education system).

Previously, the Anti-Corruption Agency was responsible for anti-corruption matters in the Republic of Kazakhstan. By Decree of the Head of State dated 30 June 2025, the Anti-Corruption Agency of the Republic of Kazakhstan was reorganized through its merger with the National Security Committee. As a result of this reorganization, a new authority - the Anti-Corruption Service of the National Security Committee was established.

Kazakhstan state-owned companies have adopted and implemented anti-corruption guidelines. They regularly review and analyse corruption-related risks and also seek to increase transparency in hiring and promoting their employees.

The adoption of anti-corruption measures is positively evaluated by the international community. In 2008, Kazakhstan became a full member of the UN Convention Against Corruption. Kazakhstan also takes part in the sub-regional programme of the Istanbul Anti-Corruption Action Plan, within the framework of which, the anti-corruption policy of Kazakhstan is subject to periodic expert assessment.

Kazakhstan maintains constructive relations with Transparency International, with regular visits to the head offices of anti-corruption rating organisations and substantive discussions with experts conducting country analysis for the Corruption Perceptions Index. In 2023, Kazakhstan ranked in 93rd place among 180 countries rated (with 38 points), which demonstrates the progress that has been made in fighting corruption both in the short-term and in the longer term. For example, Kazakhstan was ranked 124th among 180 countries in 2018 and was ranked 140th among 177 countries in 2013.

In order to develop international cooperation in this area, Kazakhstan joined the Group of States Against Corruption of the Council of Europe on 30 December 2019, becoming its 50th member state. Membership in this organisation is expected to enable Kazakhstan to adopt the best international practices in the anti-corruption area as well as to share its own successful initiatives.

Kazakhstan, is a member of the International Association of Anti-Corruption Agencies ("IACCA", with its headquarters in Beijing), the OECD Anti-Corruption Network for Eastern Europe and Central Asia ("ACN

OECD”), ADB and OECD Anti-Corruption Initiative for Asia and the Pacific (with its headquarters in Manila), International Anti-Corruption Academy (“IACA”, with headquarters in Luxembourg) and the CIS Interstate Anti-Corruption Council (with its headquarters in Minsk).

Kazakhstan is a founding member of the Eurasian Group on Combating Money Laundering and Financing of Terrorism (“EAG”), one of nine FATF-style regional groups established to promote FATF recommendations and monitor their implementation by member states. Kazakhstan organised the 38th EAG plenary meeting carried out from 4 to 9 June 2023 in Almaty. The Financial Monitoring Agency of the Republic of Kazakhstan (the “**Financial Monitoring Agency**”) signed memoranda with 39 countries on behalf of the country.

Kazakhstan ratified the following UN conventions specified in the FATF international standards: (i) On 29 June 1998, Kazakhstan acceded to the UN Convention against Illicit Traffic in Narcotic and Psychotropic Substances; (ii) On 2 October 2002, Kazakhstan acceded to the International Convention for the Suppression of the Financing of Terrorism; (iii) On 4 May 2008, Kazakhstan ratified the UN Convention against Corruption; (iv) On 4 June 2008, Kazakhstan ratified the UN Convention against Transnational Organised Crime; and (v) On 2 May 2011, Kazakhstan ratified the Convention on Laundering, Search, Seizure and Confiscation of the Proceeds from Crime.

From 12 to 30 September 2022, Kazakhstan successfully passed the Mutual Evaluation of the compliance with measures to combat money laundering and terrorist financing with the FATF international standards. The report on the Mutual Evaluation presents conclusions on compliance of the legislation of Kazakhstan with the FATF Recommendations, as well as the effectiveness of the national AML/CFT system, recommendations of expert-evaluators aimed at improving and strengthening the national AML/CFT system. Kazakhstan is making significant efforts to identify, understand and assess its ML/TF risks and develop measures to minimise them. The Financial Monitoring Agency of the Republic of Kazakhstan is a core element of the functioning of Kazakhstan’s AML/CFT regime and has a significant amount of data at its disposal.

Other Legislation

The registration of land and title to land is set out in the Land Code of the Republic of Kazakhstan adopted on 20 June 2003 (the “**Land Code**”). Under the Land Code, private companies are permitted to own property that will be used for agriculture, forestry or construction, industrial and residential purposes, and land that must be used for a particular purpose, as designated by the relevant State authority. Foreign persons are permitted to own only property designated for construction purposes, or industrial and residential property, including property that requires development. Foreign persons are not permitted to own land located around Kazakhstan’s border zones.

Currency legislation, including the Currency Control Law, stipulates that payments and money transfers between residents may be made only in Tenge (except for certain statutory exceptions), while there are no restrictions on payments and money transfers between residents and non-residents. Non-residents may, without limitation, receive and transfer dividends, interest and other income received on deposits, securities, loans and other currency transactions with residents, in accordance with the procedures established in currency legislation. Pursuant to the Currency Control Law, the NBK carries out record registration of currency contracts entered into between a resident and a non-resident of Kazakhstan related to ‘capital movement transactions’ (e.g., loan agreements, agreements providing for participation in the capital of a Kazakh legal entity) that exceeds a certain threshold.

Kazakh legal entities (excluding Kazakh banks) must purchase and/or sell foreign currency through their bank accounts opened with Kazakh banks in accordance with the rules on carrying out currency operations in Kazakhstan. In particular, Kazakh legal entities (excluding Kazakh banks) can exchange non-cash foreign currency for the national currency within one business day, for purposes unrelated to fulfilling foreign currency obligations, up to the equivalent of U.S.\$50,000.

Under the Currency Control Law, the Government - based on a joint recommendation from the NBK and other competent authorities - is entitled to introduce “payment balance protection measures”. These measures can be established when there is a serious threat to the stability of (i) the payment balance, (ii) the internal currency market and/or (iii) the economic security of Kazakhstan, provided that such threats cannot be resolved by other economic policy measures. The payment balance protection measures must comply with the international treaties ratified by Kazakhstan, if and when such treaties entered into within the framework of participation in international organisations. Such measures must have temporary effect and be cancelled when the circumstances that led to their introduction are eliminated. Should the payment balance protection measures impose new permits (licences) or notification requirements, such new permits (licences) or notification requirements are exempt from the requirements of the Law “On Permits and Notifications” No. 202-V dated 16 May 2014.

Certain natural monopolies are permitted in Kazakhstan including those whose activities are related to: transportation of crude oil and crude oil products; natural gas; electricity and heat; railways, air transport, port and airport services; and telecommunications, postal services and water supply services. Such entities are subject to specific restrictions and additional obligations, including the obligation to provide services and products in accordance with specified tariffs and prices as approved by the authorised agency.

All transactions with securities in Kazakhstan are subject to mandatory registration. The Central Securities Depository JSC is responsible for maintaining the system of securities holders' registers in Kazakhstan. Kazakhstan issuers may offer their securities in the other jurisdictions and on stock exchanges located in other jurisdictions (subject to statutory restrictions, including the requirement to offer a portion of such securities on the domestic stock market). The main securities trading platform in Kazakhstan is the KASE, whose members include Kazakhstan's leading banks, investment companies and brokers. In 2017, the AIX was established as part of the AIFC. The AIX's mission is to develop the public equity and debt capital markets in Kazakhstan and the Central Asian region.

Kazakhstan has also ratified the following international conventions and treaties related to investment protection: the New York Convention; Convention on the Settlement of Investment Disputes between States and Nationals of Other States ("ICSID") (Washington, DC, 18 March 1965); Convention Establishing the Multilateral Investment Guarantee Agency (Seoul, 11 October 1985); and Convention for the Protection of Investors' Rights (Moscow, 28 March 1997).

Development Strategy

In October 1997, former President Nazarbayev presented a strategy for the development of Kazakhstan through to 2030 (the "**Kazakhstan-2030 Strategy**"). On 6 April 2007, he signed a decree that focused further measures to implement the Kazakhstan-2030 Strategy (the "**2030 Framework**"). The 2030 Framework provided for a list of objectives, including introducing corporate governance principles and ensuring transparency in the activities of state holding companies and joint stock companies with state participation. Pursuant to the 2030 Framework, state holdings shall improve the system of corporate governance in joint stock companies with state participation by assessing their performance, introducing the institute of independent directors and other corporate governance principles. The 2030 Framework also aimed to approving a Model Code of Corporate Governance for joint-stock companies with state participation and their subsidiaries (affiliates), which was adopted on 5 October 2018 by virtue of the Decree of the Minister of National Economy of Kazakhstan (the Model Code does not cover Samruk-Kazyna).

On 15 October 2021, the President Tokayev signed the Presidential Decree "On Approval of the Concept of Legal Policy of the Republic of Kazakhstan until 2030" which highlighted the need to improve and modernise the Republic of Kazakhstan's corporate law (the "**2030 Concept**"). The 2030 Concept is a programme document defining the strategy of building a democratic state governed by the rule of law through the renewal and improvement of the legal system. To improve the state governance in this area, the Action Plan for implementing the 2030 Concept was approved by the Government Resolution dated 29 April 2022, which outlines several key initiatives. These include reviewing the effectiveness of the legal frameworks for operational management and economic management rights in modern relations, developing norms concerning the responsibility of corporate officers, and modernising corporate legislation in line with best practices in corporate governance. The Action Plan also details 104 measures which provide for, among other things, modernisation of corporate legislation based on recommendations and standards of best practice in corporate governance, and the development of framework for the liability of corporate officials. Given the complexity and correlation of these initiatives with other areas of civil law, their implementation will require a comprehensive preliminary analysis. The Ministry of Justice, together with the interested parties, has been carrying out an analysis of the Civil Code. The working group includes representatives from government bodies, NGOs, academia, and expert communities. In addition, a study on civil legislation is planned under a joint economic research programme with the World Bank in 2024, with potential phases extending into 2025-2026. Analytical research aimed at improving civil legislation has been approved for funding from the Republican Budget for 2025-2027. There are also plans in place to include civil law research in programme-targeted funding for 2025-2026. Thus, a comprehensive study of civil legislation is scheduled for 2024-2027.

In December 2012, the Kazakhstan-2030 Strategy was replaced with the Kazakhstan-2050 Strategy, which is a long-term development strategy with seven main focus areas that aims for Kazakhstan to become one of the 30 most developed countries in the world by 2050. The focus areas cover economic development, encouragement of entrepreneurship, social policy, knowledge and skills development, public service delivery, corporate governance,

foreign policy and ethnic and religious diversity. The Kazakhstan-2050 Strategy includes Kazakhstan's objective of becoming a member of the WTO, which Kazakhstan achieved on 30 November 2015. The Kazakhstan-2050 Strategy is implemented through the National Development Plan 2029 (as defined below), the National Security Strategy of the Republic of Kazakhstan and development plans of state bodies and national companies.

In May 2015, following the presidential election, former President Nazarbayev announced the "Plan of the Nation-100 Specific Steps" programme, which outlined 100 specific steps to implement five institutional reforms. The aim of the programme is to provide a clear direction for Kazakhstan's development and to enable the international community to track Kazakhstan's progress. The programme is also a response to global and local challenges, and its ultimate goal is for Kazakhstan to become one of the 30 most developed countries in the world. Since its announcement, the government of Kazakhstan has periodically reviewed progress of the plan's implementation. During the most recent review, it was reported that 76 steps have been completed. The Kazakh authorities remain committed to continuing the implementation of the remaining steps.

On 12 December 2017, the so-called Digital Kazakhstan development programme (the "**Digital Programme**") was adopted by the resolution of the Government. The Digital Programme was aimed at, among other things, accelerating the development of the Kazakhstan economy, improving the quality of life by digital technologies in the medium term, and creating conditions for the transition of the Kazakhstan economy to a fundamentally new development path which ensures the creation of a digital economy of the future in the long term. Because the Digital Programme was ended on 17 May 2022, the Government approved the new rules for the digital transformation of public administration on 9 November 2022. The rules provide, among other things, for the development and implementation of digital transformation roadmaps for a three-year period.

In 2024, according to the UN E-Government Development Index ("**EGDI**"), Kazakhstan was ranked 28th out of 193 countries by the level of development of electronic government ("**e-Gov**"). The level of digital literacy has increased over the period from 2019 to 2023 by 8.9% up to 90.2% as of the year end of 31 December 2023.

On 21 May 2024, President Tokayev signed a law on the digitalisation of the country. In particular, the law concerns the development of fibre-optic communication lines, cellular infrastructure, electronic documents, navigation satellite technologies, etc. The document provides for the introduction of amendments to certain legislative acts on the issues of communication, digitalisation, improving the investment climate and eliminating unnecessary legislative regulation. On 30 July 2024, President Tokayev signed a decree approving the "National Development Plan of the Republic of Kazakhstan until 2029" (the "**National Development Plan 2029**"), replacing the prior National Plan 2025, which had aimed at addressing the consequences of the COVID-19 pandemic as well as developing a sustainable and inclusive economy in light of the prevailing economic conditions. The National Development Plan 2029 aims to renew and grow Kazakhstan's economy and improve citizens' welfare and introduces measure aimed at achieving these objectives by 2029. It is built on five key principles: promoting competition, supporting entrepreneurship, investing in education and innovation, improving productivity and ensuring balanced regional development. The plan addresses 17 areas, each with specific goals for 2029 and aligns with the UN's Sustainable Development Goals. Progress in social and economic development is tracked using a set of national indicators. To achieve the strategic directions set out in the National Development Plan 2029, a map of key national indicators was created, which provides for 39 indicators of socio-economic development of the country. The map includes a number of indicators to measure the welfare of citizens and the quality of social benefits. Sociological surveys will be conducted among the population and businesses to monitor the qualitative institutional improvement until 2029.

TERMS AND CONDITIONS OF THE NOTES

The following are the Terms and Conditions of the Notes which, save for the wording in italics, as supplemented, amended or replaced by the relevant Pricing Supplement, will be endorsed on each Definitive Note and attached to or incorporated by reference into each Global Note. The relevant Pricing Supplement (or relevant provisions thereof) will be endorsed upon or attached to each Global Note and Definitive Note. The Terms and Conditions of the Notes applicable to Global Notes will differ from those which would apply to a Definitive Note to the extent described under “Form of Notes”.

1 INTRODUCTION

Baiterek National Investment Holding JSC (the “**Issuer**”) has established a Global Medium Term Note Programme (the “**Programme**”) for the issuance of up to U.S.\$3,000,000,000 in aggregate principal amount of notes (the “**Notes**”). The Notes are constituted by a trust deed (as may be amended and/or supplemented and/or restated from time to time, the “**Trust Deed**”) dated 2 May 2025 between the Issuer and Citibank, N.A., London Branch as trustee for the Noteholders (as defined below) (the “**Trustee**”, which expression shall include all persons for the time being appointed as trustee or trustees under the Trust Deed). The Notes are the subject of an agency agreement dated 2 May 2025 (as may be amended and/or supplemented and/or restated from time to time, the “**Agency Agreement**”) between the Issuer, the Trustee, Citibank, N.A., London Branch as Principal Paying Agent and as Calculation Agent (the “**Principal Paying Agent**”, the “**Transfer Agent**” and “**Calculation Agent**”, which expressions include any successor Principal Paying Agent, Transfer Agent and Calculation Agent appointed from time to time in connection with the Notes) and Citibank Europe Plc as Registrar (the “**Registrar**”, which expression includes any successor Registrar appointed from time to time in connection with the Notes).

Notes issued under the Programme will be issued in series (each, a “**Series**”) having one or more issue dates and on terms otherwise identical (or identical other than in respect of the first payment of interest), the Notes of each Series being intended to be interchangeable with all other Notes of that Series. Each Series may comprise one or more tranches (each, a “**Tranche**”) of Notes issued on the same or different issue dates. The specific terms of each Tranche (which, save in respect of the denominations, issue date, issue price, first payment of interest and principal amount of the Tranche, will be identical to the terms of other Tranches of the same Series) will be set forth in the applicable Pricing Supplement (the “**Pricing Supplement**”) which should be read in conjunction with these terms and conditions (the “**Conditions**”). The terms and conditions applicable to any particular Tranche of Notes are these Conditions as supplemented, amended or replaced by the relevant Pricing Supplement. In the event of any inconsistency between these Conditions and the relevant Pricing Supplement, the relevant Pricing Supplement shall prevail.

All subsequent references in these Conditions to “**Notes**” are to the Notes which are the subject of the relevant Pricing Supplement.

Copies of the relevant Pricing Supplement, the Trust Deed, the Agency Agreement and these Conditions are available for inspection by Noteholders during normal business hours at the Specified Office of the Principal Paying Agent, the initial Specified Office of which is set out in the Agency Agreement.

Certain provisions of these Conditions are summaries of the Trust Deed and the Agency Agreement and are subject to their detailed provisions. The holders of the Notes (the “**Noteholders**”) are bound by, and are deemed to have notice of, all the provisions of the Trust Deed and all provisions of the Agency Agreement applicable to them. Copies of the Trust Deed and the Agency Agreement are available for inspection by Noteholders during normal business hours at the Specified Offices of each of the Trustee and the Paying Agents, the initial Specified Offices of which are set out in the Agency Agreement.

2 INTERPRETATION

2.1. Terms defined in the Trust Deed or the Agency Agreement shall, unless otherwise defined herein or the context requires otherwise, bear the same meanings herein. In these Conditions the following expressions have the following meanings:

“**Accrual Yield**” has the meaning given in the relevant Pricing Supplement;

“**Additional Business Centre(s)**” means the city or cities specified as such in the relevant Pricing Supplement;

“Additional Financial Centre(s)” means the city or cities specified as such in the relevant Pricing Supplement;

“Agency” means any agency, authority, central bank, department, committee, government, legislature, ministry, minister, official or public or statutory person (whether autonomous or not) of, or of the government of, any state or supra-national body;

“Average Representative Market Rate” shall mean the arithmetic mean of the Representative Market Rates for the last five FX Business Days immediately before (and including) the applicable Rate Calculation Date. In the event that the Calculation Agent is unable to make this calculation due to the unavailability of Representative Market Rates necessary for the calculation, then the Calculation Agent shall take the arithmetic mean of the NBK Rate for the last five days that such NBK Rate was published;

“Business Day” means:

- a) in the case of Euros, any day on which T2 is open for the settlement of payments in Euro (a **“Target Business Day”**);
- b) in the case of a Specified Currency other than Euros, a day (other than a Saturday, Sunday or public holiday) on which commercial banks and foreign exchange markets settle payments in the Principal Financial Centre for that currency; or
- c) in the case of a Specified Currency or one or more Business Centre(s) specified in the relevant Pricing Supplement, a day (other than a Saturday or a Sunday) on which commercial banks and foreign exchange markets settle payments in such currency in the Additional Business Centre(s) or, if no currency is indicated, generally in each of the Additional Business Centres so specified;

“Business Day Convention”, in relation to any particular date, has the meaning given in the relevant Pricing Supplement and, if so specified in the relevant Pricing Supplement, may have different meanings in relation to different dates and, in this context, the following expressions shall have the following meanings:

“Following Business Day Convention” means that the relevant date shall be postponed to the first following day that is a Business Day;

- a) **“Modified Following Business Day Convention”** means that the relevant date shall be postponed to the first following day that is a Business Day unless that day falls in the next calendar month in which case that date will be the first preceding day that is a Business Day;
- b) **“Preceding Business Day Convention”** means that the relevant date shall be brought forward to the first preceding day that is a Business Day;
- c) **“FRN Convention”, “Floating Rate Convention” or “Eurodollar Convention”** means that each relevant date shall be the date which numerically corresponds to the preceding such date in the calendar month which is the number of months specified in the relevant Pricing Supplement as the Specified Period after the calendar month in which the preceding such date occurred provided, however, that:
 - (i) if there is no such numerically corresponding day in the calendar month in which any such date should occur, then such date will be the last day which is a Business Day in that calendar month;
 - (ii) if any such date would otherwise fall on a day which is not a Business Day, then such date will be the first following day which is a Business Day unless that day falls in the next calendar month, in which case it will be the first preceding day which is a Business Day; and

- (iii) if the preceding such date occurred on the last day in a calendar month which was a Business Day, then all subsequent such dates will be the last day which is a Business Day in the calendar month which is the specified number of months after the calendar month in which the preceding such date occurred;

“Calculation Agent” means Citibank, N.A., London Branch or such other Person specified in the relevant Pricing Supplement as the party responsible for calculating the Rate(s) of Interest and Interest Amount(s) and/or such other amount(s) as may be specified in the relevant Pricing Supplement;

“Calculation Business Day” shall mean an FX Business Day used to determine the Average Representative Market Rate;

“Capital Stock” of any Person means any and all shares, interests (including partnership interests), rights to purchase, warrants, options, participations or other equivalents of or interests in (however designated) equity of such Person, including any Preferred Stock, but excluding any debt securities convertible into such equity;

“Core Assets Disposal” means a sale, assignment, conveyance, transfer, grant or otherwise a disposal of shares in JSC Development Bank of Kazakhstan and/or Otbasny Bank JSC, in each case which would leave the Issuer holding less than 50 per cent. plus one share of the issued and outstanding voting share capital of the relevant Subsidiary;

“Day Count Fraction” means, in respect of the calculation of an amount of interest on any Note for any period of time (from and including the first day of such period to but excluding the last) (whether or not constituting an Interest Period or an Interest Accrual Period, the **“Calculation Period”**):

- a) if “Actual/Actual” or “Actual/Actual (ISDA)” is specified in the applicable Pricing Supplement, the actual number of days in the Calculation Period divided by 365 (or, if any portion of that Calculation Period falls in a leap year, the sum of (A) the actual number of days in that portion of the Calculation Period falling in a leap year divided by 366 and (B) the actual number of days in that portion of the Calculation Period falling in a non-leap year divided by 365);
- b) if “Actual/365 (Fixed)” is specified in the applicable Pricing Supplement, the actual number of days in the Calculation Period divided by 365;
- c) if “Actual/365 (Sterling)” is specified in the applicable Pricing Supplement, the actual number of days in the Calculation Period divided by 365 or, in the case of an Interest Payment Date falling in a leap year, 366;
- d) if “Actual/360” is specified in the applicable Pricing Supplement, the actual number of days in the Calculation Period divided by 360;
- e) if “30/360”, “360/360” or “Bond Basis” is specified in the applicable Pricing Supplement, the number of days in the Calculation Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count fraction} = \frac{[360 \times (Y_2 - Y_1)] + [30 \times (M_2 - M_1)] + (D_2 - D_1)}{360}$$

where:

“Y₁” is the year, expressed as a number, in which the first day of the Calculation Period falls;

“Y₂” is the year, expressed as a number, in which the day immediately following the last day included in the Calculation Period falls;

“M₁” is the calendar month, expressed as a number, in which the first day of the Calculation Period falls;

“M₂” is the calendar month, expressed as a number, in which the day immediately following the last day included in the Calculation Period falls;

“D₁” is the first calendar day, expressed as a number, of the Calculation Period, unless such number would be 31, in which case D₁ will be 30; and

“D₂” is the calendar day, expressed as a number, immediately following the last day included in the Calculation Period, unless such number would be 31 and D₁ is greater than 29, in which case D₂ will be 30.

- f) if “30E/360” or “Eurobond Basis” is specified in the applicable Pricing Supplement, the number of days in the Calculation Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count fraction} = \frac{[360 \times (Y_2 - Y_1)] + [30 \times (M_2 - M_1)] + (D_2 - D_1)}{360}$$

where:

“Y₁” is the year, expressed as a number, in which the first day of the Calculation Period falls;

“Y₂” is the year, expressed as a number, in which the day immediately following the last day included in the Calculation Period falls;

“M₁” is the calendar month, expressed as a number, in which the first day of the Calculation Period falls;

“M₂” is the calendar month, expressed as a number, in which the day immediately following the last day included in the Calculation Period falls;

“D₁” is the first calendar day, expressed as a number, of the Calculation Period, unless such number would be 31, in which case D₁ will be 30; and

“D₂” is the calendar day, expressed as a number, immediately following the last day included in the Calculation Period, unless such number would be 31, in which case D₂ will be 30.

- g) if “30E/360 (ISDA)” is specified in the applicable Pricing Supplement, the number of days in the Calculation Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count fraction} = \frac{[360 \times (Y_2 - Y_1)] + [30 \times (M_2 - M_1)] + (D_2 - D_1)}{360}$$

where:

“Y₁” is the year, expressed as a number, in which the first day of the Calculation Period falls;

“Y₂” is the year, expressed as a number, in which the day immediately following the last day included in the Calculation Period falls;

“M₁” is the calendar month, expressed as a number, in which the first day of the Calculation Period falls;

“M₂” is the calendar month, expressed as a number, in which the day immediately following the last day included in the Calculation Period falls;

“D₁” is the first calendar day, expressed as a number, of the Calculation Period, unless (i) that day is the last day of February or (ii) such number would be 31, in which case D₁ will be 30; and

“D₂” is the calendar day, expressed as a number, immediately following the last day included in the Calculation Period, unless (i) that day is the last day of February but not the Maturity Date or (ii) such number would be 31, in which case D₂ will be 30;

- h) if “Actual/Actual-ICMA” is specified in the applicable Pricing Supplement,
 - (i) if the Calculation Period is equal to or shorter than the Determination Period during which it falls, the number of days in the Calculation Period divided by the product of (x) the number of days in such Determination Period and (y) the number of Determination Periods normally ending in any year; and
 - (ii) if the Calculation Period is longer than one Determination Period, the sum of:
 - (a) the number of days in such Calculation Period falling in the Determination Period in which it begins divided by the product of (1) the number of days in such Determination Period and (2) the number of Determination Periods normally ending in any year; and
 - (b) the number of days in such Calculation Period falling in the next Determination Period divided by the product of (1) the number of days in such Determination Period and (2) the number of Determination Periods normally ending in any year,

where:

“Determination Period” means the period from and including a Determination Date in any year to but excluding the next Determination Date and

“Determination Date” means the date(s) specified as such in the applicable Pricing Supplement or, if none is so specified, the Interest Payment Date(s);

“**designee**” means a designee as selected and separately appointed by the Issuer in writing;

“**Domestic Relevant Indebtedness**” means any Relevant Indebtedness which is denominated and payable in Tenge, which on issue was not quoted, listed or purchased or sold on any stock exchange, automated trading system or over-the-counter or other securities market outside the Republic of Kazakhstan and which on issue was placed only with official participants on the local market in Kazakhstan acting on behalf of other investors;

“**Early Redemption Amount (Tax)**” means, in respect of any Note, its principal amount or such other amount as may be specified in, or determined in accordance with, the relevant Pricing Supplement;

“**Early Termination Amount**” means, in respect of any Note, its principal amount or such other amount as may be specified in, or determined in accordance with, these Conditions or the relevant Pricing Supplement;

“**Euro Exchange Date**” means the date on which the Issuer gives notice (the “**Euro Exchange Notice**”) to the Trustee and the Noteholders that replacement Notes denominated in Euros are available for exchange;

“**Extraordinary Resolution**” has the meaning given in the Trust Deed;

“Final Redemption Amount” means, in respect of any Note, its principal amount or such other amount as may be specified in, or determined in accordance with, the relevant Pricing Supplement;

“FX Business Day” shall mean, solely for the purposes of determining the Representative Market Rate, a day, other than a Saturday or Sunday, on which commercial banks and foreign exchange markets are open for business in Astana, Kazakhstan.

“Group” means the Issuer and its Subsidiaries taken as a whole.

“guarantee” means any obligation, contingent or otherwise, of any Person directly or indirectly guaranteeing any Indebtedness of any Person and any obligation, direct or indirect, contingent or otherwise, of such Person:

- a) to purchase or pay (or advance or supply funds for the purchase or payment of) such Indebtedness of such Person (whether arising by virtue of partnership arrangements, or by agreements to keep-well, to purchase assets, goods, securities or services, to take-or-pay or to maintain financial statement conditions or otherwise); or
- b) entered into for the purpose of assuring in any other manner the obligee of such Indebtedness of the payment thereof or to protect such obligee against loss in respect thereof (in whole or in part);

The term “guarantee” used as a verb has a corresponding meaning. The term “guarantor” shall mean any Person guaranteeing any obligation.

“Indebtedness” means any obligation (whether incurred as principal or as surety) for the payment or repayment of money, whether present or future, actual or contingent;

“Indebtedness for Borrowed Money” means, any Indebtedness of any Person for or in respect of (i) moneys borrowed, (ii) amounts raised by acceptance under any acceptance credit facility, (iii) amounts raised pursuant to any note purchase facility or the issue of bonds, notes, debentures, loan stock or similar instruments, (iv) the amount of any liability in respect of leases or hire purchase contracts which would, in accordance with generally accepted accounting standards in the jurisdiction of incorporation of the lessee, be treated as finance or capital leases, (v) the amount of any liability in respect of any purchase price for assets or services the payment of which is deferred primarily as a means of raising finance or financing the acquisition of the relevant asset or service and (vi) amounts raised under any other transaction (including any forward sale or purchase agreement and the sale of receivables or other assets on a **“with recourse”** basis) having the commercial effect of a borrowing;

“Interest Accrual Period” means the period beginning on (and including) the Interest Commencement Date and ending on (but excluding) the first Interest Period Date and each successive period beginning on (and including) an Interest Period Date and ending on (but excluding) the next succeeding Interest Period Date.

“Interest Amount” means, in relation to a Note and an Interest Period, the amount of interest payable in respect of that Note for that Interest Period;

“Interest Commencement Date” means the Issue Date of the Notes or such other date as may be specified as the Interest Commencement Date in the relevant Pricing Supplement;

“Interest Determination Date” has the meaning given in the relevant Pricing Supplement and, where SOFR Benchmark is specified in the applicable Pricing Supplement as the Reference Rate and where SOFR Lag or SOFR Observation Shift is specified as applicable in the applicable Pricing Supplement to determine Compounded Daily SOFR or where Compounded SOFR Index is specified as applicable in the applicable Pricing Supplement) the fourth U.S. Government Securities Business Day prior to the last day of each Interest Period;

“Interest Payment Date” means the date or dates specified as such in, or determined in accordance with the provisions of, the relevant Pricing Supplement and, if a Business Day Convention is specified in the relevant Pricing Supplement:

- a) as the same may be adjusted in accordance with the relevant Business Day Convention; or
- b) if the Business Day Convention is the FRN Convention, Floating Rate Convention or Eurodollar Convention and an interval of a number of calendar months is specified in the relevant Pricing Supplement as being the Specified Period, each of such dates as may occur in accordance with the FRN Convention, Floating Rate Convention or Eurodollar Convention at such Specified Period of calendar months following the Interest Commencement Date (in the case of the first Interest Payment Date) or the previous Interest Payment Date (in any other case);

“Interest Period” means each period beginning on (and including) the Interest Commencement Date or any Interest Payment Date and ending on (but excluding) the next Interest Payment Date;

“Interest Period Date” means each Interest Payment Date unless otherwise specified in the applicable Pricing Supplement.

“ISDA Definitions” means (i) if **“2006 ISDA Definitions”** is specified in the applicable Pricing Supplement, the 2006 ISDA Definitions, as published by the International Swaps and Derivatives Association, Inc. (**“ISDA”**), as amended and updated as of the Issue Date of the first Tranche of the Notes; or (ii) if **“2021 ISDA Definitions”** is specified in the applicable Pricing Supplement, the latest version of the 2021 ISDA Interest Rate Derivatives Definitions, including any Matrices referred to therein, as published by ISDA as of the Issue Date of the first Tranche of the Notes;

“ISDA Determination” has the meaning given in the relevant Pricing Supplement; **“Issue Date”** has the meaning given in the relevant Pricing Supplement;

“Margin” has the meaning given in the relevant Pricing Supplement;

“Material Adverse Effect” means a material adverse effect on (a) the business, condition (financial or otherwise), results of operations or prospects of the Issuer or the Group, (b) the ability of the Issuer to perform its obligations under the Trust Deed and the Notes or (c) the validity or enforceability of the Trust Deed and the Notes;

“Material Requirement” means any requirement of a relevant regulatory authority applicable to any Subsidiary that is a bank, relating to capital adequacy and/or related party lending ratios;

“Material Subsidiary” means, at any given time, any other Subsidiary of the Issuer whose gross assets or gross revenues represent at least 10%, of the consolidated gross assets, or, as the case may be, consolidated gross revenues of the Issuer and its consolidated Subsidiaries (in each case, determined by reference to the Issuer’s most recent consolidated financial statements prepared in accordance with International Financial Reporting Standards (**“IFRS”**) as published at the time by the International Accounting Standards Board or its successor) or any other Subsidiary to which is transferred either (a) all or substantially all of the assets of another Subsidiary which immediately prior to the transfer was a Material Subsidiary or (b) sufficient assets of the Issuer that such Subsidiary would have been a Material Subsidiary had the transfer occurred on or before either (i) the date of the said most recent audited financial statements of the Issuer or (ii) if management accounts or other unaudited financial statements of the Issuer prepared in accordance with IFRS are available for any period subsequent to the said most recent audited financial statements, such accounts or financial statements and, for these purposes:

- a) the gross assets and gross revenues of a Subsidiary shall be determined by reference to its then most recent audited financial statements prepared in accordance with IFRS

(or, if none, its then most recent management accounts or other financial statements prepared in accordance with IFRS); and

- b) the consolidated gross assets and consolidated gross revenues of the Issuer and its consolidated Subsidiaries shall be determined by reference to its then most recent audited consolidated financial statements prepared in accordance with IFRS (or, if none, its then most recent consolidated management accounts or other unaudited consolidated financial statements prepared in accordance with IFRS);

“Maturity Date” has the meaning given in the relevant Pricing Supplement;

“Non-recourse Acquisition Financing” means any financing of all or part of the costs of the acquisition, construction or development of any assets or properties, provided that: (i) any Security Interest given by the Issuer in connection therewith is limited solely to such assets or properties; (ii) the Persons providing such financing expressly agree to limit their recourse to the assets or properties whose acquisition, construction or development is financed and any revenues derived from such assets or properties as the principal source of repayment for the moneys advanced; and (iii) there is no other recourse to the Issuer or any of its Subsidiaries in respect of any default by any Person under the financing;

“Optional Redemption Amount (Call)” means, in respect of any Note, its principal amount or such other amount as may be specified in, or determined in accordance with, the relevant Pricing Supplement;

“Optional Redemption Amount (Put)” means, in respect of any Note, its principal amount or such other amount as may be specified in, or determined in accordance with, the relevant Pricing Supplement;

“Optional Redemption Date (Call)” has the meaning given in the relevant Pricing Supplement;

“Optional Redemption Date (Put)” has the meaning given in the relevant Pricing Supplement or, following the occurrence of a Put Event, the sixtieth day after notice thereof is given by the Issuer pursuant to Condition 10.6;

“Participating Member State” means a Member State of the European Communities which adopts the Euro as its lawful currency in accordance with the Treaty;

“Payment Business Day” means:

- a) if the currency of payment is Euros, any day which is:
 - (i) a day on which banks in the relevant place of presentation (if presentation is required) are open for presentation and payment of bearer debt securities and for dealings in foreign currencies; and
 - (ii) in the case of payment by transfer to an account, a Target Business Day and a day on which dealings in foreign currencies may be carried on in each (if any) Additional Financial Centre; or
- b) if the currency of payment is not Euros, any day which is:
 - (i) a day on which banks in the relevant place of presentation (if presentation is required) are open for presentation and payment of bearer debt securities and for dealings in foreign currencies; and
 - (ii) in the case of payment by transfer to an account, a day on which dealings in foreign currencies may be carried on in the Principal Financial Centre of the currency of payment and in each (if any) Additional Financial Centre and which, if the currency of payment is Australian dollars or New Zealand dollars, shall be Melbourne and Wellington, respectively;

“Permitted Security Interest” means any Security Interest:

- a) any Security Interest existing on the Issue Date or arising out of the refinancing, extension, renewal or refunding of any Relevant Indebtedness secured by a Security Interest existing on the Issue Date, provided that the Relevant Indebtedness thereafter secured by such Security Interest does not exceed the amount of the original Relevant Indebtedness and such Security Interest is not extended to cover any property not previously subject to such Security Interest;
- b) any Security Interest created or existing in respect of Domestic Relevant Indebtedness;
- c) any Security Interest granted to secure a Non-recourse Acquisition Financing;
- d) any Security Interest upon the whole or any part of present or future assets or revenues of the Issuer or any of its Subsidiaries created pursuant to any securitisation of receivables or other payment rights, asset-backed financing or similar financing structure (created in accordance with normal market practice) and whereby all payment obligations secured by such Security Interest or having the benefit of such Security Interest are to be discharged principally from such assets or revenues;

“Permitted Shareholder” has the meaning given in Condition 10.7;

“Person” means any individual, company, corporation, firm, partnership, joint venture, association, organisation, trust or other judicial entity, including, without limitation, any state or agency of a state or other entity, whether or not having separate legal personality;

“Preferred Stock” as applied to the Capital Stock of any Person, means Capital Stock of any class or classes (however designated) which is preferred as to the payment of dividends or distributions, or as to the distribution of assets upon any voluntary or involuntary liquidation or dissolution of such Person, over shares of Capital Stock of any other class of such Person;

“Principal Financial Centre” means, in relation to any currency, the principal financial centre for that currency provided, however, that:

- a) in relation to Euros, it means the principal financial centre of such Participating Member State as is selected (in the case of a payment) by the payee or (in the case of a calculation) by the Issuer or its designee; and
- b) in relation to Australian dollars, it means either Sydney or Melbourne and, in relation to New Zealand dollars, it means either Wellington or Auckland, in each case as is selected (in the case of a payment) by the payee or (in the case of a calculation) by the Issuer or its designee;

“Put Event” has the meaning given in Condition 10.7;

“Put Option Notice” means a notice which must be delivered to a Paying Agent by any Noteholder wanting to exercise a right to redeem a Note at the option of the Noteholder;

“Put Option Receipt” means a receipt issued by a Paying Agent to a depositing Noteholder upon deposit of a Note with such Paying Agent by any Noteholder wanting to exercise a right to redeem a Note at the option of the Noteholder;

“Rate Calculation Date” shall mean the third FX Business Day preceding each Interest Payment Date, the Maturity Date or any other date on which principal or interest becomes payable under these Conditions.

“Rate of Interest” means the rate or rates (expressed as a percentage per annum) of interest payable in respect of the Notes specified in relevant Pricing Supplement or calculated or determined in accordance with the provisions of these Conditions and the relevant Pricing Supplement;

“Redemption Amount” means, as appropriate, the Final Redemption Amount, the Early Redemption Amount (Tax), the Optional Redemption Amount (Call), the Optional Redemption Amount (Put), the Early Termination Amount or such other amount in the nature of a redemption amount as may be specified in, or determined in accordance with the provisions of, the relevant Pricing Supplement;

“Reference Banks” has the meaning given in the relevant Pricing Supplement or, if none, four (or if the Principal Financial Centre is Helsinki, five) major banks selected by the Issuer or its designee in the market that is most closely connected with the Reference Rate and, in the case of any Series of Notes denominated in Tenge, **“Reference Banks”** shall mean Bank CenterCredit JSC, ForteBank JSC, JSC Halyk Bank, First Heartland Jusan Bank JSC, JSC Kaspi Bank and Citibank Kazakhstan JSC or their legal successors, or any other person named as such in the relevant Pricing Supplement;

“Reference Price” has the meaning given in the relevant Pricing Supplement;

“Reference Rate” means the rate specified as such in the applicable Pricing Supplement;
“Registrar” means the U.S. Registrar or the Registrar, as the case may be;

“Relevant Date” means, in relation to any payment, whichever is the later of (a) the date on which the payment in question first becomes due and (b) if the full amount payable has not been received in the Principal Financial Centre of the currency of payment by the Principal Paying Agent on or prior to such due date, the date on which (the full amount having been so received) notice to that effect has been given to the Noteholders;

“Relevant Indebtedness” means any present or future indebtedness in the form of, or represented by, notes, debentures, bonds or other similar capital market instruments and which is ordinarily quoted, listed or purchased and sold on any stock exchange, automated trading system or over-the-counter or other securities market;

“Relevant Screen Page” means the page, section or other part of a particular information service specified as the Relevant Screen Page in the relevant Pricing Supplement, or such other page, section or other part as may replace it on that information service or such other information service, in each case, as may be nominated by the Person providing or sponsoring the information appearing there for the purpose of displaying rates or prices comparable to the Reference Rate;

“Representative Market Rate” shall mean, with respect to any Calculation Business Day, the Tenge / U.S. Dollar daily official (market) foreign exchange rate for the previous FX Business Day, expressed as the amount of Tenge per one U.S. Dollar and as reported by the National Bank of Kazakhstan (the **“NBK”**) and published on its website (<https://www.nationalbank.kz/en/exchangerates/ezhednevnye-oficialnye-rynochnye-kursy-valyut> or any successor page thereto) (the **“NBK Rate”**), as determined by the Issuer or its designee. In the event that the NBK Rate is unavailable for any Calculation Business Day, then the Issuer will poll the Representative Market Rate by polling the Reference Banks on the immediately following FX Business Day for the Tenge / U.S. Dollar exchange rate at noon Astana time on such Calculation Business Day for the professional market and provide such obtained Tenge / U.S. Dollar exchange rate to the Calculation Agent, whereby the Calculation Agent will determine the Representative Market Rate by taking the arithmetic mean of the polled exchange rates, provided that at least two quotations are obtained;

“Reserved Matter” means any proposal to change any date fixed for payment of principal or interest in respect of the Notes, to reduce the amount of principal or interest payable on any date in respect of the Notes, to alter the method of calculating the amount of any payment in respect of the Notes or the date for any such payment, to change the currency of any payment under the Notes or to change the quorum requirements relating to meetings or the majority required to pass an Extraordinary Resolution;

“Screen Rate Determination” has the meaning given in the relevant Pricing Supplement;

“Security Interest” means any mortgage, charge, pledge, lien, security interest or other encumbrance securing any obligation of any Person or any other type of preferential arrangement having similar effect over any assets or revenues of such Person;

“SOFR Administrator’s Website” means the website of the Federal Reserve Bank of New York (currently, being <https://www.newyorkfed.org/markets/reference-rates/sofr-averages-and-index>), or any successor source;

“SOFR Benchmark Replacement Date” means the Benchmark Replacement Date with respect to the then-current Benchmark;

“SOFR Benchmark Transition Event” means the occurrence of a Benchmark Event with respect to the then-current Benchmark;

“Specified Currency” has the meaning given in the relevant Pricing Supplement;

“Specified Denomination(s)” has the meaning given in the relevant Pricing Supplement;

“Specified Interest Payment Date” has the meaning given in the relevant Pricing Supplement;

“Specified Office” has the meaning given in the Agency Agreement;

“Specified Period” has the meaning given in the relevant Pricing Supplement;

“Subsidiary” means, in relation to any Person (the **“first Person”**) at a given time, any other Person (the **“second Person”**) (i) whose affairs and policies the first Person directly or indirectly controls or (ii) as to whom the first Person owns directly or indirectly more than 50.0%, of the capital, voting stock or other right of ownership and **“Control,”** as used in this definition, means the power by the first Person to direct the management and the policies of the second Person, whether through the ownership of share capital, by contract or otherwise;

“T2” means the real time gross settlement system operated by the Eurosystem, or any successor system;

“Tenge” means the lawful currency for the time being of the Republic of Kazakhstan;

“Treaty” means the Treaty establishing the European Communities, as amended;

“U.S. Government Securities Business Day” means any day except for a Saturday, a Sunday or a day on which the Securities Industry and Financial Markets Association recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in U.S. government securities; and

“Zero Coupon Note” means a Note specified as such in the relevant Pricing Supplement.

2.2. In these Conditions:

- a) any reference to principal shall be deemed to include the Redemption Amount, any additional amounts in respect of principal which may be payable under Condition 9, any premium payable in respect of a Note and any other amount in the nature of principal payable pursuant to these Conditions;
- b) any reference to interest shall be deemed to include any additional amounts in respect of interest which may be payable under Condition 9 and any other amount in the nature of interest payable pursuant to these Conditions;
- c) references to Notes being **“outstanding”** shall be construed in accordance with the Trust Deed; and

- d) if an expression is stated in Condition 2.1 to have the meaning given in the relevant Pricing Supplement, but the relevant Pricing Supplement gives no such meaning or specifies that such expression is “**not applicable**” then such expression is not applicable to the Notes.

3 FORM, DENOMINATION AND TITLE

The Notes are issued in registered form in the Specified Denomination(s) shown in the relevant Pricing Supplement or integral multiples thereof, without interest coupons, provided that:

- a) the Specified Denomination(s) shall not be less than €100,000 or its equivalent in another currency;
- b) interests in the Rule 144A Notes shall be held in amounts of not less than U.S.\$200,000 or its equivalent in other currencies.

Title to the Notes shall pass by registration in the register that the Issuer shall procure to be kept by the Registrar in accordance with the provisions of the Agency Agreement (the “**Register**”). Except as ordered by a court of competent jurisdiction or as required by law, the holder (as defined below) of any Note shall be deemed to be and may be treated as its absolute owner for all purposes whether or not it is overdue and regardless of any notice of ownership, trust or an interest in it, any writing on it or its theft or loss and no person shall be liable for so treating the holder.

In these Conditions, “**Noteholder**” means the person in whose name a Note is registered, “**holder**” shall be read accordingly, and capitalised terms have the meanings given to them in the relevant Pricing Supplement, the absence of any such meaning indicating that such term is not applicable to the Notes.

4 TRANSFERS OF NOTES

- 4.1. One or more Notes may be transferred, in whole or in part in the authorised denominations set out in the applicable Pricing Supplement and subject to the minimum transfer amounts specified therein, upon the surrender (at the Specified Office of the Registrar or any Transfer Agent) of the relevant Note or Notes, together with the form of transfer endorsed on such Note or Notes (or another form of transfer substantially in the same form and containing the same representations and certifications (if any), unless otherwise agreed by the Issuer), duly completed and executed and any other evidence as the Registrar or the relevant Transfer Agent (as applicable) may reasonably require, including for the purposes of establishing title to the relevant Note, and the identity of the person making the request. In the case of a transfer of part only of a holding of a Note, a new Note shall be issued to the transferee in respect of the part transferred and a further new Note in respect of the balance of the holding not transferred shall be issued to the transferor. All transfers of Notes and entries on the Register will be made subject to the detailed regulations concerning transfers of Notes scheduled to the Agency Agreement. The regulations may be changed by the Issuer, with the prior written approval of the Registrar and the Trustee. A copy of the current regulations will be made available by the Registrar to any Noteholder upon request.
- 4.2. In the case of an exercise of Noteholders’ option in respect of, or a partial redemption of, a holding of Notes, a new Note shall be issued to the holder to reflect the exercise of such option or in respect of the balance of the holding not redeemed. New Notes shall only be issued against surrender of the existing Notes to the Registrar or any Transfer Agent. In the case of a transfer of Notes to a person who is already a holder of Notes, a new Note representing the enlarged holding shall only be issued against surrender of the Note representing the existing holding.
- 4.3. Each new Note to be issued pursuant to Conditions 4.1 or 4.2 shall be available for delivery within five business days of receipt of the form of transfer or Put Option Notice and surrender of the Note for exchange. Delivery of the new Note(s) shall be made at the Specified Office of the relevant Transfer Agent or of the Registrar (as the case may be) to whom delivery or surrender of such form of transfer, Put Option Notice or Note shall have been made or, at the option of the holder making such delivery or surrender as aforesaid and as specified in the relevant form of transfer, Put Option Notice or otherwise in writing, be mailed by uninsured post at the risk of the holder entitled to the new Note to such address as may be so specified, unless such holder requests otherwise and pays in advance to the relevant Transfer Agent or the Registrar (as the case may be) the costs of such other method of delivery and such insurance as it may specify. In this Condition 4.3, “**business day**” means a day, other than a Saturday or Sunday,

on which banks are open for business in the place of the Specified Office of the relevant Transfer Agent or the Registrar (as the case may be).

- 4.4. Transfer of Notes on registration, transfer, exercise of an option or partial redemption shall be effected without charge by or on behalf of the Issuer, the Registrar or the Transfer Agents, but upon payment of any tax or other governmental charges that may be imposed in relation to it (or the giving of such indemnity and security as the Registrar or the relevant Transfer Agent may require).
- 4.5. No Noteholder may require the transfer of a Note to be registered:
- a) during the period of 15 days ending on the due date for redemption of, or payment of any Interest Amount in respect of, that Note;
 - b) during the period of 15 days prior to any date on which Notes may be called for redemption by the Issuer at its option pursuant to Condition 10.3; or
 - c) after any such Note has been called for redemption, including partial redemption.
- 4.6. As specified in the Agency Agreement, if, at any time, the Issuer determines that any beneficial owner of Notes, or any account for which such owner purchased Notes, who is required to be a QIB and a QP is not a QIB and a QP, the Issuer may (i) require such beneficial owner to sell its Notes, or may sell such Notes on behalf of such beneficial owner, to a non U.S. person who purchases in an offshore transaction pursuant to Regulation S or to a person who is a QIB who is also a QP and who is otherwise qualified to purchase such Notes in a transaction exempt from registration under the Securities Act or (ii) require the beneficial owner to sell such Notes, or may sell such Notes on behalf of such beneficial owner at a price equal to the lesser of the purchase price paid by the beneficial owner for such Notes, (y) 100% of the principal amount thereof and (z) the fair market value thereof. The Issuer also has the right to refuse to honour a transfer of an interest in a Note to a U.S. person who is not a QIB and a QP.

5 STATUS

The Notes constitute direct, general and unconditional obligations of the Issuer, which will at all times rank *pari passu* among themselves and *pari passu* in right of payment with all other present and future unsubordinated obligations of the Issuer, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application.

6 NEGATIVE PLEDGE AND COVENANTS

- 6.1. So long as any Note remains outstanding (as defined in the Trust Deed) the Issuer shall not, and shall not permit any Material Subsidiary, to create, incur, assume or permit to arise or subsist any Security Interest (other than a Permitted Security Interest) upon the whole or any part of their respective present or future undertakings, assets or revenues (including uncalled capital), to secure any Relevant Indebtedness or to secure any guarantee or indemnity in respect of any Relevant Indebtedness unless, at the same time or prior thereto, the Issuer's obligations under the Trust Deed and the Notes are secured equally and rateably therewith (to the satisfaction of the Trustee) or have the benefit of such other arrangement as may be approved by an Extraordinary Resolution of Noteholders or as the Trustee in its discretion shall deem to be not materially less beneficial to the Noteholders.
- 6.2. So long as any Note remains outstanding, the Issuer shall, and shall ensure that each of its Subsidiaries shall, at all times comply with any and all prudential supervision ratios and other material regulations and requirements applicable to it under the relevant regulations and standards in Kazakhstan and any other jurisdiction where the Issuer or the relevant Subsidiary does business, except (x) to the extent that the NBK or any other relevant Agency authorises the specific non-compliance in question or (y) for any non-compliance (other than any non-compliance with a Material Requirement) that would not have a Material Adverse Effect.
- 6.3. So long as any Note remains outstanding, the Issuer will not, and will procure that its Subsidiaries will not, either in a single transaction or in a series of transactions, whether related or not and whether voluntarily or involuntarily, conduct a Core Assets Disposal to any Person, except a Core Assets Disposal to the Issuer or a Subsidiary (each, a **"Transferee Subsidiary"**), provided, however, that after giving effect to such disposal and any related transactions, the Transferee Subsidiary remains a Subsidiary of

the Issuer and no Event of Default (as defined in Condition 13) or Potential Event of Default (as defined in the Trust Deed) has occurred and is continuing.

6.4. So long as any Notes are outstanding:

- a) The Issuer will not, directly or indirectly, in a single transaction or a series of related transactions, enter into any reorganisation (whether by way of a merger, accession, division, separation or transformation, as these terms are construed by applicable legislation or otherwise), participate in any other type of corporate reconstruction, or sell, lease, transfer, convey or otherwise dispose of all or substantially all of the assets of the Group (taken as a whole) (in each case, a “**Reorganisation**”) unless in each case:
 - (i) either (X) the Issuer will be the surviving or continuing Person; or (Y) the surviving or continuing Person will assume the performance and observation of all of the obligations and conditions of these Conditions and the Trust Deed, to be performed by the Issuer; and
 - (ii) immediately prior to and immediately after giving effect to such transaction, no Event of Default shall have occurred and be continuing.
- b) For purposes of the foregoing, the transfer (by lease, assignment, sale, conveyance or otherwise, in a single transaction or series of transactions) of all or substantially all of the properties or assets of one or more Material Subsidiaries, the Capital Stock of which constitutes all or substantially all of the properties and assets of the Group (on a consolidated basis taken as a whole), will be deemed to be the transfer of all or substantially all of the properties and assets of the Group (on a consolidated basis taken as a whole).
- c) For the avoidance of doubt, any Subsidiary may consolidate with, merge with or otherwise enter into any transaction comprising a Reorganisation with the Issuer or another Subsidiary of the Issuer.

6.5. So long as any Note remains outstanding, the Issuer shall:

- a) post on its website:
 - (i) not later than 180 days after the end of the Issuer’s financial year, copies (in English) of the consolidated annual financial statements of the Issuer for such financial year; and
 - (ii) not later than 120 days after the end of the first six months of each of the Issuer’s financial years, copies (in English) of the consolidated interim condensed financial statements of the Issuer for such six-month period.
- b) ensure that:
 - (i) each set of annual financial statements delivered by it pursuant to Condition 6.5.a)(i) is accompanied by an audit report of the Auditors;
 - (ii) each set of half yearly interim financial statements delivered by it pursuant to Condition 6.5.a)(ii) is accompanied by a review report of the Auditors; and
 - (iii) each set of financial statements delivered pursuant to Condition 6.5.a)(i) or (ii) is prepared in accordance with IFRS, consistently applied, and certified for and on behalf of the Issuer as presenting fairly, in all material respects, its financial condition as of the end of the period to which those financial statements relate and its results of operations for such period.

6.6. So long as any Notes are outstanding and are “**restricted securities**” within the meaning of Rule 144(a)(3) under the Securities Act, the Issuer will furnish upon the request of a Noteholder or a beneficial owner of an interest therein to such Noteholder or the beneficial owner or to a prospective purchaser of Notes designated by such Noteholder or beneficial owner, the information required to be delivered under Rule

144A(d)(4) under the Securities Act and will otherwise comply with the requirements of Rule 144A under the Securities Act, if at the time of such request the Issuer is not a reporting company under Section 13 or Section 15(d) of the Exchange Act, or exempt from reporting pursuant to Rule 12g3-2(b) thereunder.

7 FIXED RATE NOTE PROVISIONS

- 7.1. This Condition 7 is applicable to the Notes only if the relevant Pricing Supplement specifies the Fixed Rate Note Provisions as being applicable.
- 7.2. The Notes bear interest on the outstanding principal amount from the Interest Commencement Date at the rate(s) per annum equal to Rate(s) of Interest payable in arrear on each Interest Payment Date in each year and on the Maturity Date if such Maturity Date does not fall on an Interest Payment Date, subject as provided in Condition 11. Unless otherwise specified in the relevant Pricing Supplement, the amount of interest payable on each Interest Payment Date will amount to the Fixed Coupon Amount. Payments of interest on any Interest Payment Date will, if so specified in the relevant Pricing Supplement, amount to the Broken Amount(s) so specified.
- 7.3. If interest is required to be calculated for a period ending other than on an Interest Payment Date, such interest shall be calculated by applying the Rate of Interest to each Calculation Amount, multiplying such sum by the applicable Day Count Fraction, and rounding the resultant figure to the nearest subunit of the Specified Currency, half of any such sub unit being rounded upwards or otherwise in accordance with applicable market convention. In these Conditions “**sub unit**” means, with respect of any currency other than the Euro or U.S. Dollar, the lowest amount of such currency that is available as legal tender in the country of such currency, and with respect to Euros and U.S. Dollars means one cent.

8 FLOATING RATE NOTE PROVISIONS

- 8.1. This Condition 8 is applicable to the Notes only if the relevant Pricing Supplement specifies the Floating Rate Note Provisions.
- 8.2. The Rate of Interest payable from time to time in respect of the Notes shall be determined in the manner specified in the relevant Pricing Supplement.
- 8.3. Each Floating Rate Note bears interest on its outstanding principal amount from, and including, the Interest Commencement Date at the rate per annum (expressed as a percentage) equal to the Rate of Interest, such interest being payable in arrear on each Interest Payment Date. The amount of interest payable shall be determined in accordance with this Condition 8. Such Interest Payment Date(s) is/are either as specified in the applicable Pricing Supplement as Specified Interest Payment Dates or, if no Specified Interest Payment Date(s) is/are specified in the applicable Pricing Supplement, Interest Payment Date shall mean each date which falls the number of months or other period specified in the applicable Pricing Supplement as the Interest Period after the preceding Interest Payment Date or, in the case of the first Interest Payment Date, after the Interest Commencement Date.
- 8.4. If any date referred to in these Conditions that is specified to be subject to adjustment in accordance with a Business Day Convention would otherwise fall on a day that is not a Business Day, then, if the Business Day Convention specified is (A) the Floating Rate Business Day Convention, such date shall be postponed to the next day that is a Business Day unless it would thereby fall into the next calendar month, in which event (x) such date shall be brought forward to the immediately preceding Business Day and (y) each subsequent such date shall be the last Business Day of the month in which such date would have fallen had it not been subject to adjustment, (B) the Following Business Day Convention, such date shall be postponed to the next day that is a Business Day, (C) the Modified Following Business Day Convention, such date shall be postponed to the next day that is a Business Day unless it would thereby fall into the next calendar month, in which event such date shall be brought forward to the immediately preceding Business Day or (D) the Preceding Business Day Convention, such date shall be brought forward to the immediately preceding Business Day.
- 8.5. The Rate of Interest in respect of Floating Rate Notes for each Interest Accrual Period shall be determined in the manner specified in the applicable Pricing Supplement and the provisions below relating to either ISDA Determination or Screen Rate Determination shall apply, depending upon which is specified in the applicable Pricing Supplement.

- 8.6. Where ISDA Determination is specified in the applicable Pricing Supplement as the manner in which the Rate of Interest is to be determined, the Rate of Interest for each Interest Accrual Period shall be determined by the Calculation Agent as a rate equal to the relevant ISDA Rate, provided that in any circumstances where under the ISDA Definitions the Calculation Agent would be required to exercise any discretion, including the selection of any Reference Banks and seeking quotations from Reference Banks, when calculating the relevant ISDA Rate, the relevant determination(s) which require the Calculation Agent to exercise its discretion shall instead be made by the Issuer or its designee. For the purposes of this Condition, **“ISDA Rate”** for an Interest Accrual Period means a rate equal to the Floating Rate that would be determined by the Calculation Agent under a Swap Transaction under the terms of an agreement incorporating the ISDA Definitions and under which:
- a) if the Pricing Supplement specifies either **“2006 ISDA Definitions”** or **“2021 ISDA Definitions”** as the applicable ISDA Definitions:
 - (i) the Floating Rate Option (as defined in the relevant ISDA Definitions) is as specified in the applicable Pricing Supplement;
 - (ii) the Designated Maturity (as defined in the relevant ISDA Definitions), if applicable, is a period specified in the applicable Pricing Supplement;
 - (iii) the relevant Reset Date (as defined in the relevant ISDA Definitions) is as specified in the applicable Pricing Supplement;
 - (iv) if the specified Floating Rate Option is an Overnight Floating Rate Option (as defined in the relevant ISDA Definitions), Compounding is specified to be applicable in the relevant Pricing Supplement and:
 - (a) Compounding with Lookback is specified as the Compounding Method in the applicable Pricing Supplement, then (a) Compounding with Lookback is the Overnight Rate Compounding Method and (b) Lookback is the number of Applicable Business Days (as defined in the relevant ISDA Definitions) specified in the applicable Pricing Supplement;
 - (b) Compounding with Observation Period Shift is specified as the Compounding Method in the applicable Pricing Supplement, then (a) Compounding with Observation Period Shift is the Overnight Rate Compounding Method, (b) Observation Period Shift is the number of Observation Period Shift Business Days (as defined in the relevant ISDA Definitions) specified in the applicable Pricing Supplement and (c) Observation Period Shift Additional Business Days (as defined in the relevant ISDA Definitions), if applicable, are the days specified in the applicable Pricing Supplement; or
 - (c) Compounding with Lockout is specified as the Compounding Method in the applicable Pricing Supplement, then (a) Compounding with Lockout is the Overnight Rate Compounding Method, (b) Lockout is the number of Lockout Period Business Days (as defined in the relevant ISDA Definitions) specified in the Pricing Supplement and (c) Lockout Period Business Days, if applicable, are the days specified in the applicable Pricing Supplement; and
 - (v) if the specified Floating Rate Option is an Index Floating Rate Option (as defined in the relevant ISDA Definitions) and Index Provisions are specified to be applicable in the relevant Pricing Supplement, the Compounded Index Method with Observation Period Shift shall be applicable and, (a) Observation Period Shift is the number of Observation Period Shift Business Days (as defined in the relevant ISDA Definitions) specified in the applicable Pricing Supplement and (b) Observation Period Shift Additional Business Days (as defined in the relevant ISDA Definitions) are the days, if applicable, specified in the applicable Pricing Supplement;
 - (vi) references in the relevant ISDA Definitions to:

- (a) **“Confirmation”** shall be deemed to be references to the applicable Pricing Supplement;
 - (b) **“Calculation Period”** shall be deemed to be references to the relevant Interest Accrual Period;
 - (c) **“Termination Date”** shall be deemed to be references to the Maturity Date; and
 - (d) **“Effective Date”** shall be deemed to be references to the Interest Commencement Date; and
- b) if the Pricing Supplement specifies **“2021 ISDA Definitions”** as the applicable ISDA Definitions:
 - (i) Administrator/Benchmark Event shall be disappplied; and
 - (ii) if the Temporary Non-Publication Fallback for any specified Floating Rate Option is specified to be **“Temporary Non-Publication Fallback - Alternative Rate”** in the Floating Rate Matrix of the 2021 ISDA Definitions, the reference to **“Calculation Agent Alternative Rate Determination”** in the definition of **“Temporary Non-Publication Fallback - Alternative Rate”** shall be replaced by **“Temporary Non-Publication Fallback - Previous Day’s Rate”**.

8.7. Screen Rate Determination

- a) Where Screen Rate Determination is specified in the applicable Pricing Supplement as the manner in which the Rate(s) of Interest is/are to be determined where the Reference Rate is not SOFR Benchmark, the Rate of Interest applicable to the Notes for each Interest Period will, subject as provided below, be either:
 - (i) the offered quotation; or
 - (ii) the arithmetic mean of the offered quotations,

(expressed as a percentage rate per annum) for the Reference Rate which appears or appear, as the case may be, on the Relevant Screen Page as of 11.00 am (Brussels time in the case of EURIBOR) on the Interest Determination Date in question as determined by the Calculation Agent. If five or more of such offered quotations are available on the Relevant Screen Page, the highest (or, if there is more than one such highest quotation, one only of such quotations) and the lowest (or, if there is more than one such lowest quotation, one only of such quotations) shall be disregarded by the Calculation Agent for the purpose of determining the arithmetic mean of such offered quotations.
- b) Where Screen Rate Determination is specified in the applicable Pricing Supplement as the manner in which the Rate of Interest is to be determined where the Reference Rate is SOFR Benchmark, the Rate of Interest for each Interest Period will, subject as provided below, be equal to the relevant SOFR Benchmark plus or minus the Margin (if any), all as determined by the Calculation Agent on the relevant Interest Determination Date.

The **“SOFR Benchmark”** will be determined based on Compounded Daily SOFR or Compounded SOFR Index, as follows:

- (i) If Compounded Daily SOFR (**“Compounded Daily SOFR”**) is specified in the applicable Pricing Supplement as the manner in which the SOFR Benchmark will be determined, the SOFR Benchmark for each Interest Period shall be calculated by the Calculation Agent in accordance with one of the formulas referenced below depending upon which is specified as applicable in the applicable Pricing Supplement:
 - (i) SOFR Lag:

$$\left(\prod_{i=1}^{d_o} \left(1 + \frac{\text{SOFR}_i - \text{xUSBD} \times n_i}{360} \right) - 1 \right) \times \frac{360}{d}$$

with the resulting percentage being rounded, if necessary, to the nearest one hundred-thousandth of a percentage point, with 0.000005 per cent. being rounded upwards (e.g., 9.876541 per cent. (or 0.09876541) being rounded down to 9.87654 per cent. (or 0.0987654) and 9.876545 per cent. (or 0.09876545) being rounded up to 9.87655 per cent. (or 0.0987655)) and where:

“SOFR_i-xUSBD” for any U.S. Government Securities Business Day(i) in the relevant Interest Period, is equal to the SOFR reference rate for the U.S. Government Securities Business Day falling the number of Lookback Days prior to that U.S. Government Securities Business Day(i);

“Lookback Days” means such number of U.S. Government Securities Business Days as specified in the applicable Pricing Supplement;

“d” means the number of calendar days in the relevant Interest Period;

“d_o” means the number of U.S. Government Securities Business Days in the relevant Interest Period;

“i” means a series of whole numbers ascending from one to do, representing each relevant U.S. Government Securities Business Day from (and including) the first U.S. Government Securities Business Day in the relevant Interest Period (each a **“U.S. Government Securities Business Day(i)”**); and

“ni”, for any U.S. Government Securities Business Day(i), means the number of calendar days from (and including) such U.S. Government Securities Business Day(i) up to (but excluding) the following U.S. Government Securities Business Day.

