

Key figures of the Austrian stock market

The infrastructure of the Vienna Stock Exchange

As the main provider of market infrastructure in the region, Wiener Börse AG is the gate to global markets. Operating the stock exchanges in Vienna and Prague, the group offers state-of-the-art systems, information and IT services. Listed companies receive maximum liquidity and investors benefit from fast and cost-effective trading by the market leader. Wiener Börse AG also collects and

distributes stock market data and calculates the most important indices of the region. Because of this unique know-how the national stock exchanges in Budapest, Zagreb and Ljubljana trust its IT services. It also participates in other energy exchanges in the region and the central securities depository CSD Prague. This diversification creates a stable economic basis for the future.

Internationality of the Vienna Stock Exchange

All major international trading firms have linked up to the Viennese market. A major share of trading volume on the Vienna Stock Exchange is generated by international trading members. National and, above all, international institutional investors are invested in ATX prime stocks.

The Network of the Vienna Stock Exchange

The Vienna Stock Exchange is recognized globally for its unique knowhow. It operates the central data feed for the markets of Central and Eastern Europe (CEE) and calculates currently over 140 indices. Worldwide, most structured products with a reference to CEE and CIS are based on the indices created by the Vienna Stock Exchange.
