Austria, as of 2002

Advantages for Data Vendors:

ONE data feed, ONE connection and ONE-stop shopping

The Vienna Stock Exchange's ADH data feed offers data of 10 markets in ONE single consolidated format, the TIP protocol. This reduces your resources for IT maintenance and release management. ONE connection provides all the data, saves you valuable IT resources and bandwidth capacity is used more efficiently. The ADH data feed is designed as a redundant system and offers higher performance, easier recovery management and better data quality. You will get support via a dedicated helpline and helpdesk.

You can subscribe to all our markets via a one-stop shop with the Vienna Stock Exchange, reducing your administrative and legal work to a minimum.