(ii) SOFR Observation Shift:

$$\left(\prod_{i=1}^{d_o} \left(1 + \frac{\text{SOFR}_i \times n_i}{360} \right) - 1 \right) \times \frac{360}{d}$$

with the resulting percentage being rounded, if necessary, to the nearest one hundred-thousandth of a percentage point, with 0.000005 per cent. being rounded upwards (e.g., 9.876541 per cent. (or 0.09876541) being rounded down to 9.87654 per cent. (or 0.0987654) and 9.876545 per cent. (or 0.09876545) being rounded up to 9.87655 per cent. (or 0.0987655)) and where:

“SOFR_i” for any U.S. Government Securities Business Day(i) in the relevant SOFR Observation Period, is equal to the SOFR reference rate for that U.S. Government Securities Business Day(i);

“SOFR Observation Period” means, in respect of an Interest Period, the period from (and including) the date falling the number of SOFR Observation Shift Days prior to the first day of such Interest Period to (but excluding) the date falling the number of SOFR Observation Shift Days prior to the Interest Period Date for such Interest Period;

“SOFR Observation Shift Days” means the number of U.S. Government Securities Business Days as specified in the applicable Pricing Supplement;

“d” means the number of calendar days in the relevant SOFR Observation Period;

“do” means the number of U.S. Government Securities Business Days in the relevant SOFR Observation Period;

“**i**” means a series of whole numbers ascending from one to do, representing each U.S. Government Securities Business Day from (and including) the first U.S. Government Securities Business Day in the relevant SOFR Observation Period (each a “**U.S. Government Securities Business Day(i)**”); and

“**ni**”, for any U.S. Government Securities Business Day(i), means the number of calendar days from (and including) such U.S. Government Securities Business Day(i) up to (but excluding) the following U.S. Government Securities Business Day.

The following defined terms shall have the meanings set out below for purpose of Condition 8.7.b)(i):

“**Bloomberg Screen SOFRRATE Page**” means the Bloomberg screen designated “**SOFRRATE**” or any successor page or service;

“**Reuters Page USDSOFR=**” means the Reuters page designated “**USDSOFR=**” or any successor page or service;

“**SOFR**” means, in respect of a U.S. Government Securities Business Day, the reference rate determined by the Calculation Agent in accordance with the following provision:

- a) the Secured Overnight Financing Rate published at the SOFR Determination Time as such reference rate is reported on the Bloomberg Screen SOFRRATE Page; the Secured Overnight Financing Rate published at the SOFR Determination Time as such reference rate is reported on the Reuters Page USDSOFR=; or the Secured Overnight Financing Rate published at the SOFR Determination Time on the SOFR Administrator’s Website;
- b) if the reference rate specified in (i) above does not appear and a SOFR Benchmark Transition Event and its related SOFR Benchmark Replacement Date have not occurred, the SOFR reference rate shall be the reference rate published on the SOFR Administrator’s Website for the first preceding U.S. Government Securities Business Day for which SOFR was published on the SOFR Administrator’s Website; or
- c) if the reference rate specified in (i) above does not appear and a SOFR Benchmark Transition Event and its related SOFR Benchmark Replacement Date have occurred, the provisions set forth in Condition 8.7.c) shall apply; and

“**SOFR Determination Time**” means approximately 3:00 p.m. (New York City time) on the immediately following U.S. Government Securities Business Day.

- (ii) If Compounded SOFR Index (“**Compounded SOFR Index**”) is specified as applicable in the applicable Pricing Supplement, the SOFR Benchmark for each Interest Period shall be equal to the compounded average of daily SOFR reference rates for each day during the relevant SOFR Observation Period as calculated by the Calculation Agent as follows:

$$\left(\frac{SOFR\ Index_{End}}{SOFR\ Index_{Start}} - 1 \right) \times \left(\frac{360}{d_c} \right)$$

with the resulting percentage being rounded, if necessary, to the nearest one hundred-thousandth of a percentage point, with 0.000005 per cent. being rounded upwards (e.g., 9.876541 per cent. (or 0.09876541) being rounded down to 9.87654 per cent. (or 0.0987654) and 9.876545 per cent. (or 0.09876545) being rounded up to 9.87655 per cent. (or 0.0987655)) and where:

“**SOFR Index**” means, in respect of a U.S. Government Securities Business Day, the SOFR Index value as published on the SOFR Administrator’s Website at the SOFR Index Determination Time on such U.S. Government Securities Business Day, provided that:

- (i) if the value specified above does not appear and a SOFR Benchmark Transition Event and its related SOFR Benchmark Replacement Date have not occurred, the “SOFR Index” shall be calculated on any Interest Determination Date with respect to an Interest Period, in accordance with the Compounded Daily SOFR formula described above in Condition 8.7.b)(i)(ii) “SOFR Observation Shift”, and the term “SOFR Observation Shift Days” shall mean five U.S. Government Securities Business Days; or
- (iii) if the value specified above does not appear and a SOFR Benchmark Transition Event and its related SOFR Benchmark Replacement Date have occurred, the provisions set forth in Condition 8.7.c) shall apply;

“SOFR IndexEnd” means, in respect of an Interest Period, the SOFR Index value on the date that is the number of U.S. Government Securities Business Days specified in the applicable Pricing Supplement prior to the Interest Period Date for such Interest Period (or in the final Interest Period, the Maturity Date);

“SOFR IndexStart” means, in respect of an Interest Period, the SOFR Index value on the date that is the number of U.S. Government Securities Business Days specified in the applicable Pricing Supplement prior to the first day of such Interest Period;

“SOFR Index Determination Time” means, in respect of a U.S. Government Securities Business Day, approximately 3:00 p.m. (New York City time) on such U.S. Government Securities Business Day;

“SOFR Observation Period” means, in respect of an Interest Period, the period from (and including) the date falling the number of SOFR Observation Shift Days prior to the first day of such Interest Period to (but excluding) the date falling the number of SOFR Observation Shift Days prior to the Interest Period Date for such Interest Period;

“SOFR Observation Shift Days” means the number of U.S. Government Securities Business Days as specified in the applicable Pricing Supplement; and

“dc” means the number of calendar days in the applicable SOFR Observation Period.

If the Notes become due and payable in accordance with the Conditions, the final Interest Determination Date shall, notwithstanding any Interest Determination Date specified in the relevant Pricing Supplement, be deemed to be the date on which such Notes became due and payable and the Rate of Interest on such Notes shall, for so long as any such Notes remain outstanding, be that determined on such date.

- c) For the purpose of this Condition 8.7.b):

If the Issuer or its designee determines on or prior to the relevant Reference Time that a Benchmark Event and its related Benchmark Replacement Date have occurred with respect to the-then current Benchmark, the Benchmark Replacement will replace the then-current Benchmark for all purposes relating to the Notes in respect of all determinations on such date and for all determinations on all subsequent dates.

In connection with the implementation of a Benchmark Replacement, the Issuer or its designee will have the right to make Benchmark Replacement Conforming Changes from time to time. For the avoidance of doubt, the Trustee and any of the Agents shall, at the direction and expense of the Issuer, effect such consequential amendments to the Trust Deed, the Agency Agreement and these Conditions as may be required to give effect to this Condition 8.7.c). Noteholders’ consent shall not be required in connection with effecting any such changes, including the execution of any documents or any steps to be taken by the Trustee or any of the Agents (if required). Further, none of the Trustee, the Calculation Agent, the Paying Agents, the Registrar or the Transfer Agents shall be responsible or liable for any determinations, decisions or elections made by the Issuer or its designee with respect to any Benchmark Replacement or any

other changes and shall be entitled to rely conclusively on any certifications provided to each of them in this regard.

Any determination, decision or election that may be made by the Issuer or its designee pursuant to this Condition 8.7.c), including any determination with respect to a tenor, rate or adjustment or of the occurrence or non-occurrence of an event, circumstance or date and any decision to take or refrain from taking any action or any selection (i) will be conclusive and binding absent manifest error, (ii) will be made in the sole discretion of the Issuer or its designee, as applicable, and (iii) notwithstanding anything to the contrary in the documentation relating to the Notes, shall become effective without consent from the holders of the Notes or any other party.

The following defined terms shall have the meanings set out below for purpose of this Condition 8.7.c):

“Benchmark” means, initially, the relevant SOFR Benchmark specified in the applicable Pricing Supplement; provided that if the Issuer or its designee determines on or prior to the Reference Time that a Benchmark Event and its related Benchmark Replacement Date have occurred with respect to the relevant Benchmark (including any daily published component used in the calculation thereof) or the then-current Benchmark, then **“Benchmark”** means the applicable Benchmark Replacement;

“Benchmark Event” means the occurrence of one or more of the following events with respect to the then-current Benchmark (including any daily published component used in the calculation thereof):

- (i) a public statement or publication of information by or on behalf of the administrator of the Benchmark (or such component) announcing that such administrator has ceased or will cease to provide the Benchmark (or such component), permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the Benchmark (or such component); or
- (ii) a public statement or publication of information by the regulatory supervisor for the administrator of the Benchmark (or such component), the central bank for the currency of the Benchmark (or such component), an insolvency official with jurisdiction over the administrator for the Benchmark (or such component), a resolution authority with jurisdiction over the administrator for the Benchmark (or such component) or a court or an entity with similar insolvency or resolution authority over the administrator for the Benchmark, which states that the administrator of the Benchmark (or such component) has ceased or will cease to provide the Benchmark (or such component) permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the Benchmark (or such component); or
- (iii) a public statement or publication of information by the regulatory supervisor for the administrator of the Benchmark announcing that the Benchmark is no longer representative;

“Benchmark Replacement” means the first alternative set forth in the order below that can be determined by the Issuer or its designee as of the Benchmark Replacement Date:

- (i) the sum of:
 - (a) the alternate reference rate that has been selected or recommended by the Relevant Governmental Body as the replacement for the then-current Benchmark (including any daily published component used in the calculation thereof); and
 - (b) the Benchmark Replacement Adjustment;
- (ii) the sum of:

- (a) the ISDA Fallback Rate; and
- (b) the Benchmark Replacement Adjustment; or
- (iii) the sum of:
 - (a) the alternate reference rate that has been selected by the Issuer or its designee as the replacement for the then-current Benchmark (including any daily published component used in the calculation thereof) giving due consideration to any industry-accepted reference rate as a replacement for the then-current Benchmark (including any daily published component used in the calculation thereof) for U.S. dollar-denominated Floating Rate Notes at such time; and
 - (b) the Benchmark Replacement Adjustment;

“Benchmark Replacement Adjustment” means the first alternative set forth in the order below that can be determined by the Issuer or its designee as of the Benchmark Replacement Date:

- (i) the spread adjustment, or method for calculating or determining such spread adjustment, (which may be a positive or negative value or zero) that has been selected or recommended by the Relevant Governmental Body for the applicable Unadjusted Benchmark Replacement;
- (ii) if the applicable Unadjusted Benchmark Replacement is equivalent to the ISDA Fallback Rate, the ISDA Fallback Adjustment; or
- (iii) the spread adjustment (which may be a positive or negative value or zero) that has been selected by the Issuer or its designee giving due consideration to any industry-accepted spread adjustment, or method for calculating or determining such spread adjustment, for the replacement of the then-current Benchmark (including any daily published component used in the calculation thereof) with the applicable Unadjusted Benchmark Replacement for U.S. dollar-denominated Floating Rate Notes at such time;

“Benchmark Replacement Conforming Changes” means, with respect to any Benchmark Replacement, any technical, administrative or operational changes (including changes to the timing and frequency of determining rates and making payments of interest, rounding of amounts or tenors, and other administrative matters) the Issuer or its designee decides may be appropriate to reflect the adoption of such Benchmark Replacement in a manner substantially consistent with market practice (or, if the Issuer or its designee decides that adoption of any portion of such market practice is not administratively feasible or if the Issuer or its designee determine that no market practice for use of the Benchmark Replacement exists, in such other manner as the Issuer or its designee determines is reasonably necessary);

“Benchmark Replacement Date” means the earliest to occur of the following events with respect to the then-current Benchmark (including any daily published component used in the calculation thereof):

- (i) in the case of sub-paragraph (i) or (ii) of the definition of **“Benchmark Event”**, the later of:
 - (a) the date of the public statement or publication of information referenced therein; and
 - (b) the date on which the administrator of the Benchmark permanently or indefinitely ceases to provide the Benchmark (or such component); or
- (ii) in the case of sub-paragraph (iii) of the definition of **“Benchmark Event”**, the date of the public statement or publication of information referenced therein.

For the avoidance of doubt, if the event giving rise to the Benchmark Replacement Date occurs on the same day as, but earlier than, the Reference Time in respect of any determination, the Benchmark Replacement Date will be deemed to have occurred prior to the Reference Time for such determination;

“ISDA Definitions” means the 2006 ISDA Definitions published by the International Swaps and Derivatives Association, Inc. or any successor thereto, as amended or supplemented from time to time, or any successor definitional booklet for interest rate derivatives published from time to time, including the 2021 ISDA Interest Rate Derivatives Definitions (as amended or supplemented from time to time);

“ISDA Fallback Adjustment” means the spread adjustment (which may be a positive or negative value or zero) that would apply for derivatives transactions referencing the ISDA Definitions to be determined upon the occurrence of an index cessation event with respect to the Benchmark;

“ISDA Fallback Rate” means the rate that would apply for derivatives transactions referencing the ISDA Definitions to be effective upon the occurrence of an index cessation date with respect to the Benchmark (including any daily published component used in the calculation thereof) for the applicable tenor excluding the applicable ISDA Fallback Adjustment;

“Reference Time” with respect to any determination of the Benchmark means (1) if the Benchmark is the SOFR Benchmark, the SOFR Determination Time (where Compounded Daily SOFR is specified as applicable in the applicable Pricing Supplement) or SOFR Index Determination Time (where Compounded SOFR Index is specified as applicable in the applicable Pricing Supplement), or (2) if the Benchmark is not the SOFR Benchmark, the time determined by the Issuer or its designee after giving effect to the Benchmark Replacement Conforming Changes;

“Relevant Governmental Body” means the Federal Reserve Board and/or the Federal Reserve Bank of New York, or a committee officially endorsed or convened by the Federal Reserve Board and/or the Federal Reserve Bank of New York or any successor thereto; and

“Unadjusted Benchmark Replacement” means the Benchmark Replacement excluding the Benchmark Replacement Adjustment.

- 8.8. If any Maximum Rate of Interest or Minimum Rate of Interest is specified in the relevant Pricing Supplement, then the Rate of Interest shall in no event be greater than the maximum or be less than the minimum so specified.
- 8.9. The Calculation Agent will, as soon as reasonably practicable after the time at which the Rate of Interest is to be determined in relation to each Interest Period, determine the Rate of Interest for the relevant Interest Period and calculate the Interest Amount payable in respect of each Note for such Interest Period. The Interest Amount will be calculated by applying the Rate of Interest for such Interest Period to the principal amount of such Note during such Interest Period and multiplying the product by the relevant Day Count Fraction and rounding the resultant figure to the nearest sub unit of the relevant Specified Currency, half of any such sub unit being rounded upwards or otherwise in accordance with applicable market convention.
- 8.10. If the relevant Pricing Supplement specifies that any other amount is to be calculated by the Calculation Agent, the Calculation Agent will, as soon as reasonably practicable after the time or times at which any such amount is to be determined, calculate the relevant amount. The relevant amount will be calculated by the Calculation Agent in the manner specified in the relevant Pricing Supplement.
- 8.11. The Calculation Agent will cause each Rate of Interest and Interest Amount determined by it, together with the relevant Interest Payment Date, and any other amount(s) required to be determined by it together with any relevant payment date(s) to be notified to the Paying Agents and each listing authority, stock exchange and quotation system (if any) by which the Notes have than been admitted to listing, trading and quotation as soon as reasonably practicable after such determination but (in the case of each Rate of Interest, Interest Amount and Interest Payment Date) in any event not later than the first day of the

relevant Interest Period. Notice thereof shall also promptly be given to the Noteholders by the Issuer in accordance with Condition 19. The Calculation Agent will be entitled to recalculate any Interest Amount (on the basis of the foregoing provisions) without notice in the event of an extension or shortening of the relevant Interest Period.

- 8.12. All notifications, opinions, determinations, certificates, calculations, quotations and decisions given, expressed, made or obtained for the purposes of this Condition 8 by the Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Paying Agents, the Noteholders (subject as aforesaid) no liability to any such Person will attach to the Calculation Agent in connection with the exercise or non-exercise by it of its powers, duties and discretions for such purposes.

9 ZERO COUPON NOTE PROVISIONS

- 9.1. This Condition 9 is applicable to the Notes only if the Zero Coupon Note Provisions are specified in the relevant Pricing Supplement as being applicable.
- 9.2. If the Redemption Amount payable in respect of any Zero Coupon Note is improperly withheld or refused, the Redemption Amount shall thereafter be an amount equal to the sum of:
- a) the Reference Price; and
 - b) the product of the Accrual Yield (compounded annually) being applied to the Reference Price from (and including) the Issue Date to (but excluding) whichever is the earlier of (i) the day on which all sums due in respect of such Note up to that day are received by or on behalf of the relevant Noteholder and (ii) the day which is seven days after the Principal Paying Agent has notified the Noteholders that it has received all sums due in respect of the Notes up to such seventh day (except to the extent that there is any subsequent default in payment).

10 REDEMPTION AND PURCHASE

- 10.1. Final Redemption: Unless previously redeemed, or purchased and cancelled, the Notes will be redeemed by the Issuer at their Final Redemption Amount as specified in the applicable Pricing Supplement in the relevant Specified Currency on the Maturity Date as specified in the applicable Pricing Supplement, subject as provided in Condition 11.
- 10.2. Redemption for Taxation Reasons: The Notes may be redeemed at the option of the Issuer in whole, but not in part:
- a) at any time (if neither the Floating Rate Note Provisions are specified in the relevant Pricing Supplement as being applicable); or
 - b) on any Interest Payment Date (if the Floating Rate Note Provisions are specified in the relevant Pricing Supplement as being applicable),

on giving not less than 30 nor more than 60 days' notice to the Noteholders in accordance with Condition 19 (which notice shall be irrevocable), at their Early Redemption Amount (Tax), together with interest accrued (if any) to the date fixed for redemption, if:

- (i) the Issuer satisfies the Trustee immediately before the giving of notice that it has or will become obliged to pay additional amounts as provided or referred to in Condition 12 as a result of any change in, or amendment to, the laws or regulations of Kazakhstan or any political subdivision or any authority thereof or therein having power to tax, or any change in the application or official interpretation of such laws or regulations (including a holding by a court of competent jurisdiction), which change or amendment becomes effective on or after the Issue Date of the first Tranche of the Notes; and
- (ii) such obligation cannot be avoided by the Issuer taking reasonable measures available to it, provided, however, that no such notice of redemption shall be given earlier than:

- (A) where the Notes may be redeemed at any time, 90 days prior to the earliest date on which the Issuer would be obliged to pay such additional amounts if a payment in respect of the Notes were then due; or
- (B) where the Notes may be redeemed only on an Interest Payment Date, 60 days prior to the Interest Payment Date occurring immediately before the earliest date on which the Issuer would be obliged to pay such additional amounts if a payment in respect of the Notes were then due.

Prior to the publication of any notice of redemption pursuant to this paragraph, the Issuer shall deliver to the Trustee (A) a certificate signed by two authorised signatories of the Issuer stating that the Issuer is entitled to effect such redemption and setting forth a statement of facts showing that the conditions precedent to the right of the Issuer so to redeem have occurred and (B) an opinion of independent legal advisers of recognised standing to the effect that the Issuer has or will become obliged to pay such additional amounts as a result of such change or amendment and the Trustee shall be entitled to accept such certificate and opinion without further investigation or enquiry and without liability to any person. Upon the expiry of any such notice as is referred to in this Condition 10.2, the Issuer shall be bound to redeem the Notes in accordance with this Condition 10.2.

- 10.3. **Redemption at the Option of the Issuer (Call Option):** If the Call Option is specified in the relevant Pricing Supplement as being applicable, the Notes may be redeemed at the option of the Issuer in whole (but not in part) on any Optional Redemption Date (Call) at the relevant Optional Redemption Amount (Call) on the Issuer's giving not less than 30 nor more than 60 days' notice to the Noteholders (which notice shall be irrevocable and shall oblige the Issuer to redeem the Notes or, as the case may be, the Notes specified in such notice on the relevant Optional Redemption Date (Call) at the Optional Redemption Amount (Call) plus accrued interest (if any) to such date).

If Make-Whole Amount is specified in the applicable Pricing Supplement as the Optional Redemption Amount (Call), the Optional Redemption Amount (Call) per Note shall be equal to the higher of (i) the principal amount of the Note; and (ii) the sum of the then present values of the remaining scheduled payments of principal and Remaining Term Interest (assuming for this purpose the Notes are to be redeemed at their principal amount on the Make-Whole Reference Date), in each case discounted to the relevant Optional Redemption Date (Call) on either an annual or a semi-annual basis as specified in the applicable Pricing Supplement (based on the Day Count Fraction specified in the applicable Pricing Supplement) at the Reference Dealer Rate plus any applicable Redemption Margin specified in the applicable Pricing Supplement, all as determined by the Determination Agent; in each case together with interest accrued to (but excluding) the relevant Optional Redemption Date (Call).

In this Condition:

"Determination Agent" means an investment banking, accountancy, appraisal or financial advisory firm with international standing that has (in the reasonable opinion of the Issuer) appropriate expertise relevant to the determination required to be made under this Condition 10.3 selected by the Issuer.

"Make-Whole Reference Date" means the earliest of (i) the Maturity Date, (ii) the Par Call Period Commencement Date (if applicable), and (iii) such other date (if any) specified as such in the applicable Pricing Supplement.

"Reference Bond" means the government security specified in the applicable Pricing Supplement, or (if such security is no longer in issue or, in the determination of the Determination Agent, with the advice of the Reference Dealers, is no longer appropriate by reason of illiquidity or otherwise), such other government security with a maturity date as near as possible to the Make-Whole Reference Date, as the Determination Agent may, with the advice of the Reference Dealers, determine to be appropriate by way of substitution for the original Reference Bond.

"Reference Dealers" means each of three banks selected by the Issuer which are (A) a primary government securities dealer, or (B) a market maker in pricing corporate bond issues; and

"Reference Dealer Rate" means with respect to the Reference Dealers and any Optional Redemption Date (Call) the average of the three quotations of the mid-market annual yield to maturity of the

Reference Bond specified in the applicable Pricing Supplement at the Quotation Time specified in the applicable Pricing Supplement on the Determination Date specified in the applicable Pricing Supplement and quoted in writing to the Determination Agent by the Reference Dealers.

“Remaining Term Interest” means, with respect to any Note, the aggregate amount of scheduled payment(s) of interest on such Note for the remaining term to the Make-Whole Reference Date determined on the basis of the rate of interest applicable to such Note from and including the relevant Optional Redemption Date (Call).

- 10.4. Redemption at the Option of the Issuer (Issuer Maturity Par Call): If Issuer Maturity Par Call is specified in the relevant Pricing Supplement as being applicable, the Notes may be redeemed at the option of the Issuer in whole (but not in part) at any time during the period commencing on (and including) the day that is 90 days prior to the Maturity Date (the **“Par Call Period Commencement Date”**) to (but excluding) the Maturity Date, at the Final Redemption Amount specified in the applicable Pricing Supplement plus accrued interest (if any) to such date.
- 10.5. Clean-up Call: In the event that at least 80 per cent. of the aggregate principal amount of any series of Notes have been redeemed or purchased, the Issuer may, at any time thereafter, on giving not less than 30 nor more than 60 days’ notice to the Noteholders in accordance with Condition 19 (NOTICES) (which notice shall be irrevocable) and to the Trustee, redeem all (but not less than all) of the Notes outstanding at a redemption price equal to 100 per cent. of the principal amount of such Notes outstanding together with interest accrued to, but excluding, the date of such redemption.
- 10.6. Redemption at the Option of Noteholders (Put Option): If the Put Option is specified in the relevant Pricing Supplement as being applicable, the Issuer shall, at the option of the holder of any Note redeem such Note on the Optional Redemption Date (Put) specified in the relevant Put Option Notice at the relevant Optional Redemption Amount (Put) together with interest (if any) accrued to such date. In order to exercise the option contained in this Condition 10.6, the holder of a Note must, not less than 30 nor more than 60 days before the relevant Optional Redemption Date (Put), deposit with any Paying Agent such Note together with a duly completed Put Option Notice in the form obtainable from any Paying Agent. The Paying Agent with which a Note is so deposited shall deliver a duly completed Put Option Receipt to the depositing Noteholder. No Note, once deposited with a duly completed Put Option Notice in accordance with this Condition 10.6, may be withdrawn; provided, however, that if, prior to the relevant Optional Redemption Date (Put), any such Note becomes immediately due and payable or, upon due presentation of any such Note on the relevant Optional Redemption Date (Put), payment of the redemption moneys is improperly withheld or refused, the relevant Paying Agent shall mail notification thereof to the depositing Noteholder at such address as may have been given by such Noteholder in the relevant Put Option Notice and shall hold such Note at its Specified Office for collection by the depositing Noteholder against surrender of the relevant Put Option Receipt. For so long as any outstanding Note is held by a Paying Agent in accordance with this Condition 10.6, the depositor of such Note and not such Paying Agent shall be deemed to be the holder of such Note for all purposes.
- 10.7. Redemption at the Option of Noteholders (Change of Control Put Option): Whether or not the Put Option is specified under Condition 10.6, the Issuer shall, at the option of the holder of any Note, exercisable as set out in Condition 10.6, redeem such Note on the applicable Optional Redemption Date (Put) at 100% of its principal amount together with interest (if any) accrued to but excluding such date, if:
- a) the Republic of Kazakhstan or its regional authorities cease to own, whether directly or indirectly, through an entity wholly owned by the Republic of Kazakhstan or its regional authorities (each, a **“Permitted Shareholder”**), 100.0% of the paid up share capital of the Issuer; or
 - b) the Issuer loses its status as a **“National Investment Holding”** by virtue of the Decree of the President of the Republic of Kazakhstan No. 571 **“On measures for optimisation of the management system of development institutions and financial organisations, and development of the national economy”** dated 22 May 2013,

(each of the foregoing a **“Put Event”**);

provided, however, that if any of the foregoing events results from any Permitted Shareholder selling, transferring or otherwise disposing of part of its shareholding to one or more supranational entities

established by treaty, each having a credit rating assigned by at least one statistical rating organisation generally recognised by banks, securities houses and investors in the European financial markets of AAA or its equivalent (at the time of such sale, transfer or disposal), such event shall not constitute a Put Event under this Condition 10.7.

Notwithstanding any other provision of this Condition 10.7 to the contrary, if at any time the Republic of Kazakhstan ceases, whether directly or indirectly through a Permitted Shareholder owned by it, to own 51.0% or more of the paid-up share capital of the Issuer, such circumstance shall constitute a Put Event under this Condition 10.7. Upon the occurrence of a Put Event, the Issuer shall promptly give notice thereof to the Noteholders in accordance with Condition 19 with a copy to the Trustee.

- 10.8. The Issuer shall not be entitled to redeem the Notes otherwise than as provided in Conditions 10.1 to 10.7.
- 10.9. Unless otherwise specified in the relevant Pricing Supplement, the Redemption Amount payable on redemption of a Zero Coupon Note at any time before the Maturity Date shall be an amount equal to the sum of:
- a) the Reference Price; and
 - b) the product of the Accrual Yield (compounded annually) being applied to the Reference Price from (and including) the Issue Date to (but excluding) the date fixed for redemption or (as the case may be) the date upon which the Note becomes due and payable.

Where such calculation is to be made for a period which is not a whole number of years, the calculation in respect of the period of less than a full year shall be made on the basis of such Day Count Fraction as may be specified in the Pricing Supplement for the purposes of this Condition 10.9 or, if none is so specified, a Day Count Fraction of 30E/360.

- 10.10. The Issuer or any of its Subsidiaries may at any time purchase Notes in the open market or otherwise and at any price.
- 10.11. All Notes which are redeemed pursuant to Conditions 10.1 to 10.7 or purchased pursuant to Condition 10.10 by the Issuer or any of its Subsidiaries shall be either cancelled forthwith, held or, to the extent permitted by law, resold. All Notes so cancelled shall be forwarded to the Principal Paying Agent.

11 PAYMENTS

- 11.1. Payments of principal shall be made only against presentation and (provided that payment is made in full) surrender of Notes at the Specified Office of any Transfer Agent or of the Registrar by cheque drawn in the currency in which the payment is due (and, in the case of any Series of Notes denominated in Tenge, in U.S. Dollar), or by transfer to an account denominated in that currency (or, if that currency is Euros, any other account to which Euros may be credited or transferred) and maintained by the payee with, a bank in the Principal Financial Centre of that currency.
- 11.2. Payments of interest shall, subject to Condition 11.5, be paid to the person shown on the Register at the close of business on the fifteenth day before the due date for payment thereof (the “**Record Date**”). Payments of interest on each Note shall be made in the relevant currency (and, in the case of any Series of Notes denominated in Tenge, in U.S. Dollar) by cheque drawn on a bank and mailed by uninsured post to the holder (or to the first named of joint holders) of such Note at its address appearing in the Register. The holder of such Notes will not be entitled to any interest or other payment for any delay in receiving any amount due in respect of such Notes as a result of a cheque posted in accordance with this Condition 11 arriving after the due date for payment or being lost in the post. Upon application by the holder to the Specified Office of the Registrar or any Transfer Agent before the Record Date, such payment of interest may be made by transfer to an account in the relevant currency maintained by the payee with a bank.
- 11.3. Amounts of interest and principal due in respect of any Series of Notes denominated in Tenge, will be calculated by the Calculation Agent for payment in U.S. Dollars by dividing the relevant Tenge amounts by the Average Representative Market Rate on the applicable Rate Calculation Date. The Calculation

Agent will, on each Rate Calculation Date, notify the Issuer, the Trustee and the Paying Agents of the amounts of interest and principal (stated in both Tenge and U.S. Dollars) payable on any Interest Payment Date, the Maturity Date or any other date on which principal or interest becomes payable under these Conditions, as applicable, as well as the applicable Average Representative Market Rate.

- 11.4. All payments in respect of the Notes are subject in all cases to any applicable fiscal or other laws and regulations in the place of payment, but without prejudice to the provisions of Condition 12. No commissions or expenses shall be charged to the Noteholders in respect of such payments.
- 11.5. If the due date for payment of any amount in respect of any Note is not a Payment Business Day in the place of presentation, the holder shall not be entitled to payment in such place of the amount due until the next succeeding Payment Business Day in such place and shall not be entitled to any further interest or other payment in respect of any such delay.
- 11.6. All notifications, opinions, determinations, certificates, calculations, quotations and decisions given, expressed, made or obtained for the purposes of this Condition 11 by the Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Trustee, the Paying Agents and the Noteholders and no liability to any such Person will attach to the Calculation Agent in connection with the exercise or non - exercise by it of its powers, duties and discretions for such purposes.

12 TAXATION

- 12.1. All payments of principal and interest in respect of the Notes by or on behalf of the Issuer shall be made free and clear of, and without withholding or deduction for, any taxes, duties, assessments or governmental charges of whatsoever nature imposed, levied, collected, withheld or assessed by Kazakhstan or any political subdivision or any authority thereof or therein having power to tax, unless such withholding or deduction is required by law. In that event, the Issuer shall pay such additional amounts as will result in the receipt by the Noteholders of such amounts as would have been received by them if no such withholding or deduction had been required, except that no such additional amounts shall be payable in respect of any Note presented for payment:
 - a) by a holder which is liable to such taxes, duties, assessments or governmental charges in respect of such Note by reason of its having some connection with Kazakhstan other than the mere holding of such Note; or
 - b) more than 30 days after the Relevant Date except to the extent that the relevant holder would have been entitled to such additional amounts if it had presented such Note on the last day of such period of 30 days.
- 12.2. If the Issuer becomes subject at any time to any taxing jurisdiction other than Kazakhstan, references in these Conditions to Kazakhstan shall be construed as references to Kazakhstan and such other jurisdiction. Notwithstanding any other provision contained herein, any amounts to be paid by the Issuer on the Notes will be paid net of any deduction or withholding imposed or required pursuant to Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986, as amended (the “**Code**”), any current or future regulations or official interpretations thereof, any agreement entered into pursuant to Section 1471(b) of the Code, or any fiscal or regulatory legislation, rules or practices adopted pursuant to any intergovernmental agreement entered into in connection with the implementation of such Sections of the Code (or any law implementing such an intergovernmental agreement) (a “**FATCA Withholding Tax**”), and neither the Issuer nor any other person will be required to pay additional amounts on account of any FATCA Withholding Tax.

13 EVENTS OF DEFAULT

The Trustee at its discretion may, and if so requested in writing by the holders of not less than 25 per cent. in aggregate outstanding principal amount of the Notes or if so directed by an Extraordinary Resolution shall (subject in each case to being indemnified and/or secured and/or prefunded to its satisfaction), give notice to the Issuer that the Notes are and they shall immediately become due and repayable at their principal amount together with accrued interest if any of the following events (each, an “**Event of Default**”) occurs and is continuing:

- 13.1. the Issuer fails to pay any of the principal of any of the Notes when the same becomes due and payable either at maturity, by declaration or otherwise or the Issuer is in default with respect to the payment of interest or additional amounts on any of the Notes and such default (i) in respect of principal continues for a period of seven days or (ii) in respect of interest or additional amounts continues for a period of fourteen days; or
- 13.2. the Issuer is in default in the performance, or is otherwise in breach, of any covenant, obligation, undertaking or other agreement under the Notes or the Trust Deed (other than a default or breach elsewhere specifically dealt with in this Condition 13) and such default or breach is not remedied within 30 days (or such longer period as the Trustee may in its sole discretion determine) after notice thereof has been given to the Issuer by the Trustee; or
- 13.3. (a) any Indebtedness for Borrowed Money of the Issuer or any Material Subsidiary (i) becomes due and payable prior to the due date for payment thereof or (ii) is not repaid at maturity as extended by the period of grace, if any, applicable thereto or (b) the Issuer or any of its Material Subsidiaries fails to pay when due any amount payable by it under any present or future guarantee for, or indemnity in respect of, any Indebtedness for Borrowed Money, provided that the aggregate principal amount of such Indebtedness for Borrowed Money, guarantees and indemnities (without double counting) equals or exceeds U.S.\$150,000,000 (or its equivalent in other currencies (as determined by the Trustee)); or
- 13.4. (a) any Person shall have instituted a proceeding or entered a decree or order for the appointment of a receiver, administrator or liquidator in any insolvency, rehabilitation, readjustment of debt, marshalling of assets and liabilities or similar arrangements involving the Issuer or any Material Subsidiary or all or (in the opinion of the Trustee) substantially all of their respective properties and such proceeding, decree or order shall not have been vacated or shall have remained in force undischarged or unstayed for a period of 60 days; or (b) the Issuer or any Material Subsidiary shall institute proceedings under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect to be adjudicated a bankrupt or shall consent to the filing of a bankruptcy, insolvency or similar proceeding against it or shall file a petition or answer or consent seeking insolvent reorganisation under any such law or shall consent to the filing of any such petition, or shall consent to the appointment of a receiver, administrator or liquidator or trustee or assignee in bankruptcy or liquidation of the Issuer or any Material Subsidiary, as the case may be, or in respect of its property or (in the opinion of the Trustee) substantially all thereof, or shall make an assignment for the benefit of its creditors or shall otherwise be unable or admit its inability to pay its debts generally as they become due or the Issuer or any Material Subsidiary commences proceedings with a view to the general adjustment of its Indebtedness and, in any case as is specified in this Condition 13.4 in relation to a Material Subsidiary, the event is (in the opinion of the Trustee) materially prejudicial to the interests of the Noteholders; or
- 13.5. the Issuer makes or threatens to make any substantial change in the principal nature of its business as presently conducted which is (in the opinion of the Trustee) materially prejudicial to the interests of the Noteholders; or
- 13.6. the Issuer fails to comply in any (in the opinion of the Trustee) material respect with any applicable laws or regulations (including any foreign exchange rules or regulations) of any governmental or other regulatory authority for any purpose to enable it lawfully to exercise its rights or perform or comply with its obligations under the Notes, the Trust Deed or the Agency Agreement or to ensure that those obligations are legally binding and enforceable or that all necessary agreements or other documents are entered into and that all necessary consents and approvals of, and registrations and filings with, any such authority in connection therewith are obtained and maintained in full force and effect; or
- 13.7. (a) the validity of the Notes, the Trust Deed or the Agency Agreement is contested by the Issuer or the Issuer shall deny any of its obligations under the Notes, the Trust Deed or the Agency Agreement (whether by a general suspension of payments or a moratorium on the payment of debt or otherwise) or (b) it is or becomes unlawful for the Issuer to perform or comply with all or any of its obligations set out in the Notes, the Trust Deed or the Agency Agreement or (c) all or any of its obligations set out in the Notes, the Trust Deed or the Agency Agreement shall be or become unenforceable or invalid and, following the occurrence of any of the events specified in this Condition 13.7, the Trustee is of the opinion that such occurrence is materially prejudicial to the interests of the Noteholders;

- 13.8. (a) all or any substantial part of the undertaking, assets and revenues of the Issuer or any Material Subsidiary is condemned, seized or otherwise appropriated by any person acting under the authority of any national, regional or local government or (b) the Issuer or any Material Subsidiary is prevented by any such person from exercising normal control over all or any substantial part of its undertaking, assets and revenues and, following the occurrence of any of the events specified in this Condition 13.8, the Trustee is of the opinion that such occurrence is materially prejudicial to the interests of the Noteholders; or
- 13.9. the Republic of Kazakhstan takes any action for a readjustment or deferment of any of its obligations or makes a general assignment or an agreement or composition with or for the benefit of its creditors or a moratorium is declared in respect of the payment of any class of obligations of the Republic of Kazakhstan (such payment being due in a currency other than the lawful currency for the time being of the Republic of Kazakhstan).

14 PRESCRIPTION

Claims against the Issuer for payment in respect of the Notes shall be prescribed and become void unless made within 10 years (in the case of principal) or five years (in the case of interest) from the appropriate Relevant Date in respect of them.

15 REPLACEMENT OF NOTES

If any Note is lost, stolen, mutilated, defaced or destroyed, it may be replaced at the Specified Office of the Registrar or such other Paying Agent or Transfer Agent, as the case may be, as may from time to time be designated by the Issuer for the purpose and notice of whose designation is given to Noteholders (and, if the Notes are then admitted to listing, trading or quotation by any listing authority, stock exchange or quotation by any listing authority, stock exchange or quotation system which requires the appointment of a Paying Agent in any particular place, the Paying Agent having its Specified Office in the place required by such listing authority stock exchange or quotation system), subject to all applicable laws and listing authority stock exchange or quotation system requirements, upon payment by the claimant of the expenses incurred in connection with such replacement and on such terms as to evidence, security, indemnity and otherwise as the Issuer may reasonably require. Mutilated or defaced Notes must be surrendered before replacements will be issued.

16 AGENTS

- 16.1. In acting under the Agency Agreement and in connection with the Notes, the Paying Agents act solely as agents of the Issuer and, in certain circumstances, the Trustee. The Paying Agents do not assume any obligations towards or relationship of agency or trust for or with any of the Noteholders.
- 16.2. The initial Paying Agents and their respective initial Specified Offices are listed in the Agency Agreement. The initial Calculation Agent (if any) is specified in the relevant Pricing Supplement. The Issuer, with the prior written approval of the Trustee, reserves the right at any time to vary or terminate the appointment of any Paying Agent and to appoint a successor Principal Paying Agent or Calculation Agent and additional or successor paying agents; provided, however, that:
- a) the Issuer shall at all times maintain a Principal Paying Agent, Registrar and a Transfer Agent;
 - b) if a Calculation Agent is specified in the relevant Pricing Supplement, the Issuer shall at all times maintain a Calculation Agent; and
 - c) such other agents as may be required by any other stock exchange on which the Notes may be listed and/or admitted to trading.

Notice of any such change or any change of any Specified Offices shall promptly be given to the Noteholders.

17 MEETINGS OF NOTEHOLDERS; MODIFICATION; WAIVER AND ENFORCEMENT

- 17.1. The Trust Deed contains provisions for convening meetings of Noteholders to consider matters relating to the Notes, including the modification of any provision of these Conditions or the Trust Deed. Any such modification may be made if sanctioned by an Extraordinary Resolution. Such a meeting may be convened by the Trustee or the Issuer and shall be convened by the Issuer upon the request in writing of Noteholders holding not less than one tenth of the aggregate principal amount of the outstanding Notes. The quorum at any meeting convened to vote on an Extraordinary Resolution will be two or more Persons holding or representing one more than half of the aggregate principal amount of the outstanding Notes or, at any adjourned meeting, two or more Persons being or representing Noteholders whatever the principal amount of the Notes held or represented; provided, however, that Reserved Matters may only be sanctioned by an Extraordinary Resolution passed at a meeting of Noteholders at which two or more Persons holding or representing not less than two-thirds or, at any adjourned meeting, one quarter of the aggregate principal amount of the outstanding Notes form a quorum. Any Extraordinary Resolution duly passed at any such meeting shall be binding on all the Noteholders, whether present or not.

The Trust Deed provides that a resolution in writing signed by or on behalf of the holders of not less than two-thirds in principal amount of the Notes outstanding shall for all purposes be as valid and effective as an Extraordinary Resolution passed at a meeting of Noteholders duly convened and held. Such a resolution in writing may be contained in one document or several documents in the same form, each signed by or on behalf of one or more Noteholders.

- 17.2. The Trustee may agree, without the consent of the Noteholders, to (a) any modification of any of the provisions of the Trust Deed that is of a formal, minor or technical nature or is made to correct a manifest error, (b) any other modification (except as mentioned in the Trust Deed) and any waiver or authorisation of any breach or proposed breach, of any of the provisions of the Trust Deed and (c) determine that any Event of Default or Potential Event of Default (as defined in the Trust Deed) will not be treated as such, provided that such modification, waiver or determination is in the opinion of the Trustee not materially prejudicial to the interests of the Noteholders, and such modification shall be notified to the Noteholders as soon as practicable.
- 17.3. At any time after the Notes become due and payable, the Trustee may, at its discretion and without further notice, institute such proceedings against the Issuer as it may think fit to enforce the terms of the Trust Deed and the Notes (whether by arbitration or by litigation), but it need not take any such proceedings unless (a) it shall have been so directed by an Extraordinary Resolution or so requested in writing by Noteholders holding at least one quarter in principal amount of the Notes outstanding and (b) it shall have been indemnified and/or secured and/or prefunded to its satisfaction. No Noteholder may proceed directly against the Issuer unless the Trustee, having become bound so to proceed, fails to do so within a reasonable time and such failure is continuing.
- 17.4. The Trust Deed contains provisions for the indemnification of the Trustee and for its relief from responsibility in certain circumstances and to be paid its costs and expenses in priority to claims of the Noteholders. The Trustee is entitled to enter into business transactions with the Issuer and any entity related to the Issuer without accounting for any profit.
- 17.5. In connection with the exercise of its functions (including but not limited to those referred to in this Condition 17) the Trustee shall have regard to the interests of the Noteholders as a class and shall not have regard to the consequences of such exercise for individual Noteholders and the Trustee shall not be entitled to require, nor shall any Noteholder be entitled to claim, from the Issuer any indemnification or payment in respect of any tax consequence of any such exercise upon individual Noteholders.

18 FURTHER ISSUES AND CONSOLIDATION

- 18.1. The Issuer may from time to time, without the consent of the Noteholders, create and issue further notes having the same terms and conditions as the Notes of a particular Series in all respects (or in all respects except for the issue price, the issue date and the first payment of interest) so as to form a single series with the Notes of the particular Series, provided that, in case the Notes were sold or the further notes are sold in reliance of Rule 144A of the Securities Act, unless such further notes are fungible with the original Notes for U.S. federal income tax purposes, such further notes will be issued with a separate CUSIP and ISIN. The Trust Deed contains provisions for convening a single meeting of the Noteholders and the holders of Notes of other series in certain circumstances where the Trustee so decides.
- 18.2. The Issuer may, with the prior approval of the Trustee and the Principal Paying Agent (which shall not be unreasonably withheld), from time to time on any Interest Payment Date occurring on or after the

Redenomination Date (as defined in Condition 22) on giving not less than 30 days' prior notice to the Noteholders in accordance with Condition 19, without the consent of the Noteholders, consolidate the Notes of one Series with the Notes of one or more other Series issued by it, whether or not originally issued in one of the European national currencies or in Euros, provided such other Notes have been redenominated in Euros (if not originally denominated in Euros) and which otherwise have, in respect of all periods subsequent to such consolidation, the same terms and conditions as the Notes.

19 NOTICES

Notices required to be given to the Noteholders pursuant to these Conditions shall be valid if published in a leading daily newspaper of general circulation in Europe and so long as the Notes are listed on any stock exchange, in a leading daily newspaper with general circulation in the city or cities where the stock exchange(s) on which the Notes are listed. Any such notice shall be deemed to have been given on the date of first publication (or if required to be published in more than one newspaper, on the first date on which publication shall have been made in all the required newspapers).

20 CURRENCY INDEMNITY

If any sum due from the Issuer in respect of the Notes or any order, award or judgment given or made in relation thereto has to be converted from the currency (the **"first currency"**) in which the same is payable under these Conditions or such order or judgment into another currency (the **"second currency"**) for the purpose of (a) making or filing a claim or proof against the Issuer, (b) obtaining an order or judgment in any court or other tribunal or (c) enforcing any order or judgment given or made in relation to the Notes, the Issuer shall indemnify each Noteholder, on the written demand of such Noteholder addressed to the Issuer and delivered to the Issuer or to the Specified Office of the Principal Paying Agent, against any loss suffered as a result of any discrepancy between (i) the rate of exchange used for such purpose to convert the sum in question from the first currency into the second currency and (ii) the rate or rates of exchange at which such Noteholder may in the ordinary course of business purchase the first currency with the second currency upon receipt of a sum paid to it in satisfaction, in whole or in part, of any such order, award judgment, claim or proof.

This indemnity constitutes a separate and independent obligation of the Issuer and shall give rise to a separate and independent cause of action.

21 ROUNDING

For the purposes of any calculations referred to in these Conditions (unless otherwise specified in these Conditions or the relevant Pricing Supplement), (a) all percentages resulting from such calculations will be rounded, if necessary, to the nearest one hundred thousandth of a percentage point (with 0.000005%, being rounded up to 0.00001%), (b) all United States dollar amounts used in or resulting from such calculations will be rounded to the nearest cent (with one half cent being rounded up), (c) all Japanese Yen amounts used in or resulting from such calculations will be rounded downwards to the next lower whole Japanese Yen amount, and (d) all amounts denominated in any other currency used in or resulting from such calculations will be rounded to the nearest two decimal places in such currency, with 0.005 being rounded upwards.

22 REDENOMINATION

- 22.1. This Condition 22 is applicable to the Notes only if it is specified in the relevant Pricing Supplement as being applicable.
- 22.2. If the country of the Specified Currency becomes or, announces its intention to become, a Participating Member State, the Issuer may, without the consent of the Noteholders, on giving at least 30 days' prior notice to the Trustee, the Noteholders and the Paying Agents, designate a date (the **"Redenomination Date"**), being an Interest Payment Date under the Notes falling on or after the date on which such country becomes a Participating Member State.
- 22.3. Notwithstanding the other provisions of these Conditions, with effect from the Redenomination Date:

- a) the Notes shall be deemed to be redenominated into Euros in the denomination of Euros 0.01 with a principal amount for each Note equal to the principal amount of that Note in the Specified Currency, converted into Euros at the rate for conversion of such currency into Euros established by the Council of the European Union pursuant to the Treaty (including compliance with rules relating to rounding in accordance with European Community regulations); provided, however, that, if the Issuer determines, with the agreement of the Trustee and the Principal Paying Agent that the then market practice in respect of the re denomination into Euros 0.01 of internationally offered securities is different from that specified above, such provisions shall be deemed to be amended so as to comply with such market practice and the Issuer shall promptly notify the Noteholders, each listing authority, stock exchange or quotation system (if any) by which the Notes have then been admitted to listing, trading or quotation and the Paying Agents of such deemed amendments;
 - b) if Notes have been issued in definitive form:
 - (i) the payment obligations contained in all Notes denominated in the Specified Currency will become void on the Euro Exchange Date but all other obligations of the Issuer thereunder (including the obligation to exchange such Notes in accordance with this Condition 22) shall remain in full force and effect; and
 - (ii) new Notes denominated in Euros will be issued in exchange for Notes denominated in the Specified Currency in such manner as the Principal Paying Agent may specify and as shall be notified to the Noteholders in the Euro Exchange Notice; and
 - c) all payments in respect of the Notes (other than, unless the Redenomination Date is on or after such date as the Specified Currency ceases to be a sub division of the Euros, payments of interest in respect of periods commencing before the Redenomination Date) will be made solely in Euros by cheque drawn on, or by credit or transfer to a Euros account (or any other account to which Euros may be credited or transferred) maintained by the payee with, a bank in the Principal Financial Centre of any Member State of the European Communities.
- 22.4. Following redenomination of the Notes pursuant to this Condition 22, where Notes have been issued in definitive form, the amount of interest due in respect of the Notes will be calculated by reference to the aggregate principal amount of the Notes held by the relevant holder.
- 22.5. If the Floating Rate Note Provisions are specified in the relevant Pricing Supplement as being applicable and Screen Rate Determination is specified in the relevant Pricing Supplement as the manner in which the Rate(s) of Interest is/are to be determined, with effect from the Redenomination Date the Interest Determination Date shall be deemed to be the second Target Business Day before the first day of the relevant Interest Period.

23 GOVERNING LAW, JURISDICTION AND ARBITRATION

- 23.1. The Trust Deed and the Notes, and any non-contractual obligations arising out of or in connection with the Trust Deed or the Notes, are governed by, and shall be construed in accordance with, English law.
- 23.2. The Issuer has agreed in the Trust Deed for the benefit of the Noteholders that any dispute, controversy or claim, be it contractual or non-contractual, arising out of or in connection with the Trust Deed or the Notes (including any question regarding their formation, existence, validity or termination) (a **“Dispute”**), shall be referred to and finally resolved by arbitration under the Rules of Arbitration of the London Court of International Arbitration (the **“LCIA”**) (the **“Rules”**) as of present in force, which Rules shall be deemed incorporated into this Condition 23. The number of arbitrators shall be three, each party having the right to nominate one arbitrator. The claimant(s), irrespective of number, shall nominate jointly one arbitrator; the respondent(s), irrespective of number, shall nominate jointly one arbitrator; and a third arbitrator, who shall act as Chairman, shall be nominated by the two party-nominated arbitrators, provided that if the third arbitrator has not been nominated within the time limits specified by the Rules, such third arbitrator shall be appointed by the LCIA court. The seat of arbitration shall be London, England where all hearings and meetings shall be held, unless the parties agree otherwise, and the language of arbitration shall be English.

- 23.3. The Issuer has appointed Law Debenture Corporate Services Limited at Eighth Floor, 100 Bishopsgate, London EC2N 4AG as its agent in England to receive service of process in any proceedings in England in connection with the Notes and the Trust Deed.
- 23.4. The Issuer has consented generally in respect of any Disputes to the giving of any relief or the issue of any process in connection with such Disputes including (without limitation) the making, enforcement or execution against any property whatsoever (irrespective of its use or intended use) of any judgment or award which may be made or given in such Disputes.
- 23.5. In relation to any Disputes and to the enforcement of any judgment, order or award (whether or not given or made in those Disputes), to the extent that the Issuer may in any jurisdiction claim for itself or its assets or revenues immunity from jurisdiction, suit, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process, including in relation to the enforcement of any arbitration award, and to the extent that such immunity (whether or not claimed) may be attributed in any such jurisdiction to the Issuer or its assets or revenues, the Issuer has irrevocably consented to the enforcement of any judgment or award, agreed not to claim and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction.

24 RIGHTS OF THIRD PARTIES

No person shall have any right to enforce any term or condition of the Notes or the Trust Deed under the Contracts (Rights of Third Parties) Act 1999.

FORM OF PRICING SUPPLEMENT

Pricing Supplement dated [•]

BAITEREK NATIONAL INVESTMENT HOLDING JSC

Issue of [Aggregate Nominal Amount of Tranche] [Title of Notes] under the U.S.\$ [3,000,000,000] Medium Term Note Programme

[NO PROSPECTUS IS REQUIRED IN ACCORDANCE WITH THE PRM FOR THE ISSUE OF THE INSTRUMENTS DESCRIBED BELOW. THE UNITED KINGDOM FINANCIAL CONDUCT AUTHORITY HAS NEITHER APPROVED NOR REVIEWED ANY INFORMATION CONTAINED IN THIS PRICING SUPPLEMENT AND ANY INSTRUMENTS ISSUED PURSUANT TO THIS PRICING SUPPLEMENT ARE NOT COMPLIANT WITH THE PRM.]

PROHIBITION OF SALES TO EEA RETAIL INVESTORS - The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (“**EEA**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); or (ii) a customer within the meaning of Directive (EU) 2016/97 the (“**Insurance Distribution Directive**”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II. Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

PROHIBITION OF SALES TO UK RETAIL INVESTORS - The Notes are not intended to be offered, sold, distributed or otherwise made available to and should not be offered, sold, distributed or otherwise made available to any retail investor in the United Kingdom (the “**UK**”). For these purposes, a retail investor means a person who is not a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA. Consequently, no disclosure document required by the FCA Product Disclosure Sourcebook (“**DISC**”) for offering, selling, or distributing the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering, selling or distributing the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the DISC and the Consumer Composite Investments (Designated Activities) Regulations 2024, as applicable.

[MIFID II product governance / Professional investors and ECPs only target market - Solely for the purposes of [the/each] manufacturer’s product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in Directive 2014/65/EU (as amended, “**MiFID II**”); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a “**distributor**”) should take into consideration the manufacturer[‘s/s’] target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer[‘s/s’] target market assessment) and determining appropriate distribution channels.]

[UK MIFIR product governance / Professional investors and ECPs only target market - Solely for the purposes of each manufacturer’s product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is only eligible counterparties, as defined in the FCA Handbook Conduct of Business Sourcebook (“**COBS**”), and professional clients, as defined in Regulation (EU) No 600/2014, as it forms part of domestic law by virtue of the EUWA (“**UK MiFIR**”); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a “**distributor**”) should take into consideration the manufacturers’ target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers’ target market assessment) and determining appropriate distribution channels.]

PART A- CONTRACTUAL TERMS

Terms used herein shall be deemed to be defined as such for the purposes of the Terms and Conditions of the Notes (the “**Conditions**”) set forth in the Base Offering Memorandum dated 27 April 2026. This document constitutes the Pricing Supplement of the Notes described herein and must be read in conjunction with such Base Offering Memorandum in order to obtain all relevant information. Full information on the Issuer and the offer of the Notes is only available on the basis of the combination of this Pricing Supplement and the Base Offering Memorandum. The Base Offering Memorandum has been published on [insert website].

[Include whichever of the following apply or specify as “**Not Applicable**” (N/A). Note that the numbering should remain as set out below, even if “**Not Applicable**” is indicated for individual paragraphs (in which case the sub-paragraphs of the paragraphs which are not applicable can be deleted). Italics denote guidance for completing the Pricing Supplement.]

Duly authorised

PART B - OTHER INFORMATION

1 LISTINGS

- (i) Admission to trading: [Application has been made by the Issuer (or on its behalf) for the Notes to be admitted to (i) the Vienna Stock Exchange and (ii) to the **“Bonds”** category of the **“Debt Securities”** sector of the **“Main”** platform of the Kazakhstan Stock Exchange with effect from [•].] [Application is expected to be made by the Issuer (or on its behalf) for the Notes to be admitted to trading on (i) the Vienna MTF of the Vienna Stock Exchange and (ii) to be admitted to the **“Bonds”** category of the **“Debt Securities”** sector of the **“Main”** platform of the Kazakhstan Stock Exchange with effect from [•].] [Not Applicable.]
- (ii) Estimate of total expenses related to admission to trading: [•]

2 RATINGS

- Ratings: The Notes to be issued have been rated:
- [S & P: [•]]
- [Moody's: [•]]
- [[Fitch: [•]]
- [Note: Entity names of the relevant rating agencies to be confirmed]
- [Brief explanation of meaning of the ratings to be included if previously published by the rating provider]
- [Each of] [Fitch] [and] [Moody's] is established in the United Kingdom and is registered under Regulation (EU) № 1060/2009 as it forms part of domestic law by virtue of the EUWA (the **“UK CRA Regulation”**). [S&P is not established in the UK but the rating it has given to Notes is endorsed by S&P Global Ratings UK Limited which is established in the UK and registered under the UK CRA Regulation.]

3. [INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE [ISSUE/OFFER]

If applicable a description of any interest, including conflicting ones, that is material to the issue/offer, detailing the persons involved and the nature of the interest is to be included. This may be satisfied by the inclusion of the following statement:

“Save as discussed in [Subscription and Sale], so far as the Issuer is aware, no person involved in the offer of the Notes has an interest material to the offer.”]

4. REASONS FOR THE OFFER AND ESTIMATED NET PROCEEDS

- Reasons for the offer: [See **“Use of Proceeds”**] in Base Offering Memorandum] / [Give details]
- Estimated net proceeds: [•]

[5. Fixed Rate Notes only - YIELD

Indication of yield: [•]

[The yield is calculated at the Issue Date on the basis of the Issue Price. It is not an indication of future yield.] / [As the Notes are denominated in Tenge, while interest, principal and other amounts are payable in U.S. Dollars, the total yield, stated in percentage terms, on an investment in the Notes will be affected by fluctuations in the exchange rate between the Tenge and the U.S. Dollar and may not be the same when calculated in U.S. Dollars as when calculated in Tenge.]

Rule 144A Notes CUSIP number: [•]

Any clearing system(s) other than Euroclear Bank SA/NV and Clearstream Banking S.A. or DTC and the relevant identification number(s): [Not Applicable/[•]]

Names and addresses of additional Paying Agent(s) (if any): [•]

7. DISTRIBUTION

(i) Method of distribution: [Syndicated/Non-syndicated]

(ii) If syndicated:

(A) Names of Managers: [Not Applicable/give names]

(B) Stabilisation Manager(s) (if any): [Not Applicable/give names]

(iii) If non-syndicated, name of Dealer: [Not Applicable/give names]

(iv) U.S. Selling Restrictions: [Reg. S Compliance Category [2/3]; [Rule 144A;] TEFRA not applicable]

SUMMARY OF THE PROVISIONS RELATING TO NOTES IN GLOBAL FORM

The Global Notes

Each Series of Notes will be evidenced on issue by, in the case of Regulation S Notes, a Regulation S Global Note deposited with, and registered in the name of a nominee for, a common depository for Euroclear and Clearstream, Luxembourg and, in the case of Rule 144A Notes, a Rule 144A Global Note deposited with a custodian for, and registered in the name of Cede & Co. as nominee of, DTC.

Beneficial interests in a Regulation S Global Note may be held only through Euroclear or Clearstream, Luxembourg at any time. See “—**Book Entry Procedures for the Global Notes**”. By acquisition of a beneficial interest in a Regulation S Global Note, the purchaser thereof will be deemed to represent, among other things, that it is not a U.S. person and that, prior to the expiration of 40 days after completion of the distribution of the Series of which such Notes are a part as determined and certified to the Principal Paying and Transfer Agent by the relevant Dealer (or in the case of a Series of Notes sold to or through more than one relevant Dealer, by each of such relevant Dealers as to the Notes of such Series sold by or through it, in which case the Principal Paying and Transfer Agent shall notify each such relevant Dealer when all relevant Dealers have so certified, (the “**distribution compliance period**”), it will not offer, sell, pledge or otherwise transfer such interest except to a person whom the seller reasonably believes to be a non-U.S. person in an offshore transaction in accordance with Rule 903 or Rule 904 of Regulation S. See “**Transfer Restrictions**”. Beneficial interests in a Rule 144A Global Note may only be held through DTC at any time. See “—**Book Entry Procedures for the Global Notes**”. By acquisition of a beneficial interest in a Rule 144A Global Note, the purchaser thereof will be deemed to represent, among other things, that if it is a U.S. person, it is a QIB that is also a QP and that, if in the future it determines to transfer such beneficial interest, it will transfer such interest only in accordance with the procedures and restrictions contained in the Agency Agreement. See “**Transfer Restrictions**”.

Beneficial interests in each Global Note will be subject to certain restrictions on transfer set forth therein and in the Agency Agreement and, with respect to a Rule 144A Global Note, as set forth in Rule 144A, and the Rule 144A Notes will bear the legends set forth thereon regarding such restrictions set forth under “**Transfer Restrictions**”.

Any beneficial interest in a Regulation S Global Note that is transferred to a person who takes delivery in the form of an interest in a Rule 144A Global Note will, upon transfer, cease to be an interest in that Regulation S Global Note and become an interest in the corresponding Rule 144A Global Note and, accordingly, will thereafter be subject to all transfer restrictions and other procedures applicable to beneficial interests in that Rule 144A Global Note for as long as it remains such an interest. Any beneficial interest in a Rule 144A Global Note that is transferred to a person who takes delivery in the form of an interest in a Regulation S Global Note will, upon transfer, cease to be an interest in that Rule 144A Global Note and become an interest in that Regulation S Global Note and, accordingly, will thereafter be subject to all transfer restrictions and other procedures applicable to beneficial interests in the Regulation S Global Note for so long as it remains such an interest. No service charge will be made for any registration of transfer or exchange of Notes but the Registrar may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith. Except in the limited circumstances described below, owners of beneficial interests in Global Notes will not be entitled to receive physical delivery of certificated Notes in definitive form (the “**Definitive Notes**”). The Notes are not issuable in bearer form.

Amendments to Conditions

Each Global Note contains provisions that apply to the Notes that they represent, some of which modify the effect of the Terms and Conditions of the Notes. The following is a summary of those provisions:

- *Payments.* Payments of principal and interest in respect of Notes evidenced by a Global Note will be made against presentation for endorsement by the Principal Paying and Transfer Agent and, if no further payment falls to be made in respect of the relevant Notes, surrender of such Global Note to or to the order of the Principal Paying and Transfer Agent or such other Paying Agent as shall have been notified to the relevant Noteholders for such purpose. A record of each payment so made will be endorsed in the appropriate schedule to the relevant Global Note, which endorsement will be prima facie evidence that such payment has been made in respect of the relevant Notes.

- *Record Date.* Condition 11.2, which defines “**Record Date**”, shall be amended in relation to Global Notes to the effect that Record Date shall mean the close of business on the Payment Business Date immediately preceding the relevant Interest Payment Date.
- *Notices.* So long as any Notes are evidenced by a Global Note and such Global Note is held by or on behalf of a clearing system, notices to Noteholders may be given by delivery of the relevant notice to that clearing system for communication by it to entitled account holders in substitution for delivery thereof as required by the Terms and Conditions of the Notes provided that for so long as the Notes are listed on the Vienna MTF and the rules of the Vienna MTF so require, notices will also be published in accordance with guidelines of the Vienna MTF, as applicable.
- *Meetings.* The holder of each Global Note will be treated as being two persons for the purposes of any quorum requirements of, or the right to demand a poll or any proxy appointed by it at, a meeting of Noteholders and in any such meeting as having one vote in respect of each Calculation Amount worth of Notes held.
- *Trustee’s Powers.* In considering the interests of Noteholders while the relevant Global Note is held on behalf of a clearing system, the Trustee, to the extent it considers it appropriate to do so in the circumstances, may have regard to any information provided to it by such clearing system or its operator as to the identity (either individually or by category) of its accountholders with entitlements to such Global Note and may consider such interests as if such accountholders were the holders of such Global Note.
- *Cancellation.* Cancellation of any Note required by the Terms and Conditions of the Notes to be cancelled will be effected by reduction in the principal amount of the applicable Global Note.
- *Redemption at the Option of the Issuer.* Any Call Option provided for in the Terms and Conditions of the Notes shall be exercised by the Issuer giving notice to the Noteholders within the time limits set out in and containing the information required by the Terms and Conditions of the Notes, except that the notice shall not be required to contain the serial numbers of Notes drawn in the case of a partial exercise of an option and accordingly no drawing of Notes shall be required.
- *Redemption at the Option of Noteholders.* So long as a Global Note is held by, or on behalf of a common depositary for, Euroclear, Clearstream, Luxembourg or any other clearing system, the exercise of the option of the Noteholders provided for in Condition 10.6 and Condition 10.7 will be subject to the normal rules and operating procedures of Euroclear and Clearstream, Luxembourg or such Alternative Clearing System, as the case may be.

Exchange for Definitive Notes

Exchange

Registration of title to Notes initially represented by a Rule 144A Global Note in a name other than DTC or a successor depositary or one of their respective nominees will not be permitted unless such depositary notifies the Issuer that it is no longer willing or able to discharge properly its responsibilities as depositary with respect to the Rule 144A Global Note or ceases to be a “**clearing agency**” registered under the United States Securities Exchange Act of 1934, as amended, or is at any time no longer eligible to act as such, and the Issuer is unable to locate a qualified successor within 90 days of receiving notice of such ineligibility on the part of such depositary and the Registrar has received a notice from the registered holder of a Rule 144A Global Note requesting an exchange of a specified amount of the Rule 144A Global Note for Definitive Notes.

Registration of title to Notes initially represented by a Regulation S Global Note in a name other than the nominee of a common depositary for Euroclear and Clearstream, Luxembourg will only be permitted if Euroclear or Clearstream, Luxembourg is closed for business for a continuous period of 14 days (other than by reason of legal holidays) or announces an intention permanently to cease business.

On or after the Exchange Date, the holder of the relevant Global Note may surrender such Global Note to or to the order of the Registrar or any Transfer Agent. In exchange for the relevant Global Note, as provided in the Agency Agreement, the Registrar will deliver, or procure the delivery of, an equal aggregate amount of duly executed and authenticated Definitive Notes in or substantially in the form set out in the relevant schedule to the Trust Deed.

The Registrar will not register the transfer of, or exchange of interests in, a Global Note for Definitive Notes for a period of 15 calendar days ending on the date for any payment of principal or interest or on the date of optional redemption in respect of the Notes.

“Exchange Date” means a day falling not later than 90 days after that on which the notice requiring exchange is given and on which banks are open for business in the city in which the specified office of the Registrar or the Transfer Agent is located.

Delivery

In such circumstances, the relevant Global Note shall be exchanged in full for Definitive Notes and the Issuer will, at the cost of the Issuer (but against such indemnity and/or security as the Registrar or any relevant Transfer Agent may require in respect of any tax or other duty of whatever nature which may be levied or imposed in connection with such exchange), cause sufficient Definitive Notes to be executed and delivered to the Registrar for completion, authentication and dispatch to the relevant Noteholders. A person having an interest in a Global Note must provide the Registrar with a written order containing instructions and such other information as the Issuer and the Registrar may require to complete, execute and deliver such Notes and, in the case of a Rule 144A Global Note only, a fully completed, signed certification substantially to the effect that the exchanging holder is not transferring its interest at the time of such exchange or, in the case of simultaneous sale pursuant to Rule 144A, a certification that the transfer is being made in compliance with the provisions of Rule 144A to a QIB that is also a QP. Definitive Notes issued in exchange for a beneficial interest in a Rule 144A Global Note shall bear the legend applicable to transfers pursuant to Rule 144A, as set out under **“Transfer Restrictions”**.

Legends

The holder of a Definitive Note may transfer the Notes evidenced thereby in whole or in part in the applicable minimum denomination by surrendering it at the specified office of the Registrar or any Transfer Agent, together with the completed form of transfer thereon. Upon the transfer, exchange or replacement of a Rule 144A Definitive Note bearing the legend referred to under **“Transfer Restrictions”** or upon specific request for removal of the legend on a Rule 144A Definitive Note, the Issuer will deliver only Rule 144A Definitive Notes that bear such legend, or will refuse to remove such legend, as the case may be, unless there is delivered to the Issuer and the Registrar such satisfactory evidence, which may include an opinion of counsel, as may reasonably be required by the Issuer that neither the legend nor the restrictions on transfer set forth therein are required to ensure compliance with the provisions of the Securities Act and the Investment Company Act.

Book Entry Procedures for the Global Notes

For each Series of Notes evidenced by both a Regulation S Global Note and a Rule 144A Global Note, custodial and depository links are to be established between DTC, Euroclear and Clearstream, Luxembourg to facilitate the initial issue of the Notes and cross market transfers of the Notes associated with secondary market trading. See **“— Book Entry Ownership”** and **“— Settlement and Transfer of Notes”**.

Euroclear and Clearstream, Luxembourg

Euroclear and Clearstream, Luxembourg each hold securities for their customers and facilitate the clearance and settlement of securities transactions through electronic book entry transfer between their respective accountholders. Indirect access to Euroclear and Clearstream, Luxembourg is available to other institutions which clear through or maintain a custodial relationship with an accountholder of either system. Euroclear and Clearstream, Luxembourg provide various services including safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Euroclear and Clearstream, Luxembourg also deal with domestic securities markets in several countries through established depository and custodial relationships. Euroclear and Clearstream, Luxembourg have established an electronic bridge between their two systems across which their respective customers may settle trades with each other. Their customers are worldwide financial institutions including underwriters, securities brokers and dealers, banks, trust companies and

clearing corporations. Investors may hold their interests in such Global Notes directly through Euroclear or Clearstream, Luxembourg if they are accountholders (“**Direct Participants**”) or indirectly (“**Indirect Participants**”) and, together with Direct Participants, “**Participants**”) through organisations which are accountholders therein.

DTC

DTC has advised the Issuer as follows: DTC is a limited purpose trust company organised under the laws of the State of New York, a “**banking organisation**” under the laws of the State of New York, a member of the U.S. Federal Reserve System, a “**clearing corporation**” within the meaning of the New York Uniform Commercial code and a “**clearing agency**” registered pursuant to the provisions of Section 17A of the Exchange Act. DTC was created to hold securities for its Participants and facilitate the clearance and settlement of securities transactions between Participants through electronic computerised book entry changes in accounts of its Participants, thereby eliminating the need for physical movement of certificates. Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organisations. Indirect access to DTC is available to others, such as banks, securities brokers, dealers and trust companies, that clear through or maintain a custodial relationship with a DTC Direct Participant, either directly or indirectly.

Investors may hold their interests in Rule 144A Global Notes directly through DTC if they are Direct Participants in the DTC system, or as Indirect Participants through organisations which are Direct Participants in such system.

DTC has advised the Issuer that it will take any action permitted to be taken by a holder of Notes only at the direction of one or more Direct Participants and only in respect of such portion of the aggregate principal amount of the relevant Rule 144A Global Notes as to which such Participant or Participants has or have given such direction. However, in the circumstances described under “**Exchange for Definitive Notes**”, DTC will surrender the relevant Rule 144A Global Notes for exchange for individual Rule 144A Definitive Notes (which will bear the legend applicable to transfers pursuant to Rule 144A).

Book Entry Ownership

Euroclear and Clearstream, Luxembourg

The Regulation S Global Note representing Regulation S Notes of any Series will have an ISIN and a Common Code and will be registered in the name of a nominee for, and deposited with a common depository on behalf of, Euroclear and Clearstream, Luxembourg.

DTC

The Rule 144A Global Note representing Rule 144A Notes of any Series will have a CUSIP number, unless otherwise agreed, and will be deposited with a custodian for, and registered in the name of Cede & Co. as nominee of, DTC. The Custodian and DTC will electronically record the principal amount of the Notes held within the DTC system.

Relationship of Participants with Clearing Systems

Each of the persons shown in the records of Euroclear, Clearstream, Luxembourg or DTC as the holder of a Note evidenced by a Global Note must look solely to Euroclear, Clearstream, Luxembourg or DTC (as the case may be) for his share of each payment made by the Issuer to the holder of such Global Note and in relation to all other rights arising under the Global Note, subject to and in accordance with the respective rules and procedures of Euroclear, Clearstream, Luxembourg or DTC (as the case may be). The Issuer expects that, upon receipt of any payment in respect of Notes evidenced by a Global Note, the common depository by whom such Note is held, or nominee in whose name it is registered, will immediately credit the relevant participants’ or accountholders’ accounts in the relevant clearing system with payments in amounts proportionate to their respective beneficial interests in the principal amount of the relevant Global Note as shown on the records of the relevant clearing system or its nominee. The Issuer also expects that payments by Direct Participants in any clearing system to owners of beneficial interests in any Global Note held through such Direct Participants in any clearing system will be governed by standing instructions and customary practices. Save as aforesaid, such persons shall have no claim directly against the Issuer in respect of payments due on the Notes for so long as the Notes are evidenced by such Global Note and the obligations of the Issuer will be discharged by payment to the registered holder, as the case may be, of such Global Note in respect of each amount so paid. None of the Issuer, the Trustee or any

Agent will have any responsibility or liability for any aspect of the records relating to or payments made on account of ownership interests in any Global Note or for maintaining, supervising or reviewing any records relating to such ownership interests.

Settlement and Transfer of Notes

Subject to the rules and procedures of each applicable clearing system, purchases of Notes held within a clearing system must be made by or through Direct Participants, which will receive a credit for such Notes on the clearing system's records. The ownership interest of each actual purchaser of each such Note (the **"Beneficial Owner"**) will in turn be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from any clearing system of their purchase, but Beneficial Owners are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which such Beneficial Owner entered into the transaction.

Transfers of ownership interests in Notes held within a clearing system will be affected by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in such Notes, unless and until interests in any Global Note held within a clearing system are exchanged for Definitive Notes.

No clearing system has knowledge of the actual Beneficial Owners of the Notes held within such clearing system and their records will reflect only the identity of the Direct Participants to whose accounts such Notes are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers. Conveyance of notices and other communications by the clearing systems to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

The laws of some jurisdictions may require that certain persons take physical delivery in definitive form of securities. Consequently, the ability to transfer interests in a Global Note to such persons may be limited. Because DTC can only act on behalf of Direct Participants, who in turn act on behalf of Indirect Participants, the ability of a person having an interest in a Rule 144A Global Note to pledge such interest to persons or entities that do not participate in DTC, or otherwise take actions in respect of such interest, may be affected by a lack of physical certificate in respect of such interest.

Trading Between Euroclear and Clearstream, Luxembourg Participants

Secondary market sales of book entry interests in the Notes held through Euroclear or Clearstream, Luxembourg to purchasers of book entry interests in the Notes held through Euroclear or Clearstream, Luxembourg will be conducted in accordance with the normal rules and operating procedures of Euroclear and Clearstream, Luxembourg and will be settled using the procedures applicable to conventional Eurobonds.

Trading Between DTC Participants

Secondary market sales of book entry interests in the Notes between DTC participants will occur in the ordinary way in accordance with DTC rules and will be settled using the procedures applicable to U.S. corporate debt obligations in DTC's Same Day Funds Settlement system in same day funds, if payment is effected in U.S. Dollars, or free of payment, if payment is not effected in U.S. Dollars. Where payment is not effected in U.S. Dollars, separate payment arrangements outside DTC are required to be made between the DTC participants.

Trading Between DTC Seller and Euroclear/Clearstream, Luxembourg Purchaser

When book entry interests in Notes are to be transferred from the account of a DTC participant holding a beneficial interest in a Rule 144A Global Note to the account of a Euroclear or Clearstream, Luxembourg accountholder wishing to purchase a beneficial interest in a Regulation S Global Note (subject to the certification procedures provided in the Agency Agreement), the DTC participant will deliver instructions for delivery to the relevant Euroclear or Clearstream, Luxembourg accountholder to DTC by 12:00 noon, New York time, on the settlement date. Separate payment arrangements are required to be made between the DTC participant and the relevant Euroclear or Clearstream, Luxembourg participant. On the settlement date, the custodian of the Rule 144A Global Note will instruct the Registrar to decrease the amount of Notes registered in the name of Cede & Co. and evidenced by the Rule 144A Global Note of the relevant class and increase the amount of Notes registered in the

name of the nominee of the common depositary for Euroclear and Clearstream, Luxembourg and evidenced by the Regulation S Global Note. Book entry interests will be delivered free of payment to Euroclear or Clearstream, Luxembourg, as the case may be, for credit to the relevant accountholder on the first business day following the settlement date.

Trading Between Euroclear/Clearstream, Luxembourg Seller and DTC Purchaser

When book entry interests in the Notes are to be transferred from the account of a Euroclear or Clearstream, Luxembourg accountholder to the account of a DTC participant wishing to purchase a beneficial interest in a Rule 144A Global Note (subject to the certification procedures provided in the Agency Agreement), the Euroclear or Clearstream, Luxembourg participant must send to Euroclear or Clearstream, Luxembourg delivery free of payment instructions by 7:45 p.m., Brussels or Luxembourg time, one business day prior to the settlement date. Euroclear or Clearstream, Luxembourg, as the case may be, will in turn transmit appropriate instructions to the common depositary for Euroclear and Clearstream, Luxembourg and the Registrar to arrange delivery to the DTC participant on the settlement date. Separate payment arrangements are required to be made between the DTC participant and the relevant Euroclear or Clearstream, Luxembourg accountholder, as the case may be. On the settlement date, the common depositary for Euroclear and Clearstream, Luxembourg will (a) transmit appropriate instructions to the custodian of the Rule 144A Global Note who will in turn deliver such book entry interests in the Notes free of payment to the relevant account of the DTC participant and (b) instruct the Registrar to (i) decrease the amount of Notes registered in the name of the nominee of the common depositary for Euroclear and Clearstream, Luxembourg and evidenced by a Regulation S Global Note and (ii) increase the amount of Notes registered in the name of Cede & Co. and evidenced by a Rule 144A Global Note.

Although Euroclear, Clearstream, Luxembourg and DTC have agreed to the foregoing procedures in order to facilitate transfers of beneficial interest in Global Notes among participants and accountholders of Euroclear, Clearstream, Luxembourg and DTC, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued at any time. None of the Issuer, the Trustee or any Agent will have the responsibility for the performance by Euroclear, Clearstream, Luxembourg or DTC or their respective Direct or Indirect Participants of their respective obligations under the rules and procedures governing their operations.

Pre issue Trades Settlement

It is expected that the delivery of Notes will be made against payment therefor on the relevant closing date, which could be more than three business days following the date of pricing. Under Rule 15c6-1 under the Exchange Act, trades in the U.S. secondary market generally are required to settle within one business day (T+1), unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade Notes in the U.S. on the date of pricing or the next succeeding business days until one day prior to the relevant closing date will be required, by virtue of the fact that the Notes initially will settle beyond T+1, to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement. Settlement procedures in other countries will vary. Purchasers of Notes may be affected by such local settlement practices, and purchasers of Notes between the relevant date of pricing and the relevant closing date should consult their own advisers.

Redenomination

If the Notes are redenominated pursuant to Condition 22, then following redenomination if Definitive Notes are required to be issued, they shall be issued at the expense of the Issuer in denominations in excess of €100,000 as determined by the Principal Paying and Transfer Agent and such other denominations as the Principal Paying and Transfer Agent shall determine and notify to the Noteholders.

TAXATION

The following is a general description of certain material tax considerations relating to the Notes. It does not purport to be a complete analysis of all tax considerations relating to the Notes. Prospective purchasers of Notes should consult their own tax advisers as to which countries' tax laws could be relevant to acquiring, holding and disposing of Notes and receiving payments of interest, principal and/or other amounts under the Notes and the consequences of such actions under the tax laws of those countries. This summary is based upon the law as in effect on the date of this Base Offering Memorandum and is subject to any change in law that may take effect after such date.

United States Federal Income Taxation

*The following is a summary of certain U.S. federal income tax consequences of the acquisition, ownership, disposition and retirement of Notes by a holder thereof. This summary does not address the U.S. federal income tax consequences of every type of Note which may be issued under the Programme, and additional or modified disclosure concerning certain U.S. federal income tax consequences relevant to such type of Note may be provided, as appropriate. This summary only applies to holders that acquire Notes as part of the initial distribution at their initial offering price and that hold the Notes as capital assets for U.S. federal income tax purposes. This overview does not discuss all aspects of U.S. federal income taxation that may be applicable to all members of a class of holders subject to special treatment under United States federal income taxation (except as may be specifically set forth below), such as financial institutions, insurance companies, real estate investment trusts, regulated investment companies, grantor trusts, tax-exempt organisations, dealers or traders in securities or currencies, persons that mark their securities to market, holders that will hold Notes through a partnership or other pass through entity, holders that will hold a Note as part of a position in a straddle or as part of a hedging, conversion or integrated transaction for U.S. federal income tax purposes, controlled foreign corporations, passive foreign investment companies, accrual basis tax payers subject to specific rules for the taxable year of inclusion under Section 451(b) of the Internal Revenue Code of 1986, as amended (the "**Code**"), U.S. Holders (as defined below) that have a functional currency other than the U.S. Dollar, U.S. Holders holding Notes in connection with a trade or business conducted outside the United States or certain expatriates and long-term residents of the United States. Moreover, this summary does not address the U.S. federal estate and gift tax, the "net investment income" tax imposed under Section 1411 of the Code or alternative minimum tax consequences of the acquisition, ownership or retirement of Notes and does not include any description of the tax laws of any non-U.S., U.S. State or local governments.*

This summary is based on the Code, existing and proposed U.S. Treasury Regulations, administrative pronouncements and judicial decisions, each as available and in effect on the date hereof. All of the foregoing are subject to change, possibly with retroactive effect, or differing interpretations which could affect the tax consequences described herein. Any special U.S. federal income tax considerations relevant to a particular issue of the Notes will be provided in a supplement to this Base Offering Memorandum.

For purposes of this description, a "**U.S. Holder**" is a beneficial owner of the Notes who for U.S. federal income tax purposes is (i) a citizen or resident of the United States; (ii) a corporation (or entity treated as a corporation for U.S. federal income tax purposes) created or organised in or under the laws of the United States or any state thereof, including the District of Columbia; (iii) an estate the income of which is subject to U.S. federal income taxation regardless of its source; or (iv) a trust (1) that validly elects to be treated as a "United States person" for U.S. federal income tax purposes ("**U.S. person**") or (2)(a) the administration over which a U.S. court can exercise primary supervision and (b) all of the substantial decisions of which one or more U.S. persons have the authority to control.

If a partnership (or any other entity or arrangement treated as a partnership) for U.S. federal income tax purposes holds Notes, the tax treatment of the partnership and a partner in such partnership generally will depend on the status of the partner and the activities of the partnership. Such partner or partnership should consult its own tax advisor concerning the U.S. federal income tax consequences of the acquisition, ownership or disposition of Notes by the partnership.

A Non-U.S. Holder is a beneficial owner of Notes that is neither a U.S. Holder nor a partnership (or any other entity treated as a partnership) for U.S. federal income tax purposes nor an entity that is disregarded for U.S. federal income tax purposes and is owned by a U.S. person.

THE SUMMARY OF U.S. FEDERAL INCOME TAX CONSEQUENCES SET OUT BELOW IS FOR GENERAL INFORMATION ONLY. PROSPECTIVE PURCHASERS SHOULD CONSULT THEIR OWN TAX ADVISORS AS TO THE PARTICULAR TAX CONSEQUENCES TO THEM OF OWNING THE NOTES, INCLUDING THE APPLICABILITY AND EFFECT OF STATE, LOCAL, NON-U.S. AND OTHER TAX LAWS AND POSSIBLE CHANGES IN TAX LAW.

U.S. Holders

Classification of the Notes

The determination of whether an obligation represents debt, equity or some other instrument or interest is based on all the relevant facts and circumstances. There may be no statutory, judicial or administrative authority directly addressing the appropriate characterisation of the Notes, and no rulings have been or will be sought from the Internal Revenue Service (“**IRS**”) with respect to the appropriate characterisation of the Notes for U.S. federal income tax purposes. To the extent it is required to take a position, the Issuer intends to take the position that the Notes are characterised as debt for U.S. federal income tax purposes. Additional alternative characterisations may also be possible. Further possible characterisations, if applicable, may be discussed in any supplemental offering memorandum or series memorandum. Prospective purchasers of the Notes should consult their own tax advisers about the consequences in the event the Notes are treated as any other characterisation for U.S. federal income tax purposes and the consequences of acquiring, owning or disposing of Notes. The remainder of this discussion assumes that the Notes will be treated as debt for U.S. federal income tax purposes.

Interest

Except as set forth below, interest paid on a Note, whether payable in U.S. Dollars or a currency other than U.S. Dollars (a “**foreign currency**”), including any additional amounts, will be includible in a U.S. Holder’s gross income as ordinary interest income at the time it is received or accrued, in accordance with the U.S. Holder’s usual method of accounting for U.S. federal income tax purposes, reduced by the allocable amount of amortisable bond premium, subject to the discussion below. In addition, interest and original issue discount (“**OID**”), if any, accrued with respect to the Notes (as described below under “— *Original Issue Discount*”) on the Notes will generally be treated as income from sources outside the United States for U.S. federal income tax purposes. For purposes of calculating the U.S. Holder’s foreign tax credit limitation, interest on the Notes should generally constitute “passive category income” or, in the case of certain U.S. Holders, “general category income”. The U.S. federal income tax rules relating to foreign tax credits and limitations thereof are complex and may vary depending on the facts and circumstances of each U.S. Holder. Accordingly, U.S. Holders should consult their own tax advisers regarding the availability of a foreign tax credit for foreign taxes, if any, withheld under such U.S. Holder’s particular situation.

Pre-Issuance Accrued Interest

If a portion of the price paid for a Note is attributable to an amount of interest accrued prior to the date the Note is issued (the “**pre-issuance accrued interest**”), a portion of the first interest payment on the Notes equal to the amount of the pre-issuance accrued interest may be treated as a non-taxable return of the pre-issuance accrued interest. This discussion assumes that the first interest payment on Notes with pre-issuance accrued interest will be so treated, and references to interest in the remainder of this discussion exclude pre-issuance accrued interest. This discussion assumes that in determining the issue price of a Note, there will be excluded an amount equal to the pre-issuance accrued interest. Pre-issuance accrued interest not included in income should not form part of any amortisable bond premium (as described below under “— *Amortisable Bond Premium*”). A U.S. Holder’s tax basis in a Note will be reduced by any non-taxable return of pre-issuance accrued interest. This discussion does not otherwise address the treatment of pre-issuance accrued interest, and U.S. Holders should consult their tax advisers concerning the U.S. federal income tax treatment of pre-issuance accrued interest, including the potential recognition of foreign currency exchange gain or loss upon receipt of otherwise non-taxable return of pre-issuance accrued interest with respect to Foreign Currency Notes.

Foreign Currency Denominated Qualified Stated Interest

Except as set forth below, if any payment of “qualified stated interest” (as defined below), including any additional amounts, is denominated in, or determined by reference to, a foreign currency (a “**Foreign Currency Note**”), the amount of income recognised by a U.S. Holder will be the U.S. Dollar value of the foreign currency, including the amount of any applicable withholding tax thereon, regardless of whether the foreign currency is converted

into U.S. Dollars. Generally, a U.S. Holder that uses the cash method of tax accounting will determine such U.S. Dollar value using the spot rate of exchange on the date of receipt. Generally, a U.S. Holder that uses the accrual method of tax accounting will determine the U.S. Dollar value of accrued interest income using the average rate of exchange for the accrual period (or, in the case of an accrual period that spans two taxable years of the U.S. Holder, the part of the period within the applicable taxable year) or, at the U.S. Holder's election, at the spot rate of exchange on the last day of the accrual period (or, in the case of an accrual period that spans two taxable years of the U.S. Holder, the last day of the period within the applicable taxable year) or the spot rate on the date of receipt, if that date is within five business days of the last day of the accrual period. Any such election will apply to all debt instruments held by the U.S. Holder at the beginning of the first taxable year to which the election applies or thereafter acquired by the U.S. Holder, and will be irrevocable without the consent of the IRS. A U.S. Holder that uses the accrual method of accounting for tax purposes will recognize U.S. source foreign currency gain or loss on the receipt of an interest payment if the exchange rate in effect on the date of payment is received differs from the rate applicable to an accrual of that interest, regardless of whether the payment is converted to U.S. Dollars at such time. This foreign currency gain or loss will be treated as ordinary income or loss, but generally will not be treated as an adjustment to interest income received on the debt security.

Original Issue Discount

U.S. Holders of Notes issued with OID, including Zero Coupon Notes, with a term of over one year (an “**Original Issue Discount Note**”), will be subject to special tax accounting rules, as described in greater detail below. Additional rules applicable to Original Issue Discount Notes that are denominated in or determined by reference to a currency other than the U.S. Dollar are described under Foreign Currency Discount Notes below.

The following discussion does not address the application of the U.S. Treasury Regulations governing OID to, or address the U.S. federal income tax consequences of, an investment in Notes that are contingent payment debt instruments. In the event the Issuer issues contingent payment debt instruments, the relevant supplemental offering memorandum will describe certain U.S. federal income tax consequences thereof.

For U.S. federal income tax purposes, a Note (including a Zero Coupon Note), other than a Note with a term of one year or less (a “**Short Term Note**”), will be treated as issued with OID if the excess of the Note's stated redemption price at maturity over its issue price equals or exceeds a *de minimis* amount (0.25 per cent. of the Note's stated redemption price at maturity multiplied by the number of complete years to its maturity (or, in the case of a Note that provides for payments other than qualified stated interest before maturity, its “weighted average maturity”). A Note's “weighted average maturity” is the sum of the following amounts determined for each payment on a Note (other than a payment of qualified stated interest): (i) the number of complete years from the issue date until the payment is made multiplied by (ii) a fraction, the numerator of which is the amount of the payment and the denominator of which is the Note's stated redemption price at maturity. The “issue price” of each Note in a particular offering will be the first price at which a substantial amount of that particular offering is sold (other than to an underwriter, broker, agent or wholesaler). The “stated redemption price at maturity” of a Note is the total of all payments provided by the Note that are not payments of “qualified stated interest”. The term “qualified stated interest” means stated interest that is unconditionally payable in cash or in property (other than debt instruments of the Issuer) at least annually at a single fixed rate or a variable rate (in the circumstances described below under “— *Variable Rate Debt Instruments*”). Interest is payable at a single fixed rate only if the rate appropriately takes into account the length of the interval between payments. Notice will be given if it is determined that a particular Note will bear interest that is not qualified stated interest. In the case of a Note issued with *de minimis* OID, a U.S. Holder must include such *de minimis* OID in income as stated principal payments on the Note are made, unless such U.S. Holder makes the election described below under “— *Election to Treat All Interest as Original Issue Discount*”. The amount of such includible income with respect to each principal payment will equal the product of the total amount of the Note's *de minimis* OID and a fraction, the numerator of which is the amount of the principal payment made and the denominator of which is the stated principal amount of the Note.

U.S. Holders of Original Issue Discount Notes with a maturity upon issuance of more than one year must, in general, include OID in income in advance of the receipt of some or all of the related cash payments. The amount of OID includible in income by the initial U.S. Holder of an Original Issue Discount Note is the sum of the “daily portions” of OID with respect to the Note for each day during the taxable year or portion of the taxable year in which such U.S. Holder held such Note (“**accrued OID**”). The daily portion is determined by allocating to each day in any “accrual period” a *pro rata* portion of the OID allocable to that accrual period. The “accrual period” for an Original Issue Discount Note may be of any length and may vary in length over the term of the Note,

provided that each accrual period is no longer than one year and each scheduled payment of principal or interest occurs on the first day or the final day of an accrual period. The amount of OID allocable to any accrual period is an amount equal to the excess, if any, of (a) the product of the Note's adjusted issue price at the beginning of such accrual period and its yield to maturity (determined on the basis of compounding at the close of each accrual period and properly adjusted for the length of the accrual period) over (b) the sum of any qualified stated interest allocable to the accrual period. OID allocable to a final accrual period is the difference between the amount payable at maturity (other than a payment of qualified stated interest) and the adjusted issue price at the beginning of the final accrual period. Special rules will apply for calculating OID for an initial short accrual period. The "yield to maturity" of a Note is the discount rate that causes the present value of all payments on the Note as of its original issue date to equal the issue price of such Note. The "adjusted issue price" of a Note at the beginning of any accrual period is equal to its issue price increased by the accrued OID for each prior accrual period (determined without regard to the amortisation of any acquisition or bond premium, as described below) and reduced by any payments made on such Note (other than qualified stated interest) on or before the first day of the accrual period. Under these rules, a U.S. Holder will generally have to include in income increasingly greater amounts of OID in successive accrual periods.

Certain of the Notes may be redeemed prior to their maturity at the Issuer's option and/or at the option of the holder. Original Issue Discount Notes containing such features may be subject to rules that differ from the general rules discussed herein. Persons considering the purchase of Original Issue Discount Notes with such features should carefully examine the relevant Pricing Supplement and should consult their own tax advisors with respect to such features since the tax consequences with respect to OID will depend, in part, on the particular terms and features of the Notes.

In the case of an Original Issue Discount Note that is a Floating Rate Note (as described below under "*— Variable Rate Debt Instruments*"), both the "yield to maturity" and "qualified stated interest" will be determined solely for purposes of calculating the accrual of OID as though the Note will bear interest in all periods at a fixed rate generally equal to the rate that would be applicable to interest payments on the Note on its date of issue or, in the case of certain Floating Rate Notes, the rate that reflects the yield to maturity that is reasonably expected for the Note. Additional rules may apply if interest on a Floating Rate Note is based on more than one interest index or if the principal amount of the Note is indexed in any manner. Persons considering the purchase of Floating Rate Notes should carefully examine the relevant Pricing Supplement and should consult their own tax advisors regarding the U.S. federal income tax consequences of the holding and disposition of such Notes.

Election to Treat All Interest as Original Issue Discount

U.S. Holders may elect to treat all interest on any Note as OID and calculate the amount includible in gross income under the constant yield method described above. For the purposes of this election, interest includes stated interest, acquisition discount, OID, *de minimis* OID and unstated interest, as adjusted by any amortisable bond premium or acquisition premium. This election generally will apply only to the Note with respect to which it is made and may not be revoked without the consent of the IRS. U.S. Holders should consult their own tax advisors about this election.

Acquisition Premium

A U.S. Holder that purchases an Original Issue Discount Note for an amount that is greater than its adjusted issue price but less than or equal to the sum of all amounts payable on the Note after the purchase date, other than payments of qualified stated interest, will be considered to have purchased the Original Issue Discount Note at an "acquisition premium". If the U.S. Holder does not make the election described above under "Election to Treat All Interest as Original Issue Discount," under the acquisition premium rules, the daily portions of OID which the U.S. Holder must include in its gross income with respect to such Original Issue Discount Note will be reduced by an amount equal to the daily portion of the OID for such day multiplied by the acquisition premium fraction. The numerator of the "acquisition premium fraction" is the excess of the U.S. Holder's adjusted basis in the Note immediately after its purchase over the adjusted issue price of the Note, and the denominator is the sum of the daily portions of OID for such Note for all days after the date of purchase and ending on the stated maturity date (i.e., the total OID remaining on the Note).

If the Note is denominated in, or determined by reference to, a foreign currency, the acquisition premium is computed in units of the foreign currency and the amortisable bond premium will reduce OID in units of the foreign currency. Gain or loss recognised that is attributable to changes in exchange rates between the time the acquisition premium offsets OID and the time of the acquisition of the Note is generally taxable as ordinary income or loss.

Amortisable Bond Premium

A U.S. Holder that purchases Notes for an amount in excess of its principal amount (or, in the case of an Original Issue Discount Note, in excess of the sum of all amounts payable on the Note after the acquisition date (other than payments of qualified stated interest)), may elect to treat the excess as “amortisable bond premium”. If a U.S. Holder makes this election, it will reduce the amount required to be included in income for each accrual period with respect to interest on the Note by the amount of amortisable bond premium allocable, based on the Note’s yield to maturity, to that accrual period. Special rules may limit the amortisation of bond premium with respect to Notes subject to early redemption.

If the amortisable bond premium allocable to an accrual period exceeds interest income from the Note for such accrual period, such excess is first allowed as a deduction to the extent of interest included in income in respect of the Note in previous accrual periods and is then carried forward to the next accrual period. If the amortisable bond premium allocable and carried forward to the accrual period in which the Note is sold, retired or otherwise disposed of exceeds interest income for such accrual period, a U.S. Holder would be allowed an ordinary deduction equal to such excess.

If the Note is denominated in, or determined by reference to, a foreign currency, the amortisable bond premium is computed in units of the foreign currency and the amortisable bond premium will reduce interest income in units of the foreign currency. Gain or loss recognised that is attributable to changes in exchange rates between the time the amortised bond premium offsets interest income and the time of the acquisition of the Note is generally taxable as ordinary income or loss. If a U.S. Holder makes an election to amortise the bond premium, it will apply to all debt instruments, other than debt instruments the interest on which is excludible from gross income, that the U.S. Holder owns at the beginning of the first taxable year to which the election applies, and to all debt instruments that the U.S. Holder thereafter acquires, and the U.S. Holder may not revoke it without the consent of the IRS.

Variable Rate Debt Instruments

Generally, a Note that provides for interest at a variable rate (a “**Floating Rate Note**”) will qualify as a “variable rate debt instrument” under U.S. Treasury Regulations governing the accrual of OID if: (a) its issue price does not exceed the total non-contingent principal payments due under the Floating Rate Note by more than an amount equal to the lesser of (i) 0.015 multiplied by the product of the total non-contingent principal payments and the number of complete years to maturity from the issue date or (ii) 15 per cent. of the total non-contingent principal payments; (b) it does not provide for stated interest other than stated interest that pays or compounds at least annually at (i) one or more qualified floating rates, (ii) a single fixed rate and one or more qualified floating rates, (iii) a single objective rate, or (iv) a single fixed rate and a single objective rate that is a qualified inverse floating rate; and (c) each qualified floating rate or objective rate taken into account in stated interest that is in effect at any time during the term of the Note is set at a current value of that rate (i.e., the value of the rate on any day that is no earlier than three months prior to the first day on which the value is in effect and no later than one year following that first day).

A “qualified floating rate” is any variable rate where: (a) variations in the value of such rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds in the currency in which the Floating Rate Notes are denominated; or (b) the rate is equal to such a rate multiplied by either a fixed multiple that is greater than 0.65 but not more than 1.35, or a fixed multiple greater than 0.65 but not more than 1.35, increased or decreased by a fixed rate. In addition, two or more qualified floating rates that can reasonably be expected to have approximately the same values throughout the term of the Floating Rate Notes together will constitute a single qualified floating rate. Two or more qualified floating rates will be presumed to meet the requirements of the previous sentence if the values of all rates on the issue date are within 25 basis points of each other. A variable rate is not a qualified floating rate if it is subject to certain restrictions (including caps, floors, governors, or other similar restrictions) unless such restrictions are fixed throughout the term of the Note or are not reasonably expected to significantly affect the yield on the Note.

An “objective rate” is a rate that: (a) is not a qualified floating rate; and (b) is determined using a single fixed formula that is based on objective financial or economic information that is not within the control of or unique to the circumstances of the Issuer or a related party. Despite the foregoing, a variable rate of interest on Floating Rate Notes will not constitute an objective rate if it is reasonably expected that the average value of such rate during the first half of the Floating Rate Notes’ term will be either significantly less than or significantly greater than the average value of the rate during the final half of the Floating Rate Notes’ term. A “qualified inverse floating rate,” is any objective rate where such rate is equal to a fixed rate minus a qualified floating rate, and the

variations in the rate can reasonably be expected to inversely reflect contemporaneous variations in the cost of newly borrowed funds in the currency in which the Floating Rate Notes are denominated.

Generally, if a Floating Rate Note provides for stated interest (payable unconditionally at least annually) at a fixed rate for an initial period of one year or less followed by a variable rate that is either a single qualified floating rate or a single objective rate, and the value of the variable rate on the Floating Rate Notes' issue date is intended to approximate the fixed rate, then the fixed rate and the variable rate together will constitute either a single qualified floating rate or objective rate, as the case may be. If the Notes pay interest at a single objective rate or a single qualified floating rate, the amount of OID, if any, is determined by using a fixed rate equal to, in the case of a qualified floating rate or qualified inverse floating rate, the value as of the issue date, of the qualified floating rate or qualified inverse floating rate, or, for any other objective rate, a fixed rate that reflects the yield reasonably expected for such Floating Rate Note.

If a Floating Rate Note that is a variable rate debt instrument does not provide for stated interest at a single qualified floating rate or single objective rate, or at a single fixed rate (other than at a single fixed rate for an initial period), the amount of qualified stated interest and the amount and accrual of OID on the Note are generally determined by: (a) determining a fixed rate substitute for each variable rate provided under the Floating Rate Note (generally, the value of each variable rate as of the issue date or, in the case of an objective rate that is not a qualified inverse floating rate, a rate that reflects the yield that is reasonably expected for the Note); (b) constructing the equivalent fixed rate debt instrument (using the fixed rate substitutes described above); (c) determining the amount of qualified stated interest and OID with respect to the equivalent fixed rate debt instrument (by applying the general OID rules as described above under "Original Issue Discount"); and (d) making the appropriate adjustment for actual variable rates during the applicable accrual period.

If a Floating Rate Note provides for stated interest either at one or more qualified floating rates or at a qualified inverse floating rate and in addition provides for stated interest at a single fixed rate (other than a single fixed rate for an initial period), a U.S. Holder generally must determine the amount of interest and OID accruals by using the method described in the preceding paragraph with the modification that the Floating Rate Note is treated, for purposes of the first three steps of the determination, as if it provided for a qualified floating rate (or qualified inverse floating rate, if the Note provides for a qualified inverse floating rate) rather than the fixed rate. The qualified floating rate (or qualified inverse floating rate) replacing the fixed rate must be such that the fair market value of the Note as of the issue date would be approximately the same as the fair market value of an otherwise identical debt instrument that provides for a qualified floating rate (or qualified inverse floating rate) rather than a fixed rate.

A Floating Rate Note that does not qualify as a variable rate debt instrument will be treated as a contingent payment debt obligation. Certain consequences of the treatment of such a Note for U.S. federal income tax purposes will be more fully described in the relevant Pricing Supplement.

Short Term Notes

In the case of Short Term Notes, all payments (including all stated interest) will be included in the stated redemption price at maturity and, thus, U.S. Holders generally will be taxable on the discount in lieu of any stated interest. The discount will be equal to the excess of the stated redemption price at maturity over the issue price of a Short Term Note, unless the U.S. Holder elects to compute this discount using tax basis instead of issue price. Such election will apply to all obligations with a maturity of one year or less acquired by the U.S. Holder on or after the first day of the first taxable year to which the election applies, and may not be revoked without the consent of the IRS. Under the OID regulations, in general, individuals and certain other cash method U.S. Holders of a Short Term Note are not required to include accrued discount in their income currently unless the U.S. Holder elects to do so (but may be required to include any stated interest in income as it is received). U.S. Holders that report income for U.S. federal income tax purposes on the accrual method and certain other U.S. Holders are required to accrue discount on such Short Term Notes (as ordinary income) on a straight-line basis, unless an election is made to accrue the discount according to a constant yield method based on daily compounding. In the case of a U.S. Holder that is not required, and does not elect, to include discount in income currently, any gain realised on the sale, exchange or retirement of the Short Term Note will generally be ordinary income to the extent of the discount accrued on a straight-line basis (unless an election is made to accrue the OID under the constant yield method) through the date of sale, exchange or retirement. In addition, a U.S. Holder that does not elect to include currently accrued discount in income may be required to defer deductions for a portion of the U.S. Holder's interest expense with respect to any indebtedness incurred or continued to purchase or carry such Notes in an amount not exceeding the deferred income until the deferred income is realised.

Market Discount

A Note, other than a Short Term Note, generally will be treated as purchased at a market discount (a “**Market Discount Note**”) if the Note’s stated redemption price at maturity or, in the case of an Original Discount Note, the Note’s “revised issue price”, exceeds the amount for which the U.S. Holder purchased the Note by at least 0.25% of the Note’s stated redemption price at maturity or revised issue price, respectively, multiplied by the number of complete years to the Note’s maturity. If this excess is not sufficient to cause the Note to be a Market Discount Note, then the excess constitutes “*de minimis* market discount”. For this purpose, the “revised issue price” of a Note generally equals its issue price, increased by the amount of any OID that has accrued on the Note and decreased by the amount of any payments previously made on the Note that were not qualified stated interest payments. Additionally, for this purpose the “stated redemption price at maturity” (as defined above) is decreased by the amount of any payments previously made on the Note that were not qualified stated interest.

Any gain recognised on the sale, retirement or other disposition of a Market Discount Note (including any payment on a Note that is not qualified stated interest) generally will be treated as ordinary income to the extent of the accrued market discount on the Note. Alternatively, a U.S. Holder of a Market Discount Note may avoid such treatment by electing to include market discount in income currently over the life of the Note. This election applies to all debt instruments with market discount acquired by the electing U.S. Holder on or after the first day of the first taxable year for which the election is made. This election may not be revoked without the consent of the IRS.

A U.S. Holder of a Market Discount Note that does not elect to include market discount in income currently may be required to defer deductions for interest on borrowings incurred to purchase or carry a Market Discount Note. Such interest is deductible when paid or incurred to the extent of income from the Note for the year. If the interest expense exceeds such income, such excess is currently deductible only to the extent that such excess exceeds the portion of the market discount allocable to the days during the taxable year on which such Note was held by the U.S. Holder.

Market discount will accrue on a straight-line basis unless the U.S. Holder elects to accrue the market discount on a constant-yield method. This election applies only to the Market Discount Note with respect to which it is made and is irrevocable.

Market discount on a Market Discount Note that is denominated in, or determined by reference to, a foreign currency, will be accrued in the foreign currency. If the U.S. Holder elects to include market discount in income currently, the accrued market discount will be translated into U.S. dollars at the average exchange rate for the accrual period (or portion thereof within the U.S. Holder’s taxable year). Upon the receipt of an amount attributable to accrued market discount, the U.S. Holder may recognise U.S. source exchange gain or loss (which will be taxable as ordinary income or loss) determined in the same manner as for accrued interest or OID. A U.S. Holder that does not elect to include market discount in income currently will recognise, upon the sale or retirement of the Market Discount Note, the U.S. dollar value of the amount accrued, calculated at the spot rate on that date, and no part of this accrued market discount will be treated as exchange gain or loss.

Foreign Currency Discount Notes

OID for any accrual period on an Original Issue Discount Note that is denominated in, or determined by reference to, a foreign currency will be determined for any accrual period in the foreign currency and then translated into U.S. Dollars in the same manner as stated interest accrued by an accrual basis U.S. Holder, as described under “Foreign Currency Denominated Qualified Stated Interest” above. Upon receipt of an amount attributable to OID (whether in connection with a payment of interest or the sale or retirement of a Note), a U.S. Holder will recognise foreign currency gain or loss (taxable as ordinary income or loss) equal to the difference between the amount received (translated into U.S. Dollars at the spot rate on the date of receipt) and the amount previously accrued, regardless of whether the payment is in fact converted into U.S. Dollars.

Sale, Exchange or Retirement

A U.S. Holder’s adjusted tax basis in a Note generally will be its U.S. Dollar cost (as defined herein) increased by the amount of any OID and any market discount included in the U.S. Holder’s income with respect to the Note and reduced by (i) the amount of any payments that are not qualified stated interest payments, and (ii) the amount of any amortisable bond premium applied to reduce interest on the Note. The U.S. Dollar cost of a Note purchased with a foreign currency generally will be the U.S. Dollar value of the purchase price on the date of purchase or, in the case of Notes traded on an established securities market, as defined in the applicable U.S. Treasury

Regulations, that are purchased by a cash basis U.S. Holder (or an accrual basis U.S. Holder that so elects), on the settlement date for the purchase.

A U.S. Holder generally will recognise gain or loss on the sale, exchange or retirement of a Note equal to the difference between the amount realised on the sale, exchange or retirement and the U.S. Holder's adjusted tax basis of the Note. The amount realised does not include the amount attributable to accrued but unpaid interest or OID, which will be taxable as interest income to the extent not previously included in income. The amount realised on a sale, exchange or retirement for an amount in foreign currency will be the U.S. Dollar value of such amount on the date of sale or retirement or, in the case of Notes traded on an established securities market, within the meaning of the applicable U.S. Treasury Regulations, sold by a cash basis U.S. Holder (or an accrual basis U.S. Holder that so elects), on the settlement date for the sale.

Except with respect to (i) gains or losses attributable to changes in exchange rates (as described in the next paragraph), (ii) gain on the disposition of a Short Term Note (see "*Short Term Notes*"), and (iii) gain attributable to market discount (see "*Market Discount*") gain or loss recognised on the sale, exchange or retirement of a Note will be capital gain or loss and will be long-term capital gain or loss if the Note was held for more than one year at the time of such sale. The deductibility of capital losses is subject to limitation. Gain or loss realised by a U.S. Holder on the sale, exchange or retirement of a Note generally will be U.S. source income or loss. Prospective investors should consult their tax advisors as to the foreign tax credit implications of such sale, exchange or retirement of Notes.

Gain or loss recognised by a U.S. Holder on the sale, exchange or retirement of a Note that is attributable to changes in exchange rates will be treated as U.S. source ordinary income or loss; however, exchange gain or loss is taken into account only to the extent of total gain or loss realised on the transaction (including any exchange gain or loss with respect to the receipt of accrued but unpaid interest (including OID)). The rules governing debt instruments denominated in foreign currency are complex and prospective investors should consult their own advisers regarding the application of the rules in their particular circumstances.

Reportable Transaction Reporting

Under certain U.S. Treasury Regulations, U.S. Holders that participate in "reportable transactions" (as defined in the regulations) must attach to their U.S. federal income tax returns a disclosure statement on IRS Form 8886. Under the relevant rules, if the Notes are denominated in a foreign currency, a U.S. Holder may be required to treat foreign currency exchange loss from the Notes as a reportable transaction if this loss exceeds the relevant threshold in the regulations (U.S.\$50,000 in a single taxable year, if the U.S. Holder is an individual or trust, or higher amount for other non-individual U.S. Holders), and to disclose its investment by filing IRS Form 8886 with the IRS. A penalty of up to U.S. \$10,000 in the case of a natural person and U.S.\$50,000 in all other cases may be imposed in any taxable year on any taxpayer that fails to timely file an information return with the IRS with respect to a transaction resulting in a loss that is treated as a reportable transaction. U.S. Holders should consult their own tax advisors as to the possible obligation to file IRS Form 8886 with respect to the ownership or disposition of the Notes, or any related transaction, including without limitation, the disposition of any foreign currency received as interest or as proceeds from the sale, exchange or retirement of the Notes.

Foreign Asset Reporting

U.S. Holders who are individuals and certain specified entities are required to report information relating to an interest in the Notes, subject to certain exceptions (including an exception for Notes held in accounts maintained by financial institutions, in which case the accounts may be reportable if maintained by a non-U.S. financial institutions). U.S. Holders are urged to consult their tax advisors regarding their information reporting obligations, if any, with respect to their ownership and disposition of the Notes.

Non-U.S. Holders

Under U.S. federal income tax law currently in effect, subject to the discussion below under the caption "*U.S. Backup Withholding and Information Reporting*," payments of interest (including OID) on a Note to a Non-U.S. Holder generally will not be subject to U.S. federal income tax unless the income is effectively connected with the conduct by such Non-U.S. Holder of a trade or business in the United States.

Subject to the discussion below under the caption "*U.S. Backup Withholding and Information Reporting*," any gain realised by a Non-U.S. Holder upon the sale, exchange or retirement of a Note generally will not be subject

to U.S. federal income tax, unless (i) the gain is effectively connected with the conduct by such Non-U.S. Holder of a trade or business in the United States or (ii) in the case of any gain realised by an individual Non-U.S. Holder, such Non-U.S. Holder is present in the United States for 183 days or more in the taxable year of the sale, exchange or retirement and certain other conditions are met.

U.S. Backup Withholding and Information Reporting

Backup withholding and information reporting requirements apply to certain payments of principal of, and interest and accruals of OID on, an obligation and to proceeds of the sale or redemption of an obligation, to certain non-corporate holders of Notes that are U.S. persons. Information reporting generally will apply to payments of principal of, and interest and accruals of OID on, an obligation, and to proceeds from the sale or redemption of, an obligation made within the United States, or by a U.S. payor or U.S. middleman (including certain U.S.-connected payors or middleman), to a holder (other than an exempt recipient, including a corporation, a payee that is not a U.S. person that provides an appropriate certification and certain other persons). The payor will be required to withhold backup withholding on payments made within the United States, including payments of accrued OID, or by a U.S. payor or U.S. middleman, on a Note to a holder of a Note that is a U.S. person, other than an exempt recipient, such as a corporation, if the holder fails to furnish its correct taxpayer identification number or otherwise fails to comply with, or establish an exemption from, the backup withholding requirements. Payments within the United States, or by a U.S. payor or U.S. middleman, of principal and interest to a holder of a Note that is not a U.S. person will not be subject to backup withholding tax and information reporting requirements if an appropriate certification is provided by the holder to the payor and the payor does not have actual knowledge or a reason to know that the certificate is incorrect. The backup withholding tax rate is currently 24 per cent.

Backup withholding is not an additional tax. Holders generally will be entitled to credit any amounts withheld under the backup withholding rules against such holder's U.S. federal income tax liability provided the required information is furnished to the IRS in a timely manner.

Certain ERISA and Code Considerations

Subject to the following discussion, the Notes may be acquired by pension, profit-sharing or other employee benefit plans that are subject to Title I of the United States Employee Retirement Income Security Act of 1974, as amended ("**ERISA**"), individual retirement accounts, ("**Code**") and other plans that are subject to Section 4975 of the U.S. Internal Revenue Code of 1986, as amended (each of the foregoing, "**Plans**") and entities deemed to hold the assets of Plans (collectively with Plans, each a "**Benefit Plan**"). Section 406 of ERISA and Section 4975 of the Code, which are among the various provisions of ERISA and the Code applicable to Benefit Plans, prohibit a Benefit Plan from engaging in certain transactions with persons that are "parties in interest" under ERISA or "disqualified persons" under the Code with respect to such Benefit Plan. A violation of these "prohibited transaction" rules may result in an excise tax or other penalties and liabilities under ERISA and the Code for such persons or the fiduciaries of the Benefit Plan.

A regulation promulgated by the United States Department of Labor ("**DOL**") describes when the assets of an entity may be treated as the assets of Plans that invest in such entity. Under 29 C.F.R. Section 2510.3-101 of the Regulations issued by the DOL, as modified by Section 3(42) of ERISA (the "**Plan Asset Regulation**"), when a Plan acquires an equity interest in an entity, the Plan's assets include the interest in the entity and, unless one of certain exceptions in the Plan Asset Regulation applies, an undivided interest in each of the underlying assets of the entity in which the investment is made. The Plan Asset Regulation defines an "equity interest" as any interest in an entity other than an instrument that is treated as indebtedness under applicable local law and which has no substantial equity features. While there is no clear guidance as to the meaning of "equity interest" for purposes of ERISA, to the extent it is required to take a position, the Issuer intends to take the position that the Notes are characterised as debt for U.S. federal income tax purposes (see "*Taxation — United States Federal Income Taxation*"). However, no assurance can be given as to the treatment of the Notes as indebtedness for purposes of ERISA and the Plan Asset Regulation.

The acquisition or holding of Notes by or on behalf of a Benefit Plan could be considered to give rise to a prohibited transaction if the Issuer, the Trustee, the Dealers, the Registrar or any of their respective affiliates is or becomes a party in interest or a disqualified person with respect to such Benefit Plan. Certain exemptions from the prohibited transaction rules could be applicable to the purchase and holding of Notes by a Benefit Plan depending on the type and circumstances of the plan fiduciary making the decision to acquire such Notes. Even

if the conditions specified in one or more exemptions are met, the scope of the relief provided by these exemptions might or might not cover all acts which might be construed as prohibited transactions. There can be no assurance that any exemption will be available with respect to any particular transaction involving the Notes and prospective purchasers that are Benefit Plans should consult with their own advisers regarding the applicability of any such exemption and the implications under ERISA, Section 4975 of the Code and other applicable laws of the acquisition and holding of Notes based on their specific circumstances.

This summary does not include a discussion of any laws that may apply to employee benefit plans that are not subject to ERISA or Section 4975 of the Code. Such plans (and entities in which they invest, as applicable) should consult their own professional advisors about any laws applicable thereto.

By acquiring a Note or any interest therein, each purchaser and transferee will be deemed to represent, warrant and covenant that either (i) it is not, and is not acquiring the Note or any interest therein with the assets of (and is not acting on behalf of) an entity or other person that is or will be, a Benefit Plan or any other plan subject to a law, regulation or rule that is substantially similar to Section 406 of ERISA or Section 4975 of the Code or (ii) the acquisition and holding of the Note or any interest therein is permitted by ERISA, the Code and other applicable law (to the extent applicable) and will not give rise to a non-exempt prohibited transaction under Section 406 of ERISA, Section 4975 of the Code or any substantially similar applicable law.

No information herein or provided in connection herewith by the Issuer, the Trustee, the Dealers, the Registrar or any of their respective affiliates (collectively, the “**Covered Parties**”) is providing, or shall be considered to be providing, advice on which any Benefit Plan may rely for any investment decision. The Covered Parties have not made, and are not making, a recommendation, have not provided, and are not providing, investment advice of any kind whatsoever (whether impartial or otherwise), and are not otherwise acting in a fiduciary capacity in connection with any Benefit Plan’s decision to purchase or hold Notes.

PRIOR TO MAKING AN INVESTMENT IN NOTES, PROSPECTIVE INVESTORS THAT ARE BENEFIT PLANS SHOULD CONSULT WITH THEIR LEGAL AND OTHER ADVISORS CONCERNING THE IMPACT OF ERISA AND THE CODE (AND, PARTICULARLY IN THE CASE OF NON-ERISA PLANS AND ARRANGEMENTS, ANY ADDITIONAL LEGAL CONSIDERATIONS), AS APPLICABLE. THE SALE OF NOTES TO A BENEFIT PLAN IS NOT A REPRESENTATION THAT THE NOTES ARE A SUITABLE INVESTMENT FOR BENEFIT PLANS GENERALLY OR ANY PARTICULAR BENEFIT PLAN OR THAT THE NOTES SATISFY ALL LEGAL REQUIREMENTS APPLICABLE TO BENEFIT PLANS GENERALLY OR ANY PARTICULAR BENEFIT PLAN.

Kazakhstan Taxation

Kazakhstan Tax Considerations

On 18 July 2025, the President of Kazakhstan signed Tax Code No. 214-VIII (the “**Tax Code**”) which came into force on 1 January 2026.

The following summary of certain Kazakhstan taxation matters is based on the Tax Code as of the date of this Base Offering Memorandum and is subject to any changes in the laws, interpretation and application thereof, while such changes could be made with retroactive effect. The following summary does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to acquire, hold or dispose of the Notes, and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities) may be subject to special rules.

Investors should consult their own professional advisers with respect to the tax consequences of their acquisition, holding and disposal of the Notes, including their eligibility for the benefits of double tax treaties, under the laws of their country of citizenship, residence, domicile or incorporation, and seek separate Kazakhstan tax advice, as necessary.

Subject to the foregoing, this section outlines the main Kazakhstan tax consequences of the acquisition, ownership and disposal of the Notes under the Tax Code. In general, Kazakhstan tax legislation with respect to the taxation of securities and financial instruments is not well developed and, in many cases, the exact scope of Kazakhstan tax compliance rules and enforcement mechanisms are unclear or subject to different interpretations.

Generally, Kazakhstan resident legal entities are subject to corporate income tax (“**CIT**”) and Kazakhstan resident individuals are subject to personal income tax (“**PIT**”) in accordance with the Tax Code, respectively, and

Kazakhstan non-resident legal entities with no permanent establishment and individuals with no fixed base in Kazakhstan are subject to withholding tax in accordance with the Tax Code.

As further explained below, certain tax benefits apply to payments under the Notes subject to the Notes being regarded as agency bonds under the Kazakhstan laws. Further, no duties should be levied in Kazakhstan with respect to payments under the Notes or transfers of the Notes.

General Tax Treatment under the Tax Code

The Kazakhstan tax legislation does not provide clear guidance on the treatment of transactions performed “on-exchange” such that Kazakhstan tax authorities may interpret the rules in a manner that is inconsistent with the information set out below.

Under the Tax Code, the term “interest” includes, inter alia, interest on debt securities which are payments in the form of a discount or coupon (taking into account the discount on debt securities or premium on the value of the initial placement and (or) acquisition cost) made to the holder of debt securities or another person who is a related party for the payer of interest on such securities.

Additionally, the Tax Code stipulates the following definitions applicable to debt securities:

- debt securities – securities certifying the obligation of the Issuer (debtor) to repay the principal amount of debt under the terms of issuance of such securities, including government issued securities and bonds;
- discount on debt securities – the positive difference between the nominal value and the price of the initial placement (excluding coupon) or the acquisition price (excluding coupon) of debt securities;
- coupon on debt securities – the amount paid (or payable) by the issuer in excess of the nominal value of debt securities in accordance with the terms of issuance; and
- premium on debt securities – the positive difference between the price of the initial placement (excluding coupon) or the acquisition price (excluding coupon) and the nominal value of debt securities, where the terms of issuance provide for the payment of a coupon.

The Issuer, as a national investment holding company, qualifies as a “financial agency” under Code No. 171-VIII “Budget Code of the Republic of Kazakhstan” of the Republic of Kazakhstan, dated 15 March 2025 fully implemented on 12 March 2026). Debt securities issued by financial agencies in Kazakhstan are classified as “Agency Bonds” which are the subject of special taxation rules for residents and non-residents of Kazakhstan, as outlined below.

If the Issuer loses its status as a financial agency such that the Notes no longer qualify as agency bonds, holders of the Notes may still avail of the tax treatment applicable to Listed Securities outlined below.

Taxation of residents

Gains from disposal of the Notes

The Tax Code introduces a separate category of “tax-privileged securities” for the purposes of taxation of gains from disposals of such securities by Kazakhstan resident legal entities and individuals. Such tax-privileged securities include, among others:

- Agency Bonds;
- listed securities satisfying all of the following conditions: (i) the securities are included in the official list of the stock exchange as of the date of realization, (ii) realization is conducted through an open trade method and (iii) realization is conducted on a stock exchange operating in the territory of the Republic of Kazakhstan, being KASE and Astana International Exchange (“**Listed Securities**”); and
- debt securities issued by a Kazakhstan resident legal entity (other than the abovementioned securities) which meet all of the following conditions: (i) on the date of disposal of the debt securities, the taxpayer has held

such debt securities for more than three years, (ii) such resident legal entity issuer is not a subsoil user, (iii) the property of persons (a person) being subsoil users in the value of assets of such resident legal entity issuer on the date of such disposal, does not exceed 50 per cent. (hereinafter, the “**Long-term Debt Securities**”).

As a result of a debt security’s disposal (redemption), a Kazakhstan resident legal entity should calculate the difference (excluding the coupon) between the selling price (redemption value) and the initial (acquisition) value (tax base cost), taking into account the amortization of the discount and/or premium as of the sale date. A Kazakhstan resident legal entity’s differences from the disposals of each category of tax-privileged securities within a tax period (calendar year) must be aggregated to determine whether the aggregate result is positive (i.e. gain) or negative (i.e. loss). A negative result (i.e. loss) is not taken into account in the taxpayer’s CIT calculations. A positive result (i.e. gain), however, must be included in the taxpayer’s aggregate annual income. The applicable CIT rate is 20 per cent., being the rate applicable to general business activities under the Tax Code. Certain types of activity are subject to different rates, including: agricultural production (3%), agricultural cooperatives (6%), social sphere organisations (5% for 2026, 10% from 2027), and banking/gambling activities (25%).

As a result of a debt security’s disposal (redemption), a Kazakh resident individual should calculate the difference between the selling price (redemption value) and the initial value (tax base cost). A Kazakhstan resident individual’s differences from the disposals of all tax-privileged securities within a tax period (calendar year) must be aggregated to determine whether the result is positive (i.e. gain) or negative (i.e. loss). A negative result (i.e. loss) is not taken into account in the taxpayer’s PIT calculation. A positive result, however, must be included in the taxpayer’s annual income. The applicable PIT rate is 10 per cent. (or 15 per cent. on taxable income exceeding the statutory threshold of 8,500 times monthly calculation index (MCI)).

Tax benefits applicable to gains derived from disposal of the Notes (applicable to exchange and non-exchange transactions)

If the aggregate amount of a Kazakhstan resident legal entity’s differences from disposal operations with all agency bonds in a calendar year is positive (i.e. gain) and such gain is included in the Kazakhstan resident legal entity’s gross annual income, the Kazakhstan resident legal entity should be eligible to apply the tax benefit (reduction of taxable income) to such gain derived from the disposal of agency bonds, including the Notes. A similar benefit may be applied to other categories of tax-privileged securities, including Listed Securities (applicable in case the Notes no longer qualify as agency bonds) or Long-term Debt Securities (applicable in case the Notes no longer qualify as agency bonds and the sale of the Notes is conducted over-the-counter).

Additionally, the Tax Code stipulates a separate benefit for Kazakhstan resident legal entities in terms of reduction of taxable income for gains derived from the disposal of securities issued by the national managing holding established as part of measures to optimize the system of management of development institutions, financial organizations, and the development of the national economy. Such securities should also qualify as tax-privileged securities for resident legal entities, and the corresponding gain calculation mechanism should apply to them. Because the Issuer qualifies as such national managing holding, gains derived from the disposal of the Notes may reduce the taxable income of the Kazakhstan resident legal entity in case the legal entity’s aggregate amount of differences from the disposals of this category of tax-privileged securities is positive. This benefit is available until 1 January 2031.

If the aggregate amount of a Kazakhstan resident individual’s differences from disposal operations with all tax-privileged securities (including agency bonds) in a calendar year is positive (i.e. gain) and such gain is included in the Kazakhstan resident individual’s annual income, the Kazakhstan resident individual should be eligible to apply the tax benefit (reduction of income subject to tax) to such gain derived from the disposal of agency bonds, including the Notes. A similar benefit may be applied to other categories of tax-privileged securities, including Listed Securities (applicable in case the Notes no longer qualify as agency bonds) or Long-term Debt Securities (applicable in case the Notes no longer qualify as agency bonds and the sale of the Notes is conducted over-the-counter).

Interest

Kazakhstan resident legal entities are required to include interest income on securities in their aggregate annual income, which is subject to CIT at the rate of 20 per cent., with differentiated rates applying to certain activities under the Tax Code.

Kazakhstan resident individuals are obliged to include interest income on securities in their annual income, which is subject to PIT at the rate of 10 per cent. (or 15 per cent. on taxable income exceeding the statutory threshold of 8,500 times MCI). A resident individual's taxable income in the form of interest consists of interest paid (or payable), except for the discount on debt securities, which is recognized by an individual upon their disposal, including redemption, as a gain from disposal.

Tax benefits applicable to interest income on the Notes

A Kazakhstan resident legal entity should be eligible to apply the tax benefit (reduction of taxable income) to interest income received on agency bonds, including the Notes. The similar benefit may be applied to interest on debt securities that, as of the date such interest is accrued, are included in the official list of a stock exchange operating in the territory of the Republic of Kazakhstan which are KASE and AIX (applicable in case the Notes no longer qualify as agency bonds).

Additionally, the Tax Code stipulates a separate benefit for Kazakhstan resident legal entities in terms of reduction of taxable income for interest on securities issued by the national managing holding established as part of measures to optimize the system of management of development institutions, financial organizations, and the development of the national economy. Because the Issuer qualifies as such national managing holding, interest on the Notes may reduce the taxable income of the Kazakhstan resident legal entity. This benefit is available until 1 January 2031.

A Kazakhstan resident individual should be eligible to apply the tax benefit (reduction of income subject to tax) to interest on debt securities issued by entities registered under the laws of the Republic of Kazakhstan and interest on securities that, as of the date such interest is accrued, are included in the official list of a stock exchange operating in the territory of the Republic of Kazakhstan which are KASE and AIX.

Taxation of Non-Residents

Non-resident persons should not become resident in Kazakhstan for tax purposes solely by reason of the acquisition, ownership or disposal of the Notes.

Generally, withholding tax applies in respect of income derived by non-residents from sources in Kazakhstan if such non-residents do not operate through a permanent establishment in Kazakhstan. The obligation to calculate, withhold, remit and report the withheld tax lies with the payer of taxable income, which acts as a tax agent in this case.

The assessment, declaration, withholding and remittance to the Kazakhstan state budget of WHT on gains realised on post-issuance transactions should generally be fulfilled by a buyer of the Notes, who is regarded as a tax agent, whether such buyer is a resident or non-resident for Kazakhstan tax purposes. To fulfil its tax agent obligations, a non-resident should register with the Kazakhstan tax authorities. Individuals, who act as buyers of the Notes, should not be regarded as tax agents with regard to the taxable gain of non-residents if the transaction takes place on a stock exchange.

Obligations on assessment, declaration, withholding and remittance to the Kazakhstan state budget of withholding tax on interest should rest with the Issuer as the Kazakh tax agent in this case.

Gains from disposals of the Notes

As a general rule, a gain derived from the disposal of securities is subject to withholding tax at the rate of 15 per cent. (or 20 per cent. if the holder of securities is registered in a Country with Favourable Tax Regime, as defined below). Disposals in this section refer to various types of title transfers such as sale, exchange and gratuitous transfer.

The Tax Code does not set out the procedure for determining non-resident's income in the form of gains arising from the disposal (redemption) of debt securities. If the procedure for determining resident's income in the form of gains arising from the disposal of debt securities established for residents is applied, a gain should be measured as the difference (excluding the coupon) between the selling price (redemption value) and the initial (acquisition) value (tax base cost), taking into account the amortization of the discount and/or premium as of the sale date. If a seller fails to provide a buyer with documents confirming the initial value of the securities, which are in possession

of the seller (the tax base cost of the seller), the buyer must apply any resulting income tax on a gross basis (i.e., on the entire purchase price).

The Tax Code defines a “Country with Favourable Tax Regime” as either a foreign country or a territory, which meets one of the following criteria:

- profit tax rate in such country or territory is less than 10 per cent.; or
- such country or territory has laws on confidentiality of financial information or laws, which allow keeping confidential information about the actual owner of property or income or the actual owners, participants, founders or shareholders of a legal entity (except for a foreign country or a territory which has entered into an international treaty with the Republic of Kazakhstan, which provides for exchange of information on tax matters between the competent authorities, save for the cases when the foreign country or territory does not ensure exchange of information on tax matters between the competent authorities). Foreign country or territory is regarded as failed to ensure exchange of information with the competent Kazakhstan authority for tax purposes if one of the following conditions is met: (1) the Kazakhstan competent authority receives an official refusal of a foreign competent authority for provision of information, even though such exchange is envisaged by the relevant international agreement; (2) the competent foreign authority failed to provide the requested information within the period exceeding two years after the delivery of the request by the Kazakhstan competent authority.

The list of Countries with Favourable Tax Regime is approved by Decree No. 492 of the Minister of Finance of the Republic of Kazakhstan, dated 12 September 2025 (the list of Countries with Favourable Tax Regime is valid as of the date of this Base Offering Memorandum). The following jurisdictions are currently included in the list of Countries with a Favourable Tax Regime: Principality of Andorra, Antigua and Barbuda, Commonwealth of The Bahamas, Barbados, Kingdom of Bahrain, Belize, Negara Brunei Darussalam, Republic of Vanuatu, Republic of Guyana, Republic of Guatemala, Grenada, Republic of Djibouti, Dominican Republic, Commonwealth of Dominica, Kingdom of Spain (in respect of the territories of The Canary Islands only), People’s Republic of China (in respect of the territories of the special administrative regions of Macau and Hong Kong only), Republic of Colombia, Union of the Comoros, Republic of Costa Rica, Malaysia (in respect of the territory of Labuan enclave only), Republic of Liberia, Republic of Lebanon, Republic of Mauritius, Islamic Republic of Mauritania, Republic of Portugal (in respect of the territory of the islands of Madeira only), Republic of Maldives, Republic of the Marshall Islands, Principality of Monaco, Republic of Malta, Mariana Islands, Kingdom of Morocco (in respect of the territory of the city of Tangier only), Republic of the Union of Myanmar, Republic of Nauru, Kingdom of the Netherlands (in respect of the territories of the islands of Aruba and dependent territories of the Antilles islands only), Federal Republic of Nigeria, New Zealand (in respect of the territories of the Cook Islands and Niue only), Republic of Palau, Republic of Panama, Independent State of Samoa, Republic of San Marino, Republic of Seychelles, Saint Vincent and the Grenadines, Saint Kitts and Nevis, Saint Lucia, United Kingdom (in respect of the following territories only: Anguilla; Bermuda; the British Virgin Islands; Gibraltar; the Cayman Islands; Montserrat; the Turks and Caicos Islands, Isle of Man, the Channel Islands (Guernsey, Jersey, Sark and Alderney), South Georgia and the South Sandwich Islands, Chagos Island), United States (in respect of the following territories only: The Virgin Islands of the United States, Guam, Commonwealth of Puerto Rico, State of Wyoming), Republic of Suriname, United Republic of Tanzania, Kingdom of Tonga, Republic of Trinidad and Tobago, Republic of Fiji, Republic of the Philippines, Republic of France (in respect of the following territories only: Kerguelen Islands, French Polynesia, French Guiana), Montenegro, Democratic Socialist Republic of Sri Lanka and Jamaica.

Tax benefits applicable to gains derived from disposal of the Notes (applicable to exchange and non-exchange transactions)

Gains derived by non-resident legal entities and non-resident individuals from the sale of Agency Bonds, including the Notes, should not be subject to taxation in Kazakhstan.

Gains derived by non-resident individuals from the sale of Listed Securities (applicable in case the Notes no longer qualify as Agency Bonds) should not be subject to taxation in Kazakhstan. Gains derived by non-resident legal entities and non-resident individuals from disposal of Long-term Debt Securities (applicable in case the Notes no longer qualify as Agency Bonds and (in relation to non-resident individuals) the sale of the Notes is conducted over-the-counter) should not be subject to taxation in Kazakhstan.

Non-resident individuals and non-resident legal entities who are residents of Countries with a Favourable Tax Regime or are registered in such countries should be eligible to apply the exemption for Agency Bonds. Individual

residents / citizens of Countries with a Favourable Tax Regime should be eligible to claim the exemption on Listed securities (applicable in case the Notes no longer qualify as agency bonds).

Interest

The general rule under the Tax Code requires that interest on debt securities be subject to withholding tax at the rate of 10 per cent. (or 20 per cent. if the holder is registered in a Country with Favourable Tax Regime) on the gross amount of without allowance for any deductions.

Tax benefits applicable to interest income on the Notes

Under the Tax Code, interest income received by non-resident legal entities and non-resident individuals on Agency Bonds such as the Notes should not be subject to taxation in Kazakhstan.

In addition, interest income of non-resident legal entities and non-resident individuals received in respect of the Notes should not be subject to taxation in Kazakhstan if the Notes (i) are included in the official list of the stock exchange functioning in the territory of Kazakhstan (i.e. KASE or AIX) at the time of interest accrual, and (ii) the Notes meet the trading criteria established by the Kazakhstan Government, including having a minimum volume issued through public trading and in circulation of at least KZT 1 billion.

The Tax Code also stipulates that amounts of accrued interest on debt securities paid upon their purchase by resident buyers should be regarded as non-resident's Kazakh-source income but should not be subject to tax in Kazakhstan.

Non-resident individuals and non-resident legal entities who are residents of Countries with a Favourable Tax Regime or are registered in such countries should be eligible to apply the abovementioned exemptions.

Treaty Protection in the Absence of Exemption

If the exemptions envisaged by the Tax Code are not available, non-resident holders of the Notes, who are residents in the countries with which Kazakhstan has a tax treaty, may be entitled to apply tax exemptions or a reduced tax rate (on interest) under such treaty, if certain conditions are met. However, the tax treaty protection in respect of gains from the disposal of the Notes could be achieved in Kazakhstan through income tax refund only, i.e., after income tax is already paid to the Kazakhstan state budget. Thus, the relevant investors should file an income tax refund claim along with documents prescribed by the Kazakhstan tax legislation to the respective tax authority within the established timeframe. In practice, however, this process may prove to be administratively burdensome and time-consuming with no guarantee of the outcome.

In addition, non-resident holders of the Notes who are residents of the countries with which Kazakhstan has tax treaties may be entitled to a reduced rate of WHT on interest, if certain conditions are met.

In particular, depending on the country of residence and satisfaction of certain other conditions, the interest WHT rate under most of Kazakhstan's tax treaties which are in effect as of the date of this Base Offering Memorandum is 10 per cent. Under these treaties, reduction of the interest WHT may only be available to beneficial owners of interest (i.e. a recipient of interest shall have the rights of possession, use, disposal of the relevant income and shall not act as an intermediary (such as an agent or nominee holder)) and if the Tax Code and tax treaty requirements are met. Since the Tax Code establishes a 10 per cent. WHT rate on debt securities interest, and most of Kazakhstan's tax treaties also provide for a 10 per cent. rate, the application of a treaty will generally be relevant only in specific cases where a treaty grants preferential treatment to certain organizations or institutions.

In order to avail themselves of this relief, eligible holders have to provide the Issuer with a document issued by the competent authority of their country of tax residence confirming tax residence in a treaty jurisdiction. The document should be provided within the deadlines established by the Kazakhstan tax legislation and meet the requirements of the Tax Code. In particular, to be valid in Kazakhstan, a stamp of the competent authority and signature of the authorised official in the document, which confirms tax residence, should be apostilled or legalised by a holder's home country's competent authority. A signature and a stamp of a foreign notary should also be apostilled or legalised.

Apostille or legalisation of the aforementioned signatures and stamps are not required, inter alia, if: (i) the relevant document is published on the official website of the competent authority, or (ii) other authentication procedures, which are envisaged by international agreements to which Kazakhstan is a party, are met.

In addition, for legal holders of the Notes, the Issuer will need to have available the list of the legal holders of the Notes containing the information required by the Kazakhstan tax legislation. Depending on how a contract for keeping records and proof of ownership over the Notes is structured, the list of the legal holders of Notes should be provided to the Issuer either by the Kazakhstan Central Securities Depository or an organisation which is entitled to conduct depository activity on a foreign security market.

If a legal holder of the Notes is a resident of the tax treaty state with which the tax treaty is modified by a Multilateral Instrument (the “**MLI**”) of the Organisation for Economic Co-operation and Development, the legal holder of the Notes may be requested to provide documents confirming the satisfaction of MLI requirements. If the above document and other required documents are not made available to the Issuer prior to 31 March of the year following the year when interest are paid, and/or if the list of the legal holders of Notes is not provided to the Issuer (as required above), then the Issuer should apply WHT at a standard 10 per cent. rate (or 20 per cent. rate if the recipient is registered in a Country with Favourable Tax Regime), as applicable, and account for the withheld amounts to the relevant authority. (provided the local tax exemptions do not apply).

In certain cases, the holders/beneficial owners of the Notes who are eligible for a lower WHT rate under the tax treaty should later be able to claim a refund of overpaid tax either from the Kazakhstan state budget or from the Issuer under certain conditions.

VAT and Stamp Duties

No Kazakhstan VAT or stamp duty should be payable by holders of the Notes in connection with the sale purchase of the Notes and with the interest received on the Notes in the manner contemplated in the Base Offering Memorandum.

TRANSFER RESTRICTIONS

Rule 144A Notes

Each purchaser of a beneficial interest in a Rule 144A Note, by accepting delivery of this Base Offering Memorandum and the Notes, will be deemed to have represented, agreed and acknowledged that:

- (1) It is (a) a QIB that is also a QP, (b) not a broker dealer which owns and invests on a discretionary basis less than U.S.\$25 million in securities of unaffiliated issuers, (c) not a participant directed employee plan, such as a 401(k) plan, (d) acquiring such interest for its own account or for the account of one or more QIBs each of which is also a QP, (e) not formed, reformed, recapitalised or operated for the specific purpose of investing in Notes and/or other securities of the Issuer, (f) if it is an investment company excepted from the Investment Company Act pursuant to Section 3(c)(1) or Section 3(c)(7) thereof (or a foreign investment company under Section 7(d) thereof relying on Section 3(c)(1) or 3(c)(7) with respect to its holders that are U.S. persons) and was formed on or before 30 April 1996, it has received the consent of its beneficial owners who acquired their interests on or before 30 April 1996 with respect to its treatment as a QP in the manner required by Section 2(a)(51)(C) of the Investment Company Act and the rules promulgated thereunder, (g) it is not a partnership, common trust fund, corporation, special trust, pension fund or retirement plan, or other entity in which partners, beneficiaries, beneficial owners, participants, shareholder or other equity owners, as the case may be, are U.S. persons, may designate the particular investment to be made, or the allocation thereof, unless each such partner, beneficiary, beneficial owner, participant, shareholder or other equity owner that is a U.S. person is both a QIB and a QP, (h) it has not invested more than 40% of its assets in the Notes (or beneficial or economic interests therein) and/or other securities of the Issuer after giving effect to the purchase of the Notes (or beneficial or economic interests therein) and (i) aware, and each beneficial owner of such Notes has been advised, that the sale of such Notes to it is being made in reliance on Rule 144A.
- (2) It will (a) along with each account for which it is purchasing, hold and transfer beneficial interests in the relevant Rule 144A Note in a principal amount that is not less than U.S.\$200,000 and (b) provide notice of these transfer restrictions to any subsequent transferees. In addition, it understands that the Issuer may receive a list of participants holding positions in its securities from one or more book entry depositaries.
- (3) It understands that the Rule 144A Notes have not been and will not be registered under the Securities Act and may not be offered, sold, pledged or otherwise transferred except (a) in accordance with Rule 144A to a person that it and any person acting on its behalf reasonably believe is a QIB that is also a QP purchasing for its own account or for the account of one or more QIBs each of which is also a QP, each of which is purchasing not less than U.S.\$200,000 in principal amount of the Rule 144A Notes or (b) to a non-U.S. person in an offshore transaction in accordance with Rule 903 or Rule 904 of Regulation S, in each case in accordance with any applicable securities laws of any State of the U.S..
- (4) It understands that the Issuer has the power to compel any beneficial owner of Rule 144A Notes that is a U.S. person and is not a QIB and a QP to sell its interest in the Rule 144A Notes or may sell such interest on behalf of such owner. the Issuer has the right to refuse to honour the transfer of an interest in the Rule 144A Notes to a U.S. person who is not a QIB and a QP.
- (5) It understands that its purchase and holding of the Rule 144A Notes or any interest therein constitutes a representation and warranty by it that at the time of its purchase and throughout the period in which it holds such Notes or any interest therein that either (i) it is not, and is not acquiring such Notes or any interest therein with assets of (and for so long as it holds such Note or any interest therein will not be and will not be acting on behalf of), a pension, profit sharing or other employee benefit plans that are subject to Title I of the U.S. Employee Retirement Income Security Act of 1974, as amended (“ERISA”), individual retirement accounts, Keogh plans and other plans that are subject to Section 4975 of the U.S. Internal Revenue Code of 1986, as amended (the “Code”) and entities deemed to hold the plan assets of the foregoing (each a “Benefit Plan”) or any other plan subject to a law, regulation or rule that is substantially similar to Section 406 of ERISA or Section 4975 of the Code or (ii) the acquisition and holding of the Notes or any interest therein will not give rise to a non-exempt prohibited transaction under Section 406 of ERISA, Section 4975 of the Code or any such other substantially similar applicable law.

- (6) It understands that the Rule 144A Notes (and any individual Note Certificates issued in respect thereof), unless otherwise agreed between the Issuer and the Trustee in accordance with applicable law, will bear a legend to the following effect:

THIS NOTE HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE “**SECURITIES ACT**”), OR WITH ANY SECURITIES REGULATORY AUTHORITY OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES AND MAY NOT BE OFFERED, SOLD, PLEDGED OR OTHERWISE TRANSFERRED EXCEPT (1) IN ACCORDANCE WITH RULE 144A UNDER THE SECURITIES ACT (“**RULE 144A**”) TO A PERSON THAT THE HOLDER AND ANY PERSON ACTING ON ITS BEHALF REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER WITHIN THE MEANING OF RULE 144A UNDER THE SECURITIES ACT (A “**QIB**”) AND A QUALIFIED PURCHASER (“**QUALIFIED PURCHASER**”) WITHIN THE MEANING OF SECTION 2(a)(51) OF THE U.S. INVESTMENT COMPANY ACT OF 1940, AS AMENDED (THE “**INVESTMENT COMPANY ACT**”), PURCHASING FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF ONE OR MORE QIBs, EACH OF WHICH ALSO A QUALIFIED PURCHASER AND IN AN AMOUNT FOR EACH ACCOUNT OF NOT LESS THAN U.S.\$200,000 PRINCIPAL AMOUNT OF NOTES WHOM THE HOLDER HAS INFORMED, IN EACH CASE, THAT SUCH OFFER, SALE, PLEDGE OR OTHER TRANSFER IS BEING MADE IN RELIANCE ON RULE 144A UNDER THE SECURITIES ACT OR (2) TO NON U.S. PERSONS WITHIN THE MEANING OF REGULATION S UNDER THE SECURITIES ACT (“**REGULATION’S**”) IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 903 OR RULE 904 OF REGULATION S, AND IN EACH CASE IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES, AND THE HOLDER WILL, AND EACH SUBSEQUENT HOLDER IS REQUIRED TO, NOTIFY ANY PURCHASER OF THE RESALE RESTRICTIONS REFERRED TO ABOVE. ANY TRANSFER IN VIOLATION OF THE FOREGOING WILL BE OF NO FORCE OR EFFECT, WILL BE VOID AB INITIO AND WILL NOT OPERATE TO TRANSFER ANY RIGHTS TO THE TRANSFEREE, NOTWITHSTANDING ANY INSTRUCTIONS TO THE CONTRARY TO THE ISSUER, THE TRUSTEE OR ANY INTERMEDIARY. NO REPRESENTATION CAN BE MADE AS TO THE AVAILABILITY OF ANY EXEMPTION UNDER THE SECURITIES ACT FOR RESALES OF THIS NOTE.

EACH BENEFICIAL OWNER HEREOF REPRESENTS THAT (1) IT IS A QIB THAT IS ALSO A QUALIFIED PURCHASER; (2) IT IS NOT A BROKER DEALER WHICH OWNS AND INVESTS ON A DISCRETIONARY BASIS LESS THAN U.S.\$25,000,000 IN SECURITIES OF UNAFFILIATED ISSUERS; (3) IT IS NOT A PARTICIPANT DIRECTED EMPLOYEE PLAN, SUCH AS A 401(K) PLAN; (4) IT IS HOLDING THIS NOTE FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF ONE OR MORE QIBS EACH OF WHICH IS ALSO A QUALIFIED PURCHASER; (5) IT WAS NOT FORMED, REFORMED, RECAPITALISED OR OPERATED FOR THE SPECIFIC PURPOSE OF INVESTING IN NOTES AND/OR OTHER SECURITIES OF THE ISSUER; (6) IF IT IS AN INVESTMENT COMPANY EXCEPTED FROM THE INVESTMENT COMPANY ACT PURSUANT TO SECTION 3(C)(1) OR SECTION 3(C)(7) THEREOF (OR A FOREIGN INVESTMENT COMPANY UNDER SECTION 7(D) THEREOF RELYING ON SECTION 3(C)(1) OR 3(C)(7) WITH RESPECT TO ITS HOLDERS THAT ARE U.S. PERSONS) AND WAS FORMED ON OR BEFORE 30 APRIL 1996, IT HAS RECEIVED THE CONSENT OF ITS BENEFICIAL OWNERS WHO ACQUIRED THEIR INTERESTS ON OR BEFORE 30 APRIL 1996 WITH RESPECT TO ITS TREATMENT AS A QP IN THE MANNER REQUIRED BY SECTION 2(A)(51)(C) OF THE INVESTMENT COMPANY ACT AND THE RULES PROMULGATED THEREUNDER; (7) IT IS NOT A PARTNERSHIP, COMMON TRUST FUND, CORPORATION, SPECIAL TRUST, PENSION FUND OR RETIREMENT PLAN, OR OTHER ENTITY IN WHICH PARTNERS, BENEFICIARIES, BENEFICIAL OWNERS, PARTICIPANTS, SHAREHOLDER OR OTHER EQUITY OWNERS, AS THE CASE MAY BE, ARE U.S. PERSONS, MAY DESIGNATE THE PARTICULAR INVESTMENT TO BE MADE, OR THE ALLOCATION THEREOF, UNLESS EACH SUCH PARTNER, BENEFICIARY, BENEFICIAL OWNER, PARTICIPANT, SHAREHOLDER OR OTHER EQUITY OWNER THAT IS A U.S. PERSON IS BOTH A QIB AND A QP; (8) IT HAS NOT INVESTED MORE THAN 40% OF ITS ASSETS IN THE NOTES (OR BENEFICIAL OR ECONOMIC INTERESTS THEREIN) AND/OR OTHER SECURITIES OF THE ISSUER AFTER GIVING EFFECT TO THE PURCHASE OF THE NOTES (OR BENEFICIAL OR ECONOMIC INTERESTS THEREIN); (9) IT, AND EACH ACCOUNT FOR WHICH IT HOLDS RULE 144A NOTES, WILL HOLD AND TRANSFER AT LEAST U.S.\$200,000 IN PRINCIPAL AMOUNT OF RULE 144A NOTES; (10) IT UNDERSTANDS THAT THE ISSUER MAY RECEIVE A LIST OF PARTICIPANTS HOLDING POSITIONS IN ITS SECURITIES FROM ONE OR MORE BOOK ENTRY DEPOSITARIES AND (11) IT WILL PROVIDE NOTICE OF THE FOREGOING TRANSFER RESTRICTIONS TO ITS SUBSEQUENT TRANSFEREES. THE BENEFICIAL OWNER HEREOF HEREBY ACKNOWLEDGES THAT IF AT ANY TIME WHILE IT HOLDS

AN INTEREST IN THIS NOTE IT IS A PERSON WHO IS NOT A QIB THAT IS ALSO A QUALIFIED PURCHASER, THE ISSUER MAY (A) SELL ITS INTEREST IN THIS NOTE TO A PERSON (I) WHO IS A QIB WHO IS ALSO A QUALIFIED PURCHASER AND WHO IS OTHERWISE QUALIFIED TO PURCHASE THIS NOTE IN A TRANSACTION EXEMPT FROM REGISTRATION UNDER THE SECURITIES ACT OR (II) TO A NON U.S. PERSON PURCHASING THIS NOTE IN AN OFFSHORE TRANSACTION PURSUANT TO REGULATION S OR (B) COMPEL THE BENEFICIAL OWNER TO SELL ITS INTEREST IN THIS NOTE TO THE ISSUER OR AN AFFILIATE OF THE ISSUER OR TRANSFER ITS INTEREST IN THIS NOTE TO A PERSON DESIGNATED BY OR ACCEPTABLE TO THE ISSUER AT A PRICE EQUAL TO THE LESSER OF (X) THE PURCHASE PRICE THEREFOR PAID BY THE BENEFICIAL OWNER, (Y) 100% OF THE PRINCIPAL AMOUNT THEREOF AND (Z) THE FAIR MARKET VALUE THEREOF. THE ISSUER HAS THE RIGHT TO REFUSE TO HONOUR A TRANSFER OF AN INTEREST IN THIS NOTE TO A U.S. PERSON WHO IS NOT A QIB AND A QUALIFIED PURCHASER. THE ISSUER HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE INVESTMENT COMPANY ACT.

EACH BENEFICIAL OWNER HEREOF OR OF ANY INTEREST HEREIN REPRESENTS AND WARRANTS THAT AT THE TIME OF PURCHASE OF THIS NOTE AND THROUGHOUT THE PERIOD IT HOLDS THIS NOTE OR ANY INTEREST HEREIN THAT EITHER (A) IT IS NOT, AND IT IS NOT ACTING ON BEHALF OF, AN EMPLOYEE BENEFIT PLAN (AS DEFINED IN SECTION 3(3) OF THE U.S. EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974, AS AMENDED (“ERISA”)), SUBJECT TO THE PROVISIONS OF PART 4 OF SUBTITLE B OF TITLE I OF ERISA, A PLAN TO WHICH SECTION 4975 OF THE UNITED STATES INTERNAL REVENUE CODE OF 1986, AS AMENDED, (“CODE”), APPLIES, OR ANY ENTITY WHOSE UNDERLYING ASSETS INCLUDE “PLAN ASSETS” BY REASON OF SUCH AN EMPLOYEE BENEFIT PLAN’S OR PLAN’S INVESTMENT IN SUCH ENTITY OR ANY OTHER PLAN SUBJECT TO A LAW, REGULATION OR RULE THAT IS SUBSTANTIALLY SIMILAR TO SECTION 406 OF ERISA OR SECTION 4975 OF THE CODE, OR (B) THE ACQUISITION AND HOLDING OF THIS NOTE OR ANY INTEREST HEREIN WILL NOT GIVE RISE TO A NONEXEMPT PROHIBITED TRANSACTION UNDER SECTION 406 OF ERISA, SECTION 4975 OF THE CODE OR ANY SUBSTANTIALLY SIMILAR APPLICABLE LAW.

THE ISSUER MAY COMPEL EACH BENEFICIAL HOLDER HEREOF TO CERTIFY PERIODICALLY THAT SUCH HOLDER IS A QIB AND A QUALIFIED PURCHASER.

- (7) It acknowledges that the Issuer, the Registrar, the Dealers and their respective affiliates and others will rely upon the trust and accuracy of the above acknowledgements, representations and agreements and agrees that, if any of the acknowledgements, representations or agreements deemed to have been made by it by its purchase of Rule 144A Notes is no longer accurate, it shall promptly notify the Issuer and the Dealers. If it is acquiring any Notes as a fiduciary or agent for one or more investor accounts who are QIBs that are also QPs, it represents that it has sole investment discretion with respect to each such account, and that it has full power to make the above acknowledgements, representations and agreements on behalf of each such account.
- (8) It understands that Rule 144A Notes will be evidenced by Rule 144A Global Note. Before any interest in Rule 144A Global Note may be offered, sold, pledged or otherwise transferred to a person who takes delivery in the form of an interest in the corresponding Regulation S Global Note, it will be required to provide a Transfer Agent with a written certification (in the form provided in the Agency Agreement) as to compliance with applicable securities laws.
- (9) Prospective purchasers are hereby notified that sellers of the Notes may be relying on the exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A.

Regulation S Notes

Each purchaser of Regulation S Notes outside the United States and each subsequent purchaser of Regulation S Notes in resales, throughout the period that it holds such Note, by accepting delivery of this Base Offering Memorandum and the Regulation S Notes, will be deemed to have represented, agreed and acknowledged that:

- (1) It is, or at the time Regulation S Notes are purchased will be, the beneficial owner of such Regulation S Notes and (a) it is not a U.S. person, and it is located outside the United States (within the meaning of Regulation S) and (b) it is not an affiliate of the Issuer or a person acting on behalf of such an affiliate.

- (2) It understands that the Regulation S Notes have not been and will not be registered under the Securities Act and may not be offered, sold, pledged or otherwise transferred except (a) in accordance with Rule 144A to a person that it and any person acting on its behalf reasonably believe is a QIB that is also a QP purchasing for its own account or for the account of one or more QIB each of which is also a QP, each of which is purchasing not less than U.S.\$200,000 (or the equivalent in another currency) in principal amount of the Rule 144A Notes or (b) to a non-U.S. person in an offshore transaction in accordance with Rule 903 or Rule 904 of Regulation S, in each case in accordance with any applicable securities laws of any State of the United States.
- (3) It understands that Regulation S Notes will be evidenced by a Regulation S Global Note. Before any interest in a Regulation S Global Note may be offered, sold, pledged or otherwise transferred to a person who takes delivery in the form of an interest in the corresponding Rule 144A Global Note, it will be required to provide a Transfer Agent with a written certification (in the form provided in the Agency Agreement) as to compliance with applicable securities laws.
- (4) It acknowledges that the Issuer, the Registrar, the Dealers and their respective affiliates and others will rely upon the truth and accuracy of the above acknowledgements, representations and agreements and agree that, if any of the acknowledgements, representations or agreements deemed to have been made by it by its purchase of Notes is no longer accurate, it shall promptly notify the Issuer and the Dealers. If it is acquiring any Notes as a fiduciary or agent for one or more investor accounts, it represents that it has sole investment discretion with respect to each of those accounts and that it has full power to make the above acknowledgements, representations and agreements on behalf of each account.
- (5) It understands that its purchase and holding of the Regulation S Notes or any interest therein constitutes a representation and warranty by it that at the time of its purchase and throughout the period in which it holds such Notes or any interest therein that either (a) it is not, and is not acquiring such Notes or any interest therein with assets of (and for so long as it holds such Note or any interest therein will not be and will not be acting on behalf of), a Benefit Plan or any other plan subject to a law, regulation or rule that is substantially similar to Section 406 of ERISA or Section 4975 of the Code or (b) the acquisition and holding of such Notes or any interest therein will not give rise to a non-exempt prohibited transaction under Section 406 of ERISA, Section 4975 of the Code or any substantially similar applicable law.

FORM OF THE NOTES

The Notes of each Series will be in registered form, without interest coupons attached. The Notes will be issued either outside the United States in reliance on Regulation S or both outside the United States in reliance on the exemption from registration provided by Regulation S and within the United States in reliance on Rule 144A.

The Regulation S Notes of each Tranche will initially be represented by a Regulation S Global Note. Prior to expiry of the distribution compliance period (as defined in “*Summary of the Provisions Relating to the Notes in Global Form*”) applicable to each Tranche of Notes, beneficial interests in a Regulation S Global Note may not be offered or sold to, or for the account or benefit of, a U.S. person save as otherwise provided in Condition 4 (Transfers of Notes) and may not be held otherwise than through Euroclear or Clearstream, Luxembourg and such Regulation S Global Note will bear a legend regarding such restrictions on transfer.

The Notes of each Tranche may only be offered and sold in the United States or to U.S. persons in private transactions to QIBs that are also QPs. The Rule 144A Notes of any Tranche will initially be represented by a Rule 144A Global Note.

Global Notes will either be deposited with a custodian for, and registered in the name of a nominee of, DTC for the accounts of Euroclear and Clearstream, Luxembourg or be deposited with a common depositary for, and registered in the name of a common nominee of, Euroclear and Clearstream, Luxembourg, as specified in the applicable Pricing Supplement. Persons holding beneficial interests in Global Notes will be entitled or required, as the case may be, under the circumstances described below, to receive physical delivery of definitive Notes in fully registered form.

Payments of principal, interest and any other amount in respect of the Global Notes shall, in the absence of provision to the contrary, be made to the person shown on the Register (as defined in Condition 11 (Payments)) as the registered holder of the Global Notes. None of the Issuer, any Principal Paying and Transfer Agent, the Trustee or the Registrar shall have any responsibility or liability for any aspect of the records relating to or payments or deliveries made on account of beneficial ownership interests in the Global Notes or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

Payments of principal, interest or any other amount in respect of the Notes in definitive form shall, in the absence of provision to the contrary, be made to the persons shown on the Register on the relevant Record Date (as defined in Condition 11 (Payments)) immediately preceding the due date for payment in the manner provided in that Condition.

TRANSFER OF INTERESTS

Interests in a Global Note may, subject to compliance with all applicable restrictions, be transferred to a person who wishes to hold such interest in another Global Note. No beneficial owner of an interest in a Global Note will be able to transfer such interest, except in accordance with the applicable procedures of DTC, Euroclear and Clearstream, Luxembourg, in each case to the extent applicable. Notes are also subject to the restrictions on transfer set forth herein and will bear a legend regarding such restrictions. See “*Transfer Restrictions*”.

GENERAL

Pursuant to the Agency Agreement (as defined in “Terms and Conditions of the Notes”), the Principal Paying and Transfer Agent shall arrange that, where a further Tranche of Notes is issued which is intended to form a single Series with an existing Tranche of Notes, the Notes of such further Tranche shall be assigned a common code and ISIN and, where applicable, a CUSIP and CINS number which are different from the common code, ISIN, CUSIP and CINS assigned to Notes of any other Tranche of the same Series until at least the expiry of the distribution compliance period applicable to the Notes of such Tranche.

Any reference herein to Euroclear and/or Clearstream, Luxembourg and/or DTC shall, whenever the context so permits, be deemed to include a reference to any additional or alternative clearing system specified in the applicable Pricing Supplement.

A Note may be accelerated by the holder thereof in certain circumstances described in Condition 13 (*Events of Default*).

SUBSCRIPTION AND SALE

*Notes may be sold from time to time by the Issuer to any one or more of Citigroup Global Markets Limited, J.P. Morgan Securities plc, JSC Halyk Finance, Société Générale and any other Dealer (as the case may be) appointed under the terms of the Programme Agreement (as defined below). The arrangements under which Notes may from time to time be agreed to be sold by the Issuer to, and purchased by, Dealers are set out in a programme agreement dated 2 May 2025 (as from time to time supplemented, amended or restated, the “**Programme Agreement**”) and made between the Issuer and the Dealers. Any such agreement will, inter alia, make provision for the form and terms and conditions of the relevant Notes, the price at which such Notes will be purchased by the Dealers and the commissions or other agreed deductibles (if any) payable or allowable by the Issuer in respect of such purchase. The Programme Agreement makes provision for the resignation or termination of appointment of existing Dealers and for the appointment of additional or other Dealers either generally in respect of the Programme or in relation to a particular Tranche of Notes.*

United States of America

The Notes have not been and will not be registered under the Securities Act and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act.

Each Dealer has agreed that it will not offer, sell or deliver any Notes, (a) as part of their distribution at any time, or (b) otherwise until 40 days after the completion of the distribution of the Notes comprising the relevant Tranche within the United States or to, or for the account or benefit of, U.S. persons, and such Dealer will have sent to each Dealer to which it sells Notes (other than a sale pursuant to Rule 144A) during the distribution compliance period relating thereto a confirmation or other notice setting forth the restrictions on offers and sales of the Notes within the United States or to, or for the account or benefit of, U.S. persons. Terms used in this and the preceding paragraph have the meanings given to them by Regulation S under the Securities Act. The Programme Agreement provides that the Dealers may directly or through their respective U.S. broker dealer affiliates only, arrange for the offer and resale of Notes within the United States only to QIBs that are QPs in reliance on Rule 144A.

In addition, until 40 days after the commencement of the offering of Notes comprising any Tranche, any offer or sale of Notes within the United States by any Dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with Rule 144A.

United Kingdom

Prohibition of Sales to UK Retail Investors

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered, sold, distributed or otherwise made available and will not offer, sell, distribute or otherwise make available any Notes to any retail investor in the United Kingdom. For the purposes of this provision the expression “retail investor” means a person who is not a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014, as it forms part of domestic law by virtue of the EUWA.

Other regulatory restrictions

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that:

- (a) in relation to any Notes which have a maturity of less than one year (i) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business and (ii) it has not offered or sold and will not offer or sell any Notes other than to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or as agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of any Notes would otherwise constitute a contravention of Section 19 of the FSMA by the Issuer;

- (b) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which Section 21(1) of the FSMA does not apply to the Issuer; and
- (c) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to any Notes in, from or otherwise involving the United Kingdom.

Republic of Kazakhstan

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, with the Issuer and each other Dealer that it will not, directly or indirectly, offer for subscription or purchase or issue invitations to subscribe for or buy or sell the Notes or distribute any draft or definitive document in relation to any such offer, invitation or sale in Kazakhstan except in compliance with the laws of Kazakhstan.

Singapore

Each Dealer has acknowledged, and each further Dealer appointed under the Programme will be required to acknowledge, that the Base Offering Memorandum has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, with the Issuer and each other Dealer that it has not offered or sold any Notes or caused the Notes to be made the subject of an invitation for subscription or purchase and will not offer or sell any Notes or cause the Notes to be made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this Base Offering Memorandum or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the Notes, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act 2001 of Singapore, as modified or amended from time to time (the “SFA”)) pursuant to Section 274 of the SFA or (ii) to an accredited investor (as defined in Section 4A of the SFA) pursuant to and in accordance with the conditions specified in Section 275 of the SFA.

Dubai International Financial Centre (DIFC)

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered and will not offer the Notes to any person in the Dubai International Financial Centre unless such offer is:

- (a) an “**Exempt Offer**” in accordance with the Markets Rules (Version 21/01-23) (“**MKT**”) Module of the Dubai Financial Services Authority (the “**DFSA**”) rulebook; and
- (b) made only to persons who meet the Professional Client criteria set out in Rule 2.3.3 of the DFSA Conduct of Business Module of the DFSA rulebook.

Prohibition of Sales to EEA Retail Investors

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, with the Issuer and each other Dealer that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes to any retail investor in the European Economic Area. For the purposes of this provision the expression “retail investor” means a person who is one (or more) of the following:

- a retail client as defined in point (11) of Article 4(1) of MiFID II; or
- a customer within the meaning of Directive (EU) 2016/97, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II.

General

These selling restrictions may be modified by the agreement of the Issuer and the Dealers following a change in a relevant law, regulation or directive. Any such modification will be set out in the Pricing Supplement issued in respect of the issue of Notes to which it relates or in a supplement to this Base Offering Memorandum.

Each Dealer has acknowledged and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that (i) no action has been or will be taken in any jurisdiction that would, or is intended to, permit a public offering of any of the Notes, or possession or distribution of this Base Offering Memorandum, any Pricing Supplement or any other offering material, in any country or jurisdiction where action for that purpose is required and (ii) it, to the best of its knowledge and belief, shall comply with all relevant laws, regulations and directives in each jurisdiction in which it purchases, offers, sells or delivers Notes or has in its possession or distributes this Base Offering Memorandum, any Pricing Supplement or any other offering material, and neither the Issuer nor any other Dealer shall have responsibility therefor.

Other Relationships

Certain of the Dealers and their respective affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services to the Issuer and/or its affiliates in the ordinary course of business. Certain of the Dealers and their respective affiliates may have positions, deal or make markets in the Notes issued under the Programme, related derivatives and reference obligations, including (but not limited to) entering into hedging strategies on behalf of the Issuer and its respective affiliates, investor clients, or as principal in order to manage their exposure, their general market risk, or other trading activities. In addition, in the ordinary course of their business activities, the Dealers and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or its affiliates. Certain of the Dealers or their respective affiliates routinely hedge their credit exposures to the Issuer consistent with their customary risk management policies. Typically, such Dealers and their respective affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes issued under the Programme. Any such positions could adversely affect future trading prices of Notes issued under the Programme. The Dealers and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

GENERAL INFORMATION

Listing and Trading

Application has also been made to the Vienna Stock Exchange for the admission of the Programme and/or any Notes to trading on the Vienna MTF.

It is expected that each Tranche of Notes which is to be admitted for trading on the Vienna MTF will be admitted separately as and when issued, subject only to the issue of the Global Note(s) representing the Notes of that Tranche.

However, Notes may be issued pursuant to the Programme which will not be listed on any stock exchange outside of Kazakhstan or which will be listed on such stock exchange as the Issuer and the relevant Dealer(s) may agree.

In addition, unless otherwise agreed with the relevant Dealer(s) and provided for in the Pricing Supplement, the Issuer will use its reasonable endeavours to cause all Notes issued under the Programme to be submitted to the “Bonds” category of the “Debt Securities” sector of the “Main” platform of the official list of the KASE.

Legal Entity Identifier

The Legal Entity Identifier is 984500B4F78F04253804.

Authorisations

The establishment of the Programme was authorised by a duly convened meeting of the Board of Directors of the Issuer held on 18 April 2025. The Issuer has obtained or will obtain from time to time all necessary consents, approvals and authorisations in connection with the issue and performance of the Notes, and in particular, each Tranche will require a specific authorisation by the Issuer’s Board of Directors.

Clearing of the Notes

The Notes have been accepted for clearance through Euroclear and Clearstream, Luxembourg and/or DTC. The appropriate common code and the International Securities Identification Number and/or (where applicable) the CUSIP number in relation to the Notes of each Series will be specified in the Pricing Supplement relating thereto. The relevant Pricing Supplement shall specify any other clearing system as shall have accepted the relevant Notes for clearance together with any further appropriate information.

Use of Proceeds

Unless otherwise specified in the applicable Pricing Supplement, the net proceeds of the issue of each Tranche of Notes will be applied by the Issuer for general corporate purposes. These may include the provision of funding to the Issuer’s subsidiary companies, which in turn may use such funding to support activities across various economic sectors, including investment and export development, trade finance, and the refinancing of existing debt obligations.

Commissions, fees and expenses may be deducted from the gross proceeds of each Tranche of Notes, as set out in the applicable Pricing Supplement.

Litigation

There are no governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened, of which the Issuer is aware), during the 12 months preceding the date of this Base Offering Memorandum, which may have, or have had in the recent past, a significant effect on the financial position or profitability of the Issuer or of the Group, taken as a whole.

No Material Adverse or Significant Change

Since 31 December 2025 (the end of the last financial period for which audited financial information has been published), there has been no material adverse change in the prospects of the Group nor has there been a significant

change in the financial performance or financial position of the Group other than as disclosed elsewhere in this Base Offering Memorandum and the Financial Statements.

No Material Contracts

Neither the Issuer nor either of its subsidiaries has entered into any material contracts outside the ordinary course of its business which could result in it being under an obligation or entitlement that is material to the Issuer's ability to make payments under the Notes.

Independent Auditors

The consolidated financial statements of the Group as of 31 December 2025, 2024 and 2023, and for the years then ended, included in this Base Offering Memorandum, have been audited by KPMG Audit LLC (“KPMG”), independent auditors, as stated in their reports appearing herein.

The independent auditors of the Group are KPMG acting as auditors under State Licence № 0000021, dated 6 December 2006 issued by the Ministry of Finance of Kazakhstan. KPMG is a member of the Chamber of Auditors of Kazakhstan, the professional body which oversees audit firms in Kazakhstan. See also “*Presentation of Financial and Other Information*”.

As the Notes have not been and will not be registered under the Securities Act, KPMG has not filed and would not be required to file a consent under the Securities Act.

Website

The website of the Issuer is <https://baiterek.gov.kz/en/>. The information on <https://baiterek.gov.kz/en/> does not form part of this Base Offering Memorandum.

Documents Available for Inspection

For the period of 12 months following the date of this Base Offering Memorandum, copies and, where appropriate, English translations of the following documents may be inspected during normal business hours at the specified office of the Principal Paying and Transfer Agent:

- (a) the constitutional documents of the Issuer;
- (b) the Financial Statements including, in each case, the audit opinion relating to such Financial Statements;
- (c) the Agency Agreement;
- (e) the Trust Deed (which contains the forms of the Notes in global and definitive form);
- (f) a copy of this Base Offering Memorandum together with any supplements to this Base Offering Memorandum or any further offering memorandum; and
- (g) any Pricing Supplement relating to Notes which are listed on any stock exchange (in the case of any Notes which are not listed on any stock exchange outside of Kazakhstan, copies of the relevant Pricing Supplement will only be available for inspection by the relevant Noteholders or otherwise in accordance with the rules of the KASE).

Independent Auditors' Report

To the Shareholder and Board of Directors of Baiterek National Managing Holding Joint Stock Company

Opinion

We have audited the consolidated financial statements of Baiterek National Managing Holding Joint Stock Company and its subsidiaries (the "Holding"), which comprise the consolidated statement of financial position as at 31 December 2024, the consolidated statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Holding as at 31 December 2024, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Holding in accordance with the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) (*IESBA Code*) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Republic of Kazakhstan, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Expected credit losses for loans to customers and finance lease receivables

Please refer to the Notes 3 (Impairment), 5, 10 and 12 in the consolidated financial statements.

Key audit matter	How the matter was addressed in our audit
Loans to customers measured at amortised cost and finance lease receivables represent 44% and 11% of total assets, respectively. Loans to customers and finance lease receivables are stated net of allowance for expected credit losses (ECL) that is estimated on a regular basis and is sensitive to assumptions used. The Holding applies the ECL valuation model, which requires management to apply professional judgment and to make assumptions related to the following key areas: – timely identification of significant increase in credit risk and default events related to loans to customers and finance lease receivables (allocation between stages 1, 2 and 3 in accordance with IFRS 9 <i>Financial Instruments</i>); – assessment of probability of default (PD) and loss given default (LGD); – assessment of expected future cash flows for loans to customers and finance lease receivables which are classified as credit-impaired. Due to the significant volume of loans to customers and finance lease receivables and the related estimation uncertainty, this area is a key audit matter.	We analysed the key aspects of the Holding's methodology and policies related to the ECL estimate for compliance with the requirements of IFRS 9, with the involvement of internal financial risk management specialists. To analyse the adequacy of professional judgement and assumptions used by the Holding in relation to the allowance for the ECL estimate, we performed the following: - We evaluated the design and implementation of the controls used to assign the internal credit ratings to the counterparties with regard to loans to customers and finance lease receivables. For a sample of loans to customers and finance lease receivables we tested overall adequacy of the internal credit ratings assigned by the Holding to counterparties by assessing independently financial and non-financial information, as well as other available market information about the activities of these borrowers and debtors. - For a sample of loans to customers and finance lease receivables, for which a potential changes in ECL estimate may have a significant impact on the consolidated financial statements, we conducted a detailed testing of whether credit risk stages are correctly assigned by the Holding. - For a sample of loans to customers and finance lease receivables allocated to Stage 1 and Stage 2 we tested the principle of operation of related PD и LGD models, and reconciled inputs used in the models to the source documents. We challenged the assumptions used by the Holding in estimation of the amount and timing of cash flows in the LGD model, based on our knowledge and available market information. - For a sample of the Stage 3 loans and finance lease receivables, and purchased or originated credit-impaired (POCI) loans for which the ECL allowance is estimated on an individual basis, and which comprise loans and finance leases provided to legal entities, we critically assessed the assumptions used

	by the Holding to estimate the amount and timing of future cash flows. We compared assumptions used by the Holding with industry, financial and economic data from available public sources. We focused on loans and finance lease receivables for which potential changes in ECL estimates could have a significant impact on the consolidated financial statements. - We conducted a detailed testing of the accuracy of input data in the estimation of expected credit losses, including information on historical default rates and other relevant information. - We also reviewed the mathematical accuracy of estimates of expected credit losses. We also assessed whether the consolidated financial statements disclosures appropriately reflect the Holding's exposure to credit risk.

Other Information

Management is responsible for the other information. The other information comprises the information included in the Annual Report of the Holding for 2024, but does not include the consolidated financial statements and our auditors' report thereon. The Annual Report of the Holding for 2024 is expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Holding's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Holding or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Holding's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Holding's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Holding's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Holding to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group's consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The notes set out on pages 7 to 97 form an integral part of these consolidated financial statements.

1 Introduction

These consolidated financial statements comprise the financial statements of Baiterek National Managing Holding Joint Stock Company (the “Holding Company”) and financial statements of its subsidiaries (the “Holding”).

The Holding was incorporated in accordance with the Decree of the President of the Republic of Kazakhstan No. 571 “On some measures for optimisation of the management system of development institutions and financial organisations, and development of the national economy” dated 22 May 2013 and the Decree of the Government of the Republic of Kazakhstan No. 516 “About measures for implementation of the Decree of the President of the Republic of Kazakhstan No. 571 dated 22 May 2013” dated 25 May 2013. As at 31 December 2024 and 2023, the ultimate controlling party of the Holding is the Government of the Republic of Kazakhstan.

Principal activity

The Holding’s mission is to promote sustainable growth of the economy of the Republic of Kazakhstan by supporting the production of Kazakhstani goods and services, modernizing infrastructure and strengthening food security based on the principles of responsibility to society.

The Holding is actively involved in completing national strategic and social tasks through development institutions, through the implementation of the National Development Plan of the Republic of Kazakhstan until 2029, the Concept for the Development of the Manufacturing Industry of the Republic of Kazakhstan for 2023–2029, the Concept for the Development of Small and Medium-Sized Entrepreneurship in the Republic of Kazakhstan until 2030, the Concept for the Development of Housing and Public Utilities Infrastructure for 2023–2029, the Concept for the Development of the agro-industrial complex of the Republic of Kazakhstan for 2021–2030, and the National Project “Modernization of the Energy and Public Utilities Sectors”.

The Holding’s main goals and objectives are as follows:

- implementing an efficient risk management system;
- increasing transparency and public confidence in the economy;
- providing synergies from subsidiaries’ activities;
- improving the subsidiaries’ economic performance/break-even principle;
- attracting additional investments;
- maintaining business relationship with the private sector.

As at 31 December 2024, the Holding’s structure comprises seven subsidiaries (31 December 2023: eight subsidiaries) engaged in the implementation of the State policy and State programmes, having the following areas of activity pursuant to the Holding’s strategy:

- Development institutions include Development Bank of Kazakhstan JSC, Export Insurance Company Export credit agency of Kazakhstan JSC, Damu Entrepreneurship Development Fund JSC, and Qazaqstan Investment Corporation JSC (former Kazyna Capital Management JSC). The objective of these institutions is to provide credit, investment and other financial and non-financial support to investment projects in priority sectors of economy, aimed to diversify the economy and development of the secondary sector, export of Kazakhstani products, development of innovations and development of small and medium business.
- Financial institutions comprise Otbasyl Bank JSC, Kazakhstan Housing Company JSC. These institutions are tasked with raising capital, providing long-term financing for mortgages, and reducing related borrowing costs and participating in the implementation of a state housing construction policy.
- Agrarian Credit Corporation JSC is a financial institution established to promote the sustainable development of, and provide technical equipment to, the agro-industrial complex of the Republic of Kazakhstan through formation of an accessible and effective financing arrangement and enhancing competencies of entities operating in agro-industrial complex.

On 29 May 2013, the Holding and “Samruk-Kazyna” National Welfare Fund Joint Stock Company (“Samruk-Kazyna NWF”) signed an agreement for the transfer of shares of Development Bank of Kazakhstan JSC (the “DBK JSC”), Investment Fund of Kazakhstan JSC (the “IFK JSC”), KazExport Export Insurance Company JSC (“ECA JSC”), Damu Entrepreneurship Development Fund JSC (“Damu EDF JSC”), and Qazaqstan Investment Corporation JSC (the “QIC JSC”) in trust management without the right of subsequent repurchase, whereby the Holding acted as a trust manager. During August and October 2013, Samruk-Kazyna NWF transferred shares of the above-mentioned entities to the Committee for State Property and Privatisation in exchange for blocks of shares of other joint stock companies and property.

On 17 June 2013, the Holding and Committee for State Property and Privatisation of the Ministry of Finance of the Republic of Kazakhstan (the “Committee for State Property and Privatisation”) signed an agreement on transfer of government shares of QazTech Ventures JSC (the “QTV JSC”), Housing Construction Savings Bank “Otbasyl Bank” JSC (the “Otbasyl Bank JSC”), Kazakhstan Housing Company JSC (the “KHC JSC”), Housing Construction Guarantee Fund JSC (the “HCGF JSC”) and Baiterek Development JSC (the “BD JSC”) in trust management without the right of subsequent repurchase, whereby the Holding acted as a trust manager.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

As part of the implementation of the Decree of the President of the Republic of Kazakhstan Kassym-Zhomart Tokayev dated 2 September 2019 as to reduce the number of operators of housing programmes, and by the Order of the Ministry of Industry and Infrastructural Development of the Republic of Kazakhstan dated 20 March 2020 No. 156, a decision was made to reorganise KHC JSC and BD JSC and HCGF JSC by merging BD JSC and HCGF JSC and establishing KHC JSC. According to the deeds of transfer dated 30 July 2020 and 16 November 2020, the assets and liabilities of BD JSC and HCGF JSC were transferred to KHC JSC accordingly.

In August and October 2013, the Committee for State Property and Privatisation made a contribution to the share capital of the Holding with shareholdings in the ten aforementioned entities in exchange for ordinary shares in the Holding totalling Tenge 632,615,460 thousand and made a cash contribution of Tenge 30,486,550 thousand, which the Holding subsequently contributed to the share capital of DBK JSC and of QIC JSC.

In accordance with the Order No.964 of the Committee for State Property and Privatisation dated 2 October 2014, the Investment Committee of the Ministry of Industry and New Technologies of the Republic of Kazakhstan transferred 26.00% of shares in KHC JSC to the Holding as a contribution to share capital. The transaction value was Tenge 10,216,702 thousand, whereby total number of shares transferred was 10,216,701 with a par value of Tenge 1,000 per share and one (1) share with a par value of Tenge 608 per share.

On 15 March 2021, the Holding, as a part of the implementation of Clause 52 of the National Action Plan on Implementation of the Address of the Head of State of 1 September 2020 "Kazakhstan in the New Reality: Time to Act" established a single development institution through the takeover of the KazAgro National Managing Holding JSC ("KazAgro NMH JSC"), as part of which the Holding acquired three subsidiaries: KazAgroFinance JSC ("KAF JSC"), Agrarian Credit Corporation JSC ("ACC JSC") and Fund for Financial Support of Agriculture JSC ("FAGRI JSC").

On 31 May 2021, a decision was made to transfer 100% of ordinary shares of QTV JSC to QIC JSC.

On 2 July 2021, a 97.7% of interests of the Holding in KPPF LLP was transferred to QIC JSC.

On 17 August 2021, an online increasing-price auction was held on the web portal, www.gosreestr.kz, of the Register of State Property of Information and Accounting Center JSC of the Ministry of Finance of the Republic of Kazakhstan. In accordance with the Protocol of the online auction results of 17 August 2021, on 27 August 2021, the Holding concluded a purchase and sale contract with a buyer to sell one hundred percent of the IFK JSC's shares. On 5 October 2021, 100% of shares of IFK JSC were written off from the Holding's account and credited to the buyer's account with Central Securities Depository JSC.

On 13 December 2021, in accordance with the decision of the Board of Directors of the Holding, FAGRI JSC and ACC JSC were reorganised through takeover of FAGRI JSC by ACC JSC. On 13 December 2021, a deed of transfer was approved to transfer all property, assets and liabilities, rights and obligations of FAGRI JSC to ACC JSC, which is a legal successor to FAGRI JSC for all its assets and liabilities.

In pursuance of the instructions of the Head of the State, on 25 July 2023, the Holding transferred 100% of shares of KAF JSC to ACC JSC.

In September 2022, the Holding acquired 99.9977% of shares of SB of Sberbank JSC in Kazakhstan.

In September 2022, SB of Sberbank JSC in Kazakhstan was re-registered in connection with a change of its name to Bereke Bank JSC.

In March 2024, the Holding concluded a sale and purchase contact with a foreign investor to sell 100% of shares of Bereke Bank JSC, subject to suspensive conditions. In October 2024 once all suspensive conditions have been met, including obtaining by the investor of relevant approvals from regulatory bodies of the Republic of Kazakhstan the Holding transferred ownership of 100% of shares of Bereke Bank JSC to the investor.

The following table provides details of the major direct subsidiaries included into these consolidated financial statements of the Holding:

Name of a subsidiary	Abbreviated name	Country of incorporation	Ownership interest, %	
			31 December 2024	31 December 2023

Agrarian Credit Corporation JSC	ACC JSC	The Republic of Kazakhstan	100.00	100.00
Bereke Bank JSC	Bereke Bank JSC	The Republic of Kazakhstan	0.00	100.00

DBK JSC was incorporated in 2001 in accordance with the Law of the Republic of Kazakhstan "On Development Bank of Kazakhstan" No. 178-II dated 25 April 2001. DBK JSC is a national development institution, the principal activity of which is improving state investing activities and enhancing its efficiency, facilitating the development of production infrastructure, processing industry, and assisting with attraction of external and internal investments in national economy.

ECA JSC was incorporated in accordance with the Decree of the Government of the Republic of Kazakhstan dated 12 May 2003 No. 442. It is the only specialised insurance organisation that performs the functions of an export and credit agent of the Republic of Kazakhstan.

Damu EDF JSC was incorporated in accordance with the Decree of the Government of the Republic of Kazakhstan dated 26 April 1997 No. 665. The principal activity of Damu EDF JSC is to provide financing to small and medium-sized businesses and microfinancing organisations through commercial banks. Credit risk of ultimate borrowers is transferred to commercial banks.

QIC JSC was incorporated on 7 March 2007 by the Government of the Republic of Kazakhstan in accordance with the laws of the Republic of Kazakhstan. The principal activity of QIC JSC is creating and participating in investment funds and investing in financial instruments.

Otbasy Bank JSC was established in accordance with the Decree of the Government of the Republic of Kazakhstan dated 16 April 2003 No. 364 for the purposes of development of residential construction savings system in the Republic of Kazakhstan. Otbasy Bank JSC is involved in attracting funds of customers to accumulate residential construction savings, providing various residential mortgage loans to its customers, and in trading in securities and placing funds with banks.

KHC JSC was established on 29 December 2000 in accordance with the Resolution No. 469 of the National Bank of the Republic of Kazakhstan (the "NBRK") dated 20 December 2000. The principal activity of KHC JSC is providing mortgage loans under a licence granted by regulatory authorities as well as conducting trust management, factoring, forfeiting and leasing operations.

ACC JSC was established in accordance with the Decree of the Government of the Republic of Kazakhstan No. 137 dated 25 January 2001. The principal activity of ACC JSC is implementation of the government programmes to support the agricultural sector; attraction of domestic and foreign investments to implement its own projects in the agro-industrial complex; development and implementation of projects in the agro-industrial complex; sale of pledged properties and agricultural products received as repayment of funds granted; bank lending operations on the basis of the relevant licence, leasing activities, and other activities not prohibited by the legislative acts.

The Holding's registered address and place of business. The Holding's legal address and place of business is 55a Mangilik Yel Avenue, Yessil district, Astana, Republic of Kazakhstan.

Presentation currency. These consolidated financial statements are presented in thousands of the Kazakhstan Tenge ("Tenge"), unless otherwise stated.

Operating environment of the Holding.

The Holding's operations are primarily located in Kazakhstan. Consequently, the Holding is exposed to the economic and financial markets of the Republic of Kazakhstan which display characteristics of an emerging market. The legal, tax and regulatory frameworks continue development, but are subject to varying interpretations and frequent changes which together with other legal and fiscal impediments contribute to the challenges faced by entities operating in Kazakhstan. Depreciation of the Kazakhstan Tenge, the volatility in the global price of oil and the ongoing military conflict between the Russian Federation and Ukraine have also increased the level of uncertainty in the business environment.

The consolidated financial statements reflect management's assessment of the impact of the Kazakhstan business environment on the operations and the consolidated financial position of the Holding. The future business environment may differ from management's assessment.

2 Basis of preparation

Statement of compliance. These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards").

Basis of measurement. The consolidated financial statements are prepared on the historical cost basis except that financial instruments measured at fair value through other comprehensive income and at fair value through profit or loss are stated at fair value.

Going concern Management of the Holding has prepared these consolidated financial statements on a going concern basis.

Functional and presentation currency. The functional currency of the Holding is the Kazakhstani tenge ("Tenge") as, being the national currency of the Republic of Kazakhstan, it reflects the economic substance of the majority of underlying events and circumstances relevant to the Holding.

Tenge is also the presentation currency for the purposes of this consolidated financial information.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

All financial information presented in Tenge has been rounded to the nearest thousand, unless otherwise stated.

Comparative information. The Holding changed presentation of certain captions in the primary forms of consolidated financial statements. Comparative information is reclassified to conform to changes in presentation in the current period.

The Holding changed its presentation of loans from banks and other financial institutions and other financial liabilities in the consolidated statement of financial position.

The following table summarises the impacts on the Holding's consolidated financial statements.

<i>(In thousands of Kazakhstani Tenge)</i>	As previously reported	Adjustments	As restated
Consolidated statement of financial position as at 31 December 2023			
Loans from banks and other financial institutions	856,365,177	9,021,681	865,386,858
Other financial liabilities	156,763,872	(9,021,681)	147,742,191
Consolidated statement of cash flows for the year ended 31 December 2023			
Cash flows from operating activities			
<i>Increase in operating liabilities</i>			
- other financial liabilities	46,764,082	(20,000,000)	26,764,082
Cash flows from financing activities			
Loans from banks and other financial institutions	197,799,500	20,000,000	217,799,500

3 Material accounting policies

The Holding has consistently applied the following accounting policies to all periods presented in these consolidated financial statements.

Consolidated financial statements. Subsidiaries are those investees, including structured entities, that the Holding Company controls because the Holding Company (i) has power to direct relevant activities of the investees that significantly affect their returns, (ii) has exposure, or rights, to variable returns from its involvement with the investees, and (iii) has the ability to use its power over the investees to affect the amount of investor's returns. The existence and effect of substantive rights, including substantive potential voting rights, are considered when assessing whether the Holding Company has power over another entity.

For a right to be substantive, the holder must have practical ability to exercise that right when decisions about the direction of the relevant activities of the investee need to be made. The Holding Company may have power over an investee even when it holds less than majority of voting power in an investee.

In such a case, the Holding Company assesses the size of its voting rights relative to the size and dispersion of holdings of the other vote holders to determine if it has de-facto power over the investee. Protective rights of other investors, such as those that relate to fundamental changes of investee's activities or apply only in exceptional circumstances, do not prevent the Holding Company from controlling an investee. Subsidiaries are consolidated from the date on which control is transferred to the Holding Company and are deconsolidated from the date on which control ceases, except for the subsidiaries acquired from the parties under common control.

The acquisition method of accounting is used to include subsidiaries to the consolidated financial statements with an exception of purchase of subsidiaries from entities under common control. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest when acquisition method is applied.

The Holding measures non-controlling interest that represents present ownership interest and entitles the holder to a proportionate share of net assets in the event of liquidation on a transaction by transaction basis, either at: (a) fair value, or (b) the non-controlling interest's proportionate share of net assets of the acquiree. Non-controlling interests that are not present ownership interests are measured at fair value.

Goodwill is measured by deducting the net assets of the acquiree from the aggregate of the consideration transferred for the acquiree, the amount of non-controlling interest in the acquiree and fair value of an interest in the acquiree held by the Holding immediately before the acquisition date. Any negative amount ("negative goodwill") is recognised in profit or loss, after management reassesses whether it identified all the assets acquired and all liabilities and contingent liabilities assumed, and reviews appropriateness of their measurement.

The consideration transferred for the acquiree is measured at the fair value of the assets given up, equity instruments issued and liabilities incurred or assumed, including fair value of assets or liabilities from contingent consideration arrangements, but excludes acquisition related costs such as advisory, legal, valuation and similar professional services. Transaction costs incurred for issuing equity instruments are deducted from equity; transaction costs incurred for issuing debt securities are deducted from its carrying amount and all other transaction costs associated with the acquisition are expensed.

Intercompany transactions, balances and unrealised gains on transactions between the Holding and its subsidiaries are eliminated; unrealised losses are also eliminated unless the cost cannot be recovered. The Holding Company and all its subsidiaries use uniform accounting policies consistent with the Holding's policies.

Non-controlling interest is that part of the net results and of the equity of a subsidiary attributable to interests which are not owned, directly or indirectly, by the Holding. Non-controlling interest forms a separate component of the Holding's equity.

Purchases and sales of non-controlling interests. The Holding applies the economic entity model to account for transactions with owners of non-controlling interest. Any difference between the purchase consideration and the carrying amount of non-controlling interest acquired is recorded as a capital transaction directly in equity. The Holding recognises the difference between sales consideration and carrying amount of non-controlling interest sold as a capital transaction in the consolidated statement of changes in equity.

Accounting for business combinations under common control. A merger of entities under common control is a business combination in which all of the combined entities are ultimately controlled by the same party or parties, both before, and after the combination, and that control is not transitory.

The effect of combination of entities under common control is accounted for by the Holding using 'equity interest combination' method provided that: assets and liabilities of the combining companies are measured at their carrying amount at the combination date, combination-related transaction costs are expensed in the consolidated statement of profit or loss and other comprehensive income, mutual balances are eliminated; any difference between the purchase price paid/transferred and the value of acquired net assets (at their carrying amount as disclosed in the consolidated financial statements), and is recognised in the acquirer's equity.

Interests in associates and joint ventures. Associates are those entities in which the Holding has significant influence, but not control or joint control, over the financial and operating policies. Significant influence is presumed to exist when the Holding holds between 20% and 50% of the voting power of another entity.

A joint venture is an arrangement in which the Holding has joint control, whereby the Holding has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

The Holding applies exemption provided by IAS 28, which allows not to apply the equity accounting method to account for investments in associates and joint ventures, which are directly (or indirectly) held by an entity that is a venture capital organisation. Such entities have a right to account for their investments in said associates and joint ventures at fair value through profit or loss in accordance with IFRS 9. The Holding believes that the Holding's subsidiary, QIC JSC, conforms to the status of entities specialising in investment in new ventures as QIC JSC meets the following criteria:

- The principal activity of QIC JSC is investing of funds to generate the operating income, capital gains or both.
- The QIC JSC's investing activity may be clearly and objectively separated from any other activities.
- Investees represent the independent business units operating independently (on a stand-alone basis) of an investor.

Thus, interests in associates and joint ventures of QIC JSC are accounted for as financial instruments at fair value through profit or loss in accordance with the scope exemption in IAS 28 *Investments in Associates and Joint Ventures*.

Disposals of subsidiaries, associates or joint ventures. When the Holding ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in comprehensive income in respect of that entity, are accounted for as if the Holding had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in comprehensive income are reclassified to profit or loss, where appropriate.

Interest income and expense

Effective interest rate. Interest income and expense are recognised in profit or loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than credit-impaired assets, the Holding estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs and fees and amounts paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

Amortised cost and gross carrying amount. The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The 'gross carrying amount of a financial asset' measured at amortised cost is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

Calculation of interest income and expense. The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or a financial liability. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability.

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

For information on when financial assets are credit-impaired, see 'Financial assets and financial liabilities' section (iv) below.

Presentation. Interest income calculated using the effective interest method presented in the consolidated statement of profit or loss and other comprehensive income includes interest on financial assets measured at amortised cost and interest on debt instruments measured at FVOCI.

Other interest income presented in the consolidated statement of profit or loss and other comprehensive income includes interest income on non-derivative debt financial instruments measured at FVTPL and net investments in finance leases.

Interest expense presented in the consolidated statement of profit or loss and other comprehensive income includes interest expense on financial liabilities measured at amortised cost and on non-derivative financial liabilities measured at FVTPL.

Financial assets and financial liabilities

(i) Classification of financial instruments

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL).

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt financial assets measured at FVOCI, gains and losses are recognised in other comprehensive income, except for the following, which are recognised in profit or loss in the same manner as for financial assets measured at amortised cost:

- interest income calculated using the effective interest method;
- expected credit losses and reversals; and
- foreign exchange gains and losses.

When a debt financial asset measured at fair value through other comprehensive income is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

On initial recognition of an equity investment that is not held for trading, the Holding may irrevocably elect to present subsequent changes in fair value in other comprehensive income. This election is made on an investment-by-investment basis. Gains or losses on such equity instruments are never reclassified to profit or loss and no impairment is recognised in profit or loss. Dividends are recognised in profit or loss unless they clearly represent a recovery of part of the cost of investment, in which case they are recognised in other comprehensive income. Cumulative gains and losses recognised in other comprehensive income are transferred to retained earnings on disposal of an investment.

All other financial assets are classified as measured at fair value through profit or loss.

In addition, on initial recognition the Holding may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment. The Holding makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Holding's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Holding's stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Assessment of whether contractual cash flows are solely payments of principal and interest. For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin. In assessing whether the contractual cash flows are solely payments of principal and interest, the Holding considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Holding considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Holding's claim to cash flows from specified assets (e.g. non-recourse features);
- features that modify consideration of the time value of money – e.g. periodical reset of interest rates.

Non-recourse loans

In some cases, loans made by the Holding that are secured by collateral of the borrower limit the Holding's claim to cash flows of the underlying collateral (non-recourse loans). The Holding applies judgement in assessing whether the non-recourse loans meet the SPPI criterion.

The Holding typically considers the following information when making this judgement:

- whether the contractual arrangement specifically defines the amounts and dates of the cash payments of the loan;
- the fair value of the collateral relative to the amount of the secured financial asset;

- the ability and willingness of the borrower to make contractual payments, notwithstanding a decline in the value of collateral;
- whether the borrower is an individual or a substantive operating entity or is a special-purpose entity;
- the Holding's risk of loss on the asset relative to a full-recourse loan;
- the extent to which the collateral represents all or a substantial portion of the borrower's assets; and
- whether the Holding will benefit from any upside from the underlying assets.

Reclassification. Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Holding changes its business model for managing financial assets.

Financial liabilities

The Holding classifies its financial liabilities, other than financial guarantees, as measured at amortised cost or FVTPL.

Reclassification. Financial liabilities are not reclassified subsequent to their initial recognition.

(ii) Derecognition

Financial assets. The Holding derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Holding neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

Any cumulative gain/loss recognised in other comprehensive income in respect of equity investment securities designated as at FVOCI is not recognised in profit or loss on derecognition of such securities.

The Holding enters into transactions whereby it transfers assets recognised in its consolidated statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. In such cases, the transferred assets are not derecognised. Examples of such transactions are securities lending and sale-and-repurchase transactions.

In transactions in which the Holding neither retains nor transfers substantially all of the risks and rewards of ownership of a financial asset and it retains control over the asset, the Holding continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

Financial liabilities. The Holding derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

(iii) Modification of financial assets and financial liabilities

Financial assets. If the terms of a financial asset are modified, the Holding evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different (referred to as 'substantial modification'), then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

Changes in cash flows on existing financial assets or financial liabilities are not considered as modification, if they result from existing contractual terms.

The Holding performs a quantitative and qualitative evaluation of whether the modification is substantial, i.e. whether the cash flows of the original financial asset and the modified or replaced financial asset are substantially different. The Holding assesses whether the modification is substantial based on quantitative and qualitative factors in the following order: qualitative factors, quantitative factors, combined effect of qualitative and quantitative factors. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In making this evaluation the Holding analogises to the guidance on the derecognition of financial liabilities.

The Holding concludes that the modification is substantial as a result of the following qualitative factors:

- change of the currency of the financial asset;
- change in collateral or other credit enhancement;
- change of terms of the financial asset that lead to non-compliance with SPPI criterion (e.g. inclusion of conversion feature).

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximise recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Holding plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place (see below for write off policy). This approach impacts the result of the quantitative evaluation and means that the derecognition criteria are not usually met in such cases. The Holding further performs qualitative evaluation of whether the modification is substantial.

If the modification of a financial asset measured at amortised cost or FVOCI does not result in derecognition of the financial asset, then the Holding first recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognises the resulting adjustment as a modification gain or loss in profit or loss.

For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

Financial liabilities. The Holding derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss. The consideration paid includes non-financial assets transferred, if any, and the liabilities assumed, including the new modified financial liability.

The Holding assesses whether the modification is substantial based on quantitative and qualitative factors in the following order: qualitative factors, quantitative factors, combined effect of qualitative and quantitative factors. The Holding concludes that the modification is substantial as a result of the following qualitative factors:

- change of the currency of the financial liability;
- change in collateral or other credit enhancement;
- inclusion of conversion option;
- change in the subordination of the financial liability.

For the quantitative assessment the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability.

If the modification of a financial liability is not accounted for as derecognition, then the amortised cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognised in profit or loss. For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

(iv) Impairment loss

See also Note 5.

The Holding recognises loss allowances for expected credit losses (ECL) on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- net investment in finance lease;
- financial guarantee contracts issued; and
- loan commitments issued.

No impairment loss is recognised on equity investments.

The Holding measures loss allowances at an amount equal to lifetime ECLs, except for the following, for which they are measured as 12-month ECLs:

- debt investment securities that are determined to have moderate credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition (see Note 5).

12-month expected credit losses (12-month ECL) are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial instruments for which a 12-month ECL is recognised are referred to as 'Stage 1' financial instruments.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. Financial instruments, for which a lifetime ECL is recognised are referred to as 'Stage 2' financial instruments (if the credit risk has increased significantly since initial recognition, but the financial instruments are not credit-impaired) and 'Stage 3' financial instruments (if the financial instruments are credit-impaired).

Measurement of expected credit losses (ECL). ECLs are a probability-weighted estimate of credit losses. They are measured as follows:

- *financial assets that are not credit-impaired at the reporting date* as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Holding in accordance with the contract and the cash flows that the Holding expects to receive);
- *financial assets that are credit-impaired at the reporting date:* as the difference between the gross carrying amount and the present value of estimated future cash flows;
- *undrawn loan commitments:* as the present value of the difference between the contractual cash flows that are due to the Holding if the commitment is drawn down and the cash flows that the Holding expects to receive; and
- *financial guarantee contracts:* the present value of expected payments to reimburse the holder less any amounts that the Holding expects to recover. See Note 5.

Restructured financial assets. If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised and ECLs are measured as follows:

- If the expected restructuring does not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset.
- If the expected restructuring results in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

Credit-impaired financial assets. At each reporting date, the Holding assesses whether financial assets carried at amortised cost and debt financial assets at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being past due;
- the restructuring of a loan or advance on terms that the Holding would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower's condition was usually considered to be credit-impaired unless there was evidence that the risk of not receiving contractual cash flows had reduced significantly and there were no other indicators of impairment.

In making an assessment of whether an investment in sovereign debt (other financial assets) is credit-impaired, the Holding considers the following factors:

- the market's assessment of creditworthiness as reflected in the bond yields.
- the rating agencies' assessments of creditworthiness.
- the country's ability to access the capital markets for new debt issuance;

- the probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness;
- the international support mechanisms in place to provide the necessary support as 'lender of last resort' to that country, as well as the intention, reflected in public statements of governments and agencies to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intent, whether there is the capacity to fulfil the required criteria.

Loss allowances for ECL are presented in the consolidated statement of financial position as follows:

- *financial assets measured at amortised cost*: as a deduction from the gross carrying amount of the assets;
- *loan commitments and financial guarantee contracts*: generally, as a provision;
- *debt instruments measured at FVOCI*: no loss allowance is recognised in the consolidated statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the fair value reserve.

Write-offs. Loans and debt securities are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset. This is generally the case when the Holding determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level.

Recoveries of amounts previously written off are included in 'provision for loan portfolio impairment' and 'provision for impairment on other assets and credit related commitments' in the consolidated statement of profit or loss and other comprehensive income.

However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Holding's procedures for recovery of amounts due.

Financial guarantees and loan commitments. Financial guarantees are contracts that require the Holding to make specified payments to reimburse the holder for a loss that it incurs because a specified debtor fails to make payment when it is due in accordance with the terms of a debt instrument. Loan commitments are firm commitments to provide credit under pre-specified terms and conditions.

Financial guarantees issued or commitments to provide a loan at a below-market interest rate are initially measured at fair value. Subsequently, they are measured at the higher of the loss allowance determined in accordance with IFRS 9 and the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of IFRS 15.

The Holding has issued no loan commitments that are measured at FVTPL. For other loan commitments the Holding recognises a loss allowance. Liabilities arising from financial guarantees and loan commitments are included within other liabilities.

Assets held for sale. Assets and disposal groups, which may include both non-current and current assets, are classified in the consolidated statement of financial position as 'assets held for sale' if their carrying amount will be recovered principally through a sale transaction, including loss of control of a subsidiary holding the assets, within twelve months after the end of the reporting period. Assets are reclassified when all of the following conditions are met: (a) the assets are available for immediate sale in their present condition; (b) the Holding's management approved and initiated an active programme to locate a buyer; (c) the assets are actively marketed for sale at a reasonable price; (d) the sale is expected within one year and (e) it is unlikely that significant changes to the plan to sell will be made or that the plan will be withdrawn. Assets or disposal groups classified as held for sale in the current period's consolidated statement of financial position are not reclassified or re-presented in the comparative consolidated statement of financial position to reflect the classification at the end of the current period.

A disposal group is a group of assets (current and non-current) to be disposed of, by sale or otherwise, together as a group in a single transaction, and liabilities directly associated with those assets that will be transferred in the transaction. Goodwill is included if the disposal group includes an operation within a cash-generating unit to which goodwill has been allocated on acquisition. Assets are assets that include amounts expected to be recovered or collected more than in twelve months after the end of the reporting period. If reclassification is required, both the current and non-current portions of an asset are reclassified.

Held for sale disposal groups are generally measured at the lower of their carrying amount and fair value less cost to sell. Held for sale property, plant and equipment, investment properties and intangible assets are not depreciated or amortised.

Liabilities directly associated with disposal groups that will be transferred in the disposal transaction are reclassified and presented separately in the consolidated statement of financial position.

Discontinued operation. A discontinued operation is a component of the Holding that either has been disposed of, or that is classified as held for sale, and: (a) represents a separate major line of business or geographical area of operations; (b) is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or (c) is a subsidiary acquired exclusively with a view to resale. Earnings and cash flows of discontinued operations, if any, are disclosed separately from continuing operations with comparatives being re-presented.

Government grants. Government grants are assistance by the Government, Government agencies and state-owned entities in the form of transfers of resources to the Holding in return for past or future compliance with certain conditions relating to the operating activities of the Holding. Government grants are not recognised until there is reasonable assurance that the Holding will comply with the conditions attached to them and the grants will be received. If there are conditions that may require repayment, the grant is recognised as a “deferred income” in ‘other liabilities’.

The benefit of a government loan at a below-market rate of interest is treated as a government grant where the government does not act as a shareholder. The benefit of the below-market rate of interest is measured as the difference between the initial carrying value of the loan and the proceeds received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Holding recognises as expenses the related costs which the grants are intended to compensate.

There are two principal approaches to account for government grants: the capital approach, under which a grant is recognised outside profit or loss, and the income approach, under which a grant is recognised in income/expense over one or more periods.

Where the government acts as a lender - i.e. in the same way as an unrelated lender - then a government grant is recognised in profit or loss. If the loan is from the government acting in the capacity of a shareholder, then the government grant received is recorded in equity.

Income tax. Income taxes have been provided for in the consolidated financial statements in accordance with legislation enacted using tax rates and provision of law or substantively enacted by the end of the reporting period. The income tax charge comprises current tax and deferred tax and is recognised in profit or loss for the year, except if it is recognised in comprehensive income or directly in equity because it relates to transactions that are also recognised, in the same or a different period, in comprehensive income or directly in equity.

Current tax comprises the expected tax payable or receivable from tax authorities on the taxable income or loss for the reporting and previous periods. The taxable income or loss are based on estimates, if the consolidated financial statements are approved prior to submission of tax returns. Taxes, other than on income, are recorded within administrative and other expenses.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded for temporary differences on initial recognition of an asset or a liability in a transaction other than a business combination if the transaction, when initially recorded, affects neither accounting nor taxable profit. Deferred tax assets and liabilities are measured at tax rates enacted or substantively enacted at the end of the reporting period, which are expected to apply to the period when the temporary differences will reverse or the tax loss carry forwards will be utilised. Deferred tax assets and liabilities are offset only within the individual components of the Holding.

Deferred tax assets are recognised for deductible temporary differences and carry-forward tax losses, to the extent that it is probable that future taxable profits will be available which may be reduced by such deducted amounts.

Deferred income tax is not recognised on post-acquisition retained earnings and other post-acquisition movements in reserves of subsidiaries where the Holding controls the subsidiary's dividend policy, and it is probable that the difference will not reverse through dividends or otherwise in the foreseeable future.

Uncertain tax positions. The Holding's uncertain tax positions are reassessed by management at the end of each reporting period. Liabilities are recorded for income tax positions that are determined by management as more likely than not to result in additional taxes being levied if the positions of the Holding were to be challenged by the tax authorities. The assessment is based on the interpretation of tax laws that have been enacted or substantively enacted by the end of the reporting period and any known court or other rulings on such issues. Liabilities for penalties, interest and taxes other than on income are recognised based on management's best estimate of the expenditure required to settle the obligations at the end of the reporting period.

Share capital. Ordinary shares and non-redeemable preference shares with discretionary dividends are both classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds. Any excess of the fair value of consideration received over the par value of shares issued is recorded as share premium in equity.

Dividends. Dividends are recognised as a liability and deducted from equity at the reporting date only if they are declared and authorised before or on the reporting date. Any dividends recommended prior to the end of the reporting period and recommended or declared after the end of the reporting period but before the consolidated financial statements are authorised for issue are disclosed in the consolidated financial statements.

Additional paid-in capital. The Holding and its subsidiaries receive funding from the Government of the Republic of Kazakhstan, “National Welfare Fund “Samruk-Kazyna” JSC (the “NWF Samruk Kazyna JSC”) or public bodies responsible for various state programmes, in the form of loans and subordinated bonds at a low interest rate. At initial recognition, this financing is recognised at fair value, which is estimated using appropriate market interest rates to discount contractual future cash flows. The difference between the fair value and the funding received is recognised as additional paid-in capital, except for the loans issued with specific conditions on return of the undisbursed portion of the funds. Difference between the fair value of the loans issued with the payback claim and funds received is recognised as deferred income, which is transferred to profit or loss during the loan term.

Presentation of the consolidated statement of financial position in the order of liquidity. The Holding does not have a clearly identifiable operating cycle and therefore does not present current and non-current assets and liabilities separately in the consolidated statement of financial position. Instead, analysis of assets and liabilities by their expected and contractual maturities are presented in Note 31.

New standards and interpretations not yet adopted. A number of new standards and amendments to standards are effective for annual periods beginning on 1 January 2025 and earlier application if permitted; however, the Holding has not early adopted the new or amended standards in preparing these consolidated financial statements.

The following new and amended standards are not expected to have a significant impact on the Holding's consolidated financial statements:

- *Lack of Exchangeability (Amendments to IAS 21);*
- *Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures;*
- *IFRS 18 Presentation and Disclosure in Financial Statements.*

The new amendments to the standards that became effective on 1 January 2024, had no impact on the Holding's consolidated financial statement.

4 Critical accounting estimates and judgements in applying accounting policies

The Holding makes estimates and assumptions that affect the amounts recognised in the consolidated financial statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are reviewed on an ongoing basis, based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements in the process of applying the accounting policies. Judgments that have the most significant effect on the amounts recognised in the consolidated financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Impairment of financial instruments. Assessment of whether credit risk on the financial asset has increased significantly since initial recognition; assessment of probability of default (PD) and loss given default (LGD); assessment of expected cash flows forecast for financial instruments classified as Stage 3 instruments and incorporation of forward-looking information in the measurement of ECL – Note 5.

Tax legislation. Kazakhstani tax, currency and customs legislation is subject to varying interpretations (Note 33).

Initial recognition of related party transactions. In the ordinary course of business, the Holding transacts with its related parties. Under IFRS 9, financial instruments on initial recognition are measured at fair value. Where there is no active market for such transactions, management applies judgement in determining whether transactions are priced at market or non-market interest rates. The basis for judgement is pricing for similar types of transactions with unrelated parties and effective interest rate analysis. Terms and conditions of related party balances are disclosed in Note 37.

Determining the fair value of financial instruments in emerging stock market in the Republic of Kazakhstan. In determining the fair value of financial instruments, the Holding uses quotes from the Kazakhstan Stock Exchange ("KASE") as the most reliable source of information in an active market.

The Holding's management analyses the frequency of operations conducted on the KASE in respect of securities in the portfolio and securities that are traded with sufficient frequency and sufficient volume are classified as Level 1 securities. The remaining securities that are listed on the KASE are classified as Level 2 securities.

If the Holding has investments in unquoted assets, the fair value of such assets is determined based on valuation techniques such as discounted cash flow model as well as models based on data from similar operations performed on market conditions.

Management of the Holding believes that it used every possible and the most complete and accurate sources of fair value to measure reliably the fair value of these financial instruments.

Initial recognition of the borrowings and investments at the rates below market rates under the state development programmes. Approach to accounting for and evaluation of borrowings and loans made under the state programmes to support economic development and approach to accounting for amortisation and utilisation of government grants are disclosed in notes 8, 10, 11, 12, 16, 17, 18, 20, 23 and 27.

5 Financial risk review

This note presents information about the Holding's exposure to financial risks. For information on the Holding's financial risk management framework, see Note 31.

Credit risk - Amounts arising from ECL

See accounting policy in Note 3 (iv).

Significant increase in credit risk. When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Holding considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Holding's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the remaining lifetime probability of default (PD) as at the reporting date; with
- the remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations).

The Holding uses three criteria for determining whether there has been a significant increase in credit risk:

- quantitative test based on movement in probability of default (PD);
- qualitative indicators; and
- backstop of 30 days past due.

Credit risk grades. The Holding allocates each exposure to a credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors may vary depending on the nature of the exposure and the type of a borrower.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each exposure is allocated to a credit risk grade at initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade.

The monitoring typically involves use of the following data:

- Information obtained during periodic review of counterparty files – e.g. audited financial statements, management accounts, budgets and projections;
- Payment record – this includes overdue status;
- Data from credit reference agencies, press articles, changes in external credit ratings;
- Requests for and granting of forbearance.
- Quoted bond prices for the issuer where available;
- Existing and forecast changes in business, financial and economic conditions.
- Actual and expected significant changes in the political, regulatory and technological environment of the counterparty or the issuer or in its business activities.

Generating the term structure of PD. Credit risk grades are a primary input into the determination of the term structure of PD for exposures on loans to corporate customers. The Holding collects performance and default information about its credit risk exposures analysed by jurisdiction or region, type of product and borrower as well as by credit risk grading. For some portfolios of financial assets measured on an individual basis, information purchased from external credit reference agencies may also be used.

To determine the internal credit rating of a counterparty who does not have external credit rating from international agencies Standard & Poor's, Fitch Ratings and Moody's Investors Service, the Holding uses expert judgement to determine ratings with taking into account the specific characteristics of the counterparty, consisting of 10 categories, such as profitability, liquidity, leverage, country risk, industry characteristics, specific activities of the enterprise, risk of concentration, legal regulation, internal data and debt.

The Holding employs statistical models to analyse the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

For portfolios of financial assets measured on a collective basis, the Holding mainly uses statistical migration models built using Markov chain, given the impact of macroeconomic information. The Holding uses historical statistics on defaults for the last 5 years.

Determining whether credit risk has increased significantly. The Holding assesses whether credit risk has increased significantly since initial recognition at each reporting period. Determining whether an increase in credit risk is significant depends on the characteristics of the financial instrument.

The criteria for determining whether credit risk has increased significantly vary by portfolio and include quantitative changes in PDs and qualitative factors, including a backstop based on delinquency.

The Holding considers credit risk of a particular exposure is deemed to have increased significantly since initial recognition, if the issuer's credit rating decreased by 2 points and more since initial recognition.

The credit risk may also be deemed to have increased significantly since initial recognition based on qualitative factors linked to the Holding's credit risk management processes that may not otherwise be fully reflected in its quantitative analysis on a timely basis. This will be the case for exposures that meet certain heightened risk criteria. Such qualitative factors are based on its expert judgement and relevant historical experience.

As a backstop, the Holding considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the counterparty.

If there is evidence that there is no longer a significant increase in credit risk relative to initial recognition, then the loss allowance on an instrument returns to being measured as 12-month ECL. When contractual terms of a loan have been modified, evidence that the criteria for recognising lifetime ECL are no longer met includes history of up-to-date payments over at least 12 months after the terms were revised, directed for repayment of the gross carrying amount of the financial asset against the modified contractual terms.

The Holding monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default;
- the criteria do not align with the point in time when an asset becomes 30 days past due;
- there is no unwarranted volatility in loss allowance from transfers between 12-month ECL (stage 1) and lifetime ECL measurements (stage 2).

Definition of default. The Holding considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Holding in full, without recourse by the Holding to actions such as realising security (if any is held);
- the borrower is past due more than 90 days on any material credit obligation to the Holding; or
- it is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligations.
- In assessing whether a counterparty is in default, the Holding considers indicators that are:
 - qualitative – e.g. breaches of covenant;
 - quantitative – e.g. overdue status and non-payment on another obligation of the same issuer/borrower to the Holding, a decrease in the credit rating to D; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

Incorporating forward-looking information. The Holding incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL.

The Holding formulates a base scenario of future development of relevant economic variables and also considers a presented selection of other forecast scenarios. This process involves developing two or more additional economic scenarios and considering the appropriate probabilities of occurring of each scenario. External information considered includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Holding operates, such international organisations as the OECD, International Monetary Fund.

A base scenario is the most likely to occur and it is aligned with information used by the Holding for other purposes. Other are less likely to occur scenarios where some are upside and other downside scenarios.

The Holding has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses. The key driver is GDP forecasts. Taking into account lack of sufficient historical default data, the Group determined that the data provided by rating agencies would serve as a source of information for economic scenarios. Scenarios are updated on a regular basis and used in assessment of credit risks.

Key assumptions and judgements in estimating the allowance for losses on loans to corporate customers and finance leases receivables

Significant assumptions used by management in determining the amount of the allowance for losses on loans issued to corporate customers include the following:

- 12-month PD for borrowers with credit quality of Stage 1 was 0.1%-6.6%, lifetime PD level related to Stage 2 credit quality was 1.0%-52.9%;
- the weighted average level of LGD for borrowers in Stage 1 and Stage 2 was 45.3%.

Significant assumptions used by management in determining the amount of the allowance for losses on loans issued to agribusiness include the following:

- 12-month PD for borrowers with credit quality of Stage 1 was 0.8%-26.9%, lifetime PD level related to Stage 2 credit quality was 37.8%-89.9%;
- the weighted average level of LGD for borrowers in Stage 1 and Stage 2 was 23.2%.

Significant assumptions used by management in determining the amount of the allowance for losses on mortgage loans include the following:

- 12-month PD for borrowers with credit quality of Stage 1 was 0.002%-0.01%, lifetime PD level related to Stage 2 credit quality was 0.004%-0.03%;
- the weighted average level of LGD for borrowers in Stage 1 and Stage 2 was 37%.

Significant assumptions used by management in determining the amount of the allowance for losses on finance leases receivables include the following:

- 12-month PD for borrowers with credit quality of Stage 1 was 0.1%-48.8%, lifetime PD level related to Stage 2 credit quality was 0.1%-62.0%;
- the weighted average level of LGD for borrowers in Stage 1 and Stage 2 was 22.2%.

Modified financial assets and finance leases. The contractual terms of a financial instrument may be modified for a number of reasons, including changing market conditions, and other factors not related to a current or potential credit deterioration of the counterparty. An existing financial asset whose terms have been modified may be derecognised and the renegotiated asset recognised as a new financial asset at fair value in accordance with the accounting policy set out in Note 3 (iii).

If the modification is not a separate lease and the lease would not have been classified as an operating lease if the modification had been in effect at the inception date, then the lessor accounts for a modification to a finance lease applying IFRS 9 requirements.

When the terms of a financial asset are modified and the modification does not result in derecognition, the determination of whether the asset's credit risk has increased significantly reflects comparison of:

- its remaining lifetime PD at the reporting date based on the modified terms; with
- the remaining lifetime PD estimated based on data at initial recognition and the original contractual terms.

When modification results in derecognition, a new loan is recognised and allocated to Stage 1 (assuming it is not credit-impaired at that time).

The Holding renegotiates loans to customers in financial difficulties (referred to as 'forbearance activities') to maximise collection opportunities and minimise the risk of default. Under the Holding's forbearance policy, loan forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants.

For financial assets modified as part of the Holding's forbearance policy, the estimate of PD reflects whether the modification has improved or restored the Holding's ability to collect interest and principal and the Holding's previous experience of similar forbearance action. As part of this process, the Holding evaluates the borrower's payment performance against the modified contractual terms and considers various behavioural indicators.

Generally, forbearance is a qualitative indicator of a significant increase in credit risk and an expectation of forbearance may constitute evidence that an exposure is credit-impaired in default. A counterparty needs to demonstrate consistently good payment behaviour over a period of time before the exposure is no longer considered to be credit-impaired/in default or the PD is considered to have decreased such that the loss allowance reverts to being measured at an amount equal to 12-month ECL.

Measurement of ECLs. The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD).

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD.

The methodology of estimating PDs is discussed above under the heading “Generating the term structure of PD”.

The Holding estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. LGD is equal to 70%, if a counterparty is the Kazakhstani bank.

For collateralised financial assets, the Holding applies reduction factors ranging from 15.0% to 100.0% to the estimated value of collateral in case of sale, with a delay of 12 to 60 months in receiving proceeds from the sale of collateral, depending on the type of collateral. For portfolios of non-collateralised financial assets (including retail loans), LGDs are determined on the basis of the funds repayment statistics on average over the last 5 years.

For loans to large corporates included in DBK JSC’s portfolio, the Holding uses the methodology for determining LGD that was developed by the international company S&P Global Market Intelligence for loans classified to Stages 1 and 2. This methodology is based on historical statistics and determines individual loss given default rates depending on the type, industry and seniority of the instruments. When calculating the loss given default in LGD models, the costs to recover any collateral that is an integral part of the financial asset and the stress test results of the economic value of assets for occurrence of negative economic scenarios are also taken into account.

LGD estimates are recalibrated for different economic scenarios and, for real estate lending, to reflect possible changes in property prices. They are calculated on a discounted cash flow basis using the effective interest rate as the discounting factor.

Exposure at default represents the expected exposure in the event of a default.

The Holding derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortisation. The EAD of a financial asset is its gross carrying amount at the time of default. For lending commitments, the EAD is potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For financial guarantees, the EAD represents the guarantee exposure when the financial guarantee becomes payable.

As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the Holding measures ECL considering the risk of default over the maximum contractual period (including any borrower’s extension options) over which it is exposed to credit risk, even if, for credit risk management purposes, the Holding considers a longer period. The maximum contractual period extends to the date at which the Holding has the right to require repayment of an advance or terminate a loan commitment or guarantee.

For portfolios in respect of which the Holding has limited historical data, external benchmark information is used to supplement the internally available data. The portfolios for which external benchmark information represents a significant input into measurement of ECL are as follows.

(In thousands of Kazakhstani Tenge)	An exposure as at 31 December 2024	External benchmarks used	
		PD	LGD
Cash and cash equivalents	2,630,270,217		
Loans to banks and financial institutions	434,371,612		
Deposits with banks and financial institutions	303,606,110	S&P/Moody’s default study	For exposures with banks within Kazakhstan, LGD is based on historical recovery studies of defaulted financial institutions (70%)/ for other exposures, LGD is based on Moody’s recovery studies
Investment securities	1,862,346,099		
Government grants receivables	37,619,033		
Receivables from the Government for reimbursement of premium on customer accounts	55,026,392		

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

Credit quality analysis. The following table sets out information about the credit quality of financial assets measured at amortised cost, FVOCI debt instruments as at 31 December 2024. Unless specially indicated, for financial assets, the amounts in the table represent gross carrying amounts. For loan commitments and financial guarantee contracts, the amounts in the table represent the amounts committed or guaranteed, respectively.

*This category includes a loan with a gross carrying amount of Tenge 34,391,281 thousand issued to a bank that does not have an external credit rating. The Holding classified this loan in the category "from BBB- to BBB+", using the external credit rating of "BBB-" of the ultimate borrower who received these funds. In the event of default of the ultimate borrower, the rights of claim under the loan issued by the bank to the ultimate borrower are transferred to the Holding to repay the bank's loan obligations to the Holding.

As at 31 December 2024 and 31 December 2023, the Holding entered into reverse repurchase agreements on the Kazakhstan Stock Exchange. The subject of these agreements were treasury notes of the Ministry of Finance of the Republic of Kazakhstan, notes of the National Bank of the Republic of Kazakhstan, debt obligations of Kazakhstan Sustainability Fund JSC and debt obligations of the Eurasian Development Bank. The carrying amount of those agreements and fair value of securities pledged amounted to Tenge 1,461,850,333 thousand and Tenge 1,460,773,172 thousand, respectively (31 December 2023: Tenge 825,588,944 thousand and Tenge 824,825,199 thousand, respectively).

At 31 December 2024 the Holding had one counterparty bank (31 December 2023: one counterparty bank) whose total cash and cash equivalent balances exceed 10% of equity. The total aggregate amount of these balances at 31 December 2024 was Tenge 702,114,009 thousand (31 December 2023: Tenge 1,018,876,661 thousand) or 26.66% of cash and cash equivalents (31 December 2023: 45.99%).

The credit ratings are presented by reference to the credit ratings of Standard&Poor's credit ratings agency or analogues of similar international agencies.

Interest rate analysis of cash and cash equivalents is disclosed in Note 31. Information on related party transactions is disclosed in Note 37.

During 2024 the Holding recovered an impairment allowance for cash and cash equivalents in the amount of Tenge 25,030 thousand (Note 28) (2023: accrual of impairment allowance in the amount of Tenge 26,533 thousand).

Investment in AstanaGas KMG JSC

In October 2018, the Holding acquired 50% of ordinary voting shares of AstanaGas KMG JSC for the amount of Tenge 121 thousand and replenished additionally the charter capital for Tenge 40,150,000 thousand on 30 October 2018. AstanaGas KMG JSC was established to implement the project of gas infrastructure development in Astana and northern region of the Republic of Kazakhstan, as well as other gas industry development programmes. This entity is considered to be joint venture.

The Holding financed the acquisition by issuing 40,150,000 bonds with par value of Tenge 1,000 per bond, which mature on demand and have a coupon interest of 0.01% p.a. According to the agreement concluded with the seller of the shares, the Holding has a 'put' option enabling the Holding to sell its share in equity investment AstanaGas KMG JSC in the amount of Tenge 40,150,000 thousand, with a yield of 0.01% p.a. upon expiry of 15 years and, if demanded so by holders of the bonds issued by the Holding, buy back issued bonds.

Investment in Kazakhstan Infrastructure Fund C.V.

In February 2017, to appoint new general partner to Kazakhstan Infrastructure Fund C.V. ("KIF"), the Holding and Verno Pe Eurasia GP Limited (hereinafter- the "General Partner") signed a limited partnership agreement (hereinafter - "LPA"). Under the terms and conditions of LPA, the amount of liabilities related to investment in KIF was allocated between the partners as follows:

- QIC JSC (USD 100 mln) - the 95.24% ownership interest;
- VERNO PE EURASIA GP (USD 5 mln) - the 4.76% ownership interest.

The main purpose to have established KIF is investing in share capital of corporates whose principal activities are development of infrastructure projects in target areas. KIF's operations are primarily located in Kazakhstan, while the country of incorporation is the Netherlands.

Nature and extent of the Holding's involvement

The Holding holds a 95% interest in KIF, and being a limited liability partner under the LPA, is not involved in the decision-making process related to KIF's investing activities.

KIF's management company is the General Partner who is responsible for making investing decisions, and governed by the Investment Policy in accordance with the LPA. The General Partner is free to select assets for capital investment and makes key decisions on the Fund's operating activities and investees' capital, including budgets and key management remuneration.

In accordance with the LPA, the Company may re-appoint a fund's manager, the General Partner, to protect its interests with regard to investees and KIF' operations. Under the terms of the LPA, there are certain conditions which are attached to the reappointment of the General Manager, including:

- imposing a pecuniary penalty in the amount of 2% of total investment liabilities;
- searching for a new general partner who is prepared for buy-out of the predecessor General Partner's rights and obligations.

These conditions make the general partner's reappointment process more difficult.

In accordance with the above, under IFRS 10 *Consolidated Financial Statements*, the Holding has no control over KIF as at 31 December 2024 and 31 December 2023.

Baiterek National Managing Holding Joint Stock Company

The main activity of the Holding is investing in order to generate income and capital gains. The Holding has an exit strategy for each of its investments. The Holding's investment activities are carried out through subsidiaries of the Holding. The Holding has an established monitoring and reporting system in relation to investment activities. The Holding also has an investment department and a risk management department, whose functions include managing the investment activities of the Holding, including reporting to the Holding Management and the Board of Directors. In addition, the Holding's investment objects are independent business entities in the operating activities of which the Holding takes a limited part, having no control over the investment objects.

Therefore, the Holding believes that it meets the definition of an organisation specialising in venture capital investments and uses the exemption from the need to use the equity method to account for investments in associates and joint ventures.

Refer to Note 35 for the estimated fair value of each class of other assets measured at fair value.

8 Loans to banks and financial institutions

	31 December 2024	31 December 2023
<i>(In thousands of Kazakhstani Tenge)</i>		
Loans to banks and financial institutions		
- BBB- to BBB+ rated	215,281,202	132,440,882

Less: impairment allowance	(40,675,779)	(40,751,866)
Total loans to banks and financial institutions	434,371,612	338,446,725

The credit ratings are presented by reference to the credit ratings of Standard&Poor's credit ratings agency or analogues of similar international agencies.

The Holding uses the following assumptions to estimate the market interest rates for determination of the fair value of financial instruments:

- Yield on long-term bonds issued by the Ministry of Finance of the Republic of Kazakhstan;
- The credit risk premium of the counterparty.

Movements in the provision for impairment of loans to banks and other financial institutions are as follows:

At 31 December 2024 and 2023 the Holding had no outstanding balances of loans to banks and financial institutions whose total balances exceed 10% of equity.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

During 2024 there was a significant change in the terms of loans issued to banks. These changes were caused by the Resolution of the Government of the Republic of Kazakhstan dated 7 March 2024 No. 156. As a result of the modification, the loan repayment period was reduced from 2052 to 2030, which also entailed the derecognition of the previous financial instrument and the recognition of a new financial instrument. These loans were recognised at fair value at initial recognition, which was determined using market rates of 13.78% - 15.59% p.a., the discount upon initial recognition was amounted to Tenge 54,477,146 thousand. As a result of the above transactions, the balance of the government grant was recalculated for a total of Tenge 36,168,442 thousand tenge (Note 20) due to the fact that the Holding has an obligation to reinvest the funds received from borrowers under the current State program.

During 2024, banks made early repayments of the loans in the amount of Tenge 30,662,890 thousand, which corresponded to the initial terms of the agreement. As a result of this early repayment, the balance of the government grants was recalculated for a total of Tenge 18,850,172 thousand.

Refer to Note 35 for the estimated fair value of each class of amounts due from banks. An interest rate analysis of due from banks is disclosed in Note 31. Information on related party transactions is disclosed in Note 37.

As at 31 December 2024 and 2023 the Holding had no outstanding balances of deposits with banks and financial institutions whose total balances exceed 10% of equity.

Refer to Note 35 for the estimated fair value of each class of deposits with banks and financial institutions. An interest rate analysis of due from banks is disclosed in Note 31. Information on related party transactions is disclosed in Note 37.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

10 Loans to customers

	31 December 2024	31 December 2023
<i>(In thousands of Kazakhstani Tenge)</i>		
Loans to customers measured at amortised cost		
Mortgage loans	3,425,821,806	3,154,584,436
Loans to corporate customers	2,279,529,636	1,831,111,413
Loans issued to agribusiness companies	1,040,126,276	909,801,674
Loans issued to small and medium entities ("SME")	12,862,337	7,522,075
Gross loans to customers measured at amortised cost	6,758,340,055	5,903,019,598
Less impairment allowance for loans	(409,201,035)	(369,835,069)
Total net loans to customers measured at amortised cost	6,349,139,020	5,533,184,529
Loans to customers measured at fair value through profit or loss	226,107,849	188,327,278
Total loans to customers	6,575,246,869	5,721,511,807

In determining the fair value of loans to customers measured at fair value through profit or loss, management made assumptions that the following market rates are appropriate for the Holding: from 13.70% to 20.02% (2023: from 14.01% to 26.67% in Tenge). None of the loans to customers measured at fair value through profit or loss are past due.

As at 31 December 2024 mortgage loans portfolio consisted of mortgage loans issued directly in the amount of Tenge 3,400,681,611 thousand (2023: Tenge 3,120,453,506 thousand) and of mortgage loans purchased from commercial banks in the amount of Tenge 25,140,195 thousand (2023: Tenge 34,130,930 thousand).

Significant changes in the gross carrying amount of loans measured at amortised cost were as follows:

The tables above are presented excluding overcollateralisation.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

For loans secured by multiple types of collateral, collateral that is most relevant for impairment assessment is disclosed. Certain guarantees and sureties received from individuals, such as shareholders of borrowers, are not considered for impairment assessment purposes.

The recoverability of credit-unimpaired loans to corporate customers is primarily dependent on the creditworthiness of the borrowers rather than the value of collateral, and the Holding does not necessarily update the valuation of collateral as at each reporting date.

For mortgage loans with recourse to the seller the commercial banks-partners are responsible for monitoring of collateral on a periodic basis according to the requirements of the NBRK. The recoverability of these loans is primarily dependent on the creditworthiness of the borrowers and commercial banks-partners rather than the value of collateral, and the current value of the collateral does not impact the impairment assessment.

The fair value of residential real estate collateral on mortgage loans at the end of the reporting period was estimated by indexing the values determined by the Holding subsidiaries' internal credit department staff at the time of loan inception for the average changes in residential real estate prices by city and region. The Holding may also obtain a specific individual valuation of collateral at each reporting date. The fair value of other real estate and other assets was determined by the Holding subsidiaries' credit department by considering the condition and location of the assets accepted as collateral.

The fair value of collateral exceeded the carrying amount less impairment allowance by mortgage loans as at 31 December 2024 and 2023.

Economic sector risk concentrations within the loan portfolio are as follows:

(In thousands of Kazakhstani Tenge)	31 December 2024		31 December 2023

Analysis of movements in gross carrying amount of corporate customers finance lease receivables

Increase in financing of lease transactions for 2024 caused increase in gross carrying amount of lease portfolio for the total amount of Tenge 495,882,304 thousand and appropriate increase in loss allowance for the portfolio by Tenge 19,897,879 thousand, including by stages:

Stage 1: increase in gross carrying amount of lease portfolio by Tenge 207,914,647 thousand and increase in loss allowance by Tenge 5,791,575 thousand;

Stage 2: increase in gross carrying amount of lease portfolio by Tenge 272,825,017 thousand resulted in increase in loss allowance by Tenge 8,861,507 thousand;

Stage 3: increase in gross carrying amount of lease portfolio by Tenge 15,142,640 thousand and increase in loss allowance by Tenge 5,244,797 thousand.

Decrease in the receivables of gross carrying amount of Tenge 217,321,119 thousand resulted in decrease in loss allowance for the portfolio by Tenge 22,757,559 thousand, including by stages:

Stage 1: decrease in gross carrying amount of lease portfolio by Tenge 183,522,669 thousand and decrease in loss allowance Tenge 6,097,954 thousand;

Stage 2: decrease in gross carrying amount of lease portfolio by Tenge 14,980,612 thousand and decrease in loss allowance by Tenge 6,416,385 thousand;

Stage 3: decrease in gross carrying amount of lease portfolio by Tenge 18,817,838 thousand and decrease in loss allowance by Tenge 10,243,220 thousand.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

Availability of factors of stabilisation of operating activities of counterparties categorised as Stage 3 using the projected cash flow discounting model in addition to the cash flows from sale of collaterals resulted in decrease in portfolio net loss allowance by Tenge 3,495,308 thousand.

Increase in financing of leasing operations for 2023 has caused growth of the portfolio gross carrying amount by the total amount of Tenge 238,186,289 thousand, respective net increase in the portfolio loss allowance by Tenge 15,056,942 thousand, including that by stages:

Stage 1: increase in the portfolio gross carrying amount by Tenge 196,827,833 thousand and increase in loss allowance by Tenge 6,104,966 thousand;

Stage 2: increase in the portfolio gross carrying amount by Tenge 24,604,439 thousand and increase in the loss allowance by Tenge 1,420,055 thousand;

Stage 3: increase in the portfolio gross carrying amount by Tenge 16,754,017 thousand and increase in loss allowance by Tenge 7,531,921 thousand.

Decrease in the receivable with gross carrying amount of Tenge 142,393,940 thousand resulted in decrease of portfolio loss allowance for expected credit losses by Tenge 11,663,372 thousand, including that by stages:

Stage 1: decrease in the portfolio gross carrying amount by Tenge 112,760,671 thousand and decrease in the loss allowance for expected credit losses by Tenge 4,099,668 thousand;

Stage 2: decrease in the portfolio gross carrying amount by Tenge 21,201,499 thousand and decrease in the loss allowance for expected credit losses by Tenge 1,238,210 thousand;

Stage 3: decrease in the portfolio gross carrying amount by Tenge 8,431,770 thousand and decrease in loss allowance for expected credit losses by Tenge 6,325,494 thousand.

Analysis of movements in gross carrying amount of finance lease receivables to agro-industrial entities

Increase in financing of leasing operations for 2024 has caused growth of the portfolio gross carrying amount by the total amount of Tenge 207,893,160 thousand (31 December 2023: Tenge 140,575,098 thousand) and respective increase in the portfolio loss allowance by Tenge 6,477,294 thousand (31 December 2023: Tenge 1,847,904 thousand).

Repayment of finance lease receivables of Stage 3 in the amount of Tenge 10,309,620 thousand (31 December 2023: Tenge 5,445,608 thousand) resulted in a decrease of Tenge 2,527,650 thousand in the allowance for expected credit losses (31 December 2023: Tenge 2,004,089 thousand).

Transfer of finance lease receivables to Stage 3 in the amount of Tenge 94,395,544 thousand (31 December 2023: Tenge 62,430,047 thousand) resulted in an increase of Tenge 8,107,941 thousand in the allowance for expected credit losses (31 December 2023: Tenge 7,112,847 thousand).

Transfer of finance lease receivables from Stage 3 to Stage 2 in the amount of Tenge 19,865,307 thousand (31 December 2023: Tenge 12,060,094 thousand) resulted in a decrease of Tenge 1,312,285 thousand in the allowance for expected credit losses (31 December 2023: Tenge 1,489,955 thousand).

Transfer of finance lease receivables from Stage 1 to Stage 2 in the amount of Tenge 72,688,740 thousand (31 December 2023: Tenge 49,009,423 thousand) resulted in an increase of Tenge 2,142,530 thousand in the allowance for expected credit losses (31 December 2023: Tenge 2,291,324 thousand).

Credit quality of finance lease portfolio

The following table provides information on the credit quality of the finance lease portfolio as at 31 December 2024 and 31 December 2023:

<i>(In thousands of Kazakhstani Tenge)</i>	Stage 1 12-month ECL	Stage 2 Lifetime ECL not credit- impaired	Stage 3 Lifetime ECL credit- impaired	POCI	Total

Total finance leases	1,039,216,463	65,212,156	107,686,389	15,420	1,212,130,428

As at 31 December 2024 and 31 December 2023, all projects overdue from 30 days to 90 days were classified to Stage 2, overdue more than 90 days - to Stage 3.

Analysis of collateral. The following tables provides information on collateral, leased assets and other credit enhancements related to finance lease receivables (net of loss allowance and excluding embedded financial derivative instrument) as at 31 December 2024, by types of collateral:

(In thousands of Kazakhstani Tenge)	Finance lease receivables, carrying amount	Fair value of collateral - for collateral assessed as of reporting date
Lease under which ECL are measured on the basis of lifetime ECL for credit-impaired assets:		
Guarantees from legal entities (rated from BB- to BBB-)	90,354	-
Real estate	29,819,381	29,801,381
Vehicles	123,081,300	123,080,659
Equipment	3,995,102	3,730,043
Land plots	85,970	85,970
Other assets	2,252,474	35,443
No collateral or other credit enhancement	111,857	-
Lease under which ECL are measured on the basis of lifetime ECL for credit-impaired assets	159,436,438	156,733,496
Purchased credit-impaired assets on initial recognition:		
Vehicles	44,165	44,165
Total finance lease receivables	1,578,562,791	1,439,834,371

The following table provides information on collateral, leased assets and other credit enhancements securing finance lease receivables, net of impairment allowance, by types of collateral as at 31 December 2023:

(In thousands of Kazakhstani Tenge)	Finance lease receivables, carrying amount	Fair value of collateral - for collateral assessed as of reporting date
Lease under which ECL are measured on the basis of lifetime ECL for credit-impaired assets:		
Real estate	15,260,291	13,030,205
Vehicles	73,399,765	53,350,433
Equipment	13,572,243	9,912,083
Other assets	4,758,519	1,906,667
Guarantees from legal entities (rated from BB- to BBB-)	265,608	-
No collateral or other credit enhancement	429,963	-
Lease under which ECL are measured on the basis of lifetime ECL for credit-impaired assets:	107,686,389	78,199,388
Purchased credit-impaired assets on initial recognition:		
Vehicles	15,420	15,420
Total finance lease receivables	1,212,130,428	1,118,301,701

The tables above exclude overcollateralisation.

The Holding has no finance lease receivables, for which the fair value of collateral was assessed at the loan inception date and it was not updated for further changes, and finance lease receivables for which the fair value of collateral is not determined. Information on the valuation of collateral is based on when this estimate was made, if any.

For finance lease receivables secured by multiple types of collateral, collateral that is most relevant for impairment assessment is disclosed. Sureties received from individuals, such as shareholders of small- and medium-sized leaseholders, are not considered for impairment assessment purposes. Accordingly, such finance lease receivables and unsecured portions of partially secured exposures are presented as lease without collateral or other credit enhancement.

The recoverability of finance lease receivables, which are neither past due nor credit-impaired, primarily depends on the creditworthiness of lessees rather than the value of collateral, and the Holding does not necessarily update the valuation of collateral as at each reporting date.

Foreclosed leased assets

During the year ended 31 December 2024, the Holding has foreclosed the leased items in the amount of Tenge 1,455,012 thousand (2023: Tenge 3,404,892 thousand).

13 Assets held for sale

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2024	31 December 2023
Other non-current assets held for sale	2,827,982	5,739,324
Disposal group held for sale (Bereke Bank JSC)	-	1,869,174,501
Assets held for sale	2,827,982	1,874,913,825

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2024	31 December 2023
Liabilities directly related to a disposal group held for sale (Bereke Bank JSC)	-	1,480,414,887

Disposal groups held for sale

In May 2023, the Holding's management made decision to sell shares of Bereke Bank JSC, which represents a separate major line of the Holding's business - provision of second-tier commercial bank services. Accordingly, as at 31 December 2023 the assets and liabilities of Bereke Bank were presented as a disposal group held for sale. Necessary arrangements for the sale of this disposal group have been initiated and its sale was expected to occur during 2024.

During 2023 an impairment loss of Tenge 70,268,860 thousand on the remeasurement of the disposal group to the lower of its carrying amount and its fair value less costs to sell, limited to the carrying amount of assets within the disposal group to which the measurement requirements of IFRS 5 apply has been recognised as the impairment loss on remeasurement of disposal group in the consolidated statement of profit or loss. The impairment losses have been allocated to reduce the carrying amount of property, plant and equipment, intangible assets and other assets within the disposal group.

As at 31 December 2023, this disposal group included the following assets and liabilities:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2023
Cash and cash equivalents	695,508,737
Loans to banks and financial institutions	11,156,524

15 Customer accounts

	31 December 2024	31 December 2023
<i>(In thousands of Kazakhstani Tenge)</i>		
State and public organisations		
- Current accounts	196,635	198,758
- Advances received as collateral for customer commitments	-	3,084
Other legal entities		
- Term deposits	170,576,666	73,157,065
- Current accounts	5,755,714	47,501,683
- Advances received as collateral for customer commitments	-	2
Individuals		
- Deposits	1,416,391,090	1,261,175,214
- Deposits received as collateral for customer commitments	1,007,647,371	1,101,625,246
- Current accounts/on demand accounts	91,402,414	67,781,352
Total customer accounts	2,691,969,890	2,551,442,404

Term deposits of individuals mainly include housing savings of Otbas Bank JSC's customers. According to the terms of the Contract on house construction savings, the Otbas Bank JSC's depositors have the right to receive housing loan in the amount equal to a difference between contract amount and their accumulated deposits, estimated fees and state premium based on the decision of government, in the case if all requirements of signed contract of house construction savings are fulfilled.

In accordance with the law about housing construction savings the Government annually allocates certain amounts of premium on customer accounts of Otbas Bank JSC denominated in Tenge from the republican budget of the Republic of Kazakhstan. In the event that the amount of the bonus provided for by the budget for the relevant year is insufficient, after prior notification of the budget program administrator and in the event of approval by the budget program administrator, Otbas Bank JSC makes payments on behalf of the Government from its own funds. As at 31 December 2024 the premium paid from Otbas Bank JSC's own funds is recognised as receivables from the Government for reimbursement of premium on customer accounts for individuals in the amount of Tenge 55,026,392 thousand.

16 Debt securities issued

	31 December 2024	31 December 2023
<i>(In thousands of Kazakhstani Tenge)</i>		
Other Tenge-denominated bonds	3,905,186,131	3,178,934,038

Mortgage bonds	61,446,752	61,494,162
Other US dollar-denominated bonds	51,065,378	6,815,426
Total debt securities issued	5,197,698,088	3,801,898,128

US dollar-denominated Eurobonds. Eurobonds comprise the following bonds issued by the Holding's subsidiary, DBK JSC:

- medium-term bonds with nominal value of USD 500,000 thousand issued on 12 May 2022 at coupon rate of 5.75% p.a., which mature in May 2025;
- long-term bonds with nominal value of USD 97,416 thousand issued on 23 March 2006 at coupon rate of 6.00% p.a., which mature in March 2026;
- medium-term bonds with a nominal value of USD 500,000 thousand, issued on 15 April 2024 at coupon rate of 5.50%, which mature in April 2027;
- medium-term bonds with a nominal value of USD 500,000 thousand issued on 23 October 2024 at coupon rate of 5.25%, which mature in October 2029.
- medium-term bonds with nominal value of USD 500,000 thousand issued on 6 May 2021 at coupon rate of 2.95% p.a., which mature in May 2031;

On 17 April 2024 the Holding partially redeemed, ahead of schedule, the Eurobonds of the 9th tranche for the total amount of USD 163,154 thousand (equivalent to Tenge 73,225,147 thousand). The expense from the repurchase of these Eurobonds amounted to Tenge 266,636 thousand.

On 2 May 2024, the Holding partially redeemed, ahead of schedule, the Eurobonds of the 12th tranche for the total amount of USD 1,067 thousand (equivalent to Tenge 471,667 thousand), recognizing income from repurchase in the amount of Tenge 12,881 thousand.

Tenge-denominated Eurobonds. Eurobonds comprise the following bonds issued by the Holding's subsidiary, DBK JSC:

- bonds with nominal value of Tenge 62,500,000 thousand issued on 12 February 2020 at coupon rate of 10.75% p.a. and maturing in February 2025;
- bonds with nominal value of Tenge 100,000,000 thousand issued on 6 May 2021 at coupon rate of 10.95% p.a. and maturing in May 2026;
- bonds with nominal value of Tenge 100,000,000 thousand issued on 15 April 2024, with a coupon rate of 13.00% p.a., and maturing in April 2027;
- bonds with nominal value of Tenge 65,000,000 thousand issued on 23 October 2024, with a coupon rate of 13.49% p.a., and maturing in May 2028.

On 17 April 2024, the Holding made a partial early purchase of Eurobonds for a total amount of Tenge 20,162,030 thousand. The expense from the repurchase of these Eurobonds amounted to Tenge 342,901 thousand.

On 3 May 2023 the Holding fully repaid Eurobonds issued in 2018 in the amount of Tenge 100,000,000 thousand.

Mortgage bonds. Mortgage bonds comprise debt securities issued by KHC JSC denominated in Tenge. These bonds have fixed coupon rates varying from 0.10% to 10.50% p.a. (effective interest rates vary from 10.27% to 13.09% p.a.). They will be redeemed during 2027-2054.

During the year ended 31 December 2024, in accordance with the Programme for Refinancing Mortgage Housing Loans (Mortgage Loans) approved by the Resolution No.69 of the Management Board of the National Bank of Kazakhstan dated 24 April 2015, the Holding placed coupon bonds in the amount of Tenge 1,153,662 thousand at coupon rate of 0.10% p.a. (2023: Tenge 39,332 at coupon rate of 0.1% and 2.99% p.a.). The bonds were recognised at fair value of Tenge 32,834 thousand (2023: Tenge 1,182 thousand), calculated using the market rate of 13.09% (2023: 13.80% p.a.), and the difference between the nominal value and fair value of Tenge 1,120,828 thousand (2023: Tenge 38,150 thousand) was recognised as a government grant (Note 20) and partially used in the amount of Tenge 1,099,664 thousand.

As a result of amendments to the Programme for Refinancing Mortgage Housing Loans (Mortgage Loans), the Framework Agreements between the Holding and JSC "Kazakhstan Sustainability Fund" were accordingly revised to reduce the coupon rate on the bonds to 0.10% per annum, effective 1 August 2024. The bonds were recognized at fair value, calculated using a market interest rate of 12.63% p. a., and the difference between the nominal value and the fair value of Tenge 276,073 thousand, was recognized as a government grant.

Other USD-denominated bonds. Other USD-denominated bonds comprise the following bonds issued by the Holding's subsidiary, DBK JSC:

- commercial bonds with a total nominal value of USD 50,000 thousand (equivalent to Tenge 22,425,735 thousand) issued on 26 April 2024, with additional placement on 9 July 2024 at coupon rate of 5.50% p.a. and maturing in April 2025;
- commercial bonds with a total nominal value of USD 46,300 thousand (Tenge 21,570,342 thousand) issued on 26 April 2024, with additional placement on 9 July 2024 at coupon rate of 5.50% p.a. and maturing in January 2025.

On 22 December 2023, the Holding's subsidiary - DBK JSC issued the first issue of green bonds on the AIX in the amount of USD 15,000 thousand certified under the international Climate Bonds Initiative standards at an interest rate of 5.65% p.a., maturing on 22 December 2024.

Other Tenge-denominated bonds. Other Tenge-denominated bonds comprise the following bonds:

- coupon bonds totalling Tenge 25,000,000 thousand (KZ2C00011260), at an interest rate of 4.00% p.a. and with maturity in 2030*.

* In accordance with the above-mentioned programs of state support and development, the Council for Management of the National Fund of the Republic of Kazakhstan sets terms and conditions for financing in the form of interest rates, financing schedule and related requirements for the Holding and commercial banks acting as program agents and end-use borrowers. In addition, the Government has approved special conditions, under which the Holding may provide further financing to the commercial banks and companies. For this reason, the difference that had arisen upon valuation of bonds purchased by Kazakhstan Sustainability Fund JSC - KZ2C00011286, KZ2C00011260 and KZ2C00011278 on behalf of the National Fund of the Republic of Kazakhstan in 2024 at the fair value at the placement date, was recognised as a government subsidy, as Kazakhstan Sustainability Fund JSC acted in the interests of the Government and not the Holding's ultimate shareholder, because all terms and conditions of the loans have been agreed on at the Government level in the resolution concerning financing of the above-mentioned programs, and the Government does not expect any direct economic benefits from these programs in its capacity of the Holding's shareholder as the ultimate beneficiaries are the subjects specified by the programs. Thus, in 2024 the Holding recognized the government grants for the amount of Tenge 75,906,809 thousand (Note 20).

In determining the fair value of the issued bonds upon initial recognition, the Holding has applied the market interest rates from 13.92% to 14.01% p.a.

In 2024 in view of the decision of the Council for National Fund Management of the Republic of Kazakhstan (the "CNFM"), the maturity dates of the issued debt securities with the carrying value of Tenge 87,940,623 thousand, which have been repurchased by Samruk-Kazyna JSC, were extended from 2026 to 2036. Due to significant modification of the terms of the agreements, the Holding derecognised the existing financial liability and recognised new financial liabilities. Accordingly, the debt securities issued were adjusted to fair value at the date of conclusion of additional agreements using the market interest rate of 12.57% per annum, which resulted in recognition of the effect of modification of terms in the amount of Tenge 61,212,227 thousand, which was recognised as part of government grants (Note 20).

During 2024, the Holding repaid debt securities to Kazakhstan Sustainability Fund JSC (KZ2C00006666) in the amount of the principal debt of Tenge 180,000,000 thousand.

During 2024, the Holding redeemed the debt securities issued (KZ2C00009397, KZ2C00005916, KZ2C00003911, KZ2C00003002, KZ2C00006781, KZ2C00006385, KZ2C00007045) for the total nominal amount Tenge 171,202,234 thousand.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

On 29 March 2023, the Holding issued green bonds in the amount of Tenge 10,000,000 thousand (KZ2C00009637) at a floating interest rate of TONIComp + 2.0% and with maturity on 29 March 2026. The funds from issue of green bonds were directed to finance the investment project for modernising power grids.

On 18 April 2023 with additional placement held on 12 May 2023, the Holding issued commercial bonds totalling Tenge 50,000,000 thousand (KZ2C00009397) at an interest rate of 15.25% p.a. and with maturity on 18 April 2024.

To cover the need for financing, on 16 June 2023, the bonds (KZ2C00008514) with a nominal value of Tenge 9,832,756 thousand were additionally placed among a wide range of market investors.

On 12 July 2023 the Holding issued coupon bonds with a nominal value of Tenge 20,000,000 thousand (KZ2C00009843) bearing an interest rate of 19.25% p.a. and maturing before 12 July 2030.

During the year ended 31 December 2024 the Holding entered into a credit line agreement dated 6 May 2024 No. 1879-i with SWF "Samruk-Kazyna" JSC based on the resolutions of the Government of the Republic of Kazakhstan dated 9 April 2024 No. 262 "On certain issues of the sale of rental housing with the right of privatisation" and dated 9 April 2024 No. 263 "On certain issues of the sale of rental housing with the right of privatisation". Under this agreement, the loan agreements were concluded for a total amount of Tenge 272,000,000 thousand with a maturity in 2034 and an interest rate of 0.01% p.a. The fair value of the loans at initial recognition was calculated by discounting future cash flows under the loan agreements using market interest rates in the range from 12.96% to 14.53% p.a. The discount on these loans was recognized as a government grant in the amount of Tenge 193,624,243 thousand (Note 20).

During the year ended 31 December 2024 the Holding raised a loan from Zhasyl Damu JSC in the amount of Tenge 120,546,835 thousand. Initially the loans were recognised at fair value that was determined using the market rates ranging from 12.83% to 14.54% p.a. The difference of Tenge 69,739,248 thousand between fair value and amounts received was recognised as a government grant due to the obligation of the Holding to distribute benefits to ultimate borrowers through providing financing to leasing companies for further financing of projects in the processing industry (Note 20).

During the year ended 31 December 2024 the Holding attracted a deposit from China Construction Bank Corporation Astana Branch in the total amount of USD 50,000 thousand, maturing on 22 October 2024.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

During the year ended 31 December 2024, the Holding raised a loan from Eurasian Development Bank for the total amount of USD 90,000 thousand maturing on 4 October 2024.

During the year ended 31 December 2024, the Holding raised a loan from China Development Bank for the total amount of USD 23,080 thousand maturing on 20 June 2033.

During the year ended 31 December 2024, the Holding raised a loan from China Construction Bank Corporation Astana Branch for the total amount of CNY 1,000,000 thousand maturing on 28 June 2027.

During the year ended 31 December 2024, the Holding raised a loan from China Development Bank for the total amount of CNY 746,378 thousand maturing on 13 December 2027.

During the year ended 31 December 2023 the Holding attracted an interbank deposit of USD 250,000 thousand, which matures in April 2024. On initial recognition of the deposit the Holding recognised gain of Tenge 334,520 thousand. Fair value on initial recognition of the loan was calculated using market rate of 6.16% p.a.

During the year ended 31 December 2023, the Holding repaid the outstanding balance of a loan from Eurasian Development Bank in the total amount of RUB 20,000,000 thousand.

During the year ended 31 December 2023, the Holding received a loan of KZT 20,000,000 thousand from Zhasyl Damu JSC. The loan was initially recognised at their fair value calculated using the market interest rate of 15.15% p.a. The difference of Tenge 17,573,479 thousand between fair value and amounts received was recognised as a government grant due to the obligation of the Holding to distribute benefits to the ultimate borrowers through providing financing to leasing companies for further financing of the projects in processing industry (Note 20).

During 2023, the Group modified significantly the loan from Zhasyl Damu JSC under the Contract No.4 dated 12 August 2022, as a result of modification the original financial liability was settled and new financial liability was recognised at fair value that was determined using the market rate of 15.83% p.a. As at the modification date - 30 October 2023, the effect from modification in the amount of Tenge 1,581,094 thousand was recorded within other expenses.

*In 2024, discount on initial recognition of Tenge 119,168,730 thousand (2023: Tenge 84,765,772 thousand) was recognised as a government grant (Note 20) in the consolidated statement of financial position. The Holding used estimated market interest rates from 12.60% to 14.10% p.a. (2023: 13.55% to 18.25% p.a.) to measure the fair value of the loans received from the Government of the Republic of Kazakhstan on initial recognition by discounting their future contractual cash flows.

**During 2024, discount on initial recognition of Tenge 46,508,438 thousand (2023: Tenge 64,334,180 thousand) was recognised directly in equity as an additional paid-in capital (less effect of the respective income tax of Tenge 9,301,688 thousand (2023: Tenge 12,866,836 thousand), as management determined that the Government acted in the capacity of a shareholder when providing the Holding with said financing instruments at interest rates below market rates, without any additional conditions. The Holding used estimated market interest rates ranging from 12.93% to 14.75% p.a. (2023: 12.54% to 14.75% p.a.) to measure the fair value of the loans received from the Government of the Republic of Kazakhstan at initial recognition by discounting their future contractual cash flows.

During 2024 the Holding partially repaid, ahead of schedule, the loans provided by the Government of the Republic of Kazakhstan in the amount of Tenge 39,344,828 thousand, as a result of such early repayment the government grant were recalculated for the amount of unamortised portion of the discount of Tenge 16,356,710 thousand (Note 20).

During 2023 the Holding fully repaid, ahead of schedule, the loans provided by the Government of the Republic of Kazakhstan in the amount of Tenge 29,717,949 thousand, as a result of such early repayment a loss of in the amount of unamortised portion of the discount of Tenge 2,926,899 thousand was recognised directly in equity as a transaction with a shareholder (net of effect of related income tax of Tenge 585,379 thousand).

Commitments under the government grant programmes. Funds received from local executive authorities, the state budget through the Ministry of National Economy of the Republic of Kazakhstan, and the United Nations Development Program in the Republic of Kazakhstan. These funds are then transferred to local banks as subsidy payments under projects implemented within the framework of the joint Order of Ministries of the Republic of Kazakhstan. This order is registered in the Register of State Registration of Regulatory Legal Acts under № 33681 dated 27 November 2023 and was later amended by Government Resolution of the Republic of Kazakhstan № 754 dated 17 September 2024, as well as the UNDP-GEF (United Nations Development Programme – Global Environment Facility) project "Reducing investment risks in renewable energy sources" and "Nationally appropriate mitigation measures for low-carbon urban development".

Amounts payable under repurchase agreements. As at 31 December 2024 debt securities of the Ministry of Finance of the Kingdom of Saudi Arabia, the Ministry of Finance of the State of Qatar, the Ministry of Finance of Mexico, and the Ministry of Finance of Indonesia, measured at fair value through other comprehensive income with carrying amount of Tenge 91,361,707 thousand (31 December 2023: bonds of Ministry of Finance of the Kingdom of Saudi Arabia with carrying amount of Tenge 31,368,459 thousand) are pledged as collateral under repurchase agreements

20 Government grants

The Holding recorded as government grants the amount of benefits received from loans provided at low interest rates by the National Fund of the Republic of Kazakhstan, SWF "Samruk-Kazyna" JSC, Ministry of Finance of the Republic of Kazakhstan and Zhasyl Damu JSC.

Subsequent to initial recognition, the Holding charged to profit or loss an amount corresponding to the renegotiated debt provided to the borrowers on favourable terms upon fulfilment of the conditions of the state programmes (Notes 8, 10, 11 and 12). The Holding is responsible for allocation benefits to ultimate borrowers through low interest loans.

As at 31 December 2024 the Holding has government grants receivables in the amount of Tenge 37,619,033 thousand with the respect to the government grant from the Government of the Republic of Kazakhstan for covering expenses related to the interest on debt securities issued, which has been recognised according to the Rules of bond coupon subsidies established by the Ministry of Agriculture of the Republic of Kazakhstan.

Other income from utilisation of government grants was recognised as income based on the results of compliance with the terms of the relevant government programmes (Note 20).

Income from utilisation of government grants includes income in the amount of Tenge 11,877,204 thousand in connection with the fulfillment of the terms of government grants recognised within the framework of the Resolutions of the Government of the Republic of Kazakhstan dated 9 April 2024 No. 262 "On certain issues of the sale of rental housing with the right of privatization" and dated 9 April 2024 No. 263 "On certain issues of the sale of rental housing with the right of privatization" (Note 20).

In 2024 the Holding recognised expense of Tenge 13,907,134 thousand (2023: Tenge 35,567,734 thousand) upon initial recognition of the fair value of commitments to extend loans at below market rates.

In 2024 the Holding recognised expense of Tenge 226,381,344 thousand (2023: Tenge 109,935,988 thousand) in the form of negative adjustment of value of the loan issued at below market rates. This amount includes expense of Tenge 56,104,885 thousand arising on initial recognition of loans to banks (2023: Tenge 12,079,140 thousand) and expense of Tenge 170,276,459 thousand arising on initial recognition of loans to customers (2023: Tenge 97,856,848 thousand).

During 2024, loss on initial recognition of loans banks arose from issuance of loans at a nominal interest rate ranging from 1.00% to 2.00% p.a., the market interest rates of which ranged from 14.36% to 15.82% p.a. (2023: at the nominal rate of 2.00%, the market rates on which ranged from 14.61% to 17.22% p.a.).

During 2024, loss on initial recognition of loans to customers arose from issuance of loans with a nominal interest rate ranging from 1.00% to 15.00% p.a., markets interest rates of which ranged from 7.00% to 21.26% p.a. (2023: a nominal interest rate ranging from 2.00% to 14.40% p.a., markets rates of which ranged from 7.25% to 23.20% p.a.).

28 Impairment allowance for other financial assets and credit related commitments

<i>(In thousands of Kazakhstani Tenge)</i>	2024	2023

Other	2,686,556	1,578,676
Total administrative expenses	97,512,811	81,147,769

Administrative expenses for 2024 include expenses for audit services and non-audit services provided by a single supplier in the amount of Tenge 930,237 thousand and Tenge 32,492 thousand, respectively (2023: expenses for audit services and non-audit services provided by a single supplier in the amount of Tenge 722,636 thousand and Tenge 198,480 thousand, respectively).

30 Income tax

Income tax expense recorded in profit or loss for the year comprises the following:

<i>(In thousands of Kazakhstani Tenge)</i>	2024	2023
Current tax	92,343,191	84,695,091
Deferred tax	(10,397,804)	(11,304,609)
Income tax expense for the year	81,945,387	73,390,482

The income tax rate applicable to the Holding's 2024 income is 20% (2023: 20%).

A reconciliation between the estimated and the actual tax charges is provided below:

<i>(In thousands of Kazakhstani Tenge)</i>	2024	2023
Profit before income tax	499,718,330	480,109,309
The estimated tax charges at statutory rate of 20% (2023: 20%).	99,943,666	96,021,862
- Non-taxable income on securities	(26,905,954)	(23,406,198)
- Tax exempt interest on finance lease receivables	(22,778,671)	(11,161,135)
- Non-deductible impairment losses on loans	9,563,200	3,010,804
- Other non-deductible expenses	3,854,003	8,802,878
- Change in unrecognised deferred tax assets	9,416,823	(6,963,894)
- Non-deductible expenses from revaluation of financial assets at fair value	344,389	1,610,662
- Adjustment of current income tax expense for prior years	(78,643)	(2,154,366)
- Income tax withheld at the source of payment	5,293,344	3,547,202
- Other	3,293,230	4,082,667
Income tax expense for the year	81,945,387	73,390,482

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

Deferred tax assets have not been recognised in respect of the following items:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2024	Change for the year	31 December 2023	Change for the year	1 January 2023
Finance lease receivables	1,254,797	-	1,254,797	-	1,254,797
Interest accrued at contractual rate and written off	64,664	-	64,664	-	64,664
Other financial assets at fair value through profit or loss	620,077	-	620,077	-	620,077
Other assets	27,760	-	27,760	-	27,760
Tax losses carry-forwards	49,148,699	11,677,570	37,471,129	(6,963,894)	44,435,023
Investment securities	3,582,791	(2,260,747)	5,843,538	-	5,843,538
Net unrecognised deferred tax assets	54,698,788	9,416,823	45,281,965	(6,963,894)	52,245,859

As at 31 December 2024, the Holding did not recognise the deferred tax asset of Tenge 54,698,788 thousand (31 December 2023: Tenge 51,245,859 thousand) due to uncertainty related to its utilisation.

Differences between IFRS and Kazakhstani statutory taxation regulations give rise to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their tax bases.

The tax effect of the movements in these temporary differences is detailed below, and is recorded at the rate of 20% (2023: 20%).

In the context of the Holding's current structure and Kazakhstani tax legislation, tax losses and current tax assets of different companies of the Holding may not be offset against current tax liabilities and taxable profits of other companies of the Holding and, accordingly, taxes may accrue even where there is a consolidated tax loss. Therefore, deferred tax assets and liabilities are offset only when they relate to the same taxable entity and the same taxation authority.

The deductible temporary differences do not expire under current tax legislation of the Republic of Kazakhstan. Period of use of tax loss carried forward expires in 2025-2034.

31 Financial risk management

The risk management function within the Holding is carried out in respect to all key risks, including financial risks, operational risks and legal risks. Financial risk comprises market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. The primary objectives of the financial risk management function are to achieve a balance between maximising the use of opportunities in order to achieve strategic goals and minimising losses.

Risk management rules and procedures of the Holding. The Holding's risk management policy has the following objectives: to identify, analyse and manage risks faced by the Holding, establish limits on risk levels and relevant controls, and continuously assess levels of risks and ensure that exposure to risks stays within the established limits. The risk management policy and procedures of the subsidiaries are regularly reviewed to reflect changes in the market conditions, proposed products and services and emerging best practices. The risk management policy of the Holding was approved in October 2013. The risk management rules were approved in May 2021.

The risk management policy has the following objectives:

- to establish the effective comprehensive system and integrated process of risk management as an element of the Holding's governance, and continuously improve the Holding's activities based on the unified standardised approach to the risk management methods and procedures;
- to define the retaining ability and provide for efficient management of accepted risks;
- to identify risks in a timely manner;
- to mitigate losses and reduce operating costs to cover potential losses.

Risk management structure. The risk management structure of the Holding comprises risk management at several levels with engagement of the following bodies and structural units of the Holding: Board of Directors, Management Board, Committee of Asset and Liability Management, Risk Management Department, Internal Audit Function, collective bodies and other structural units.

The Board of Directors. The first level of the risk management process is represented by the Board of Directors of the Holding. The Board of Directors takes full responsibility for proper operation of risk management control system, management of key risks and corporate risk management system. The Board of Directors defined the objectives of the Holding's activities and approves documents related to risk management.

The Management Board. The second level of the risk management process is represented by the Management Board of the Holding. The Management Board is responsible for establishment of efficient risk management system and risk control structure to provide for compliance with the corporate policy requirements. The Management Board is liable for creation of "risk consciousness" culture which reflects risk management and risk management philosophy of the Holding. In addition, the Management Board also bears liability for implementation of the efficient risk management system where all employees have a clearly defined responsibility for risk management and are accountable for proper execution of their duties. The Management Board is authorised to execute a part of their functions in risk management area through establishment of respective committees.

The Audit Committee of the Board of Directors. The Audit Committee of the Board of Directors is a standing advisory body of the Holding's Board of Directors, established to enhance efficiency and quality of work of the Board of Directors through preparing recommendations for the Board of Directors related to establishment of the effective control system over the Holding's financial and economic operations (including completeness and accuracy of the consolidated financial statements), monitoring of reliability and efficiency of the internal control and risk management systems and execution of the documents related to corporate governance, and control of independence of the external audit and internal audit function.

The Committee of Assets and Liabilities Management (the "CALM") is a permanent collective body of the Holding accountable to the Management Board which operates within the authorities as defined by the Management Board. The CALM has the following objectives: to provide for making timely and proper decisions in the sphere of management of the Holding's assets and liabilities; to attract investors for cooperation with the Holding, to maintain the adequate level of financial stability; to increase the Holding's profitability and mitigate risks at investment decision making.

The Risk Management Department. The third level of the risk management process is represented by the Risk Management Department, which objectives include coordination of risk management and control over implementation of general principles and methods of identification, assessment, management of and reporting on financial and non-financial risks.

The Internal Audit Service. In course of risk management, the Internal Audit Function of the Holding audits risk management procedures and risk assessment methods and develops proposals aimed at improvement of efficiency of risk management procedures. The Internal Audit provides reports on risk management system to the Board of Directors of the Holding and performs other functions in accordance with the approved regulatory documents.

Structural units. One of the key elements in the risk management structure is structural units of the Holding which are represented by each employee. Structural units (risk owners) play the key role in the risk management process. The Holding's employees address and manage risks on a daily basis, and control the potential effect of risk on their business. Structural units are responsible for implementation of the risk management action plan, timely identification and communication of major risk in their business areas and development of proposals for risk management to be included into the action plan.

Credit risk. The Holding takes on exposure to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Exposure to credit risk arises as a result of the lending and other transactions with counterparties of the Holding and its subsidiaries giving rise to financial assets.

The Holding's maximum exposure to credit risk is reflected in the carrying amounts of financial assets on the consolidated statement of financial position. For guarantees and commitments to extend credit, the maximum exposure to credit risk is the amount of the commitment. The credit risk is mitigated through a qualitative analysis of the creditworthiness of the counterparty, structuring of investment projects, diversification of assets, setting limits, collateral and other measures to improve the credit quality.

The subsidiaries of the Holding structure the levels of credit risk they undertake by placing limits on transactions with counterparties, including limits on the level of risk accepted in relation to one borrower, or groups of borrowers, based on the Risk Management Rules of the subsidiary and Baiterek National Managing Holding JSC, and other internal regulatory documents regulating credit risk of the Holding's subsidiaries. Limits on the level of credit risk by product and industry sector are approved regularly by management of the subsidiaries. Such risks are monitored on a revolving basis and subject to at least an annual review.

Loan applications originated by the relevant client relationship managers are passed on to the relevant credit committee of the subsidiary for approval of the credit limit. Exposure to credit risk is also managed, in part, by obtaining collateral and corporate and personal guarantees. In order to monitor credit risk exposures, regular reports are produced by the officers based on a structured analysis focusing on the customer's business and financial performance. Any significant exposure to customers with deteriorating creditworthiness are reported to, and analysed by authorised bodies of the Holding and/or its subsidiaries.

The subsidiaries review the aging analysis of outstanding loans and follows up on past due balances. Management of the subsidiaries, therefore, considers it appropriate to provide aging and other information about credit risk to the Board of Directors of the subsidiaries and management of the Holding.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

Credit risk for off-balance sheet financial instruments is defined as the possibility of sustaining a loss as the result of another party to a financial instrument failing to perform in accordance with the terms of the contract. The subsidiaries of the Holding use the same credit policies in assuming conditional obligations as it does for on-balance sheet financial instruments, through established credit approvals, risk control limits and monitoring procedures.

Market risk. The Holding takes on exposure to market risks. Market risks arise from open positions in (a) currency, (b) interest rates and (c) equity products, all of which are exposed to general and specific market movements. Management of the Holding sets limits on the value of risk that may be accepted, which is monitored on a regular basis. The subsidiaries of the Holding set separate limits on the basis of the general limits established by the Holdings, and monitor their compliance on a regular basis. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

Currency risk. The management of the Holding and its subsidiaries monitor the exposure of foreign exchange position, analyse the sensitivity of the financial result to fluctuations in foreign exchange rates and assess the level of foreign exchange risk. If necessary, limits can be set in relation to the level of accepted risk in the context of currencies and in general.

The table below summarises the Holding exposure to foreign currency exchange rate risk at 31 December 2024:

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

The table below summarises the Holding exposure to foreign currency exchange rate risk at 31 December 2023:

<i>(In thousands of Kazakhstani Tenge)</i>	Tenge	US Dollar	Euro	Other currencies	Total
ASSETS					
Cash and cash equivalents	2,009,651,939	82,431,265	74,809,980	48,059,964	2,214,953,148
Loans to banks and financial institutions	338,446,725	-	-	-	338,446,725
Deposits with banks and financial institutions	13,814,935	9,999,997	-	46,171	23,861,103
Financial instruments measured at fair value through profit or loss	2,617,173	1,860	-	-	2,619,033
Loans to customers	4,931,532,511	789,979,296	-	-	5,721,511,807
Investment securities measured at fair value through profit or loss	1,246,291	-	-	-	1,246,291
Investment securities measured at fair value through other comprehensive income	58,727,771	388,862,593	-	281,450	447,871,814
Investment securities measured at amortised cost	1,031,336,593	11,807,842	-	-	1,043,144,435
Finance lease receivables	1,212,130,428	-	-	-	1,212,130,428
Other financial assets	25,661,605	15,555	2,291	-	25,679,451
Total monetary financial assets	9,625,165,971	1,283,098,408	74,812,271	48,387,585	11,031,464,235
LIABILITIES					
Due to banks	16,288,508	-	-	-	16,288,508
Customer accounts	2,477,055,693	74,386,698	13	-	2,551,442,404
Debt securities issued	3,406,696,402	395,201,726	-	-	3,801,898,128
Subordinated debt	8,640,755	-	-	-	8,640,755
Loans from banks and other financial institutions	162,709,228	687,407,725	-	15,269,905	865,386,858
Loans from the Government of the Republic of Kazakhstan	795,041,526	379,927	-	-	795,421,453
Insurance contracts liabilities	57,872,592	289	-	1,084	57,873,965
Other financial liabilities	102,168,521	44,306,824	1,220,352	46,494	147,742,191
Total monetary financial liabilities	7,026,473,225	1,201,683,189	1,220,365	15,317,483	8,244,694,262
Total net position	2,598,692,746	81,415,219	73,591,906	33,070,102	2,786,769,973

The following table presents sensitivities of profit to reasonably possible changes in exchange rates applied at the end of the reporting period relative to the functional currency of the Holding, with all other variables held constant:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2024	31 December 2023
US Dollar strengthening by 20% (2023: strengthening by 20%)	23,173,727	13,026,435
US Dollar weakening by 20% (2023: weakening by 20%)	(23,173,727)	(13,026,435)
Euro strengthening by 20% (2023: strengthening by 20%)	17,897,041	11,774,705
Euro weakening by 20% (2023: weakening by 20%)	(17,897,041)	(11,774,705)
Other currencies strengthening by 20% (2023: strengthening by 20%)	12,711,665	5,291,216
Other currencies weakening by 20% (2023: weakening by 20%)	(12,711,665)	(5,291,216)

The above analysis only includes financial assets and liabilities. The Holding believes that investments in equity instruments and non-monetary assets will not result in significant currency risk. Risk was only calculated for monetary balances denominated in currencies other than the functional currency of the Holding.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

Interest rate risk. The Holding takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes but may also reduce or create losses in the event that unexpected movements occur. Interest rate risk management by the subsidiaries is based on the principles of full coverage of costs: resulting interest income should cover costs for raising and placement of funds and provide for net profit generation and competitiveness. Report on interest rate classifies assets, liabilities, off-balance sheet claims and liabilities which are sensitive to changes in interest rates, and groups them in economically homogeneous and significant items, by time period depending on their maturities (for fixed rates) or time to their next reprice (for floating rates). Time periods and items of recorded assets, liabilities, off-balance sheet claims and liabilities can be changed by the Holding's Management Board. The table below summarises the Holding's exposure to interest rate risks. The table presents the aggregated amounts of the Holding's financial assets and liabilities at carrying amounts, categorised by the earlier of contractual interest repricing or maturity dates.

<i>(In thousands of Kazakhstani Tenge)</i>	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	More than 1 year	Non-interest bearing	Total
31 December 2024						
Total financial assets	2,929,221,432	1,425,104,813	753,353,143	8,053,067,966	364,107,741	13,524,855,095
Total financial liabilities	(704,645,891)	(1,237,870,463)	(273,749,119)	(7,563,276,460)	(199,293,513)	(9,978,835,446)
Net interest sensitivity gap at 31 December 2024	2,224,575,541	187,234,350	479,604,024	489,791,506	164,814,228	3,546,019,649
31 December 2023						
Total financial assets	2,116,362,537	981,640,693	425,927,494	7,042,576,250	464,957,261	11,031,464,235
Total financial liabilities	(387,276,831)	(923,809,726)	(431,626,981)	(6,262,171,338)	(239,809,386)	(8,244,694,262)
Net interest sensitivity gap at 31 December 2023	1,729,085,706	57,830,967	(5,699,487)	780,404,912	225,147,875	2,786,769,973

All of the Holding's debt instruments reprice within 1 year on the average, excluding financial instruments with fixed interest rate.

Sensitivity analysis of profit or loss and equity (net of taxes) to changes in interest rates (interest rate risk) performed based on the conventional scenario of parallel shift in yield curve by 100 basis points upward or downward the interest rates and restated positions on interest-bearing assets and liabilities effective as of 31 December 2024 and 31 December 2023 is as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	2024	2023
Parallel increase by 100 basis points (2023: 100 basis points)	19,075,282	13,572,634
Parallel decrease by 100 basis points (2023: 100 basis points)	(19,075,282)	(13,572,634)

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

The Holding monitors interest rates for its financial instruments. The table below summarises interest rates at the respective reporting date based on reports reviewed by key management personnel.

	31 December 2024			31 December 2023		
	Tenge	US Dollar	Other	Tenge	US Dollar	Other
Assets						
Cash and cash equivalents	14.03%	2.81%	0.35%	13.76%	2.57%	0.33%
Loans to banks and financial institutions	12.00%	-	-	12.59%	-	-
Deposits with banks and financial institutions	11.93%	2.39%	-	13.24%	2.24%	4.60%

Loans from banks and other financial institutions	14.17%	5.28%	-	13.42%	5.35%	7.50%
Loans from the Government of the Republic of Kazakhstan	10.46%	-	-	9.51%	-	-
Amounts payable under repurchase agreements (included to other financial liabilities)	13.50%	-	-	-	5.93%	-

The Holding is exposed to prepayment risk through providing fixed or variable rate loans, including mortgages, which give the borrower a right to repay the loans earlier. The Holding's current year financial result and equity at the end of the current reporting period would not have been significantly impacted by changes in prepayment rates because such loans are carried at amortised cost and the prepayment right is at, or close to, the amortised cost of the loans and advances to customers (2023: the Holding's current year financial result and equity at the end of the current reporting period would not have been significantly impacted by changes in prepayment rates because such loans are carried at amortised cost and the prepayment right is at, or close to, the amortised cost of the loans and advances to customers).

Liquidity risk. Liquidity risk is the risk that the Holding and its subsidiaries will encounter difficulty in attracting funds in order to discharge its liabilities. The liquidity risk arises when assets and liabilities maturities do not match which affects the Holding's and its subsidiaries availability of adequate liquid funds at acceptable price so that to incur its balance sheet and off-balance sheet liabilities in a timely manner. Matching and/or controlled mismatching of maturities and interest rates on assets and liabilities is a fundamental factor of management of the financial institutions, including the Holding. Due to variety of transactions under execution and related uncertainty, absolute maturity matching for assets and liabilities is not observed in the normal practice of financial institutions which allows increasing transaction profitability, however, increases the risk of loss.

The Holding and its subsidiaries manage liquidity risk to maintain cash resources required to discharge all liabilities as they fall due.

The Holding manages liquidity risk within the Risk Management Policy of the Holding, Risk Management Rules for Temporary Available Cash of the Holding, Risk Management Rules approved by the Board of Directors and Management Board. The documents specify the basic processes and procedure of liquidity risk management and establish functions and authorities of the Holding's business units involved in this process to manage liquidity risk effectively and maintain adequate funds of the Holding to cover all liabilities. Within the described above documents, liquidity risk is assessed and controlled by the means of the following tools/analysis report: regulatory and contractual liquidity requirements; analysis of current liquidity balances, estimated inflows/outflows of liquidity, internal liquidity ratios; liquidity gaps ("gap analysis"). To avoid excess or deficiency of liquidity, the Committees of Asset and Liability Management of the Holding's subsidiaries control the activities for liquidity raising and use.

The Committees of Asset and Liability Management of the Holding's subsidiaries control liquidity risk by analysing levels of liquidity risk to take measures for mitigation of liquidity risk of the subsidiaries and the Holding. Current liquidity is managed by the Treasury Departments of the subsidiaries which perform transactions at the financial markets to maintain the current liquidity and optimise cash flows.

Procedures for liquidity risk management of the Holding include:

- cash flow forecasting in terms of key currencies and calculation of the related necessary level of liquid assets;
- maintenance of a diversified structure of funding sources;
- management of concentration and borrowings structure;
- development of debt financing plans;
- servicing of highly liquid assets portfolio which can be easily realised as a safeguard measure in case of cash liquidity gap;
- development of contingent plans to maintain liquidity and target level of funding;
- execution of control over conformity of the Holding's balance sheet liquidity ratios with the statutory criteria.

The Treasury Departments of the subsidiaries monitor liquidity at the financial markets. Under normal market conditions, the reports on liquidity situation of the Holding's subsidiaries are regularly provided to the senior management of the Holding. Decisions regarding liquidity management policy of the Holding are made by the Management Board and Committee of Asset and Liability Management of the Holding. The table below shows liabilities at 31 December 2024 and 2023 by their remaining contractual maturity. The amounts of liabilities disclosed in the maturity table are the contractual undiscounted cash flows, including gross finance lease obligations (before deducting future finance charges), gross loan commitments and financial guarantees. Such undiscounted cash flows differ from the amount included in the consolidated statement of financial position because the amount in the consolidated statement of financial position is based on discounted cash flows. Financial derivatives are included at the contractual amounts to be paid or received, unless the Holding expects to close the derivative position before its maturity date in which case the derivatives are included based on the expected cash flows. For the purposes of the maturity analysis, embedded derivatives are not separated from hybrid (combined) financial instruments. When the amount payable is not fixed, the amount disclosed is determined by reference to the conditions existing at the end of the reporting period. Foreign currency payments are translated using the spot exchange rate at the end of the reporting period.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

The maturity analysis of financial liabilities at 31 December 2024 is as follows:

	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 12 months to 5 years	More than 5 years	Total

*Term deposits of individuals and deposits that secure mortgage loans issued are not call deposits that depositors may withdraw at any time without losing accrued interest and state premiums.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

The total outstanding contractual amount of commitments to extend credit as included in the above maturity table does not necessarily represent future cash requirements, since many of these commitments will expire or terminate without being funded.

Customer accounts are classified in the above analysis based on contractual maturities. However, in accordance with Kazakhstani legislation, depositors can withdraw their term deposits at any time, losing in most of the cases the accrued interest. These deposits are classified in accordance with their stated maturity dates.

In the judgement of the Holding management, the matching and/or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the effective management of the Holding.

The following table provides an analysis, by contractual maturities, of amounts recognised in the consolidated statement of financial position as at 31 December 2024 and 2023.

<i>(In thousands of Kazakhstani Tenge)</i>		Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 1 to 5 years	More than 5 years	No maturity	Total

Capital management. The Holding's objectives when managing capital are to safeguard the Holding's ability to continue as a going concern, by meeting the capital adequacy requirements based on monitoring of the consolidated financial statements, including monitoring of the subsidiaries and established control requirements to capital adequacy on the part of the Board of Directors of the controlled entities, Financial Supervision Committee, National Bank of the Republic of Kazakhstan, investors.

Compliance with capital adequacy ratios set for the subsidiaries is monitored monthly with reports outlining their calculation reviewed and signed by the Chairman of the Management Board and considered by the Holding's Board of Directors.

The Holding treats the capital as net assets attributable to the Holding owners, which amount to Tenge 3,001,621,516 thousand (31 December 2023: Tenge 2,665,504,904 thousand). The Holding is not subject to regulatory capital requirements.

As at 31 December 2024 and 2023 the Holding's subsidiaries complied with all externally imposed capital adequacy ratios by exceeding the minimum requirements.

32 Analysis by segment

The Holding has eight reportable segments, as described below, which are the Holding's strategic business units. The strategic business units offer different products and services, and are managed separately because they require different technology and strategies. For each of the strategic business units, the Chairman of the Management Board, reviews internal management reports on at least a quarterly basis. The following summary describes the operations in each of the reportable segments.

- Strategic management (the Holding Company);
- Affordable housing (Otbasy Bank JSC and KHC JSC);
- Large business support (DBK JSC);
- Agro-industrial complex support (ACC JSC);
- SME support and development (Damu EDF JSC);
- Investments development (QIC JSC);
- Export insurance (ECA JSC);
- Provision of second-tier bank services (Bereke Bank JSC).

Information regarding the results of each reportable segment is included below. Performance is measured based on segment profit after income tax as included in the internal management reports that are reviewed by the Chairman of the Management Board. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to others who operate within these industries.

Segment information for the main reportable segments for the years ended 31 December 2024 and 31 December 2023 is set out below:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2024	31 December 2023

33 Contingencies

Legal proceedings. From time to time and in the normal course of business, claims against the Holding and its subsidiaries may be received. On the basis of its own estimates and internal professional advice, management of the Holding is of the opinion that no material losses will be incurred in respect of claims, and accordingly no provision has been made in these consolidated financial statements.

Tax contingencies. The taxation system in the Republic of Kazakhstan is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretation by different tax authorities, including opinions with respect to IFRS treatment of revenues, expenses and other items in the consolidated financial statements. Taxes are subject to review and investigation by various levels of authorities, which have the authority to impose severe fines and interest charges. A tax year remains open for review by the tax authorities during the five subsequent calendar years; however, under certain circumstances a tax year may remain open longer.

These circumstances may create tax risks in Kazakhstan that are more significant than in other countries. Management of the Holding believes that it has provided adequately for tax liabilities based on its interpretations of applicable tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these consolidated financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

Investment related commitments. The Holding purchases private equity funds liabilities to include in its portfolio. The Holding diversifies the investment portfolio by distributing investments among managers, relevant industries, territories and investment stages. As of 31 December 2024 the contingent capital commitments totalled Tenge 7,004,784 thousand (31 December 2023: Tenge 11,159,266 thousand). Under the constituent agreements of private equity funds, in case of default on capital commitments, after the manager issued a due claim, the Holding may be subject to sanctions, including moratorium on interest, cessation of profit distribution, temporary denial of right to participate in the corporate governance of the funds and forced sale of the Holding's share to co-investors and third parties. As at 31 December 2024 and 2023 the Holding did not have overdue investment commitments.

Compliance with covenants. The subsidiaries of the Holding are subject to certain covenants primarily relating to their borrowings. Non-compliance with these covenants may result in negative consequences for the Holding. The Holding was in compliance with covenants at 31 December 2024 and 31 December 2023.

Insurance. The insurance industry in the Republic of Kazakhstan is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. The Holding does not have full coverage for its premises and equipment, business interruption, or third-party liability in respect of property or environmental damage arising from accidents on its property or related to operations. Until the Holding obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on operations and consolidated financial position of the Holding.

Credit related commitments. The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the Holding will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Holding on behalf of a customer authorising a third party to draw drafts on the Holding up to a stipulated amount under specific terms and conditions, are collateralised by the underlying shipments of goods to which they relate or cash deposits and, therefore, carry less risk than a direct borrowing.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Holding is potentially exposed to loss in the amount equal to the total unused commitments, if the unused amounts were to be drawn down. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

The Holding monitors the term to maturity of credit related commitments, because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments. Outstanding credit related commitments are as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2024	31 December 2023
Loan and credit line commitments to individuals	38,288,361	36,637,739
Loan and credit line commitments	352,325,282	196,127,551
Finance lease commitments	697,635,389	444,298,535
Financial guarantees issued	910,386,198	806,051,026
Total credit related commitments before provision	1,998,635,230	1,483,114,851

The total outstanding contractual amount of undrawn credit lines, letters of credit, and guarantees does not necessarily represent future cash requirements, as these financial instruments may expire or terminate without being funded. Credit related commitments are denominated in Tenge.

As of 31 December 2024, obligations for loan commitments, credit lines and other liabilities related to settlement operations amount to Tenge 602,448,859 thousand, of which 15% is accounted for by a single borrower with an external credit rating of BBB, 14% - by two borrowers with internal credit ratings ranging from BB- to BB+. (31 December 2023: Tenge 352,155,794 thousand, of which 7% was accounted for by three borrowers with internal credit ratings from BB- to BB+, 43% - by borrowers with ratings from B- to B+, and 4% - by a single borrower with a CCC+ rating).

As of 31 December 2024, in addition to the loan irrevocable commitments disclosed above, the Holding has revocable commitments in the amount of Tenge 250,123,578 thousand (31 December 2023: Tenge 156,028,243 thousand). The Loan Commitment Agreement provides for the right of the Holding to unilaterally withdraw from the agreement in the event of unfavourable conditions for the Holding and in case of lack of resources for lending.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

34 Offsetting financial assets and financial liabilities

The Holding has master netting arrangements of the International Swap and Derivatives Association ("ISDA"), and similar master netting agreements that do not meet offsetting criteria in the consolidated statement of financial position. The reason is that they create the right to offset recognised amounts that is legally effective only in case of default, insolvency, or bankruptcy of the Holding and its counterparties. In addition, the Holding and its counterparties do not intend to settle debt through offsetting or sell an asset and perform liability simultaneously.

Financial assets and liabilities subject to enforceable master netting and similar arrangements are as follows at 31 December 2024:

	Amounts subject to master netting and similar arrangements not set off in the consolidated statement of financial position						Net amount of exposure (c) - (d) + (f)
	Gross amounts before offsetting in the consolidated statement of financial position (a)	Gross amounts set off in the consolidated statement of financial position (b)	Net amount after offsetting in the consolidated statement of financial position (c) = (a) - (b)	Financial Cash collateral instruments received			
				(d)	(f)

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

Financial assets and liabilities subject to enforceable master netting and similar arrangements are as follows at 31 December 2023:

	Gross amounts before offsetting in the consolidated statement of financial position (a)	Gross amounts set off in the consolidated statement of financial position (b)	Net amount after offsetting in the consolidated statement of financial position (c) = (a) - (b)	Amounts subject to master netting and similar arrangements not set off in the consolidated statement of financial position			Net amount of exposure (c) - (d) + (f)
				Financial instruments (d)	Cash collateral received (f)		
<i>(In thousands of Kazakhstani Tenge)</i>							
ASSETS							
Cash and cash equivalents	825,588,944	-	825,588,944	(825,588,944)	-	-	-
Loans to customers	573,099	-	573,099	-	(3,086)	-	570,013
TOTAL ASSETS SUBJECT TO OFFSETTING, MASTER NETTING AND SIMILAR ARRANGEMENT	826,162,043	-	826,162,043	(825,588,944)	(3,086)		570,013
LIABILITIES							
Customer accounts	(3,086)	-	(3,086)	3,086	-	-	-
Amounts payable under repurchase agreements	(27,362,351)	-	(27,362,351)	27,362,351	-	-	-
TOTAL LIABILITIES SUBJECT TO OFFSETTING, MASTER NETTING AND SIMILAR ARRANGEMENT	(27,365,437)	-	(27,365,437)	27,365,437	-	-	-

The amount set off in the consolidated statement of financial position reported in column (b) is the lower of (i) the gross amount before offsetting reported in column (a) and (ii) the amount of the related instrument that is eligible for offsetting. Similarly, the amounts in columns (d) and (f) are limited to the exposure reported in column (c) for each individual instrument in order not to understate the ultimate net exposure.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

35 Fair value

Fair value measurements are analysed by level in the fair value hierarchy as follows:

- level 1 are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities;
- level 2 measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This level includes instruments estimated based on active market quotations of similar instruments, market quotations for identical or similar instruments that are not considered as active, or other valuation techniques which inputs are directly or indirectly based on observable market data; and
- level 3 measurements are valuations not based on observable market data (that is, unobservable inputs).

Management applies judgement in categorising financial instruments using the fair value hierarchy. If a fair value measurement uses observable inputs that require significant adjustment, that measurement is a Level 3 measurement. The significance of a valuation input is assessed against the fair value measurement in its entirety.

Recurring fair value measurements. Recurring fair value measurements are those that other IFRS require or permit in the consolidated statement of financial position at the end of each reporting period. The level in the fair value hierarchy into which the recurring fair value measurements are categorised are as follows:

(In thousands of Kazakhstani Tenge)	31 December 2024				31 December 2023			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
ASSETS AT FAIR VALUE								
Other assets measured at fair value								
through profit or loss	4,496	-	172,930,909	172,935,405	4,208	-	169,745,504	169,749,712
Investment securities	610,369,836	73,027,423	51,265	683,448,524	385,500,569	62,444,763	1,172,773	449,118,105
Loans to customers	-	-	226,107,849	226,107,849	-	-	188,327,278	188,327,278
TOTAL ASSETS AT FAIR VALUE	610,374,332	73,027,423	399,090,023	1,082,491,778	385,504,777	62,444,763	359,245,555	807,195,095

Level 2 measurements. Level 2 includes investment securities measured at fair value through other comprehensive income which fair value was determined based on valuation techniques that apply inputs from observable markets. Observable inputs include transaction prices at markets which are active for similar, but not identical instruments, and prices at markets which are not active for identical instruments. Although all instruments are listed at the Kazakhstan Stock Exchange, management believes that market for identical instruments is not active.

The Holding applies the discounted cash flow method for impaired investment securities measured at fair value through other comprehensive income and other assets measured at fair value through profit or loss for which fair value cannot be determined based on inputs from observable markets.

For impaired (Stage 3) debt securities, forecasts of estimated cash flows were based on the publicly available information related to the estimated repayment schedule after the restructuring for each respective category of securities. Assumptions in relation to discount rates were based on credit risk premiums of similar issuers that were understood as market quotations of securities in issue which trading has not been suspended.

There were no changes in valuation techniques for level 2 recurring fair value measurements during the year ended 31 December 2024 (2023: none).

Level 3 measurements. Certain investment securities measured at fair value through other comprehensive income that are not quoted at the observable markets and cannot be measured based on inputs from observables market were estimated using the discounted cash flow method. Forecasts for such securities were calculated based on the contractual repayment schedule. Assumptions in relation to discount rates were based on active market quotations for identical instruments of the issuer subject to respective adjustment of credit rating for credit rating difference.

The Holding's investments in equity instruments categorised as level 3 comprise holdings in investment funds. These funds invest primarily in private equity through purchasing unlisted ordinary shares of businesses in emerging markets (predominantly the Republic of Kazakhstan). To determine fair value of investments in these funds, the Holding engaged an independent appraiser for the years ended 31 December 2024 and 31 December 2023. The approach followed by the appraiser was to estimate the fair value of the underlying portfolio investments (businesses) held by each fund, and then calculate the Holding's share of this business value. As a cross check, the appraiser also reviews fair values of investments as reported by each of the funds, and assesses the basis for material differences between the appraised fair value and fair values reported by the managers.

A number of valuation techniques were used by the appraiser to value the underlying portfolio investments, depending on the nature of the business concerned, the availability of market comparables, and the stage in the business's life cycle.

The control system implemented by the Holding includes preparation of fair value measurement by responsible front-office specialists of the subsidiaries and subsequent review by the executive of the relevant department. Special control mechanisms implemented by the Holding include:

- observable quotations review;
- overview and approval of new models and amendments to models;
- review and approval of new models and amendments to models with participation of the executive of the relevant front-office;
- overview of significant unobservable inputs, measurement adjustments and significant changes in fair value measurement of Level 3 instruments as compared with the prior period.

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

The table below provides information on significant unobservable inputs used at the year-end to value the most significant companies included in the portfolio of private equity funds categorised into Level 3 of the fair value hierarchy as at 31 December 2024, in addition to sensitivity analysis to changes in unobservable data, which the Holding thinks reasonably possible at the reporting date, assuming that all other variables remain unchanged.

Type of instrument	Company industries	Fair value of the Holding's interest In thousands of Kazakhstani Tenge	Valuation technique	Significant unobservable inputs	Range of values for the group	Effect from changes in significant unobservable inputs
Unquoted equity instruments	Transport and logistics	48,080,917	Discounted cash flows under the option agreement	Weighted Average Cost of Capital	14.82%	Decrease in the cost of capital would result in higher estimated fair value of investment
	Manufacturing	27,853,528	Discounted cash flows under the option agreement, Income approach	Weighted Average Cost of Capital, EBITDA margin	16.33%-18.77%; 16.72%	Decrease in the cost of capital/increase in EBITDA margin would result in higher estimated fair value of investment Decrease in the cost of capital would result in higher estimated fair value of investment

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

The valuation technique and inputs used in the fair value measurement for level 3 measurements of loans to customers, investment securities measured at fair value and related sensitivity to reasonably possible changes in those inputs as at 31 December 2024 are as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Fair value	Valuation technique	Inputs used	Range of inputs (weighted average)	Sensitivity analysis of fair value to unobservable inputs
<i>Loans to customers measured at fair value through profit or loss</i>	165,043,303	Discounted cash flow	Discount rate	13.83%-28.08%	Increase in discount rate would result in lower fair value
<i>Loans to customers measured at fair value through profit or loss</i>	61,064,546	Discounted cash flow	Credit risk margin	1.60%-6.82%	Increase in credit risk would result in lower fair value.
	226,107,849				

The valuation technique and inputs used in the fair value measurement for level 3 measurements of investment securities measured at fair value and embedded instrument and related sensitivity to reasonably possible changes in those inputs as at 31 December 2023 are as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Fair value	Valuation technique	Inputs used	Range of inputs (weighted average)	Sensitivity analysis of fair value to unobservable inputs
<i>Loans to customers measured at fair value through profit or loss</i>	168,195,549	Discounted cash flows	Discount rate	14.01%-26.67%	Increase in discount rate would result in lower fair value
<i>Loans to customers measured at fair value through profit or loss</i>	20,131,729	Discounted cash flow	Credit risk margin	1.05%-9.60%	Increase in credit risk would result in lower fair value
<i>Debt securities measured at fair value</i>	1,172,773	Discounted cash flows	Discount rate	15.63%	Increase in discount rate would result in lower fair value
	189,500,051				

The above tables disclose sensitivity to valuation inputs for financial assets and financial liabilities, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would change fair value significantly. For this purpose, significance was judged with respect to profit or loss, and total assets or total liabilities, or, when changes in fair value are recognised in comprehensive income, total equity.

The sensitivity of fair value measurement disclosed in the above table shows the direction that an increase or decrease in the respective input variables would have on the valuation result.

A reconciliation of movements in Level 3 of the fair value hierarchy by class of instruments for the year ended 31 December 2024 is as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Other assets measured at fair value through profit or loss	Investment securities	Loans to customers measured at fair value through profit or loss
Fair value as at 1 January 2024	169,745,504	1,172,773	188,327,278
Gains or losses recognised in profit or loss for the year	877,538	(221,456)	19,442,058
Purchases	9,489,350	-	50,839,459
Repayment, contracts termination	(1,416,358)	(900,052)	(32,500,946)
Disposals	(5,765,125)	-	-
Fair value at 31 December 2024	172,930,909	51,265	226,107,849

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

A reconciliation of movements in Level 3 of the fair value hierarchy by class of instruments for the year ended 31 December 2023 is as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Other assets measured at fair value through profit or loss	Investment securities	Loans to customers measured at fair value through profit or loss
Fair value as at 1 January 2023	162,338,631	1,594,526	208,974,921
Gains or losses recognised in profit or loss for the year	4,441,628	206,660	1,679,402
Purchases	16,881,149	-	33,159,060
Repayment, contracts termination	-	(628,413)	(55,486,105)
Disposals	(13,915,904)	-	-
Fair value at 31 December 2023	169,745,504	1,172,773	188,327,278

Although the Holding believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements of loans to customers and embedded derivatives in Level 3, changing one or more of the assumptions used to reasonably possible alternative assumptions would have the following effects as at 31 December 2024 and as at 31 December 2023:

<i>(In thousands of Kazakhstani Tenge)</i>	Effect on fair value as at 31 December 2024		Effect on fair value as at 31 December 2023	
	Favourable	Unfavourable	Favourable	Unfavourable
Unquoted equity instruments - investments				
Unconventional energy	1,431,721	(895,649)	999,341	(852,894)
Manufacturing	755,994	(675,504)	1,477,860	(1,475,400)
Education	318,329	(264,335)	269,330	(232,421)
Agriculture	176,659	(166,590)	1,128,741	(991,813)
Transport and logistics	67,659	(65,440)	412,070	(354,873)
Medical diagnostics	57,606	(55,680)	4,567	(4,389)
Tourism	1,482	(1,461)	1,104	(1,088)
Unquoted equity instruments – other				
Private equity funds	6,682,236	(6,682,236)	6,707,767	(6,707,767)
Immaterial subsidiaries	66,901	(66,901)	40,120	(40,120)
Total unquoted equity instruments	9,558,587	(8,873,796)	11,040,900	(10,660,765)
<i>(In thousands of Kazakhstani Tenge)</i>	2024 Effect on profit or loss		2023 Effect on profit or loss	
	Favourable	Unfavourable	Favourable	Unfavourable
Loans to customers	4,811,583	(4,556,303)	3,984,020	(3,742,361)
Total	4,811,583	(4,556,303)	3,984,020	(3,742,361)

The favourable and unfavourable effects of using reasonably possible alternative assumptions are calculated by recalibrating the model values:

- for unquoted equity instruments – investments: decrease and increase in the weighted average cost of capital/EBITDA profitability by 1%;
- for other unquoted equity instruments: adjustment to net asset value by 10%.
- for loans to customers measured at fair value through profit or loss: decrease and increase in the discount rate by 1%.

TOTAL	376,670,963	6,997,187,198	-	7,373,858,161	8,039,078,106

The fair values in level 2 and level 3 of fair value hierarchy were estimated using the discounted cash flows valuation technique. The fair value of floating rate derivative instruments that are not quoted in an active market was estimated to be equal to their carrying amount. The fair value of unquoted fixed interest rate instruments was estimated based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risk and remaining maturity.

Management believes that the fair value of the Holding's other financial assets and other financial liabilities approximates their carrying amounts.

The following assumptions are used by management to estimate the fair values of financial instruments:

- Discount rates of 4.82% to 20.28% p.a. for foreign currency loans and of 7.67% to 32.44% p.a. for Tenge loans (31 December 2023: 5.46% to 17.17% p.a. for foreign currency loans and of 7.87% to 27.76% p.a. for Tenge loans) are used for discounting future cash flows on loans to customers;
- Discount rates of 5.37% p.a. for US Dollar and 12.66% to 16.12% p.a. for Tenge (31 December 2023: 5.90% p.a. for US Dollar and 13.09% to 17.73% p.a. for Tenge) are used for discounting future cash flows on debt securities measured at amortised cost;
- Discount rates of 12.83% to 16.81% p.a. (31 December 2023: 13.36% to 16.40% p.a.) are used for discounting future cash flows on loans to banks;
- Discount rates of 12.40% to 31.13% p.a. (31 December 2023: 13.29% to 28.48% p.a.) are used for discounting future cash flows on finance lease receivables;
- Discount rates of 5.51% p.a. for US Dollar and 12.21% to 15.69% p.a. for Tenge (31 December 2023: 5.72% to 7.21% p.a. for US Dollar and 13.31% to 16.91% p.a. for Tenge) are used for discounting future cash flows on debt securities issued;
- Discount rates of 12.24% to 13.09% p.a. (31 December 2023: 13.28% to 14.23% p.a.) are used for discounting future cash flows from loans from the Government of the Republic of Kazakhstan;
- Discount rates of 12.56% to 12.66% p.a. (31 December 2023: 13.09% to 13.88%p.a.) are used for discounting future cash flows on subordinated debt;
- Discount rates of 2.55% to 6.08% p.a. for foreign currency loans and of 10.90% to 14.44% p.a. for Tenge loans (31 December 2023: 5.72% to 7.61% p.a. for foreign currency loans and of 14.16% to 15.75% p.a. for Tenge loans) are used for discounting future cash flows on loans from banks and other financial institutions;

Baiterek National Managing Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2024

36 Presentation of financial instruments by measurement category

As at 31 December 2024 and 2023 all financial liabilities of the Holding, other than derivatives, are carried at amortised cost. Derivative financial instruments are designated at fair value through profit or loss.

The following table provides a reconciliation of financial assets with these measurement categories as at 31 December 2024:

<i>(In thousands of Kazakhstani Tenge)</i>	Amortised cost	Fair value through profit or loss	Fair value through other comprehensive income	Total carrying amount	Fair value
Financial assets measured at fair value					
Other assets measured at fair value through profit or loss	-	172,935,405	-	172,935,405	172,935,405

37 Related party transactions

Parties are generally considered to be related if the parties are under common control, or one party has the ability to control the other party or can exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form. The Government of the Republic of Kazakhstan has control over the Holding as the Government of the Republic of Kazakhstan is an ultimate controlling party of the Holding. The Holding decided to apply the exemption from disclosure of individually insignificant transactions and balances with the state-owned entities.

At 31 December 2024, the outstanding balances with related parties and average nominal interest rates were as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Ultimate parent organisation	Associates and joint ventures	Transactions with state-owned entities
ASSETS			
Cash and cash equivalents (nominal interest rates: 0%-15.25%)	74,623,102	-	2,164,985,379

Independent Auditors' Report

To the Shareholder and Board of Directors of Baiterek National Investment Holding Joint Stock Company

Opinion

We have audited the consolidated financial statements of Baiterek National Investment Holding Joint Stock Company and its subsidiaries (the "Holding"), which comprise the consolidated statement of financial position as at 31 December 2025, the consolidated statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Holding as at 31 December 2025, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Holding in accordance with the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) (*IESBA Code*), as applicable to audits of the consolidated financial statements of public interest entities, together with the ethical requirements that are relevant to audits of the consolidated financial statements in the Republic of Kazakhstan. We have also fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Expected credit losses for loans to customers and finance lease receivables

Please refer to the Notes 3 (Impairment), 5, 10 and 12 in the consolidated financial statements.

Key audit matter	How the matter was addressed in our audit
Loans to customers measured at amortised cost and finance lease receivables represent 40% and 12% of total assets, respectively. Loans to customers and finance lease receivables are stated net of allowance for expected credit losses (ECL) that is estimated on a regular basis and is sensitive to assumptions used. The Holding applies the ECL valuation model, which requires management to apply professional judgment and to make assumptions related to the following key areas: – timely identification of significant increase in credit risk and default events related to loans to customers and finance lease receivables (allocation between stages 1, 2 and 3 in accordance with the IFRS 9 <i>Financial Instruments</i>); – assessment of probability of default (PD) and loss given default (LGD); – assessment of expected future cash flows for loans to customers and finance lease receivables which are classified as credit-impaired. Due to the significant volume of loans to customers and finance lease receivables and the related estimation uncertainty, this area is a key audit matter.	We analysed the key aspects of the Holding's methodology and policies related to the ECL estimate for compliance with the requirements of IFRS 9, with the involvement of our financial risk management specialists. We tested the principle of operation of the respective models used by the Holding. To analyse the adequacy of professional judgement and assumptions used by the Holding in relation to the allowance for the ECL estimate, we performed the following: - We evaluated the design and implementation of the controls used to assign the internal credit ratings to the counterparties with regard to loans to customers and finance lease receivables. For a sample of loans to customers and finance lease receivables we tested overall adequacy of the internal credit ratings assigned by the Holding to counterparties by assessing independently financial and non-financial information, as well as other available market information about the activities of these borrowers and debtors. - For a sample of loans to customers and finance lease receivables, for which potential changes in ECL estimate may have a significant impact on the consolidated financial statements, we conducted a detailed testing of whether credit risk stages are correctly assigned by the Holding. - For a sample of loans to customers and finance lease receivables allocated to Stage 1 and Stage 2 we tested the principle of operation of related PD и LGD models, and reconciled inputs used in the models to the source documents. We challenged the assumptions used by the Holding in estimation of the amount and timing of cash flows in the LGD model, based on our knowledge and available market information. - For a sample of the Stage 3 loans to customers and finance lease receivables, and purchased or originated credit-impaired (POCI) loans for which the ECL allowance is estimated on an individual basis, and which comprise loans to customers and finance leases provided to legal entities, we critically assessed the assumptions used by the Holding to estimate the amount and timing of future cash flows. We compared assumptions used by the Holding with

	industry, financial and economic data from available public sources. We focused on loans and finance lease receivables for which potential changes in ECL estimates could have a significant impact on the consolidated financial statements. - We conducted a detailed testing of the accuracy of input data in the estimation of expected credit losses, including information on historical default rates and other relevant information. - We also reviewed the mathematical accuracy of estimates of expected credit losses, including the estimate of the impact of macroeconomic factors on the credit quality of loan to customers portfolio, as well as finance lease receivables. We also assessed whether the consolidated financial statements disclosures appropriately reflect the Holding's exposure to credit risk.

Other Information

Management is responsible for the other information. The other information comprises the information included in the Annual Report of the Holding for 2025, but does not include the consolidated financial statements and our auditors' report thereon. The Annual Report of the Holding for 2025 is expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Holding's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Holding or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Holding's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Holding's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Holding's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Holding to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is:

The notes set out on pages 7 to 98 form an integral part of these consolidated financial statements.

1 Introduction

These consolidated financial statements comprise the financial statements of Baiterek National Investment Holding Joint Stock Company (the “Holding Company”) and financial statements of its subsidiaries (the “Holding”).

The Holding was incorporated in accordance with the Decree of the President of the Republic of Kazakhstan No. 571 “On some measures for optimisation of the management system of development institutions and financial organisations, and development of the national economy” dated 22 May 2013 and the Decree of the Government of the Republic of Kazakhstan No. 516 “About measures for implementation of the Decree of the President of the Republic of Kazakhstan No. 571 dated 22 May 2013” dated 25 May 2013. As at 31 December 2025 and 2024 the ultimate controlling party of the Holding is the Government of the Republic of Kazakhstan.

Principal activity

The Holding’s mission is to promote sustainable growth of the economy of the Republic of Kazakhstan by supporting the production of Kazakhstani goods and services, modernizing infrastructure and strengthening food security based on the principles of responsibility to society.

The Holding is actively involved in completing national strategic and social tasks through development institutions, through the implementation of the National Development Plan of the Republic of Kazakhstan until 2029, the Concept for the Development of the Manufacturing Industry of the Republic of Kazakhstan for 2023–2029, the Concept for the Development of Small and Medium-Sized Entrepreneurship in the Republic of Kazakhstan until 2030, the Concept for the Development of Housing and Public Utilities Infrastructure for 2023–2029, the Concept for the Development of the agro-industrial complex of the Republic of Kazakhstan for 2021–2030, and the National Project “Modernization of the Energy and Public Utilities Sectors”.

The Holding’s main goals and objectives are as follows:

- implementing an efficient risk management system;
- increasing transparency and public confidence in the economy;
- providing synergies from subsidiaries’ activities;
- improving the subsidiaries’ economic performance/break-even principle;
- attracting additional investments;
- maintaining business relationship with the private sector.

As at 31 December 2025, the Holding’s structure comprises seven subsidiaries (31 December 2024: seven subsidiaries) engaged in the implementation of the State policy and State programmes, having the following areas of activity pursuant to the Holding’s strategy:

- Development institutions include Development Bank of Kazakhstan JSC, Export Insurance Company Export credit agency of Kazakhstan JSC, Damu Entrepreneurship Development Fund JSC, and Qazaqstan Investment Corporation JSC. The objective of these institutions is to provide credit, investment and other financial and non-financial support to investment projects in priority sectors of economy, aimed to diversify the economy and development of the secondary sector, export of Kazakhstani products, development of innovations and development of small and medium business.
- Financial institutions comprise Otbasyl Bank JSC, Kazakhstan Housing Company JSC. These institutions are tasked with raising capital, providing long-term financing for mortgages, and reducing related borrowing costs and participating in the implementation of a state housing construction policy.
- Agrarian Credit Corporation JSC is a financial institution established to promote the sustainable development of, and provide technical equipment to, the agro-industrial complex of the Republic of Kazakhstan through formation of an accessible and effective financing arrangement and enhancing competencies of entities operating in agro-industrial complex.

On 29 May 2013, the Holding and “Samruk-Kazyna” National Welfare Fund Joint Stock Company (“Samruk-Kazyna NWF”) signed an agreement for the transfer of shares of Development Bank of Kazakhstan JSC (the “DBK JSC”), Investment Fund of Kazakhstan JSC (the “IFK JSC”), Export Insurance Company Export credit agency of Kazakhstan JSC (“ECA JSC”), Damu Entrepreneurship Development Fund JSC (“Damu EDF JSC”), and Qazaqstan Investment Corporation JSC (the “QIC JSC”) in trust management without the right of subsequent repurchase, whereby the Holding acted as a trust manager. During August and October 2013, Samruk-Kazyna NWF transferred shares of the above-mentioned entities to the Committee for State Property and Privatisation in exchange for blocks of shares of other joint stock companies and property.

On 17 June 2013, the Holding and Committee for State Property and Privatisation of the Ministry of Finance of the Republic of Kazakhstan (the “Committee for State Property and Privatisation”) signed an agreement on transfer of government shares of QazTech Ventures JSC (the “QTV JSC”), Housing Construction Savings Bank “Otbasyl Bank” JSC (the “Otbasyl Bank JSC”), Kazakhstan Housing Company JSC (the “KHC JSC”), Housing Construction Guarantee Fund JSC (the “HCGF JSC”) and Baiterek Development JSC (the “BD JSC”) in trust management without the right of subsequent repurchase, whereby the Holding acted as a trust manager.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

As part of the implementation of the Decree of the President of the Republic of Kazakhstan Kassym-Zhomart Tokayev dated 2 September 2019 as to reduce the number of operators of housing programmes, and by the Order of the Ministry of Industry and Infrastructural Development of the Republic of Kazakhstan dated 20 March 2020 No. 156, a decision was made to reorganise KHC JSC and BD JSC and HCGF JSC by merging BD JSC and HCGF JSC and establishing KHC JSC. According to the deeds of transfer dated 30 July 2020 and 16 November 2020, the assets and liabilities of BD JSC and HCGF JSC were transferred to KHC JSC accordingly.

In August and October 2013, the Committee for State Property and Privatisation made a contribution to the share capital of the Holding with shareholdings in the ten aforementioned entities in exchange for ordinary shares in the Holding totalling Tenge 632,615,460 thousand and made a cash contribution of Tenge 30,486,550 thousand, which the Holding subsequently contributed to the share capital of DBK JSC and of QIC JSC.

In accordance with the Order No.964 of the Committee for State Property and Privatisation dated 2 October 2014, the Investment Committee of the Ministry of Industry and New Technologies of the Republic of Kazakhstan transferred 26.00% of shares in KHC JSC to the Holding as a contribution to share capital. The transaction value was Tenge 10,216,702 thousand, whereby total number of shares transferred was 10,216,701 with a par value of Tenge 1,000 per share and one (1) share with a par value of Tenge 608 per share.

On 15 March 2021, the Holding, as a part of the implementation of Clause 52 of the National Action Plan on Implementation of the Address of the Head of State of 1 September 2020 "Kazakhstan in the New Reality: Time to Act" established a single development institution through the takeover of the KazAgro National Managing Holding JSC ("KazAgro NMH JSC"), as part of which the Holding acquired three subsidiaries: KazAgroFinance JSC ("KAF JSC"), Agrarian Credit Corporation JSC ("ACC JSC") and Fund for Financial Support of Agriculture JSC ("FAGRI JSC").

On 31 May 2021, a decision was made to transfer 100% of ordinary shares of QTV JSC to QIC JSC.

On 2 July 2021, a 97.7% of interests of the Holding in KPPF LLP was transferred to QIC JSC.

On 17 August 2021, an online increasing-price auction was held on the web portal, www.gosreestr.kz, of the Register of State Property of Information and Accounting Center JSC of the Ministry of Finance of the Republic of Kazakhstan. In accordance with the Protocol of the online auction results of 17 August 2021, on 27 August 2021, the Holding concluded a purchase and sale contract with a buyer to sell one hundred percent of the IFK JSC's shares. On 5 October 2021, 100% of shares of IFK JSC were written off from the Holding's account and credited to the buyer's account with Central Securities Depository JSC.

On 13 December 2021, in accordance with the decision of the Board of Directors of the Holding, FAGRI JSC and ACC JSC were reorganised through takeover of FAGRI JSC by ACC JSC. On 13 December 2021, a deed of transfer was approved to transfer all property, assets and liabilities, rights and obligations of FAGRI JSC to ACC JSC, which is a legal successor to FAGRI JSC for all its assets and liabilities.

In pursuance of the instructions of the Head of the State, on 25 July 2023, the Holding transferred 100% of shares of KAF JSC to ACC JSC.

In September 2022, the Holding acquired 99.9977% of shares of SB of Sberbank JSC in Kazakhstan.

In September 2022, SB of Sberbank JSC in Kazakhstan was re-registered in connection with a change of its name to Bereke Bank JSC.

In March 2024, the Holding concluded a sale and purchase contact with a foreign investor to sell 100% of shares of Bereke Bank JSC, subject to suspensive conditions. In October 2024 once all suspensive conditions have been met, including obtaining by the investor of relevant approvals from regulatory bodies of the Republic of Kazakhstan the Holding transferred ownership of 100% of shares of Bereke Bank JSC to the investor.

The following table provides details of the major direct subsidiaries included into these consolidated financial statements of the Holding:

Name of a subsidiary	Abbreviated name	Country of incorporation	Ownership interest, %	
			31 December 2025	31 December 2024
Development Bank of Kazakhstan JSC	DBK JSC	The Republic of Kazakhstan	100.00	100.00
Export Insurance Company Export credit agency of Kazakhstan JSC	ECA JSC	The Republic of Kazakhstan	100.00	100.00
Damu Entrepreneurship Development Fund JSC	Damu EDF JSC	The Republic of Kazakhstan	100.00	100.00
Qazaqstan Investment Corporation JSC	QIC JSC	The Republic of Kazakhstan	100.00	100.00
Otbasy Bank JSC	Otbasy Bank JSC	The Republic of Kazakhstan	100.00	100.00
Kazakhstan Housing Company JSC	KHC JSC	The Republic of Kazakhstan	100.00	100.00
Agrarian Credit Corporation JSC	ACC JSC	The Republic of Kazakhstan	100.00	100.00

DBK JSC was incorporated in 2001 in accordance with the Law of the Republic of Kazakhstan "On Development Bank of Kazakhstan" No. 178-II dated 25 April 2001. DBK JSC is a national development institution, the principal activity of which is improving state investing activities and enhancing its efficiency, facilitating the development of production infrastructure, processing industry, and assisting with attraction of external and internal investments in national economy.

ECA JSC was incorporated in accordance with the Decree of the Government of the Republic of Kazakhstan dated 12 May 2003 No. 442. It is the only specialised insurance organisation that performs the functions of an export and credit agent of the Republic of Kazakhstan.

Damu EDF JSC was incorporated in accordance with the Decree of the Government of the Republic of Kazakhstan dated 26 April 1997 No. 665. The principal activity of Damu EDF JSC is to provide financing to small and medium-sized businesses and microfinancing organisations through commercial banks. Credit risk of ultimate borrowers is transferred to commercial banks.

QIC JSC was incorporated on 7 March 2007 by the Government of the Republic of Kazakhstan in accordance with the laws of the Republic of Kazakhstan. The principal activity of QIC JSC is creating and participating in investment funds and investing in financial instruments.

Otbasy Bank JSC was established in accordance with the Decree of the Government of the Republic of Kazakhstan dated 16 April 2003 No. 364 for the purposes of development of residential construction savings system in the Republic of Kazakhstan. Otbasy Bank JSC is involved in attracting funds of customers to accumulate residential construction savings, providing various residential mortgage loans to its customers, and in trading in securities and placing funds with banks.

KHC JSC was established on 29 December 2000 in accordance with the Resolution No. 469 of the National Bank of the Republic of Kazakhstan (the "NBRK") dated 20 December 2000. The principal activity of KHC JSC is providing mortgage loans under a licence granted by regulatory authorities as well as conducting trust management, factoring, forfeiting and leasing operations.

ACC JSC was established in accordance with the Decree of the Government of the Republic of Kazakhstan No. 137 dated 25 January 2001. The principal activity of ACC JSC is implementation of the government programmes to support the agricultural sector; attraction of domestic and foreign investments to implement its own projects in the agro-industrial complex; development and implementation of projects in the agro-industrial complex; sale of pledged properties and agricultural products received as repayment of funds granted; bank lending operations on the basis of the relevant licence, leasing activities, and other activities not prohibited by the legislative acts.

The Holding's registered address and place of business. The Holding's legal address and place of business is 55a Mangilik Yel Avenue, Yessil district, Astana, Republic of Kazakhstan.

Presentation currency. These consolidated financial statements are presented in thousands of the Kazakhstan Tenge ("Tenge"), unless otherwise stated.

Operating environment of the Holding.

The Holding's operations are primarily located in Kazakhstan. Consequently, the Holding is exposed to the economic and financial markets of the Republic of Kazakhstan which display characteristics of an emerging market. The legal, tax and regulatory frameworks continue development, but are subject to varying interpretations and frequent changes which together with other legal and fiscal impediments contribute to the challenges faced by entities operating in Kazakhstan. Depreciation of the Kazakhstan Tenge, the volatility in the global price of oil and the ongoing military conflict between the Russian Federation and Ukraine have also increased the level of uncertainty in the business environment.

The consolidated financial statements reflect management's assessment of the impact of the Kazakhstan business environment on the operations and the consolidated financial position of the Holding. The future business environment may differ from management's assessment.

2 Basis of preparation

Statement of compliance. These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards").

Basis of measurement. The consolidated financial statements are prepared on the historical cost basis except that financial instruments measured at fair value through other comprehensive income, financial instruments measured at fair value through profit or loss and embedded derivative are stated at fair value.

Going concern Management of the Holding has prepared these consolidated financial statements on a going concern basis.

Functional and presentation currency. The functional currency of the Holding is the Kazakhstani tenge ("Tenge") as, being the national currency of the Republic of Kazakhstan, it reflects the economic substance of the majority of underlying events and circumstances relevant to the Holding.

Tenge is also the presentation currency for the purposes of this consolidated financial information.

All financial information presented in Tenge has been rounded to the nearest thousand, unless otherwise stated.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

Comparative information. The Holding changed presentation of certain captions in the primary forms of consolidated financial statements. Comparative information is reclassified to conform to changes in presentation in the current period.

The Holding changed its presentation of loans to leasing companies in the consolidated statement of financial position.

The following table summarises the impacts on the Holding's consolidated financial statements.

<i>(In thousands of Kazakhstani Tenge)</i>	As previously reported	Adjustments	As reclassified
Consolidated Statement of Financial Position as at 31 December 2024			
Loans to banks, financial institutions and leasing companies	434,371,612	16,716,397	451,088,009
Loans to customers	6,575,246,869	(16,716,397)	6,558,530,472

<i>(In thousands of Kazakhstani Tenge)</i>	As previously reported	Adjustments	As reclassified

Other liabilities	36,464,446	(18,542,000)	17,922,446

3 Material accounting policies

The Holding has consistently applied the following accounting policies to all periods presented in these consolidated financial statements.

Consolidated financial statements. Subsidiaries are those investees, including structured entities, that the Holding Company controls because the Holding Company (i) has power to direct relevant activities of the investees that significantly affect their returns, (ii) has exposure, or rights, to variable returns from its involvement with the investees, and (iii) has the ability to use its power over the investees to affect the amount of investor's returns. The existence and effect of substantive rights, including substantive potential voting rights, are considered when assessing whether the Holding Company has power over another entity.

For a right to be substantive, the holder must have practical ability to exercise that right when decisions about the direction of the relevant activities of the investee need to be made. The Holding Company may have power over an investee even when it holds less than majority of voting power in an investee.

In such a case, the Holding Company assesses the size of its voting rights relative to the size and dispersion of holdings of the other vote holders to determine if it has de-facto power over the investee. Protective rights of other investors, such as those that relate to fundamental changes of investee's activities or apply only in exceptional circumstances, do not prevent the Holding Company from controlling an investee. Subsidiaries are consolidated from the date on which control is transferred to the Holding Company and are deconsolidated from the date on which control ceases, except for the subsidiaries acquired from the parties under common control.

The acquisition method of accounting is used to include subsidiaries to the consolidated financial statements with an exception of purchase of subsidiaries from entities under common control. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest when acquisition method is applied.

The Holding measures non-controlling interest that represents present ownership interest and entitles the holder to a proportionate share of net assets in the event of liquidation on a transaction by transaction basis, either at: (a) fair value, or (b) the non-controlling interest's proportionate share of net assets of the acquiree. Non-controlling interests that are not present ownership interests are measured at fair value.

Goodwill is measured by deducting the net assets of the acquiree from the aggregate of the consideration transferred for the acquiree, the amount of non-controlling interest in the acquiree and fair value of an interest in the acquiree held by the Holding immediately before the acquisition date. Any negative amount ("negative goodwill") is recognised in profit or loss, after management reassesses whether it identified all the assets acquired and all liabilities and contingent liabilities assumed, and reviews appropriateness of their measurement.

The consideration transferred for the acquiree is measured at the fair value of the assets given up, equity instruments issued and liabilities incurred or assumed, including fair value of assets or liabilities from contingent consideration arrangements, but excludes acquisition related costs such as advisory, legal, valuation and similar professional services. Transaction costs incurred for issuing equity instruments are deducted from equity; transaction costs incurred for issuing debt securities are deducted from its carrying amount and all other transaction costs associated with the acquisition are expensed.

Intercompany transactions, balances and unrealised gains on transactions between the Holding and its subsidiaries are eliminated; unrealised losses are also eliminated unless the cost cannot be recovered. The Holding Company and all its subsidiaries use uniform accounting policies consistent with the Holding's policies.

Non-controlling interest is that part of the net results and of the equity of a subsidiary attributable to interests which are not owned, directly or indirectly, by the Holding. Non-controlling interest forms a separate component of the Holding's equity.

Purchases and sales of non-controlling interests. The Holding applies the economic entity model to account for transactions with owners of non-controlling interest. Any difference between the purchase consideration and the carrying amount of non-controlling interest acquired is recorded as a capital transaction directly in equity. The Holding recognises the difference between sales consideration and carrying amount of non-controlling interest sold as a capital transaction in the consolidated statement of changes in equity.

Accounting for business combinations under common control. A merger of entities under common control is a business combination in which all of the combined entities are ultimately controlled by the same party or parties, both before, and after the combination, and that control is not transitory.

The effect of combination of entities under common control is accounted for by the Holding using 'equity interest combination' method provided that: assets and liabilities of the combining companies are measured at their carrying amount at the combination date, combination-related transaction costs are expensed in the consolidated statement of profit or loss and other comprehensive income, mutual balances are eliminated; any difference between the purchase price paid/transferred and the value of acquired net assets (at their carrying amount as disclosed in the consolidated financial statements), and is recognised in the acquirer's equity.

Interests in associates and joint ventures. Associates are those entities in which the Holding has significant influence, but not control or joint control, over the financial and operating policies. Significant influence is presumed to exist when the Holding holds between 20% and 50% of the voting power of another entity.

A joint venture is an arrangement in which the Holding has joint control, whereby the Holding has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

The Holding applies exemption provided by IAS 28, which allows not to apply the equity accounting method to account for investments in associates and joint ventures, which are directly (or indirectly) held by an entity that is a venture capital organisation. Such entities have a right to account for their investments in said associates and joint ventures at fair value through profit or loss in accordance with IFRS 9. The Holding believes that the Holding's subsidiary, QIC JSC, conforms to the status of entities specialising in investment in new ventures as QIC JSC meets the following criteria:

- The principal activity of QIC JSC is investing of funds to generate the operating income, capital gains or both.
- The QIC JSC's investing activity may be clearly and objectively separated from any other activities.
- Investees represent the independent business units operating independently (on a stand-alone basis) of an investor.

Thus, interests in associates and joint ventures of QIC JSC are accounted for as financial instruments at fair value through profit or loss in accordance with the scope exemption in IAS 28 *Investments in Associates and Joint Ventures*.

Disposals of subsidiaries, associates or joint ventures. When the Holding ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in comprehensive income in respect of that entity, are accounted for as if the Holding had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in comprehensive income are reclassified to profit or loss, where appropriate.

Interest income and expense

Effective interest rate. Interest income and expense are recognised in profit or loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than credit-impaired assets, the Holding estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs and fees and amounts paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

Amortised cost and gross carrying amount. The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The 'gross carrying amount of a financial asset' measured at amortised cost is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

Calculation of interest income and expense. The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or a financial liability. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability.

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

For information on when financial assets are credit-impaired, see 'Financial assets and financial liabilities' section (iv) below.

Presentation. Interest income calculated using the effective interest method presented in the consolidated statement of profit or loss and other comprehensive income includes interest on financial assets measured at amortised cost and interest on debt instruments measured at FVOCI.

Other interest income presented in the consolidated statement of profit or loss and other comprehensive income includes interest income on non-derivative debt financial instruments measured at FVTPL and net investments in finance leases.

Interest expense presented in the consolidated statement of profit or loss and other comprehensive income includes interest expense on financial liabilities measured at amortised cost and on non-derivative financial liabilities measured at FVTPL.

Financial assets and financial liabilities

(i) Classification of financial instruments

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL).

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt financial assets measured at FVOCI, gains and losses are recognised in other comprehensive income, except for the following, which are recognised in profit or loss in the same manner as for financial assets measured at amortised cost:

- interest income calculated using the effective interest method;
- expected credit losses and reversals; and
- foreign exchange gains and losses.

When a debt financial asset measured at fair value through other comprehensive income is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

On initial recognition of an equity investment that is not held for trading, the Holding may irrevocably elect to present subsequent changes in fair value in other comprehensive income. This election is made on an investment-by-investment basis. Gains or losses on such equity instruments are never reclassified to profit or loss and no impairment is recognised in profit or loss. Dividends are recognised in profit or loss unless they clearly represent a recovery of part of the cost of investment, in which case they are recognised in other comprehensive income. Cumulative gains and losses recognised in other comprehensive income are transferred to retained earnings on disposal of an investment.

All other financial assets are classified as measured at fair value through profit or loss.

In addition, on initial recognition the Holding may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment. The Holding makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Holding's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Holding's stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Assessment of whether contractual cash flows are solely payments of principal and interest. For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin. In assessing whether the contractual cash flows are solely payments of principal and interest, the Holding considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Holding considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Holding's claim to cash flows from specified assets (e.g. non-recourse features);
- features that modify consideration of the time value of money – e.g. periodical reset of interest rates.

Non-recourse loans

In some cases, loans made by the Holding that are secured by collateral of the borrower limit the Holding's claim to cash flows of the underlying collateral (non-recourse loans). The Holding applies judgement in assessing whether the non-recourse loans meet the SPPI criterion.

The Holding typically considers the following information when making this judgement:

- whether the contractual arrangement specifically defines the amounts and dates of the cash payments of the loan;
- the fair value of the collateral relative to the amount of the secured financial asset;
- the ability and willingness of the borrower to make contractual payments, notwithstanding a decline in the value of collateral;

- whether the borrower is an individual or a substantive operating entity or is a special-purpose entity;
- the Holding's risk of loss on the asset relative to a full-recourse loan;
- the extent to which the collateral represents all or a substantial portion of the borrower's assets; and
- whether the Holding will benefit from any upside from the underlying assets.

Reclassification. Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Holding changes its business model for managing financial assets.

Financial liabilities

The Holding classifies its financial liabilities, other than financial guarantees, as measured at amortised cost or FVTPL.

Reclassification. Financial liabilities are not reclassified subsequent to their initial recognition.

(ii) Derecognition

Financial assets. The Holding derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Holding neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

Any cumulative gain/loss recognised in other comprehensive income in respect of equity investment securities designated as at FVOCI is not recognised in profit or loss on derecognition of such securities.

The Holding enters into transactions whereby it transfers assets recognised in its consolidated statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. In such cases, the transferred assets are not derecognised. Examples of such transactions are securities lending and sale-and-repurchase transactions.

In transactions in which the Holding neither retains nor transfers substantially all of the risks and rewards of ownership of a financial asset and it retains control over the asset, the Holding continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

Financial liabilities. The Holding derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

(iii) Modification of financial assets and financial liabilities

Financial assets. If the terms of a financial asset are modified, the Holding evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different (referred to as 'substantial modification'), then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

Changes in cash flows on existing financial assets or financial liabilities are not considered as modification, if they result from existing contractual terms.

The Holding performs a quantitative and qualitative evaluation of whether the modification is substantial, i.e. whether the cash flows of the original financial asset and the modified or replaced financial asset are substantially different. The Holding assesses whether the modification is substantial based on quantitative and qualitative factors in the following order: qualitative factors, quantitative factors, combined effect of qualitative and quantitative factors. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In making this evaluation the Holding analogises to the guidance on the derecognition of financial liabilities.

The Holding concludes that the modification is substantial as a result of the following qualitative factors:

- change of the currency of the financial asset;
- change in collateral or other credit enhancement;
- change of terms of the financial asset that lead to non-compliance with SPPI criterion (e.g. inclusion of conversion feature).

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximise recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Holding plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place (see below for write off policy). This approach impacts the result of the quantitative evaluation and means that the derecognition criteria are not usually met in such cases. The Holding further performs qualitative evaluation of whether the modification is substantial.

If the modification of a financial asset measured at amortised cost or FVOCI does not result in derecognition of the financial asset, then the Holding first recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognises the resulting adjustment as a modification gain or loss in profit or loss.

For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

Financial liabilities. The Holding derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss. The consideration paid includes non-financial assets transferred, if any, and the liabilities assumed, including the new modified financial liability.

The Holding assesses whether the modification is substantial based on quantitative and qualitative factors in the following order: qualitative factors, quantitative factors, combined effect of qualitative and quantitative factors. The Holding concludes that the modification is substantial as a result of the following qualitative factors:

- change of the currency of the financial liability;
- change in collateral or other credit enhancement;
- inclusion of conversion option;
- change in the subordination of the financial liability.

For the quantitative assessment the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability.

If the modification of a financial liability is not accounted for as derecognition, then the amortised cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognised in profit or loss. For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

(iv) Impairment loss

See also Note 5.

The Holding recognises loss allowances for expected credit losses (ECL) on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- net investment in finance lease;
- financial guarantee contracts issued; and
- loan commitments issued.

No impairment loss is recognised on equity investments.

The Holding measures loss allowances at an amount equal to lifetime ECLs, except for the following, for which they are measured as 12-month ECLs:

- debt investment securities that are determined to have moderate credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition (see Note 5).

12-month expected credit losses (12-month ECL) are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial instruments for which a 12-month ECL is recognised are referred to as 'Stage 1' financial instruments.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. Financial instruments, for which a lifetime ECL is recognised are referred to as 'Stage 2' financial instruments (if the credit risk has increased significantly since initial recognition, but the financial instruments are not credit-impaired) and 'Stage 3' financial instruments (if the financial instruments are credit-impaired).

Measurement of expected credit losses (ECL). ECLs are a probability-weighted estimate of credit losses. They are measured as follows:

- *financial assets that are not credit-impaired at the reporting date* as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Holding in accordance with the contract and the cash flows that the Holding expects to receive);
- *financial assets that are credit-impaired at the reporting date:* as the difference between the gross carrying amount and the present value of estimated future cash flows;
- *undrawn loan commitments:* as the present value of the difference between the contractual cash flows that are due to the Holding if the commitment is drawn down and the cash flows that the Holding expects to receive; and
- *financial guarantee contracts:* the present value of expected payments to reimburse the holder less any amounts that the Holding expects to recover. See Note 5.

Restructured financial assets. If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised and ECLs are measured as follows:

- If the expected restructuring does not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset.
- If the expected restructuring results in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

Credit-impaired financial assets. At each reporting date, the Holding assesses whether financial assets carried at amortised cost and debt financial assets at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being past due;
- the restructuring of a loan or advance on terms that the Holding would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower's condition was usually considered to be credit-impaired unless there was evidence that the risk of not receiving contractual cash flows had reduced significantly and there were no other indicators of impairment.

In making an assessment of whether an investment in sovereign debt (other financial assets) is credit-impaired, the Holding considers the following factors:

- the market's assessment of creditworthiness as reflected in the bond yields;
- the rating agencies' assessments of creditworthiness;
- the country's ability to access the capital markets for new debt issuance;
- the probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness;
- the international support mechanisms in place to provide the necessary support as 'lender of last resort' to that country, as well as the intention, reflected in public statements of governments and agencies to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intent, whether there is the capacity to fulfil the required criteria.

Loss allowances for ECL are presented in the consolidated statement of financial position as follows:

- *financial assets measured at amortised cost:* as a deduction from the gross carrying amount of the assets;
- *loan commitments and financial guarantee contracts:* generally, as a provision;

- *debt instruments measured at FVOCI*: no loss allowance is recognised in the consolidated statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the fair value reserve.

Write-offs. Loans and debt securities are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset. This is generally the case when the Holding determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level.

Recoveries of amounts previously written off are included in 'provision for loan portfolio impairment' and 'provision for impairment on other assets and credit related commitments' in the consolidated statement of profit or loss and other comprehensive income.

However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Holding's procedures for recovery of amounts due.

Leases. At inception of a contract, the Holding assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

(i) As a lessor

At inception or on modification of a contract that contains a lease component, the Holding allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

When the Holding acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Holding makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Holding considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

If an arrangement contains lease and non-lease components, then the Holding applies IFRS 15 to allocate the consideration in the contract.

The Holding applies the derecognition and impairment requirements in IFRS 9 to the net investment in the lease. The Holding further regularly reviews estimated unguaranteed residual values used in calculating the gross investment in the lease.

Assets to be transferred under finance leases

Assets acquired by the Holding for the purpose of subsequent transfer to lessees under finance lease arrangements are recognised as assets held for transfer under finance lease until the leased asset is delivered to the lessee.

Such assets are measured at cost, which comprises the purchase price from the supplier, import duties and non-refundable taxes, and other costs directly attributable to the acquisition of the asset and bringing it to the condition necessary for its intended use.

The underlying asset is derecognised and the difference between the carrying amount of the underlying asset and the finance lease receivable is recognised in profit or loss when recognising the finance lease receivable.

Advances paid

Advances paid by the Holding to suppliers for leased assets under finance lease arrangements are recognised as advances paid under finance lease agreements and measured at the amount of cash paid.

These advances represent the Holding's contractual right to receive leased assets from the supplier.

Upon delivery of the leased assets, the related advance payments are included in the initial carrying amount of the leased assets.

In the event of termination of the supply agreement or the finance lease agreement, advances paid are refundable or otherwise settled in accordance with the terms of the relevant contractual arrangements.

Advances received

Advances received from lessees prior to the transfer of leased assets are recognised as liabilities representing advances received under finance lease agreements.

Upon transfer of the leased assets to the lessee, the advances received reduce the net investment in the finance lease, and the related liability is derecognised.

Financial guarantees and loan commitments. Financial guarantees are contracts that require the Holding to make specified payments to reimburse the holder for a loss that it incurs because a specified debtor fails to make payment when it is due in accordance with the terms of a debt instrument. Loan commitments are firm commitments to provide credit under pre-specified terms and conditions.

Financial guarantees issued or commitments to provide a loan at a below-market interest rate are initially measured at fair value. Subsequently, they are measured at the higher of the loss allowance determined in accordance with IFRS 9 and the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of IFRS 15.

The Holding has issued no loan commitments that are measured at FVTPL. For other loan commitments the Holding recognises a loss allowance. Liabilities arising from financial guarantees and loan commitments are included within other liabilities.

Assets held for sale. Assets and disposal groups, which may include both non-current and current assets, are classified in the consolidated statement of financial position as 'assets held for sale' if their carrying amount will be recovered principally through a sale transaction, including loss of control of a subsidiary holding the assets, within twelve months after the end of the reporting period. Assets are reclassified when all of the following conditions are met: (a) the assets are available for immediate sale in their present condition; (b) the Holding's management approved and initiated an active programme to locate a buyer; (c) the assets are actively marketed for sale at a reasonable price; (d) the sale is expected within one year and (e) it is unlikely that significant changes to the plan to sell will be made or that the plan will be withdrawn. Assets or disposal groups classified as held for sale in the current period's consolidated statement of financial position are not reclassified or re-presented in the comparative consolidated statement of financial position to reflect the classification at the end of the current period.

A disposal group is a group of assets (current and non-current) to be disposed of, by sale or otherwise, together as a group in a single transaction, and liabilities directly associated with those assets that will be transferred in the transaction. Goodwill is included if the disposal group includes an operation within a cash-generating unit to which goodwill has been allocated on acquisition. Assets are assets that include amounts expected to be recovered or collected more than in twelve months after the end of the reporting period. If reclassification is required, both the current and non-current portions of an asset are reclassified.

Held for sale disposal groups are generally measured at the lower of their carrying amount and fair value less cost to sell. Held for sale property, plant and equipment, investment properties and intangible assets are not depreciated or amortised.

Liabilities directly associated with disposal groups that will be transferred in the disposal transaction are reclassified and presented separately in the consolidated statement of financial position.

Discontinued operation. A discontinued operation is a component of the Holding that either has been disposed of, or that is classified as held for sale, and: (a) represents a separate major line of business or geographical area of operations; (b) is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or (c) is a subsidiary acquired exclusively with a view to resale. Earnings and cash flows of discontinued operations, if any, are disclosed separately from continuing operations with comparatives being re-presented.

Government grants. Government grants are assistance by the Government, Government agencies and state-owned entities in the form of transfers of resources to the Holding in return for past or future compliance with certain conditions relating to the operating activities of the Holding. Government grants are not recognised until there is reasonable assurance that the Holding will comply with the conditions attached to them and the grants will be received. If there are conditions that may require repayment, the grant is recognised as a "deferred income" in 'other liabilities'.

The benefit of a government loan at a below-market rate of interest is treated as a government grant where the government does not act as a shareholder. The benefit of the below-market rate of interest is measured as the difference between the initial carrying value of the loan and the proceeds received.

Government grants that compensate the Holding for expenses incurred are recognised in profit or loss as income on a systematic basis in the same periods in which the expenses are recognized. The Holding chose a presentation format to offset a grant related to income against the related expenditure (net presentation).

There are two principal approaches to account for government grants: the capital approach, under which a grant is recognised outside profit or loss, and the income approach, under which a grant is recognised in income/expense over one or more periods.

Where the government acts as a lender - i.e. in the same way as an unrelated lender - then a government grant is recognised in profit or loss. If the loan is from the government acting in the capacity of a shareholder, then the government grant received is recorded in equity.

Income tax. Income taxes have been provided for in the consolidated financial statements in accordance with legislation enacted using tax rates and provision of law or substantively enacted by the end of the reporting period. The income tax charge comprises current tax and deferred tax and is recognised in profit or loss for the year, except if it is recognised in comprehensive income or directly in equity because it relates to transactions that are also recognised, in the same or a different period, in comprehensive income or directly in equity.

Current tax comprises the expected tax payable or receivable from tax authorities on the taxable income or loss for the reporting and previous periods. The taxable income or loss are based on estimates, if the consolidated financial statements are approved prior to submission of tax returns. Taxes, other than on income, are recorded within administrative and other expenses.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded for temporary differences on initial recognition of an asset or a liability in a transaction other than a business combination if the transaction, when initially recorded, affects neither accounting nor taxable profit. Deferred tax assets and liabilities are measured at tax rates enacted or substantively enacted at the end of the reporting period, which are expected to apply to the period when the temporary differences will reverse or the tax loss carry forwards will be utilised. Deferred tax assets and liabilities are offset only within the individual components of the Holding.

Deferred tax assets are recognised for deductible temporary differences and carry-forward tax losses, to the extent that it is probable that future taxable profits will be available which may be reduced by such deducted amounts.

Deferred income tax is not recognised on post-acquisition retained earnings and other post-acquisition movements in reserves of subsidiaries where the Holding controls the subsidiary's dividend policy, and it is probable that the difference will not reverse through dividends or otherwise in the foreseeable future.

Uncertain tax positions. The Holding's uncertain tax positions are reassessed by management at the end of each reporting period. Liabilities are recorded for income tax positions that are determined by management as more likely than not to result in additional taxes being levied if the positions of the Holding were to be challenged by the tax authorities. The assessment is based on the interpretation of tax laws that have been enacted or substantively enacted by the end of the reporting period and any known court or other rulings on such issues. Liabilities for penalties, interest and taxes other than on income are recognised based on management's best estimate of the expenditure required to settle the obligations at the end of the reporting period.

Share capital. Ordinary shares and non-redeemable preference shares with discretionary dividends are both classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds. Any excess of the fair value of consideration received over the par value of shares issued is recorded as share premium in equity.

Dividends. Dividends are recognised as a liability and deducted from equity at the reporting date only if they are declared and authorised before or on the reporting date. Any dividends recommended prior to the end of the reporting period and recommended or declared after the end of the reporting period but before the consolidated financial statements are authorised for issue are disclosed in the consolidated financial statements.

Additional paid-in capital. The Holding and its subsidiaries receive funding from the Government of the Republic of Kazakhstan, "National Welfare Fund "Samruk-Kazyna" JSC (the "NWF Samruk Kazyna JSC") or public bodies responsible for various state programmes, in the form of loans and subordinated bonds at a low interest rate. At initial recognition, this financing is recognised at fair value, which is estimated using appropriate market interest rates to discount contractual future cash flows. The difference between the fair value and the funding received is recognised as additional paid-in capital, except for the loans issued with specific conditions on return of the undistributed portion of the funds. Difference between the fair value of the loans issued with the payback claim and funds received is recognised as deferred income, which is transferred to profit or loss during the loan term.

Operating segments. An operating segment is a component of a Holding that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Holding); whose operating results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

Presentation of the consolidated statement of financial position in the order of liquidity. The Holding does not have a clearly identifiable operating cycle and therefore does not present current and non-current assets and liabilities separately in the consolidated statement of financial position. Instead, analysis of assets and liabilities by their expected and contractual maturities are presented in Note 30.

New standards and interpretations not yet adopted. A number of new standards are effective for annual periods beginning after 1 January 2025 and earlier application is permitted; however, the Holding has not early adopted the new or amended standards in preparing these consolidated financial statements.

IFRS 18 Presentation and Disclosure in Financial Statements

IFRS 18 will replace IAS 1 Presentation of Financial Statements and applies for annual reporting periods beginning on or after 1 January 2027. The new standard introduces the following key new requirements.

- Entities are required to classify all income and expenses into five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly-defined operating profit subtotal. Entities' net profit will not change.
- Management-defined performance measures (MPMs) are disclosed in a single note in the consolidated financial statements.
- Enhanced guidance is provided on how to group information in the consolidated financial statements.

Other accounting standards

In addition, all entities are required to use the operating profit subtotal as the starting point for the consolidated statement of cash flows when presenting operating cash flows under indirect method.

The Holding is still in the process of assessing the impact of the new standard, particularly with respect to the structure of the Holding's statement of profit or loss, the statement of cash flows and the additional disclosures required for MPMs. The Holding is also assessing the impact on how information is grouped in the consolidated financial statements, including for items currently labelled as "other".

The following new and amended standards are not expected to have a significant impact on the Holding's consolidated financial statements.

- Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7)

4 Critical accounting estimates and judgements in applying accounting policies

The Holding makes estimates and assumptions that affect the amounts recognised in the consolidated financial statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are reviewed on an ongoing basis, based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements in the process of applying the accounting policies. Judgments that have the most significant effect on the amounts recognised in the consolidated financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Impairment of financial instruments. Assessment of whether credit risk on the financial asset has increased significantly since initial recognition; assessment of probability of default (PD) and loss given default (LGD); assessment of expected cash flows forecast for financial instruments classified as Stage 3 instruments and incorporation of forward-looking information in the measurement of ECL – Note 5.

Tax legislation. Kazakhstani tax, currency and customs legislation is subject to varying interpretations (Note 32).

Initial recognition of related party transactions. In the ordinary course of business, the Holding transacts with its related parties. Under IFRS 9, financial instruments on initial recognition are measured at fair value. Where there is no active market for such transactions, management applies judgement in determining whether transactions are priced at market or non-market interest rates. The basis for judgement is pricing for similar types of transactions with unrelated parties and effective interest rate analysis. Terms and conditions of related party balances are disclosed in Note 36.

Determining the fair value of financial instruments in emerging stock market in the Republic of Kazakhstan. In determining the fair value of financial instruments, the Holding uses quotes from the Kazakhstan Stock Exchange ("KASE") as the most reliable source of information in an active market.

The Holding's management analyses the frequency of operations conducted on the KASE in respect of securities in the portfolio and securities that are traded with sufficient frequency and sufficient volume are classified as Level 1 securities. The remaining securities that are listed on the KASE are classified as Level 2 securities.

If the Holding has investments in unquoted assets, the fair value of such assets is determined based on valuation techniques such as discounted cash flow model as well as models based on data from similar operations performed on market conditions.

Management of the Holding believes that it used every possible and the most complete and accurate sources of fair value to measure reliably the fair value of these financial instruments.

Initial recognition of the borrowings and investments at the rates below market rates under the state development programmes. Approach to accounting for and evaluation of borrowings and loans made under the state programmes to support economic development and approach to accounting for amortisation and utilisation of government grants are disclosed in notes 8, 10, 11, 12, 15, 16, 17, 19, 22 and 26.

5 Financial risk review

This note presents information about the Holding's exposure to financial risks. For information on the Holding's financial risk management framework, see Note 30.

Credit risk - Amounts arising from ECL

See accounting policy in Note 3 (iv).

Significant increase in credit risk. When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Holding considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Holding's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the remaining lifetime probability of default (PD) as at the reporting date; with
- the remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations).

The Holding uses three criteria for determining whether there has been a significant increase in credit risk:

- quantitative test based on movement in probability of default (PD);
- qualitative indicators; and
- backstop of 30 days past due.

Credit risk grades. The Holding allocates each exposure to a credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors may vary depending on the nature of the exposure and the type of a borrower.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each exposure is allocated to a credit risk grade at initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade.

The monitoring typically involves use of the following data:

- Information obtained during periodic review of counterparty files – e.g. audited financial statements, management accounts, budgets and projections;
- Payment record – this includes overdue status;
- Data from credit reference agencies, press articles, changes in external credit ratings;
- Requests for and granting of forbearance;
- Quoted bond prices for the issuer where available;
- Existing and forecast changes in business, financial and economic conditions;
- Actual and expected significant changes in the political, regulatory and technological environment of the counterparty or the issuer or in its business activities.

Generating the term structure of PD. Credit risk grades are a primary input into the determination of the term structure of PD for exposures on loans to corporate customers. The Holding collects performance and default information about its credit risk exposures analysed by jurisdiction or region, type of product and borrower as well as by credit risk grading. For some portfolios of financial assets measured on an individual basis, information purchased from external credit reference agencies may also be used.

To determine the internal credit rating of a counterparty who does not have external credit rating from international agencies Standard & Poor's, Fitch Ratings and Moody's Investors Service, the Holding uses expert judgement to determine ratings with taking into account the specific characteristics of the counterparty, consisting of 10 categories, such as profitability, liquidity, leverage, country risk, industry characteristics, specific activities of the enterprise, risk of concentration, legal regulation, internal data and debt.

The Holding employs statistical models to analyse the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

For portfolios of financial assets measured on a collective basis, the Holding mainly uses statistical migration models built using Markov chain, given the impact of macroeconomic information. The Holding uses historical statistics on defaults for the last 5 years.

Determining whether credit risk has increased significantly. The Holding assesses whether credit risk has increased significantly since initial recognition at each reporting period. Determining whether an increase in credit risk is significant depends on the characteristics of the financial instrument.

The criteria for determining whether credit risk has increased significantly vary by portfolio and include quantitative changes in PDs and qualitative factors, including a backstop based on delinquency.

The Holding considers credit risk of a particular exposure is deemed to have increased significantly since initial recognition, if the issuer's credit rating decreased by 2 points and more since initial recognition.

The credit risk may also be deemed to have increased significantly since initial recognition based on qualitative factors linked to the Holding's credit risk management processes that may not otherwise be fully reflected in its quantitative analysis on a timely basis. This will be the case for exposures that meet certain heightened risk criteria. Such qualitative factors are based on its expert judgement and relevant historical experience.

As a backstop, the Holding considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the counterparty.

If there is evidence that there is no longer a significant increase in credit risk relative to initial recognition, then the loss allowance on an instrument returns to being measured as 12-month ECL. When contractual terms of a loan have been modified, evidence that the criteria for recognising lifetime ECL are no longer met includes history of up-to-date payments over at least 12 months after the terms were revised, directed for repayment of the gross carrying amount of the financial asset against the modified contractual terms.

The Holding monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default;
- the criteria do not align with the point in time when an asset becomes 30 days past due;
- there is no unwarranted volatility in loss allowance from transfers between 12-month ECL (stage 1) and lifetime ECL measurements (stage 2).

Definition of default. The Holding considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Holding in full, without recourse by the Holding to actions such as realising security (if any is held);
- the borrower is past due more than 90 days on any material credit obligation to the Holding; or
- it is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligations.

In assessing whether a counterparty is in default, the Holding considers indicators that are:

- qualitative – e.g. breaches of covenant;
- quantitative – e.g. overdue status and non-payment on another obligation of the same issuer/borrower to the Holding, a decrease in the credit rating to D; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

Incorporating forward-looking information. The Holding incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL.

The Holding formulates a base scenario of future development of relevant economic variables and also considers a presented selection of other forecast scenarios. This process involves developing two or more additional economic scenarios and considering the appropriate probabilities of occurring of each scenario. External information considered includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Holding operates, national organisations such the Ministry of National Economy of the Republic of Kazakhstan, and International Monetary Fund.

A base scenario is the most likely to occur and it is aligned with information used by the Holding for other purposes. Other are less likely to occur scenarios where some are upside and other downside scenarios.

The Holding has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses. The key driver is GDP forecast. Taking into account lack of sufficient historical default data, the Holding determined that the data provided by rating agencies would serve as a source of information for economic scenarios. Scenarios are updated on a regular basis and used in assessment of credit risks.

As at 31 December 2025, the Holding updated key drivers forecasts, revised the scenario weights used to estimate expected credit losses (ECL) that resulted in a decrease in the 12-month PDs compared to the PDs used as at 31 December 2024, by 0.01%- 0.67% for ratings from AA to B-, and by 1.14% for rating CCC-, and for ratings CCC+ and CCC increase by 1.39%-1.90% respectively (2024: decrease by 0.01%-0.15% for ratings from A+ to B-, and by 2.15% for rating CCC-, and increase by 2.6% - 3.3% for ratings from CCC+ and CCC).

Key assumptions and judgements in estimating the allowance for losses on loans to corporate customers and finance leases receivables

Significant assumptions used by management in determining the amount of the allowance for losses on loans issued to corporate customers include the following:

- 12-month PD for borrowers with credit quality of Stage 1 was 0.03%-29.07%, lifetime PD level related to Stage 2 credit quality was 0.76%-57.57%;
- the weighted average level of LGD for borrowers in Stage 1 and Stage 2 was 42.35%.

Significant assumptions used by management in determining the amount of the allowance for losses on loans issued to agribusiness include the following:

- 12-month PD for borrowers with credit quality of Stage 1 was 0.57%-24.59%, lifetime PD level related to Stage 2 credit quality was 40.42%-89.92%;
- the weighted average level of LGD for borrowers in Stage 1 and Stage 2 was 23.38%.

Significant assumptions used by management in determining the amount of the allowance for losses on mortgage loans include the following:

- 12-month PD for borrowers with credit quality of Stage 1 was 0.002%-0.003%, lifetime PD level related to Stage 2 credit quality was 0.005%-0.12%;
- the weighted average level of LGD for borrowers in Stage 1 and Stage 2 was 37%.

Significant assumptions used by management in determining the amount of the allowance for losses on finance leases receivables include the following:

- 12-month PD for borrowers with credit quality of Stage 1 was 0.3%-30.7%, lifetime PD level related to Stage 2 credit quality was 4.9%-44.2%;
- the weighted average level of LGD for borrowers in Stage 1 and Stage 2 was 31.4%.

Modified financial assets and finance leases. The contractual terms of a financial instrument may be modified for a number of reasons, including changing market conditions, and other factors not related to a current or potential credit deterioration of the counterparty. An existing financial asset whose terms have been modified may be derecognised and the renegotiated asset recognised as a new financial asset at fair value in accordance with the accounting policy set out in Note 3 (iii).

If the modification is not a separate lease and the lease would not have been classified as an operating lease if the modification had been in effect at the inception date, then the lessor accounts for a modification to a finance lease applying IFRS 9 requirements.

When the terms of a financial asset are modified and the modification does not result in derecognition, the determination of whether the asset's credit risk has increased significantly reflects comparison of:

- its remaining lifetime PD at the reporting date based on the modified terms; with
- the remaining lifetime PD estimated based on data at initial recognition and the original contractual terms.

When modification results in derecognition, a new loan is recognised and allocated to Stage 1 (assuming it is not credit-impaired at that time).

The Holding renegotiates loans to customers in financial difficulties (referred to as 'forbearance activities') to maximise collection opportunities and minimise the risk of default. Under the Holding's forbearance policy, loan forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants.

For financial assets modified as part of the Holding's forbearance policy, the estimate of PD reflects whether the modification has improved or restored the Holding's ability to collect interest and principal and the Holding's previous experience of similar forbearance action. As part of this process, the Holding evaluates the borrower's payment performance against the modified contractual terms and considers various behavioural indicators.

Generally, forbearance is a qualitative indicator of a significant increase in credit risk and an expectation of forbearance may constitute evidence that an exposure is credit-impaired in default. A counterparty needs to demonstrate consistently good payment behaviour over 6-12 months before the exposure is no longer considered to be credit-impaired/in default or the PD is considered to have decreased such that the loss allowance reverts to being measured at an amount equal to 12-month ECL.

Measurement of ECLs. The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD).

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD.

The methodology of estimating PDs is discussed above under the heading "Generating the term structure of PD".

The Holding estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. The LGD parameter is 45%, if the counterparty is a bank or another financial institution that has an external credit rating, in the absence of an external rating the LGD coefficient shall be 100%.

For collateralised financial assets, the Holding applies liquidity coefficient ranging from 30.0% to 50% to the estimated value of collateral in case of sale, with a delay of 12 to 72 months in receiving proceeds from the sale of collateral, depending on the type of collateral. For portfolios of non-collateralised financial assets (including retail loans), LGDs are determined on the basis of the funds repayment statistics on average over the last 5 years.

For loans to large corporates included in DBK JSC's portfolio, the Holding uses the methodology for determining LGD that was developed by the international company S&P Global Market Intelligence for loans classified to Stages 1 and 2. This methodology is based on historical statistics and determines individual loss given default rates depending on the type, industry and seniority of the instruments. When calculating the loss given default in LGD models, the costs to recover any collateral that is an integral part of the financial asset and the stress test results of the economic value of assets for occurrence of negative economic scenarios are also taken into account.

LGD estimates are recalibrated for different economic scenarios and, for real estate lending, to reflect possible changes in property prices. They are calculated on a discounted cash flow basis using the effective interest rate as the discounting factor.

Exposure at default represents the expected exposure in the event of a default.

The Holding derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortisation. The EAD of a financial asset is its gross carrying amount at the time of default. For lending commitments, the EAD is potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For financial guarantees, the EAD represents the guarantee exposure when the financial guarantee becomes payable.

As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the Holding measures ECL considering the risk of default over the maximum contractual period (including any borrower's extension options) over which it is exposed to credit risk, even if, for credit risk management purposes, the Holding considers a longer period. The maximum contractual period extends to the date at which the Holding has the right to require repayment of an advance or terminate a loan commitment or guarantee.

Loans to customers, except mortgage loans and loans to agribusiness companies.

Changes in LGD may impact the allowance for expected credit losses on loans to customers. For example, to the extent that LGD differs by plus or minus 1% point change, the allowance for expected credit losses on loans to customers as at 31 December 2025 would be Tenge 840,360 thousand lower or 796,530 higher (31 December 2024: Tenge 1,803,115 thousand lower or Tenge 1,804,662 thousand higher).

Changes in PD may impact the allowance for expected credit losses on loans to customers. For example, for loans to customers, except mortgage loans and loans to agribusiness companies allocated to Stage 1 and Stage 2, to the extent that PD differs by plus or minus 0.1%, the allowance for expected credit losses on loans to customers as at 31 December 2025 would be Tenge 683,247 thousand lower/higher (31 December 2024: Tenge 1,446,006 thousand lower/higher).

For portfolios in respect of which the Holding has limited historical data, external benchmark information is used to supplement the internally available data. The portfolios for which external benchmark information represents a significant input into measurement of ECL are as follows.

<i>(In thousands of Kazakhstani Tenge)</i>	An exposure as at 31 December 2025	External benchmarks used	
		PD	LGD
Cash and cash equivalents	3,501,085,930		For exposures with banks, LGD is based on historical recovery studies of defaulted financial institutions - 45%/for exposure for defaulted banks - 100%
Loans to banks, financial institutions and leasing companies	577,023,470		
Deposits with banks and financial institutions	343,052,197	S&P/Moody's default study	
Investment securities	2,271,033,516		
Government grants receivables	20,326,347		
Receivables from the Government for reimbursement of premium on customer accounts	73,011,920		For other exposures, LGD is based on Moody's recovery studies

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

Credit quality analysis. The following table sets out information about the credit quality of financial assets measured at amortised cost, FVOCI debt instruments as at 31 December 2025. Unless specially indicated, for financial assets, the amounts in the table represent gross carrying amounts. For loan commitments and financial guarantee contracts, the amounts in the table represent the amounts committed or guaranteed, respectively.

- unrated (Citibank Kazakhstan JSC)	-	3,627,135	46,185	3,673,320
- unrated (other banks)	-	4,024	-	4,024
Total cash and cash equivalents, excluding cash on hand and receivables under reverse repurchase agreements before impairment allowance	702,114,009	176,880,391	289,514,735	1,168,509,135
Less: impairment allowance	(69,882)	(11,901)	(369)	(82,152)
Total cash and cash equivalents, excluding cash on hand and receivables under reverse repurchase agreements after impairment allowance	702,044,127	176,868,490	289,514,366	1,168,426,983

As at 31 December 2025 and 31 December 2024, the Holding entered into reverse repurchase agreements on the Kazakhstan Stock Exchange. The subject of these agreements were treasury notes of the Ministry of Finance of the Republic of Kazakhstan ("BBB" rated), notes of the National Bank of the Republic of Kazakhstan, debt obligations of Kazakhstan Sustainability Fund JSC ("BBB" rated) and debt obligations of the Eurasian Development Bank (not rated with the carrying amount of Tenge 45,761,617 thousand as at 31 December 2025 and the carrying amount of Tenge 30,231,424 thousand as at 31 December 2024). The carrying amount of those agreements and fair value of securities pledged amounted to Tenge 1,808,976,530 thousand and Tenge 1,808,383,319 thousand, respectively (31 December 2024: Tenge 1,461,850,333 thousand and Tenge 1,460,773,172 thousand, respectively).

At 31 December 2025 the Holding had one counterparty bank (31 December 2024: one counterparty bank) whose total cash and cash equivalent balances exceed 10% of equity. The total aggregate amount of these balances at 31 December 2025 was Tenge 972,611,824 thousand (31 December 2024: Tenge 702,114,009 thousand) or 27.76% of cash and cash equivalents (31 December 2024: 26.66%).

The credit ratings are presented by reference to the credit ratings of Standard&Poor's credit ratings agency or analogues of similar international agencies.

Interest rate analysis of cash and cash equivalents is disclosed in Note 30. Information on related party transactions is disclosed in Note 36.

During 2025 the Holding recovered an impairment allowance for cash and cash equivalents in the amount of Tenge 40,404 thousand (Note 27) (2024: accrual of impairment allowance in the amount of Tenge 25,030 thousand).

7 Other assets measured at fair value through profit or loss

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2025	31 December 2024
Investments in joint ventures	90,076,147	66,868,426
Investments in associates	39,060,608	38,617,149
Other equity investments	58,130,287	64,830,508
Other financial assets	7,252,571	2,619,322
Total assets measured at fair value through profit or loss	194,519,613	172,935,405

The Holding accounts for its investments in associates and joint ventures at fair value through profit or loss in accordance with IFRS 9, as it uses the exemption from the need to use the equity method to account for investments in associates and joint ventures for organisations specialising in venture capital investment.

Investment in AstanaGas KMG JSC

In October 2018, the Holding acquired 50% of ordinary voting shares of AstanaGas KMG JSC for the amount of Tenge 121 thousand and replenished additionally the charter capital for Tenge 40,150,000 thousand on 30 October 2018. AstanaGas KMG JSC was established to implement the project of gas infrastructure development in Astana and northern region of the Republic of Kazakhstan, as well as other gas industry development programmes. This entity is considered to be joint venture.

The Holding financed the acquisition by issuing 40,150,000 bonds with par value of Tenge 1,000 per bond, which mature on demand and have a coupon interest of 0.01% p.a. According to the agreement concluded with the seller of the shares, the Holding has a 'put' option enabling the Holding to sell its share in equity investment AstanaGas KMG JSC in the amount of Tenge 40,150,000 thousand, with a yield of 0.01% p.a. upon expiry of 15 years and, if demanded so by holders of the bonds issued by the Holding, buy back issued bonds.

Investment in Kazakhstan Infrastructure Fund C.V.

In February 2017, to appoint new general partner to Kazakhstan Infrastructure Fund C.V. ("KIF"), the Holding and Verno Pe Eurasia GP Limited (hereinafter- the "General Partner") signed a limited partnership agreement (hereinafter - "LPA"). Under the terms and conditions of LPA, the amount of liabilities related to investment in KIF was allocated between the partners as follows:

- QIC JSC (USD 100 mln) - the 95.24% ownership interest;
- VERNO PE EURASIA GP (USD 5 mln) - the 4.76% ownership interest.

The main purpose to have established KIF is investing in share capital of corporates whose principal activities are development of infrastructure projects in target areas. KIF's operations are primarily located in Kazakhstan, while the country of incorporation is the Netherlands.

Nature and extent of the Holding's involvement

The Holding holds a 95% interest in KIF, and being a limited liability partner under the LPA, is not involved in the decision-making process related to KIF's investing activities.

KIF's management company is the General Partner who is responsible for making investing decisions, and governed by the Investment Policy in accordance with the LPA. The General Partner is free to select assets for capital investment and makes key decisions on the Fund's operating activities and investees' capital, including budgets and key management remuneration.

In accordance with the LPA, the Company may re-appoint a fund's manager, the General Partner, to protect its interests with regard to investees and KIF' operations. Under the terms of the LPA, there are certain conditions which are attached to the reappointment of the General Manager, including:

- imposing a pecuniary penalty in the amount of 2% of total investment liabilities;
- searching for a new general partner who is prepared for buy-out of the predecessor General Partner's rights and obligations.

These conditions make the general partner's reappointment process more difficult.

In accordance with the above, under IFRS 10 *Consolidated Financial Statements*, the Holding has no control over KIF as at 31 December 2025 and 31 December 2024.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

The main activity of the Holding is investing in order to generate income and capital gains. The Holding has an exit strategy for each of its investments. The Holding's investment activities are carried out through subsidiaries of the Holding. The Holding has an established monitoring and reporting system in relation to investment activities. The Holding also has an investment department and a risk management department, whose functions include managing the investment activities of the Holding, including reporting to the Holding Management and the Board of Directors. In addition, the Holding's investment objects are independent business entities in the operating activities of which the Holding takes a limited part, having no control over the investment objects.

Therefore, the Holding believes that it meets the definition of an organisation specialising in venture capital investments and uses the exemption from the need to use the equity method to account for investments in associates and joint ventures.

Refer to Note 34 for the estimated fair value of each class of other assets measured at fair value.

Total loans to banks, financial institutions and leasing companies	577,023,470	451,088,009

The credit ratings are presented by reference to the credit ratings of Standard&Poor's credit ratings agency or analogues of similar international agencies.

The Holding uses the following assumptions to estimate the market interest rates for determination of the fair value of financial instruments:

- Yield on long-term bonds issued by the Ministry of Finance of the Republic of Kazakhstan;
- The credit risk premium of the counterparty.

Movements in the provision for impairment of loans to banks and other financial institutions are as follows:

	2025			
	Stage 1 12-month ECL	Stage 2 Lifetime ECL – not credit- impaired	Stage 3 Lifetime ECL – credit-impaired	Total

Balance at 31 December	3,028,417	3,876,198	34,481,173	41,385,788

At 31 December 2025 and 2024 the Holding had no outstanding balances of loans to banks and financial institutions whose total balances exceed 10% of equity.

During 2025, under several agreements with original maturities up to 2029-2030, the terms of conditional financing provided to second-tier banks under the Development Bank of Kazakhstan JSC programme for financing domestic automobile manufacturers, funded by the National Bank of the Republic of Kazakhstan for lending to individual purchasers of passenger vehicles manufactured in Kazakhstan, were extended until 2033. The modification resulted in the derecognition of the previous financial instruments and the recognition of new financial instruments. The fair value of these loans at initial recognition was determined using market interest rates ranging from 16.94% to 18.55%, resulting in a discount on initial recognition of Tenge 27,180,585 thousand. The total expense arising from the modification of terms amounted to Tenge 10,738,380 thousand. Of this amount, Tenge 8,652,547 thousand is presented as utilisation of government grants, while the remaining Tenge 2,085,833 thousand is recognised as an expense from the modification of financial assets measured at amortised cost.

During the year ended 31 December 2025, a significant modification was made to the terms of loans granted to other entities in 2024. These changes were implemented pursuant to Order No. 226 of the Minister of Industry and Construction of the Republic of Kazakhstan dated 24 June 2025. As a result of the modification, the loan maturity was extended from 2031 to 2039, which led to the derecognition of the existing financial instrument and the recognition of a new financial instrument. The loans were initially recognised at fair value, determined using market interest rates ranging from 16.99% to 21.42% per annum. The discount recognised on initial recognition amounted to Tenge 25,889,260 thousand. As a result of the modification of the contractual terms, the reversal of previously recognised government grants amounted to Tenge 13,286,536 thousand (Note 19).

During 2025, the banks repaid loans issued ahead of schedule in the amount of Tenge 21,631,529 thousand, in accordance with the original terms of the agreement. As a result of the early repayment, the balance of government grant was recalculated for the total amount of Tenge 8,336,227 thousand (Note 19).

During 2024 there was a significant change in the terms of loans issued to banks. These changes were caused by the Resolution of the Government of the Republic of Kazakhstan dated 7 March 2024 No. 156. As a result of the modification, the loan repayment period was reduced from 2052 to 2030, which also entailed the derecognition of the previous financial instrument and the recognition of a new financial instrument. These loans were recognised at fair value at initial recognition, which was determined using market rates of 13.78% - 15.59% p.a., the discount upon initial recognition was amounted to Tenge 54,477,146 thousand. As a result of the above transactions, the balance of the government grant was recalculated for a total of Tenge 36,168,442 thousand (Note 19) due to the fact that the Holding has an obligation to reinvest the funds received from borrowers under the current State program.

During 2024, banks made early repayments of the loans in the amount of Tenge 30,662,890 thousand, which corresponded to the initial terms of the agreement. As a result of this early repayment, the balance of the government grants was recalculated for a total of Tenge 18,850,172 thousand.

As at 31 December 2025 and 31 December 2024, loans to banks, financial institutions and leasing companies classified as Stage 3 and those loans which are credit-impaired on initial recognition, are not secured by collateral or other credit enhancements.

Refer to Note 34 for the estimated fair value of each class of amounts due from banks. An interest rate analysis of due from banks is disclosed in Note 30. Information on related party transactions is disclosed in Note 36.

	Stage 1	Stage 2	Stage 3	
(In thousands of Kazakhstani Tenge)	12-month ECL	Lifetime ECL – not credit-impaired	Lifetime ECL – credit-impaired	Total
Balance at 1 January	83,270	-	16,074,727	16,157,997
Impairment allowance (recovery)/charge during the year (Note 27)	282,901	-	(88,001)	194,900
Effect of changes in foreign exchange rates	-	-	1,637,301	1,637,301
Other changes	579,110	-	-	579,110
Balance at 31 December	945,281	-	17,624,027	18,569,308

As at 31 December 2025 and 2024 the Holding had no outstanding balances of deposits with banks and financial institutions whose total balances exceed 10% of equity.

Refer to Note 34 for the estimated fair value of each class of deposits with banks and financial institutions. An interest rate analysis of due from banks is disclosed in Note 30. Information on related party transactions is disclosed in Note 36.

10 Loans to customers

(In thousands of Kazakhstani Tenge)	31 December 2025	31 December 2024
Loans to customers measured at amortised cost		
Mortgage loans	3,958,061,348	3,425,821,806
Loans to corporate customers	3,015,418,470	2,262,103,230
Loans issued to agribusiness companies	1,082,737,592	1,040,126,276
Loans issued to small and medium entities ("SME")	17,064,153	12,862,337
Gross loans to customers measured at amortised cost	8,073,281,563	6,740,913,649
Less impairment allowance for loans	(441,464,204)	(408,491,026)
Total net loans to customers measured at amortised cost	7,631,817,359	6,332,422,623
Loans to customers measured at fair value through profit or loss	401,527,877	226,107,849
Total loans to customers	8,033,345,236	6,558,530,472

In determining the fair value of loans to customers measured at fair value through profit or loss, management made assumptions that the following market rates are appropriate for the Holding: from 17.25% to 24.41% (2024: from 13.70% to 20.02% in Tenge). None of the loans to customers measured at fair value through profit or loss are past due.

As at 31 December 2025 mortgage loans portfolio consisted of mortgage loans issued directly in the amount of Tenge 3,938,968,849 thousand (2024: Tenge 3,400,681,611 thousand) and of mortgage loans purchased from commercial banks in the amount of Tenge 19,092,499 thousand (2024: Tenge 25,140,195 thousand).

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

Significant changes in the gross carrying amount of loans measured at amortised cost were as follows:

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

For loans secured by multiple types of collateral, collateral that is most relevant for impairment assessment is disclosed. Certain guarantees and sureties received from individuals, such as shareholders of borrowers, are not considered for impairment assessment purposes.

The recoverability of credit-unimpaired loans to corporate customers is primarily dependent on the creditworthiness of the borrowers rather than the value of collateral, and the Holding does not necessarily update the valuation of collateral as at each reporting date.

For mortgage loans with recourse to the seller the commercial banks-partners are responsible for monitoring of collateral on a periodic basis according to the requirements of the NBRK. The recoverability of these loans is primarily dependent on the creditworthiness of the borrowers and commercial banks-partners rather than the value of collateral, and the current value of the collateral does not impact the impairment assessment.

The fair value of residential real estate collateral on mortgage loans at the end of the reporting period was estimated by indexing the values determined by the Holding subsidiaries' internal credit department staff at the time of loan inception for the average changes in residential real estate prices by city and region. The Holding may also obtain a specific individual valuation of collateral at each reporting date. The fair value of other real estate and other assets was determined by the Holding subsidiaries' credit department by considering the condition and location of the assets accepted as collateral.

The fair value of collateral exceeded the carrying amount less impairment allowance by mortgage loans as at 31 December 2025 and 2024.

Economic sector risk concentrations within the loan portfolio are as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2025		31 December 2024

Bonds of local executive authorities ("LEA"). During 2025 the Holding purchased 407,732,970 bonds issued by the local executive authorities at the value of Tenge 1,000 per one bond, including 140,232,106 bonds with maturity in 2027 and with non-market coupon rates of 0.35%, 4.25% and 8.99% p.a., and 267,500,864 bonds with maturity in 2035 and 2040 and with market coupon rates of 18.20%, 18.90% and 20.2% p.a. Bonds were recognised at fair value of Tenge 376,515,395 thousand calculated using the market interest rates ranging from 15.09% to 18.03% p.a. for bonds with non-market coupon rates. Loss from discount on initial recognition of Tenge 31,217,575 thousand was recognised in other operating expenses in the consolidated statement of profit or loss and other comprehensive income (Note 26) and compensated by decrease in government grant liabilities, which was received to purchase the bonds in the amount of Tenge 31,217,575 thousand (Note 19). During reporting year ended 31 December 2025, local executive authorities repaid bonds in the amount of Tenge 119,882,019 thousand. The effect of discount recalculated due to the partial/full early redemption of bonds of the local executive authorities in the amount of Tenge 63,453,757 thousand amounted to Tenge 2,578,311 thousand, of which Tenge 441,662 thousand was recognized in other operating expenses in the consolidated statement of profit or loss and other comprehensive income, and Tenge 2,136,649 thousand was recognized as government grants (Note 19).

During 2024 the Holding purchased 462,125,576 bonds issued by the local executive authorities at the value of Tenge 1,000 per one bond, which mature in 2026 and 2034. Bond coupon rate is 0.02%, 0.35% and 4.25% p.a. Bonds were recognised at fair value of Tenge 246,218,942 thousand calculated using the market interest rates ranging from 11.43% to 13.40% p.a. Loss from discount on initial recognition of Tenge 215,906,634 thousand was recognised in other operating expenses in the consolidated statement of profit or loss and other comprehensive income (Note 26) and partially compensated by decrease in government grant liabilities, which was received to purchase the bonds in the amount of Tenge 208,731,651 thousand (Note 19). During reporting year ended 31 December 2024, local executive authorities repaid bonds in the amount of Tenge 201,902,993 thousand. The effect of discount recalculated due to the partial/full early redemption of bonds of the local executive authorities amounted to Tenge 731,565 thousand, of which Tenge 662,972 thousand was recognized in other operating expenses in the statement of profit or loss and other comprehensive income, and Tenge 68,593 thousand was recognized as government grants (Note 19).

Corporate bonds. Corporate bonds represent interest-bearing securities issued by local companies. These securities are in free circulation on Kazakhstan Stock Exchange, except for some bonds, which are included in the "buffer category" in accordance with KASE requirements due to non-compliance with listing requirements.

Bonds of Kazakhstani banks (POCI-asset). During 2025, bonds of a Kazakhstan bank that were credit impaired at initial recognition were disposed of in accordance with a decision and on terms determined by the Government of the Republic of Kazakhstan. As the management determined that the Government acted in the capacity of a shareholder the gain on disposal amounting to Tenge 66,343,466 thousand (net of tax effect in the amount of Tenge 25,432,868 thousand) was recognised within the Holding's additionally paid-in capital within the consolidated statement of changes in equity.

*As at 31 December 2025 debt securities of the government bodies of other countries, measured at fair value through other comprehensive income with carrying amount of Tenge 173,972,584 thousand (31 December 2024: debt securities of the government bodies of other countries with carrying amount of Tenge 91,361,707 thousand) are pledged as collateral under repurchase agreements.

Investment securities measured at fair value through profit or loss

(In thousands of Kazakhstani Tenge)	31 December 2025	31 December 2024
Bonds of the Ministry of Finance of the Republic of Kazakhstan	70,915	78,885
Corporate bonds with external credit ratings from B- to B+	566,365,896	-
Corporate bonds without external credit ratings	76,055,607	51,265
Total investment securities measured at fair value through profit or loss	642,492,418	130,150

Corporate bonds

The Holding uses the following assumptions to estimate the USD market interest rates of Kazakhstani issuer for determination of the fair value of financial instruments:

- Yield on long-term US treasury bonds;
- The country risk premium of the Republic of Kazakhstan;
- The credit risk premium of the counterparty.

During 2025 the Holding acquired unsecured coupon-bearing corporate bonds in the amount of USD 1,000,000 thousand, with a maturity in 7 years, placed on the Astana International Exchange (AIX)—an international stock exchange operating within the Astana International Financial Centre (AIFC). On 12 September 2025, the first tranche of bonds in the amount of USD 500,000 thousand (equivalent Tenge 270,420,000 thousand) was acquired, maturing on 1 April 2032, with a coupon rate of 11.00% p.a. From 4 to 17 December 2025, bonds of the second tranche in the amount of USD 500,000 thousand (equivalent Tenge 258,188,404 thousand) were acquired, maturing on 1 September 2032, with a coupon rate of 10.20% p.a. These bonds are measured by the Holding at fair value through profit or loss, due to the presence of conversion terms into equity instruments. The corporate bonds recognised at fair value using the market rate of 6.96% p.a. and the gain in the amount of Tenge 55,805,154 thousand recognised in consolidated statement of profit or loss and other comprehensive income (Note 24).

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

During 2025 the Holding acquired unsecured coupon-bearing corporate bonds in the amount of CNY 1,051,104 thousand, with a maturity in 10 years and a coupon rate of 9.00% p.a., placed on the Astana International Exchange. These bonds are measured by the Holding at fair value through profit or loss, due to the presence of conversion terms into equity instruments under the executed supplemental agreements.

Interest rate analysis of debt investment securities is disclosed in Note 30. Information on debt investment securities available for sale to related parties is disclosed in Note 36.

12 Finance lease receivables

The components of net investments in finance lease as at 31 December 2025 and 2024 are as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2025	31 December 2024
Less than 1 year	634,796,357	426,861,907
From 1 to 2 years	533,979,408	380,104,130
From 2 to 3 years	487,446,819	337,669,491
From 3 to 4 years	462,107,703	304,424,703
From 4 to 5 years	399,340,579	287,701,872
More than 5 years	1,347,089,126	1,056,657,964
Minimum lease payments	3,864,759,992	2,793,420,067
Less unearned finance income	(1,486,988,366)	(1,121,573,513)
Loss allowance	(104,963,065)	(93,283,763)
Net investments in finance lease	2,272,808,561	1,578,562,791
Embedded derivative	82,597,136	-
Finance lease receivables	2,355,405,697	1,578,562,791

As at 31 December 2025 the Holding has 6 lessees or 3 groups of related lessees whose balances make over 26% of total carrying amount of the finance lease receivables. As at 31 December 2025 the total carrying amount of receivables from these lessees is Tenge 618,419,097 thousand (31 December 2024: 6 lessees or 3 groups of related lessees whose balances make over 27%, the total carrying amount of receivables from these lessees was Tenge 424,313,532 thousand). Up to 87% of this total carrying amount relate to the group of National Company "Kazakhstan Temir Zholy" JSC ("KTZh") and the company, which is economically dependent on KTZh, for the total amount of Tenge 537,570,344 thousand (31 December 2024: 89% for the total amount of Tenge 377,311,316 thousand) that gives rise to risk of credit concentration due to the nature of their business activity and industry specifics. Lease agreements with KTZh are categorised into Stage 1 for the total amount of Tenge 153,433,719 thousand and into Stage 2 for the total amount of Tenge 421,940,903 thousand for the purpose of measurement of expected credit losses (as at 31 December 2024: lease agreements with KTZh are categorised into Stage 1 for the total amount of Tenge 199,451,688 thousand and into Stage 2 for the total amount of Tenge 177,859,628 thousand for the purpose of measurement of expected credit losses).

Analysis of movements in gross carrying amount of corporate customers finance lease receivables

Increase in financing of lease transactions for 2025 caused increase in gross carrying amount of lease portfolio for the total amount of Tenge 903,736,348 thousand and appropriate increase in loss allowance for the portfolio by Tenge 33,243,233 thousand, including by stages:

Stage 1: increase in gross carrying amount of lease portfolio by Tenge 561,998,446 thousand and increase in loss allowance by Tenge 7,671,232 thousand;

Stage 2: increase in gross carrying amount of lease portfolio by Tenge 321,135,819 thousand resulted in increase in loss allowance by Tenge 12,095,392 thousand;

Stage 3: increase in gross carrying amount of lease portfolio by Tenge 20,602,083 thousand and increase in loss allowance by Tenge 13,476,609 thousand.

Decrease in the receivables of gross carrying amount of Tenge 306,999,883 thousand resulted in decrease in net loss allowance for expected credit losses for the portfolio by Tenge 27,525,932 thousand, including by stages:

Stage 1: decrease in gross carrying amount of lease portfolio by Tenge 199,335,236 thousand and decrease in the loss allowance by Tenge 9,069,794 thousand;

Stage 2: decrease in gross carrying amount of lease portfolio by Tenge 83,698,123 thousand and decrease in the loss allowance by Tenge 8,112,343 thousand;

Stage 3: decrease in gross carrying amount of lease portfolio by Tenge 23,966,524 and decrease in loss allowance by Tenge 10,343,795 thousand.

Availability of factors of stabilisation of operating activities of counterparties categorised as Stage 3 using the projected cash flow discounting model in addition to the cash flows from sale of collaterals resulted in decrease in portfolio net loss allowance by Tenge 3,495,308 thousand.

Increase in financing of lease transactions for 2024 caused increase in gross carrying amount of lease portfolio for the total amount of Tenge 495,882,304 thousand and appropriate increase in loss allowance for the portfolio by Tenge 19,897,879 thousand, including by stages:

Stage 1: increase in gross carrying amount of lease portfolio by Tenge 207,914,647 thousand and increase in loss allowance by Tenge 5,791,575 thousand;

Stage 2: increase in gross carrying amount of lease portfolio by Tenge 272,825,017 thousand resulted in increase in loss allowance by Tenge 8,861,507 thousand;

Stage 3: increase in gross carrying amount of lease portfolio by Tenge 15,142,640 thousand and increase in loss allowance by Tenge 5,244,797 thousand.

Decrease in the receivables of gross carrying amount of Tenge 217,321,119 thousand resulted in decrease in loss allowance for the portfolio by Tenge 22,757,559 thousand, including by stages:

Stage 1: decrease in gross carrying amount of lease portfolio by Tenge 183,522,669 thousand and decrease in loss allowance Tenge 6,097,954 thousand;

Stage 2: decrease in gross carrying amount of lease portfolio by Tenge 14,980,612 thousand and decrease in loss allowance by Tenge 6,416,385 thousand;

Stage 3: decrease in gross carrying amount of lease portfolio by Tenge 18,817,838 thousand and decrease in loss allowance by Tenge 10,243,220 thousand.

Analysis of movements in gross carrying amount of finance lease receivables to agro-industrial entities

Increase in financing of leasing operations for 2025 has caused growth of the portfolio gross carrying amount by the total amount of Tenge 256,425,248 thousand (31 December 2024: Tenge 207,893,160 thousand) and respective increase in the portfolio loss allowance by Tenge 5,213,106 thousand (31 December 2024: Tenge 6,477,294 thousand).

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

Repayment of finance lease receivables of Stage 3 in the amount of Tenge 19,663,860 thousand (31 December 2024: Tenge 10,309,620 thousand) resulted in a decrease of Tenge 7,259,225 thousand in the allowance for expected credit losses (31 December 2024: Tenge 2,527,650 thousand).

Transfer of finance lease receivables to Stage 3 in the amount of Tenge 41,049,055 thousand (31 December 2024: Tenge 94,395,544 thousand) resulted in an increase of Tenge 4,406,405 thousand in the allowance for expected credit losses (31 December 2024: Tenge 8,107,941 thousand).

Transfer of finance lease receivables from Stage 3 to Stage 2 in the amount of Tenge 62,270,695 thousand (31 December 2024: Tenge 19,865,307 thousand) resulted in a decrease of Tenge 7,569,410 thousand in the allowance for expected credit losses (31 December 2024: Tenge 1,312,285 thousand).

Transfer of finance lease receivables from Stage 1 to Stage 2 in the amount of Tenge 72,610,870 thousand (31 December 2024: Tenge 72,688,740 thousand) resulted in an increase of Tenge 6,164,285 thousand in the allowance for expected credit losses (31 December 2024: Tenge 6,532,443 thousand).

Transfer of finance lease receivables from Stage 2 to Stage 1 in the amount of Tenge 69,929,261 thousand (31 December 2024: Tenge 22,283,828 thousand) resulted in a decrease of Tenge 4,269,521 thousand in the allowance for expected credit losses (31 December 2024: Tenge 2,142,530 thousand).

As at 31 December 2025 and 31 December 2024, all projects overdue from 30 days to 90 days were classified to Stage 2, overdue more than 90 days - to Stage 3.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

Analysis of collateral. The following tables provides information on collateral, leased assets and other credit enhancements related to credit impaired finance lease receivables (net of loss allowance and excluding embedded financial derivative instrument) as at 31 December 2025, by types of collateral:

<i>(In thousands of Kazakhstani Tenge)</i>	Finance lease receivables, carrying amount	Fair value of collateral - for collateral assessed as of reporting date
Lease under which ECL are measured on the basis of lifetime		
ECL for credit-impaired assets:		
Vehicles	66,599,543	66,599,543
Real estate	29,009,656	20,436,122
Equipment	3,677,881	3,626,518
Other assets	26,798	26,798
No collateral or other credit enhancement	1,939,763	-
Lease under which ECL are measured on the basis of lifetime		
ECL for credit-impaired assets	101,253,641	90,688,981
Purchased credit-impaired assets on initial recognition:		
Vehicles	31,701	31,701
Total finance lease receivables	101,285,342	90,720,682

The following table provides information on collateral, leased assets and other credit enhancements securing finance lease receivables, net of impairment allowance, by types of collateral as at 31 December 2024:

<i>(In thousands of Kazakhstani Tenge)</i>	Finance lease receivables, carrying amount	Fair value of collateral - for collateral assessed as of reporting date
Lease under which ECL are measured on the basis of lifetime		
ECL for credit-impaired assets:		
Guarantees from legal entities (rated from BB- to BBB-)	90,354	-
Real estate	29,819,381	29,801,381
Vehicles	123,081,300	123,080,659
Equipment	3,995,102	3,730,043
Land plots	85,970	85,970
Other assets	2,252,474	35,443
No collateral or other credit enhancement	111,857	-
Lease under which ECL are measured on the basis of lifetime		
ECL for credit-impaired assets	159,436,438	156,733,496
Purchased credit-impaired assets on initial recognition:		
Vehicles	44,165	44,165
Total finance lease receivables	159,480,603	156,777,661

The tables above exclude overcollateralisation.

The Holding has no finance lease receivables, for which the fair value of collateral was assessed at the loan inception date and it was not updated for further changes, and finance lease receivables for which the fair value of collateral is not determined. Information on the valuation of collateral is based on when this estimate was made, if any.

For finance lease receivables secured by multiple types of collateral, collateral that is most relevant for impairment assessment is disclosed. Sureties received from individuals, such as shareholders of small- and medium-sized leaseholders, are not considered for impairment assessment purposes. Accordingly, such finance lease receivables and unsecured portions of partially secured exposures are presented as lease without collateral or other credit enhancement.

The recoverability of finance lease receivables, which are neither past due nor credit-impaired, primarily depends on the creditworthiness of lessees rather than the value of collateral, and the Holding does not necessarily update the valuation of collateral as at each reporting date.

Foreclosed leased assets

During the year ended 31 December 2025, the Holding has foreclosed the leased items in the amount of Tenge 3,769,595 thousand (2024: Tenge 1,455,012 thousand).

13 Other assets

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2025	31 December 2024

- Deposits received as collateral for customer commitments	1,105,309,229	1,007,647,371
- Current accounts/on demand accounts	157,431,574	91,402,414
Total customer accounts	3,133,634,656	2,691,969,890

On 18 April 2025, the Holding repaid ahead of schedule savings deposits totalling USD 324,758 thousand (equivalent to Tenge 169,848,434 thousand).

Term deposits of individuals mainly include housing savings of Otbasny Bank JSC's customers. According to the terms of the Contract on house construction savings, the Otbasny Bank JSC's depositors have the right to receive housing loan in the amount equal to a difference between contract amount and their accumulated deposits, estimated fees and state premium based on the decision of government, in the case if all requirements of signed contract of house construction savings are fulfilled.

In accordance with the law about housing construction savings the Government annually allocates certain amounts of premium on customer accounts of Otbasny Bank JSC denominated in Tenge from the republican budget of the Republic of Kazakhstan. In the event that the amount of the bonus provided for by the budget for the relevant year is insufficient, after prior notification of the budget program administrator and in the event of approval by the budget program administrator, Otbasny Bank JSC makes payments on behalf of the Government from its own funds. As at 31 December 2025 the premium paid from Otbasny Bank JSC's own funds is recognised as receivables from the Government for reimbursement of premium on customer accounts for individuals in the amount of Tenge 73,011,920 thousand (31 December 2024: Tenge 55,026,392 thousand).

On 7 April 2025, DBK JSC issued the 17th tranche of Eurobonds with a total nominal value of USD 700,000 thousand (equivalent of Tenge 355,844,000 thousand) with the discount of Tenge 811,987 thousand at issuance at an interest rate of 5.63% p.a., maturing on 7 April 2030.

On 9 April 2025, DBK JSC made a partial early redemption of Eurobonds for the total amount of USD 14,400 thousand (equivalent of Tenge 7,467,408 thousand) and on 12 May 2025, made a full repayment in the amount of USD 310,746 thousand (equivalent to Tenge 160,348,042 thousand) in connection with the maturity of the notes.

On 8 May 2025, the Holding Company issued 1st tranche of Eurobonds with a total nominal value of USD 500,000 thousand (equivalent to Tenge 259,820,000 thousand) at an interest rate of 5.45% p.a., maturing on 8 May 2028.

On 1 October 2025, the Holding Company issued 2nd tranche of Eurobonds with a total nominal value of USD 500,000 thousand (equivalent to Tenge 274,575,000 thousand) at an interest rate of 4.65% p.a., maturing on 1 October 2030.

On 16 October 2025, DBK JSC issued Eurobonds of the 20th tranche with a total nominal value of USD 494,260 thousand (equivalent to Tenge 266,682,926 thousand) at an interest rate of 4.60% p.a., maturing on 31 January 2031.

On 17 April 2024 the Holding partially redeemed, ahead of schedule, the Eurobonds of the 9th tranche for the total amount of USD 163,154 thousand (equivalent to Tenge 73,225,147 thousand). The expense from the repurchase of these Eurobonds amounted to Tenge 266,636 thousand.

On 2 May 2024, the Holding partially redeemed, ahead of schedule, the Eurobonds of the 12th tranche for the total amount of USD 1,067 thousand (equivalent to Tenge 471,667 thousand), recognizing income from repurchase in the amount of Tenge 12,881 thousand.

Tenge-denominated Eurobonds. Eurobonds comprise the debt securities issued by the subsidiary - DBK JSC.

On 12 February 2025, DBK JSC fully repaid the five-year Eurobonds for a total amount of Tenge 41,926,500 thousand.

On 3 July 2025, DBK JSC issued Eurobonds of the 18th tranche with a total nominal value of KZT 55,000,000 thousand, at an interest rate of 17.30% p.a., maturing on 3 July 2028.

On 16 October 2025, DBK JSC issued Eurobonds of the 21st tranche with a total nominal value of Tenge 300,000,000 thousand at an interest rate of 18.40% p.a., maturing on 16 October 2028. During the issuance of above-mentioned securities the Holding incurred the realised foreign exchange loss amounted to Tenge 1,163,824 thousand.

On 17 April 2024, DBK JSC made a partial early purchase of Eurobonds for a total amount of Tenge 20,162,030 thousand. The expense from the repurchase of these Eurobonds amounted to Tenge 342,901 thousand.

CNY-denominated Eurobonds. Eurobonds comprise the debt securities issued by the subsidiary - DBK JSC.

On 1 September 2025, DBK JSC issued Eurobonds of the 19th tranche with a total nominal value of CNY 2,000,000 thousand (equivalent to Tenge 151,000,000 thousand) at an interest rate of 3.35% p.a., maturing on 1 September 2028.

Mortgage bonds. Mortgage bonds comprise debt securities issued by KHC JSC denominated in Tenge. These bonds have fixed coupon rates varying from 0.10% to 10.50% p.a. (effective interest rates vary from 10.27% to 13.09% p.a.). They will be redeemed during 2026-2054.

During the year ended 31 December 2024, in accordance with the Programme for Refinancing Mortgage Housing Loans (Mortgage Loans) approved by the Resolution No.69 of the Management Board of the National Bank of Kazakhstan dated 24 April 2015, the Holding placed coupon bonds in the amount of Tenge 1,153,662 thousand at coupon rate of 0.10% p.a. The bonds were recognised at fair value of Tenge 32,834 thousand, calculated using the market rate of 13.09%, and the difference between the nominal value and fair value of Tenge 1,120,828 thousand was recognised as a government grant (Note 19) and partially used in the amount of Tenge 1,099,664 thousand.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

As a result of amendments to the Programme for Refinancing Mortgage Housing Loans (Mortgage Loans), the Framework Agreements between the Holding and JSC "Kazakhstan Sustainability Fund" were accordingly revised to reduce the coupon rate on the bonds to 0.10% per annum, effective 1 August 2024. The bonds were recognized at fair value, calculated using a market interest rate of 12.63% p. a., and the difference between the nominal value and the fair value of Tenge 276,073 thousand, was recognized as a government grant.

Other USD-denominated bonds Eurobonds comprise the debt securities issued by the subsidiary - DBK JSC.

On 27 January 2025, the Holding made a full redemption of commercial bonds issued on 26 April 2024, due to their maturity, in the total amount of USD 46,300 thousand (equivalent to Tenge 23,975,993 thousand).

On 28 April 2025, the Holding made redemption of one-year commercial bonds in the amount of USD 50,000 thousand (equivalent to Tenge 25,751,500 thousand) due to their maturity.

Other Tenge-denominated bonds. Other Tenge-denominated bonds comprise the following bonds:

- coupon bonds totalling Tenge 26,349,631 thousand (KZ2C00011757), at an interest rate of 15.25% p.a. and with maturity in 2029;
- coupon bonds totalling Tenge 25,000,000 thousand (KZ2C00011260), at an interest rate of 4.00% p.a. and with maturity in 2030*.

* In accordance with the above-mentioned programs of state support and development, the Council for Management of the National Fund of the Republic of Kazakhstan sets terms and conditions for financing in the form of interest rates, financing schedule and related requirements for the Holding and commercial banks acting as program agents and end-use borrowers. In addition, the Government has approved special conditions, under which the Holding may provide further financing to the commercial banks and companies. For this reason, the difference that had arisen upon valuation of bonds purchased by SWF "Samruk-Kazyna" JSC - KZ2C00014538 and KZ2C00015055 (2024: Kazakhstan Sustainability Fund JSC - KZ2C00011286, KZ2C00011260 and KZ2C00011278 on behalf of the National Fund of the Republic of Kazakhstan) in 2025 at the fair value at the placement date, was recognised as a government subsidy, as SWF "Samruk-Kazyna" JSC (2024: Kazakhstan Sustainability Fund JSC) acted in the interests of the Government and not the Holding's ultimate shareholder, because all terms and conditions of the loans have been agreed on at the Government level in the resolution concerning financing of the above-mentioned programs, and the Government does not expect any direct economic benefits from these programs in its capacity of the Holding's shareholder as the ultimate beneficiaries are the subjects specified by the programs. Thus, in 2025 the Holding recognized the government grants for the amount of Tenge 98,846,624 thousand (2024: Tenge 75,906,809 thousand) (Note 19).

In determining the fair value of the issued bonds upon initial recognition, the Holding has applied the market interest rates from 13.91% to 15.98% (2024: 13.92% to 14.01% p.a.).

In 2024 in view of the decision of the Council for National Fund Management of the Republic of Kazakhstan (the "CNFM"), the maturity dates of the issued debt securities with the carrying value of Tenge 87,940,623 thousand, which have been repurchased by Samruk-Kazyna JSC, were extended from 2026 to 2036. Due to significant modification of the terms of the agreements, the Holding derecognised the existing financial liability and recognised new financial liabilities. Accordingly, the debt securities issued were adjusted to fair value at the date of conclusion of additional agreements using the market interest rate of 12.57% per annum, which resulted in recognition of the effect of modification of terms in the amount of Tenge 61,212,227 thousand, which was recognised as part of government grants (Note 19).

During 2025 the Holding made additional placements of KZ2C00011740 with the nominal value of Tenge 18,642,318 thousand and KZ2C00011757 with the nominal value of Tenge 60,650,369 thousand.

During 2025, the Holding redeemed the issued other Tenge-denominated bonds (KZ2C00002988, KZ2C00003226, KZ2C00011229, KZ2C00011237, KZ2C00011245, KZ2C00006864 and KZ2C00010098) for the total nominal amount Tenge 394,228,517 thousand.

During 2025, the Holding partially redeemed KZ2C0Y20E742 in the amount of Tenge 23,482,800 thousand. As a result of early repayment an expense of Tenge 10,147,697 thousand was recognised in respect of the partial early repayment of a debt security within other operating expenses of the consolidated statement of profit or loss and other comprehensive income (Note 26).

During 2024, the Holding repaid debt securities to Kazakhstan Sustainability Fund JSC (KZ2C00006666) in the amount of the principal debt of Tenge 180,000,000 thousand.

During 2024, the Holding redeemed the debt securities issued (KZ2C00009397, KZ2C00005916, KZ2C00003911, KZ2C00003002, KZ2C00006781, KZ2C00006385, KZ2C00007045) for the total nominal amount Tenge 171,202,234 thousand.

During the year ended 31 December 2025, the Holding raised a loan from Zhasyl Damu in the amount of Tenge 151,451,462 thousand. Initially the loans were recognised at fair value that was determined using the market rates ranging from 14.30% to 18.44% p.a. The difference of Tenge 85,263,829 thousand between fair value and amounts received was recognised as a government grant due to the obligation of the Holding to distribute benefits to ultimate borrowers through providing financing to leasing companies for further financing of projects in the processing industry (Note 19).

On 24 April 2025, the Holding raised a loan of USD 108,000 thousand (equivalent to Tenge 55,980,720 thousand), and a loan of EUR 100,000 thousand (equivalent to Tenge 59,106,000 thousand), from Cassa Depositi e Prestiti (CDP), which mature on 29 October 2034.

On 8 May 2025, the Holding raised a loan of USD 200,000 thousand (equivalent to Tenge 102,012,000 thousand) from Deutsche Bank Trust Company Americas, which matures on 14 May 2026. During the year ended 31 December 2025, the Group repaid, ahead of schedule, from Deutsche Bank Trust Company Americas in the amount of USD 200,000 thousand (equivalent to Tenge 102,036,000 thousand).

During the year ended 31 December 2025, the Holding repaid, ahead of schedule, loans received from China Development Bank in the amount of USD 135,610 thousand (equivalent to Tenge 71,832,698 thousand). On 27 May 2025, the Holding raised a loan of USD 92,860 thousand (equivalent to Tenge 47,454,967 thousand) from China Development Bank, which matures on 19 June 2034; on 5 June 2025 – a loan of CNY 1,253,622 thousand (equivalent to Tenge 89,232,827 thousand), which matures on 13 December 2027; on 31 July 2025 – a loan of USD 131,613 thousands (equivalent to Tenge 71,907,856 thousand), which matures on 19 June 2034; on 5 December 2025 – a loan of CNY 742,627 thousand (equivalent to Tenge 52,474,023 thousand), which mature on 11 August 2040 and 30 December 2025; a loan of CNY 122,797 thousand (equivalent to KZT 8,847,505 thousand), which matures on 20 March 2035.

During the year ended 31 December 2025 the Holding raised a loan of Tenge 50,000,000 thousand from Alatau City Bank JSC, which matures on 26 September 2028; a loan of Tenge 100,000,000 thousand from ForteBank JSC, which matures on 29 May 2032; a loan of Tenge 150,000,000 thousand from Halyk Bank of Kazakhstan JSC, which matures on 16 September 2032.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

On 26 November 2025 the Holding attracted a deposit from China Construction Bank Corporation Astana Branch in the amount of CNY 350,000 thousand (equivalent to Tenge 25,606,000 thousand), which matured on 24 December 2025. During the year ended 31 December 2025, the Holding fully repaid, in accordance with the contractual schedule, a loan received from China Construction Bank Corporation Astana Branch in the amount of USD 100,000 thousand (equivalent to Tenge 53,813,000 thousand).

On 22 December 2025 the Holding raised a loan of CNY 1,000,000 thousand (equivalent to Tenge 73,520,000 thousand) from Bank of China Limited, London Branch, which matures on 15 December 2028.

During the year ended 31 December 2025, the Holding fully repaid, in accordance with the contractual schedule, a loan received from The Export-Import Bank of China in the amount of USD 38,095 thousand (equivalent to Tenge 19,895,048 thousand). On 25 December 2025 the Group raised a loan of CNY 1,400,000 thousand (equivalent to Tenge 101,990,000 thousand) from The Export-Import Bank of China, which matures on 19 December 2028.

During the year ended 31 December 2025, the Holding fully repaid, in accordance with the contractual schedule, a loan received from Eurasian Development Bank in the amount of Tenge 1,949,464 thousand.

During the year ended 31 December 2025, the Holding raised a loan of CNY 1,430,000 thousand (equivalent to Tenge 103,793,200 thousand) from Industrial and Commercial Bank of China in Almaty, which matures in 2030.

During the year ended 31 December 2025, the Holding raised a loan of CNY 4,000,000 thousand (equivalent to Tenge 288,040,000 thousand) from China Development Bank Hong Kong Branch, which matures in 2030.

During the year ended 31 December 2024 the Holding entered into a credit line agreement dated 6 May 2024 No. 1879-i with SWF "Samruk-Kazyna" JSC based on the resolutions of the Government of the Republic of Kazakhstan dated 9 April 2024 No. 262 "On certain issues of the sale of rental housing with the right of privatisation" and dated 9 April 2024 No. 263 "On certain issues of the sale of rental housing with the right of privatisation". Under this agreement, the loan agreements were concluded for a total amount of Tenge 272,000,000 thousand with a maturity in 2034 and an interest rate of 0.01% p.a. The fair value of the loans at initial recognition was calculated by discounting future cash flows under the loan agreements using market interest rates in the range from 12.96% to 14.53% p.a. The discount on these loans was recognized as a government grant in the amount of Tenge 193,624,243 thousand (Note 19).

During the year ended 31 December 2024 the Holding raised a loan from Zhasyl Damu JSC in the amount of Tenge 120,546,835 thousand. Initially the loans were recognised at fair value that was determined using the market rates ranging from 12.83% to 14.54% p.a. The difference of Tenge 69,739,248 thousand between fair value and amounts received was recognised as a government grant due to the obligation of the Holding to distribute benefits to ultimate borrowers through providing financing to leasing companies for further financing of projects in the processing industry (Note 19).

During the year ended 31 December 2024 the Holding attracted a deposit from China Construction Bank Corporation Astana Branch in the total amount of USD 50,000 thousand, maturing on 22 October 2024.

During the year ended 31 December 2024, the Holding raised a loan from Eurasian Development Bank for the total amount of USD 90,000 thousand maturing on 4 October 2024.

During the year ended 31 December 2024, the Holding raised a loan from China Development Bank for the total amount of USD 23,080 thousand maturing on 20 June 2033.

During the year ended 31 December 2024, the Holding raised a loan from China Construction Bank Corporation Astana Branch for the total amount of CNY 1,000,000 thousand maturing on 28 June 2027.

During the year ended 31 December 2024, the Holding raised a loan from China Development Bank for the total amount of CNY 746,378 thousand maturing on 13 December 2027.

The borrowed funds will be used to provide preliminary and bridging housing loans under Otbasys Bank's regional programme on lending to citizens of the Republic of Kazakhstan as part of the social policy of local executive bodies**;
- a loan of Tenge 500,000 thousand was received from the local executive bodies of Ulytau Oblast at the interest rate of 0.01% p.a. and with maturity in 15 years. The borrowed funds will be used to provide preliminary and bridging housing loans under Otbasys Bank's programme "Ulytau Zhastary" as part of the social policy of local executive bodies**;
- a loan of Tenge 750,000 thousand was received from the local executive bodies of Aktyubinsk Oblast at the interest rate of 0.01% p.a. and with maturity in 8 years. The borrowed funds will be used to provide preliminary and bridging housing loans under Otbasys Bank's programme for financing citizens affected by floods as part of the social policy of local executive bodies**;
- a loan of Tenge 500,000 thousand was received from the local executive bodies of Aktyubinsk Oblast at the interest rate of 0.01% p.a. and with maturity in 8 years. The borrowed funds will be used to provide preliminary and bridging housing loans under Otbasys Bank's programme "Aktobe Zhastary" as part of the social policy of local executive bodies**;
- a loan of Tenge 480,000 thousand was received at the interest rate of 1.00% p.a. and with maturity in 5 years. The borrowed funds will be used as part of the state programme of support to small and medium-sized companies in the rural areas through lending of the end borrowers, including lending of startup projects*;
- a loan of Tenge 140,000,000 thousand was received at the interest rate of 0.01% p.a. with maturity dates of Tenge 70,000,000 thousand on 15 December 2024 and Tenge 70,000,000 thousand on 30 November 2025. The borrowed funds will be used to provide loans to agro-industrial entities through funding of credit partnerships, regional investment centres, fully owned by the state, microfinance organisations and second-tier banks*;

*In 2025, discount on initial recognition of Tenge 40,026,635 thousand (2024: Tenge 119,168,730 thousand) was recognised as a government grant (Note 19) in the consolidated statement of financial position. The Holding used estimated market interest rates from 13.92% to 18.17% p.a. (2024: 12.60% to 14.10% p.a.) to measure the fair value of the loans received from the Government of the Republic of Kazakhstan on initial recognition by discounting their future contractual cash flows.

**During 2025, discount on initial recognition of Tenge 58,817,661 thousand (2024: Tenge 46,508,438 thousand) was recognised directly in equity as an additional paid-in capital (less effect of the respective income tax of Tenge 14,704,415 thousand (2024: Tenge 9,301,688 thousand), as management determined that the Government acted in the capacity of a shareholder when providing the Holding with said financing instruments at interest rates below market rates, without any additional conditions. The Holding used estimated market interest rates ranging from 15.67% to 17.71% p.a. (2024: 12.93% to 14.75% p.a.) to measure the fair value of the loans received from the Government of the Republic of Kazakhstan at initial recognition by discounting their future contractual cash flows.

During 2024 the Holding partially repaid, ahead of schedule, the loans provided by the Government of the Republic of Kazakhstan in the amount of Tenge 39,344,828 thousand, as a result of such early repayment the government grant were recalculated for the amount of unamortised portion of the discount of Tenge 16,356,710 thousand (Note 19).

Amounts payable under repurchase agreements. As at 31 December 2025 debt securities of the government bodies of other countries, measured at fair value through other comprehensive income with carrying amount of Tenge 173,972,584 thousand (31 December 2024: debt securities of the government bodies of other countries with carrying amount of Tenge 91,361,707 thousand) are pledged as collateral under repurchase agreements.

Commitments under the government grant programmes. Funds received from local executive authorities, the state budget through the Ministry of National Economy of the Republic of Kazakhstan, and the United Nations Development Program in the Republic of Kazakhstan. These funds are then transferred to local banks as subsidy payments under projects implemented within the framework of the joint Order of Ministries of the Republic of Kazakhstan. This order is registered in the Register of State Registration of Regulatory Legal Acts under № 33681 dated 27 November 2023 and was later amended by Government Resolution of the Republic of Kazakhstan № 754 dated 17 September 2024, as well as the UNDP-GEF (United Nations Development Programme – Global Environment Facility) project "Reducing investment risks in renewable energy sources" and "Nationally appropriate mitigation measures for low-carbon urban development".

19 Government grants

The Holding recorded as government grants the amount of benefits received from loans provided at low interest rates by the National Fund of the Republic of Kazakhstan, SWF "Samruk-Kazyna" JSC, Ministry of Finance of the Republic of Kazakhstan and Zhasyl Damu JSC.

Subsequent to initial recognition, the Holding charged to profit or loss an amount corresponding to the renegotiated debt provided to the borrowers on favourable terms upon fulfilment of the conditions of the state programmes (Notes 8, 10, 11 and 12). The Holding is responsible for allocation benefits to ultimate borrowers through low interest loans.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

As at 31 December 2025 the Holding has government grants receivables in the amount of Tenge 20,326,347 thousand (31 December 2024: Tenge 37,619,033 thousand) with the respect to the government grant from the Government of the Republic of Kazakhstan for covering expenses related to the interest on debt securities issued, which has been recognised according to the Rules of bond coupon subsidies established by the Ministry of Agriculture of the Republic of Kazakhstan.

Total administrative expenses	118,702,025	97,512,811

Administrative expenses for 2025 include expenses for audit services and non-audit services provided by a single supplier in the amount of Tenge 1,077,805 thousand and Tenge 14,505 thousand, respectively (2024: expenses for audit services and non-audit services provided by a single supplier in the amount of Tenge 930,237 thousand and Tenge 32,492 thousand, respectively).

29 Income tax

Income tax expense recorded in profit or loss for the year comprises the following:

<i>(In thousands of Kazakhstani Tenge)</i>	2025	2024
Current tax	156,043,515	92,343,191
Deferred tax	6,277,282	(10,397,804)
Income tax expense for the year	162,320,797	81,945,387

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

On 15 and 18 July 2025, the President of the Republic of Kazakhstan signed the current Law on Amendments to the Tax Code of the Republic of Kazakhstan, as well as the new Tax Code of the Republic of Kazakhstan, which will come into force on 1 January 2026. The amendments, applicable to 2025, affected an increase in the corporate income tax ("CIT") rate by 10% on certain income, including income from government securities, income from short-term deposits in the National Bank of the Republic of Kazakhstan, income from swaps with a term of up to one year, taking into account the corresponding losses, and interest income from REPO transactions, taking into account the corresponding interest expenses.

The Tax Code, which comes into effect on 1 January 2026, was primarily aimed at reducing the scope of tax breaks and transitioning to differentiated tax rates across different sectors of the economy, including increasing the corporate income tax rate for the banking sector to 25% (applicable for Otbasys Bank JSC only), excluding income from business lending.

In 2025, the current income tax is calculated at a rate of 20%, taking into account an additional corporate income tax of 10% on the positive difference between income and expenses on the increase in value from the sale of government securities; income from swap transactions concluded for a term of up to one year; remuneration from repo transactions concluded for a term of up to one year; remuneration from government securities; and remuneration from deposits placed with the National Bank of the Republic of Kazakhstan for a term of up to one year.

Deferred income tax of the Holding as at 31 December 2025 was calculated using 20%, except for deferred income tax of Otbasys Bank JSC, which was calculated using the differentiated rate for 2026, namely: a rate of 25% was applied to taxable income from banking activities, and 20% to taxable income from lending to business entities.

During 2024 the applicable tax rate for current and deferred tax is 20%.

A reconciliation between the estimated and the actual tax charges is provided below:

<i>(In thousands of Kazakhstani Tenge)</i>	2025	2024
Profit before income tax	572,189,773	499,718,330
The estimated tax charges at statutory rate of 20% (2024: 20%).	114,437,955	99,943,666
- Non-taxable income on securities	(23,541,379)	(26,905,954)
- Tax exempt interest on finance lease receivables	(17,840,725)	(22,778,671)
- Non-deductible impairment losses	1,650,931	9,563,200
- Other non-deductible expenses	2,167,159	3,854,003
- Impact of changes in the tax rate (10% on deposits placed with the National Bank of the Republic of Kazakhstan, reverse repo transactions, and interest income on government securities)	38,205,040	-
- Change in unrecognised deferred tax assets	767,815	9,416,823
- Non-deductible expenses from revaluation of financial assets at fair value	23,832,221	344,389
- Adjustment of current income tax expense for prior years	963,495	(78,643)
- Write-off of current tax asset due to changes in tax legislation	9,032,406	-
- Income tax withheld at the source of payment	8,200,282	5,293,344
- Other	4,445,597	3,293,230
Income tax expense for the year	162,320,797	81,945,387

Deferred tax assets have not been recognised in respect of the following items:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2025	Change for the year	31 December 2024	Change for the year	1 January 2024
Finance lease receivables	1,254,797	-	1,254,797	-	1,254,797
Interest accrued at contractual rate and written off	64,664	-	64,664	-	64,664
Other financial assets at fair value through profit or loss	620,077	-	620,077	-	620,077
Other assets	27,760	-	27,760	-	27,760
Tax losses carry-forwards	49,916,514	767,815	49,148,699	11,677,570	37,471,129
Investment securities	3,582,791	-	3,582,791	(2,260,747)	5,843,538
Net unrecognised deferred tax assets	55,466,603	767,815	54,698,788	9,416,823	45,281,965

As at 31 December 2025, the Holding did not recognise the deferred tax asset of Tenge 55,466,603 thousand (31 December 2024: Tenge 54,698,788 thousand) due to uncertainty related to its utilisation.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

Differences between IFRS and Kazakhstani statutory taxation regulations give rise to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their tax bases.

<i>(In thousands of Kazakhstani Tenge)</i>	1 January 2025	Recognised in profit or loss	Recognised directly in equity	31 December 2025

In the context of the Holding's current structure and Kazakhstani tax legislation, tax losses and current tax assets of different companies of the Holding may not be offset against current tax liabilities and taxable profits of other companies of the Holding and, accordingly, taxes may accrue even where there is a consolidated tax loss. Therefore, deferred tax assets and liabilities are offset only when they relate to the same taxable entity and the same taxation authority.

The deductible temporary differences do not expire under current tax legislation of the Republic of Kazakhstan. Period of use of tax loss carried forward expires in 2026-2035.

30 Financial risk management

The risk management function within the Holding is carried out in respect to all key risks, including financial risks, operational risks and legal risks. Financial risk comprises market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. The primary objectives of the financial risk management function are to achieve a balance between maximising the use of opportunities in order to achieve strategic goals and minimising losses.

Risk management rules and procedures of the Holding. The Holding's risk management policy has the following objectives: to identify, analyse and manage risks faced by the Holding, establish limits on risk levels and relevant controls, and continuously assess levels of risks and ensure that exposure to risks stays within the established limits. The risk management policy and procedures of the subsidiaries are regularly reviewed to reflect changes in the market conditions, proposed products and services and emerging best practices. The risk management policy of the Holding was approved in October 2013. The risk management rules were approved in May 2021.

The risk management policy has the following objectives:

- to establish the effective comprehensive system and integrated process of risk management as an element of the Holding's governance, and continuously improve the Holding's activities based on the unified standardised approach to the risk management methods and procedures;
- to define the retaining ability and provide for efficient management of accepted risks;
- to identify risks in a timely manner;
- to mitigate losses and reduce operating costs to cover potential losses.

Risk management structure. The risk management structure of the Holding comprises risk management at several levels with engagement of the following bodies and structural units of the Holding: Board of Directors, Management Board, Committee of Asset and Liability Management, Risk Management Department, Internal Audit Function, collective bodies and other structural units.

The Board of Directors. The first level of the risk management process is represented by the Board of Directors of the Holding. The Board of Directors takes full responsibility for proper operation of risk management control system, management of key risks and corporate risk management system. The Board of Directors defined the objectives of the Holding's activities and approves documents related to risk management.

The Management Board. The second level of the risk management process is represented by the Management Board of the Holding. The Management Board is responsible for establishment of efficient risk management system and risk control structure to provide for compliance with the corporate policy requirements. The Management Board is liable for creation of "risk consciousness" culture which reflects risk management and risk management philosophy of the Holding. In addition, the Management Board also bears liability for implementation of the efficient risk management system where all employees have a clearly defined responsibility for risk management and are accountable for proper execution of their duties. The Management Board is authorised to execute a part of their functions in risk management area through establishment of respective committees.

The Audit Committee of the Board of Directors. The Audit Committee of the Board of Directors is a standing advisory body of the Holding's Board of Directors, established to enhance efficiency and quality of work of the Board of Directors through preparing recommendations for the Board of Directors related to establishment of the effective control system over the Holding's financial and economic operations (including completeness and accuracy of the consolidated financial statements), monitoring of reliability and efficiency of the internal control and risk management systems and execution of the documents related to corporate governance, and control of independence of the external audit and internal audit function.

The Committee of Assets and Liabilities Management (the "CALM") is a permanent collective body of the Holding accountable to the Management Board which operates within the authorities as defined by the Management Board. The CALM has the following objectives: to provide for making timely and proper decisions in the sphere of management of the Holding's assets and liabilities; to attract investors for cooperation with the Holding, to maintain the adequate level of financial stability; to increase the Holding's profitability and mitigate risks at investment decision making.

The Risk Management Department. The third level of the risk management process is represented by the Risk Management Department, which objectives include coordination of risk management and control over implementation of general principles and methods of identification, assessment, management of and reporting on financial and non-financial risks.

The Internal Audit Service. In course of risk management, the Internal Audit Function of the Holding audits risk management procedures and risk assessment methods and develops proposals aimed at improvement of efficiency of risk management procedures. The Internal Audit provides reports on risk management system to the Board of Directors of the Holding and performs other functions in accordance with the approved regulatory documents.

Structural units. One of the key elements in the risk management structure is structural units of the Holding which are represented by each employee. Structural units (risk owners) play the key role in the risk management process. The Holding's employees address and manage risks on a daily basis, and control the potential effect of risk on their business. Structural units are responsible for implementation of the risk management action plan, timely identification and communication of major risk in their business areas and development of proposals for risk management to be included into the action plan.

Credit risk. The Holding takes on exposure to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Exposure to credit risk arises as a result of the lending and other transactions with counterparties of the Holding and its subsidiaries giving rise to financial assets.

The Holding's maximum exposure to credit risk is reflected in the carrying amounts of financial assets on the consolidated statement of financial position. For guarantees and commitments to extend credit, the maximum exposure to credit risk is the amount of the commitment. The credit risk is mitigated through a qualitative analysis of the creditworthiness of the counterparty, structuring of investment projects, diversification of assets, setting limits, collateral and other measures to improve the credit quality.

The subsidiaries of the Holding structure the levels of credit risk they undertake by placing limits on transactions with counterparties, including limits on the level of risk accepted in relation to one borrower, or groups of borrowers, based on the Risk Management Rules of the subsidiary and Baiterek National Investment Holding JSC, and other internal regulatory documents regulating credit risk of the Holding's subsidiaries. Limits on the level of credit risk by product and industry sector are approved regularly by management of the subsidiaries. Such risks are monitored on a revolving basis and subject to at least an annual review.

Loan applications originated by the relevant client relationship managers are passed on to the relevant credit committee of the subsidiary for approval of the credit limit. Exposure to credit risk is also managed, in part, by obtaining collateral and corporate and personal guarantees. In order to monitor credit risk exposures, regular reports are produced by the officers based on a structured analysis focusing on the customer's business and financial performance. Any significant exposure to customers with deteriorating creditworthiness are reported to, and analysed by authorised bodies of the Holding and/or its subsidiaries.

The subsidiaries review the aging analysis of outstanding loans and follows up on past due balances. Management of the subsidiaries, therefore, considers it appropriate to provide aging and other information about credit risk to the Board of Directors of the subsidiaries and management of the Holding.

Credit risk for off-balance sheet financial instruments is defined as the possibility of sustaining a loss as the result of another party to a financial instrument failing to perform in accordance with the terms of the contract. The subsidiaries of the Holding use the same credit policies in assuming conditional obligations as it does for on-balance sheet financial instruments, through established credit approvals, risk control limits and monitoring procedures.

Market risk. The Holding takes on exposure to market risks. Market risks arise from open positions in (a) currency, (b) interest rates and (c) equity products, all of which are exposed to general and specific market movements. Management of the Holding sets limits on the value of risk that may be accepted, which is monitored on a regular basis. The subsidiaries of the Holding set separate limits on the basis of the general limits established by the Holdings, and monitor their compliance on a regular basis. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

Currency risk. The management of the Holding and its subsidiaries monitor the exposure of foreign exchange position, analyse the sensitivity of the financial result to fluctuations in foreign exchange rates and assess the level of foreign exchange risk. If necessary, limits can be set in relation to the level of accepted risk in the context of currencies and in general.

CNY weakening by 5% (2024: weakening by 5%)	1,084,158	(3,176,714)

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

The above analysis only includes financial assets and liabilities. The Holding believes that investments in equity instruments and non-monetary assets will not result in significant currency risk. Risk was only calculated for monetary balances denominated in currencies other than the functional currency of the Holding.

Interest rate risk. The Holding takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes but may also reduce or create losses in the event that unexpected movements occur. Interest rate risk management by the subsidiaries is based on the principles of full coverage of costs: resulting interest income should cover costs for raising and placement of funds and provide for net profit generation and competitiveness. Report on interest rate classifies assets, liabilities, off-balance sheet claims and liabilities which are sensitive to changes in interest rates, and groups them in economically homogeneous and significant items, by time period depending on their maturities (for fixed rates) or time to their next reprice (for floating rates). Time periods and items of recorded assets, liabilities, off-balance sheet claims and liabilities can be changed by the Holding's Management Board. The table below summarises the Holding's exposure to interest rate risks. The table presents the aggregated amounts of the Holding's financial assets and liabilities at carrying amounts, categorised by the earlier of contractual interest repricing or maturity dates.

<i>(In thousands of Kazakhstani Tenge)</i>	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	More than 1 year	Non-interest bearing	Total
31 December 2025						
Total financial assets	3,664,153,317	2,575,446,799	895,054,302	10,314,991,542	414,139,474	17,863,785,434
Total financial liabilities	(485,708,313)	(1,746,747,466)	(545,120,695)	(10,956,786,042)	(289,011,530)	(14,023,374,046)
Net interest sensitivity gap at 31 December 2025	3,178,445,004	828,699,333	349,933,607	(641,794,500)	125,127,944	3,840,411,388
31 December 2024						
Total financial assets	2,929,221,432	1,425,104,813	753,353,143	8,053,067,966	364,107,741	13,524,855,095
Total financial liabilities	(704,645,891)	(1,237,870,463)	(273,749,119)	(7,563,276,460)	(199,293,513)	(9,978,835,446)
Net interest sensitivity gap at 31 December 2024	2,224,575,541	187,234,350	479,604,024	489,791,506	164,814,228	3,546,019,649

All of the Holding's debt instruments reprice within 1 year on the average, excluding financial instruments with fixed interest rate.

Sensitivity analysis of profit or loss and equity (net of taxes) to changes in interest rates (interest rate risk) performed based on the conventional scenario of parallel shift in yield curve by 100 basis points upward or downward the interest rates and restated positions on interest-bearing assets and liabilities effective as of 31 December 2025 and 31 December 2024 is as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	2025	2024
Parallel increase by 100 basis points (2024: 100 basis points)	29,763,908	19,075,282
Parallel decrease by 100 basis points (2024: 100 basis points)	(29,763,908)	(19,075,282)

Baiterek National Investment Holding Joint Stock Company

The Holding is exposed to prepayment risk through providing fixed or variable rate loans, including mortgages, which give the borrower a right to repay the loans earlier. The Holding's current year financial result and equity at the end of the current reporting period would not have been significantly impacted by changes in prepayment rates because such loans are carried at amortised cost and the prepayment right is at, or close to, the amortised cost of the loans and advances to customers (2024: the Holding's current year financial result and equity at the end of the current reporting period would not have been significantly impacted by changes in prepayment rates because such loans are carried at amortised cost and the prepayment right is at, or close to, the amortised cost of the loans and advances to customers).

Liquidity risk. Liquidity risk is the risk that the Holding and its subsidiaries will encounter difficulty in attracting funds in order to discharge its liabilities. The liquidity risk arises when assets and liabilities maturities do not match which affects the Holding's and its subsidiaries availability of adequate liquid funds at acceptable price so that to incur its balance sheet and off-balance sheet liabilities in a timely manner. Matching and/or controlled mismatching of maturities and interest rates on assets and liabilities is a fundamental factor of management of the financial institutions, including the Holding. Due to variety of transactions under execution and related uncertainty, absolute maturity matching for assets and liabilities is not observed in the normal practice of financial institutions which allows increasing transaction profitability, however, increases the risk of loss.

The Holding and its subsidiaries manage liquidity risk to maintain cash resources required to discharge all liabilities as they fall due.

The Holding manages liquidity risk within the Risk Management Policy of the Holding, Risk Management Rules for Temporary Available Cash of the Holding, Risk Management Rules approved by the Board of Directors and Management Board. The documents specify the basic processes and procedure of liquidity risk management and establish functions and authorities of the Holding's business units involved in this process to manage liquidity risk effectively and maintain adequate funds of the Holding to cover all liabilities. Within the described above documents, liquidity risk is assessed and controlled by the means of the following tools/analysis report: regulatory and contractual liquidity requirements; analysis of current liquidity balances, estimated inflows/outflows of liquidity, internal liquidity ratios; liquidity gaps ("gap analysis"). To avoid excess or deficiency of liquidity, the Committees of Asset and Liability Management of the Holding's subsidiaries control the activities for liquidity raising and use.

The Committees of Asset and Liability Management of the Holding's subsidiaries control liquidity risk by analysing levels of liquidity risk to take measures for mitigation of liquidity risk of the subsidiaries and the Holding. Current liquidity is managed by the Treasury Departments of the subsidiaries which perform transactions at the financial markets to maintain the current liquidity and optimise cash flows.

Procedures for liquidity risk management of the Holding include:

- cash flow forecasting in terms of key currencies and calculation of the related necessary level of liquid assets;
- maintenance of a diversified structure of funding sources;
- management of concentration and borrowings structure;
- development of debt financing plans;
- servicing of highly liquid assets portfolio which can be easily realised as a safeguard measure in case of cash liquidity gap;
- development of contingent plans to maintain liquidity and target level of funding;
- execution of control over conformity of the Holding's balance sheet liquidity ratios with the statutory criteria.

The Treasury Departments of the subsidiaries monitor liquidity at the financial markets. Under normal market conditions, the reports on liquidity situation of the Holding's subsidiaries are regularly provided to the senior management of the Holding. Decisions regarding liquidity management policy of the Holding are made by the Management Board and Committee of Asset and Liability Management of the Holding. The table below shows liabilities at 31 December 2025 and 2024 by their remaining contractual maturity. The amounts of liabilities disclosed in the maturity table are the contractual undiscounted cash flows, including gross finance lease obligations (before deducting future finance charges), gross loan commitments and financial guarantees. Such undiscounted cash flows differ from the amount included in the consolidated statement of financial position because the amount in the consolidated statement of financial position is based on discounted cash flows. Financial derivatives are included at the contractual amounts to be paid or received, unless the Holding expects to close the derivative position before its maturity date in which case the derivatives are included based on the expected cash flows. For the purposes of the maturity analysis, embedded derivatives are not separated from hybrid (combined) financial instruments. When the amount payable is not fixed, the amount disclosed is determined by reference to the conditions existing at the end of the reporting period. Foreign currency payments are translated using the spot exchange rate at the end of the reporting period.

*Term deposits of individuals and deposits that secure mortgage loans issued are not call deposits that depositors may withdraw at any time without losing accrued interest and state premiums.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

The total outstanding contractual amount of commitments to extend credit as included in the above maturity table does not necessarily represent future cash requirements, since many of these commitments will expire or terminate without being funded.

Customer accounts are classified in the above analysis based on contractual maturities. However, in accordance with Kazakhstani legislation, depositors can withdraw their term deposits at any time, losing in most of the cases the accrued interest. These deposits are classified in accordance with their stated maturity dates.

In the judgement of the Holding management, the matching and/or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the effective management of the Holding.

The following table provides an analysis, by contractual maturities, of amounts recognised in the consolidated statement of financial position as at 31 December 2025 and 2024.

<i>(In thousands of Kazakhstani Tenge)</i>		Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 1 to 5 years	More than 5 years	No maturity	Total

Net position as at 31 December 2024	2,046,526,224	526,179,888	529,743,759	803,436,030	(1,116,483,413)	212,219,028		3,001,621,516

Capital management. The Holding's objectives when managing capital are to safeguard the Holding's ability to continue as a going concern, by meeting the capital adequacy requirements based on monitoring of the consolidated financial statements, including monitoring of the subsidiaries and established control requirements to capital adequacy on the part of the Board of Directors of the controlled entities, Financial Supervision Committee, National Bank of the Republic of Kazakhstan, investors.

Compliance with capital adequacy ratios set for the subsidiaries is monitored monthly with reports outlining their calculation reviewed and signed by the Chairman of the Management Board and considered by the Holding's Board of Directors.

The Holding treats the capital as net assets attributable to the Holding owners, which amount to Tenge 3,574,738,712 thousand (31 December 2024: Tenge 3,001,621,516 thousand). The Holding is not subject to regulatory capital requirements.

As at 31 December 2025 and 2024 the Holding's subsidiaries complied with all externally imposed capital adequacy ratios by exceeding the minimum requirements.

31 Analysis by segment

The Holding has eight reportable segments, as described below, which are the Holding's strategic business units. The strategic business units offer different products and services, and are managed separately because they require different technology and strategies. For each of the strategic business units, the Chairman of the Management Board, reviews internal management reports on at least a quarterly basis. The following summary describes the operations in each of the reportable segments.

- Strategical management (the Holding Company);
- Affordable housing (Otbasy Bank JSC and KHC JSC);
- Large business support (DBK JSC);
- Agro-industrial complex support (ACC JSC);
- SME support and development (Damu EDF JSC);
- Investments development (QIC JSC);
- Export insurance (ECA JSC).

Information regarding the results of each reportable segment is included below. Performance is measured based on segment profit after income tax as included in the internal management reports that are reviewed by the Chairman of the Management Board. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to others who operate within these industries.

Segment information for the main reportable segments for the years ended 31 December 2025 and 31 December 2024 is set out below:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2025	31 December 2024

32 Contingencies

Legal proceedings. From time to time and in the normal course of business, claims against the Holding and its subsidiaries may be received. On the basis of its own estimates and internal professional advice, management of the Holding is of the opinion that no material losses will be incurred in respect of claims, and accordingly no provision has been made in these consolidated financial statements.

Tax contingencies. The taxation system in the Republic of Kazakhstan is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretation by different tax authorities, including opinions with respect to IFRS treatment of revenues, expenses and other items in the consolidated financial statements. Taxes are subject to review and investigation by various levels of authorities, which have the authority to impose severe fines and interest charges. A tax year remains open for review by the tax authorities during the five subsequent calendar years; however, under certain circumstances a tax year may remain open longer.

These circumstances may create tax risks in Kazakhstan that are more significant than in other countries. Management of the Holding believes that it has provided adequately for tax liabilities based on its interpretations of applicable tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these consolidated financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

Investment related commitments. The Holding purchases private equity funds liabilities to include in its portfolio. The Holding diversifies the investment portfolio by distributing investments among managers, relevant industries, territories and investment stages. As of 31 December 2025 the contingent capital commitments totalled Tenge 32,680,286 thousand (31 December 2024: Tenge 7,004,784 thousand). Under the constituent agreements of private equity funds, in case of default on capital commitments, after the manager issued a due claim, the Holding may be subject to sanctions, including moratorium on interest, cessation of profit distribution, temporary denial of right to participate in the corporate governance of the funds and forced sale of the Holding's share to co-investors and third parties. As at 31 December 2025 and 2024 the Holding did not have overdue investment commitments.

Compliance with covenants. The subsidiaries of the Holding are subject to certain covenants primarily relating to their borrowings. Non-compliance with these covenants may result in negative consequences for the Holding. The Holding was in compliance with covenants at 31 December 2025 and 31 December 2024.

Insurance. The insurance industry in the Republic of Kazakhstan is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. The Holding does not have full coverage for its premises and equipment, business interruption, or third-party liability in respect of property or environmental damage arising from accidents on its property or related to operations. Until the Holding obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on operations and consolidated financial position of the Holding.

Credit related commitments. The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the Holding will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Holding on behalf of a customer authorising a third party to draw drafts on the Holding up to a stipulated amount under specific terms and conditions, are collateralised by the underlying shipments of goods to which they relate or cash deposits and, therefore, carry less risk than a direct borrowing.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Holding is potentially exposed to loss in the amount equal to the total unused commitments, if the unused amounts were to be drawn down. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

The Holding monitors the term to maturity of credit related commitments, because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments. Outstanding credit related commitments are as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	31 December 2025	31 December 2024
Loan and credit line commitments to individuals	39,124,948	38,288,361
Finance lease commitments	796,754,961	697,635,389
Financial guarantees issued	1,096,111,734	910,386,198
Loan and credit line commitments	1,123,180,330	352,325,282
Total credit related commitments before provision	3,055,171,973	1,998,635,230

The total outstanding contractual amount of undrawn credit lines, letters of credit, and guarantees does not necessarily represent future cash requirements, as these financial instruments may expire or terminate without being funded. Credit related commitments are denominated in Tenge.

As of 31 December 2025, obligations for loan commitments, credit lines and other liabilities related to settlement operations amount to Tenge 1,123,180,330 thousand, of which 58% is accounted for by three borrowers with external credit ratings ranging from of BBB- to BBB+, 27% - by eight borrowers with internal credit ratings ranging from B- to B+, 12% - by eight borrowers with internal credit ratings ranging from BB- to BB+, 1% - by three borrowers with external credit ratings ranging from of BB- to BB+, and the remaining portion — by borrowers with credit ratings in the CCC- to CCC+ categories. (31 December 2024: Tenge 352,325,282 thousand, of which 26% is accounted for by a single borrower with an external credit rating of BBB, 23% - by two borrowers with internal credit ratings ranging from BB- to BB+, and the remaining portion — by borrowers with internal credit ratings in the B- to B+ category).

As of 31 December 2025, in addition to the loan irrevocable commitments disclosed above, the Holding has revocable commitments in the amount of Tenge 312,926,103 thousand (31 December 2025: Tenge 250,123,578 thousand). The Loan Commitment Agreement provides for the right of the Holding to unilaterally withdraw from the agreement in the event of unfavourable conditions for the Holding and in case of lack of resources for lending.

33 Offsetting financial assets and financial liabilities

The Holding has master netting arrangements of the International Swap and Derivatives Association ("ISDA"), and similar master netting agreements that do not meet offsetting criteria in the consolidated statement of financial position. The reason is that they create the right to offset recognised amounts that is legally effective only in case of default, insolvency, or bankruptcy of the Holding and its counteragents. In addition, the Holding and its counteragents do not intend to settle debt through offsetting or sell an asset and perform liability simultaneously.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

Financial assets and liabilities subject to enforceable master netting and similar arrangements are as follows at 31 December 2025:

	Amounts subject to master netting and similar arrangements not set off in the consolidated statement of financial position					Net amount of exposure (c) - (d) + (f)
	Gross amounts before offsetting in the consolidated statement of financial position (a)	Gross amounts set off in the consolidated statement of financial position (b)	Net amount after offsetting in the consolidated statement of financial position (c) = (a) - (b)	Financial instruments		
				(d)	(f)	
<i>(In thousands of Kazakhstani Tenge)</i>						
ASSETS						
Cash and cash equivalents	1,808,976,530	-	1,808,976,530	(1,808,383,319)	-	593,211
TOTAL ASSETS SUBJECT TO OFFSETTING, MASTER NETTING AND SIMILAR ARRANGEMENT						
	1,808,976,530	-	1,808,976,530	(1,808,383,319)	-	593,211
LIABILITIES						
Amounts payable under repurchase agreements	(151,490,283)	-	(151,490,283)	173,972,584	-	-
TOTAL LIABILITIES SUBJECT TO OFFSETTING, MASTER NETTING AND SIMILAR ARRANGEMENT						
	(151,490,283)	-	(151,490,283)	173,972,584	-	-

Financial assets and liabilities subject to enforceable master netting and similar arrangements are as follows at 31 December 2024:

	Gross amounts before offsetting in the consolidated statement of financial position (a)	Gross amounts set off in the consolidated statement of financial position (b)	Net amount after offsetting in the consolidated statement of financial position (c) = (a) - (b)	Amounts subject to master netting and similar arrangements not set off in the consolidated statement of financial position		Net amount of exposure (c) - (d) + (f)
				Financial instruments (d)	Cash collateral received (f)	
<i>(In thousands of Kazakhstani Tenge)</i>						
ASSETS						
Cash and cash equivalents	1,461,850,333	-	1,461,850,333	(1,460,773,172)	-	1,077,161
TOTAL ASSETS SUBJECT TO OFFSETTING, MASTER NETTING AND SIMILAR ARRANGEMENT	1,461,850,333	-	1,461,850,333	(1,460,773,172)	-	1,077,161
LIABILITIES						
Amounts payable under repurchase agreements	(74,188,008)	-	(74,188,008)	91,361,707	-	-
TOTAL LIABILITIES SUBJECT TO OFFSETTING, MASTER NETTING AND SIMILAR ARRANGEMENT	(74,188,008)	-	(74,188,008)	91,361,707	-	-

The amount set off in the consolidated statement of financial position reported in column (b) is the lower of (i) the gross amount before offsetting reported in column (a) and (ii) the amount of the related instrument that is eligible for offsetting. Similarly, the amounts in columns (d) and (f) are limited to the exposure reported in column (c) for each individual instrument in order not to understate the ultimate net exposure.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

34 Fair value

Fair value measurements are analysed by level in the fair value hierarchy as follows:

- level 1 are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities;
- level 2 measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This level includes instruments estimated based on active market quotations of similar instruments, market quotations for identical or similar instruments that are not considered as active, or other valuation techniques which inputs are directly or indirectly based on observable market data; and
- level 3 measurements are valuations not based on observable market data (that is, unobservable inputs).

Management applies judgement in categorising financial instruments using the fair value hierarchy. If a fair value measurement uses observable inputs that require significant adjustment, that measurement is a Level 3 measurement. The significance of a valuation input is assessed against the fair value measurement in its entirety.

Recurring fair value measurements. Recurring fair value measurements are those that other IFRS require or permit in the consolidated statement of financial position at the end of each reporting period. The level in the fair value hierarchy into which the recurring fair value measurements are categorised are as follows:

	31 December 2025			Total	31 December 2024			Total
	Level 1	Level 2	Level 3		Level 1	Level 2	Level 3	
<i>(In thousands of Kazakhstani Tenge)</i>								
ASSETS AT FAIR VALUE								
Other assets measured at fair value								
through profit or loss	4,416	-	194,515,197	194,519,613	4,496	-	172,930,909	172,935,405
Investment securities	722,625,105	629,303,349	76,055,607	1,427,984,061	610,369,836	73,027,423	51,265	683,448,524
Loans to customers	-	-	401,527,877	401,527,877	-	-	226,107,849	226,107,849
Embedded derivatives	-	-	82,597,136	82,597,136	-	-	-	-
TOTAL ASSETS AT FAIR VALUE	722,629,521	629,303,349	754,695,817	2,106,628,687	610,374,332	73,027,423	399,090,023	1,082,491,778

Level 2 measurements. Level 2 includes investment securities measured at fair value through other comprehensive income which fair value was determined based on valuation techniques that apply inputs from observable markets. Observable inputs include transaction prices at markets which are active for similar, but not identical instruments, and prices at markets which are not active for identical instruments. Although all instruments are listed at the Kazakhstan Stock Exchange, management believes that market for identical instruments is not active.

The Holding applies the discounted cash flow method for impaired investment securities measured at fair value through other comprehensive income and other assets measured at fair value through profit or loss for which fair value cannot be determined based on inputs from observable markets.

For impaired (Stage 3) debt securities, forecasts of estimated cash flows were based on the publicly available information related to the estimated repayment schedule after the restructuring for each respective category of securities. Assumptions in relation to discount rates were based on credit risk premiums of similar issuers that were understood as market quotations of securities in issue which trading has not been suspended.

There were no changes in valuation techniques for level 2 recurring fair value measurements during the year ended 31 December 2025 (2024: none).

Level 3 measurements. Certain investment securities measured at fair value through other comprehensive income that are not quoted at the observable markets and cannot be measured based on inputs from observables market were estimated using the discounted cash flow method. Forecasts for such securities were calculated based on the contractual repayment schedule. Assumptions in relation to discount rates were based on active market quotations for identical instruments of the issuer subject to respective adjustment of credit rating for credit rating difference.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

The Holding's investments in equity instruments categorised as level 3 comprise holdings in investment funds. These funds invest primarily in private equity through purchasing unlisted ordinary shares of businesses in emerging markets (predominantly the Republic of Kazakhstan). To determine fair value of investments in these funds, the Holding engaged an independent appraiser for the years ended 31 December 2025 and 31 December 2024. The approach followed by the appraiser was to estimate the fair value of the underlying portfolio investments (businesses) held by each fund, and then calculate the Holding's share of this business value. As a cross check, the appraiser also reviews fair values of investments as reported by each of the funds, and assesses the basis for material differences between the appraised fair value and fair values reported by the managers.

A number of valuation techniques were used by the appraiser to value the underlying portfolio investments, depending on the nature of the business concerned, the availability of market comparables, and the stage in the business's life cycle.

The control system implemented by the Holding includes preparation of fair value measurement by responsible front-office specialists of the subsidiaries and subsequent review by the executive of the relevant department. Special control mechanisms implemented by the Holding include:

- observable quotations review;
- overview and approval of new models and amendments to models;
- review and approval of new models and amendments to models with participation of the executive of the relevant front-office;
- overview of significant unobservable inputs, measurement adjustments and significant changes in fair value measurement of Level 3 instruments as compared with the prior period.

The table below provides information on significant unobservable inputs used at the year-end to value the most significant companies included in the portfolio of private equity funds categorised into Level 3 of the fair value hierarchy as at 31 December 2025, in addition to sensitivity analysis to changes in unobservable data, which the Holding thinks reasonably possible at the reporting date, assuming that all other variables remain unchanged.

Type of instrument	Company industries	Fair value of the Holding's interest In thousands of Kazakhstani Tenge	Valuation technique	Significant unobservable inputs	Range of values for the group	Effect from changes in significant unobservable inputs
Unquoted equity instruments	Transport and logistics	40,344,542	Discounted cash flows under the option agreement	Weighted Average Cost of Capital	17.97%	Decrease in the cost of capital would result in higher estimated fair value of investment
	Manufacturing	21,953,923	Discounted cash flows under the option agreement	Weighted Average Cost of Capital	19.34%-21.60%	Decrease in the cost of capital would result in higher estimated fair value of investment
	Agriculture	19,578,010	Discounted cash flows under the option agreement	Weighted Average Cost of Capital	16.59%-17.57%	Decrease in the cost of capital would result in higher estimated fair value of investment
	Unconventional energy	13,736,014	Discounted cash flows under the option agreement	Weighted Average Cost of Capital, EBITDA margin	16.56%-17.95% 83.42%	Decrease in the cost of capital/increase in EBITDA margin would result in higher estimated fair value of investment
	Service	13,276,058	Discounted cash flows under the option agreement	Weighted Average Cost of Capital	16.82%-17.99%	Decrease in the cost of capital/increase in EBITDA margin would result in higher estimated fair value of investment
	Private Equity Portfolio Funds*	77,565,170	Discounted cash flows under the option agreement	EBITDA margin	47.67%	Increase in adjusted NAV would result in higher estimated fair value of investment
	Other	8,061,480	Adjusted NAV	Adjusted NAV	-	
	Total	194,515,197				
	*Equity investments in private equity portfolio funds are measured at fair value of the Holding's share in ultimate investees and residual net assets of each fund determined based on information from up-to-date reports of the general partner of such fund. As a cross check, fair values of significant investments as reported by the funds are reviewed by calculating multipliers for quoted equity investments with similar parameters, and other available information on significant investees and market transactions with their equity instruments. If circumstances are identified that require remeasurement of fair value of such investments against information from the reports of general partners, the Holding makes appropriate adjustments.					

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

The table below provides information on significant unobservable inputs used at the year-end to value the most significant companies included in the portfolio of private equity funds categorised into Level 3 of the fair value hierarchy as at 31 December 2024, in addition to sensitivity analysis to changes in unobservable data, which the Holding thinks reasonably possible at the reporting date, assuming that all other variables remain unchanged.

Type of instrument	Company industries	Fair value of the Holding's interest In thousands of Kazakhstani Tenge	Valuation technique	Significant unobservable inputs	Range of values for the group	Effect from changes in significant unobservable inputs

	Unconventional energy	7,460,392	Income approach	EBITDA margin	82.43%	Increase in EBITDA margin would result in higher estimated fair value of investment
	Education	2,536,387	Income approach	EBITDA margin	34.60%	Increase in EBITDA margin would result in higher estimated fair value of investment
	Medical diagnostics	2,229,219	Discounted cash flows under the option agreement	Weighted Average Cost of Capital	16.73%	Decrease in the cost of capital would result in higher estimated fair value of investment
	Tourism	246,567	Discounted cash flows under the option agreement	Weighted Average Cost of Capital	17.77%	Decrease in the cost of capital would result in higher estimated fair value of investment
Unquoted equity instruments	Private Equity Portfolio Funds*	66,309,123		Adjusted NAV		Increase in adjusted NAV would result in higher estimated fair value of investment
	Other	3,373,837				
Total		172,930,909				

*Equity investments in private equity portfolio funds are measured at fair value of the Holding's share in ultimate investees and residual net assets of each fund determined based on information from up-to-date reports of the general partner of such fund. As a cross check, fair values of significant investments as reported by the funds are reviewed by calculating multipliers for quoted equity investments with similar parameters, and other available information on significant investees and market transactions with their equity instruments. If circumstances are identified that require remeasurement of fair value of such investments against information from the reports of general partners, the Holding makes appropriate adjustments.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

The valuation technique and inputs used in the fair value measurement for level 3 measurements of loans to customers, investment securities measured at fair value and related sensitivity to reasonably possible changes in those inputs as at 31 December 2025 are as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Fair value	Valuation technique	Inputs used	Range of inputs (weighted average)	Sensitivity analysis of fair value to unobservable inputs
<i>Loans to customers measured at fair value through profit or loss</i>	265,559,115	Discounted cash flow	Discount rate	17.61%-34.74%	Increase in discount rate would result in lower fair value
<i>Loans to customers measured at fair value through profit or loss</i>	135,968,762	Discounted cash flow	Credit risk margin	0.76%-7.93% 1.658% - 1.857% for the CNY and 15.050% – 17.050% for the KZT	Increase in credit risk would result in lower fair value.
<i>Embedded derivatives</i>	82,597,136	Black–Scholes option model	Discount rate		Increase in the risk free interest rate would result in lower fair value
<i>Investment securities</i>	76,055,607	Discounted cash flow	Discount rate	9.0%	Increase in discount rate would result in lower fair value
	560,180,620				

The valuation technique and inputs used in the fair value measurement for level 3 measurements of investment securities measured at fair value and embedded instrument and related sensitivity to reasonably possible changes in those inputs as at 31 December 2024 are as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Fair value	Valuation technique	Inputs used	Range of inputs (weighted average)	Sensitivity analysis of fair value to unobservable inputs
<i>Loans to customers measured at fair value through profit or loss</i>	165,043,303	Discounted cash flow	Discount rate	13.83%-28.08%	Increase in discount rate would result in lower fair value
<i>Loans to customers measured at fair value through profit or loss</i>	61,064,546	Discounted cash flow	Credit risk margin	1.60%-6.82%	Increase in credit risk would result in lower fair value.
	226,107,849				

The above tables disclose sensitivity to valuation inputs for financial assets and financial liabilities, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would change fair value significantly. For this purpose, significance was judged with respect to profit or loss, and total assets or total liabilities, or, when changes in fair value are recognised in comprehensive income, total equity.

The sensitivity of fair value measurement disclosed in the above table shows the direction that an increase or decrease in the respective input variables would have on the valuation result.

A reconciliation of movements in Level 3 of the fair value hierarchy by class of instruments for the year ended 31 December 2025 is as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Other assets measured at fair value through profit or loss	Investment securities	Loans to customers measured at fair value through profit or loss	Embedded derivatives
Fair value as at 1 January 2025	172,930,909	51,265	226,107,849	-
Gains or losses recognised in profit or loss for the year	(9,618,542)	68,145	(61,430,538)	(5,828,249)
Purchases	63,887,679	76,026,352	257,263,368	88,425,385
Repayment, contracts termination	-	(90,155)	(20,412,802)	-
Disposals	(32,684,849)	-	-	-
Fair value at 31 December 2025	194,515,197	76,055,607	401,527,877	82,597,136

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

A reconciliation of movements in Level 3 of the fair value hierarchy by class of instruments for the year ended 31 December 2024 is as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Other assets measured at fair value through profit or loss	Investment securities	Loans to customers measured at fair value through profit or loss
Fair value as at 1 January 2024	169,745,504	1,172,773	188,327,278
Gains or losses recognised in profit or loss for the year	877,538	(221,456)	19,442,058
Purchases	9,489,350	-	50,839,459
Repayment, contracts termination	(1,416,358)	(900,052)	(32,500,946)
Disposals	(5,765,125)	-	-
Fair value at 31 December 2024	172,930,909	51,265	226,107,849

Although the Holding believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements of loans to customers and embedded derivatives in Level 3, changing one or more of the assumptions used to reasonably possible alternative assumptions would have the following effects as at 31 December 2025 and as at 31 December 2024:

<i>(In thousands of Kazakhstani Tenge)</i>	Effect on fair value as at 31 December 2025		Effect on fair value as at 31 December 2024	
	Favourable	Unfavourable	Favourable	Unfavourable
Unquoted equity instruments - investments				
Service	3,080,629	(2,582,769)	377,417	321,476
Unconventional energy	1,659,383	(1,733,602)	1,431,721	(895,649)
Agriculture	858,579	(920,790)	176,659	(166,590)
Manufacturing	529,499	(556,825)	755,994	(675,504)
Transport and logistics	61,650	(59,628)	67,659	(65,440)
Unquoted equity instruments – other				
Private equity funds	7,773,370	(7,773,370)	6,682,236	(6,682,236)
Immaterial subsidiaries	81,333	(81,333)	66,901	(66,901)
Total unquoted equity instruments	14,044,443	(13,708,317)	9,558,587	(8,230,844)

<i>(In thousands of Kazakhstani Tenge)</i>	2025 Effect on profit or loss		2024 Effect on profit or loss	
	Favourable	Unfavourable	Favourable	Unfavourable
Loans to customers	8,764,836	(8,196,101)	4,811,583	(4,556,303)
Embedded derivative	3,440,808	(3,392,345)	-	-
Total	12,205,644	(11,588,446)	4,811,583	(4,556,303)

The favourable and unfavourable effects of using reasonably possible alternative assumptions are calculated by recalibrating the model values:

- for unquoted equity instruments – investments: decrease and increase in the weighted average cost of capital by 1% and EBITDA margin by 10%;
- for other unquoted equity instruments: adjustment to net asset value by 10%;
- for loans to customers measured at fair value through profit or loss: decrease and increase in the discount rate/credit risk margin by 1%;
- for embedded derivatives: changes of the Tenge/CNY risk free rate by 0.25%.

Embedded derivative

During 2025 the Holding entered into finance lease agreements, which provide for unilateral indexing of lease payments depending on movements in CNY/Tenge exchange rates.

Management has applied professional judgements in relation to separation and separate accounting of the currency derivative, which comprises an option and is embedded in a finance lease agreement, in compliance with IFRS 9.

This mechanism of indexation is unilateral and economically it represents a series of currency option components with different maturities.

Therefore, the Holding has concluded that the currency indexation is not closely related to the economic characteristics and risks of the underlying finance lease agreement, and the embedded derivative should be separated and accounted for separately at fair value through profit or loss.

Baiterek National Investment Holding Joint Stock Company
Notes to the Consolidated Financial Statements - 31 December 2025

The Holding does not apply hedge accounting to this instrument; the derivative is used for currency risk management purposes.

The base for calculation of embedded derivative includes all future payments under finance lease agreements and contingent liabilities linked to appreciation in the rate of the CNY against Tenge.

These embedded derivatives are recorded at fair value in the financial statements in finance lease receivables. The estimated amount of the embedded derivatives, which is included in finance lease receivables as at 31 December 2025 is Tenge 82,597,136 thousand (31 December 2024: none).

The following assumptions are used by management to estimate the fair values of the embedded derivative instruments:

- risk-free rates were estimated using the yield curves for the respective currencies and varied from 1.658% to 1.857% for CNY and from 15.050% to 17.050% for Tenge;
- volatility in the model is defined based on the historical 12-month observations of fluctuations in actual foreign exchange rates;
- no transaction cost is included in the model.

On initial recognition of the embedded derivative in 2025, its fair value was Tenge 88,436,441 thousand. Concurrent with the recognition of the embedded derivative, a corresponding liability associated with the embedded derivative was recognised and included in other liabilities at the lease inception date. This liability is subsequently applied to increase the net investment in the finance lease at the lease commencement date.

After the transfer of a part of the leased assets during 2025, the amount of Tenge 10,864,373 thousand was reclassified from other liabilities to net investment in finance lease. Subsequently this amount is amortised within finance income during the lease term.

As at 31 December 2025, the balance of liability in the amount of Tenge 77,564,804 thousand associated with the embedded derivative is recorded within other liabilities and relates to the finance lease agreements under which the leased assets have not yet been transferred to lessees.

Assets and liabilities not measured at fair value but for which fair value is disclosed. Fair values analysed by level in the fair value hierarchy and carrying value of assets and liabilities not measured at fair value at 31 December 2025 are as follows:

The fair values in level 2 and level 3 of fair value hierarchy were estimated using the discounted cash flows valuation technique. The fair value of floating rate derivative instruments that are not quoted in an active market was estimated to be equal to their carrying amount. The fair value of unquoted fixed interest rate instruments was estimated based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risk and remaining maturity.

Management believes that the fair value of the Holding's other financial assets and other financial liabilities approximates their carrying amounts.

The following assumptions are used by management to estimate the fair values of financial instruments:

- Discount rates of 3.32% to 24.90% p.a. for foreign currency loans and of 7.46% to 38.48% p.a. for Tenge loans (31 December 2024: 4.82% to 20.28% p.a. for foreign currency loans and of 7.67% to 32.44% p.a. for Tenge loans) are used for discounting future cash flows on loans to customers;
- Discount rates of 3.40% to 3.88% p.a. for foreign currency and 14.20% to 21.29% p.a. for Tenge (31 December 2024: 5.37% p.a. for US Dollar and 12.66% to 16.12% p.a. for Tenge) are used for discounting future cash flows on debt securities measured at amortised cost;
- Discount rates of 16.99% to 21.19% p.a. (31 December 2024: 12.83% to 16.81% p.a.) are used for discounting future cash flows on loans to banks;
- Discount rates of 16.26% to 37.32% p.a. (31 December 2024: 12.40% to 31.13% p.a.) are used for discounting future cash flows on finance lease receivables;
- Discount rates of 3.07% to 5.07% p.a. for foreign currency and 14.80% to 18.13% p.a. for Tenge (31 December 2024: 5.51% p.a. for US Dollar and 12.21% to 15.69% p.a. for Tenge) are used for discounting future cash flows on debt securities issued;
- Discount rates of 15.28% to 17.19% p.a. (31 December 2024: 12.24% to 13.09% p.a.) are used for discounting future cash flows from loans from the Government of the Republic of Kazakhstan;
- Discount rates of 16.42% to 16.57% p.a. (31 December 2024: 12.56% to 12.66% p.a.) are used for discounting future cash flows on subordinated debt;
- Discount rates of 2.54% to 5.51% p.a. for foreign currency loans and of 15.66% to 20.00% p.a. for Tenge loans (31 December 2024: 2.55% to 6.08% p.a. for foreign currency loans and of 10.90% to 14.44% p.a. for Tenge loans) are used for discounting future cash flows on loans from banks and other financial institutions;

36 Related party transactions

Parties are generally considered to be related if the parties are under common control, or one party has the ability to control the other party or can exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form. The Government of the Republic of Kazakhstan has control over the Holding as the Government of the Republic of Kazakhstan is an ultimate controlling party of the Holding. The Holding decided to apply the exemption from disclosure of individually insignificant transactions and balances with the state-owned entities.

At 31 December 2025, the outstanding balances with related parties and average nominal interest rates were as follows:

<i>(In thousands of Kazakhstani Tenge)</i>	Ultimate parent organisation	Associates and joint ventures	Transactions with state-owned entities
ASSETS

As at 31 December 2025 the Holding has issued financial guarantees on behalf of AstanaGaz KMG JSC, with the guarantee amounts of Tenge 56,567,500 thousand. The obligation arises from the moment of default, which occurs in case of partial or complete non-fulfilment by AstanaGaz KMG JSC of the obligation to pay the principal and interest/coupon in accordance with the payment schedules. The guarantees have maturity from 2033. The guarantee is noninterest bearing and not collateralised.

37 Subsequent events

On 15 and 18 July 2025, the President of the Republic of Kazakhstan signed the current Law on Amendments to the Tax Code of the Republic of Kazakhstan, as well as the new Tax Code of the Republic of Kazakhstan, which will come into force on 1 January 2026. According to the new Tax Code, lessors have the right to reduce their taxable income by 50% of the amount of the lease agreement fee, excluding penalties (fines, penalties), but not exceeding 50% of the taxable income amount for the reporting tax period (previously - by the amount equal to 100%). This change will impact the Holding's tax burden, as the amount of corporate income tax payable will increase. The Holding is still in the process of assessing the potential effect of this change.

In February 2026 the receivables from the Government for reimbursement of premium on customer accounts for the amount of Tenge 15,000,000 thousand has been repaid.

In March 2026 the Holding issued bonds in the amount of Tenge 50,000,000 thousand, with a coupon rate of 17.00% p.a. and a maturity of 1 year.

In March 2026 the Holding issued bonds in the amount of Tenge 50,000,000 thousand, with a coupon rate of 17.50% p.a. and a maturity of 5 years.

In March 2026 the Holding issued bonds in the amount of Tenge 50,000,000 thousand, with a coupon rate of 17.50% p.a. and a maturity of 5 years.

In March 2026 the Holding redeemed the fourth tranche of Eurobonds with a nominal value of USD 97,416 thousand (equivalent to Tenge 47,002,246 thousand).

In April 2026 the Ministry of Finance of the Republic of Kazakhstan made a contribution to the share capital of the Holding in the amount of Tenge 50,000,000 thousand.

In April 2026 the Holding redeemed debt securities issued in the amount of Tenge 100,000,000 thousand.

In April 2026 the Holding placed a Eurobond issue in a private placement in the amount of Tenge 250,000,000 thousand, with a coupon rate of 16.95% p.a. and maturities of 3 years for Tenge 150,000,000 thousand and 5 years for Tenge 100,000,000 thousand.
